MYOSOTIDIUM NOBILE, or Antarctic Forget-Me-Not, each 21s. 6d.—This plant, from the Chatham Islands, is one of the most remarkable that has been introduced for some years, being totally distinct from all others. It has large thick leaves, 8 or 9 inches across, of a dark glossy green, and sends up magnificent trusses of bloom of the most beautiful blue and white, similar to a Forget-me-not, but of a giant form. A Drawing of it is published in Curtis's "Botanical Magazine" for September. A description taken from the above is also published in the *Gardeners' Chronicle* of Sept. 17, 1859, wherein Dr. Lindley says:—"This is the handsome perennial provisionally named Cynoglossum nobile by Dr. Hooker in our last year's Volume, page 240. It is quite deserving all the encomiums that have been passed upon it."

GLADIOLI, named varieties, from the choicest and largest collection in England, 6d. to 5s. each. Also a fine lot of bulbs raised from seeds saved from the best flowers, all of which will flower in the summer of 1860. 7s. 6d. per dozen, or 50s. per 100. These are strongly recommended.

RHODODENDRON LIMBATUM.—Pale blush, bordered with bright crimson. This has received several medals at the exhibitions for Rhododendrons, being very distinct and one of the most free flowering. 21s. each.

RHODODENDRON MINNIE.—White, very large blotch of chocolate-coloured spots, a fine flower, and remains a very long time in bloom. This is one of the most curiously marked Rhododendrons amongst all the white; it bears a noble truss of blooms, which cannot fail to be admired. 21s. and 31s. 6d. each. Selections can be made from one of the finest collections in Europe.

PHLOX MRS. STANDISH.—The purest white, with a large red eye, 5s. each. Also a large collection of the finest kinds which J. S. has shown during the last summer and in every case received the First Prize. Plants from 1s. to 2s. 6d. each.

A CATALOGUE containing a full description of the best Hardy Plants in cultivation will be forwarded on application to

The Royal Nursery, Bagshot.

### TRANSPLANTED FOREST TREES.

WOOD AND INGRAM beg to offer the following extra fine and well rooted stuff:—

ALDERS, 4 to 5 feet, 35s.; 5 to 6 feet, 40s. per 1000.

### TO THE TRADE.—CONTINENTAL FLOWER SEEDS.

FREDERICK WILLIAM WENDEL, SEEDSMAN and FLORIST, Erfurt, Prussia (established 1832).

F. W. W. begs to inform the Trade that his Wholesale CATALOGUE of the above is now ready, containing Collections of ASTERS, STOCKS, BALSAMS, WALLFLOWERS, &c., and also an extensive list of all other New and Choice FLOWER SEEDS, sold in assortments, or by weight.

F. W. W. having extensive grounds in the town and vicinity of Erfurt, and devoting his personal attention to this department of his establishment, he can with the greatest confidence recommend all Seeds offered by him, as genuine and of the best quality.

Agent for this country—Mr. GEO. MACINTOSH, Nurseryman and Seedsman, High Road, Hammersmith, London, W., to whom all orders should be addressed, and where PRICE LISTS can be obtained post free on application.

The prices will be found as low as any house which supplies a genuine article. All parcels carriage paid to London.

### THE GARDEN FARM, DRUMCONDRA, DUBLIN.

N. NIVEN respectfully intimates to the lovers of gardening that the transplanting season being now at hand, he is prepared with a large and select stock of all kinds and sizes of Fruit Trees, Bushes, and Strawberry Plants, many in bearing condition, and beautifully grown; with a rich collection of Dwarf Orchard House Pot-grown Trees, full of flower-buds. Also, a fine assortment of specimen Hardy Ornamental Trees, Coniferæ, select bedding Herbaceous Plants, and choice Alpines for Rockwork, all suited for immediate effect. Amongst the rest, has a large stock of well furnished specimens of the beautiful Lombardy Poplar, so admirably introduced in the groupings of English landscape, from 8 to 10 feet high. For margins to flower beds, green moss-like verges, and covering of sloping banks, has a large supply of his newly introduced "Cerastium," which never requires mowing, and will be found a great acquisition as a substitute for Grass edgings, besides flowering for two months in early summer like a ribbon of snowy whiteness. Prices moderate, according to size, age, and rarity. Lists on application.

### NEW STRAWBERRY, "PRINCESS FREDERICK WILLIAM."

N. NIVEN, of the GARDEN FARM, Drumcondra, Dublin, is now prepared to execute orders for the supply of the above first-rate Seedling Strawberry, named by him, which for two seasons past gave ripe fruit out of doors on the 29th May; colour a bright scarlet, of a rich Pine Apple perfume and flavour; berries averaging from 3 to 5 inches round; calyx leafy; foliage deeply serrate; distinct and very hardy. The thickset flower trusses show extra early and freely, even on youngest plants. To the Forcer this Strawberry will be invaluable. Price 40s. for 100; 20s. for 50; 10s. for 25; 6s. for 12; or established in thumb pots, 1s. each.

N. N.'s agent in England is W. J. Nicholson, Egglescliffe, Yarm, Yorkshire, who has (along with Mons. Gloede, a celebrated grower in France) tested the merits of this earliest of known sorts—*vide* description in W. J. N.'s recent Catalogue. His final testimony of 8th October runs thus—"It is almost impossible to estimate too highly the merits of your splendid early Strawberry. As a forcer, it stands with me at the head, and as an extra early cropper in the open ground, unsurpassed. It will soon be grown by every one, &c." Mons. Gloede's testimony is to the following effect—"I was surprised to see how quickly the plants threw up their flower stems, and how quick they set their fruit and how fast the latter ripened. The colour is admirable and the flavour exquisite. There is no doubt it will become a general favourite as a first early, both for forcing and out-of-door culture, and great credit is due to you for such an invaluable introduction. (Signed) Ferdinand Gloede, Aux Sablons, near Moret-sur-Loing, France."

N.B.—Orders by the Trade (for not less than 100), one-third off above price. Postage Stamps or Post-office Orders must accompany all unknown orders.

DESIGNS FOR FLOWER BEDS AND GARDENS.—In consequence of numerous applications J. MARSHALL, 2, Goldsmith Street, Nottingham, has been induced to prepare another set of Designs. They comprise upwards of 80, diversified in style, and will be forwarded to any address on receipt of 24 postage stamps.

GARDEN LABEL.—Neat, durable, and well-executed LABELS, painted and lettered in oil paint, and varnished, equal to enamel. A specimen sent on the receipt of 3 Postage stamps.—Address F. H. LYDBURY, North Shropshire.

C. STEPHENSON, late STEPHENSON AND SONS, 61, Gracechurch St., London, E.C., Manufacturer of Iron, Hurdles, Fencing, &c., Improved Iron and Copper Conical Boilers and Apparatus for Warming Buildings of every description by Hot Water.

Prices and Estimates furnished upon application.

HOT-WATER PIPES at wholesale prices, with Elbows, Syphons, Tee Pipes, and every other connection. Wrought and cast iron Boilers, Saddle, Conical, Cylinder, and Elliptic, from 24s. each. Boilers and Iron Stands to use without brickwork. Valves from 12s. each. Coil Boxes, Furnace Doors, Furnace Bars, Supply Cisterns, and Builders' Castings of every description in stock, at Mr. LYNCH WHITE'S Iron Wharf, Upper Ground Street, Blackfriars Bridge, London, S.

### HOT-WATER APPARATUS.

J. JONES begs to offer a complete HOT-WATER APPARATUS FOR GREENHOUSES, at the following prices, delivered free to any Railway Station in England:—

| Size of House. | With Cylinder Boiler. | With Saddle Boiler. |
|---|---|---|
| 20 feet by 10 feet .. | £8 10 0 .. | £9 0 0 |
| 25 ,, by 12 ,, .. | 10 0 0 .. | 10 10 0 |
| 30 ,, by 12 ,, .. | 11 10 0 .. | 12 0 0 |
| 30 ,, by 15 ,, .. | 13 10 0 .. | 14 10 0 |
| 40 ,, by 15 ,, .. | 16 10 0 .. | 17 10 0 |
| 50 ,, by 15 ,, .. | 18 10 0 .. | 20 0 0 |

The above prices include Boiler, strong Furnace Doors, Bars, Soot Doors, Cistern, Damper, Hot-water Pipes and Connections, Air Pipes, &c., all ready for fixing, and of the best quality. Further particulars will be sent on application. Parties ordering must send plans, showing doorways, position of boiler, &c.—J. JONES, Hot-water Apparatus Manufacturer, 6, Bankside, Southwark, London, S.E.

### HORTICULTURAL BUILDINGS AND HEATING BY HOT WATER.

JOHN R. PEILL, 17, New Park St., Southwark, S.E., Manufacturer of every description of Buildings for Horticultural purposes, and Inventor of the Improved Conical Boiler for heating the same, is prepared to undertake works of any magnitude, and refers among others to the celebrated range of FORCING HOUSES at HER MAJESTY'S GARDENS, FROGMORE, and at SIR ROBERT PEEL'S, DRAYTON MANOR, constructed under the superintendence of his Manager, Mr. JOHN JONES; and also to his BOILERS fixed at the CRYSTAL PALACE, the ROYAL BOTANIC GARDENS, REGENT'S PARK, and KEW, and at several hundreds of the Nobility's seats, Public Establishments, and Manufactories in London and the provinces. J. R. P. also manufactures every description of Iron Roofs, Iron Houses, and Iron Fencing, plain and ornamental. Strong Iron Hurdles for Sheep (6 ft. long, 3 ft. high, with 5 bars), 4s. 3d. each; ditto for cattle, 4s. 9d. each. Prices and other particulars forwarded on receipt of one postage stamp.

# HORTICULTURAL WORKS,

## DANVERS STREET, PAULTON'S SQUARE, CHELSEA, S.W.

# JAMES GRAY

RESPECTFULLY BEGS TO INFORM THE NOBILITY, GENTRY, NURSERYMEN, GARDENERS, AND OTHERS, THAT HE CONTINUES TO CARRY ON THE BUSINESS IN ALL ITS BRANCHES AT THE ABOVE OLD ESTABLISHED PREMISES.

## CONSERVATORIES, GREENHOUSES, FORCING HOUSES, VINERIES, PITS, &c.,

OF EVERY DESCRIPTION, ERECTED ON THE MOST APPROVED PRINCIPLES.

## HEATING BY HOT WATER.

J. G. having specially devoted his attention for many years to this part of the business, is now fully prepared to Heat every description of public and private buildings, viz :—Churches, Mansions, Warehouses, &c., as well as all structures connected with Horticulture, in the most efficient manner. His system is the most simple that can be adopted—which he has found by long experience to be the best—can be constructed at less cost, and is more easily managed than those of a complicated nature which have attracted the notice of the public.

J. G. begs to call attention to his CAST-IRON CORRUGATED ARCH BOILER, which from its simplicity of construction has not the liability to fracture to which those of a more complex design are always subject. They have been extensively used for many years, and have given the greatest satisfaction.

All business is conducted at this establishment on the principle of lowest remunerative profits consistent with best materials and workmanship.

## PLANS AND ESTIMATES FURNISHED ON THE SHORTEST NOTICE.

---

MONRO'S CANNON BOILERS.

MUCH has of late been said about BOILERS FOR HEATING BY HOT WATER, but these Boilers have now proved themselves to be the best at present invented. They are adapted for Heating every description of Building, and are made of various sizes. The price of the

| | | | |
|---|---|---|---|

# WEEKS' ONE BOILER SYSTEM.

**So styled from the fact that the largest Horticultural Establishments in Europe are now effectually heated by WEEKS' ONE BOILER.**

THE SEASON FOR TESTING THE EFFICIENCY OF A HOT-WATER APPARATUS having arrived, J. WEEKS & Co. are privileged by the under mentioned well-known Horticultural Firms to issue a special invitation to the nobility, clergy, and gentry to pay a visit to their immense Establishments in order to become eye-witnesses of the extraordinary power of WEEKS' ONE BOILER SYSTEM.

J. W. & Co. beg emphatically to assert that their ONE BOILER SYSTEM is is every respect superior to any other method of Heating. It is more economical and clean, requires no night attendance, effects a great saving in labour, and that it is infinitely more efficient is clearly shown by the following statistics :—

| | Length of Pipe Heated on Weeks' One Boiler System. |
|---|---|
| | Feet |
| Messrs. E. G. Henderson & Son, Wellington Nursery, St. John's Wood .. .. .. .. .. .. .. .. | 5500 |
| Messrs. F. & A. SMITH, Dulwich Nursery .. .. .. .. | 10,000 |
| Mr. WOODROFFE, Harrow Road, Paddington .. .. .. | 4000 |
| Mons. LOUIS VAN HOUTTE, Ghent, Belgium .. .. .. .. | 13,000 |

J. W. & Co. also manufacture smaller and less expensive Boilers upon the same principle as the ONE BOILER SYSTEM, ranging in size from Nos. 1 to 6, at prices from 4*l.* up to 60*l.*

J. W. & Co. also invite an inspection of their own HORTICULTURAL SHOW ESTABLISHMENT at Chelsea, which they built expressly as a place of reference for exhibiting various designs and improvements in the Construction of CONSERVATORIES, GREENHOUSES, PINE STOVES, VINERIES, ORCHARD HOUSES, CUCUMBER and other FORCING PITS, together with an extensive WINTER GARDEN, the whole in full and constant operation, and now being managed for the CHOICE FRUITS, displaying an unrivalled selection of HORTICULTURAL STRUCTURES suited for every required purpose.

J. WEEKS & Co. have constantly on hand an extensive variety of HORTICULTURAL BUILDINGS ready for fixing in any part of the country, and also Forcing Frames and Pit Lights in large quantities.

**J. WEEKS & CO., Horticultural Builders and Hot-Water Apparatus Manufacturers,**
**King's Road, Chelsea, S.W.**

# HILL & SMITH'S

## PATENT CONTINUOUS PARK FENCE

THIS FENCE is made in a variety of sizes suitable for any situation, and is much superior in appearance to the ordinary fences, than which it is also cheaper and stronger. It has obtained upon two occasions the Silver Medal of the Royal Agricultural Society of England, besides many other premiums. Many miles have been erected by HILL & SMITH on the London and North Western Railway, between London and Bletchly Stations, and it has been erected at the Parks of upwards of [illegible] Noblemen and Gentlemen in England; that at Welbeck Abbey, the seat of his Grace the Duke of Portland, being entirely surrounded with it as a fence against Deer nearly 10 miles in extent. The patent principle is also applied to Iron Hurdles, where their strength is much increased and their cost reduced. ILLUSTRATED PRICED CATALOGUES will be sent on application to HILL & SMITH, Brierly Hill Iron Works, near Dudley, who are the inventors and sole manufacturers, or to their London Warehouse, 49, Broad Street Buildings, E.C., where specimens may be seen, or to Mr. B. SAMUELSON'S, 76, Cannon Street West, London, E.C.

## LEE'S NEW WHITE SPROUTING BROCCOLI.

# MESSRS. JOHN & CHARLES LEE

FEEL highly honoured in being the means of introducing this most important Vegetable production to the notice of the Public. The real value of this prolific Broccoli will not be ascertained till it is in the hands of every Cottager in the Kingdom; and they only regret that their present very limited stock will not enable them at once to spread it more widely.

The engraving, taken from a Photograph, which accompanied Dr. Lindley's remarks in the *Gardeners' Chronicle* of Dec. 10, and was inserted in our advertisement of December 17, shows the enormous crop of good White Broccoli to be expected from it under good cultivation. The centre head is large and fine, and the subordinate heads, all of good size, number from 30 to 50. It has remained true to its branching character for four years; it is perfectly hardy, and is in season through JANUARY, FEBRUARY, AND MARCH, a period at which it is so desirable to obtain good White Broccoli.

Sealed packets, price 2*s.* 6*d.* post free, are now ready. To be had of all the principal Seedsmen.

**Nursery and Seed Establishment, Hammersmith, London, W.**

## GENUINE GARDEN SEEDS.

**237 & 238, HIGH HOLBORN, LONDON, W.C.**

## COVENT GARDEN MARKET, LONDON, W.C.

# BUTLER & McCULLOCH'S

**DESCRIPTIVE AND PRICED CATALOGUE OF FLOWER, TREE, SHRUB, VEGETABLE, AND AGRICULTURAL SEEDS**

(READY IN A FEW DAYS, AND FORWARDED FREE AND POST PAID ON APPLICATION),

The Notes and Descriptive Matter of which have been carefully revised and much valuable information added. The new and recent introduction of species and varieties have also been added, and as heretofore the seeds which require for their maturation a warmer climate than that of England have been saved for us in Italy by that distinguished amateur, the late Sardinian correspondent of Messrs. James Carter & Co., who has appointed us his representatives in this country.

BALSAM.—New Indian Double (new and distinct), pale pink spotted pearl grey.
,, ,, ,, ,, (new and distinct) maculata, pearl grey, with brilliant carmine stripes.
The above are remarkable for their beauty, hardiness, duration, free flowering, and robust growth.
,, ROSE ISABELLA (new), extremely double, light rose chamoise, changing to pale yellow, beautiful.
CELOSIA NOVA species, silvery white, shaded with bright rose. One of the most elegant plants in cultivation, producing a multitude of long spikes of feathery blossoms, extremely beautiful.
DATURA CARTHAGINIENSIS (new), pure white, novelty from Granada. Remarkably hardy, free flowering, with trumpet-shaped blossoms of an immense size, exquisitely beautiful and sweet scented.
,, HUMILIS FLORE PLENO (D. Chlorantha flore pleno). Deep golden yellow. A magnificent dwarf plant from Texas, producing a profusion of long double trumpet-shaped flowers, of great beauty and sweet scented.
RICINUS PURPUREA MAJOR, ,, SANGUINEUS NOVA — Majestic plants, of great beauty and highly ornamental.
PORTULACCA AUREA STRIATA (new), sulphur yellow striped with golden yellow and tinged with red.
,, BLENSONI (new), light scarlet.
,, CARYOPHYLLOIDES (new), rose, striped with brilliant carmine.
The above new varieties are by far the most beautiful of this exquisite genus.
SALVIA SPLENDENS EXCELSA (new), brilliant scarlet, large, and beautiful; very elegant.
SOLANUM HETEROGANUM, large black fruit; new and handsome.
,, COCCINEUM, splendid scarlet fruit.
,, TOXANUM, splendid new var.; height from 1 to 2 feet; fruit of a waxy scarlet appearance, with the form of a Maltese cross in the centre, and may be preserved as an ornament for some time. Foliage shaded mulberry, very handsome, a great novelty.
,, TOMATE (new), remarkable for its brilliant carmine fruit of the form of a large egg; an extremely handsome ornamental plant.
,, VESCUM (new), large violet fruit, charming variety.
DOLICHOS LABLAB ATROSANGUINEUS (new), splendid maroon fruit, exquisitely beautiful.
DOLICHOS ENSIFORMIS, species gigantea Texana. A magnificent climber of rapid growth.
IPOMŒA MARGINATA, richest velvety purple to skyblue, with distinct white border, flowers large and magnificent.
,, RENFORMIS, yellow with violet eye, distinct and extremely beautiful.
,, SPLENDIDISSIMA (new), richest dazzling blue, edged with the purest white, exquisitely beautiful.
TRYHOSANTHES COLUBRINA VERA (True serpent fruit), very long elegant fruit, of a brilliant carmine colour when ripe.
ARCTOTIS GRANDIFLORA (new), beautiful pale sulphur yellow, with dark crimson, extremely large and exquisitely beautiful.
CUPHEA EMINENS, red and yellow, long tuble, magnificent plant, unsurpassed for elegance and beauty, throwing out Araucaria-like branches, covered with the most beautiful flowers.
CYCLAMEN AFRICANUM MACROPHYLLUM SUPERBUM (new), shaded, red, beautiful.
,, NEAPOLITANUM (new), pink and white.
,, ,, ALBUM (new), pure white.
,, PERSICUM ATROPURPUREUM (new).
,, ,, ROSEUM (new)
,, ,, RUBRUM (new).
,, ,, STRIATUM MAGNIFICUM (new).—Brilliant carmine, striped with white, very large, the most elegant and novel variety yet known.
GERANIUM ENDLICHERIANUM.—Curious tuberous plant, blooms the second year; flowers elegant, deep rose, with orange stamens, of an immense length, producing a novel and striking effect.
PELARGONIUMS, in collections to name, embracing only the newest and most magnificent varieties.
CARNATIONS do. do. do.
PICOTEES do. do. do.
MAURANDYAS do. do. do.
TROPÆOLUMS do. do. do.
THUNBERGIA, new, scarlet, splendid.
DIANTHUS CHINENSIS MONSTROSUS (Heddewigi).
CALLIRHOE PEDATA (digitata).
TACSONIA IGNEA.—Splendid scarlet Passionflower, unequalled for the dazzling resplendence of its flowers.
,, MANICATA.—Intense orange scarlet, rays nearly black, giving the effect of a brilliant scarlet Anemone, striking and exquisitely beautiful.

*For further particulars and other choice novelties see Catalogue.*

**BUTLER and McCULLOCH, Seedsmen, Covent Garden Market, London, W.C.**

DWARF MAIDEN FRUIT TREES.—
APPLES.
PEARS. | CHERRIES. | PEACHES.
PLUMS. | APRICOTS. | NECTARINES.
Prices moderate.
Fine and clean grown; and all the leading sorts can be supplied in quantities by GEORGE JACKMAN & SON, Woking Nursery, Surrey.

DWARF TRAINED FRUIT TREES.—
APPLES.
PEARS. | CHERRIES. | PEACHES.
PLUMS. | APRICOTS. | NECTARINES.
Prices moderate.
Great care is taken in the formation of these fine, healthy, free-grown trees. Particulars can be obtained of GEORGE JACKMAN & SON, Woking Nursery, Surrey.

FOREST TREES.

JOHN WATERER has to offer upwards of a Hundred Thousand of each of the following, from 2 to 4½ feet high, and all good rooted:—
CHESNUT | LARCH | BIRCH
HAZEL | ASH | ALDER
SCOTCH | LAURELS | WITHY, &c.
Samples with prices sent on application. Planting done by contract.—The American Nursery, Bagshot, Surrey.

NOTICE TO THE SEED TRADE.—To prevent an erroneous impression in reference to certain collections of STOCKS and ASTERS lately advertised, Mr. APPELIUS has suppressed their sale, and will again only furnish the full-sized packets already known to his customers.
The London Agency of Mr CHARLES APPELIUS, Erfurt.

YORKSHIRE SEED ESTABLISHMENT.

E. P. DIXON begs to announce that his new SELECT PRICED LIST or KITCHEN GARDEN, FLOWER, and AGRICULTURAL SEEDS for 1860 is now ready, and will be forwarded post free on application to
57, Queen Street, Hull.

KEMP'S INCOMPARABLE EARLY CABBAGE.
E. P. DIXON can supply this well-tried Cabbage, which has proved in every way equal to the description given of it last season. It can be safely recommended as the best variety in cultivation, price 1*s.* per packet, and may be had of the following Seedsmen:—
Hurst & M'Mullen, 6, Leadenhall Street, London, E.C.
Noble, Cooper, & Bolton, 152, Fleet Street, London, E.C.
J. Wrench & Sons, London Bridge, E.C.
Beck, Henderson, & Child, Adelphi Terrace, Strand, W.C.
Nutting & Sons, 60, Barbican, London, E.C.
Charlwood & Cummins, Tavistock Row, London, W.C.
Geo. Dixon, 43A, Moorgate Street, London, E.C.
Fisher, Holmes, & Co., Sheffield.
Fisher & Godwin, Sheffield; or of
E. P. DIXON, 57, Queen Street, Hull.

PETER LAWSON AND SON
THE QUEEN'S SEEDSMEN AND WOOD FORESTERS,
respectfully announce that they have now issued their
NURSERY CATALOGUE OF FOREST TREES, CONIFERÆ, SHRUBS, &c.,
which they will be happy to forward free by post on application.
27, Great George Street, Westminster, S.W.

PETER LAWSON AND SON,
THE QUEEN'S SEEDSMEN AND WOOD FORESTERS, 27, Great George Street, Westminster, London, S.W., respectfully announce the issue of their GARDEN SEED CATALOGUE for 1860, which they will be happy to forward free by post on application. Every care has been bestowed on the selection and growth of the various stocks, which P. L. & SON can safely recommend as of best quality, and true to name.

DALMAHOY EARLY POTATOES.
This excellent variety of Potato now meets with a largely increased demand in England, to which it is fairly entitled. It is considerably earlier than the Regent, and of excellent quality. Messrs. P. L. & SON are now prepared to send out carefully selected Seed, for which early orders are requested; and which can either be executed now or in spring, as may best suit purchasers.

NEW ANNUALS.

JOHN GEORGE WAITE, SEED MERCHANT, 181, High Holborn, London, W.C., has great pleasure in offering SEEDS of the following new hardy Annuals:—
CLARKIA PULCHERRIMA,
SCHIZANTHUS GRANDIFLORUS OCULATUS,
HELIOPHILA CŒRULEA STRICTA.
Coloured Drawings and prices of which (to the Trade only) can be had on application.
Seed Establishment, 181. High Holborn, London, W.C.

# The Gardeners' Chronicle.

*SATURDAY, DECEMBER* 31, 1859.

MEETINGS FOR THE ENSUING WEEK.

MONDAY, JAN. 2—Entomological ..... 8 P.M.

To how many of our gardening readers has it ever occurred to investigate the origin of any of the "favoured races" of plants with which they are familiar in the garden, the orchard, or the forest? Many know or take for granted that the most dissimilar kinds of Strawberries, Apples, and Potatoes have all sprung from one stock, and that most of them have originated within a very recent period; as also that the history of many is attainable, did they think it worth the trouble of searching for. Even this limited knowledge is seldom acquired; and it is rarer still to find a gardener who has ever reflected upon the possible origin of the wild plants that surround him; though he not only knows that these are composed

of the very same elements as are contained in the soil and air, but that they are themselves the immediate ancestors of the cultivated plants whose nurture provides him with remunerative labour, and whose increase at the same time supplies him abundantly with food. Little, however, as our gardening friends may have thought of these matters, still the terms "favoured race" and "origin of species," are more or less intelligible to most: but it is very different with "struggle for life." In its application to man civilized and savage, at peace and at war, and in a certain degree to the lower animals, the significance of the phrase is obvious enough; but how it can apply to the vegetable kingdom is not so evident at first sight, and still less evident is its connection with the "origin of species" and with "favoured races."

Perplexed with these thoughts on reading for the first time the title of Mr. DARWIN'S new volume ON THE ORIGIN OF SPECIES,* and knowing that the author is of first-rate standing in science, of great popularity, and a frequent contributor to our columns, we awaited the publication of his book with great curiosity and interest. It is true that we had been referred to a notice in the *Gardeners' Chronicle* (1858, p. 735) of a paper communicated by Mr. DARWIN to the Linnean Society, which gives a clue to the general nature of his work, but rather whetted the curiosity than allayed it; being little more than an indication of one method of research now fully developed, and giving little idea of the extent, variety, and suggestive value of that research, and still less of the comprehensiveness and talent of the present work.

From the above expressions it will be inferred that we have risen from the perusal of Mr. DARWIN'S book much impressed with its importance, and have moreover found it to be so dependent on the phenomena of horticultural operations, for its facts and results, and so full of experiments that may be repeated and discussed by intelligent gardeners, and of ideas that may sooner fructify in their minds than in those of any other class of naturalists, that we shall be doing them (and we hope also science) a service by dwelling in some detail upon its contents. Thus much we may premise, that it is a book teeming with deep thoughts on numberless simple and complex phenomena of life; that its premises in almost all cases appear to be correct; that its reasoning is apparently close and sound, its style clear, and we need hardly add its subject and manner equally attractive and agreeable; it is also a perfectly ingenuous book, bold in expressions as in thought where the author adduces what he considers clear evidence in his favour, frank in the statement of objections to the hypotheses or conclusions founded on its facts and reasonings; and uniformly courteous to antagonistic doctrines. In fine, whatever may be thought of Mr. DARWIN'S ultimate conclusions, it cannot be denied that it would be difficult in the whole range of the literature of science to find a book so exclusively devoted to the development of theoretical inquiries, which at the same time is throughout so full of conscientious care, so fair in argument, and so considerate in tone.

Before entering upon an analysis of those parts of Mr. DARWIN'S work which more immediately concern our readers, we may explain that it is devoted to the inquiry of how it is that the world has come to be peopled by so many and such various kinds of plants and animals as now inhabit it; and why it is that these do not all present a continuous, instead of an interrupted series, capable of being divided into varieties, species, genera, orders, &c. To all careless and many careful naturalists the assertion is sufficient, that they were so created, and have been endowed with power to remain unchanged; but there are considerable difficulties in the way of the adoption of this theory, which all reflecting naturalists allow; whilst more to our present purpose is the fact, that in Mr. DARWIN'S opinion the objections to it are more numerous and some of them more conclusive than the arguments in its favour. In the first there is the fact, that gardeners and cattle and bird breeders have made races which are not only more dissimilar than many species in a state of nature are, but if found in a state of nature would unquestionably be ranked as species and even genera; while the possibility of their reversion to their parent forms is doubted by many and denied by some. Then, there is the fact, that in a great many genera many so-called species present a graduated series of varieties which have puzzled the best naturalists; and that in such genera at any rate it is easier to suppose that the species are not separate creations than that they are so. Again, the whole system of animal and plant classification into individuals, species, genera, &c., presents a series strictly analogous to that of the members of the human or any other family; and we further express our notions of the mutual relations of animals and plants in the very terms that would represent their affinities as being due to a blood relationship; so that either Nature has mocked us by imitating hereditary descent in her creations, or we have misinterrupted her in assuming that she has followed one method for families and another for species. There is then the geological evidence of species not having all been introduced at one period on the globe, but at various successive periods, and in like manner there is abundant evidence that they are being extinguished one by one; and as geologists are now pretty unanimous in believing that the past changes of the globe were the same in kind and degree as those now going on, we can no longer cling to the old vague belief that species were created at a time when all other conditions were different from those now existing; and thus hide one mystery under another. Again, if we hold to original creations we must also admit that it is more likely that a new kind of Strawberry, as different from all the wild as the British Queen is from the Alpine, should naturally originate in England or elsewhere out of air and earth and water, than that it should have originated in accordance with the laws that favoured the gardener's skill in producing the above-mentioned form. Finally, we know that on the one hand all changes of the surface of the globe (of climate, geographical limits, elevation and depression) are extremely slow; and that on the other relations of co-adaptation subsist between the climate, &c., of every country and the animals and plants which it contains; but such co-adaptations could not harmoniously exist if the physical changes were slow, and the creations of species sudden, for in such cases the species must be created either before or after they were wanted, a state of things which no orthodox naturalist would admit; but if, on the contrary, the organisms are supposed to change with the changed conditions of the country they inhabit, perfect adaptation and continuous fitness would be the necessary result.

Such ideas as these, either in whole or in part, have occurred to many naturalists, when in endeavouring to classify their animals and plants, or to account for their distribution, they have found themselves forced to face the difficulty of accounting for their origin. Hitherto most have, as we have already observed, contented themselves with the hypothesis that they were independently created, and the minority have clung to the only other explanation hitherto conceived, that they have all been created by variation from a single first-created living organism, or a few such. Now it must be borne in mind that both these views are mere hypotheses in a scientific point of view; neither has any inherent or prescriptive right to a preference in the mind of the impartial inquirer; but the most superficial observation will show that the hypothesis of original creations is incapable of absolute proof, except the operation be witnessed by credible naturalists, and can only be supported by facts that are either not conclusive against the opposite doctrine, or may be regarded as equally favourable to it; and this hypothesis is hence placed at a disadvantage in comparison with that of the creation of species by variation, which takes its stand on the familiar fact that species do depart from the likeness of their progenitors, both in a wild and domestic state.

On the other hand the hypothesis of creation by variation labours under the disadvantage of being founded upon a series of phenomena, the action of each of which individually, as explained by Mr. DARWIN, would appear to prevent the possibility of species retaining their characters for any length of time, and it therefore appears at first sight opposed to the undisputed fact, that many hundreds of animals and plants have transmitted their characters unchanged (or nearly so) through countless generations, and covered, even within the historic period, many square miles of country each with millions of its exact counterpart. To explain this anomaly and to raise this hypothesis of creations by variation to the rank of a scientific theory, is the object of Mr. DARWIN'S book, and to do this he has endeavoured to invent and prove such an intelligible rationale of the operation of variation, as will account for many species having been developed from a few in strict adaptation to existing conditions, and to show good may by the operation of natural laws be so far fixed as to reconcile both the naturalist and the common observer to the idea, that what in all his experience are immutable forms of life may have once worn another guise. The hypothesis itself is a very old one; it was, as all the world knows, strongly advocated by LAMARCK, and later still by the author of the "Vestiges of the Natural History of the Creation," but neither of these authors were able to suggest even a plausible method according to which Nature might have proceeded in producing suitable varieties, getting rid of intermediate forms, and giving a temporary stability to such as are recognised as species by all observers. Mr. DARWIN has been more successful, though whether completely so or not the future alone can show. We shall proceed to examine his method in another article.

---

IT was formerly supposed that but one kind of Mushroom ever made its appearance on artificial MUSHROOM BEDS. The notion probably arose from the circumstance of the spawn being often prepared from a mere admixture of different matters, without any positive spawn brought in from the fields, and as Mushrooms were supposed to spring from this mixture by a sort of spontaneous generation, it was conceived that it would require a different concurrence of circumstances to produce any other species. It is now, however, notorious that no Mushroom will ever make its appearance without the presence of spores, and if the spores of one kind are accidentally present, those of another have at least a certain chance of being so.

Be this, however, as it may, many other species of Agarics make their appearance in the Mushroom bed, as was first pointed out to us some 30 years ago by Mr. J. HENDERSON, the scientific gardener of Earl FITZWILLIAM.

A very remarkable case is now before us which is worthy of an especial notice. We have, indeed, no information as to the mode in which the Mushroom bed of which we are about to speak was prepared, or from whence the spawn was obtained with which it was inoculated; but certain it is that the general crop is very different from anything we have met with before, nor can we find anything similar recorded in scientific works on Fungi. One patch alone in the bed, which produces a succession of scattered Mushrooms true to the type of those which first appeared in the patch, accords with the usual produce of our sheds. The cap, for example, is nearly hemispherical, of a delicate reddish brown, and marked with little close-pressed scales, while the stem is short and stout.

A second form appears in large quantities, deviating distinctly from the more ordinary form. The whole plant is smaller, the pileus convex but inclined to expand early, its colour a deep red brown, and the surface finely silky but not scaly. The stem is much more slender than in the common type and inclined to be bulbous at the base, and the whole plant approaches near to *Agaricus silvaticus*,* but has not its peculiar smell.

The principal crop consists of a very peculiar Fungus, which is at once distinguishable by the pileus being almost uniformly strongly depressed in the centre, and of an opaque white as if whitewashed and either perfectly smooth or ornamented with a few scattered scales. The pileus in fact has rather the appearance of that of one of the white-gilled than of the dark-gilled Agarics, and is extremely like that form of *Agaricus pileolaris* figured by BATSCH under the name of *A. subinvolutus*, and which is reckoned by Dr. BADHAM one of the best and most wholesome of our Fungi, though we cannot quite subscribe to the former part of this opinion. The stem is stout and moderately high, and the flesh does not exhibit any that pale brownish-purple tinge which is so common in some forms of the Mushroom when grown in the field or the Mushroom-house; but is very white, with occasionally a tinge of yellow. It is soft, succulent, and well-flavoured, and in some respects superior to those which are usually cultivated. Indeed, we never partook of any highly flavoured and excellent in every respect as they are when stewed.

Had the specimens appeared naturally in the woods, they would undoubtedly have been considered as constituting a distinct species; but as no similar wild plant is known, it will be best for the present to regard it as a variety produced by cultivation.

The matter however is interesting, as it tends to show that something may be done even in this department of horticulture towards an improve-

---

* On the Origin of Species by means of Natural Selection; or the Preservation of favoured races in the Struggle for Life. By CHARLES DARWIN, M.A., F.R.S., &c. 8vo. pp. 502. London, 1859.

* Eaters of Fungi must distinguish *A. silvaticus*. There is a woodland form of the common Mushroom which is excellent, but there are others which are very [illegible]

ment of our present race. Some years ago we were anxious to introduce a very fine variety from Australia, and a distinct species from Carolina of superior excellence, but neither succeeded. It is possible that the present plant may also be of foreign origin; but be this as it may, we should counsel the excellent cultivator who has supplied the specimens to try if possible to keep the spawn distinct, so as to ascertain its merits as an object of cultivation, whether it be looked upon as species or variety. Should he find that it has such requisites as may make it desirable to propagate it permanently, it must be brought out under a distinct name, as its peculiar appearance might make purchasers hesitate at first about its qualities. *M. J. B.*

## MYCOLOGY.

UNDER this head we propose to give occasionally illustrations of the most remarkable Fungi which commonly occur. They will be prepared by our valued correspondent, the Rev. M. J. Berkeley, one of the most learned of living Mycologists, and will be on the plan of the entomological articles which have been found so interesting as well as instructive.

## TRADE MEMORANDA.

IN our last Number we inserted under this title an explanation of a most unfortunate mistake made by the Manchester Police, in answering an inquiry addressed to them by Mr. Scott, of Crewkerne, and by which we have been led in our Number of December 17 to give admission to a paragraph reflecting on the character of a highly respectable gentleman, Mr. G. F. Mandley, of Manchester, who in consequence of a similarity of name was mistaken by the Police for an entirely different person. Our last Number contained a copy of a letter from the Chief Constable of the Manchester Police, which showed clearly who was responsible for the error, and explained how it occurred. We had hoped this explanation would have been satisfactory to Mr. Mandley, but we regret to find from a communication from his solicitors that such is not the case. We scarcely know what we can add to the paragraph in our last Number, but that nothing may be wanting on our part, we beg again to express our great regret for the error into which we have been inadvertently led, and we offer to Mr. Mandley the fullest and most ample apology we can make for it.

*To the Editor of The Gardeners' Chronicle.*

SIR,—I am exceedingly sorry to find that I have unintentionally and unwittingly been the cause of undeserved annoyance to G. F. Mandley, Esq. of Manchester, a gentleman of unblemished character, through information sent me by the superintendent of the Manchester Police, and which I sent to you for publication—a proceeding I now highly regret. And I may say had I had the slightest idea that the information was wrong, as regards Mr. Mandley, I would certainly not have sent it. But having a recollection of seeing the name somewhere, and a warning for Nurserymen to beware of him, it struck me that it was necessary to make inquiry, and not knowing any one in Manchester to whom I could apply, I naturally did so through the police, asking them at the same time to inquire at the Post Office whether such a gentleman really lived at the address which I sent to him, the superintendent. Had he done so the mistake would not have occurred. I trust therefore that this public apology on my part will be acceptable to Mr. Mandley whose character I am now well aware cannot suffer from what has taken place, for there really appears to be a person of nearly the same name known to the police. My own recollection of the name, and the superintendent's statement at once threw me off my guard, as I think it would have done any one else. I had no private end to serve by the publication, but was alone desirous to prevent others from being taken in; that I was perhaps too hasty in sending the information to you I must leave you or others to judge. All I can now do is to express my regret at having been accessory to giving so much pain to a gentleman standing so high in the estimation of his fellow men. *John Scott, Merriott Nurseries, Crewkerne, Somersetshire.*

## DR. DAUBENY'S LECTURE ON THE THEORY OF ANIMAL NUTRITION.

(*Concluded from p.* 1038).

MR. LEWES, however, contends, that respiration is not a process of combustion, but of exchange, because oxygen does not combine with carbon, but is merely substituted for carbonic acid, at the spot where the latter is disengaged. A candle, he observes, goes out, because there is not enough oxygen to maintain combustion; whilst an animal dies, because there is so much carbonic acid present, that it acts upon the system as a poison.

The distinction between the two cases is ingeniously put in some experiments reported by this same author. If we take an atmosphere reduced to 15 per cent. of oxygen by the burning of a candle, a taper will be extinguished owing to the deficiency of oxygen, but a bird will continue to live in it for some time longer, provided the carbonic acid be removed. If, on the contrary, we mix together 50 per cent. of oxygen and 50 of carbonic acid, the animal dies, but the taper goes on burning.

Moreover by removing in time the excess of carbonic acid by the introduction of potass, the animal recovers; so that it is evident that the cause of suspended animation must in this case be sought for in the poisonous qualities of the carbonic acid, and not in the deficiency of oxygen.

On what does this poisonous quality depend? Here physical and chemical explanations are at fault, or at least only partially guide us towards the solution. Yet this much may be admitted, namely that if respiration consist in an exchange of oxygen for carbonic acid, the quantity of the latter gas expired will according to well-known physical laws be diminished by the presence of a larger quantity of it in the air inspired. Now this will have a tendency to check those internal changes in the system, of which the removal by oxidation of dead matter, and the generation of animal heat, are the results; and hence in cold-blooded animals, where these changes go on more slowly, and the demand for animal heat is less considerable, an atmosphere surcharged with carbonic acid may be supportable, so that they may be introduced with impunity into air so vitiated that it is impossible for warm-blooded animals to live in it. Indeed, even in a languid state of the constitution, whether occurring naturally, or induced artificially by the gradual introduction of carbonic acid, its slower evolution from the lungs may be attended with less inconvenience than common, because that metamorphosis of the tissues, which renders the act of respiration so necessary, is taking place with less than ordinary rapidity.

But what may be the nature of those differences in the organisation of a species or of an individual, which renders the one or the other capable of living with a smaller expenditure of animal heat, and a less rapid change in his living tissues, is a problem beyond the reach of chemistry, and I suspect of physiology also. Even granting however with Mr. Lewes that respiration consisted merely in the substitution of oxygen for carbonic acid, I cannot regard such a fact as a valid objection to Liebig's theory of animal heat.

For where after all does the carbonic acid which is there given off proceed from, except it be from the union of oxygen with carbon in various parts of the body?—and wherever this takes place, whether it be in the capillaries or in the blood, an equivalent amount of heat will result. Nor is it altogether true that respiration is merely a process of exchange; were it so, the lungs ought to be the coldest part of the body from the large amount of cold air which they inspire, whereas not only do they keep up their own temperature, but the most recent experiments made upon the subject, those of Mr. Savory,* serve to show, that arterial blood is always somewhat warmer than venous, and therefore that the absorption of oxygen must be attended by a process of combustion.

Baron Liebig has proposed a most ingenious theory, to account for the transmission of oxygen through the system, and its gradual union with carbon. The blood corpuscles, he says, contain a compound of iron, which latter combines with oxygen, and thus passes, first, into the state of protoxide, and afterwards into that of a peroxide, imparting to it the florid colour which arterial blood presents. But this blood, in its course through the capillaries, gives out a portion of its oxygen to the carbon present, whence it happens that the peroxide of iron is converted into protoxide, and that the resulting carbonic acid combines with it. Hence, the darker colour of venous blood arises from the presence in it of a proto-carbonate of iron as an ingredient of the blood corpuscles. But carbonate of iron is decomposed by oxygen, the carbonic acid being set at liberty and the iron remaining in the state of a protoxide. Hence arises the evolution of carbonic acid during the process of expiration, its transmission being the joint effect of the law of exosmose, which enables it to pass through a membrane, and of the interchange of oxygen for carbonic acid taking place in the cells of the pulmonary apparatus, as a consequence of the law of gaseous diffusion.

But ingenious as this explanation is, we are not compelled to adopt it, in order to espouse the chemical theory of animal heat, since the main principle of the latter remains unaffected by its truth or falsehood; the point for consideration being, not whether oxygen is transmitted, and carbonic acid produced, in the precise manner represented by Liebig, but whether or not the substitution of oxygen for carbonic acid is attended by the disengagement of a commensurate amount of heat, and whether that heat be, or be not, sufficient to maintain the body at the temperature necessary for the continuance of life. The second of these propositions may indeed still admit of dispute, but the former cannot be set aside by showing, that muscular contraction and other vital actions are independent sources of heat, nor even that the process by which carbon becomes united with oxygen is a more circuitous one than chemists have been in the habit of regarding it.

The curious cases adduced, in which animal heat appears to have been generated after life has become extinct, may be explained by the continuance of the process of oxidation within the vessels, owing to the union of the oxygen of the blood-corpuscles with the carbon of the tissues, and seems, therefore, referable to chemical processes still carried on. It is a fact at least not more incredible than that of processes of growth and secretion taking place under the same circumstances, and does not necessarily imply the continuance of respiration during the same period.

Mr. Lewes, in objecting to Liebig's theory of nutrition, states with perfect correctness, that the oily and saccharine materials which are taken into the system do more than merely minister to the production of animal heat; fat, which is one of the constituents of the animal body, being derived from these portions of our food.

This however is in entire accordance with the views of Liebig, who attributes the accumulation of fat in the system to the excess of those materials taken in, beyond what is expended in the production of heat, the only apparent discrepancy between the two statements being, that Liebig would seem to represent fat as excrementitious, that is, stored up to meet the demands of animal heat, and not to fulfil any specific function in the organism; whereas Lewes points out, that it forms a necessary constituent of the brain, and that it is not entirely got rid of even from other parts of the body in cases of starvation, where the tissues have been largely drawn up for the maintenance of the heat necessary for vitality.

It would be right indeed to distinguish between those parts of the body which are necessary constituents of one or other of its organs, and those which, though doubtless contributing to the easy and perfect performance of their functions, seem to be superadded, and in a degree contingent.

The fat of the brain, and the water which gives transparency to the cornea and the milk-white colour to the cartilages, must be placed in the former category; the fat associated with flesh in the second; for it would be just as illogical to regard the latter as an essential constituent of tissue, because it lubricates and thereby facilitates the action of muscle, as to consider grease as a part of the wheel, because the latter will not perform its office of rotation easily without it.

According to these principles it will follow, that milk, the food assigned by Nature to the young of all the higher animals, represents in itself all the necessary elements of nutrition. Thus the nitrogenous constituent is present in the caseine or cheesy portion, and the non-nitrogenous in the oily and saccharine.

The co-existence of both the latter would seem to imply that something more than the generation of animal heat is thus provided for, and that, as Lewes suggests, whilst the oil is likewise subservient to the formation of fat, the sugar may promote some other function hitherto undetermined. This, however, if established, although an addition to Liebig's theory, would by no means be a subversion of it, so long as the main division of food into flesh-producing and heat-producing materials remains undisturbed.

There are, indeed, in milk two other ingredients which ought to be taken into account when we are considering its nutritive qualities. I mean the salts and the water which it contains. Both these Lewes represents as having been overlooked by Liebig, but no one who recollects the importance the latter attaches to the presence of phosphatic matter in the food, can doubt that he was fully alive to the necessity of the former, or help concluding, that the only reason why he did not distinguish them in the milk, was that in this fluid, as in many other articles of diet, they are necessarily associated with the albuminous principle.

Lewes, indeed, quotes some experiments tending to show, that adult animals cannot subsist wholly on milk, and hence draws an inference as to the insufficiency of chemistry to enlighten us with respect to the mysteries of digestion.

I have already admitted that much remains unexplained with reference to this process, but as regards the unfitness of milk for the sole diet of adults, it may not be difficult to suggest reasons, connected with its chemical constitution, which should render the fact intelligible.

Ordinary woman's milk is found by analysis to contain no less than 88.6 per cent. of water, and of the remaining 11.4 per cent., 3.9 are nitrogenous, and therefore destined for building up and renewing the system, only 7.5 being designed to produce heat.

If we reckon 5 per cent. of the latter as saccharine, and 2.5 as oily, we shall find about $\frac{1}{2}$ of carbon in the first, and $\frac{3}{4}$ in the latter ingredient, making the per centage of carbon present in the heat-producing materials of milk not more than 3.3 per cent., or about $\frac{1}{30}$th of the whole.

Now the consumption of carbon daily in an adult varies, according to the exercise he takes, and other circumstances, from 14 to 8 ounces, the mean probably not being less than 10. Supposing therefore an adult to derive all his heat-producing materials from milk, it would be necessary for him to consume 30 times that quantity, or 300 ounces; nearly 19 pints or more than $2\frac{1}{2}$ gallons.

On the other hand fresh meat contains only 74 per cent. of water, and Wheat bread barely 25; so that an English foot soldier, who consumes his allowance of $\frac{3}{4}$ lb. of meat and 1 lb. of farinaceous matter per diem, with the addition of perhaps $1\frac{1}{4}$ lb. in the shape of vegetables, receives as much nourishment in about 3 lbs. of solid food, as he would obtain from 6 times that amount of milk.

It is therefore quite natural, that so diluted a form of nourishment, however suitable it may be to the weak digestive powers of an infant, should fail in the long run to support the more vigorous system of an adult. In milk too, the flesh-producing ingredient caseine would seem to bear a higher ratio to the heat-producing saccharine and oily principles than is the case in ordinary diet, at least if Liebig be correct in estimating the proper proportion at about 1 part of the former to 4 of the latter; for the caseine in woman's milk is 3.9, whilst the sugar and oil together are only 7.9, a provision being thus made for the rapid growth of the infant.

Upon the whole then, nothing that has yet been brought forward appears to me to militate against Liebig's main proposition, namely, that no animal can supply the waste of his muscular tissue without the aid of one or other of the modifications of

* Demonstrator of Anatomy at St. Bartholomew's Hospital.

the so-called proteine principle; and with respect to the animal matter of his bones and cartilages the same rule applies, only that, inasmuch as it is necessary that the above materials should for this purpose be converted into gelatine, animal jelly, when taken as food, may perhaps contribute to this latter office.

Now flesh and bone constitute, not only the most essential, but also the largest portion of our fabric, and hence the principles which supply their waste deserve in an especial manner to be regarded as *plastic materials*. Had Liebig called them by the name of flesh-producing, no cavil could have been raised against his position.

Inasmuch, however, as phosphoric acid, in combination with lime or with some other base, appears to be necessarily associated with animal matter both in the one and in the other, it may happen that an article of food, like Wheat, which is less highly charged with nitrogen, affords more nourishment than another, like Pulse, in consequence of the greater abundance of the phosphates present in its composition.

Experiments indeed are quoted, in which saccharine and even albuminous principles appear to have been carried off in the system by combustion more rapidly than fat; and Dr. Gilbert reports that cattle, during a period of very hot weather, which destroyed several, and affected the health of all, consumed more non-nitrogenised food than they had done previously.

In certain states of disease also, we find in the human subject a ravenous appetite, coupled both with a waste of the tissues, and a chilliness of the system arising from the imperfect production of animal heat. For this I have attempted to account already, by supposing that in these cases the food is removed as excrementitious before it has time to carry out its intended office; admitting thereby, as I am quite ready to do, that even where the material itself is amply supplied, a certain exertion of nervous energy will be requisite to accomplish the object for which it is designed. But no candid reasoner would regard these facts as sufficient to overturn the inference founded upon the accumulated experience of all ages, that, normally speaking, the demand for food, if possible of an oily nature, but at any rate for food of some description, is greater, in the colder regions of the globe, and during winter, than it is under opposite meteorological conditions.

The phenomenon in short is at bottom a chemical one, but it nevertheless requires the co-operation of vital forces for its accomplishment; and hence, as was long ago shown by Sir Benjamin Brodie, nervous energy is essential to the production of animal heat, although the evolution of carbonic acid from the lungs may continue for a certain time after life becomes extinct.

It would occupy too much time if I were on the present occasion to notice all the objections which the ingenious author of the popular work alluded to has alleged against other of Baron Liebig's theories, nor is it necessary that I should do so.

Physiologists have hitherto been more successful in exposing the weak points in the chemical explanations of vital phenomena than in substituting any of their own, and have therefore no right to shake the faith of the public in principles which remain undisturbed, by pointing to others which are merely conjectural or perhaps fallacious. I will therefore pass no comment upon, and offer no vindication of, the attempts of the German chemist to explain the uses of the liver and kidneys, the agency of alcoholic stimuli, the cause of fever and inflammation, and the medicinal effects of tea, coffee, or other vegetable alkaloids.

Ingenious as I conceive these views to be, they do not affect the questions before us, and may therefore be left to be dealt with on some future opportunity when similar topics come to be discussed.

Confining myself therefore for the present to those leading principles which are believed to rest on a sufficiently sound foundation, I will conclude this lecture by stating a few of the practical influences deducible from them respecting matters of daily experience.

And first it is to be remarked, that in accordance with the foregoing considerations it would seem, that a mixed diet of animal and vegetable food is the one most adapted to an animal like man, whose digestive organs are so framed as to admit of the easy assimilation of either; the most economical arrangement being that which provides a sufficiency of vegetable food for the production of heat, and of animal for supplying the waste of the tissues.

Late investigations appear to have shown it to be a fallacy to suppose, that any nation habitually or by preference subsists upon vegetable food alone. Such may be the case with a few miserable savages, who want the skill to cater for themselves, and are driven to be content with whatever, either of a vegetable or animal nature, Nature has placed within their reach; but the Hindoo, who was said to live wholly upon rice, is now proved by the inquiries of Dr. Watson to consume, whenever he can manage to obtain it, as much as from ¼ to ⅓ of Pulse or dried fish, in addition to Rice, even where the latter is obtainable at the cheapest rate. Where this is not done, the results of starvation are visible in every direction, although the distended stomach of the poor Ryot shows that the largest possible quantity of Rice is taken to supply the nitrogen required.

In like manner, in the poorest parts of Ireland, where Potatoes have been said to form the staple food of the population, a free use of buttermilk is found to be a necessary addition.

In Spain, where little meat is eaten by the peasantry, *Garbanzas* and other Pulses constitute important articles of nutriment.

Liebig's views also lead us to understand, how it happens, that an almost exclusively animal diet may be resorted to with impunity by persons in the vigour of life and undergoing much bodily exertion.

The German chemist, as I hope has been already shown, never meant to say, that nitrogenised compounds could not supply the materials for generating animal heat, but only that they must first be rendered effete, and secondly be deprived of their nitrogen by the operation of the kidneys, which carry it off in conjunction with part of the carbon, chiefly in the form of urea. When we recollect, that lean flesh does not contain more than about 26 per cent. of proteine compounds, the rest being water, and that in the former there exist not more than 15 parts of carbon; whereas in Wheat flour the per centage of water is only from 13 to 15 per cent., and that of starch alone there is about 60, in which are present 26 of carbon, without reckoning other ingredients capable of yielding the materials for combustion, it may be readily understood, that a larger amount of animal food must be requisite to maintain the temperature of the body, than of vegetable.

Accordingly, where no vegetables are employed, the process is a more wasteful one, not only from the higher price paid in the first instance for a given weight of the material, but also because a certain amount of its constituents must always be carried off as excrementitious, without contributing to the production of heat.

In the next place the principles laid down by Liebig serve to expose most convincingly the absurdities of the Vegetarian System adopted by certain parties in this country, some of whom at least might be presumed, as conversant with science, to possess a degree of insight into the true theory of nutrition. It would be out of place of course on this occasion to comment upon the moral considerations which have prompted men to this practice, although I can find no warrant from Scripture or from Reason, no analogy in Nature, no motive in Humanity, for an entire abstinence from animal food.

Confining ourselves, however, to the physiological, or if you please the chemical phase of the question, it is hard to see what possible advantage can accrue to the system, from drawing the supply of nitrogenised materials from vegetables, to the exclusion of those derived from the animal kingdom.

Both, as chemistry assures us, contain the same descriptions of azotised matter, at least with very slight modifications, but the former in such comparatively small proportions, that it is necessary to distend the stomach with a superfluity of heat-creating materials, to obtain a sufficiency of those which are flesh-producing.

We have spoken of the unhealthy condition of those Ryots who submit from necessity to such a diet, and we have reason to believe that the inhabitants of the tropics, who live more upon vegetables than ourselves, are able to put up with it only, because, owing to their more indolent habits, there is a smaller expenditure of tissue, and therefore less waste to supply.

Doubtless a man in vigorous health, and in the prime of life, may subsist wholly upon vegetables without feeling any bad effects from the practice. I have known an eminent surgeon, who, after a year's abstinence from meat, found himself at the end of the time with his weight undiminished, and his capacity for mental and physical exertion unimpaired. In his case, the system was powerful enough to get rid without inconvenience of the large amount of unnecessary matter, which he was compelled to digest, in order to extract from it the requisite quantity of principles really nutritious.

In some cases too certain idiosyncrasies, which I know not whether the physiologist can explain, may render animal food unwholesome or unnecessary.

Mr. Anderssen the Dane mentions that the strongest man he had ever seen in his own country was a porter, who never took a particle of meat.

There is also somewhat of a fallacy in an individual flattering himself that he is subsisting upon vegetables, if milk, eggs, cheese, butter, or Mushrooms, enter into his dietary.

In short, the only difference between the vegetarian and ourselves is, that the former consumes the same principles in a less concentrated form, and gets rid in the course of his digestion of a larger amount of superfluous matter.

In certain states of the system, indeed, or in particular seasons, the usual amount of animal food may prove too stimulating, because, whatever excess of nitrogenised principles, beyond the demand for waste, is taken into the system, must be got rid of, and in so doing may occasion disease. But, on the other hand, in old age and in feeble health, it is seldom advisable to resort to a vegetable diet, and far more common to prescribe a larger *relative* amount of animal food than would be suitable to younger persons.

I suspect, also, that many well-intentioned persons labour under a kind of self-delusion, in their constrained abstinence from nutritive food on certain days and in certain seasons.

If a man has eaten too little to supply the demands of the system on one day, Nature instinctively prompts him to make up for the deficiency on the next, so that the absolute amount of food consumed in the course of a given time is in general little, if at all, affected by such observances

Should he, on the contrary, maintain such a constant watch over his appetite as to prevent this consequence from ensuing, he must expect his capacity for fulfilling the active duties of his calling to be diminished in proportion; for a certain amount of mental or bodily exertion necessarily entails a certain expenditure of tissue to be replaced by nutriment. Or if exhaustion and debility did not supervene, the only legitimate conclusion to be drawn is, that his ordinary mode of living was in excess, since it admitted of reduction with impunity.

Another inference which may be deduced from the principles laid down is, that an indulgence in a variety of articles of food is more conducive to health than a rigid adherence to a very few. If the contrary notion has prevailed, and if simplicity of diet be deemed conducive to healthy nutrition, I believe the idea has arisen, rather from the appetite being stimulated to commit excess by having a number of dishes set before it, than from the unsuitableness of a mixture of viands when taken into the stomach in a proper quantity. For my own part, with all due respect for the roast beef which holds so prominent a place on the table of an Englishman, I should, if confined from day to day to one and the same dish, prefer dining upon the Spanish Olla Podrida.

Considering indeed the very limited powers which the digestive organs possess of altering the chemical constitution of the principles presented to them, it seems important, that everything which enters into the composition of a healthy animal should be presented to it in the food, and this can best be brought about by a diversity of aliments. Accordingly Miss Martineau, in her recent work, entitled "England and her Soldiers," dwells upon the advantages that accrued to the sick in the Crimea, from varying from day to day their dietary, and rendering it at once more savoury and more diversified than had previously been the case.

And this leads me to consider why gelatine, once thought so nutritious, has been found utterly unsuitable of itself to supply the wants of the system. The fact that animals fed upon this substance, exclusively, or even with the addition of sugar and mucilage, gradually die of starvation, was indeed established experimentally by Majendie, but the true explanation was reserved for Liebig.

Before his time it would have seemed surprising, that a principle so rich as this is in nitrogenised ingredients should be incapable of permanently making good the waste of the tissues. The researches of the German chemist appear to have solved this mystery.

He pointed out that, although gelatine may be elaborated from proteine compounds, as may be seen by comparing the composition of the one with the other, the latter never have been produced by a retrograde process from gelatine, nor are likely, judging from analogy, ever to be so generated. Gelatine may be regarded as proteine combined with a certain portion of water, ammonia, and oxygen, or according to another view of its composition, it is proteine from which carbon has been abstracted owing to the action of oxygen.

But according to either view of its composition proteine could only be produced from gelatine by the removal of oxygen, and it is still very questionable whether this, which is a process of reduction, falls within the powers of the animal economy, although it is so often effected in the vegetable.

This will be seen by the following formula:—

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Gelatine | C | 48 | N | 7.5 | H | 41 | O 18 |
| Proteine | C | 48 | N | 6.0 | H | 36 | O 14 |
| | | | or, | | | | |
| Proteine | + | | N | 1.5 | H | 5 | O 4 |

In which it will be observed that all the elements present, except carbon, are in larger proportion in gelatine than in proteine.

Lehmann indeed contends that processes of reduction do take place occasionally in the animal system, but the instances he adduces are for the most part such as occur out of the body as well as in it, such, for example, as the change of sulphates into sulphurets, and of peroxides into protoxides, which is owing to the abstraction of oxygen by the organic matter present, and is therefore fairly referable to chemical causes alone. Two other cases, viz., the formation of stearic acid and of cholesterine, seem of a more doubtful character; but the general tenour of observations must be admitted, I think, to be so much opposed to Lehmann's explanation, that there is room to suspect that these two products may have been formed in some other way.

It may be said, however, experience shows, that jelly administered along with other kinds of food contributes to a certain extent towards the nourishment and support of the body, especially in the case of invalids. Although in the last edition of his "Chemical Letters" Liebig seems hardly willing to admit this as a fact, I will assume its truth as based upon general belief, and shall merely express my surprise that its explanation does not appear to have occurred to Mr. Lewes, judging by the remarks in p. 83 of his book, in which he objects to the chemical theory of nutrition on this very ground. Inasmuch as the animal matter present in the bones and cartilages consists of gelatine, it is quite as conceivable that the latter may supply the waste that takes place in these parts of the body, as that oil should restore the deficiency in the fatty constituents, as he himself maintains; and if this be the case, its exhibition may relieve the system from the necessity of making it good by the oxidation of the proteine compounds assimilated, so as to enable us to dispense with so large a quantity of the latter.

But if gelatine be incapable of enriching the blood

with materials fit for replacing the loss of muscular fibre, whatever quantity of it is introduced, beyond what makes good the waste in the gelatinous parts of the body, must be eliminated as so much excrementitious matter, and therefore be either useless or injurious.

Guided by these considerations, Liebig introduced his now well-known substitute for the animal jelly formerly so much in request for invalids. It is hardly necessary at this time of day for me to state, that this preparation is procured by mixing minced beef with an equal weight of cold water, and then slowly heating the mixture to the boiling point. After keeping it simmering for about a minute in order to coagulate the albumen, the liquor is strained through cloth, and that still contained in the fibrous portion remaining on the filter afterwards pressed out. The juice thus obtained retains the most nutritious parts of the meat, the fibrine and gelatine which remain behind being, comparatively speaking, unimportant. When it is wished to include the gelatine, a somewhat longer process of boiling is necessary, but even then the fibrine remains undissolved; nor is this any loss, because, although identical with muscular fibre, it is so difficult of digestion, that even a dog fed upon it lost in the course of 43 days one-fourth of his weight. Lehmann indeed has shown that the fibrine of the blood differs in some respects from that of the flesh, so that it is quite probable that the conversion of pure muscular fibre into that which enters into the constitution of the circulating fluid may lie beyond the powers of the digestion.

We perceive indeed, from many of the facts already stated, how limited is the power of the living principle to accommodate to its own purposes the principles presented to it from without. Far from being, as was formerly supposed, capable of enhancing or annulling the chemical affinities subsisting between two bodies, so as to produce combinations within the system which do not take place out of it, the powers of life are unable even to appropriate the materials presented to it when chemically identical with the constituents of the body, unless their mechanical condition be favourable to their easy assimilation; so that although muscular fibre may be produced from albumen, its waste cannot be supplied wholly from fibrine, and in no degree from a product so rich in nitrogen as gelatine.

The remarks which I have made in the course of this Lecture with regard to diet and nutrition will not be thrown away, if they only serve to sharpen inquiry, by showing how much remains to be done before the most ordinary processes of the animal economy can be regarded as explained.

In this respect indeed there is no difference between myself and the ingenious writer of the popular Work so often alluded to in this Lecture, a work which I strongly recommend to the notice of my hearers, as one highly calculated to awaken an interest in questions of Physiology, not only from the lively and graphic manner in which the facts are placed before us, but also from the variety of information brought together from so many distinct sources.

My only complaint with its Author is, that because Chemistry is confessedly unable to explain much which is taking place within our microcosm, and because it has presented us with questionable explanations of some of the phenomena with which it has dealt, he would discourage us from accepting its guidance altogether, forgetting that for nearly all we know for certain with respect to animal heat, respiration, and digestion, we are indebted to the researches of the chemist.

Doubtless, indeed, even on these points many questions remain to be solved, and many anomalies to be reconciled; but although it is easy to say that the solution of these doubts, and the reconcilement of these anomalies, are to be sought for from the physiologist, yet so long as the latter is only able to tell us, that the calculations of the chemists on these subjects must be in fault, because they do not take into account the interference of the living principle, without being able to enlighten us as to the manner in which the living principle interferes, I fear we make no nearer approach to the truth than we should do, if we invoked the Archeus of Van Helmont, or the Occult Causes of earlier philosophers to help us out of our difficulty.

At any rate let us never forget, that vital forces do not annul chemical agencies, although they may act independently of them, and therefore that animal heat must in part be derived from a process of slow combustion, if it be true that no particle of carbon can unite with its equivalent of oxygen without disengaging caloric. In like manner it will be seen, that nitrogenised matters must be introduced into the system from without, if it be true that the living principle cannot endue matter with the power which it does not possess independently, of abstracting nitrogen from its gaseous state, and thus of forming albumen from oil or sugar.

Nor is it easy to see, how food in the stomach can escape the influence of that fermentative process, which would be set up owing to the presence in that organ of the gastric juice, an agent, which, in consequence of a law pervading dead as well as living matter, transmits to the particles with which it is in contact those motions which originate within itself.

For the establishment of these facts we are indebted to chemists, amongst whom Baron Liebig stands pre-eminent, and therefore with every disposition on my part to admit the questionable character of some of his speculations, and to receive others with that degree of hesitation which the obscurity of the subject justifies us in entertaining, I should be sorry if the rising generation of medical and scientific men were to be turned aside from a course of investigation which has been already rewarded with certain important practical results, at least until physiologists shall have explored some other path which can be shown to penetrate further into the mysteries of the living organisation.

## Home Correspondence.

*Large Acacia dealbata.*—On the night of Saturday, the 17th inst., an unusual fall of snow took place in South Devon, the weight of which destroyed a magnificent Acacia dealbata at Combe Royal, the seat of John Luscombe, Esq. This tree was perhaps unrivalled in England, as it had attained a height of 54 feet, with a stem rather more than 5 feet in circumference. The branches made 17 faggots, each as large as a man could carry. In the month of April the tree was laden with its fragrant yellow blossoms, and its seeds formed a favourite repast to some pet fan-tailed pigeons, which, having once accidentally tasted them, were always on the watch for them. *Devonian.*

*Windmill for Raising Water.*—In answer to "An Old Subscriber," I beg to state that I have a wind engine made by Mr. J. R. Peill, 17, New Park Street, Southwark Bridge, 3-horse-power, with one of Messrs. Warner's pumps attached, that has been at work about nine months. It is erected nearly half a mile from the premises, and pumps the water from a spring to a height of 70 feet, supplying the house and farmyards, and filling a large pond that has been dry for years. It requires very little wind, and (owing to the sails being self-adjusting) no attention save oiling once a week. If placed near the farmstead it might be used to drive a chaff-engine, &c., when not required for pumping. *James Christy, jun., Boynton Hall, near Chelmsford.* —— The windmills which your correspondent saw in Holland are of the ordinary kind, and cannot be left safely to work night and day without attention. If he will pay a visit to our works he will see a patent wind-engine at work pumping, chaff-cutting, &c., and driving a peculiar wheel, which raises from 300 to 400 gallons of water per minute. This wheel is about to be fixed on a nobleman's estate in Norfolk for draining a large tract of land, and is to be driven by the patent self-regulating wind-engine. *J. Peill*, 17, *New Park Street, Southwark.*

*The Weather in Cornwall.*—For upwards of 30 years we have not been visited with such severe weather, accompanied by a heavy fall of snow, as that just passed away. The thermometer, a self-acting one, registered as follows:—On Wednesday, Dec. 14, wind N.E., 4° of frost; Thursday, Dec. 15, wind N.E., 6°; Friday, wind S.E., 18°; and Saturday, wind E., 23°, which continued nearly the whole of Sunday. After that a change took place, the wind taking a southern direction. An additional fall of snow occurred, which in all reached to the depth of 12 inches, very unusual in Cornwall, which has a moist, warm climate compared with that of other counties—Devon being an exception. A large quantity of autumn and spring Broccoli plants, the former Snow's Improved White, and Grange's Autumn, with tall and dry Savoys, have been nearly destroyed—they are only fit for the rubbish heap. Portugal Laurels, Sweet Bays, Laurustinus, and other shrubs are materially injured in foliage. The gardens are situated on blue clay. *Henry Beddard, Gardener to J. F. Bassel, Esq., Tehidy Park, Cornwall.*

*Rural Societies.*—Can you afford me any information to guide the establishment of "garden societies," having for their object the improvement of cottagers' gardens, and competition among all classes (in country districts) in the production of vegetables and fruit? It would be very desirable to combine with these objects the giving of lectures, or the reading of papers on useful popular branches of gardening, and I should be much obliged for any hints by which such an arrangement might be made serviceable to all persons—rich and poor—who help in establishing such societies. *J. Bailey Denton, Woodfield, Stevenage.* [We imagine that the proceedings at Professor Henslow's Hitcham meetings, on which we have so often reported, would be a very safe guide.]

*Transplanting Cedars.*—I have two fine young Cedars on my lawn, so near to each other that in a year or two the branches will interlace. They are too large (probably about 25 years old) to be removed without considerable risk and expense. Can you kindly inform me whether they may safely be left as they are? Some persons say that Cedars will not interlace without one or the other tree dying, or at least that the contiguous branches will die even if the trees survive. *W. D.* [It is probable that the branches which interlace will die partially. But it is certain that the trees themselves will not die because of the interlacing.]

*Gooseberry Buds and Birds.*—I have tried a composition of sulphur, soft soap, quick lime, and soot, for several years to keep off these little marauders from destroying Gooseberry buds, and find that it answers perfectly. It is put on in the autumn with a syringe or hand engine, and forms a coat round the buds which the sparrows do not like to touch. The Gooseberry bushes are not pruned until all danger is over in the spring, as I find the birds generally attack them and do all the damage in a few days just when the buds are beginning to swell. This mixture was likewise tried last spring on young forest trees newly planted, in a situation where they were liable to be eaten by hares and rabbits. A large tub was made of the mixture, and the young trees were dipped in it in bundles, and after drying were planted out. They were untouched all the spring and summer, and being from 3 to 4 feet high another summer's growth enabled them to be out of the reach of hares and rabbits, so that no further painting was required. I use this composition for Vines, Peach trees, Cherries, and Figs, and all deciduous fruit trees in forcing houses liable to be attacked by insects or mildew. In making the mixture the proportion of ingredients used here is as follows:—4 oz. of soft soap and 6 oz. of flowers of sulphur to the gallon of water, adding as much quicklime as will bring the mixture to the consistence of paint. Some clay is added to cool it and take the white colour off, when it is used for Peach trees, Figs, Cherries, and Plums; and soot when it is required for Gooseberry bushes and young forest and fruit trees to keep birds, hares, rabbits, and deer off. For deterring rabbits from barking young orchard trees I have used the above mixture for many years, and never found it fail. By adding some fresh cow-dung to the other ingredients a greater body is given to the mixture, and it will only want renewing every two or three years. Hares, rabbits, and deer are very nice in smelling everything before they begin peeling or eating it; and sulphur, soft soap, or oil in any shape is an abomination to them. I intend trying some of Gishurst Compound to mix in the composition the next time of making and using less sulphur and soft soap. *William Tillery, Welbeck.*——The following is a good recipe for preventing rabbits from barking trees:—Bitter aloes, 6 lbs.; Black sulphur, 2 lbs.; soft soap, 6 lbs.; water, *q. s.*; soot enough to thicken the soap, and a little lime to give it consistency. No French cook can beat this. *Woglog.*

## Notices of Books.

*Ceylon; an Account of the Island, Physical, Historical, and Topographical, with notices of its Natural History, Antiquities, and Productions.* By Sir James Emerson Tennent, K.C.S., &c. 2 vols, 8vo. Longmans. Third Edition.

(SECOND NOTICE.)

If we turn from plants to the Animal Kingdom we are arrested at every step by anecdotes and descriptions which convey a most lively impression of wild nature in Ceylon. Not the least extraordinary creature mentioned by our author is a prodigious Mygale, a kind of spider, whose jaws are furnished with a poisonous venom, and which would be a formidable enemy even of man, were its mandibles capable of expanding sufficiently to embrace an object of such size as the finger or hand. The largest specimens of this spider actually seen by Sir Emerson Tennent

"Were at Gampola and its vicinity, and one taken in the godown of this rest-house nearly covered with its legs an ordinary sized breakfast plate. This ingenious creature does not weave a broad web or net like other spiders, but nevertheless it forms a comfortable mansion in the wall of a neglected building, the hollow of a tree, or the eaves of an overhanging stone. This it lines throughout with a tapestry of silk of a tubular form, and a texture so exquisitely fine and closely woven, that no moisture can penetrate it. The extremity of the tube is carried out to the entrance, where it expands into a little platform, stayed by braces to the nearest objects that afford a firm hold. In particular situations, where the entrance is exposed to the wind, the mygale, on the approach of the monsoon, extends the strong tissue above it so as to serve as an awning to prevent the access of rain. The construction of this silken dwelling is exclusively designed for the domestic luxury of the spider; it serves no purpose in trapping or securing prey, and no external disturbance of the web tempts the creature to sally out to surprise an intruder, as the epeira and its congeners would. As to the stories told of the mygale catching and killing birds, I am satisfied, both from inquiry and observation, that at least in Ceylon they are destitute of truth, and that (unless in the possible case of acute suffering from hunger) this creature shuns all descriptions of food except soft insects and annelides. A lady at Maradan, near Colombo, told me that she had, on one occasion, seen a little house-lizard (gecko) seized and devoured by one of these ugly spiders."

To multiply examples of this kind would be impossible within our narrow limits. We therefore prefer to present our readers with the following sketch of animal life in the jungle at various periods of the day; by far the most graphic we remember to have seen.

"With the first glimmering of dawn the bats and nocturnal birds retire to their accustomed haunts, in which to hide them from 'day's garish eye;' the jackal and the leopard steal back from their nightly chase; the elephants return timidly into the shade of the forest, from the water pools in which they had been luxuriating during the darkness; and the deep-toned bark of the elk resounds through the glens as he retires into the security of the forest. Day breaks, and its earnest blush shows the mists tumbling in turbulent heaps through the deep valleys. The sun bursts upwards with a speed beyond that which marks his progress in the cloudy atmosphere of Europe, and the whole horizon glows with ruddy lustre:

'Not, as in northern climes, obscurely bright,
But one unclouded blaze of living light.'

At no other moment does the verdure of the mountain woods appear so vivid; each spray dripping with copious dew, and a pendant brilliant twinkling at every leaf; the grassy glade is hoar with the condensed damps of night, and the threads of the gossamer sparkle like strings of opal in the sunbeams. The earliest members of the animated world that catch the eye as they move abroad are the Hesperidæ; the first butterflies, that, with abrupt gesture, pay their morning visit to the flowers. To them succeed the Theclæ, distinguished by the blue metallic lustre of their wings; and the Polyommati, the minutest and most delicate of the diurnal lepideptera. The other species make their appearances with unerring certainty at successive stages of the morning; the Theclæ are followed by the Vanessæ, and these by the gaudy Papilios, till, as day advances, the broad-leaved plants and flowering shrubs are covered by a dancing cloud of butterflies of every shape and hue. The bees hurry abroad in all directions, and the golden beetles clamber lazily over the still damp leaves. The earliest

bird upon the wing is the crow, which leaves his perch almost with the first peep of dawn, cawing and flopping his wings in the sky. The parroquets follow in vast companies, chattering and screaming in exuberant excitement. Next the cranes and waders, which fly inland to their breeding places at sunset, rise from the branches on which they had passed the night, waving their wings to disencumber them of the dew; and, stretching their awkward legs behind, they soar away in the direction of the rivers and the far sea-shore. The songster that first pours forth his salutation to the morning is the dial-bird (Copsychus saularis), and the yellow oriole, whose mellow flutelike voice is heard far through the stillness of the dawn. The jungle cock, unseen in the dense cover, shouts his reveille; not with the shrill clarion of his European type, but in a rich melodious call, that ascends from the depths of the valley. As light increases, the Grass warbler and maynah add their notes; and the bronze-winged pigeons make the woods murmur with their plaintive cry, which resembles the distant lowing of cattle. The swifts and swallows sally forth as soon as there is sufficient warmth to tempt the minor insects abroad; the bulbul lights on the forest trees, and the little gem-like sun-birds (the humming birds of the East) quiver on their fulgent wings above the opening flowers. * * * It is during the first five hours of daylight that nature seems literally to teem with life and motion, the air melodious with the voice of birds, the woods resounding with the simmering hum of insects, and the earth replete with every form of living nature. But as the sun ascends to the meridian the scene is singularly changed, and nothing is more striking than the almost painful stillness that succeeds the vivacity of the early morning. * * * As day declines nature recovers from her languor and exhaustion, the insects again flutter across the open glades, the birds venture once more upon the wing, and the larger animals saunter from under cover, and move away in the direction of the ponds and pasture. The traveller recommences his suspended journey, and the husbandman, impatient to employ the last hours of fading night, hastens to resume the interrupted labours of the morning. The birds which had made distant excursions to their feeding grounds are now seen returning to their homes; the crows assemble round some pond to dabble in the water, and readjust their plumes before retiring for the night; the parroquets settle with deafening uproar on the crowns of the palm trees near their nests; and the pelicans and sea birds, with weary wing, retrace their way to their breeding place near some solitary watercourse or ruined tank. The sun at last

'Sinks, as a flamingo
Drops into her nest at nightfall;'

twilight succeeds, and the crepuscular birds and animals awaken from their mid-day torpor and prepare to enjoy their nightly revels. The hawk moths now take the place of the gayer butterflies, which withdraw with the departure of light; innumerable beetles make short and uncertain flights in the deepening shade, and in pursuit of them and the other insects that frequent the dusk, the night-jar, with expanded jaws, takes low and rapid circles above the plains and pools. Darkness at last descends, and every object fades in night and gloom; but still the murmur of innumerable insects arises from the glowing earth. The fruit-eating bats launch themselves from the high branches on which they have hung suspended during the day, and cluster round the Mango trees and Tamarinds; and across the grey sky the owl flits in pursuit of the night moths on a wing so soft and downy that the air scarcely betrays its pulsations. The palm-cat now descends from the crest of the Coco-nut where she had lurked during the day, and the glossy genette, emerging from some hollow tree, steals along the branches to surprise the slumbering birds. Meanwhile, among the Grass already damp with dew, the glow worm lights her emerald lamp, and from the shrubs and bushes issue showers of fire-flies, whose pale green flashes sparkle in the midnight darkness till day returns and morning 'pales their ineffectual fires.'"

Among the most remarkable chapters in this remarkable work is that upon the elephant, which occupies no fewer than 130 pages, capitally illustrated by engravings of the animal under various circumstances. Of the elephant in captivity, there is little now to learn; but in his wild state we have nothing beyond a few hunters' tales. The noble animal has at last found a historian worthy of him. During his residence in Kandy Sir Emerson Tennent had ample opportunities of studying the elephant, and of correcting erroneous ideas respecting the creature before he became the captive of man. How admirably these opportunities have been used will be seen upon perusing the author's narrative. We must however find room for the following curious story:—

"Mr. Cripps has related to me an instance in which a recently captured elephant was either rendered senseless from fear, or, as the native attendants asserted, feigned death in order to regain its freedom. It was led from the corral as usual between two tame ones, and had already proceeded far on its way towards its destination, when night closing in, and torches being lighted, it hesitated to go on, and finally sank to the ground apparently lifeless. Mr. Cripps ordered the fastenings to be removed from its legs, and when all attempts to raise it had failed, so convinced was he that it was dead, that he ordered the ropes to be collected and the carcase to be abandoned. While this was being done he and a gentleman by whom he was accompanied leaned against the body to rest. They had scarcely taken their departure and proceeded a few yards, when to their astonishment, the elephant rose and with the utmost alacrity fled towards the jungle, screaming at the top of its voice, its cries being audible long after it had disappeared in the shades of the forest."

Among the more important commercial products of Ceylon is Coffee, which though an exotic has now become so largely cultivated that according to Mr. Ferguson, an excellent authority, there were in 1857 nearly 81,000 acres under the crop, producing on an average 5½ cwt. an acre, or about 347,000 cwt., and giving employment to 129,000 labourers. Upon this subject the 2nd Volume contains very full information, together with a complete map of all the Coffee estates in the central provinces of the island.

Notwithstanding the length to which this notice has extended—far shorter however than so important a work demands—we cannot conclude our remarks without expressing our hearty concurrence in the following statesmanlike view of the use of a Colonial Botanic Garden when under intelligent management. Speaking of that of Peradenia, which has been raised from ruin to a position of the highest importance, firstly by the late Dr. Gardner, and since his death by the energy of Mr. Thwaites, its present most able superintendent, Sir Emerson Tennent writes thus:—

"At times there has been the murmur of ill-informed utilitarianism against the expenditure bestowed upon the botanic garden of Peradenia. But the object of such institutions, and the functions of their curators, are still imperfectly appreciated even in the localities to whose welfare they are most conducive; owing chiefly to an ignorant impatience for results which in their very nature must be prospective. The fact is over-looked, that such foundations are designed not for individual benefit, but for the collective advantage of communities by the gradual application of science to material development. Objects at first despised and insignificant become sources of colonial wealth under the auspices of the botanist; and, on the other hand, productions upon which the prosperity of a region may be dependant, are liable to destruction and decay in the absence of his experience and counsels. It is wise policy in the government of a country, and most of all of a new and unexplored one, to encourage the cultivation of science for its own sake, confident that its labours, if not remunerative at the moment, will prove infallibly productive in the future. The colonial botanist, in addition to the care and nomenclature of plants, useful, rare, and ornamental, and the collection of fruits and products of all kinds, for an œconomic museum of botany, should take upon himself the selection of a library and the formation of a *hortus siccus* for consultation and reference. These duties, together with his foreign correspondence and exchanges, the reception of scientific strangers, the journeys of himself and his assistants to explore the country and collect botanical specimens, and occasional publications to excite and sustain popular interest in his pursuits, ought to constitute the functions of a botanical officer, and no colony can fail to reap the benefit of such labours if judiciously discharged. But the dissatisfaction which has occasionally manifested itself in Ceylon, arises not alone from a want of due appreciation of the legitimate duties of a superintendent, but also from an unreasonable expectation of services not legitimately within his province. A knowledge of agriculture, horticulture, forestry, pharmacy, and toxicology have each been demanded, as well as the philosophy of climates, the geologic nature of rocks and soils, the chemistry of manures, and the œconomic habits of animals, birds, and insects; and it is within my own knowledge that from the Coffee planters there have been remonstrances to the local government as to the propriety of applying public funds for the maintenance of an institution from which, in regard to their own estates, they had failed individually to obtain assistance in connection with these and similar subjects. A man of generous education may, no doubt, be more or less familiar with such studies, but even if a scientific botanist felt diffident in propounding opinions or offering directions in relation to them, his peculiar attainments must be of signal advantage in modifying the views or facilitating the operations of others. So charming is the sphere of his duties, that those who cannot estimate their importance except by the value of their ostensible results are liable to ignore their latent utility in the contemplation of their ornamental attractions. But observation and experience cannot fail to dissipate false expectations; and looking to the present transitional aspect of Ceylon, and the future which is already dawning for the island, my conviction is strong that no establishment in the colony is so essential to its interest as the Royal Botanic Gardens of Peradenia."

It is well indeed for Colonies when men like the enlightened author of these charming volumes have the power to influence their destiny.

## Calendar of Operations.

*(For the ensuing week.)*

### PLANT DEPARTMENT.

CONSERVATORY, &c.—Forcing pits will soon have to be kept in full activity to supply the various calls for plants in bloom, which during winter are more or less in demand in most establishments. Care should be taken before plants are moved to sitting rooms to gradually harden them for a day or two either by placing them in the conservatory or an intermediate house. In addition to keeping the conservatory gay with blooming plants, let the arrangement of the interior be occasionally changed by grouping the plants somewhat differently and adding a few striking ones, as some of the hardiest Palms, &c., for effect. Pay attention to the plants intended for successive blooming. Insects should be kept down and every means enforced to keep the foliage clean and healthy. The number of plants brought forward will depend on the demand and must be regulated accordingly. Azaleas, Rhododendrons, &c., for forcing still out of doors should have some protection should severe weather re-occur, or remove them to any spare house till wanted. Narcissi, Hyacinths, &c., should be protected by a frame, as they now begin to grow, remove the plunging material down to the surface of the pots to prevent them rooting upwards. Mignonette and Neapolitan Violets will require abundance of light and air to keep them from damping. As a change from the present to severe weather may come on suddenly, be provided with ample means for covering pits, frames, &c., should it occur. As with the exception of forced plants most other things are now in an inactive state, the temperature of plant houses should fall to its minimum point consistent with the safety of their various inmates.

### FORCING DEPARTMENT.

PINERY.—Pines are often deficient in flavour at this season, which is improved by exposing the ripening fruit to all the light you can command, and giving but little water. A good supply of air is likewise essential at all times for high flavoured fruit, and more than ever necessary at this time. Continue an increase of heat to Pines now wanted to start, employing it principally by day. Attend to linings for Pines grown in dung pits and keep the atmosphere in which they grow dry. EARLY VINERY.—As soon as the bunches can be discerned on the young shoots the extra buds should be removed, excepting such as may be required for producing bearing wood next season. In leaving these latter select such as are formed nearest the main stem to avoid the awkward appearance of long spurs at a stage further in their growth. Such shoots as have more than one bunch should have them reduced to that number, selecting the one likeliest to form the handsomest bunch. Tying in the young wood should be managed carefully, bringing the shoots to their proper position by degrees, to avoid the danger of their breaking. After the buds are started a few inches the syringe may be gradually withheld, as too much humidity at this season will sometimes hinder both the foliage and bunches, and a sufficient degree of moisture can easily be kept by sprinkling the floors and heating apparatus several times daily. Regulate the admission of air so as to have a gentle current at all times through the house, increased, of course, by day agreeably with the state of the weather. Gradually advance the night temperature to 60° and then to 65° by the time the flowers are ready to open, keeping the thermometer from 10° to 15° higher by day according to the amount of light you can command. Keep up the heat in the outside border by additions when necessary, bearing in mind the injurious effects any sudden check to the roots now in action will produce on the coming crop. Bring succession Vineries into work as wanted. Late Vineries in which Grapes are still hanging will require fires daily and air sufficient to keep the house and fruit dry; remove decayed berries and dead leaves, and well protect the roots from frost. For a late Grape Lady Down's Seedling is found to possess valuable properties. PEACH HOUSES.—Peaches and Nectarines which have been forced for several years oftentimes produce a large excess of fruit-buds, and this more especially on weakly trees; a natural consequence of allowing these to remain are weak flowers and inferior fruit and wood. When therefore such is the case the trees will be greatly benefited by well thinning the bloom buds, leaving the largest and those most favourably placed; of course a considerable number will be still left to allow for casualties. Syringe twice or oftener daily till the bloom is ready to expand, when it must be discontinued. The night temperature may advance to 45°, with an increase by day accompanied with a proportionate admission of air. FIG HOUSE.—Damp the trees over frequently, and if wanted early increase the heat a degree or two weekly.

### FLOWER GARDEN AND SHRUBBERIES.

Except in particular cases little more can be done in this department than paying attention to order and neatness. The bedding stuff, however, must have attention, for in all likelihood many things are suffering from damp, and such plants as appear to suffer most should be removed to other quarters where a drier temperature is kept. Keep the stock in pits and frames well ventilated, and the surface soil of the pots frequently stirred. Dust with sulphur Verbenas and similar plants attacked with mildew. Be particular in keeping the interior of pits containing plants of the above description as dry as circumstances will permit.

### HARDY FRUIT AND KITCHEN GARDEN.

Some wall trees, as Pears, Plums, and Cherries, &c. are often attacked by a species of scale, in which case the infected trees should be well washed with a mixture of soft soap, tobacco water, and lime; a half pint of spirits of turpentine may be added to each 4 gallons of the mixture when they are much infested. The lime is added to give body to the mixture, and to show that no parts of the trees are missed in dressing. Let this be applied during dry weather, if possible, that it may remain on for some time and before the trees are nailed; washing the infected parts with water of the temperature of 160° is also a good remedy.

### STATE OF THE WEATHER AT CHISWICK, NEAR LONDON.

For the Week ending Dec. 29, 1859, as observed at the Horticultural Gardens

| Dec. | Moon's Age. | Barometer. Max. | Barometer. Min. | Temperature of the Air. Max. | Min. | Mean | Temperature of the Earth 1 foot deep | 2 feet deep. | Wind. |
|---|---|---|---|---|---|---|---|---|---|
| Friday 23 | 29 | 29.487 | 29.326 | 44 | 29 | 36.5 | 38½ | 40 | W. |
| Satur. 24 | ● | 29.105 | 28.988 | 48 | 29 | 38.5 | 39 | 40 | S.W. |
| Sunday 25 | 1 | 29.009 | 28.651 | 45 | 36 | 40.5 | 39 | 40 | S. |
| Mon. 26 | 2 | 29.393 | 28.598 | 44 | 29 | 36.5 | 40 | 40 | S.E. |
| Tues. 27 | 3 | 29.308 | 29.121 | 49 | 33 | 41.0 | 40½ | 40 | S.W. |
| Wed. 28 | 4 | 29.246 | 29.195 | 50 | 37 | 43.5 | 41½ | 41 | S.W. |
| Thurs. 29 | 5 | 29.348 | 29.166 | 53 | 43 | 48.0 | 42 | 41½ | |
| Average | | 29.271 | 29.006 | 47.5 | 33.7 | 40.6 | 40.1 | 40.3 | |

Dec. 23—Foggy; hazy; overcast; rain.
— 24—Overcast; very fine; foggy at night.
— 25—Foggy; overcast; heavy rain.
— 26—Densely overcast; very clear at night.
— 27—Hoar frost; cloudy and fine; clear; rain.
— 28—Densely overcast; heavy rain; clear at night.
— 29—Fine, boisterous with rain; overcast.
Mean temperature of the week, 3½ deg. above the average.

### RECORD OF THE WEATHER AT CHISWICK,

During the last 34 years, for the ensuing Week, ending Jan. 7, 1860.

| January. | Average Highest Temp. | Average Lowest Temp. | Mean Temp. | No. of Years in which it Rained. | Greatest Quantity of Rain. | Prevailing Winds. |
|---|---|---|---|---|---|---|
| Sunday 1.. | 43.2 | 31.2 | 37.2 | 10 | 0.70 in. | |
| Mon. 2.. | 42.3 | 30.0 | 36.2 | 13 | 0.21 | |
| Tues. 3.. | 42.8 | 31.5 | 37.2 | 17 | 0.56 | |
| Wed. 4.. | 42.2 | 31.8 | 37.0 | 15 | 0.86 | |
| Thurs. 5.. | 41.6 | 30.8 | 36.2 | 12 | 0.40 | |
| Friday 6.. | 41.2 | 30.0 | 35.6 | 13 | 0.33 | |
| Satur. 7.. | 41.3 | 29.6 | 35.5 | 12 | 0.34 | |

The highest temperature during the above period occurred on the 4th, 1851, 5th, 1854, and 6th and 7th, 1845—therm. 54 deg.; and the lowest on the 2d, 1854—therm. 4 deg.

## Notices to Correspondents.

OLD HERBAL: *H T M.* Next week.

SPERGULA PILIFERA: *Jason.* The value of this little plant has been absurdly exaggerated. Our own experience of it tells us that it can be no substitute for Lawn Grasses. Its importance seems to be confined to small work where a turf is useful; and for that it appears to be particularly well adapted.

THE POMEGRANATE: *D D.* Very poor specimens of this fruit have occasionally ripened in this country on a south wall, but under no treatment is it likely to repay the time bestowed on it.

WALL PLANTS: *Editor.* The following may perhaps answer your purpose, viz., the Pyracantha, Roses including the common China, Wistaria sinensis, Fuchsia Riccartoni, Clematis montana, and viticella, Forsythia, Jasmines, Virginian Creeper, Ivy, Chimonanthus, Ceanothus azureus, Peach blossomed Peach, Berberis Darwinii, to which might be added Camellias, Myrtles, and other evergreens. Ficus repens is too tender to succeed out-of doors.‡

ARTIFICIAL MANURES, &c.—Manufacturers and others engaged in making ARTIFICIAL MANURES may obtain every necessary instruction for their economical and efficient preparation, by applying to J. C. NESBIT, F.G.S., &c., Principal of the Agricultural and Chemical College, Kennington, London, S. Analyses of Soils, Guanos, Superphosphates of Lime, Coprolites, &c., and Assays of Gold, Silver, and other Minerals are executed with accuracy and despatch. Gentlemen desirous of receiving instruction in Chemical Analyses and Assaying, will find ample facility and accommodation at the College.

LONDON MANURE COMPANY
(ESTABLISHED 1840),
Have the following MANURES ready for delivery:—
CORN MANURE FOR AUTUMN SOWING.
BLOOD MANURE FOR AUTUMN SOWING.
URATE.
SUPERPHOSPHATE OF LIME.
SUPERPHOSPHATE MINERAL.
The London Manure Company also supply PERUVIAN GUANO (direct from Messrs. Gibbs & Sons), SULPHATE OF AMMONIA, NITRATE OF SODA, CRUSHED BONES, and every other Manure of known value, all of which they warrant strictly genuine. Wholesale dealers supplied.
116, Fenchurch Street, E.C. EDW. PURSER, Secretary.

ESTABLISHED 1812.
MESSRS. PROCTOR are now prepared to take orders for their special MANURES for 1860, which they unhesitatingly state are of a superior quality and charged at the lowest possible price, viz.:—

| | | |
|---|---|---|
| TURNIP MANURE | CLOVER MANURE | OAT MANURE |
| WHEAT ditto | POTATO ditto | BEAN ditto |
| GRASS ditto | BARLEY ditto | Also |

PERUVIAN GUANO, BONE DUST, SUPERPHOSPHATE OF LIME, &c., all of which are warranted of the best quality.
Apply to H. & T. PROCTOR, Cathay, Bristol; or
PROCTOR & RYLAND, Birmingham and Chester.

MR. J. B. LAWES manufactures the following MANURES:—

| | |
|---|---|
| TURNIP MANURE .. .. .. .. | £6 6 |
| SUPERPHOSPHATE OF LIME . .. | 6 6 |
| MINERAL SUPERPHOSPHATE OF LIME | 5 5 |
| BARLEY MANURE .. .. .. .. | 8 0 |

N.B. Genuine PERUVIAN GUANO direct from Messrs Gibbs, NITRATE OF SODA, SULPHATE OF AMMONIA, and other Chemical Manures.
WHEAT MANURE.—PERUVIAN GUANO is proved to be the best and cheapest Artificial Manure for Wheat, at Autumn sowing.
American decorticated Cotton-seed Cake of best quality supplied at the market price.
Offices: 1, Adelaide Place, London Bridge, E.C.

BURNARD, LACK, AND CO.'S CONCENTRATED SUPERPHOSPHATE OF LIME; guaranteed to contain Phosphoric Acid soluble, equivalent to 40 per cent. of Tribasic Phosphate of Lime.
CONCENTRATED TURNIP MANURE, equal in value to the preceding.
Of these Manures Dr. Voelcker says:—"These results must be very gratifying to you, and are the best proof of the very high agricultural and commercial value which characterises your concentrated superphosphate."
Detailed analyses, with opinions of the late and present Chemists to the Royal Agricultural Society, with Testimonials, Prices, &c., may be had on application to BURNARD, LACK, & Co., Sutton Road, Plymouth.

PARMENTER'S PATENT PREPARATION FOR DESTROYING MEALY BUG, RED SPIDER, THRIP, AND OTHER INSECTS, AND ALSO MILDEW ON VINES, FRUIT TREES, AND PLANTS OF ALL DESCRIPTIONS.
See Messrs. Henderson's report on the above in last week's *Chronicle*.
Price 2*s*. and 3*s*. 6*d*. per bottle; Stone Jars, 10*s*. 6*d*. each.
To be had of all Nurserymen and Seedsmen.
J. CARTER & Co., 237 and 238, High Holborn, W.C.

GISHURST COMPOUND,
PATENTED,
FOR PREVENTING AND DESTROYING

| | | |
|---|---|---|
| RED SPIDER | MEALY BUG | MILDEW |
| THRIPS | SCALE | GREEN and BROWN |
| AMERICAN BLIGHT | ANTS | FLY |

BED BUGS, &c.,
And useful in winter dressing.
Contains no deleterious ingredient.
Has received the sanction of the Gardening Press, see *Gardeners' Chronicle* of 9th April and 16th July, 1859, and "Cottage Gardener," 12th July, and has been favourably reported on, and is used by eminent gardening authorities, among whom are—
Mr. Judd, of Althorp Gardens
Mr. Rivers, of Sawbridgeworth
Mr. Edmonds, of Chiswick House Gardens
Mr. Collinson, of Eaton Hall Gardens
Messrs. A. Henderson & Co., Edgeware Road
Mr. Jas. Veitch, jun., Chelsea
Mr. Spencer, of Bowood Gardens
The principal Nurserymen and Seedsmen throughout England, Scotland, and Ireland use it, have taken in supplies, and are now prepared to sell single boxes—price 1*s*. for first trials and small uses, such as destroying bed bugs; 3*s*. for not large gardens; 10*s*. 6*d*. for large gardens, with testimonials and full descriptions for use.
Nurserymen and Seedsmen supplied by
PRICE'S PATENT CANDLE COMPANY, Limited, London.

TO PIG, POULTRY, AND GAME FEEDERS.
JUPP'S RICE FOOD, POULTRY AND GAME.—RICE SWEEPINGS, 7*s*. 6*d*. per cwt., in 1½ cwt. bags; SCREENED RICE, 10*s*. per cwt., in 1¾ cwt. bags; DOG BISCUITS, 14*s*. per cwt.; OIL-CAKE, per ton only; RICE MEAL for PIGS, 6*s*. and 8*s*. per cwt., in 1 cwt. bags, at the mill. Orders must be accompanied by a remittance to insure delivery.—W. & R. JUPP, 6, Cross Lane, Eastcheap, E.C.

NOTICE.
CAKE AND CORN MERCHANTS, AGENTS, FARMERS, and all interested, are by the following statement cautioned against an advertisement addressed to them purporting to be from the "Inventor of Thorley's Food for Cattle;" viz, "I, the undersigned, hereby give notice that I am the sole inventor, and the sole proprietor, and the sole manufacturer of Thorley's Food for Cattle—that I have never authorised any person to use my name or treat for the manufacture of Thorley's Food for Cattle—that Thorley's Food for Cattle, as now manufactured by me, is a different and much more valuable article than my original food for cattle, as manufactured by me at Hull—that any article now offered for sale as Thorley's Food for Cattle is a spurious imitation, unless it is manufactured by me and comes from my manufactory, and therefore ought to be treated AS A COUNTERFEIT—and that no one in my employment knows or has any control over what gives to Thorley's Food for Cattle its real condimental and money value. "JOSEPH THORLEY."
Offices: 77, Newgate Street, E.C., and Steam Mills, Caledonian Road, London, N.; 174, Greenwich Street, New York, United States; and 86, Front Street, Toronto, Canada.

BURGESS AND KEY'S ROYAL AGRICULTURAL SOCIETY'S FIRST PRIZE GRASS MOWING MACHINE

This Machine has been introduced with the greatest success into this country during the last season, and a large number of them have been worked in a most satisfactory manner. A Silver Medal was awarded to it at the Royal Agricultural Society's Meeting at Warwick. It was also exhibited before the Emperor of the French at Fouilleuse, on which occasion it performed its work to the admiration of every one. Two of these Machines were purchased by the Emperor on this occasion, and an order for two more has since been received for the season of 1860. It was also exhibited in Scotland and Ireland with the same success. It also received the First Prize of the Norfolk Society at Swaffham, in competition with Wood's and others, besides many other works. Price £30 at the Works. Extras are charged for.—Full particulars may be obtained of
BURGESS & KEY, 95, Newgate Street, London, E.C.
Early orders are solicited to insure delivery in time for harvest.

WEST OF ENGLAND AND SOUTH WALES LAND DRAINAGE AND INCLOSURE COMPANY.
Established in 1844.
INCORPORATED BY ACT OF PARLIAMENT IN 1848.
Draining, Inclosing, Irrigating, Warping, Road Making, and all kind of Land Improvements, executed on Entailed, Mortgaged, or other Properties, and the whole cost can be made a Permanent Charge on the Lands, or redeemable in a certain number of years. BIDWELL & BRODIE, Secretaries.
Offices: Exeter; and 30, Parliament Street, London, S.W.

THE LANDS IMPROVEMENT COMPANY.—Incorporated by Special Act of Parliament in 1853.—2, Old Palace Yard, Westminster, S.W. To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales and in Scotland.
The Directors beg leave to announce that the Company's Amendment Bill, 1859, has received the sanction of the Legislature. The Company now advance money, unlimited in amount, for the following works of Agricultural Improvement, the whole outlay and expenses in all cases being liquidated by a rent charge for 25 years.
1. Drainage, Irrigation and Warping, Embanking, Inclosing, Clearing, Reclamation, Planting for any beneficial purpose, Engines or Machinery for Drainage or Irrigation.
2. Farm Roads, Tramways and Railroads for agricultural or farming purposes.
3. Jetties or Landing places on the sea coast or on the banks of navigable rivers or lakes.
4. The erection of Farm Houses, Labourers' Cottages, and other Buildings required for Farm purposes, and the improvement of and additions to Farm houses and other buildings for farm purposes.
Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses on the lands improved.
No investigation of title is required, and the Company being of a strictly financial character do not interfere with the plans and execution of the Works, which are controlled only by the Government Enclosure Commissioners.
For further information, and for forms of application, apply to the Honourable WILLIAM NAPIER, Managing Director, 2, Old Palace Yard, Westminster, S.W.

LAND DRAINAGE.
WORKS OF DRAINAGE of any extent are EXECUTED by the GENERAL LAND DRAINAGE AND IMPROVEMENT COMPANY on all descriptions of property, whether freehold, entailed, mortgaged, trust, ecclesiastical, corporate, or collegiate.
Repayment may be made by the Landowner as successive portions of the works are completed; or the actual expenditure, with a commission thereon, may be charged on the property improved, by way of rentcharge on the estate created for various terms of years so as to adapt the rate per cent. of annual charge to the circumstances of the tenants.
No investigation of title being required, or notices given to Reversioners or Mortgagees, no legal expenses are incurred.
Works of Irrigation, Enclosing, Wood Grubbing, Road Making, and Farm Buildings are executed in a similar manner.
Landowners desirous to execute any of the Improvements by their own Agents, and charge the outlay and expenses on the Estate, may obtain Loans for the purpose.
Applications to be made to WILLIAM CLIFFORD, the Secretary, at the Offices of the Company, 52, Parliament Street, S.W.

COLLEGE OF AGRICULTURE AND CHEMISTRY, AND OF PRACTICAL and GENERAL SCIENCE, 37 and 38, Lower Kennington Lane, Kennington, London, S.
Principal—J. C. NESBIT, F.G.S., F.C.S., &c.
The system of studies pursued in the College comprises every branch requisite to prepare youth for the pursuits of Agriculture, Engineering, Mining, Manufactures, and the Arts; for the Naval and Military Services, and for the Universities.
Analyses and Assays of every description are promptly and accurately executed at the College. The terms and other particulars may be had on application to the Principal.

CRYSTAL PALACE. WINTER POULTRY SHOW.—A Grand SHOW of POULTRY and PIGEONS will be held at the Crystal Palace, February 11, 13, 14, and 15, 1860. The Entries close on January 14.
For Schedules of Prizes and Certificates of Entry, apply to Mr. W. HOUGHTON, Secretary to the Show.

# The Agricultural Gazette.

*SATURDAY, DECEMBER* 31, 1859.

—— THE letter by Baron LIEBIG in another column on the ultimate consequences of our present wasteful sanitary arrangements will be read with great interest. It capitally illustrates his power of clever illustration, and also, we must add, his power of dissociating the practical and the professional from the purely scientific relations of the problem or the proposition he discusses. It is the latter to which he directs attention; and he teaches that as the existing stores of natural manures from which we now import supplies are exhaustible, and will ultimately be unavailable, the exhaustion by our rivers of our home supplies of fertilising matter must ultimately be felt; our soils must ultimately suffer from this robbery, and at some future time, however distant, be rendered barren. Put the case extremely and it amounts to this—that the rainfall perpetually washing the dry land all over the surface of the earth does perpetually rob it of fertilising matter, and must ultimately starve the soil.—But there is a truth in science of another kind, which presents a still more lamentable prospect to all land animals. The constant raging of the ocean on the shore, as it does perpetually disintegrate and dilapidate must ultimately destroy—and "should the sea still continue to impel its currents and to roll its waves every continent and island must at length disappear; and, again, as of old, when 'the fountains of the great deep' were broken up,

'A shoreless ocean tumble round the globe.'"

But there are repairing and counterpart forces at work in both these cases. On the one hand land is fed by the very thief that robs it; and its fertility thus remains unimpaired in the wilderness and even increases in the cultivated field in spite of the agencies which would take its riches from it; and on the other it is being raised by subterranean agencies to meet the dilapidation which would destroy its very existence.

It is plain, from the experience of a thousand farms, that we may admit most fully and regretfully the immense waste now proceeding from dungheaps, whether in the farmery or in the town, without anticipating such a desperate future as Baron LIEBIG sees in store for us.

—— Let us again direct attention to the important discussion of the labour question before the Oxford Farmers' Club, reported in another page.

—— Will our correspondent who sent us his plans and estimates for the moveable shed which was referred to in these columns a fortnight ago, be good enough to send us his address, which has been mislaid?

IT is with very great regret that we learn the death of Mr. BAKER, of Writtle, near Chelmsford, whose name has for many years been known in the agricultural world—first in connection with the political discussions of 10 or 15 years ago, and latterly, especially in connection with the Central Farmers' Club, in the discussion of agricultural subjects, whenever either the teachings of experience or the deductions of science were wanted for their elucidation.

## THE EXHAUSTION OF ENGLISH SOIL.

[The following letter from Baron Liebig to Mr. Alderman Mechi will be read with interest.]

"Munich, Nov. 17.

"DEAR SIR,—Your letter of the 7th November to *The Times* furnishes me an occasion to express to you my sincere thanks for the views to which you there give utterance, and which I have laboured many years to impress. I am sorry not to be able to say that my efforts have been attended with any perceptible results, and I regard it as a fortunate event that a man of so eminently practical a character as yourself has now for the first time, in the interests of agriculture, and the national welfare, taken up the question of the 'sewerage of towns' with warmth, and in language adapted to produce conviction.

"It is my ardent wish that you may succeed in awakening the English people to your own convictions; for in that case the ways and means for setting aside the difficulties which stand in the way of procuring manure from the 'sewerage of towns' will certainly be found, and a future generation will look upon those men who have devoted their energies to the attainment of this end as the greatest benefactors of their country.

"The ground of my small success lies clearly in the fact that the majority of farmers do not know the extent to which their own interests are concerned in this matter, and because the views and conceptions of most men in regard to the circuit of life and the laws which govern the preservation of the race do not generally rise above those of C. Fourrier, the inventor of the phalanstery. He proposed, as you know, to supply the wants of the occupants of his phalanstery by means of eggs. He supposed it was only necessary to procure a couple of hundred thousand hens, each of which, sold in England, would produce an immense income. Fourrier knew very well that hens lay eggs, but he seemed not to know that in order to lay an egg they must eat an amount of corn its equal in weight; and so most men do not know that the fields, in order to yield their harvests, must either contain or else receive from the hands of man certain conditions which stand in the same relation to the products of the field as the hen's food does to the eggs she lays. They think that diligent tillage and good weather are sufficient to produce a good harvest; they therefore regard this question as

one in which they are wholly unconcerned, and look forward carelessly and with indifference to the future.

"As physicians who in the apparent signs of a young man's blooming health discern the fatal worm which threatens to undermine his organic frame, so in this case should these discerning men who are capable of comprehending the range of the question raise the earlier the voice of warning.

"It is true that the diligent tillage of the fields, sunshine, and timely rains are the outward conditions, perceptible to all men, of good harvests; but these are perfectly without effect upon the productiveness of the field, unless certain things not so easy of perception by the senses are present in the soil, and these are the elements which serve for nourishment, for the production of roots, leaves, and seeds, and which are present in the soil always in very small quantity, in proportion to the mass of the soil itself.

"These elements are taken from the soil in the products of the field—in the corn or in the flesh of the animals nourished by these products, and daily experience shows that even the most fruitful field ceases after a certain series of harvests to produce these crops.

"A child can comprehend that under these circumstances a very productive field, in order to remain very productive, or even simply productive, must have the elements which had been withdrawn in the harvests perfectly restored; that the aggregate of the conditions must remain in order to produce the aggregate results, and that a well, however deep it may be, which receives no supply of water, must in the end become empty, if its water is constantly pumped out.

"Our fields are like this well of water. For centuries those elements which are indispensable to the reproduction of the crops have been taken from the soil in those crops, and that, too, without being restored. It has only recently been ascertained how small a supply of these elements the soil really has. A beginning has been made to restore to the fields the losses which they sustain through the annual harvests, by introducing from external sources manures containing the same elements. Only a very few of the better informed farmers perceive the necessity of this restoration, and those of them who have the means have zealously endeavoured to increase the amount of these elements in their fields; but by far the greater part of them know nothing of such restoration. They think that they may continue to take from the field as long as there is anything left, and that it will be time enough to provide for this necessity when it knocks at their doors. They do not of course know how large their stock on hand is, nor are they aware that when the necessity shows itself there will be no means to correct it; they know not that what they have wasted is irretrievable.

"The loss of these elements is brought about by the 'sewerage system of towns.' Of all the elements of the field which, in their products, in the shape of corn and meat, are carried into the cities, and there consumed, nothing, or as good as nothing, returns to the fields. It is clear that if these elements were collected without loss, and every year restored to the fields, these would then retain the power to furnish every year to the cities the same quantity of corn and meat; and it is equally clear that if the fields do not receive back these elements agriculture must gradually cease. In regard to the utility of the avails of the 'sewerage of towns' as manures no farmer, and scarcely an intelligent man, has any doubt, but as to their necessity opinions are very various.

"Many are of the opinion that corn, meat, and manure are wares, which, like other wares, can be purchased in the market; that with the demand the price may, perhaps, rise, but this will also stimulate the production, and that all turns upon having the means to purchase, and so long as England has coal and iron she can exchange the products of her industry for the corn, meat, and manure which she has not. In this respect I think it would be wise not to be too confident of the future, for the time may, perhaps, come, even in half a century, that not one of those countries upon whose excess England has hitherto drawn will be able to supply her with corn, and that too from the natural law that what is true of the smallest piece of ground is true also of a great country. It ceases to produce corn if the conditions of the reproduction of the corn which has been carried off are not restored to it. Nor is it, furthermore, certain whether the corn-growing countries will always desire to exchange their corn for the products of English industry, since they may no longer need these products, or, at least, not in the ratio of England's need of corn. In the countries of Europe and in the United States of North America great efforts are made to become in this respect independent of England, as being in the end the only way of keeping the corn prices in these countries so as to repay the labour.

"In the United States the population increases at a still greater ratio than in other countries, while the corn production upon the land under cultivation has constantly fallen off.

"History teaches that not one of all those countries which have produced corn for other lands have remained corn markets, and England has contributed her full share towards rendering unproductive the best lands of the United States, which have supplied her with corn precisely as old Rome robbed Sardinia, Sicily, and the rich lands of the African coast of their fertility.

"Finally, it is impossible in civilised countries to raise the corn production beyond a certain limit, and this limit has become so narrow that our fields are no longer capable of a higher yield without an increase of their effective elements by the introduction of manures from abroad.

"By the application of guano and bones the farmer of most limited capacity learns the real import of such increase; he learns that the pure system of stall or homemade manures is the true and genuine robber system. In consequence of his restoring in the guano and bones but a very small portion of those very same elements of seeds and of fodder which had been withdrawn from his fields by centuries of cultivation, their products are wonderfully increased. Experiments instituted with special reference to this end in six different parts of the kingdom of Saxony showed that each hundredweight of guano put upon a field produced 150 lb. of Wheat, 400 lb. of Potatoes, and 280 lb. of Clover more than the same sized piece of ground without guano, and from this it may be calculated how enormously the corn and flesh production of Europe has been increased by the yearly importation of 100,000 tons, or 2,000,000 cwt., of guano.

"The effect of guano and bones should have taught the farmer the real cause of the exhaustion of his fields; it should have taught him in what a condition of perpetual fertility he might have preserved his fields if the elements of the guano which he has transported in the shape of meat and products of his field into the cities were recovered and brought into a form which would admit of their being restored to his fields every year.

"To an understanding of this, however, the farmer has not yet come, for, as his forefathers believed that the soil of their fields was inexhaustible, so the farmer of the present day believes that the introduction of manures from abroad will have no end. It is much simpler, he thinks, to buy guano and bones than to collect their elements from the sewers of towns, and, if a lack of the former should ever arise, it will then be time enough to think of a resort to the latter. But of all the erroneous opinions of the farmers this is the most dangerous and fatal.

"If it is perceived that no country can perpetually supply another with corn, then must it be still easier to understand that an importation of manures from another country must cease still earlier, since there exportation diminishes the production of corn and meat in that country in so rapid proportions that this decrease in a very short time forbids the exportation of manures. If it is considered that a pound of bones contains in its phosphoric acid a necessary condition for the production of 60 lbs. of Wheat, that the English fields have become capable by the importation of 1000 tons of bones of producing 200,000 bushels more of Wheat in a series of years than they would have produced without this supply, then we can judge of the immense loss of fertility which the German fields have sustained by the exportation of so many hundred thousand tons of bones which have gone from Germany to England. It will be conceived that if this exportation had continued, Germany would have been brought to that point that she would no longer have been able to supply the demand of her own population for corn. In many parts of Germany, from which formerly large quantities of bones were exported, it has now already come to be the case that those bones must be at a much higher price brought back again in the form of guano in order to obtain the paying crops of former times.

"The exportation of bones for so many years from Germany was possible only because the German agriculturists had less knowledge of the real nature of their business than the English, believing, as they did, that practice and science taught doctrines contradictory to each other, and were fundamentally different things, and that they must trust, not in the laws of nature, but in receipts. Things have now changed for the better, although not to the extent which was to be desired, for the German farmers do not as yet generally understand the value of the elements of bones for preserving the present fertility of their fields (not to speak of the restoration of their former fertility), for if they all understood this, no one could have any more bones—at all events, no more than those which he brings to market in his grain and cattle.

"The prices of bones have become so high in Germany as to forbid their exportation, and if the question should be put to English commerce, whence it furnishes the English farmer with this to him so indispensable manure, the answer would produce astonishment; for this commerce has already so far robbed all the inhabited parts of the earth that the manufacturer of superphosphate can only set his hopes upon the phosphate of lime of the mineral kingdom.

"In relation to guano I have been assured that in 20 to 25 years, if the use of guano should increase in even the same proportion as hitherto, there will not remain in South America enough to freight a ship. We will, however, suppose its supply and that of bones to continue for 50 years, or even longer; then what will be the condition of England when the supply of guano and bones is exhausted?

"This is one of the easiest of all questions to answer. If the common 'sewerage system' is retained, then the imported manures, guano and bones, make their way into the sewers of the cities, which, like a bottomless pit, have for centuries swallowed up the guano elements of the English fields, and after a series of years the land will find itself precisely in the condition it was in before the importation of guano and bones commenced; and after England shall have robbed the cultivated lands of Europe even to complete exhaustion and taken from them the power to furnish her longer with corn and manure, then she will not be richer than before in the means of producing corn and meat, but will from that time forth become even poorer in these means.

"By means of the importation of guano and bones the population has, however, in consequence of the increased production of corn and meat, increased in a greater ratio than would have been possible without this importation of manures, and this population will make upon the rulers of the State their natural demand for food.

"If men do not deem it desirable that the balance between population and the supply of food be restored by means of exterminating wars and revolutions (in which the want of food has always played a certain part), or by means of wasting plagues, pestilence, and famine, or by emigration *en masse*, then should they reflect that the time has arrived for getting a clear view in regard to the causes of existence and increase of population. A very little reflection will lead to the conviction that the relations of population are governed by a great and comprehensive natural law, according to which the return, duration, increase, or diminution of a natural phenomenon depends upon the return, duration, increase, or diminution of its conditions. This law governs the return of the harvests upon our fields, the maintenance and increase of the population; and it is easy to see that a violation of this natural law must exert upon all these relations a pernicious influence which can be set aside in no other way than by the removal of its causes. If, then, it is known that certain existing circumstances work deleteriously upon the fields; if it can be foreseen that their continuance must bring about the ruin of agriculture; if there is but a single one of all the means which have hitherto resisted this deleterious influence and made it less sensibly felt which can be safely relied upon to secure a perpetual fertility to our fields, and this means, by a simple change and improvement of the existing deleterious state of things, can be obtained, then it becomes us to think whether a nation should not summon up all her intellectual and material resources in order to preserve these fundamental conditions of her welfare.

"It has been maintained that the recovering of the manure-elements out of the sewers of large cities is impracticable. I am not ignorant of the difficulties which stand in its way. They are, indeed very great; but if the engineers would come to an understanding with the men of science in relation to the two purposes—the removal of the contents of the sewers and the recovery of their valuable elements for agriculture—I do not doubt that a good result would follow. Intelligence in union with capital represents a power in England which has rendered possible and practicable things of much greater apparent difficulty. I look forward with deep concern to the solution of the sewerage question, for, if this question is decided in Great Britain without regard to the wants of agriculture we can scarcely hope for any thing better upon the Continent.

"Permit me to add still a few words in relation to the leading article of the *Times* of the same date, in which the one side of this question is taken up with great clearness, while the author of the article seems to have not quite a correct view of its bearing as it presents itself to my mind. The mistake into which he has fallen arises from his confounding the condition of a State with that of its population.

"In the natural sciences we know nothing of a State—of its might or its feebleness. We know only lands, their geological formation, their climate and soil, and whether the soil contains the natural conditions of the subsistence of man and beast. In places where these conditions are abundantly present, and geological circumstances do not hinder their intercourse, men cannot be exterminated. The most wasting war cannot rob a land of the conditions which Nature has given, nor can peace give them to a land which wants them.

"Countries may be fruitful and become capable of sustaining a large population when certain resisting influences, which in their unhindered working make the cultivation of the soil impossible, are overcome by human intelligence, or when a land has all the conditions of productiveness except one, and then receives the one which it lacked. If Holland were without her dikes, which must be kept up at great expense, she would produce neither corn nor meat; the land would not be inhabitable. In a similar manner the inhabitant of the African oasis protects his grain fields by dikes against the storms of the desert, which cover his land with a barren sand; and if Mr. Layard is disposed to answer the question put to him, he will say that the decay of an admirable system of irrigation rendered the permanent maintenance of a great population in Assyria and Mesopotamia impossible.

"I know that the prophets of future evil have at all times been derided by their own generation; but, if history and natural laws can furnish any ground for a just conclusion, then there is none which stands more firmly than this—that, if the British people do not take pains to secure the natural conditions of the permanent fertility of their land—if they allow these conditions, as hitherto, to be squandered—their fields and meadows will at no distant time cease to yield their returns of corn and meat. But it does not belong to the province of natural science to discuss the question whether the might, strength, and independence of the nation will be preserved after this state of things shall have gradually arisen. Believe me, dear Sir, yours very truly, JUSTUS VON LIEBIG.—Mr. J. J. Mechi, Tiptree Hall, Kelvedon, Essex."

## A FARM COTTAGE IN NORFOLK.

A PROFESSIONAL gentleman a few years since purchased a small farm at East Carlton, about 3 miles from Norwich—the farm buildings being in a woful state of dilapidation. There was a cottage scarcely habitable, and the outbuildings except the barn and cart house were so ruinous and inconvenient, that he determined to remodel the whole. In doing this his object was to construct the farm-house so that he could take some rooms for his own use, when he wished to spend a few days at the place, which, by the way, is one of the prettiest small residences in the county. The work of alteration was placed in the hands of Mr. Balls, a builder at Norwich, under the direction of the proprietor, and now that it is completed the whole forms so excellent an example of a small *ferme ornée* that I have thought it worth while to ask the Editor of the *Agricultural Gazette* to find room for a sketch and plan of the cottage, and the farm arrangements.

PLAN OF FARMYARD.

SCALE OF FEET.

0 5 0 10 20 30 40 50 FT.

DESCRIPTION.

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Cart Lodge .. | 1 | Horse Stable | 5 | Turnip House | 9 | Loose Box .. | 13 | Pigs .. | 17 | Boiling House | 21 |
| Gig House .. | 2 | Hay House .. | 6 | Bullock Shed | 10 | Barn .. | 14 | Passage | 18 | Privy | 22 |
| Potato House | 3 | Cow House .. | 7 | Stack Yard .. | 11 | Corn Room .. | 15 | Bins .. | 19 | Pond (Liquid Manure) | 23 |
| Harness House | 4 | Calf's Crib .. | 8 | Harness .. | 12 | Fowls' Houses | 16 | Potato House | 20 | | |

Of the remains of the old cottage a part is shown in the form of a low thatched building, represented on the ground plan by the rooms 12 a back kitchen, over which is a loft that can be used either as a servant's sleeping room or cheese room, as may be desired, and 13 a dairy. The back kitchen is connected with the main body of the house by a wide verandah (14), under which washing and similar work is very conveniently performed. The verandah opening into the principal kitchen (9), there is a nearly complete covered communication for the lower parts of the house without the necessity of running out of doors in bad weather. As it was thought desirable that the farm-house and the proprietor's rooms should be kept as separate as possible, two of the lower rooms, Nos. 3 & 4, have been taken for the proprietor's bedrooms, thus leaving the chamber floor entirely for the use of the tenant, and the only connection between the two occupations is by the passage, No. 8, on the ground floor; the staircase being situated in an inner passage the house is kept free from the draughts of the hall and outer door. The tenant can get upstairs without coming into the hall, and should the whole house at any time be in one occupation the family and servants can pass upstairs and down without coming in contact with each other.

11. Ditto, with Trap-door and Staircase to Cellar under No. 4.
12. Back Kitchen.
13. Dairy.
14. Verandah

CHAMBER PLAN.

1. Bedroom 2. Bedroom 3. Bedroom 4. Bedroom 5. Landing

The nature of the farm arrangements is sufficiently explained by the plan of the farm-yard. It is therefore only necessary to add that the verandah above mentioned faces the fowl-houses (16, 16) and barn (14), so that there is a clear view of the principal parts of the yard from the windows of the tenant's portion of the farm-house. *L.*

[The relations as regards use of the several parts of this farmery have been, as far as possible, observed by the positions they are made to occupy, relatively to one another. It will be seen that the barn, stack-yards, and straw-yard—cart-shed, stable, hay-house, cow-house, Turnip-house, and bullock shed—the pigsties, boiling house, Potato house, &c. — are respectively clustered; while the interval between the two chief lines of building is divided into yards having easy access to both straw and Turnips. It may be added too that elegance of form and of arrangement, both of which are here exemplified, exercise a directly useful influence on the employed.]

## CLEARING OR PLANTING.

OUR notice of the clearing of Whichwood Forest (see p. 700) has induced a correspondent, who has been long engaged in planting land, to favour us with the statement we print below. He draws, from a comparison of the cost and results of clearing and planting, the conclusion that there is a balance of profit in favour of planting. There is no doubt that well made and well managed plantations afford, in the course of 30 or 40 years, good returns for outlays incurred; and it must be a matter for the consideration of each proprietor about to reclaim waste land, whether he will plant or convert into farms. He will naturally have regard to situation, climate, demand for timber, and the like. But such a conversion into plantation as that described by our correspondent is equally a reclamation of waste land as the work executed at Whichwood Forest. To displace a scrubby waste and convert it into a regular plantation is a vast improvement; for timber should always be grown in masses, not in hedgerows or open fields, and we doubt not there is much rough and waste land in this country that might be dealt with as our correspondent describes, greatly to the advantage of the owners. It must however be borne in mind that it is an improvement of which the profit, assuming our correspondent's calculations to be strictly correct, is long deferred, and which adds nothing to the industry or well being of the district wherein it has been made. Whereas, by the clearing a tract of forest or waste land and its conversion into farms, besides the profit obtained by the owner of the land, there is a large amount of capital and much human industry brought into useful employment. And at the end of a 30 years' lease,

though the buildings may require some reparation, there will certainly be an increase in the letting value of the land, arising from the culture it has undergone, and the progress of general and local wealth and population.

A plantation, however greatly it may contribute to the profit of its owner, will continue at the end of the 30 years a plantation and a solitude still. It may afford a cover for foxes or pheasants, and will be haunted by prowling gamekeepers and marauding poachers. The only sound of industry will be the occasional ring of the woodman's axe, but the prosperous works of husbandry will be as unknown as they were upon the original waste.

"The *Times* of the 29th of September last contains a leader refering to an article quoted therein, taken from the *Economist*, relating to the clearing of Whichwood Forest. By these I understand that, at the expense of about 10*l.* per acre, the land reclaimed lets on leases of 31 years at 1*l.* 8*s.* per acre. As I have for some years past been engaged in somewhat of a similar process in a small way, in grubbing up old woodlands, although, instead of clearing and building thereon, I have replanted and continue to replant them, these articles have induced me to refer to the comparative results of the two methods. I must premise that the land I deal with is primitive woodland, certainly as old as the Saxon Heptarchy, is free from tithe rent charge, but is subject to local rates, of course not so highly rated as if there were buildings and homesteads erected thereon. My process is to cut the underwood, then fell all scrubby timber, leaving the better and growing trees with a proportion of tillers and some of the best of the coppice stubs, then grubbing all the roots of the trees felled, and all the large old useless coppice roots, make large open drains where required, and then replanting the land. This process takes up two years. I find from my accounts, without entering into the details thereof herein, that last year—

| | £ | s. | d. |
|---|---|---|---|
| The grubbing cost me, per acre .. .. .. | 11 | 16 | 0 |
| The value of the roots grubbed for sale is .. .. | 8 | 14 | 6 |
| Thus leaving a charge of .. .. .. | 3 | 1 | 6 |
| I have no regular estimate of the cost of ditching or draining, as it varies according to circumstances, but I think I underrate it when I allow, per acre | 1 | 0 | 0 |
| The plants as purchased cost, per acre .. .. | 6 | 0 | 0 |
| And the expense of planting them .. .. .. | 1 | 10 | 0 |
| My expense, therefore, in clearing and replanting an acre is .. .. .. .. .. .. | 11 | 11 | 6 |

"Now for the comparative results.

"I am aware that by planting thicker, then thinning out and cutting off the plants to remain, I might probably obtain a larger and earlier return than the following; but I dispense with these considerations, and confine my estimates to three periods as coppice wood is cut.

| | | | | | | |
|---|---|---|---|---|---|---|
| The first 10 years, I expect a return of only | £5 | 5*s.* | 0*d.* | against a rental of | £14 | 0*s.* 0*d* |
| The second 10 years, as my stubs will bear more, I calculate of | 14 | 0 | 0 | ,, | 14 | 0 0 |
| The third 11 years according to the value as sold.. .. | 40 | 0 | 0 | ,, | 14 | 0 0 |
| Value of ware for 31 years .. .. | £59 | 5 | 0 | value of rental | £42 | 0 0 |

"The increase in the value of the growing timber for 31 years, with the smaller rated rental for local rates from there being no buildings or homesteads, will answer as a set off against 6*l.* per cent. on the value of such erections as charged in the article quoted. At the lapse of 31 years, the planted stock will be of increased value, while the buildings will require repair and further outlay. I infer from these premises, that clearing land is not so advantageous in the long run as would seem from present appearances." *Economist.*

## ROYAL AGRICULTURAL COLLEGE, CIRENCESTER.

THE session was brought to a close on Tuesday evening, the 20th inst., the examination having ended on the previous day. Edward Holland, Esq., M.P., Chairman of the Committee of Management, awarded the diplomas and prizes, and the Choral Society of the College treated the visitors with a concert, which, above the average in quality, was fully appreciated by the audience.

The late lamented principal, the Rev. J. P. Haygarth, has found a worthy successor in the Rev. J. Constable, M.A. We congratulate the managers of the Institution on having obtained the services of a gentleman, under whose able, energetic, and kind direction the prosperity of the College has been satisfactorily secured. Additional and extremely comfortable private rooms for older students have been provided in the College, and every effort is made to render the tuition and a liberal discipline as efficient as possible. Under the auspices of the Principal a Choral Society and an excellent Discussion Club have been formed by the students, whose progress during the session has been quite satisfactory.

We are happy to say that a fewer number of students are leaving this session than usual, the number being only 16. It is gratifying also to be able to state that the applications for admission, besides being more numerous, are from men of an age likely to derive full advantage from a collegiate system, and that there is every prospect of the College being well filled next session.

The College Diploma was awarded to—1. J. Appelby, Fareham, Hants; 2. J. Hall, Paulton Vicarage, Preston, Lancashire; 3. C. Selby Bigge, Lyndon, Morpeth, Northumberland.

The Haygarth Prize was awarded to Mr. Appelby.

The following prizes were awarded:—

*Farm Books.*—1. Doxat; 2. Deacon.

*Farm Journals*—Turner and Negus.

*Laboratory Prizes.*—Classes 1 and 2, Inner laboratory. Ivey, Phillips, Prentice. for quantitative analysis. Classes 3 and 4. Allanson, for qualitative analysis. Classes 5 and 6. Boucicault, for chemical manipulations.

*Veterinary Prizes.*—Classes 1 and 2. Hospital books. Doxat and Ivey. Classes 3, 4, 5, and 6. Note books. Boucicault.

*Botany Prizes.*—Note books. Classes 1 and 2. Deane.

*Agronomics.*—Note books. Classes 3, 4, 5, and 6. Boucicault.

*Surveying Prizes.*—Field books. Classes 1 and 2. Deane. Classes 3 and 4. Allanson. Classes 5 and 6. Smith.

*Building Prize.*—Hall.

*Mathematics Prize*—Ivey and Appelby.

*General Proficiency.*—Homesfield, Allanson.

*General Industry.*—Harding.

Certificates of Merit for being first in the Examination were granted to—

*Agriculture.*—1st Division—Appelby and Doxat, equal; 2d Division—Negus and Smith, equal.

*Chemistry.*—Classes 1 and 2—Ivey; Classes 3, 4, 5, and 6—Deacon.

*Botany.*—Bigge, Deane, and Doxat, equal.

*Agronomics.*—Deacon and Harding, equal.

*Veterinary.*—Pathology—Deane and Doxat, equal; Anatomy—Deacon.

*Surveying.*—Classes 1 and 2—Hall; Classes 3 and 4—Deacon; Classes 5 and 6—Smith.

## Home Correspondence.

*Pig Feeding.*—Having seen an article in the *Agricultural Gazette* respecting the fatting of pigs and the giving them cinders or brick rubbish, it is in my opinion most essential to their well-being; it assists to digest their food and prevents them from routing up their styes, to the great annoyance of the person that attends to them, and a loss to the owner. Instead of routing up the stye they ought to be lying quiet. If they are not quietly disposed or satisfied with their treatment they will not fatten very fast. I have paid particular attention to the fatting of pigs for some years back, and I have tried it in various ways, and in my opinion the singling out, stall, box, or crate system is the best for fatting. To have the styes so constructed as to have a moveable partition between the pigs, so that the stye may be regulated according to the size of the pig; to allow it sufficient room to get up and down but not to turn round, with a continuation of troughing to run the full length of the styes, and a door opposite to each stye, to admit of their being kept clean; also to be kept moderately dark and quiet; to have some cinders every morning after feeding will, I am satisfied, fatten the pigs sooner than by having six, eight, or more shut up in a stye in the usual way. *C. A.*

## Farmers' Clubs.

OXFORD: Dec. 12.—*The Agricultural Labour Market.*—Mr. Watson said, about 20 or 30 years ago, there was a superabundance of labour, and it was no uncommon occurrence to have on a Monday morning applications from 20 or 30 men who wanted employment. The farmers held meetings, and the men out of employ were set to work by them in turns, a proportion of their wages being paid out of the poor rates, so that if a man was engaged at 1*s.* 6*d.* per day, the farmer paid him only 9*d.*, and the remainder was made up out of the rate. He was happy to say that that state of things was altered. Instead of a surplus, they had not sufficient labour now for their purpose, which was attributable to certain causes which operated now, but did not 30 years ago. In the first place, there were now railways, which had created a great demand for labour, and employed many of the rural population both in the construction of lines as well as policemen, guards, porters, &c., and they were paid better wages than the farmer could afford to give. In his (Mr. Watson's) opinion, the best course to adopt was by economising their labour as much as possible, and making the best use they could of the labour in their own immediate neighbourhood. He was aware that some parties represented the labouring classes as disaffected, and said that there was not that good feeling between them and their employers which ought to exist; but, even if such were the case, they could not be surprised at it, considering how they had been treated. As agriculturists, they had not paid them that attention which they ought to have done, for when they wanted their services they got them at the cheapest rate, and when they had done their work, they left them to find employment and provide for their families in the best way they could. He contended that they would find on their farms many things which would not only pay back 1*s.* for the 1*s.* laid out, but 1*s.* 2*d.* for every 1*s.* in effecting improvements during the winter time, which would not only be to their advantage, but, at the same time, employ these poor men. With respect to the summer, it was then that they found a scarcity of labour, because the men went away when they were most wanted; but if they had not cared for them during the winter; they could not be surprised at their going to other localities where they thought they could do better. As far as his own experience went, he was satisfied of this, that if they did what was right between man and man, and made their labourers comfortable in winter, they would find that very few would leave them in summer; if any did so, it was the exception and not the rule. In order, then, to provide for the summer, and to create a better feeling between the employer and employed, the first step was to do all they could for the latter in the winter. Their next duty was to do all they could to improve their moral and physical condition. In the first place, a great many labourers, at certain pa... year, had to walk two or three miles, and ... quence of the present law of settlement, ... much the habit of landowners to pull down ... in their parishes, and the labourer consequ... a difficulty in meeting with a house to dwell in ... employment; while in case of sickness the cost ... maintenance was shifted to other parishes, ... they had been driven. That law ought to be re... and he hoped the time was not far distant wh... parish in the county, if not the whole country ... form one Union. It could not reasonably be ex... that a labourer who had to walk three or four ... his work could do the same amount of work as ... located on the farm; and, therefore, it was to the ... interest to get their labourers located around ... near as possible to the farm on which they were ... ployed. In that case he believed that five ... would do the same amount of work as six ... differently circumstanced. Mr. Watson concl... moving the following resolutions:—

"That as the price of labour must be regulated by the ... and demand, it is the opinion of this Club that the ... arrived when something must be done to cultivate a ... feeling between, and more closely unite the employer ... employed, the interests of the two being identical, ... effect this, it is necessary, in the first place, to repeal ... the present law of settlement.

"2d. That the owners and occupiers of the soil ... their best to improve the moral and physical condi... industrial classes, supplying them as much as possible ... munerating labour during the winter months, and ... them with comfortable dwellings on or near the farms ... every way encouraging the industrious labourer, ... employer may have the full benefit of his industry ... labourer himself be comfortable, contented, and happy."

The Rev. J. Clutterbuck said—first, on edu... The fear of those who think that the education ... labouring population is likely to be carried too ... think, unfounded; it may be possible to educate ... beyond that point which befits their station, ... those who entertain fears on this subject would ... company the Inspectors of Schools in agricul... districts, they would see that the boys are taken ... school at so early an age that very few can be ... beyond the barest elements of school teaching ... nature of the employment given to little boys ... makes it difficult for them to attend the Sunday ... to say nothing of the too frequent indisposition ... child himself. The night school may be said ... well if it keeps up the little learning acquired at ... school. We know the oft-repeated assertion that ... of the best and most trustworthy labourers can ... read nor write; this has no doubt much truth in ... my own experience of more than 30 years enables ... affirm that I know no instance in which idleness, ... honesty, or negligence can be attributed to the ... moderate stock of learning gained at any school ... which I have been connected. In this, the boy is ... father of the man; the idle, ill-conditioned scho... the pest of the village as he grows up, and the ... and best boy in his class is seldom the mem... labourer or the inmate of our gaols. A few wo... the law of settlement; I am glad to see it ... favour at the last meeting. It was suggested to ... one of the speakers on that occasion that he sho... glad to hear its friends defend the law as it st... the best of their power. My answer was, I ... think it has any friends. My own deliberate con... after the best consideration I can give it, and a ... long experience, is that it is impossible to over-... the demoralising effects that it has produced ... labourers of this country, especially by encouraging ... of improvidence before the New Poor Law was ... There is another point connected, as I think, ... law of settlement—I mean the habitations ... labourer. All agree that it vitally affects the ... the people. Over-crowded dwellings are the ... of vice in its most frightful form. A word ... the payment of labourers. If it were free, ... say little on this point; but to speak of it as it ... labourer is worthy of his hire" is an axiom ... authority, and I feel confident, from the ... that has characterised this discussion, and ... character of this assembly, that I need not re... of the denunciation pronounced on those ... back the "hire of the labourer by fraud." I ... give so harsh a name to a practice which obtains ... the old Poor Law, and may linger in some pla... of making a distinction between the married ... men; it is like the law of settlement—indef... There are difficulties, and those mostly arising ... the feelings of the labourer, in adjusting wages ... to the merits and skill of those who earn them. ... work regulates this nature where piece work ... given. But it is manifest that one man may ... 12*s.* or 14*s.* and another scarcely 9*s.* or 10*s.* T... least, the good labourer should not be depressed ... idle and unskilled. Machinery requires skill, ... this may, as it generally does, open a door for ... ragement and higher wages, and I fully concur ... observation, the more machinery the more ... But I think that those who, as shepherds, ... &c., have much valuable property under their ... and who have much anxiety of mind, added to ... exertion, are very often underpaid. This, to ... least of it, is a mistake, if not an injustice. In ... of labourers the young and active should ne... couraged. I own a great dislike to drinking ... anything that tends that way. It appears to ... getting work out of men by giving extra ... inducing the men to sell their strength, which ... birthright, at a miserable price. We know th...

answer, "We get more work by beer than money." I doubt this, for in the long run you may bring your men to that state in which they won't work without it, and I think a fair trial of more money and less beer would be the best policy in the end. There are other points on which one is tempted to touch. Take what Mr. Mein says—"All farms ought to be training schools for the young labourers." A wise and philanthropic sentiment. The remedy for many evils, the conferring of many real benefits is, and always must be, in the hands of the employer; he may often meet with discouragement, but depend upon it, if there is a steady determination to do justice between man and man, your endeavours to improve the labourer will not be without its reward. You cannot multiply hands but by kindly treatment, well placed encouragement, and judicious instruction; you may increase the quality of the labour you pay for, so as to enhance its value, and augment the profit you have a right to expect from it as an investment of your money. I say again take Mr. Mein's advice, "Make your farms training schools for the young labourers," and you will not fail to gather round you an improved and improving staff of grateful hearts and willing hands, a blessing to themselves and to those in whose service they are employed.

## Calendar of Operations.

### DECEMBER.

WEST SUSSEX: *Dec.* 20.—We have had now a week of more severe weather than has been on the south coast for many years. The frost during the greater part of last week was to the extent of from 12° to 20°, and yesterday morning, from 3 to 10 A.M., we had a fall of 8 or 9 inches of snow, so that the earth is now sealed to us, and the roads being heavy or almost impassible, all work is nearly at a stand with us, only that the live stock take a little more trouble to provide food, &c., for; and now we find the Mangel Wurzel heap useful both for cattle and sheep, but so no doubt would Swedes had they been stored; and it would be well when the extent of Mangel Wurzel is small to store a few Swedes to meet such a time as this, and then the danger (if any) of changing such as ewes heavy in lamb from Turnips to Mangel Wurzel for a short time would be avoided. But I fear this has altogether been an unfortunate year in the preserving of Mangel Wurzel: first the frost came upon us too soon, and damaged a great many in some places, and though we thought ours safe at first we found that the long ones suffered a little, as from their habit of growth their tops did not protect them so well, and now I fear that we reckoned without our host when we covered them up, as the frost has got deeper than we counted on, and we may find that it will be better to use them as quickly as possible, and the ewes and lambs will have a share as well as the cattle. Wheat-sowing was over during last month; that sown late has lain long in the ground, and some of it is not up yet, and other work that ought to be done in the autumn is rather behind, so that a little longer of this weather will leave enough to do by and by. Our cattle and root show has passed over very creditably, and we can report decided improvement. There was beef that would not have disgraced Baker Street Show, and roots that in size and quality would have been hard to beat, and it is likely that more interest will be taken in these shows than has hitherto been; in fact, they have been looked on very coldly by many of those who ought to have helped them. The Downewes have now begun lambing, being rather more forward this year. Our market is quiet as regards Wheat, but Barley readily finds sale. The yield of Wheat is said not to be good. Wages are in some cases down 1*s.*; from 11*s.* to 10*s.* for common labourers, and 13*s.* to 12*s.* for carters and shepherds. But there are hardly any hands out of work, and they will be scarce when the busy season comes; and those that would wish to have hands when they require them had perhaps better have an extra one when they do not so much want them. *G. S.*

LAMMERMUIR SHEEP FARM: *Dec* 19.—We are in the midst of a snow storm, which, after nearly a week's intense frost, set in on Saturday last; two days' fall has covered the ground with about 18 inches of loose dry snow, and though there has been no fresh fall to day, we dread the wind rising, as with such an amount of material the drift would be great. All our hirsels are gathered into the shelters, and we know the value of a good plantation at present. We have had some difficulty in getting them together, as driving sheep in such a depth of snow is no easy matter. But once under the "bield" of the plantation (if there is a good haystack beside it), they are safe. Nothing breaks the force of the driving snow like trees. In planting for shelter on hill farms, attention should be paid to place the plantation in the neighbourhood of rough ground, that is, ground covered with strong Heather, Whin, or Broom, in order that in deep snow the sheep may (as our shepherds phrase it), "stand out to work" and do something for their meat. Should the storm continue we shall in a few days be feeding almost entirely from the stack. Hill stock are only in middling condition to face the winter on, as the frost set in uncommonly early, killing the Grass when our sheep were just beginning to do well on the autumn quickness, after an unusually dry and scanty summer. This remark does not however apply to soft growthy pastures, for this was quite a summer for such grounds as have generally too much moisture. *J. L. B.*

## Notices to Correspondents.

FATTING LAMBS: *W. W.* They are weaned lambs, we suppose. You may suppose that they would be tolerably fat by 4 or 5 months of good feeding, and that their daily consumption would be from 30 to 36 lbs. of green food between them. Your 2 tons of Carrots are thus about enough for your purpose, but they will be the better of a little hay with them. Feed them under shelter, giving them access to a pasture if you can.

GRASS SEED MACHINE: *Oatlands.* Almost every maker of sowing machines makes a long (16 feet) and slender one-wheeled barrow, costing 3*l.* 3*s.*, for sowing Clover and Grass seeds.

LEAVES: *E. F.* If you use them as litter and afterwards repeatedly turn the dung heap, the manure mingled with them will act as a ferment and rot them.

MARL: *B. N. F.* has a poor sandy farm of about 250 acres, with no marl near; but about 24 miles distant he has another farm, for the most part a stiff retentive clay. To cart the clay to the sandy farm would be too expensive to accomplish, but would it answer his purpose to burn the clay, which would greatly reduce its weight and bulk; and would it do so sufficiently to make it pay for the cartage? [Some clays might be worth the burning and cartage, others would not. An analysis might answer the question. The probability is that the cost of cartage would be better spent on purchased manure and management.]

RUNTS: *C. T.* Another word for steer, applied to Welsh and Scotch cattle.

NEW AND CHOICE PLANTS.

JOHN STANDISH, in offering the following Plants, can assure his customers that they are now in fine condition for sending out:—

MYOSOTIDIUM NOBILE, or Antarctic Forget Me Not, each 21*s.* 6*d.*—This plant, from the Chatham Islands is one of the most remarkable that has been introduced for some years, being totally distinct from all others. It has large thick leaves, 8 or 9 inches across, of a dark glossy green, and sends up magnificent trusses of bloom of the most beautiful blue and white, similar to a Forget me-not, but of a giant form. A Drawing of it is published in Curtis's "Botanical Magazine" for September. A description taken from the above is also published in the *Gardeners' Chronicle* of Sept. 17, 1859, wherein Dr Lindley says:—"This is the handsome perennial provisionally named Cynoglossum nobile by Dr Hooker in our last year's Volume, page 247. It is quite deserving all the encomiums that have been passed upon it."

GLADIOLI, named varieties, from the choicest and largest collection in England, 6*d.* to 5*s.* each. Also a fine lot of bulbs raised from seeds saved from the best flowers, all of which will flower in the summer of 1860. 7*s.* 6*d.* per dozen, or 50*s.* per 100. These are strongly recommended.

RHODODENDRON LIMBATUM.—Pale blush, bordered with bright crimson. This has received several medals at the exhibitions for Rhododendrons, being very distinct and one of the most free flowering. 21*s.* each.

RHODODENDRON MINNIE.—White, very large blotch of chocolate coloured spots, a fine flower, and remains a very long time in bloom. This is one of the most curiously marked Rhododendrons amongst all the white; it bears a noble truss of blooms, which cannot fail to be admired. 21*s.* and 31*s.* 6*d.* each. Selections can be made from one of the finest collections in Europe.

PHLOX MRS. STANDISH.—The purest white, with a large red eye, 5*s.* each. Also a large collection of the finest kinds which J. S. has shown during the last summer and in every case received the First Prize. Plants from 1*s.* to 2*s.* 6*d.* each.

A CATALOGUE containing a full description of the best Hardy Plants in cultivation will be forwarded on application to The Royal Nursery, Bagshot.

A. VERSCHAFFELT, NURSERYMAN, Ghent, Belgium, begs to offer:—

| LILIUM GIGANTEUM, flowering bulbs for 1860 .. | 2 | 0 | 0 |

WANTED IMMEDIATELY, 10,000 2-year Transplanted THORNS; 10,000 2-year Transplanted BEECH; 20,000 2-year Seedling BEECH; and 10,000 3-year Seedling BEECH. Any one having all or any of the above to dispose of is requested to send lowest price to G. FROST, Nurseryman, Brushford, Tiverton.

NEW STRAWBERRY, WIZARD OF THE NORTH.

DANIEL ROBERTSON, LINSIDE NURSERY, Paisley, continues to supply the above named superb variety at 63*s.* per 100, or 9*s.* per dozen, the usual discount to the trade. Having a large stock of the Wizard, Nurserymen and Market Gardeners ordering in quantity will be dealt with on favourable terms. As much imposition is being practised in the name of the Wizard, purchasers are warned that they ought to see the drawing of it in the hands of any one from whom they buy plants, as all parties selling the genuine variety will be furnished with a drawing. For description, &c., see former advertisements.

D. R. cannot supply any more plants of Nonsuch this season. DANIEL ROBERTSON, Linside Nursery, Paisley, N.B.—Dec. 31.

JOHN GRIGOR AND CO., Nurseries, Forres, Scotland, have for sale several millions strong one-year Seedling LARCHES, one and two year Seedling true native Highland Scotch PINE, DEODARS, &c. J. G. & Co. have received the numerous premiums awarded by the Highland and Agricultural Society of Scotland for the cultivation of the true native Highland Scotch Fir, and their present stock is raised from seed collected in the celebrated native forests of Strathspey.

PRICED LISTS on application; and the Trade supplied at the wholesale rates.

TANSLEY NURSERY, NEAR MATLOCK,
TO GENTLEMEN PLANTING AND THE TRADE.

J. SMITH, SEN., begs to offer his STOCK OF TREES AND SHRUBS, of various sizes, and in addition to his general stock of the leading kinds, he has this season to offer an Extra Stock of many hundred thousands of fine Larches, Scotch Firs, and Highland Pines; a large quantity of Evergreens, Privets, Mahonia, Arbor Vitæ, and other plants for planting under cover. Many things are grown in large quantities, and will be sold on advantageous terms to the Trade and gentlemen requiring large lots.

CATALOGUES sent free on application. The Nurseries are on the Mansfield and Nottingham roads, and 2 miles from Matlock Bridge Station on the Midland Railway.

IMPORTANT TO PLANTERS WHERE AN IMMEDIATE EFFECT IS REQUIRED.

CHARLES CLARKE, NURSERYMAN, &c., 179, Windmill Street, Gravesend, has a splendid assortment of large Evergreens on hand, as Sweet Bays, Portugal and Plain Laurels, Yews, Laurustinus, Arbor vitæs, Evergreen Oaks, &c., all from 5 to 7 feet, very bushy, and warranted kept removed. Also large Standard Roses; Ornamental Forest Trees, 12 to 15 feet, all varieties; several thousands of Ash, Chestnut, and Quick, very strong; large Gooseberry and Currant Trees; Standard Fruit Trees, straight and handsome; Trained Fruit Trees, not to be surpassed; large Irish Ivies; a quantity of Plum leaf Willow, &c. Terms cash, or a reference from unknown correspondents.

IMPORTANT TO PLANTERS.

ROBERT PAIN respectfully calls the attention of intending planters to an inspection of his very superior stock of PORTUGAL and COMMON LAURELS and YEWS, from 4 to 7 feet high, and as much through, fine specimens, and in the best possible condition for removal, being grown expressly for immediate effect. Standard Apples for orchards, strong and well grown tall stems, so that cattle may not reach them. Peaches, Nectarines, and Apricots, Rider, half standard, and dwarf trained with extra large sized heads. Drooping Limes, Elms, Ash, and Willows in variety on tall stems.

Scarlet, Double White, and Pink Hawthorn, of large size; Scotch Spruce, Weymouth Larch, and other Firs, from 4 to 10 feet in height; Chesnut, Birch, Poplars, Elm, Mountain Ash, Laburnum, Walnut, fine specimens, 10 to 12 feet high.

There is every facility for conveyance, as the Nursery is convenient to the Great Western Railway Uxbridge Station.

Uxbridge Nursery, Middlesex.

FOOD FOR WINTER STOCK.

SAMUELSON'S celebrated TURNIP CUTTERS, PULPERS, CHAFF CUTTERS, OIL CAKE BREAKERS, CORN and MALT CRUSHING MILLS, all with the latest patented improvements, may be obtained through any Ironmonger or Implement Dealer in the Kingdom, or (carriage paid to the nearest station to the purchaser) direct from the manufactory.—Britannia Works, Banbury, Oxon; or London Warehouse, 76, Cannon Street West, City, E.C.

Catalogues sent free on application.

87, Bishopsgate Street Without, E.C., same side as Eastern Counties Railway.

GLAZIERS' DIAMONDS FOR CUTTING HORTICULTURAL and other GLASS, to be had of the Wholesale Manufacturer, JOHN EDWARDS, 20, Sharp's Alley, West Smithfield, London, E.C. Prices from 10*s.* to 27*s.* 6*d.*

GARDEN LABEL.—Neat, durable, and well-executed LABELS, painted and lettered in oil paint, and varnished, equal to enamel. A specimen sent on the receipt of 3 Postage stamps.—Address F. H. LYDBURY, North Shropshire.

DESIGNS FOR FLOWER BEDS AND GARDENS.—In consequence of numerous applications J. MARSHALL, 2, Goldsmith Street, Nottingham, has been induced to prepare another set of Designs. They comprise upwards of 80, diversified in style, and will be forwarded to any address on receipt of 24 postage stamps.

MICROSCOPES.

JOSEPH AMADIO'S Improved Compound MICROSCOPE, 2*l.* 2*s.*; Students', 3*l.* 13*s.* 6*d.*

"Both these are from Amadio, of Throgmorton Street, and are excellent of their kind, the more expensive one especially."—*Household Words*, No. 345.

A large Assortment of Achromatic Microscopes.

Just published, 2d ed., an Illustrated Catalogue, with the names of 1500 Microscopic objects, free for 6 stamps.

HOT-WATER PIPES at wholesale prices, with Elbows, Syphons, Tee Pipes, and every other connection. Wrought and cast iron Boilers, Saddle, Conical, Cylinder, and Elliptic, from 24*s.* each. Boilers and Iron Stands to use without brickwork. Valves from 12*s.* each. Coal Boxes, Furnace Doors, Furnace Bars, Supply Cisterns, and Builders' Castings of every description in stock, at Mr. LYNCH WHITE'S Iron Wharf, Upper Ground Street, Blackfriars Bridge, London, S.

TO THE NOBILITY, GENTRY, AND HORTICULTURISTS.

H. McCALLA (late principal Draughtsman to Messrs. Weeks & Co.), CIVIL ENGINEER and FARM ARCHITECT, begs to inform the above that the Horticultural Buildings being confined to so few, exorbitant prices are charged: that he prepares Working Drawings and Specifications, so that they can have their own constructed by any country carpenter, at 1*s.* 6*d.* per foot super, or upon their own estates at 1*s.* 4*d.* per foot. Plans also upon the same rule for erecting Hot Water Apparatus. Plans for all kinds of Farm Buildings, Homesteads, Labourers' Cottages, Laying out of Estates, Drainage. Plans &c., prepared for all the above Works and submitted to competition.—Office: 7 Upper Cheyne Row, King's Road, Chelsea, S.W.

HORTICULTURAL BUILDINGS AND HEATING BY HOT WATER.

JOHN R. PEILL, 17, New Park St., Southwark, S.E., Manufacturer of every description of Buildings for Horticultural purposes, and Inventor of the Improved Conical Boiler for heating the same, is prepared to undertake works of any magnitude, and refers among others to the celebrated range of FORCING HOUSES at HER MAJESTY'S GARDENS, FROGMORE, and at SIR ROBERT PEEL'S, DRAYTON MANOR, constructed under the superintendence of his Manager, Mr. JOHN JONES; and also to his BOILERS fixed at the CRYSTAL PALACE, the ROYAL BOTANIC GARDENS, REGENT'S PARK, and KEW, and at several hundreds of the Nobility's seats, Public Establishments, and Manufactories in London and the provinces. J. R. P. also manufactures every description of Iron Roofs, Iron Houses, and Iron Fencing, plain and ornamental. Strong Iron Hurdles for Sheep (6 ft. long, 3 ft. high, with 5 bars), 4*s.* 3*d.* each; ditto for cattle, 4*s.* 9*d.* each. Prices and other particulars forwarded on receipt of one postage stamp.

# HILL & SMITH'S

## PATENT CONTINUOUS PARK FENCE.

THIS FENCE is made in a variety of sizes suitable for any situation, and is much superior in appearance to hurdle fences, than which it is also cheaper and stronger. It has obtained upon two occasions the Silver Medal of the Royal Agricultural Society of England, besides many other premiums. Many miles have been erected by HILL & SMITH on the London and North Western Railway, between London and Bletchly Stations, and it has been erected at the Parks of upwards of 500 Noblemen and Gentlemen in England; that at Welbeck Abbey, the seat of his Grace the Duke of Portland, being entirely surrounded with it as a fence against Deer nearly 10 miles in extent. The patent principle is also applied to Iron Hurdles, whereby the strength is much increased and their cost reduced. ILLUSTRATED PRICED CATALOGUES will be sent on application to HILL & SMITH, Brierly Hill Iron Works, near Dudley, who are the inventors and sole manufacturers, or to their London Office, 49, Broad Street Buildings, E.C., where specimens may be seen, or to Mr. B. SAMUELSON'S, 76, Cannon Street West, London, E.C.

## OIL PAINT NO LONGER NECESSARY.

# HILL & SMITH'S

## Black Varnish for preserving Iron Work, Wood, or Stone Work.

THIS varnish is an excellent substitute for oil paint on all out-door work, and not only saves two-thirds the expense of an ordinary quality of oil paint, but has the great advantage that it may be applied by an ordinary labourer in a cold state, and that no mixing or thinning is required. It is used in the grounds at Windsor Castle, Kew Gardens, and all the Royal Parks in London, and at the seats of many of the Nobility and Gentry of the United Kingdom. It is also largely exported. Testimonials from Noblemen and Gentlemen who regularly use it will be forwarded gratis on application. Sold in casks of about 30 gallons each, 1*s.* 6*d.* per gallon, or 1*s.* 8*d.* per gallon, carriage paid to any Railway Station.

## THE WROUGHT IRON HEATING BARROW

shown in the above engraving is a very useful article for applying the varnish or for heating gas tar. The front compartment holds tools, fuel, &c. and the back compartment carries an iron three gallon pot with fire grate underneath.

**Price £3 or £3 3s. Carriage paid.**

HILL AND SMITH, BRIERLY HILL IRON WORKS, NEAR DUDLEY.

LONDON OFFICE: 40 BROAD STREET BUILDINGS, E.C.

# ST. PANCRAS IRON WORKS,

## OLD ST. PANCRAS ROAD, N.W.

## IRON HURDLES, FENCING, AND GATES.

THE PROPRIETORS OF THE ST. PANCRAS IRON WORKS, OLD ST. PANCRAS ROAD, LONDON,

WERE AWARDED THE

**SILVER MEDAL of the Royal Agricultural Society for their IRON HURDLES & GATES**

which, by their peculiar construction, are more than twice as strong and durable as those in ordinary use.

Lists per post on application. Gates from 30*s.* to 500*l.*

**The Hurdles can be seen in process of Manufacture at the Works.**

## GAME WIRE NETTING.

## Professor Varnell's Enamelled and Wrought-iron Stable Fittings.

These Patent Mangers and Stable Fittings obtained the Commendation and the Silver Medal of the Royal Agricultural Society of England and the Royal Agricultural Society of Ireland, are adopted by the Royal Veterinary College, and Professor Spooner of that Institution states that they should be used by all who value the health and comfort of their horses. They can be had plain, galvanised, or enamelled.

A Show Room is devoted entirely to every description of Stable Furniture, and full-sized stalls and loose boxes are erected for inspection at St. Pancras Iron Works.

## ADDRESS—THE MANAGERS,

**ST. PANCRAS IRON WORKS, OLD ST. PANCRAS ROAD, LONDON, N.W.,**

OPPOSITE OLD ST. PANCRAS CHURCH.

**25,500** NEW ARCHANGEL MATS, &c., on application to JOHN MARTIN, Norton Folgate, N.E.

## MONRO'S CANNON BOILERS.

MUCH has of late been said about BOILERS for HEATING BY HOT WATER, but these Boilers have now proved themselves to be the best at present known. They are adapted for Heating every description of Building, and are made of various sizes. The price of the

HORTICULTURAL BUILDERS and HOT-WATER APPARATUS MANUFACTURERS. Estimates forwarded on the shortest notice.

BOILERS of all sizes on sale; also small CONSERVATORIES and GREENHOUSES, Heated by GAS; HOT-WATER APPARATUS, from a single burner, upon quite a different plan to the Common Gas Stove, which is so injurious to plants. For prices &c. apply as above.

## IMPROVEMENTS IN HEATING, &c

MUSGRAVE'S PATENT SLOW-COMBUSTION STOVE, for Warming Public Buildings, Hall, Shops, Conservatories, Factories, Drying Rooms, &c. Will burn in Churches from Saturday till Sunday evening, avoiding attention during the hours of worship. In Halls will burn day and night for weeks, with little care. Capable of warming a large apartment for 24 hours, at a cost of 3*d.*; and deserving of special attention, because of its safety, healthfulness, durability, and extreme simplicity. This Stove is the nearest approach to warming by hot water.

MUSGRAVE'S PATENT STABLE FITTINGS AND HARMLESS LOOSE BOXES have obtained the award of a large Council Medal from the R. I. A. Society, the following improvements: 1st, The Horse cannot injure himself or others in the stable if he breaks loose in the stall. 2d, He cannot waste his hay. 3d, He can have his uncut hay at pleasure. 4th, He has clean water always before him. 5th, A pure and wholesome atmosphere is secured. 6th, The whole fittings are stronger than usual, without increase in price, and there is no risk of infection.

The Loose Box is really what its name denotes, and the most spirited Horse may be turned into it without danger.

MUSGRAVE'S PATENT IRON COW-HOUSE FITTINGS, as approved by the Board of Works, and in the Ulster Model Farm, and by many of the most eminent Stock Breeders in the Kingdom, are made wholly of iron, very durable, cleanly, and attractive in appearance. The fodder is always fresh, being freely exposed to the air, removed from the breath of the animal, and separated from the more damp food. The range of Troughs can be quickly filled with water for the use of the Cows, or for washing out in case of epidemic, and the cost is very moderate.

These inventions being distinguished for strength, simplicity, and practical usefulness will repay public inspection.

MUSGRAVE BROTHERS are also Makers of Wire Fencing, Iron Hurdles, Field and Entrance Gates, Corn Rick Stands, Conservatories, Hot-water Apparatus, Verandahs, Rural Bridges, &c., and their works being favourably placed for cheap labour and materials, they can offer corresponding advantages in price.

MUSGRAVE'S Patent Field Gates have gained the 1st Prize of the R. I. A. Society for strength, durability, and cheapness.

For particulars address MUSGRAVE BROTHERS, Ann Street Iron Works, Belfast.

## PAXTON WORKS, SHEFFIELD, ESTABLISHED 1738

SAYNOR AND COOKE'S warranted PRIZE PRUNING and BUDDING KNIVES, SCISSORS, &c. Sold by all respectable Nurserymen and Seed Merchants in the three Kingdoms.

*SATURDAY, JUNE* 4, 1859.

GREEN'S PATENT LAWN MOWERS have proved to be the best by the appointed judges in all cases of competition. Full illustrations, with particulars of improvements for the present season, will appear in this Paper next week.

THOMAS GREEN, Patentee and Sole Manufacturer, Smithfield Iron Works, Leeds, Yorkshire; and 2, Victoria Street, Bottom of Holborn, London. Repairs done at either of the Establishments, where every information may be obtained.

H. BWYLE, SEEDSMAN and FLORIST, Albert House, Great Malvern, Agent for GREEN'S LAWN MOWING MACHINES. Mowing Machines lent on hire.

Lawns mowed by Machine or Scythe, and all Gardening operations undertaken by Contract or otherwise.

SHANKS'S PATENT MOWING MACHINES.

J. AND C. LEE, NURSERYMEN, Hammersmith, have great confidence in recommending these as the most complete Mowing Machines offered to the public. They have had large experience with SHANKS's Machines, and have ever found them do their work admirably, effecting a great saving in labour, and not liable to get out of order. For terms, apply to the Agents, J. & C. LEE, Nurserymen, Hammersmith.

SHANKS'S PATENT LAWN MOWERS are unquestionably the most perfect Machines for Mowing Lawns, Verges, &c., extant. SHANKS's Horse and Pony Machines are the only Machines that Mow, Roll, Collect, and Deliver the Grass.—London Agents: COTTAM & Co., 2, Winsley Street, Oxford Street, W.

LAWNS—IN USE IN THE ROYAL GARDENS.

SAMUELSON'S PATENT BOYD LAWN MOWING and ROLLING MACHINE, the only one that will cut wet as well as dry Grass, is guaranteed efficient in use, easily handled, and readily kept in working order. Doing the work of five or six men. Prices, including case and carriage to any railway station in England, from 4*l.* 17*s.* 6*d.* and upwards. Copies of testimonials post free on application to MR. SAMUELSON's London Warehouse, 76, Cannon Street West, City; Messrs. DEANE'S, London Bridge; or the Works, Banbury, Oxon.

THE NEW PATENT MOWING MACHINES may be used anywhere at any time, are self-sharpening, and admit of the use of duplicate sets of cutting parts. Prices from 4*l.* 10*s.* upwards. Illustrated Circulars free by post.—Manufactured and Sold by JAMES FERRABEE & Co., the original introducers of Mowing Machines.

Several infringements of their patent having taken place, the Makers respectfully caution the public to see that the words "FERRABEE's Patent" are cast on every Machine.

JAMES FERRABEE & Co., Phœnix Iron Works, Stroud.

PICKSLEY, SIMS, AND CO.'S (by ROYAL LETTERS) PATENT LAWN MOWING MACHINE.

LEIGH, LANCASHIRE.

P. S., & Co., in introducing this Lawn Mowing Machine particularly request a strict examination, or comparison and trial, for simplicity of construction, lightness, regularity of draught, adaptability for mowing every kind of plain, circular, and verge work.

Firstly, we have encased the wheels so as completely to protect from injury flower borders, shrubs, &c., whilst working the machine, at the same time not being liable to obstruction or damage.

Secondly, this machine works easily on undulated and sloping ground; it can be thrust forward or be drawn from behind, the latter being the easiest.

Thirdly, this is the only machine made that will work round short curves; it will work easily and effectively round circular borders so small as 12 inches in diameter. This very desirable improvement has been obtained by fixing to the front part of the machine our newly-invented universal action, and self-cleaning, anti-friction spherical guiding balls. The continual revolving of these spherical guiding balls, under the most trying circumstances, never fails.

Fourthly, we have attached to this machine a rack and pinion motion, for adjusting the cutting parts (there being a rack and pinion on each side of the machine to act conjointly at the same time upon the full length of the knives), in other machines a slow, tedious, and uncertain operation, into one of quickness, ease, and certainty.

PRICES:—

# THE DAILY NEWS,

A FIRST-CLASS LONDON PAPER. ESTABLISHED 1846,

**Price Threepence,**

ALL OVER ENGLAND AND AT ALL THE RAILWAY STATIONS.

In Politics the DAILY NEWS has, from its establishment, maintained an independent course, having the single aim of advancing Liberal opinions, regardless of the selfish interests of faction. The services it has rendered in the successive triumphs of the cause of Civil and Religious Liberty, are known and appreciated. In the DAILY NEWS, Reform in all its developments—education, social, sanitary—possesses a faithful champion, and in this characteristic, as in others, the consistency of its advocacy has increased the sources of its intelligence.

The character of the Paper stands deservedly high in reference to its Foreign Correspondence, and the arrangements made by the Conductors for securing early information of the War in Italy, and of all circumstances connected with it, are it is believed, unsurpassed in the English Press. No efforts have been spared to obtain the fullest accounts; and the special advantages possessed by the DAILY NEWS insure that its intelligence will be impartial and trustworthy.

Of the reports which the DAILY NEWS has won, by its mercantile and commercial reports, and by the honesty and soundness of its comments upon monetary affairs, the Conductors have every reason to be proud. The [illegible] are frequent, especially at such times as the present, when advice and warning relative to unwarrantable panic and reckless speculation are of almost priceless value; and the Public will find that no such opportunity is neglected by the DAILY NEWS.

The Parliamentary and Law Reports of the DAILY NEWS are acknowledged to be second to none, and in all the divisions of news, whether Home or Foreign, it is able, by the largeness of its staff of correspondents and agents, to meet every requirement of the times.

In Literature, Music, the Drama, and the Fine Arts, the impartial criticisms, and prompt and accurate information

The DAILY NEWS is printed on paper of excellent quality, in clear and legible type, and is now sold all over England and at all the Railway Stations at Threepence per copy—a price which brings it within the reach of every class.

Orders may be given to any News Agent or Bookseller for any period of time, or may be sent addressed to the Publisher, W. K. HALES, DAILY NEWS OFFICE, 10, BOUVERIE STREET, FLEET STREET, LONDON, E.C., to whom Post-office Orders should be made payable.

JOHN VAN VOORST, 1, Paternoster Row.

NEW WEEKLY ILLUSTRATED PERIODICAL.

ONCE A WEEK.

A MISCELLANY OF LITERATURE, ART, SCIENCE, AND POPULAR INFORMATION.

TO BE ILLUSTRATED BY

LEECH, TENNIEL, MILLAIS, HABLOT K. BROWNE, C. KEENE, WOLF, &c. &c.

Will be published every Saturday, price Threepence.

The First Number will appear on July 2.

The forthcoming Miscellany will include [illegible] features, and will, to a certain extent, have the character of a novel experiment on the growing demand for cheap Periodical Literature. It must shortly be tested by the experience and opportunities of its projectors to sustain their conception of its distinctive character. But, in the meantime, a few preliminary statements may be made, generally, its plan and objects.

In Literature it will contain the usual relief of papers which attract the majority of readers, viz.—a considerable proportion of Fiction, including serial tales by Novelists of celebrity, discussions of social characteristics, History, Biography, Incidents of travel, and Papers on contemporary or past transactions, in which a wide interest is taken, or which afford lively illustrations of character and manners. Occasional notices of art, some varieties of verse, selections from English and Foreign Literature, investigations of natural history, and descriptions of natural phenomena, will be also admissible. But information on the popular aspects of science, and of new inventions will be especially sought for, and it is confidently hoped, contributed by our most eminent discoverers and scientific authorities.

It is not easy to enumerate all the possible contents on account of their diversity; but stress may be laid generally on obvious resources in the modern department of pictorial illustration. These are to some extent, indicated by the names of the Artists already mentioned, and for the co-operation of whom Mr JOHN LEECH undertakes all practical arrangements.

In Literature as in Art the best attainable productions are aimed at, subject to the condition that they must interest or amuse a wide public. It is believed that the names of the writers, who will have the option of signing their contributions, will be *prima facie* proof that this object has been attained. The Projectors have received assurances of such valuable aid in this respect that they may confidently rely on unexhausted resources. At the same time they bear in mind the great diversity of capacities available for a publication so comprehensive in its scope, and therefore invite contributions from writers with whom they are unacquainted, and to whom they promise an open field and a liberal recompense for successful efforts. It should be observed that their Miscellany is neither a Newspaper nor a Review, and that they have therefore no obligation to support the views of any party or school; as a new combination they are free from the discussions of topics, and are ready and even solicitous to enlist opposing elements. On their part they make engagements only [illegible]. They require only that statements of facts shall be thoroughly reliable, and that these and other materials shall be set forth effectively and in good taste. To be scrupulously accurate without being tedious, to be popular without vulgarity, and pointed without affectation, is the standard they fairly set before them, and they will accept the co-operation of any writer who can contribute to its attainment.

It is superfluous to add that there appears to be ample scope for this project without trespassing on the province of any existing periodical. The projectors seek only to maintain their own conception of the requisites of a Popular Literature, under the impression that it has yet to be realised by themselves or others, and they expect popular support only in proportion to their success.

All Literary arrangements will be made by the Editor, who is to be addressed, for the present, through the Publishers, Messrs. BRADBURY & EVANS, at their offices, Bouverie Street, Fleet Street. The Publishers will also receive Orders for the Miscellany itself; and a limited number of Advertisements for insertion in the Wrapper to be issued with it regularly "ONCE A WEEK."

Now ready, price 6*s.*,

THE JOURNAL OF THE BATH AND WEST OF ENGLAND AGRICULTURAL SOCIETY. Vol VII. New Series.—JAMES RIDGWAY, Piccadilly, W. ROLLS, Exeter; and all Booksellers.

SWINEY LECTURES ON GEOLOGY in connexion with the British Museum.—A COURSE of TWELVE LECTURES will be delivered at the Museum of Practical Geology, Jermyn Street, on MONDAY, TUESDAY, WEDNESDAY, and THURSDAY in each week, commencing on the 13th of June, at 3 o'clock, P.M., by A. G. MITCHELL, M.D., Professor of Natural History in the Queen's University, Ireland. Admission gratis.

## News of the Week.

THE new Parliament met on Tuesday, when the Session was opened by Commission with the usual formalities. In the Lords, after the Commons had been summoned to the bar, the QUEEN's Commis-

sion was read and the LORD CHANCELLOR signified to the House of Commons her Majesty's pleasure that they should proceed forthwith to the election of a Speaker. The Commons having returned to their own House, Colonel WILSON PATTEN moved that the Right Hon. JOHN EVELYN DENISON be re-elected Speaker. Sir. F. BARING seconded the motion, which was unanimously agreed to, and Mr. DENISON was conducted to his seat in the usual manner. The CHANCELLOR of the EXCHEQUER congratulated the right hon. gentleman on his re-election, and expressed his conviction that he would preside over their debates with the dignity of a judge and the spirit of an English gentleman. Lord PALMERSTON also congratulated Mr. DENISON, and complimented him on the able manner in which he had discharged the duties of his office, and had thus vindicated the judgment of those who had originally nominated him. On Wednesday the House was summoned to the House of Peers, when the LORD CHANCELLOR signified HER MAJESTY'S approval of their election of Mr. DENISON as Speaker, and confirmed in the fullest manner the privileges heretofore accorded to the members of the House. The remainder of the week has been occupied in both Houses by the swearing in of members. The QUEEN'S Speech will be delivered by HER MAJESTY in person on Tuesday next, and the address of the Commons in reply will be moved by the Hon. ALGERNON EGERTON, M.P. for South Lancashire, and seconded by Sir JAMES ELPHINSTONE, M.P. for Portsmouth.

From the seat of war we learn that the King of SARDINIA on Monday crossed the Sesia near Vercelli, drove the Austrians from their entrenchments and occupied Palestro on the east bank of the river. On Tuesday morning a body of 25,000 Austrians endeavoured to retake Palestro. The King of SARDINIA, at the head of General CIALDINI'S Division and a single regiment of Zouaves, received the attack of this superior force, and at length assuming the offensive, put the Austrians to the rout, and took above 1000 prisoners and eight pieces of cannon. In the evening of the same day the Austrians made a second attempt to recover the position, and were again repulsed by the KING in person at the head of the Piedmontese cavalry and the Zouaves. In these engagements KING VICTOR EMMANUEL is said to have shown the most heroic bravery, and the Zouaves in vain endeavoured to restrain him from exposing himself in the thickest of the fight. On Tuesday morning General NIEL entered Novara after putting the Austrian outposts to flight, and in the evening of the same day the Emperor NAPOLEON entered the city amidst the acclamations of the people. While the allies are thus gradually driving the Austrians back to the Ticino, and threatening a speedy advance on Milan, General GARIBALDI has been following up his successes in the lake districts. On Friday evening he again defeated the Austrians and entered Como the same evening. On Saturday he followed up this success by driving the Austrians from Camerlata. On Monday he attacked Laveno, and on Tuesday repulsed an attack on his vanguard at Sesto Calende. On the same day, according to the accounts from Vienna, the Austrian General D'URBAN recaptured Varese, and compelled GARIBALDI to "retire to the mountains," but the accounts from Turin assure us that he has since retaken Varese and re-entered Como. - Beyond the Lake of Como, in the north-east, the Valteline is in a state of insurrection, and the town of Sondrio, which is the centre of the movement, has proclaimed the KING OF SARDINIA. From Naples we learn that a Palace intrigue in opposition to the young KING has been set on foot by the QUEEN DOWAGER, who is an Austrian Princess, in favour of her son, the Count DE TRANI, and the latest news states that the Court was so divided in opinion that a collision was considered imminent. The news from Germany continues warlike. At the last sitting of the Federal Diet the minor German States voted that in certain eventualities military measures should be taken; and Prussia claimed that in such cases the initiative should be accorded to her. A new Prussian Loan of 30,000,000 thalers at 5 per cent. has also been announced.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Royal family continue at Buckingham Palace. On Friday morning the Queen and the Princess Alice visited the Duchess of Kent. The Duke of Cambridge and the Princess Mary visited the Princess Frederick William at Buckingham Palace. In the afternoon the Queen and Prince Consort, the Princess Frederick William, and the Princess Alice visited the Duchess of Kent. Her Majesty afterwards took a carriage drive. In the evening the Queen and Prince Consort, accompanied by the Princess Frederick William and the Princess Alice, honoured the performance at the Haymarket Theatre with their presence. On Saturday the Queen and Princess Frederick William visited the Duchess of Kent. The Princess afterwards visited the two Water Colour Exhibitions. In the afternoon the Queen and Prince Consort, the Princess Royal and Princess Alice, went to Richmond and visited the Countess de Neuilly. In the evening the Queen had a dinner party. On Sunday morning the Queen and Prince Consort, the Princess Frederick William, the Princesses Alice, Helena, and Louisa, attended Divine service in the private chapel of Buckingham Palace; the Dean of Windsor officiated. Her Majesty and the Prince Consort, with the Princess Frederick William, afterwards visited the Duchess of Kent. On Monday morning the Queen and Prince Consort, accompanied by the Princess Frederick William and the Princess Alice, went to Windsor by a special train on the South-Western Railway, and remained at the castle until 1 o'clock inspecting the principal rooms, and particularly those which had been occupied by the Princess Frederick William previously to her leaving England. On their return to town the Queen and Prince Consort, the Princess Frederick William, and the Princess Alice visited the Duchess of Kent. Her Majesty afterwards took a carriage drive. In the evening the Queen paid a visit to the Duchess of Kent. Her Majesty and the Prince Consort, accompanied by the Princess Frederick William and Princess Alice, afterwards honoured the performance at the Princess's Theatre with their presence. On Tuesday the Queen held a Court at which Viscount Stratford de Redcliffe, G.C.B., had an audience on his return from Constantinople, and the Earl of Elgin, K.T., had an audience on his return from China. The Earl of Malmesbury had an audience. The Prince and Princess Augustus of Saxe-Coburg and the Prince of Leiningen visited her Majesty. In the afternoon the Queen, Prince Consort, and the Princess Frederick William visited the Duchess of Kent, and afterwards took a carriage drive. In the evening her Majesty and the Prince Consort, the Princess Royal, and the Princess Alice visited the Duchess of Kent, and afterwards honoured the Royal Italian Opera with their presence. On Wednesday morning the Princess Frederick William visited the Duchess of Kent and the Duchess of Cambridge. The Princess Beatrice visited the Duchess of Kent. In the afternoon the Queen, accompanied by the Princess Frederick William and the Princesses Alice and Helena, visited the Duchess of Kent, and afterwards took a carriage drive. The Prince Consort rode on horseback. In the evening the Queen gave a concert, to which about 670 invitations were issued. On Thursday morning the Princess Frederick William, accompanied by the Princess Alice, went to Clarence House, and took leave of the Duchess of Kent. The Queen, Prince Consort, and Princess Alice accompanied the Princess Frederick William to Gravesend, and on their return to town visited the Duchess of Kent. The Queen will hold a Privy Council on Monday at Buckingham Palace.

DEPARTURE OF THE PRINCESS FREDERICK WILLIAM.—Her Royal Highness, accompanied by her Majesty, the Prince Consort, and the Princess Alice, left Buckingham Palace shortly before 1 o'clock on Thursday, for Gravesend, where the Princess embarked in the Victoria and Albert royal yacht for Antwerp, on her return to Prussia. The royal party, escorted by a detachment of light dragoons, proceeded to the Bricklayers' Arms station of the South-Eastern Railway, where they were received by the directors and officers of the company. On arriving at Gravesend her Majesty and the royal party were received by Viscount Sydney, lord-lieutenant of Kent, and by the mayor and corporation, who preceded her Majesty through the town to the Terrace Pier. At the railway station an escort of the West Kent Yeomanry under the Earl of Darnley was in attendance to escort her Majesty from the station to the pier. The royal party occupied three of the Queen's carriages. On arriving at the pier, the Queen, Prince Consort, and the Princesses passed along the jetty, which was lined on each side by the principal inhabitants of Gravesend. On reaching the river end of the pier the barge of the royal yacht was in waiting, and the royal party immediately embarked amidst the cheers of the spectators and a royal salute from Tilbury Fort, and proceeded on board the Victoria and Albert, the standards of England and Prussia being run up to the mast-head as the royal party stepped on board. Her Majesty remained with the Princess on board the yacht until 3 o'clock, and then returned to London, the yacht letting go her moorings at the same moment, and dropping slowly down the river.

THE PRINCE OF WALES left Gibraltar on Saturday last in the royal yacht Osborne for Cadiz and Lisbon, on his return to England.

THE DUCHESS OF KENT.—The health of her Royal Highness is steadily improving, several days having passed over without a relapse. Sir Benjamin Brodie, Sir James Clark, and Mr. Brown, of Windsor, are in close attendance on the Duchess.

THE CABINET.—A Cabinet Council was held on Friday at the official residence of the Chancellor of the Exchequer in Downing Street. Another Council was held on Monday, and another on Tuesday.

THE ARMY. — The Colonelcy of the 97th Foot, vacant by the death of General Proctor, has been conferred on Major-General E. F. Morris, C.B.

THE CHANNEL FLEET.—Rear-Admiral J. E. Erskine has been appointed to hoist his flag on board the Edgar, as second in command of the Channel fleet.

DIPLOMATIC APPOINTMENT.—The Queen has appointed the Hon. Henry George Elliot, her Majesty's Minister in Denmark, to proceed to Naples on a special mission to convey her Majesty's congratulations to the King of the Two Sicilies, on his accession to the throne.

CONVOCATION.—The new Convocation of the prelates and clergy of the province of Canterbury was opened in St. Paul's Cathedral on Wednesday pursuant to the Queen's writ. The ordinary preliminary business was performed in the Chapter-house in St. Paul's Churchyard, where a procession was formed, which moved into the choir of the cathedral. The Bishop of Salisbury, being the junior bishop present, intoned the Litany in Latin, after which the sermon was preached in Latin by the Hon. and Rev. Samuel Waldegrave, the preacher of the day. The Archbishop of Canterbury then pronounced the apostolic benediction in Latin. Divine service being ended, the Archbishop, attended by the bishops and other members of the Convocation, proceeded to the Chapter-house, where the Vicar-General presented to the Archbishop the Queen's writ for summoning the Convocation. The writ having been read, the various returns and certificates were read, and after some other formalities had been complied with, the Archbishop in a Latin form directed the clergy of the province to withdraw and to choose a Prolocutor, and present him for approval and confirmation in the Jerusalem Chamber, Westminster, on the 22d inst. The clergy then withdrew, and having formed themselves into a Lower House, the Dean of Norwich moved the re-election of the Very Rev. Dr. Elliot, Dean of Bristol, as Prolocutor. The Rev. H. A. Woolgate seconded the nomination. The Rev. Canon Selwyn, as an amendment, nominated the Rev. Dr. Wordsworth, Canon of Westminster. The Rev. J. Jebb seconded the amendment. Dr. Wordsworth declined the honour, being desirous that Convocation should be marked by strength unanimity, which was its great strength. After some discussion, Canon Selwyn withdrew his nomination, and the Dean of Bristol was unanimously elected. The Convocation then adjourned to Wednesday, the 22d inst.

THE VOLUNTEER RIFLE CORPS.—A meeting of the Lieutenancy of the county of Cornwall was held at Bodmin a few days ago, at which it was resolved that subject to the supply of arms by the Government, artillery and rifle corps should be raised in the county under the superintendence of the Deputy Lieutenants in their respective districts. It was also resolved that in the opinion of the meeting the arms to be used should be provided by and be the property of the Government. A meeting of the Lieutenancy for Shropshire was held in the Shire Hall, Shrewsbury, on Saturday, Lord Berwick the Lord-Lieutenant in the chair, at which it was resolved to afford every facility for the organisation of volunteer rifle corps in the county, and to request the Deputy-Lieutenants in each sub-division, with the aid of such gentlemen as may be willing to co-operate, to receive and enrol the names of the volunteers. In the county of Norfolk the movement has been received with great favour, meetings having been already held on the subject in several districts. At a meeting of the Deputy Lieutenants of the hundreds of Taverham, Blofield, and Walsham, Sir Samuel Bignold in the chair, it was resolved to form a company in the district. At Lynn it was resolved, on the motion of Mr. Stratton it was resolved, on the motion of Mr. Howes, M.P., that a committee should be appointed for the purpose of establishing a company in that neighbourhood. At King's Lynn it was resolved to take measures to appoint an influential committee to take measures for the formation of a corps. At Aylsham the Marquis of Lothian took the chair, and resolutions in favour of the establishment of a rifle corps were adopted unanimously. At Fakenham, where Mr. Willoughby Jones took the chair, there was an expression of opinion in favour of a mounted corps also, as, in an open district like Norfolk, such a body would be enabled to cover more country than an unmounted one. Further meetings are announced at Docking, Holt, Norwich, Walsham, and Downham Market. In Cambridgeshire it is proposed to form a rifle club for South Cambridgeshire and North Hertfordshire, with targets for the practice at Royston, Sandon, Baldock, Hitchin, Stevenage, Buckland, Buntingford, Barkway, Braughan, and other places. At Reading it was resolved at a public meeting on the 19th ult. to form a rifle corps for the borough, and to appoint a provisional committee to confer with the Lord-Lieutenant of the county, in order to raise a public subscription for the purposes contemplated by the meeting. At Swansea at a meeting held in the Guildhall on Friday, it was resolved, without approving of the principle of non-intervention, to establish a rifle corps for the district, and the meeting

recorded their unanimous opinion that there should be no distinction of class in the formation of the corps; that all persons above the age of 17 years, who are desirous of serving, should be allowed to enrol themselves as volunteers; and that persons unable to join the corps should be requested to enter their names as subscribers. At Pontypool it was resolved at a public meeting on Friday to establish a rifle club in lieu of a rifle corps, in order to secure to its members the power of conforming to their own regulations instead of those which Government might think necessary if a corps were established. At Ipswich on Monday it was resolved at a public meeting at the Town Hall, the Mayor presiding, to form a rifle club for the town and neighbourhood, out of which companies may be formed in accordance with the War Office circular. At Great Yarmouth on Friday at a public meeting held at the Town Hall under the presidency of the Mayor, it was resolved unanimously that a rifle corps should be formed for that port and its vicinity. It was also proposed that an artillery and mounted rifle corps should be formed, but the suggestion was left over for further consideration until the success of the movement determined on be ascertained. At Sheffield on Monday it was resolved at a public meeting to memorialise the Secretary of War, through the Lord Lieutenant, requesting that arms and ammunition should be provided by the Government. At Rotherham on Monday a public meeting was held at which it was resolved to form a rifle corps in the district, and to invite subscriptions to defray the expenses connected with the movement. At Preston on Monday it was resolved at a public meeting, the Mayor presiding, to form a rifle corps for the borough and neighbourhood. At Leeds on Tuesday it was resolved by the Town Council to form a rifle corps within the borough, without pledging themselves to the conditions contained in the War Office circular. At Doncaster on Monday it was resolved at a public meeting at the Guildhall to establish a rifle corps for the town and neighbourhood, and it is expected that a body of 500 men will be easily raised in the borough. At Queenborough on Tuesday it was resolved unanimously, on account of the specially exposed position of the Isle of Sheppey, to raise a rifle corps in the island. At Oxford on Monday it was resolved at a public meeting held at the Town Hall, the Mayor presiding, to form a rifle corps for the city, and to open a public subscription for the purpose of purchasing rifles and accoutrements for those who were unable themselves to provide them. A resolution was also adopted enforcing the necessity of non-intervention, unless the honour of the country should be at stake. At Windsor it was resolved at a meeting held on Friday, Col. Seymour, Deputy Ranger of the Great Park, in the chair, to form a rifle corps composed exclusively of her Majesty's and the Prince Consort's keepers, and men employed in the Royal gardens, at Shaw Farm, and Flemish Farm, and in various other occupations in the Great Park. It is calculated that the corps will number about 150. On Tuesday a public meeting was held at Greenwich, General Alexander in the chair, at which it was resolved on the motion of Alderman Salomons, M.P., to form a rifle corps for the hundred of Blackheath. At a meeting of the parishioners of Kensington on Monday, Mr. Pownall, chairman of the Middlesex magistrates, in the chair, it was resolved to form a corps for Kensington. At Isleworth a meeting of the inhabitants was held on Saturday, General Tremenheere in the chair, at which it was resolved, on the motion of Mr. Justice Haliburton, M.P., to form a rifle corps for the Isleworth Hundred, including the town and parish of Isleworth, Twickenham, Hounslow, and Heston: the corps to be united for general purposes, but to consist of district companies from each place. At Lynn on Saturday it was resolved at a public meeting to form a rifle corps for that town. At Hastings a rifle club has been formed, which already numbers about 50 members. A large number of young men who are not able to find themselves in arms have sent in their names, and will be balloted for as soon as the public subscriptions will allow of the purchase of rifles for them. The weapon adopted is the Enfield. The uniform is of a slatish-gray, coat, cap, and trousers all alike, with black braiding on the collar and cuffs of the coat. The cost of the whole equipment, including the regulation Enfield, is 5*l*. 2*s*. It will depend on the nature of the future Government regulations whether or not it will become a corps. At Bristol nearly 300 names have been enrolled. The uniform of the corps has been decided on, and consists of a loose tunic fastened with a belt, trousers to match, and a smart looking foraging cap, with a straight peak. The colour is rifle-green with black mountings. The rifle selected is a light weapon, weighing about 7½ lbs., with a bayonet attached, which may be used also as a sword. At Newcastle-on-Tyne on Friday at a meeting at the Guildhall, the Mayor presiding, it was resolved that the secretaries be requested to communicate with the secretaries of the various corps throughout the kingdom for the purpose of arranging a Bill to be brought into Parliament for the better regulation of rifle corps, the present Bill, passed in the reign of George III., not applying to the case. At Birkenhead on Wednesday it was resolved to take measures for raising a corps of 500 men for the hundred of Wirral, and a subscription was opened to defray the general expenses, to which the chairman, Mr. John Laird, contributed 100*l*., with a promise of a similar amount to the Birkenhead contingent.

# Foreign.

FRANCE.—The *Moniteur* of Sunday announces that the Emperor, wishing to diminish as much as possible the evils of war, has decided upon returning to the enemy all wounded prisoners without asking for exchange. It also makes the following important announcement in regard to the question of coals being contraband of war, which it settles in the negative:—

"The Emperor's Government has never hitherto considered coal as an article contraband of war, and we are enabled to announce that during the present war it will adhere to that way of viewing it."

Accounts from Toulon of the 24th ult. state that the enlistment of seamen in that port, if not abandoned, is at least suspended. A flotilla of gun-boats is about to sail from Toulon, under the command of Captain La Roncière le Nourry, to be followed by a second flotilla under the command of Admiral Dupony. It is believed that these gun-boats are to act against Venice. Five gun-boats on a new model have been constructed at the dockyard of La Seyne, near Toulon. They can be taken to pieces and again remounted. They are, it is said, intended to be used against the Austrians on the Lago Maggiore. They were shipped at Toulon for Genoa on the 23d ult. Independently of the eight divisions already designated to form the Army of Observation under the command of Marshal Pelissier, four additional divisions are in course of organisation for the same object. The General-in-Chief of the Artillery of this army will be General Thierry; the Commander-in-chief of the Engineers, General Chabot la Tour; and General Chasseloup Laubat is to be Chief of the General Staff of the army. The Russian screw corvette which brought the members of the Imperial family to Marseilles has been lost on going into Toulon. She struck upon a rock, and rapidly broke up. Fortunately all hands were saved.

PORTUGAL.—Advices received from Lisbon state that the Portuguese Government has declared to the Cortes its intention of remaining neutral during the present war.

SWITZERLAND AND THE TYROL.—The Duke of Parma has arrived in Switzerland by way of the Tyrol, with a numerous suite. The Sub-Governor of Sondrio has fled with gensdarmes and the public treasure into the Tyrol.

PRUSSIA.—Accounts from Berlin announce the issue of a new Prussian loan at 5 per cent. The issue is to be made in coupons of from 50 to 1000 thalers, the payment of the interest to be half-yearly, and the redemption of the debt to commence from 1863 by the payment of 1 per cent. per annum. No reduction of the interest is to take place before 1870. The subscription to be received from the 6th to 11th June. In case the subscription should exceed 30,000,000 thalers, those above 250 thalers are to be proportionally allotted. On subscription a deposit of 10 per cent. must be made, by the 8th July 30 per cent., by the 22d August 25 per cent., and by the 8th October 30 per cent. For this 95 per cent. subscribers will receive 100 per cent. nominal value, bearing 5 per cent. interest from July 1, 1859.

FRANKFORT.—Baron Kübeck has been definitively appointed President of the Federal Diet.

HOLLAND.—The Dutch Government has taken measures for the mobilisation of the Limburg Contingent, Holland being a member of the Germanic Confederation by virtue of her possession of that duchy. In a message to the Second Chamber, the Government declares that though danger does not at present exist, it is necessary to adopt precautionary measures, in order that the country may not be taken by surprise.

MALTA.—The British naval force at present in the Mediterranean consisting of 33 ships is to be increased to 97, 22 of which are to be line-of-battle ships. It is also said that the garrison of Malta is to be raised to a strength of at least 10,000 men.

ITALY.—The King of Sardinia on Monday crossed the Sesia near Vercelli, drove the Austrians from their entrenchments, took two guns and several prisoners, and encamped that night at Palestro on the left bank of the river. On Tuesday morning at 7 o'clock 25,000 Austrians endeavoured to retake the position at Palestro. The King, commanding the fourth division in person, and General Cialdini at the head of the 3d Regiment of Zouaves, resisted the attack for a considerable time, and then, after having successfully assumed the offensive, pursued the Austrians, taking 1000 of them prisoners, and capturing eight pieces of cannon, five of which were taken by the Zouaves. 400 Austrians were drowned in a canal. During the combat another fight took place at Confienza, in the province of Lomellina, in which the Austrians were repulsed by the Division Fanty after a two hours' conflict. This victory was followed by a second successful combat, which took place at 6 o'clock in the evening at Palestro, which the Austrians endeavoured to recover, but were repulsed again by the Division of Cialdini, composed of Zouaves and Piedmontese cavalry. The King pressed forward where the fight was most furious, the Zouaves vainly trying to restrain him. On Tuesday morning at 7 o'clock General Niel entered Novara, attacking the Austrian outposts, which, after a short encounter, took to flight precipitately. The Emperor Napoleon arrived at 5 o'clock in the evening amid the acclamations of the people. The Austrians have endeavoured to cross the Po at Bassignano, but the inhabitants opposed their passage, firing upon and destroying an Austrian barque. On Thursday morning the Austrians advanced from Bobbio towards the French outposts, but retired again after a short fight. This movement was made to conceal the retreat of the Austrians, who had begun to evacuate Robbio, carrying with them about 1 500 wounded. From the lake district we learn that on Friday evening Garibaldi attacked and defeated the Austrians after a furious battle, which lasted from 5 to 8 o'clock, and entered Como at 10 o'clock the same night. The Austrians were completely routed, and fled in the direction of Monza. The town of Como was illuminated, and the inhabitants joined Garibaldi's standard. On Saturday morning the combat was renewed at Camerlata, and the Austrians again gave way and retreated towards San Mariano on the road to Milan closely pursued by Garibaldi. Accounts from Berne state that on Sunday Garibaldi suffered a defeat by a superior force of Austrians, and withdrew into the Canton of Tessin. This report has not been confirmed. On the other hand it appears that on Monday Garibaldi himself, or a strong detachment of his force, left Como and arrived before Laveno, a fortified town on the Lago Maggiore. He commenced an immediate attack upon the town, and maintained it during the whole night. On Tuesday morning his troops withdrew, but in the evening resumed the attack, which lasted the whole night. On the same day the Austrians attacked the Sardinian vanguard at Sesto-Calende. The fight lasted two hours and the Sardinian troops crossed the Ticino in pursuit of the Austrians. Accounts from Vienna state that on Wednesday the Austrian *corps d'armée*, under General D'Urban, cannonaded and took Varese, and that Garibaldi was obliged to retire into the mountains, with no road open to him but the Stelvio. The same accounts state that General D'Urban levied war contributions on Varese and reinstated the legal authorities. The latest accounts from Turin state that Garibaldi, so far from having been driven into the mountains, has surprised the Austrians at Varese and recaptured the town; and that he re-entered Como on Thursday evening at 11 o'clock. On Saturday morning the Austrian war-steamers on the Lago Maggiore kept up a three hours' cannonade upon the town of Canobbio, but without much effect. An insurrection has broken out in the Valteline. The population is repairing in masses to Sondrio, the centre of the revolutionary movement. The Austrian Gendarmes who have retired into Switzerland have been disarmed by the Swiss authorities and sent into the interior of the country. Advices from Florence state that Russia, Prussia, England, and Turkey, have not recognised the Provisional Government of Tuscany, and the representatives of those countries have withdrawn their flags. At Lanigiana, in Parma, the people have risen and pronounced for the King of Sardinia. General Ribotti, with Tuscan troops, military engineers, and gendarmes, entered Parma amidst the plaudits of the people, who declared for the King of Sardinia and Italian independence. The Duke of Parma has fled to Switzerland. The municipality of Venice has requested a reduction of the loan. The President and Vice-President of the Chamber of Commerce have resigned their official positions. On Friday a cannonade was directed from the Lido Forts against the French squadron. An English war steamer has arrived at Venice, and another has put into Ancona. The announcement of the Emperor of Austria's arrival at Pavia was premature, but his Majesty was daily expected. The King of Naples has, on his accession to the throne, published a proclamation, in which he enumerates the good qualities of his predecessor, but avoids making any engagements for the future, and abstains from pronouncing his opinion on the events now going forward in the Italian peninsula.

TURKEY.—Letters from Constantinople of the 25th May state that the Grand Duke Constantine was expected there on the following day. The Sultan has held a review of 25,000 soldiers. The reserve will immediately be despatched to Roumelia. The Porte will send troops and ships to Albania. 2000 Servians, with artillery, have departed to reinforce the Montenegrins. Prince Milosch ignores this fact, but the attitude of the Servians inspires fear. The Porte is about to send four ships, four frigates, and two despatch boats to the Adriatic, under the command of Mehemed Pasha, who, in certain emergencies, will exercise his command under the orders of an English Admiral. The garrison of the fortress of Belgrade has been reinforced. Omar Pasha remains at Bagdad, being detained there in consequence of the threatening attitude of Persia.

CAPE OF GOOD HOPE.—We have news from the Cape to April 21. The colonial Parliament was in session. The principal questions before it were the colonial marriage law, insolvent law, and Crown lands. Great depression existed among the Free State Boers in consequence of the refusal of the English Government to countenance Sir George Grey's scheme of South African federation. The first sod of the railway was turned by the Governor on the 31st of March. Mr. Pickering, the contractor, required 300 navvies from England.

UNITED STATES.—Accounts from Washington state that 100,000 dollars of the debt due by the Chinese to American citizens had reached the Government. Additional intelligence from Utah announces that the differences between the governor and the judges were far from being settled. There is no foundation for a report that the President contemplates changes in the English and French missions. Official advices from Nicaragua state that Sir W. Gore Ouseley was actively engaged arranging the treaties. Mr. Smith O'Brien had arrived at Albany on his way to New York, and

sion was read and the LORD CHANCELLOR signified to the House of Commons her Majesty's pleasure that they should proceed forthwith to the election of a Speaker. The Commons having returned to their own House, Colonel WILSON PATTEN moved that the Right Hon. JOHN EVELYN DENISON be re-elected Speaker. Sir. F. BARING seconded the motion, which was unanimously agreed to, and Mr. DENISON was conducted to his seat in the usual manner. The CHANCELLOR of the EXCHEQUER congratulated the right hon. gentleman on his re-election, and expressed his conviction that he would preside over their debates with the dignity of a judge and the spirit of an English gentleman. Lord PALMERSTON also congratulated Mr. DENISON, and complimented him on the able manner in which he had discharged the duties of his office, and had thus vindicated the judgment of those who had originally nominated him. On Wednesday the House was summoned to the House of Peers, when the LORD CHANCELLOR signified HER MAJESTY'S approval of their election of Mr. DENISON as Speaker, and confirmed in the fullest manner the privileges heretofore accorded to the members of the House. The remainder of the week has been occupied in both Houses by the swearing in of members. The QUEEN'S Speech will be delivered by HER MAJESTY in person on Tuesday next, and the address of the Commons in reply will be moved by the Hon. ALGERNON EGERTON, M.P. for South Lancashire, and seconded by Sir JAMES ELPHINSTONE, M.P. for Portsmouth.

From the seat of war we learn that the King of SARDINIA on Monday crossed the Sesia near Vercelli, drove the Austrians from their entrenchments and occupied Palestro on the east bank of the river. On Tuesday morning a body of 25,000 Austrians endeavoured to retake Palestro. The King of SARDINIA, at the head of General CIALDINI'S Division and a single regiment of Zouaves, received the attack of this superior force, and at length assuming the offensive, put the Austrians to the rout, and took above 1000 prisoners and eight pieces of cannon. In the evening of the same day the Austrians made a second attempt to recover the position, and were again repulsed by the KING in person at the head of the Piedmontese cavalry and the Zouaves. In these engagements KING VICTOR EMMANUEL is said to have shown the most heroic bravery, and the Zouaves in vain endeavoured to restrain him from exposing himself in the thickest of the fight. On Tuesday morning General NIEL entered Novara after putting the Austrian outposts to flight, and in the evening of the same day the Emperor NAPOLEON entered the city amidst the acclamations of the people. While the allies are thus gradually driving the Austrians back to the Ticino, and threatening a speedy advance on Milan, General GARIBALDI has been following up his successes in the lake districts. On Friday evening he again defeated the Austrians and entered Como the same evening. On Saturday he followed up this success by driving the Austrians from Camerlata. On Monday he attacked Laveno, and on Tuesday repulsed an attack on his vanguard at Sesto Calende. On the same day, according to the accounts from Vienna, the Austrian General D'URBAN recaptured Varese, and compelled GARIBALDI to "retire to the mountains," but the accounts from Turin assure us that he has since retaken Varese and re-entered Como. Beyond the Lake of Como, in the north-east, the Valteline is in a state of insurrection, and the town of Sondrio, which is the centre of the movement, has proclaimed the KING OF SARDINIA. From Naples we learn that a Palace intrigue in opposition to the young KING has been set on foot by the QUEEN DOWAGER, who is an Austrian Princess, in favour of her son, the Count DE TRANI, and the latest news states that the Court was so divided in opinion that a collision was considered imminent. The news from Germany continues warlike. At the last sitting of the Federal Diet the minor German States voted that in certain eventualities military measures should be taken; and Prussia claimed that in such cases the initiative should be accorded to her. A new Prussian Loan of 30,000,000 thalers at 5 per cent. has also been announced.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Royal family continue at Buckingham Palace. On Friday morning the Queen and the Princess Alice visited the Duchess of Kent. The Duke of Cambridge and the Princess Mary visited the Princess Frederick William at Buckingham Palace. In the afternoon the Queen and Prince Consort, the Princess Frederick William, and the Princess Alice visited the Duchess of Kent. Her Majesty afterwards took a carriage drive. In the evening the Queen and Prince Consort, accompanied by the Princess Frederick William and the Princess Alice, honoured the performance at the Haymarket Theatre with their presence. On Saturday the Queen and Princess Frederick William visited the Duchess of Kent. The Princess afterwards visited the two Water Colour Exhibitions. In the afternoon the Queen and Prince Consort, the Princess Royal and Princess Alice, went to Richmond and visited the Countess de Neuilly. In the evening the Queen had a dinner party. On Sunday morning the Queen and Prince Consort, the Princess Frederick William, the Princesses Alice, Helena, and Louisa, attended Divine service in the private chapel of Buckingham Palace; the Dean of Windsor officiated. Her Majesty and the Prince Consort, with the Princess Frederick William, afterwards visited the Duchess of Kent. On Monday morning the Queen and Prince Consort, accompanied by the Princess Frederick William and the Princess Alice, went to Windsor by a special train on the South-Western Railway, and remained at the castle until 1 o'clock inspecting the principal rooms, and particularly those which had been occupied by the Princess Frederick William previously to her leaving England. On their return to town the Queen and Prince Consort, the Princess Frederick William, and the Princess Alice visited the Duchess of Kent. Her Majesty afterwards took a carriage drive. In the evening the Queen paid a visit to the Duchess of Kent. Her Majesty and the Prince Consort, accompanied by the Princess Frederick William and Princess Alice, afterwards honoured the performance at the Princess's Theatre with their presence. On Tuesday the Queen held a Court at which Viscount Stratford de Redcliffe, G.C.B., had an audience on his return from Constantinople, and the Earl of Elgin, K.T., had an audience on his return from China. The Earl of Malmesbury had an audience. The Prince and Princess Augustus of Saxe-Coburg and the Prince of Leiningen visited her Majesty. In the afternoon the Queen, Prince Consort, and the Princess Frederick William visited the Duchess of Kent, and afterwards took a carriage drive. In the evening her Majesty and the Prince Consort, the Princess Royal, and the Princess Alice visited the Duchess of Kent, and afterwards honoured the Royal Italian Opera with their presence. On Wednesday morning the Princess Frederick William visited the Duchess of Kent and the Duchess of Cambridge. The Princess Beatrice visited the Duchess of Kent. In the afternoon the Queen, accompanied by the Princess Frederick William and the Princesses Alice and Helena, visited the Duchess of Kent, and afterwards took a carriage drive. The Prince Consort rode on horseback. In the evening the Queen gave a concert, to which about 670 invitations were issued. On Thursday morning the Princess Frederick William, accompanied by the Princess Alice, went to Clarence House, and took leave of the Duchess of Kent. The Queen, Prince Consort, and Princess Alice accompanied the Princess Frederick William to Gravesend, and on their return to town visited the Duchess of Kent. The Queen will hold a Privy Council on Monday at Buckingham Palace.

DEPARTURE OF THE PRINCESS FREDERICK WILLIAM.—Her Royal Highness, accompanied by her Majesty, the Prince Consort, and the Princess Alice, left Buckingham Palace shortly before 1 o'clock on Thursday, for Gravesend, where the Princess embarked in the Victoria and Albert royal yacht for Antwerp, on her return to Prussia. The royal party, escorted by a detachment of light dragoons, proceeded to the Bricklayers' Arms station of the South-Eastern Railway, where they were received by the directors and officers of the company. On arriving at Gravesend her Majesty and the royal party were received by Viscount Sydney, lord-lieutenant of Kent, and by the mayor and corporation, who preceded her Majesty through the town to the Terrace Pier. At the railway station an escort of the West Kent Yeomanry under the Earl of Darnley was in attendance to escort her Majesty from the station to the pier. The royal party occupied three of the Queen's carriages. On arriving at the pier, the Queen, Prince Consort, and the Princesses passed along the jetty, which was lined on each side by the principal inhabitants of Gravesend. On reaching the river end of the pier the barge of the royal yacht was in waiting, and the royal party immediately embarked amidst the cheers of the spectators and a royal salute from Tilbury Fort, and proceeded on board the Victoria and Albert, the standards of England and Prussia being run up to the mast-head as the royal party stepped on board. Her Majesty remained with the Princess on board the yacht until 3 o'clock, and then returned to London, the yacht letting go her moorings at the same moment, and dropping slowly down the river.

THE PRINCE OF WALES left Gibraltar on Saturday last in the royal yacht Osborne for Cadiz and Lisbon, on his return to England.

THE DUCHESS OF KENT.—The health of her Royal Highness is steadily improving, several days having passed over without a relapse. Sir Benjamin Brodie, Sir James Clark, and Mr. Brown, of Windsor, are in close attendance on the Duchess.

THE CABINET.—A Cabinet Council was held on Friday at the official residence of the Chancellor of the Exchequer in Downing Street. Another Council was held on Monday, and another on Tuesday.

THE ARMY.—The Colonelcy of the 97th Foot, vacant by the death of General Proctor, has been conferred on Major-General E. F. Morris, C.B.

THE CHANNEL FLEET.—Rear-Admiral J. E. Erskine has been appointed to hoist his flag on board the Edgar as second in command of the Channel fleet.

DIPLOMATIC APPOINTMENT.—The Queen has appointed the Hon. Henry George Elliot, her Majesty's Minister in Denmark, to proceed to Naples on a special mission to convey her Majesty's congratulations to the King of the Two Sicilies, on his accession to the throne.

CONVOCATION.—The new Convocation of the province and clergy of the province of Canterbury was opened in St. Paul's Cathedral on Wednesday pursuant to the Queen's writ. The ordinary preliminary business was performed in the Chapter-house in St. Paul's Churchyard, where a procession was formed, which moved to the choir of the cathedral. The Bishop of Salisbury, being the junior bishop present, intoned the Litany in Latin, after which the sermon was preached in Latin by the Hon. and Rev. Samuel Waldegrave, the preacher of the day. The Archbishop of Canterbury then pronounced the apostolic benediction in Latin. Divine service being ended, the Archbishop, attended by the bishops and other members of the Convocation, proceeded to the Chapter-house, where the Vicar-General presented to the Archbishop the Queen's writ for summoning the Convocation. The writ having been read, the various returns and certificates were read, and after some other formalities had been complied with, the Archbishop in a Latin form directed the clergy of the province to withdraw and to choose a Prolocutor, and present him for approval and confirmation in the Jerusalem Chamber, Westminster, on the 22d inst. The clergy then withdrew, and having formed themselves into a Lower House, the Dean of Norwich moved the re-election of the Very Rev. Dr. Elliot, Dean of Bristol, as Prolocutor. The Rev. H. A. Woolgate seconded the nomination. The Rev. Canon Selwyn, as an amendment, nominated the Rev. Dr. Wordsworth, Canon of Westminster. The Rev. J. Jebb seconded the amendment. Dr. Wordsworth declined the honour, being desirous that Convocation should be marked by strict unanimity, which was its great strength. After some discussion, Canon Selwyn withdrew his nomination, and the Dean of Bristol was unanimously elected. The Convocation then adjourned to Wednesday, the 22d inst.

THE VOLUNTEER RIFLE CORPS.—A meeting of the Lieutenancy of the county of Cornwall was held at Bodmin a few days ago, at which it was resolved that subject to the supply of arms by the Government, artillery and rifle corps should be raised in the county under the superintendence of the Deputy Lieutenants in their respective districts. It was also resolved that in the opinion of the meeting the arms to be used should be provided by and be the property of the Government. A meeting of the Lieutenancy for Shropshire was held in the Shire Hall, Shrewsbury, on Saturday, Lord Hill the Lord-Lieutenant in the chair, at which it was resolved to afford every facility for the organisation of volunteer rifle corps in the county, and to request the Deputy-Lieutenants in each sub-division, with the aid of such gentlemen as may be willing to co-operate, to receive and enrol the names of the volunteers. In the county of Norfolk the movement has been received with great favour, meetings having been already held on the subject in several districts. At a meeting of the Deputy-Lieutenants of the hundreds of Taverham, Blofield, Walsham, Sir Samuel Bignold in the chair, it was resolved to form a company in the district. At a meeting at Stratton it was resolved, on the motion of Mr. Howes, M.P., that a committee should be appointed for the purpose of establishing a company in that neighbourhood. At King's Lynn it was resolved to appoint an influential committee to take measures for the formation of a corps. At Aylsham the Marquis of Lothian took the chair, and resolutions in favour of the establishment of a rifle corps were adopted unanimously. At Fakenham, where Willoughby Jones took the chair, there was an expression of opinion in favour of a mounted corps also, as, in an open district like Norfolk, such a body would be enabled to cover more country than an unmounted one. Further meetings are announced at Docking, Holt, Newton, Walsham, and Downham Market. In Cambridgeshire it is proposed to form a rifle club for South Cambridgeshire and North Hertfordshire, with targets for the practice at Royston, Sandon, Baldock, Hitchin, Stevenage, Buckland, Buntingford, Barkway, Braughin, and other places. At Reading it was resolved at a public meeting on the 19th ult. to form a rifle corps for the borough, and to appoint a provisional committee to confer with the Lord-Lieutenant of the county, in order to raise a public subscription for the purposes contemplated by the meeting. At Swansea at a meeting held in the Guildhall on Friday, it was resolved, while approving of the principle of non-intervention, to establish a rifle corps for the district, and the meeting

recorded their unanimous opinion that there should be no distinction of class in the formation of the corps; that all persons above the age of 17 years, who are desirous of serving, should be allowed to enrol themselves as volunteers; and that persons unable to join the corps should be requested to enter their names as subscribers. At Pontypool it was resolved at a public meeting on Friday to establish a rifle club in lieu of a rifle corps, in order to secure to its members the power of conforming to their own regulations instead of those which Government might think necessary if a corps were established. At Ipswich on Monday it was resolved at a public meeting at the Town Hall, the Mayor presiding, to form a rifle club for the town and neighbourhood, out of which companies may be formed in accordance with the War Office circular. At Great Yarmouth on Friday at a public meeting held at the Town Hall under the presidency of the Mayor, it was resolved unanimously that a rifle corps should be formed for that port and its vicinity. It was also proposed that an artillery and mounted rifle corps should be formed, but the suggestion was left over for further consideration until the success of the movement determined on be ascertained. At Sheffield on Monday it was resolved at a public meeting to memorialise the Secretary of War, through the Lord Lieutenant, requesting that arms and ammunition should be provided by the Government. At Rotherham on Monday a public meeting was held at which it was resolved to form a rifle corps in the district, and to invite subscriptions to defray the expenses connected with the movement. At Preston on Monday it was resolved at a public meeting, the Mayor presiding, to form a rifle corps for the borough and neighbourhood. At Leeds on Tuesday it was resolved by the Town Council to form a rifle corps within the borough, without pledging themselves to the conditions contained in the War Office circular. At Doncaster on Monday it was resolved at a public meeting at the Guildhall to establish a rifle corps for the town and neighbourhood, and it is expected that a body of 500 men will be easily raised in the borough. At Queenborough on Tuesday it was resolved unanimously, on account of the specially exposed position of the Isle of Sheppey, to raise a rifle corps in the island. At Oxford on Monday it was resolved at a public meeting held at the Town Hall, the Mayor presiding, to form a rifle corps for the city, and to open a public subscription for the purpose of purchasing rifles and accoutrements for those who were unable themselves to provide them. A resolution was also adopted enforcing the necessity of non-intervention, unless the honour of the country should be at stake. At Windsor it was resolved at a meeting held on Friday, Col. Seymour, Deputy Ranger of the Great Park, in the chair, to form a rifle corps composed exclusively of her Majesty's and the Prince Consort's keepers, and men employed in the Royal gardens, at Shaw Farm, and Flemish Farm, and in various other occupations in the Great Park. It is calculated that the corps will number about 150. On Tuesday a public meeting was held at Greenwich, General Alexander in the chair, at which it was resolved on the motion of Alderman Salomons, M.P., to form a rifle corps for the hundred of Blackheath. At a meeting of the parishioners of Kensington on Monday, Mr. Pownall, chairman of the Middlesex magistrates, in the chair, it was resolved to form a corps for Kensington. At Isleworth a meeting of the inhabitants was held on Saturday, General Tremenheere in the chair, at which it was resolved, on the motion of Mr. Justice Haliburton, M.P., to form a rifle corps for the Isleworth Hundred, including the town and parish of Isleworth, Twickenham, Hounslow, and Heston: the corps to be united for general purposes, but to consist of district companies from each place. At Lynn on Saturday it was resolved at a public meeting to form a rifle corps for that town. At Hastings a rifle club has been formed, which already numbers about 50 members. A large number of young men who are not able to find themselves in arms have sent in their names, and will be ballotted for as soon as the public subscriptions will allow of the purchase of rifles for them. The weapon adopted is the Enfield. The uniform is of a slatish-gray, coat, cap, and trousers all alike, with black braiding on the collar and cuffs of the coat. The cost of the whole equipment, including the regulation Enfield, is 5*l*. 2*s*. It will depend on the nature of the future Government regulations whether or not it will become a corps. At Bristol nearly 300 names have been enrolled. The uniform of the corps has been decided on, and consists of a loose tunic fastened with a belt, trousers to match, and a smart looking foraging cap, with a straight peak. The colour is rifle-green with black mountings. The rifle selected is a light weapon, weighing about 7½ lbs., with a bayonet attached, which may be used also as a sword. At Newcastle-on-Tyne on Friday at a meeting at the Guildhall, the Mayor presiding, it was resolved that the secretaries be requested to communicate with the secretaries of the various corps throughout the kingdom for the purpose of arranging a Bill to be brought into Parliament for the better regulation of rifle corps, the present Bill, passed in the reign of George III., not applying to the case. At Birkenhead on Wednesday it was resolved to take measures for raising a corps of 500 men for the hundred of Wirral, and a subscription was opened to defray the general expenses, to which the chairman, Mr. John Laird, contributed 100*l*., with a promise of a similar amount to the Birkenhead contingent.

# Foreign.

France.—The *Moniteur* of Sunday announces that the Emperor, wishing to diminish as much as possible the evils of war, has decided upon returning to the enemy all wounded prisoners without asking for exchange. It also makes the following important announcement in regard to the question of coals being contraband of war, which it settles in the negative:—

"The Emperor's Government has never hitherto considered coal as an article contraband of war, and we are enabled to announce that during the present war it will adhere to that way of viewing it."

Accounts from Toulon of the 24th ult. state that the enlistment of seamen in that port, if not abandoned, is at least suspended. A flotilla of gun-boats is about to sail from Toulon, under the command of Captain La Roncière le Nourry, to be followed by a second flotilla under the command of Admiral Dupouy. It is believed that these gun-boats are to act against Venice. Five gun-boats on a new model have been constructed at the dockyard of La Seyne, near Toulon. They can be taken to pieces and again remounted. They are, it is said, intended to be used against the Austrians on the Lago Maggiore. They were shipped at Toulon for Genoa on the 23d ult. Independently of the eight divisions already designated to form the Army of Observation under the command of Marshal Pelissier, four additional divisions are in course of organisation for the same object. The General-in-Chief of the Artillery of this army will be General Thierry; the Commander-in-chief of the Engineers, General Chabot la Tour; and General Chasseloup Laubat is to be Chief of the General Staff of the army. The Russian screw corvette which brought the members of the Imperial family to Marseilles has been lost on going into Toulon. She struck upon a rock, and rapidly broke up. Fortunately all hands were saved.

Portugal.—Advices received from Lisbon state that the Portuguese Government has declared to the Cortes its intention of remaining neutral during the present war.

Switzerland and the Tyrol.—The Duke of Parma has arrived in Switzerland by way of the Tyrol, with a numerous suite. The Sub-Governor of Sondrio has fled with gensdarmes and the public treasure into the Tyrol.

Prussia.—Accounts from Berlin announce the issue of a new Prussian loan at 5 per cent. The issue is to be made in coupons of from 50 to 1000 thalers, the payment of the interest to be half-yearly, and the redemption of the debt to commence from 1863 by the payment of 1 per cent. per annum. No reduction of the interest is to take place before 1870. The subscription to be received from the 6th to 11th June. In case the subscription should exceed 30,000,000 thalers, those above 250 thalers are to be proportionally allotted. On subscription a deposit of 10 per cent. must be made, by the 8th July 30 per cent., by the 22d August 25 per cent., and by the 8th October 30 per cent. For this 95 per cent. subscribers will receive 100 per cent. nominal value, bearing 5 per cent. interest from July 1, 1859.

Frankfort.—Baron Kübeck has been definitively appointed President of the Federal Diet.

Holland.—The Dutch Government has taken measures for the mobilisation of the Limburg Contingent, Holland being a member of the Germanic Confederation by virtue of her possession of that duchy. In a message to the Second Chamber, the Government declares that though danger does not at present exist, it is necessary to adopt precautionary measures, in order that the country may not be taken by surprise.

Malta.—The British naval force at present in the Mediterranean consisting of 33 ships is to be increased to 97, 22 of which are to be line-of-battle ships. It is also said that the garrison of Malta is to be raised to a strength of at least 10,000 men.

Italy.—The King of Sardinia on Monday crossed the Sesia near Vercelli, drove the Austrians from their entrenchments, took two guns and several prisoners, and encamped that night at Palestro on the left bank of the river. On Tuesday morning at 7 o'clock 25,000 Austrians endeavoured to retake the position at Palestro. The King, commanding the fourth division in person, and General Cialdini at the head of the 3d Regiment of Zouaves, resisted the attack for a considerable time, and then, after having successfully assumed the offensive, pursued the Austrians, taking 1000 of them prisoners, and capturing eight pieces of cannon, five of which were taken by the Zouaves. 400 Austrians were drowned in a canal. During the combat another fight took place at Confienza, in the province of Lomellina, in which the Austrians were repulsed by the Division Fanty after a two hours' conflict. This victory was followed by a second successful combat, which took place at 6 o'clock in the evening at Palestro, which the Austrians endeavoured to recover, but were repulsed again by the Division of Cialdini, composed of Zouaves and Piedmontese cavalry. The King pressed forward where the fight was most furious, the Zouaves vainly trying to restrain him. On Tuesday morning at 7 o'clock General Niel entered Novara, attacking the Austrian outposts, which, after a short encounter, took to flight precipitately. The Emperor Napoleon arrived at 5 o'clock in the evening amid the acclamations of the people. The Austrians have endeavoured to cross the Po at Bassignano, but the inhabitants opposed their passage, firing upon and destroying an Austrian barque. On Thursday morning the Austrians advanced from Bobbio towards the French outposts, but retired again after a short fight. This movement was made to conceal the retreat of the Austrians, who had begun to evacuate Bobbio, carrying with them about 1000 wounded. From the lake district we learn that on Friday evening Garibaldi attacked and defeated the Austrians after a furious battle, which lasted from 5 to 8 o'clock, and entered Como at 10 o'clock the same night. The Austrians were completely routed, and fled in the direction of Monza. The town of Como was illuminated, and the inhabitants joined Garibaldi's standard. On Saturday morning the combat was renewed at Camerlata, and the Austrians again gave way and retreated towards San Mariano on the road to Milan closely pursued by Garibaldi. Accounts from Berne state that on Sunday Garibaldi suffered a defeat by a superior force of Austrians, and withdrew into the Canton of Tessin. This report has not been confirmed. On the other hand it appears that on Monday Garibaldi himself, or a strong detachment of his force, left Como and arrived before Laveno, a fortified town on the Lago Maggiore. He commenced an immediate attack upon the town, and maintained it during the whole night. On Tuesday morning his troops withdrew, but in the evening resumed the attack, which lasted the whole night. On the same day the Austrians attacked the Sardinian vanguard at Sesto-Calende. The fight lasted two hours and the Sardinian troops crossed the Ticino in pursuit of the Austrians. Accounts from Vienna state that on Wednesday the Austrian *corps d'armée*, under General D'Urban, cannonaded and took Varese, and that Garibaldi was obliged to retire into the mountains, with no road open to him but the Stelvio. The same accounts state that General D'Urban levied war contributions on Varese and reinstated the legal authorities. The latest accounts from Turin state that Garibaldi, so far from having been driven into the mountains, has surprised the Austrians at Varese and recaptured the town; and that he re-entered Como on Thursday evening at 11 o'clock. On Saturday morning the Austrian war-steamers on the Lago Maggiore kept up a three hours' cannonade upon the town of Canobbio, but without much effect. An insurrection has broken out in the Valteline. The population is repairing in masses to Sondrio, the centre of the revolutionary movement. The Austrian Gendarmes who have retired into Switzerland have been disarmed by the Swiss authorities and sent into the interior of the country. Advices from Florence state that Russia, Prussia, England, and Turkey, have not recognised the Provisional Government of Tuscany, and the representatives of those countries have withdrawn their flags. At Langiana, in Parma, the people have risen and pronounced for the King of Sardinia. General Ribotti, with Tuscan troops, military engineers, and gendarmes, entered Parma amidst the plaudits of the people, who declared for the King of Sardinia and Italian independence. The Duke of Parma has fled to Switzerland. The municipality of Venice has requested a reduction of the loan. The President and Vice-President of the Chamber of Commerce have resigned their official positions. On Friday a cannonade was directed from the Lido Forts against the French squadron. An English war steamer has arrived at Venice, and another has put into Ancona. The announcement of the Emperor of Austria's arrival at Pavia was premature, but his Majesty was daily expected. The King of Naples has, on his accession to the throne, published a proclamation, in which he enumerates the good qualities of his predecessor, but avoids making any engagements for the future, and abstains from pronouncing his opinion on the events now going forward in the Italian peninsula.

Turkey.—Letters from Constantinople of the 25th May state that the Grand Duke Constantine was expected there on the following day. The Sultan has held a review of 25,000 soldiers. The reserve will immediately be despatched to Roumelia. The Porte will send troops and ships to Albania. 2000 Servians, with artillery, have departed to reinforce the Montenegrins. Prince Milosch ignores this fact, but the attitude of the Servians inspires fear. The Porte is about to send four ships, four frigates, and two despatch boats to the Adriatic, under the command of Mehemed Pasha, who, in certain emergencies, will exercise his command under the orders of an English Admiral. The garrison of the fortress of Belgrade has been reinforced. Omar Pasha remains at Bagdad, being detained there in consequence of the threatening attitude of Persia.

Cape of Good Hope.—We have news from the Cape to April 21. The colonial Parliament was in session. The principal questions before it were the colonial marriage law, insolvent law, and Crown lands. Great depression existed among the Free State Boers in consequence of the refusal of the English Government to countenance Sir George Grey's scheme of South African federation. The first sod of the railway was turned by the Governor on the 31st of March. Mr. Pickering, the contractor, required 300 navvies from England.

United States.—Accounts from Washington state that 100,000 dollars of the debt due by the Chinese to American citizens had reached the Government. Additional intelligence from Utah announces that the differences between the governor and the judges were far from being settled. There is no foundation for a report that the President contemplates changes in the English and French missions. Official advices from Nicaragua state that Sir W. Gore Ouseley was actively engaged arranging the treaties. Mr. Smith O'Brien had arrived at Albany on his way to New York, and

was to leave that city on the 28th ult., by the Vigo steamer, for Ireland.

CANADA.—Both houses of the Canadian Legislature have invited the Queen to visit Canada. The following is an extract from their address:—

"We have long hoped that your Majesty would graciously be pleased to honour with your royal presence your Majesty's subjects in British North America, and to receive the personal tribute of our unwavering attachment to your will. And we trust that while your Majesty's presence would still more closely unite the bonds which attach this province to the empire, it would gratify your Majesty to witness the progress and prosperity of this part of your dominions. The completion in the year 1860 of the Victoria Bridge, the most gigantic work of modern days, would afford to your Majesty a fitting occasion to judge of the importance of your province of Canada, while it would assure to its inhabitants the opportunity of uniting in their expressions of attachment to the throne and to the empire. We therefore most humbly pray that your Majesty will vouchsafe to be present at the opening of the Victoria Bridge, with such members of your Majesty's august family as it may graciously please your Majesty to select to accompany you."

# Parliament.

## HOUSE OF LORDS.

TUESDAY.—*Opening of the New Parliament.*—The House met at 2 o'clock, when the Session was opened by Royal Commission with the customary formalities. The House of Commons having been summoned to hear the Commission read, the LORD CHANCELLOR signified to the House her Majesty's pleasure that they should forthwith proceed to the election of a Speaker. The swearing in of members then commenced, and lasted till 5 o'clock.

WEDNESDAY.—The Royal Assent to the election of Mr. Denison as Speaker of the House of Commons was signified by commission, with the usual formalities. The House then proceeded with the business of swearing in members.

THURSDAY.—The House did not sit to-day, being Ascension Day.

## HOUSE OF COMMONS.

TUESDAY.—*Election of Speaker.*—The new House on assembling to-day for their first time were summoned to the House of Peers, and on their return proceeded to elect a Speaker.—Colonel WILSON PATTEN moved that the Right Hon. John Evelyn Denison be re-elected Speaker. He referred to the difficulties which had surrounded that office when Mr Denison was first elected to it, and to the ability and energy with which he had surmounted them. He could, from his own experience, bear testimony to the admirable way in which Mr. Denison had disposed of the private business of the House, while his conduct in respect of its public business was manifest to all. He could also bear testimony, with all others who knew him, to the private virtues of Mr. Denison as an English gentleman.—Sir F. BARING seconded the motion. They were likely to have before them matters of peculiar excitement, and it was especially important that they should have in the chair a gentleman of honour and experience, who would mitigate by his courtesy any exercise of authority he might be called upon to interpose. Now that he had learned confidence in his powers, he had filled the chair in a manner which reflected credit on himself and on the House.—Mr. DENISON then rose and said that, great as he had thought the honour of being chosen as Speaker of the House when he was yet untried, he thought it a still greater honour to be elected now that he had been tried. He trusted that the honour and character of the House would be found in safe keeping in his hands. The right hon. gentleman was then escorted to the chair by his mover and seconder.—The CHANCELLOR of the EXCHEQUER congratulated the Speaker on his re-election, and said that he had on all occasions combined the purity of an English judge with the spirit of an English gentleman.—Lord PALMERSTON also offered his congratulations to the Speaker as having been elected to be chief of the noblest, most ancient, and most celebrated representative assembly in the world.—A short conversation ensued on the propriety of adjourning the House over the Derby day; but ultimately the CHANCELLOR of the EXCHEQUER pleaded the "public service," and the House adjourned to the next day.

WEDNESDAY.—The members of the House were summoned to the House of Peers, and upon their return the SPEAKER reported that her Majesty had been pleased to approve the choice which the House had made of him as Speaker, and that he had preferred, on behalf of the House, the claims customarily made, which had been granted in the fullest manner. He briefly again tendered his acknowledgments to the House. The swearing-in of members then commenced, and continued until 4 o'clock.

THURSDAY.—The SPEAKER took the chair at 2 o'clock, and the remainder of the afternoon was occupied with the swearing in of members.

# City Intelligence.

BANK RATE OF DISCOUNT.—The Bank of England on Thursday reduced their rate of discount from 4½ per cent., at which it had stood from May 5, to 3½ per cent.

ROYAL BRITISH BANK.—At the Court of Bankruptcy on Tuesday Mr. Linklater, solicitor for the assignees, announced that in consequence of the successful manner in which a pending Chancery suit has been arranged, the assignees are in a position to declare a further dividend of 1*s.* in the pound, and that by December of this year they expect to be able to pay a further dividend of 6*d.* in the pound, making a total dividend of 15*s.*

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 93 to 93½ for Money, and 92⅞ to 93⅛ for the 8th July; Bank Stock, 220 to 221½; Reduced and New Three per Cents., 92 to 92½; Scrip of New Indian Loan, 93⅜ to ¾; India Bonds, 5*s.* to 8*s.* dis.; Exchequer Bills, 17*s.* to 21*s.* prem.—FOREIGN: Brazilian Old Five per Cents., 100; Ditto Four and a Half per Cents., 1858, 91¼ ex div.; Buenos Ayres Deferred Bonds, 17¾; Belgian Four and a Half per Cents., 90; Dutch Two and a Half per Cents., 60¼; Ditto Four per Cent. Certificates, 93½; New Granada Active Bonds, 15⅝; Ditto Deferred Bonds, 4¾: Portuguese Three per Cents., 1853, for Acct., 42½ to 42; Spanish Three per Cents., for Acct., 41; Turkish Six per Cents., 1854, for Acct., 69⅛ to 69; Ditto 1858, for Acct., 57 to 57¼; Venezuela Five per Cents., 40 to 39.

# Metropolis and its Vicinity.

PRESENTATION OF THE FREEDOM OF THE CITY TO SIR JOHN LAWRENCE.—At a Special Court of Aldermen and Common Council held at Guildhall yesterday, the freedom of the City, contained in a gold box of elaborate workmanship, was presented to Sir John Lawrence, as a testimony of the high opinion entertained by the citizens of London of his distinguished services during the late rebellion in India.

CONSECRATION OF ALL SAINTS, MARGARET STREET.—The new church of All Saints was consecrated on Saturday in the presence of a large and influential congregation. The services were conducted by the Bishop of London, assisted by the Dean of Westminster, the Rev. Mr. Liddell, of St. Paul's, Knightsbridge, the Rev. F. L. Helmore, priest of the Chapel Royal, the Rev. W. Upton Richards, the incumbent, and the Rev. Messrs. Cassan, Christie, and Gutch, the curates of All Saints. The Bishop was attended by his chaplains and the Chancellor and Registrar of the diocese, Dr. Twiss and Dr. Shepherd; Mr. Gresley, of Boyne Hill, and others of the High Church clergy; and among the laity were the Earl of Carlisle, Lord Robert Cecil, Lord Lyttelton, and Mr. Beresford Hope. The ceremony of consecration was performed in the usual way, with perhaps a little more pomp than is usual on such occasions. The sermon was preached by the Bishop, who took his text from the First Epistle of St. Paul to the Corinthians, chapter viii., verse 9, "Take heed, lest by any means this liberty of yours become a stumbling-block to them that are weak." The Bishop began by remarking that St. Paul and his fellow Apostles in their teachings had many difficulties to contend with, from the circumstances and associations of the heathen and Jewish communities out of which they were forming the Church of Christ. The people of those days were wedded to their old superstitions and idolatries, and there was the greatest difficulty in enabling them to distinguish between truth and falsehood. But the Jews, when they were converted, were not required entirely to relinquish their old and peculiar associations. In later times the question had been raised how far it was lawful to maintain old forms and ceremonies in the celebration of Divine worship which were considered to be connected with dangerous doctrine. At the period of the Reformation such practices were cut down root and branch. There was at that time a stern unyielding spirit which had no regard for old associations. While, however, the Church of England did not acknowledge any other form than those of the Book of Common Prayer and Ritual, it had no desire rudely to shock the prejudices of any whose hearts might cling to ancient usages, although he believed that Christians of the present day would act wisely in yielding neither to longing for a more splendid ceremonial nor to a too stern zeal for simplicity of worship. The congregation well knew (said the Bishop) why he addressed them in such words as these. The building which they had met to consecrate had been, during the time of its erection, a sort of rallying point for two parties. It had been the practice of one to represent every point in the ornamental details as necessarily connected with unsound doctrine, while the other had spoken of church ornamentation as though the beautiful and expensive adornment itself would exercise a holier influence on wavering human souls. He appealed to all, as they would have to answer to God, to consider that the costly beauty of that house did not of itself either secure or endanger their Christian faith. It was a matter of total indifference. The church, as a place of worship, would be judged by the Most High, not by the good or bad taste of its adornment, but by the beauty, simplicity, and efficacious moral and spiritual force of that Christian teaching and worship which might be conducted within its walls. "God grant (said the right rev. prelate in conclusion) that those who are appointed to minister in this church may, through the inspiration of the Holy Ghost, so conduct their ministrations and so teach the Gospel of our Lord that such teachings may be based alone upon the doctrines contained in the Scriptures, and that in this enlightened age no Christian community may be bound by any fetters that are not of His own imposing." The sermon was listened to with profound attention, and at its conclusion the Bishop, assisted by the Rev. W. U. Richards, the Dean of Westminster, the Hon. and Rev. R. Liddell, and other clergymen, administered the Sacrament to between 400 and 500 communicants. There was also an evening service, at which the sermon was preached by the Hon. and Rev. Robert Liddell.

CONFIRMATIONS IN THE METROPOLIS.—The Bishop of London intends holding two special confirmations in the Metropolis, on Sundays, during the present summer, for the benefit of all young persons who are unable to attend to be confirmed on other days. The first of such confirmations will be held on Sunday afternoon, June 26, at St. Anne's, Soho, at 3 o'clock, and the second on Sunday afternoon, July 24, at Christ church, Newgate Street, at half-past 3 o'clock.

POLYTECHNIC INSTITUTION.—This well-known institution in Regent Street, which has done so much for the creation and encouragement of a taste for scientific pursuits, is announced for sale by auction in the present month of June.

CANCER HOSPITAL.—The ceremony of laying the foundation stone of the new Hospital for Cancer at Brompton, nearly opposite the Consumption Hospital, was performed on Monday afternoon by Miss Burdett Coutts, in the presence of a very numerous company, including the Bishop of London and a large number of medical men and clergymen of various denominations.

STATE OF THE THAMES.—The medical officer of health for the City of London states that the Thames has within the last few days become more offensive than last year. From London Bridge to the point below Blackwall the river is in so foul a state as to call for the immediate attention and interference of the Board of Works or the Conservators of the Thames.

THE POISONING CASE AT RICHMOND.—The adjourned inquest on Miss Isabella Bankes, who is supposed to have died from the effects of arsenic and antimony, administered to her in small doses by Dr. Thomas Smethurst, who has been committed by the magistrates of Richmond on the charge of having wilfully murdered her, was resumed on Tuesday at the Sessions Court, Richmond. Dr. Odling, of Guy's Hospital, Mr. Barwell, of Charing Cross Hospital, the landladies of the houses in which deceased had lodged, the parish clerk of Battersea, who was present at her marriage to the prisoner, the solicitor who was employed by the prisoner to make her will, and Miss Louisa Bankes, her sister, were examined. Their evidence showed that she died from the effects of irritant poison, that she was married in December last to the prisoner, who was then a married man, that she was entitled to the interest of 5000*l.* in the funds for life, and the entire disposal of a further sum of about 1800*l.*, the whole of which she left by her will to "her dear and beloved friend Thomas Smethurst, Doctor of Medicine," and made him sole executor. After some further evidence of a formal character the coroner summed up, recapitulating the chief points of the evidence, commenting upon the probabilities of the case, and drawing the attention of the jury to the fact that on Miss Bankes's death the prisoner would become possessed in law of all her personal property, and it would be for them to consider whether that would be a sufficient reason to induce them to believe that he cruelly murdered her for the sake of becoming possessed of her money. The jury after a short deliberation returned a verdict of "Wilful Murder" against Dr. Thomas Smethurst.

THE LATE FIRE AND EXPLOSION IN LIME STREET.—Mr. Serjeant Payne, the coroner for London and Southwark, held an inquest on Friday to investigate the circumstances attending the late fatal fire in the premises of the Messrs. Hubbuck, wholesale oil and colourmen, in Lime Street. After hearing the evidence of numerous witnesses, who were examined by the City Solicitor on behalf of the Corporation, the jury returned a verdict that the fire was the result of accident, but that the quantity of inflammable materials kept on the premises of Messrs. Hubbuck was excessively and highly dangerous to life and property in the neighbourhood, and that such a trade ought not to be carried on in a populous locality like the city of London.

THE LATE ACCIDENT AT WESTMINSTER.—The adjourned inquest on the seven men killed by the fall of the scaffold at the Westminster Palace Hotel was resumed on Thursday, and after the examination of numerous witnesses was again adjourned for a week.

EXTENSIVE DEFALCATIONS IN ISLINGTON.—At the Clerkenwell Police Court on Monday William Wellington Turner, aged 45, residing at 4, Canonbury Villas, Highbury, was committed for trial by Mr. Corrie, for having, as one of the tax collectors of St. Mary's Islington, within the last six months feloniously embezzled 700*l.* and upwards, received by him on account of the vestry of the parish. It was stated during the inquiry that this was not the only amount which the prisoner had embezzled. A warrant was also issued against Mr. Ebenezer Ward, of Alwyne Road, Canonbury, also a tax-collector in Islington, for embezzling about 800*l.*, belonging to the parish. He was accordingly arrested and examined on Wednesday, when the case was remanded for a week, the magistrate consenting to take bail, the prisoner in 1000*l.* and two others in 500*l.* each.

THE PUBLIC HEALTH.—The weekly return of the Registrar-General states that the deaths registered in

the metropolis in the week that ended Saturday, May 28, were 1028. In the corresponding week of the 10 years 1849-58 the average number was 1017; which, if raised in proportion to the increase of population will become 1118. The present return is therefore 90 below the average. During the week the births of 966 boys and 916 girls, in all 1882 children, were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1549.

## Provincial.

BIRKENHEAD.—The question of providing a cemetery for this town has been lately under agitation, and considerable dissension on the subject has prevailed, one party headed by Mr. John Laird, chairman of the Improvement Commissioners, being in favour of placing the management of the burial boards in the hands of the commissioners, while others, who comprise a great portion of the Roman Catholic inhabitants, wish it to be under the control of an independent body. The polling on the question commenced on Monday, and was resumed on Tuesday with great spirit. Considerable excitement prevailed, from 3000 to 4000 people, consisting principally of dock labourers, having congregated in front of the Town Hall, and fears were entertained that a breach of the peace would ensue. The shops in the locality were closed and business suspended. At 10 o'clock about 1000 navvies, armed with heavy bludgeons, marched in several bodies to the front of the Town Hall, shouting and yelling in a furious manner, to show their disapproval of Mr. Laird's proposition. The police however succeeded in maintaining tranquillity. Several gentlemen also used every exertion to prevent an outbreak, and ultimately succeeded in disarming the mob of their cudgels. At one time the state of things was so alarming that a company of marines from her Majesty's ship Liffey were marched through some of the streets with bayonets pointed, which had the effect of dispersing a large number of persons who seemed riotously disposed. At 1 o'clock there was a majority in favour of Mr. Laird's motion of 650, when the other party withdrew from the contest and endeavoured to pacify the crowd. The demonstration seems to have been specially directed against Mr. Laird, the rioters having smashed the windows at that gentleman's works, where some fighting took place between them and the workmen. The presence of the marines had some effect in keeping the roughs in order during the day, but as evening approached serious apprehensions of an outbreak were entertained. The night however passed off quietly; a detachment of the Kerry Militia, which had been brought from Chester by rail, having had the effect of cooling the ardour of the rioters. On Wednesday five men were brought before the magistrates charged with being concerned in the riots. One of them was committed for trial, and the others were liberated on giving bail to be of good behaviour for two months.

BIRMINGHAM.—On Tuesday evening a dinner was given in the Town Hall to Messrs. Bright and Scholefield by the non-electors of this borough. It was purely a working man's entertainment—a cold collation; the tickets were 2*s.* 6*d.* each, and from 650 to 700 were present, the centre table in the hall being occupied by persons "who abstained from alcoholic drinks." Mr. Bright addressed the meeting at great length on the subject of Parliamentary Reform and on the neutrality of England in the present war. He condemned the volunteer corps and other measures now in progress for increasing the national defences, and dwelt at some length on the "inutility" of the yeomanry and militia, asserting that the former had only distinguished themselves at the Manchester massacre, and that "it was a point in dispute whether militia was not a great nuisance, inasmuch as, though it was intended to induce men to enlist, it was found that it made enlistment more difficult." He concluded by saying:—

"He would not go into the question as to what should be done next week with that great public malefactor (as many persons deemed him), the head of the present Administration. With regard to the question of Parliamentary reform, he would have nothing to do with it beyond that which every member of Parliament must have to do with questions as they rose. He would have nothing to do nor any special connection with the support of any Government which was disposed to play false with the people on this great question. He was now, not less than he was five years ago, in favour of peace between this country and the other nations of the earth. With all their friendships, commerce, and communications they might feel and give their sympathy to sufferers everywhere. He felt that they were met in evil times, but let them hope for better days, when the clouds of war had passed away, and when they whom he was now addressing as non-electors might have their names enrolled on the list of the town. If they hoped for better days, let them honestly, fervently, and disinterestedly work for them, and they might trust that Heaven at last would grant them."

LEDBURY.—The magistrates on Thursday resumed the examination of John Isaac Jones, the clerk in the office of Mr. Masefield, who had been apprehended on suspicion of being the murderer of Mrs. Baker. The evidence adduced, including the results of an investigation made by a detective officer of the Metropolitan police, confirmed the belief that there were good grounds for the apprehension of the prisoner, who was identified by the master of the Birmingham workhouse as having been an inmate of that workhouse from November 1855 to August 1856, as a destitute person belonging to America. The inquiry was resumed yesterday, when the magistrates after hearing some more evidence in corroboration of facts already proved, committed the prisoner to take his trial at the next assizes on the charge of Wilful Murder.

HAREWOOD.—A young woman called Sarah Barrett, daughter of Mr. Stephen Barrett, farmer, of Weardley, has been committed for trial on the verdict of a coroner's jury, for the wilful murder of her illegitimate infant child by drowning it in a stream in the high wood at Harewood, the seat of the Earl of Harewood. The evidence showed that she had been confined at Leeds on the 6th inst., and that the child was alive and well when she left Leeds to return home, but was not with her when she arrived at her father's house. An inquiry having been instituted by the police, the prisoner took her brother to the stream and there pointed out a bundle containing the body of the child, stating that it was dead when she put it into the water. The medical evidence, however, left no doubt that death was caused by drowning. After this evidence the jury returned a verdict of Wilful Murder; and the coroner made out a warrant for her committal. The prisoner, however, still lies in a precarious condition at her father's house.

LEEDS.—A warrant has been issued by the borough magistrates for the apprehension of Mr. George Terry, tinner, the Grand Master of the Grand United Order of Oddfellows. He is reported to have absconded, and his defalcations are said to amount to no less than 4000*l.* The money appears to have passed through his hands partly in his official character, but chiefly in connection with a loan society belonging to the same order of Oddfellows.

MILFORD.—A number of gentlemen connected with the railway and shipping interests of South Wales and Ireland visited this town on Saturday for the purpose of inspecting the capabilities of the harbour, and inaugurating the new steam-ship lines projected from the port to Cork, Galway, Lisbon, and the Brazils. A public dinner afterwards took place, Mr. Lever, M.P., in the chair, at which Mr. Roebuck, M.P., in returning thanks for the House of Commons, made the following remarks on the state of parties:—

"We shall be called upon about the 7th of next month to decide whether or not the English Parliament will put faith in the present Government or that which is looming in the future? We have to choose whether we shall have Lord Palmerston or Lord Derby for Prime Minister. When that choice is made, I shall be in the camp of the people of England, and that camp I sincerely believe to be opposed to Lord Palmerston. It is a miserable contingency; it is like the war in Italy—whichever side is uppermost mischief must come. But the least mischief may come from not changing the Administration, and, I believe that we shall succeed in preventing that change. I know that there has been a combination, I know that Cambridge House has gone down to Pembroke Lodge, and that the ladies have met. I know that peace has been made, but England has been forgotten. The only consideration which is regarded is that of the parties themselves, but as an independent member my consideration is England, and for England's sake—I say for God's sake—don't choose Lord Palmerston. I know well what I shall encounter by saying this. I know perfectly well there is no party so admirable in the use of calumny as the Whig party, and everything that calumny can devise, or that lying can supply, will be adopted by that party. Lord John Russell has in time past so far demeaned himself as to take advice from me, but upon the present occasion he has carefully abstained from that course, and not one word have I heard either from him or his followers of the new compact made at Cambridge House. I have found that Lord Palmerston is false and hollow, and as to his being a Liberal, I am convinced that the great enemy of the Liberal party is now to be found in Lord Palmerston, and upon that ground I will oppose him. I was told by very high authority, before I left London, that Lord John Russell and Lord Palmerston had made up their difference, that Lord Palmerston was to be Prime Minister, and that Lord John Russell was to serve under him. In the present condition of things I think that would be a great mischief. Lord Palmerston's appearance as First Minister of the Crown would be throughout the whole continent a torch of war. War I object to, and I believe that England cannot gain by going to war with any Power on the continent. Our great interest is peace. Let others tear themselves to pieces; let France and Austria fight as long as they please; but England should look on quietly if they wish to destroy themselves, and should only be opposed to any Power which may be thoroughly victorious."

NORTHALLERTON.—A case of considerable interest, relating to the abduction of a voter from this borough, was heard last week by adjournment at Richmond. Mr. Wrightson, the Liberal candidate, was returned at the late election at Northallerton by a majority of two votes only, the unsuccessful and Conservative candidate being Mr. Mills, of London. The abducted voter, who intended to have polled for Mr. Wrightson, is Mr. William Tutin, the occupier of a farm within the limits of the borough. Three of the five persons who were charged with the abduction are respectable farmers living in the neighbourhood. The names of the defendants are Jeremiah Dobson, Richard Oastler, James Pearson, George Dixon, and Isaac Walker, the latter being the driver of the carriage in which Mr. Tutin was removed. It appeared from the evidence that on the day of nomination he went to the house of the defendant Dixon, where some whisky and water were mixed by the defendant Pearson for him, and from 7 in the evening of that day he was utterly insensible, and did not wake until about 7 on the following morning, at Reeth, 30 miles distant. The defendants Oastler and Dobson were the parties who conveyed Mr. Tutin while insensible in a carriage from Northallerton to Reeth, and the carriage was driven by the defendant Walker, who is in the employ of the keeper of the Golden Lion Inn at Northallerton. The carriages were changed at Catterick Bridge at 12 o'clock at night. After some further evidence the case against Pearson, Dixon, and Walker was dismissed, and the defendants Dobson and Oastler were held to bail to appear at the next York Assizes—themselves in the sum of 100*l.* each, and two sureties each of 50*l.*

OLDBURY.—A shocking affair, exceeding in its painful character that which recently occurred at West Bromwich, took place on Tuesday morning in this town in a street called Furnace Row. This street is situate in a back part of the town, and in about the centre house of the row lives a miner of good character, named William Foster. He has been married many years, and his family consisted of two daughters, Eliza, aged 16; Susannah, 8; and a fine boy, John, 10 years old. Two or three months ago an elder daughter died, after a severe illness. From this time the wife, 41 years of age, and a woman of most kindly disposition, has been in a low, desponding way, not seeming at times to know what she was about. Still matters went on in the usual way, and not the least suspicion existed that the woman's mind was affected by grieving for her lost daughter. After the family had retired to rest on Monday night, the father was aroused from his sleep by hearing his little girl call out that her mother was "cutting Johnny's throat!" Simultaneously Foster and his eldest daughter sprang out of their beds. The latter seized her mother's hand, containing a razor, covered with blood, and the father was horror-stricken at seeing that his wife had cut the throat of little Johnny, nearly severing the head from the body. In two minutes the poor boy was a corpse. The wife finding that her daughter persisted in holding down the hand which still firmly grasped the razor, with desperate energy drew her hand away, and the razor, coming in contact with the fingers of her daughter, nearly cut off either two or three of them. Foster at this time lost apparently all self-possession. He ran down stairs, could not open the front door to give the alarm, but forced it open with the poker, and some neighbours whom he aroused, having returned with him to the house, beheld Mrs. Foster descending the stairs, blood streaming from a large wound in her throat. Her husband then took her in his arms, and for three hours supported her in this way. Two surgeons attended as soon as possible, and sewed up the wound in her throat, but it is said that there is no hope of her recovery.

PEMBROKE.—The defence of the arsenal at Pembroke and the protection of Milford Haven are engaging the attention of the authorities, for engineers have been surveying ground for some time past, and new works for the better fortification of these important posts are to be immediately commenced. Two commanding points have been selected, and solid works are to be erected upon Popton Point, and upon ground contiguous to Conjuick. The Great Head, commanding the entrance to the Haven, is also to be fortified.

PORTSMOUTH.—A dreadful explosion occurred between 2 and 3 o'clock yesterday morning on board the ship Eastern Monarch, which had just arrived at Spithead from Bombay, with 11 officers, 3 ladies, 450 invalided soldiers, women and children on board. The ship belonged to Messrs. Soames of Blackwall, and was a first-class ship, nearly 2000 tons burthen. In about an hour and a half after she anchored at Spithead, a fire was discovered among the cargo, in the main hold, evidently the result of spontaneous combustion, and, notwithstanding the efforts of the crew and troops to prevent it extending, the flames spread throughout the ship with astounding rapidity. Captain Morris, the master, had rockets fired, and other signals of distress to attract the attention of the ships of war in the harbour, and numbers of boats put off to the burning ship. With difficulty Captain Morris succeeded in getting the invalid soldiers and the women and children into the ship boats, and they were taken on board the nearest ships. At 4 A.M. all had left the ship, excepting five or six of the crew, and a Cowes pilot, who are supposed to have perished in the hold in an attempt to get at some of the cargo. By that hour all hopes of saving the vessel were at an end. She was on fire in every part, and her total destruction was inevitable. At 6.30, her Majesty's steamer Falcon commenced firing into the stern of the burning ship to sink her. She was then completely in flames, both fore and aft, and her masts had fallen overboard. Her loss is calculated at nearly 80,000*l.*

RAMSGATE.—Some additional particulars have been brought to light in reference to the mysterious death at Ramsgate, which may assist the public in coming to a conclusion on the question of murder or suicide. The identity of the deceased has been satisfactorily ascertained. It appears that during the inquiry before the coroner the police had succeeded in tracing him up to the point of his landing at Southampton on the 31st March, by the Bremen from New York. On the termination of the inquest the superintendent of the Ramsgate police wrote to the police authorities of New York, conveying to them all the known particulars of the case, and requesting them to ascertain if possible the identity of deceased, and the circumstances under which he left America. On Saturday a reply was received to the effect that deceased was a German named Frederick Mattern, and was known in New York, where he has two brothers living. Their names are Jacob and Henry Mattern, and they are not in very good circumstances. The deceased, Frederick Mattern, arrived in New York from Germany about two years ago, and while there worked as a butcher. One day, about 14 months ago, he was cutting meat for sausages by a machine, when his hand became entangled in the machine and the joints of the fore and second fingers were cut off. This was the mutilation which he appeared anxious to conceal during his stay in England. On the 16th March last he purchased a ticket at New York to go by the steamship Bremen to Southampton, and sailed in her on the 19th of the same month. Prior to his departure he made it known that he intended to return to Germany. He is supposed to have had in his possession on leaving

America from 160 to 250 dollars. His father and mother, Jacob and Catharine Mattern, reside at "Wolfstein Rheinfels, Bayer, Germany." He is described as a person of reserved manners, but not hypochondriacal nor subject to aberration of mind. From the above facts it would appear that the paper found near the deceased, signed, as deciphered at the inquest, "Heinrich Matterigh," and announcing the transmission of five dollars to the mother of the writer, was written not by deceased, but by his brother. While the body was lying in the Pier Storehouse one of the spectators who visited it inquired whether either of the persons in whose company deceased had been seen on the day preceding the murder was a butcher. The inquiry was founded on the circumstance of the wrist having been divided at the joint, and also of there being but one stab in the body, leading direct to the heart. It was asserted, however, that in a case of murder the assassin, even if acquainted with anatomy, can rarely take his aim with such calmness and certainty that one stab is sufficient to effect his object. The supposition that this was a case of self-mutilation and suicide is strengthened by the circumstance of the deceased having been a butcher. No information has yet been obtained to show a motive for suicide, but it is considered not improbable that he had lost a large proportion of his money either by gambling or in some other way after his arrival in London, and that he thenceforth resolved to destroy himself, and at the same time to remove the mutilated hand which would serve for his identification. His object in concealing his identity may probably have been to spare the feelings of his parents.

YARMOUTH.—Two Russian frigates passed this port one day last week, holding a course at some distance from the shore. The frigates were heavily armed, and were going southwards.

## Ireland.

THE O'CONNELL FAMILY.—A final meeting of the committee formed for the purpose of collecting a fund for the family of the late Mr. John O'Connell was held on Monday, Mr. J. D. Fitzgerald, M.P., presiding. It was announced that the subscriptions amounted to the gross sum of 5100*l.*, which was to be invested in trustees for the benefit of the widow and children of the favourite son of Daniel O'Connell.

GOVERNMENT PATRONAGE.—Two important offices have just been placed at the disposal of Government—the first, the chairmanship of the sessions of the county Clare, void by the death of Mr. William Major, Q.C.; the second the Solicitorship to the Board of Excise, vacant by the retirement, after many years' service, of Mr. Mark Anthony Saurin, a son of the late Right Hon. William Saurin. Mr. John George Smyly, Q.C., Crown Prosecutor for the North-West Circuit, has been appointed Solicitor to the Excise, and Mr. Henn, Q.C., has been appointed to the vacant chairmanship, but it is understood that the following changes will be made:—Mr. O'Shaughnessy is to be moved from Mayo to Clare, Sir Colman O'Loghlen from Carlow to Mayo, and the new chairman is to get the latter county. Mr. Henn, it may be recollected, published an address to the electors of the county Clare, where he is a large landed proprietor, offering his services as a supporter of the Derby Government. Sir Colman O'Loghlen and Mr. O'Shaughnessy are members of the Roman Catholic Church, and both Liberals of the Whig school. Mr. F. Macdonogh, Q.C., is to be Counsel to the Excise, vice Smyly, appointed solicitor to the Board, and Mr. John Edward Walsh, Q.C., succeeds Mr. Smyly as Commission Crown Prosecutor. It is also stated that Mr. Scriven, Registrar of Judgments in Chancery, is about to retire, and that Mr. Adair, private secretary of Chancellor Napier, is to be his successor. A meeting of the Incorporated Society of Solicitors and Attorneys has been called, to "take into consideration the recent appointment of other than attorneys and solicitors to offices which should properly be filled by members of their profession."

MURDER AND SUICIDE AT GALWAY.—The public have been startled by the intelligence of a dreadful murder perpetrated on Tuesday near the village of Ballinamore, in the county of Galway. The principal actor in this tragedy was Captain R. Thomas Ffrench, a son of the Hon. Martin Ffrench, stipendiary magistrate, and grandson of the late Lord Ffrench, the failure of whose bank and subsequent suicide are fresh in the memory of the Irish public. Captain Ffrench has laboured under an aberration of mind for the last two years, and attempted to take the life of a policeman about a year and a half ago. He has however recently married and arrangements had been made for his occupation of the family house at St. Brandon's, which up to the present time has been occupied by Mr. Richard Burke, who had been residing in it as land agent to the Hon. Martin Ffrench. On Tuesday morning Captain Ffrench arrived at Ballinamore Park, the seat of his father, as early as 4 o'clock, and immediately proceeded to St. Brandon's to awake Mr. Burke, who accompanied him back. They were together during the day, and both having subsequently disappeared some apprehension was excited. About 4 o'clock in the afternoon the friends of Mr. Burke began to make inquiries, and in a short time his dead body was found, pierced by two pistol bullets, in a plantation at Ballinamore. Captain Ffrench was found dead in the woods of Clonbrook. There is no doubt that Captain Ffrench while labouring under a fit of insanity murdered Mr. Burke and afterwards committed suicide. The verdict of the jury in the case of Mr. Burke was, that that gentleman met his death by pistol-shot wounds; that there was no direct evidence as to the person by whom they were inflicted, but that the last person seen in his company was Captain Ffrench, who had been at a certain period afflicted with insanity of a type likely to recur. In the case of Captain Ffrench the jury found that he met his death from a pistol-shot wound, inflicted by himself while labouring under temporary insanity. Mr. Burke was a gentleman of high character in the county, and discharged the office of Deputy Sheriff at the late contested election for Galway. He has left a wife and two children. Captain Ffrench was also a young gentleman of amiable disposition, and was very popular among the people of the district.

## Scotland.

THE CRINAN CANAL.—The Commissioners have decided that this canal shall be restored to its former condition; and, accordingly, active measures are in progress for carrying out the *débris* as a preliminary step. Some 50 or 60 men have for some time been engaged in making up the breaches at the west end of the summit level; and a ship is daily expected with waggons, rails, and other material for a temporary way, when a large force will be set on the work.

## Law.

COURT OF QUEEN'S BENCH.—(Sittings in Banco, before Lord Campbell, and Justices Wightman, Erle, and Crompton.)—*The Queen* v. *the Rev. William Walter Roberts.*—Mr. Serjeant Shee said in this case he had to move the Court to order the discharge from custody of the Rev. Mr. Roberts, who had been arrested and kept in custody ever since the day when this matter was last before the Court. Mr. Roberts had not entered into recognisances, but others had complied with the directions of the Court; and he had an affidavit from Mrs. Bonner, mistress of the school, stating that she had that morning left the child Mary Ann M'Donnell with her father. He had also an affidavit from the Rev. Mr. Roberts himself, declaring that the return made by him to the writ of *habeas corpus*, directing him to bring up the body of Mary Anne M'Donnell, was true in every particular, and was meant as a denial, and not intended as an evasion of the allegation that the said child was "detained" by him or was within his custody; that the language was not used in any equivocal sense; but that he positively denied that the child was in his power, either at the time of the issue of the writ or at the time of the return to it; that at the same time he did not think it was his duty after he had last seen the child to take any active steps to procure her delivery to her father; but that, on the contrary, he felt conscientious objections to voluntarily seeking for information as to the whereabouts of the daughter; that up to Thursday last he did not know the place where the child was; and, therefore, that it was impossible for him to have produced the child on that day. The result was that the child had been restored to her father, in obedience to the judgment of the Court, and therefore he thought the matter might now be considered as at an end. Lord Campbell: Let it be so. Mr. Lush: I hope, my lord, I may be permitted to say, on behalf of the parties on the other side, that we had no notice of this application until last night, and that we had prepared interrogatories to be laid before the defendant to-morrow morning. Lord Campbell: Of course, if doubts are entertained as to the facts put forward by my brother Shee, the Court will allow time for further investigation; but if there are no such doubts, and the child has now been restored to her father, I think we shall be justified in allowing Mr. Roberts to be discharged from custody, and in considering the matter as concluded. Mr. Serjeant Shee: There are no doubts whatever, my lord. Lord Campbell: But, brother Shee, notwithstanding what Mr. Roberts has now said, I must declare that any reasonable person reading his return would consider his words equivocal and even prevaricating. However, Mr. Roberts has now done what might be expected as due from a gentleman of education and right feeling, availing himself of the *locus pœnitentiæ* opened to him by the Court. At the same time it must be known that the writ of *habeas corpus* is sacred and must not be tampered with, and that the Court will inflict condign punishment upon any one trying to evade a law intended for the protection of the liberty of the subject as well as for the exercise of the parental authority. Mr. Lush: The father of the child is a very poor man, and he has been put to a very considerable expense in consequence of these proceedings. Surely then he ought to be entitled to his costs. Mr. Justice Crompton: Certainly a party in contempt ought to pay all consequent costs. Lord Campbell: I think the payment of all the costs incurred would be a very reasonable condition to attach to Mr. Roberts's immediate discharge. Mr. Justice Wightman: Undoubtedly Mr. Roberts might have purged himself of this contempt, but as at present he is in contempt it is reasonable he should pay the costs on the condition of his discharge. Mr. Justice Crompton: It is a matter of course that when a party has made an evasive return to a writ of *habeas corpus* he should be made to bear all the expense of the proceedings. The order for the discharge of Mr. Roberts was accordingly made, subject to the payment of all the costs from the time of the issuing of the writ of *habeas corpus*. [The costs of the prosecution have since been taxed at 52*l.* 18*s.* 3*d.*, which the defendant has been called upon to pay. The child was restored to her father on Monday afternoon, having been staying at Brompton from the 5th of April till the 30th May, and she is now under the care of her father at Pimlico.]

COURT OF COMMON PLEAS.—(Sittings in Banco, before Chief Justice Cockburn, and Justices Williams, Willes, and Byles.)—*The Earl of Shrewsbury* v. *Scott and others.*—*The Great Shrewsbury Case.*—This was an action brought by the Earl of Shrewsbury to recover possession of Alton Towers, together with extensive estates held by the late earl. The plaintiff claimed them under a private Act of Parliament, the 6th Geo. I., c. 29, and a deed of settlement; and the defendants, who are executors of the late earl, claimed them under his will for the infant son of the Duke of Norfolk, to whom that instrument purported to devise them. The case came on for trial before Lord Chief Justice Cockburn, when, after some evidence had been given, it was arranged that a verdict should be entered for the plaintiff, subject to the opinion of the full Court upon certain questions of law. Accordingly a rule was subsequently obtained to enter a verdict for the defendants, and cause was now shown against this rule being made absolute. The Attorney-General opened the arguments on Tuesday and described at great length the details of the family arrangements and the operations of the act of Parliament, contending that the late earl had no power to cut off the entail or bequeath the estates which belong by law to the possessor of the title. His address occupied the whole of Tuesday and part of Wednesday, when Mr. Rolt, Q.C., addressed the Court on the same side. He did not conclude his arguments until Thursday, when Mr. Manisty followed on the same side. The arguments were resumed yesterday, and Sir R. Bethell will open the case for the defendants on Monday.

BAIL COURT.—*The Conspiracy at Ashburnham.* On Friday *Thomas Higgens* and *George Davis* were tried on an indictment which had been removed by *certiorari* from the Central Criminal Court, charging them with conspiring to defraud Charles Grüneberg, the German horticulturist and nurseryman of Asburnham Nursery, King's Road, Chelsea, of his goods, chattels, bills of exchange, and promissory notes. The details of the case were fully noticed at the time. It appeared from the evidence of the prosecutor that he commenced business at Ashburnham Park, King's Road, Chelsea, in June, 1858, having undertaken some buildings and improvements in the grounds, soon discovered that he required additional capital. Under these circumstances he was introduced by Mr. [illegible] of Cremorne Gardens, to the defendant, Thomas Higgens, who represented that he could obtain the capital required. He having been induced to accept bills for various small amounts for which he had great difficulty in obtaining money except only in small instalments, he was persuaded by the defendant to sign two bills of sale for the purpose of raising 200*l.* for the purpose of paying off a builder who had put an execution into the house for work done in the nursery. A few days afterwards his suspicions were excited by the money not being forthcoming, and he demanded back the papers he had signed. Davis, who is a Jew, abused him, and said that before 8 o'clock that night neither he nor his wife should have a bed to lie upon. It appeared that Higgens had registered the bill of sale, and two days after the transaction of Davis Higgens went to the prosecutor's house when he and his wife were both absent, procured admission by asking the servant to allow him to write a letter, and then introduced eight men, who in two hours stripped the house of every article except the servant's box. The goods were removed to Higgens's house, and were there seized for rent and partly sold at Oxenham's auction rooms, yielding about 35*l.*, and leaving the unsold portion of the value of about 15*l.* On the first night after the furniture was taken away prosecutor and his wife had to sleep on bare boards, and was now only the manager of the business instead of being the master himself. In the course of examination, the prosecutor said he had been in the service of Messrs. Paul & Sons, nurserymen, and left it six years ago. He had since been in the employment of his brother-in-law, Mr. Weekes, receiving 2*l.* a week wages, vegetables, fruit, and other advantages. He had saved some money and received about 300*l.* on his father's death, five years ago, which formed the capital on which he had commenced. Three schedules from the Insolvent Debtors' Court were produced, from which it appeared that Higgens had been insolvent twice and had compounded once. Higgens filed a schedule in 1856 and another in 1857, describing himself as a house and estate agent, and proprietor of the *Kensington and Chelsea Weekly Journal*, and furnishing ironmonger carrying on business on Ludgate Hill and as a general commission agent. Davis filed his schedule in April, 1856, and was discharged in June, 1856, having been in prison since the February preceding. He described himself as agent for the Mount Carbon Coal Company, as agent for the Sacramento Gold and Quicksilver Mining Company, as promoter of the Sydney and Melbourne Railway Company, as promoter of the Metropolitan Light Company, as a stock, share, and general dealer, as a lodging-house keeper, and also as using the name of George Denham. The defence was that the bill of sale was given to secure Higgens from loss, by reason of the liability he incurred in accepting bills. The jury immediately returned a verdict of *Guilty*. The defendants were called, but did not answer. Mr. Justice Hill passed sentence in their absence—to be imprisoned and kept at hard labour for six calendar months.

## Sporting.

### EPSOM MEETING.

TUESDAY.—The *Craven Stakes.* Mr. Crawfurd's Zuyder Zee beat Gladiolus, Southampton, and 5 others.—*Sweeps.* Mr. Thompson's Brown Holland beat Orchehill, Griffin, and 3 others.—The *Woodcote Stakes.* Baron Rothschild's Restless beat Lupullus, Rupee, and 8 others.—The *Rous Stakes* (handicap). Captain Gray's Duneany beat Accurate, Pensive, and 5 others.—The *Horton Stakes.* Mr. Blanton's Gin beat Bellona, Mr. Barrett's colt, and 3 others.—The *Heathcote Plate.* Captain Christie's Orchehill beat Emily, Theodora, and 11 others.

WEDNESDAY.—The *Bentinck Plate.* Captain Christie's Orchehill beat Knayton, Confectioner, and 7 others.—The *Derby Stakes.* Sir J. Hawley's Musjid beat Ticket-of-Leave, Trumpeter, Promised Land, and 26 others. Betting at starting: 2 to 1 agst Musjid, 3 to 1 agst Promised Land, 7 to 2 agst Trumpeter, 12 to 1 agst Balnamoon, 14 to 1 agst Newcastle, 20 to 1 agst Ticket-of-Leave. The formalities of walking and cantering past the Stand were gone through soon after the appointed time. Much delay, however, took place, owing to the breaking away of certain horses and the disinclination of others to go to the post. Expectation was soon gratified, for when Mr. Hibburd got the horses together in a pretty tolerable line he dropped his flag. Electric and Lord of the Manor were the first to show in advance, but on going up the hill Gladiolus and Lord of the Manor were seen leading the way, with Promised Land, Nimrod, Reynard, Volcano, and Phantom next. In the extreme rear were Schuloff, Trumpeter, and Polonius. They ran with little alteration to the top of the hill, where Promised Land showed in advance, with Nimrod, Reynard, and Volcano next; Trumpeter, who had been lying in the rear, then coming up. Promised Land went on with the running down Tattenham Corner, with Volcano, Musjid, Trumpeter, Marionette, and Ticket-of-Leave in close pursuit. On entering the straight some crowding and confusion occurred, for Volcano was knocked right out of his stride, and Musjid with him. The lot was soon righted, and Promised Land waited upon to about the half distance. Then he came out and won by half a length; a neck between second and third, and the same between the third and fourth. Marionette was fifth, Defender sixth, Newcastle seventh, Gamester eighth, Gladiolus and Sir Hercules next. The last lot comprised Schuloff, Electric, Lovett, Lord of the Manor, Nimrod, and Balnamoon. Sir Joseph Hawley and Wells, winning this race have been fortunate, the former in having the winner of a Derby two years in succession, and the latter in being able to ride it. Wells, who met with a fearful accident at Chester, was quite recovered from his hurts. [illegible] Manning, who comes of a racing family, and who is the youngest brother of the clerk of the scales, has had a share of fortune which rarely befalls any trainer. He has had Sir Joseph Hawley's horses under his care barely three years, and during that time he has won two Derbys and some of the principal weight-for-age races. The "ring" are of course the chief losers by the result of the race.—The *Epsom Two Year Old Plate.* Mr. Towsey's Stapleton beat Lord Berkeley, Naughty Boy, and 8 others.—The *Epsom Cup.* Mr F. Higgins's Fisherman beat North Lincoln and Archduchess.—The *Barsh Stakes.* Mr. J. Bird's Simple Simon beat Fusee, Lady Bird, and 4 others.

THURSDAY.—The *Walton Stakes.* Mr. Payne's colt beat Dutiful Dick, Balloon, and 4 others.—The *Two-Year-Old Stakes.* Mr. Wyatt's Nutbourne beat Maid of Orleans, Emily, and 3 others.—The *Grand Stand Plate.* Mr. B. Land's Ascot beat Flatcatcher, Beauty, Tiney, and 10 others.—*Sweeps.* Sir J. Hawley's Musjid beat Nelson beat Zuyder Zee, Caucasian, and 18 others.—The *Queen's Majesty's Plate.* Mr. R. Ten-Broeck's Prioress beat Archduchess

...hie, and 3 others.—The *Epsom Four-Year-Old Stakes.* Mr. Merrifield's Charles the Second walked over.

Friday.—(By Electric Telegraph).—The *Oaks.* Summerside beat Mayonnaise and 13 others. *Dardans Stakes.*—Pan beat Sedbury, Odd Fellow, and 5 others.

# Obituary.

The Duchess Dowager of Hamilton died on Friday at her residence in Portman Square, after a lengthened illness. She was the second daughter of the late Mr. William Beckford, of Fonthill Abbey, by the sister of the ninth Marquis of Huntly, who died in her confinement. She was born at the Castle of La Tour, in Switzerland, in 1786, and married in 1810 the 10th Duke of Hamilton.

Sir Robert Barclay, Bart., of Pierson, died at Dungannon on the 16th ult., aged 39. He was the son of Robert Brydges Barclay, Esq., by the only daughter of Arthur Williams, Esq. He was born at Dungannon in 1819, and succeeded his grandfather, the eighth baronet, in 1839. He was formerly in the army, and was for some time lieutenant of the 25th Regiment. In 1855 he was appointed 2d lieutenant of the Lancashire Artillery Militia. He has died unmarried, and is succeeded in the title by his brother.

General Sir James Law Lushington, G.C.B., died on the 29th ult., at his residence in Dorset Square. He was the son of the Rev. James Stephen Lushington, Vicar of Newcastle-upon-Tyne, and Prebendary of Carlisle, and brother to the Right Hon. Stephen Rumbold Lushington, who was for many years chairman of "Ways and Means" in the House of Commons, and subsequently Governor of Madras. He was born at Bottesham, Cambridgeshire, in 1779. He was in the military service of the East India Company as Colonel of the 8th Madras Light Cavalry, and was made a general in the army in 1854. He was elected a director of the East India Company in 1837, and was deputy chairman in 1836-7, and chairman in 1838-9. He represented Petersfield, Hastings, and Carlisle at various times in the House of Commons.

The Right Rev. Dr. Ollifre, Roman Catholic Bishop of Calcutta, died on the 13th ult., in the "College of Nobles," at Naples. The deceased prelate, who was only 45 years of age, was returning home in order to renovate his health, which had become seriously impaired by the zeal and devotedness with which he discharged the duties of his mission during a long residence in India.

Mr. Charles Chaplin, of Blankney and Tathwell, one of the largest landed proprietors in Lincolnshire, died on the 24th ult. at his house 15, Montagu Square, in his 74th year. He was born in 1786, and married the daughter of the Hon. Henry Fane, of Fulbeck, by whom he had no issue. He was elected M.P. for Lincolnshire at a very early age, and continued to represent the county in the Conservative interest to 1831, when by the Reform Act the county was divided. Since then few elections have taken place without his being consulted respecting the choice of Conservative candidates; indeed it used to be said that the election for the south division was settled in his drawing room. Until a few years ago he took a great interest in the chase, and kept up an extensive stud. He was much respected by all parties as a country gentleman, took an active interest in the cultivation of his estates, and devoted much time to the management of the Great Northern Railway, of which he was a director. He is succeeded in his extensive estates by his nephew, the Rev. H. Chaplin, of Ryhall, near Stamford.

Mr. Richard Crawshay, eldest son and representative of the late William Crawshay, the well-known ironmaster, died suddenly on the 24th ult., in his 73d year. He had rambled for some miles in the beautiful grounds of Ottershaw Park—his seat in Surrey—when suddenly he complained of slight pain in his chest, and leant against a tree as if to breathe more easily; but he glided down insensible, and almost immediately expired of apoplexy. Mr. Crawshay derived from his father a large share in the great ironworks at Cyfarthfa, Merthyr Tydvil, but of late years had retired on a very ample fortune.

Mr. Pashley, Q.C., Assistant Judge of the Middlesex Sessions, died on the 29th ult. at his residence in Manchester Square, at the age of 54, after a short illness. Mr. Pashley had a very extensive practice in the Court of Queen's Bench, in cases of appeal from the decisions of Quarter Sessions all over the country, but more especially in cases coming under the New Poor-law Board Act. He succeeded to the office of Assistant Judge of the Middlesex Sessions on the death of the late Serjeant Adams, after which he was made a Queen's Counsel. He was called to the bar of the Inner Temple in 1837, and was for some years steward of Knaresborough.

The Rev. Dr. Steinkopff, for nearly 58 years minister of the German Lutheran Church of the Savoy, died on the 29th ult., after a few days' illness, at his residence in the precinct, in his 86th year. He was formerly Secretary to the British and Foreign Bible Society, and was the only surviving member of 300 persons who, in 1804, established the Society. During the war in Germany, Dr. Steinkopff was actively engaged in the missions of the Society in Germany and Switzerland.

# Miscellaneous.

**The Red Sea Telegraph.—The following despatches from Suez announce the important news that the Red Sea Telegraph cable has been successfully laid as far as Suakin.**

**Forty miles from Suakin, May 16, Evening.**

**"The cable has been laid so far most successfully. We hope to land the end to-morrow at noon. All well. May 17, 11.15 A.M. Arrived at Suakin. All well."**

BIRTHS.—On the 26th ult, at Downing, North Wales, Viscountess Fielding, of a son and heir—26th ult, at 37, Lower Brook Street, the Lady Bateman, of a son—29th ult, in Grosvenor Square, Lady Edith Abney Hastings, of a son—28th ult, at 5, Mansfield Street, Mrs. Seymour Fitzgerald, of a daughter—24th ult, at Grenville Place, Cork, the wife of J. F. Maguire, Esq., M.P., of a son—27th ult, at Ockbrook House, Derbyshire, the wife of Edmund Yates Peel, Esq., of a son.

MARRIAGES.—On the 26th ult, at St. Michael's Church, Chester Square, Lieut.-Colonel E. G. W. Keppel, of Lexham Hill, Norfolk, to Harriet Jacqueline, youngest daughter of Sir Anthony Butler, of Pound, Devon—1st inst, at St. George's, Hanover Square, Edward Heneage Dering, Esq., late Coldstream Guards, to Georgiana Lady Chatterton, widow of the late Sir William Chatterton, Bart.—23d ult, at Neufchâtel, Switzerland, N. Edwards Vaughan, Esq., of Rheola, Glamorganshire, to Anna Maria Louisa, third daughter of Edward S. Stanway, Esq., of Alne Hall, Yorkshire—19th ult, at All Saints' Church, Rutland Gate, the Rev. Lethbridge C. E. Moore, M.A. (late Captain H.M.'s 17th Regiment), son of the late Captain Moore, of the same regiment, to Agnes Emma, second daughter of the late Right Rev. P. N. Shuttleworth, Bishop of Chichester—24th ult, at Walcot Church, Bath, William Henry Henderson, Esq., H.M.'s Bengal Civil Service, second surviving son of the late Lieut.-Colonel Henderson, R.E., of Southampton, to Frances Knightley, eldest daughter of the late Lieut.-Colonel Osborne, Bombay Fusiliers—24th ult, at St. George's Church, Dublin, William Kennedy, Esq., of 5, Richmond Street, Mountjoy Square, Dublin, to Grace Marian, eldest daughter of the Hon. Mr. Justice Hayes, of 25, Mountjoy Square, Dublin.

DEATHS.—On the 28th ult, at Leith Hall, Mary Margaret, Lady Leith Hay, of Rannes—26th ult, at her residence, 39, York Street, Portman Square, Janet Isabella, fourth daughter of the late General Sir Robert Brain, K.C.B.—25th ult, at Streatham, Surrey, Louisa, beloved wife of Sir Kingsmill G. Key, Bart., and fourth daughter of the late Joseph Armstrong, Esq., of Manchester—24th ult, at Pluckley Rectory, William Dixwell Oxenden, youngest son of the late Sir Henry Oxenden, Bart., of Broome, Kent, aged 46—16th ult, at Madrid, Philip Musgrave, Esq., eldest son of Sir George Musgrave, Bart., of Edenhall, Cumberland—22d ult, at Ospringe House, Kent, Lieutenant-Colonel Henry William Montresor, Royal Artillery, third surviving son of the late General Sir Thomas G. Montresor, K.C.H., &c.—**30th ult, at his residence in the Dockyard, Captain John Coghlan FitzGerald, Royal Navy, Superintendent of H.M.'s Naval Dockyard, Sheerness, aged 56**—22d ult, at St. Germains Passage, Harriet Elizabeth, youngest daughter of the late Rev. Joseph Richards, vicar of Wedmore, Somerset, and sister of the late Dr. J. L. Richards, rector of Exeter College, Oxford, aged 51—25th ult, at his residence, 9, Terrace, St. Helier's, Jersey, Lieut.-General Kemm, Bengal Army, aged 70—20th ult, at Great Yarmouth, Vice-Admiral William Stanhope Lovell, K.H., second son of the late Thomas Stanhope Babcock, Esq., of Little Missenden Abbey, Bucks, aged 73—17th February, at Canterbury, near Sydney, New South Wales, Sarah Mary, widow of the late William Hobart Seymour, Esq., and subsequently wife of Henry Pleydell Bouverie, Esq., aged 32—30th ult, at 68, Oxford Terrace, Hyde Park, **Emma, wife of Philip Salomons, Esq., of Brunswick Terrace,** Brighton, aged 26—28th ult, at Parfis College, Bath, Ellen Ryder, widow of the late Dr. William Magens, LL.D.—20th ult, at Bagshot, Surrey, George Lovell, aged 57.

# Markets.

## COVENT GARDEN.—June 4.

Grapes are now getting comparatively plentiful, and consequently prices for them are lower. Strawberries from the open ground have made their appearance, and promise to be very abundant. Pine Apples maintain former prices. French Cherries may still be obtained. Oranges fetch 3s. 6d. and 10s. per hundred. Nuts of all kinds continue to realise fair prices. Spring Cabbages and French Beans are plentiful. Rhubarb, Asparagus, and Seakale may still be had in abundance. Green Peas, Beans, new Horn Carrots, and Globe Artichokes of foreign growth may also be obtained. New Cauliflowers fetch from 4s. to 6s. per doz. New Potatoes realise from 12s. to 20s. per cwt. Cucumbers abundant. Cut flowers chiefly consist of Orchids, Gardenias, Heliotropes, **Lily of the Valley, Violets, Mignonette, Heaths, and Roses.**

FRUIT.

| | |
|---|---|
| Pine Apples, per lb., 6s to 7s | Cherries, per lb., 3s to 4s |
| Grapes, per lb., 4s to 8s | Apples, per doz., 6s to 12s |
| Strawberries, per lb., 4s to 8s | Pears, per doz., 6s to 12s |
| Melons, each, 4s to 6s | — stewing, p. doz., 2s6d to 5s |
| Peaches and Nectarines, per doz., 15s to 30s | Oranges, per 100, 6s to 10s |
| Figs, per doz., 8s to 12s | Lemons, per doz., 1s to 1s 6d |
| | Cobs, per lb., 1s 3d to 1s 6d |

VEGETABLES.

| | |
|---|---|
| Cauliflowers, per doz, 4s to 6s | Spinach, p. sieve, 1s 6d to 2s |
| Green Peas, p. quart, 3s to 5s | Cucumbers, p. doz., 2s to 6s |
| Greens, per dozen bunches, 2s to 3s | Tomatoes, per doz., 3s to 4s |
| Cabbages, do., 1s 6d to 2s 6d | Artichokes, per doz., 4s to 6s |
| Asparagus, p. bundle, 2s 6d to 5s | Beet, per doz., 1s 6d to 2s |
| Seakale, p. punn., 2s 6d to 4s | Celery, p. bundle, 1s to 1s 6d |
| Rhubarb, p. bundle, 9d to 1s 6d | Shallots, per lb., 6d to 8d |
| French Beans, p. pun., 1s to 1s 6d | Garlic, per lb., 6d to 8d |
| Potatoes, p. ton, 90s to 100s | Lettuces, Cabb., per score, 1s to 1s 6d |
| — **per bus., 2s to 2s 9d** | **Endive, p. score, 1s to 1s 6** |
| — per cwt., 4s to 6s | Horse Radish, p. bun. 1s 6d to 4s |
| — new, per lb., 6d to 1s | Mushrooms, p. pott, 9d to 1s 3d |
| Carrots, per bunch, 2s | Parsley, p. 12 bunches, 2s to 4s |
| Turnips, per bunch, 1s to 1s 6d | Savory, do., 2d to 4d |

POTATOES.—Southwark, Monday, May 30.

Since our last report our supplies have been moderate both foreign and coastwise, but heavy by rail. The trade has been very inactive, with a downward tendency in prices. The following are this day's:—Yorkshire Regents, per ton, 100s. to 120s.; do. Flukes, 120s. to 160s.; Lincolnshire Regents, 80s. to 100s.; Dunbar Reds, 80s. to 100s.; Perth, Forfar, and Fifeshire Regents, 60s. to 80s.; do. Reds, 60s. to 70s.; Rocks, 60s. to 70s.; foreign whites, 60s. to 80s.

## BRITISH WOOLS.—London, Friday, June 3.

Prices are still nominal. The approach of the clip, coupled with the uncertain state both of Continental and domestic politics, having quite unsettled our business for the present. Nominal prices:—

| | | | | | | |
|---|---|---|---|---|---|---|
| South-down Hoggets .. .. .. | s. 1 | d. 2 | to s. 1 | d. 3 | Leicest. Wethers | 1 0 to .. |
| Half-bred ditto .. | 1 | 2 | — .. | | Ditto Hoggs .. | 1 1 — 1 2 |
| Down Ewes .. | 1 | 1 | — 1 | 2 | Combing Skins | 1 0 — 1 4 |
| Kent Fleeces .. | 1 | 1 | — .. | | Blanket ditto .. .. | — .. |
| | | | | | Flannel Wool .. | 1 0 — 1 4 |

Colonial Wool Sales.—**These sales have progressed at the opening rates for good descriptions of wool, but second-rate and inferior parcels are lower by 1½d. to 2d. per lb. The fine wool series terminates this evening.**

## COAL MARKET.—Friday, June 3.

**Walls End Braddyll's Hetton, 16s.; Walls End** Tanfield Moor, 13s.; Walls End Gosforth, 15s 6d.; Walls End Heugh Hall, 16s.; Walls End South Kelloe, 16s. 6d.; Walls End Whitworth, 16s.; Wall's End West Hetton, 16s. 3d.; Hastings Hartley, 17s.; Hollywell Main, 16s.; Walker Primrose, 13s. 3d.—133 ships at market.

## METROPOLITAN CATTLE MARKET.

Monday, May 30.

The number of Beasts is larger and the weather much warmer, consequently trade is very slow at lower rates. There are also more Sheep; the supply is not, however, excessive. Prices are not so good as of late, and a moderate clearance is effected. Trade is very heavy for Calves and Lambs. From Germany and Holland there are 182 Beasts, 2042 Sheep, and 165 Calves; from Scotland 540 Beasts; from Norfolk and Suffolk [illegible]; from Ireland, 120; and 4 from the northern and midland counties.

| | s | d | s | d |
|---|---|---|---|---|
| Best Scots, Herefords, &c. .. | 4 | 4 to 4 | 8 | |
| Best Short-horns | 4 | 4 — 4 | 6 | |
| 2d quality Beasts | 3 | 0 — 4 | 0 | |
| Best Downs and Half-breds .. | 4 | 8 to 5 | 6 | |
| Do. Shorn .. .. | — | .. | | |

| | s | d | s | d |
|---|---|---|---|---|
| Best Long-wools | 4 | 4 — 4 | 8 | |
| Do. Shorn | .. | — | .. | |
| Ewes & 2d quality | 3 | 8 — 4 | 0 | |
| Do. Shorn .. | .. | to | | |
| Lambs .. .. | 5 | 8 — 6 | 4 | |
| Calves .. .. | 3 | 8 — 4 | 8 | |
| Pigs .. .. | 3 | 8 — 4 | 4 | |

Beasts, 4180; Sheep & Lambs, 25,170; Calves, 216; Pigs, 190.

Thursday, June 3.

The supply of Beasts is larger than of late; the weather is more favourable and causes a cheerful trade at about Monday's rates. The number of Sheep and Lambs is not much altered, neither is the trade for them. Choicest descriptions are more in demand, and make rather higher prices. Trade is good for Calves. From Germany and Holland there are 45 Beasts, 1550 Sheep, and 204 Calves; from Spain, 100 Beasts; and 15 Milch Cows from the home counties.

| | s | d | s | d |
|---|---|---|---|---|
| Best Scots, Herefords, &c. .. | 4 | 6 to 4 | 10 | |
| Best Short-horns | 4 | 4 — 4 | 8 | |
| 2d quality Beasts | 3 | 6 — 4 | 6 | |
| Best Downs and Half-breds .. | 4 | 10 — 5 | 2 | |
| Do. Shorn .. .. | — | — | | |

| | s | d | s | d |
|---|---|---|---|---|
| Best Long-wools | 4 | 6 — 4 | 10 | |
| Do. Shorn .. | .. | — | .. | |
| Ewes & 2d quality | 3 | 10 to 4 | 2 | |
| Do. Shorn .. | .. | — | .. | |
| Lambs .. .. | 5 | 8 — 6 | 4 | |
| Calves .. .. | 3 | 10 — 4 | 8 | |
| Pigs .. .. | 3 | 8 — 4 | 8 | |

Beasts, 1115; Sheep & Lambs, 4100; Calves, 170; Pigs, 170.

## MARK LANE.—Monday, May 30.

**The supply of English Wheat fresh up to this morning's market was not large, but added to the samples left over from last week made a fair show; it could, however, only be disposed of at a further concession of 2s. to 3s. per qr. below** the prices at which it was offered on this day se'nnight. Holders of foreign were generally indisposed to submit to any further decline, but sales could only have been effected by conceding 1s. per qr. Barley is a slow sale at the rates of Monday last. Beans are 1s. per qr. cheaper; Peas unaltered in value. The Oat trade is very dull, and last week's prices barely supported. The top price of town made Flour is reduced to 50s. per sack, and Norfolk is 2s. to 3s. per sack lower.

| Per Imperial Quarter. | s | s. | | s | s. |

Friday, June 3.

Since Friday last the weather has been unsettled and partial; in some places the showers have been very heavy, whilst in **others scarcely any rain has fallen. The crops are** generally well spoken of. Excessive dullness has prevailed in the Wheat trade throughout the kingdom, and the decline of 2s. to 3s. which occurred here on Monday has been followed by a fall of 1s. to 2s. in the provincial markets. Barley, excepting in Leith, where it is written 1s. per qr. dearer, was also cheaper in some markets 1s. to 1s. 6d. per qr. Beans and Peas declined in value to a similar extent, and Oats 6d. to 1s. per qr. The reduction in Flour varies in the country markets from 1s. to 3s. per sack, here the top price of Monday was reduced 4s. per sack. The Wheat trade in Paris is heavy and prices declining. The value of Flour in Paris remains unaltered, or about 32s. per sack of 280 lbs. Of floating cargoes off the coast only three arrived of Wheat, two of Maize, and one of Barley. The arrivals of grain and Flour this week have been moderate. The attendance at to-day's market was small; nevertheless towards the close an improved tone was observable, the English stands were taken off clearly at Monday's prices, and some retail sales of foreign were effected on terms barely obtainable on that day. Barley, Beans, and Peas are unaltered in value. Oats are a very heavy sale at about Monday's prices.

Arrivals from May 30 to June 4.

Liverpool, Tuesday, May 31.—**We had a fair attendance** of millers and dealers at our market this morning, but they not being disposed to buy beyond their most immediate wants the amount of business done was very trifling, and prices somewhat irregular. Fine Wheats were generally held at Friday's rates, and the finest quality of Flour could not be called cheaper, but all other descriptions were very unsaleable. Indian Corn gave way 1d. to 2d. per cental. Oats 2d. to 3d. **per cental lower.** Oatmeal unchanged. Egyptian Beans, Peas, **and Barley nominally unchanged.**

Friday, June 7.—Grain market extremely dull, obtainable at 3d. to 6d. lower than on Friday. Flour quite neglected. **Business in other articles nominal, owing to absence of buyers. French imports moderate.**

Hops.—Borough Market, Friday, June 3.

Messrs. Pattenden & Smith report that the accounts received from the plantations generally speak of a great increase of fly, and lice very numerous; the bine in places is said to be growing, which has frightened a few holders, and

caused them to sell at a small reduction in prices, but the majority of holders are very firm and think the coming crop to be in great danger from the effects of blight and shortness of bine. Very little doing on duty.

### HORTICULTURAL VALUATIONS.

MR. ALFRED CHANDLER (of the late firm of Chandler & Sons, Vauxhall), begs to inform his friends that he is at liberty to undertake the valuation of Collections of Plants, Nursery Stock, Horticultural Buildings, &c.

Mr. A. C. is also open to engagements as Censor at Horticultural Exhibitions, in which capacity he has had long and extensive experience.—28, Priory Road, Wandsworth Road, S.

WANTED, A PARTNER, with Capital, in an Old Established Nursery and Seed business.—For particulars, A. G., *Gardeners' Chronicle* Office.

WANTED, A competent Person to act as FOREMAN in an extensive Nursery in the south of Ireland. Satisfactory testimonials as to character and capability will be required.—Communications to be addressed to A. B., *Constitution* Office, Cork, Ireland.

### TO GARDENERS.

WANTED, in a small Nursery and Florist's Garden, as PROPAGATOR AND MANAGER, to conduct the same in the absence of the proprietor, a young Man of good character with a knowledge of the value of Plants, capable of Growing and Propagating the Hardier Stove and Greenhouse Plants, Roses, Shrubs, Bedding and Herbaceous Plants, and conversant with Budding and Grafting.—Apply, stating age, wages required, and reference, to SIGMA, Netherton's, Bookseller, Truro.

WANTED, A GARDENER (single-handed), young and active, whose Wife can manage the Laundry.—Apply, stating wages, &c., to Mr. Wyatt, Ironmonger, St. Giles's, Oxford.

WANTED immediately, a GARDENER (single-handed), in the neighbourhood of St. John's Wood, who has had good experience in the cultivation of Orchids, Ferns, Stove and Greenhouse Plants, and can keep in perfection a small Flower and Kitchen Garden. He must be obliging, and have a good character for neatness.—Apply, stating wages, age, and all particulars, to A. B., 42, St. Paul's Churchyard, E.C.

WANTED, a practical Gardener competent to take the entire management of Flower and Kitchen Gardens, Greenhouse and Frames. References as to character indispensable.—Apply to Mr. E. TOWGOOD, Jun., Sawston, near Cambridge.

WANTED, AS GARDENER, a respectable married Man, who can manage a small Hothouse. He will have no assistance in his work, and must have at least a year's good character.—Apply, either by letter or personally, to Mr. ENGLISH, Wothorpe, Stamford.

WANTED, A FARMING MAN, active and middle-aged, to manage and work about 6 acres of Plough and 6 acres of Grass Land, and who understands Animals, Pigs, Cows, and Horses (not for carriage), about half a dozen in all. Constant wages 13s. per week. No cottage on the premises, and no perquisites allowed. References must be given from last place.—Address T. T., M. D., Emsworth, Hants.

WANTED, as UNDER SHOPMAN, in a Nursery, near London, a respectable young Man. One who has some knowledge of the value of Plants and other Nursery Stock will be preferred.—Apply by letter only to J. K., *Gardeners' Chronicle* Office.

## WANT PLACES.—Letters to be Post Paid.

GARDENER (HEAD).—Age 37, married, no incumbrance. Thoroughly understands Gardening in all departments.—Mr. WATSON, Ripley Castle, Yorkshire.

GARDENER (HEAD).—Age 38, married, one child; understands the profession in all its branches.—C. L., Mr. Poynter's, Nettle Street, Kent.

### TO NOBLEMEN AND GENTLEMEN.

GARDENER (HEAD).—Has a thorough knowledge of his profession in all its branches. First-class references.—R. C., The Gardens, Englefield House, Reading, Berks.

GARDENER (HEAD).—Age 34, married, without incumbrance; thorough knowledge of his profession in all its branches. Seven years' good character from last employers.—A. B., Batcheller's Library, Dover.

GARDENER (HEAD).—Married; experienced, and understands his profession in all its branches. Ten years' good character for capability and integrity. Wages 60*l.* per annum.—E. B., 6, Mill Street, Hanover Square, W.

GARDENER (HEAD). — Age 36, married, two children; thoroughly understands early and late Forcing, Fruit, Flowers, and Vegetables, Kitchen and Flower Gardens, Plant growing for Exhibition if required. Five years' good character.—J. M., Young's Library, Upper Norwood, S.

GARDENER (HEAD).—Age 31, married, no incumbrance; has a thorough practical knowledge of his profession, including Early and Late Forcing of all sorts of Fruit, Flowers, and Vegetables. Wife can take charge of Dairy or Poultry if required. Good character.—C. D., 2, Torrington Place, Torrington Square, W.C.

GARDENER (HEAD).—Age 33, married, one child; steady, active; has a practical knowledge of his profession in all its branches, including the Forcing of Fruits, Flowers and Vegetables, Flower and Kitchen Gardens, and is fully competent to manage a first-rate establishment. No objection to look after Land and Stock. Two years' character from the gentleman he has just left.—H. W., Mr. Taylor's, Tythe Farm, Ealing, Middlesex.

GARDENER (HEAD).—Age 29, single; intelligent, industrious, and strictly temperate in habits; fully understands his profession, including the Forcing of Vines, Pines, Peaches, Strawberries, Melons, Cucumbers, &c., with a good knowledge of Stove and Greenhouse Plants; also first-rate Management of Flower Gardens. Has had very extensive practice in the north and south of England.—J. T. W., Sir H. Meux, Bart., Theobald's Park, Cheshunt, Herts.

GARDENER (HEAD).—Married, without incumbrance; thoroughly experienced in every branch of his profession, including Forcing of every description (is a first-rate Grape grower), Laying-out Grounds, &c., as well as management of Woods and Grass Land; best system of making hay, whereby its nutritive quality is preserved. Wife understands Dairy and Poultry. Testimonials and reference will prove his efficiency and assiduity.—A. R., Mr. Turnock, Fruiterer, High Street, Windsor.

GARDENER (HEAD), OR GARDENER AND BAILIFF.—Age 36, of good practical experience both in Gardening and Farming, married, small Family; no objection to live at the Lodge. Can be highly recommended. Parties requiring the services of a good practical Man will find the Advertiser to be relied on.—B. B., Messrs. Thomas Mander and Co., Ranelagh Nursery, Leamington Spa.

GARDENER.—Age 34, single; understands Kitchen and Flower Gardens, Greenhouse, Hothouse, and Forcing Five years' good character.—A. B., Mr. Fryer, Nurseryman, Camberwell New Road.

GARDENER.—Age 24; has a thorough practical knowledge of his profession. Can have an excellent character from his present employer, where he has served upwards of two years.—W. B., Post Office, Effingham, near Leatherhead, Surrey.

GARDENER in a Nursery.—A young Man, of industrious habits who has had experience in several large Nurseries; can Bud, Graft, &c. Has had good practice in Grafting Rhododendrons, Conifers, &c. Good character.—J. L., Mr. Young, Milford Nurseries, near Godalming, Surrey.

GARDENER.—A gentleman is desirous of recommending his Head Gardener, who has been with him between two and three years. He can also have good testimonials from Edward Jesse, Esq., of East Sheen; Lady Fitzroy, of Woodstock; Mr. Mannock, of London; Mr. Veitch, of Chelsea; and Mr. Waterer of Bagshot.—JOHN NOBLE, Esq., 50, Westbourne Terrace, London.

GARDENER. (SINGLE-HANDED).—A young Man with a thorough practical knowledge of his profession. Good character.—J. PATTRICK, West Parade, Spring Bank, Hull.

BAILIFF AND GARDENER OR FORESTER.—A thoroughly practical Agriculturist and Horticulturist. Understands Breeding and Rearing of Stock, Land and Timber Measuring. Good character and recommendations.—S. T., Mr. Thornton, Whitton Nursery, Hounslow, Middlesex.

### TO NOBLEMEN AND GENTLEMEN.

BAILIFF OR BAILIFF AND STEWARD.—A gentleman would be glad to obtain a situation for a Married Man, without incumbrance, who is leaving on account of the death of his employer. He understands the Management of a Stock and Corn Farm, also Surveying Timber, Repairs, Collecting Rents, &c.—B. A., Stevenage, Herts.

### TO NOBLEMEN AND GENTLEMEN.

STEWARD OR BAILIFF, OR AS IMPROVER OF AN ESTATE.—Practical, thoroughly acquainted with his business; well understanding Clearing, Grubbing, Draining, Building, Buying, Selling, &c., having had experience in two of the principal counties of England. Testimonials as to character and abilities.—A. C., 26, Chiswell Street, Finsbury.

LAND STEWARD OR GENERAL MANAGER.—Thoroughly business Young Man, accustomed for many years to the Management and Improvement of Estates, the Erection of Horticultural, Agricultural, and other Buildings, Farming Light and Heavy Soils, Letting and Receiving Rents. Good security and first-class references given.—A. L., 11, Basinghall Street, London.

### TO THE NOBILITY AND GENTRY.

WORKING FOREMAN.—Fully competent to superintend the Erection of all classes of Buildings, has been accustomed to large jobs, making out Working Drawings, &c. Can have a good character from a first-rate London Firm.—Y. Z., 93, Milton Street, Dorset Square.

FOREMAN in a small place, JOBBING MAN GARDENER, &c.—A first-rate practical hand, one of the old school at Training, Nailing, Laying, Budding, or anything else.—G. T., 35, Princes Road, Notting Hill, London.

NURSERY FOREMAN, AND PROPAGATOR OR GROWER.—Has had many years' experience in the London Trade.—W. T., 2, Harriett St., Stanley Bridge, Fulham.

### TO NURSERYMEN.

PROPAGATOR AND FOREMAN.—A young Man, who has had 12 years' experience; understands Grafting, Rhododendrons, Roses, Conifers, &c., as well as In and Out-door Propagation of Hard and Soft-wooded Plants, and Nursery Work in general. Can have several first-rate recommendations. Wages not so much an object as a comfortable and permanent place.—J. H. Y., Henry Davies, Seedsman, &c., Gt. Stanmore, Middlesex, N.W.

PROPAGATOR, in a Provincial Nursery.—Understands the Propagation of Hard and Soft-wooded Plants, Roses, &c. Can be well recommended.—FISHER, HOLMES, & Co., Handsworth Sheffield.

IMPROVER to a nobleman's or gentleman's Gardener, where he can have a thorough knowledge of his profession.—Age 23; two years' good character. A premium if required.—F. R., Perry Villa, Perry Barr, near Birmingham.

IMPROVER.—A Lad, about 16, the Son of a practical Man, wants a place under a good Gardener, where he will be well cared for. He will be found valuable where there are plants and glass.—GEORGE TURNER, 35, Princes Road, Notting Hill, London.

SHOPMAN (HEAD) AND TRAVELLER, OR GENERAL SALESMAN.—Age 37; has a thorough knowledge of the Seed business in all its branches, and is perfectly acquainted with Plants.—E. GOAD, Mark House Common, Walthamstow, Essex, N.E.

### MICROSCOPES.

J. AMADIO'S BOTANICAL MICROSCOPES, packed in mahogany case, with three powers, condenser, pincers, and two slides, will show the animalculæ in water. Price 18*s.* 6*d.*—Address JOSEPH AMADIO, 7, Throgmorton Street. A large assortment of Achromatic Microscopes.

"It is marvellously cheap, and will do everything which the lover of nature can wish it to accomplish either at home or in the open air."—*The Field*, June 6, 1857.

Just published, an Illustrated Catalogue, containing the names of 1000 Microscopic objects, post free for 4 stamps.

PURE WATER.—The great public want of a perfect and cheap Water Filter is now supplied by the PATENT MOULDED CARBON COMPANY'S FILTERS, by which rain, river, pond and spring waters impregnated with noxious matters are rendered perfectly inodorous, tasteless, bright, sparkling, and wholesome. Price from 3*s.* upwards. PRICE LISTS on application.—Sold wholesale and retail by HARRISON & Co., 62, Fleet Street, London, E.C.

WHITE AND SOUND TEETH are indispensable to personal attraction and to health and longevity by the proper mastication of food. ROWLANDS' ODONTO, or Pearl Dentifrice, compounded of oriental ingredients, is of inestimable value in improving and beautifying the teeth, strengthening the gums, and in rendering the breath sweet and pure. It eradicates tartar from the teeth, removes spots of incipient decay, and polishes and preserves the enamel, to which it imparts a pearl-like whiteness. As the most efficient and fragant aromatic purifier of the breath, teeth, and gums ever known, ROWLANDS' Odonto has for a long series of years occupied a distinguished place at the toilets of the sovereigns and the nobility through Europe: while the general demand for it at once announces the favour in which it is universally held.—Price 2*s.* 9*d.* per box. CAUTION.—The words "ROWLANDS' Odonto" are on the Label, and "A ROWLAND & SONS, 20, Hatton Garden," engraved on the Government stamp affixed on each box.—Sold by the Proprietors, and by Chemists and Perfumers.

### GENUINE ROLL TOBACCO CLOTH.

WARRANTED EQUAL IN STRENGTH TO TOBACCO.

JOSEPH BAKER, 10, Gough Square, Fleet St., E.C., having dealt upwards of 20 years in the above, can recommend it as the best article for destroying the Fly. 1*s.* 4*d.* per lb; over 10 lbs., 1*s.* Post-office Orders payable Strand Office.

### GENUINE TOBACCO PAPER.

PARTIES FUMIGATING can be supplied with the best GENUINE TOBACCO PAPER at 4*l.* per cwt.; any less than 56 lbs., 10*d.* per lb.

BEN BAXTER, Messrs. Jackson & Sons, Lady Lane, Leeds.

### GENUINE TOBACCO PAPER FOR FUMIGATING.

H. APPLEBY (Foreman to Messrs. Ivery & Son, Surrey), takes this opportunity of informing his patrons and the public that he is now offering the above at a very considerably reduced price. It is now sold in packets of 4 lbs. each, at 1*s.* 3*d.* per lb. A liberal discount allowed to the Trade. For testimonials that will guarantee its quality, see *Gardeners' Chronicle*, April 16, p. 333.

Sheet Iron Pots for fumigating, 3*s.* 6*d.* each.

N.B. All orders to be accompanied with a Post-office Order, payable to HENRY APPLEBY, Dorking, Surrey.

BARBER'S POISONED WHEAT, Kills Mice and Sparrows on the spot.—In 1*d.*, 2*d.*, 4*d.*, and 8*d.* packets, with directions and testimonials. No risk nor damage in laying this Wheat about. From a single packet hundreds of Mice and Sparrows are found dead. Agents: Barclay & Sons, 95, Farringdon Street; W. Sutton & Co., Bow Churchyard; B. Yates & Co., 25, Budge Row, London; and sold by all Druggists, Grocers, &c., throughout the United Kingdom.

BARBER'S Poisoned Wheat Works, Eye, Suffolk.

GISHURST COMPOUND, PATENTED.—

THRIP (magnified). MEALY BUG (magnified).

GREEN FLY on Roses and Greenhouse Plants safely got rid of by syringing with PATENT GISHURST COMPOUND, 2 oz. to the gallon of water.

Extract from leading article in *Gardeners' Chronicle*, April 9, '59.

"That it really kills red spider, aphides, mealy bug, thrips, and scale, it is impossible to doubt in the face of reports of practical men, among whom we may mention Mr. D. Judd, of Althorp Gardens"—then follows a caution against the use of a too strong solution.

The Gishurst Compound is sold in boxes at 1*s.* 6*d.* and 6*s.* each, with directions for use, and printed opinions of Mr. Rucker's gardener, Lady Dorothy Nevill's gardener, Sir William Hooker, Mr. Rivers, and other eminent authorities. For Nurserymen the large size is recommended, but where the consumption is not large the compound keeps its strength best in the small. The undermentioned Seed Merchants, Nurserymen, &c, having taken in supplies are prepared to sell single boxes.

**NEW WEEKLY ILLUSTRATED PERIODICAL.**

# ONCE A WEEK.

A MISCELLANY OF
**LITERATURE, ART, SCIENCE, AND POPULAR INFORMATION.**
TO BE ILLUSTRATED BY
**LEECH, TENNIEL, MILLAIS, HABLOT K. BROWNE, C. KEENE, WOLF, &c**
Will be published every Saturday, price Threepence. The First Number will appear on July 2.

All Literary arrangements will be made by the Editor, who is to be addressed, for the present, through the Publishers, Messrs. BRADBURY AND EVANS, at their Offices, Bouverie Street, Fleet Street. The Publishers will also receive Orders for the Miscellany itself; and a limited number of Advertisements for insertion in the Wrapper to be issued with it regularly "ONCE A WEEK."

# THE DAILY NEWS,

A FIRST-CLASS LONDON PAPER. ESTABLISHED 1846,
**Price Threepence,**
ALL OVER ENGLAND AND AT ALL THE RAILWAY STATIONS.

In Politics, the DAILY NEWS has, from its establishment, maintained an independent course, having the single aim of advancing Liberal opinions, regardless of the selfish interests of faction. The services it has rendered in the successive triumphs of the cause of Civil and Religious Liberty, are known and appreciated. In the DAILY NEWS, Reform in all its developments—education, social, sanatory—possesses a faithful chronicler; and in this characteristic, as in others, the consistency of its advocacy has increased the sources of its intelligence.
The character of the Paper stands deservedly high in reference to its Foreign Correspondence, and the arrangements made by the Conductors for securing early information of the War in Italy, and of all circumstances connected with it, are it is believed, unsurpassed in the English Press. No efforts have been spared to obtain the fullest accounts; and the special advantages possessed by the DAILY NEWS insure that its intelligence will be impartial and trustworthy.

Of the repute which the DAILY NEWS has won by its mercantile and commercial reports, and by the honesty and soundness of its comments upon monetary affairs, the Conductors have every reason to be proud. The occasions are frequent, especially at such times as the present, when advice and warning relative to unreasonable panic and ruinous speculation are of almost priceless value; and the Public will find that no such opportunity is neglected by the DAILY NEWS.

The Parliamentary and Law Reports of the DAILY NEWS are acknowledged to be second to none; and in all the divisions of news, whether Home or Foreign, it is able, by the largeness of its staff of correspondents and agents, to meet every requirement of the times.

In Literature, Music, the Drama, and the Fine Arts, the utmost care is taken to supply the Public with sound and impartial criticisms, and prompt and accurate information.

The DAILY NEWS is printed on paper of excellent quality, in clear and legible type, and is now sold all over England and at all the Railway Stations at Threepence per copy—a price which brings it within the reach of every class.

Orders may be given to any News Agent or Bookseller for any period of time, or may be sent addressed to the Publisher,
W. K. HALES, DAILY NEWS OFFICE, 10, BOUVERIE STREET, FLEET STREET, LONDON, E.C.,
to whom Post-office Orders should be made payable.

## News of the Week.

THE first session of the new Parliament was opened on Tuesday by the QUEEN in person. HER MAJESTY'S Speech commenced by referring to her earnest and unceasing endeavours to preserve the peace of Europe. It stated that though those efforts had unhappily failed and war had been declared, HER MAJESTY had received assurances of friendship from both of the contending parties, and intended to maintain between them a strict and impartial neutrality. It had however been deemed necessary for the security of the country and the honour of the Crown, to increase the naval forces to an amount exceeding that which had been sanctioned by Parliament, and supplementary estimates would therefore be laid before the House of Commons without delay. After announcing the renewal of diplomatic relations with Naples on the accession of the new King, the Speech stated the intention of the Government to bring in a Bill to facilitate the manning of the Navy, and to re-introduce the measures of legal and social improvement which were suspended by the recent dissolution. With regard to Parliamentary Reform, it intimated that the necessity of giving immediate attention to the national defences and to the financial condition of the country will not leave time during the present session for the consideration of a new Reform Bill, and expressed a hope that the question will be brought to a satisfactory settlement at the commencement of the next session. The Address, in answer to the Queen's Speech, was moved in the Lords by the Earl of POWIS, and seconded by Lord LIFFORD, and after a short debate was agreed to without opposition. In the Commons the Address having been moved by Mr. A. EGERTON, and seconded by Sir J. ELPHINSTONE, the Marquis of HARTINGTON moved, and Mr. HANBURY seconded an amendment, representing to HER MAJESTY that the present Administration does not possess the confidence of the House. The CHANCELLOR of the EXCHEQUER and Mr. DIGBY SEYMOUR opposed the amendment, which was supported by Lord BURY, Mr. MELLON, Mr. HUGESSEN, Mr. WILSON, Mr. LAING, and Lord PALMERSTON. The debate was then adjourned to Thursday, when the amendment was supported by Mr. Serjeant DEASY, Mr. DUFF, Mr. BRIGHT, Lord ASHLEY, Mr. BAXTER, Mr. CROSSLEY, Mr. HORSMAN, and Sir J. GRAHAM; and opposed by Colonel DICKSON, Mr. S. FITZGERALD, Mr. PALK, Mr. LIDDELL, Mr. GURNEY, Mr. SPOONER, Mr. KER SEYMER, and Mr. WHITESIDE. The debate was then adjourned to last evening on the motion of Mr. MILNER GIBSON, and was not concluded when we went to press.

A great victory was won on Saturday morning by the French and Sardinians over the Austrians at the bridge of Magenta, a small town in the Lombard territory, between Buffalora and Milan. The allied army crossed the Ticino at various points on the previous evening, after a fight in which the Austrians are said to have suffered considerable loss, especially in arms and ammunition. On Saturday morning the main bodies of the two armies met at the bridge of Magenta, and a battle was fought in which, according to the despatch sent by the EMPEROR OF THE FRENCH to the EMPRESS, the Austrians were completely routed with a loss of 15,000 killed and wounded and 5000 prisoners, the loss of the allies being also "considerable." The Austrian accounts state that the battle was undecided, and that the loss on their side was from 4000 to 5000, while that of the French was from 6000 to 7000. The French Zouaves and the Imperial Guard, which was commanded by the EMPEROR in person, appear to have suffered severely, and the French army is said to have been saved by the heroism of Generals MAC MAHON and REGNAULT DE ST. JEAN D'ANGELY, who were created Marshals of France on the field,—the former with the title of Duke of Magenta. The French lost two Generals, ESPINASSE and CLERC, and a large number of superior officers; the Austrians

have not published the names of their officers killed, but it is stated that Baron REISSCHACH, three Generals, and three officers of the staff were among the wounded. On Monday the Austrians evacuated Milan, and on the following day they evacuated Pavia. On Wednesday the EMPEROR OF THE FRENCH and the KING OF SARDINIA entered Milan, and on the same day Marshal BARAGUAY D'HILLIERS drove the Austrians from Malegnano, where the *corps d'armée* under General BENEDECK had entrenched themselves. The latest news states that the EMPEROR of AUSTRIA has dismissed General GYULAI and appointed Field-Marshal HESS Commander-in-Chief, and that the Austrians are retiring on the Adda, where they will give battle to the allies.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Royal family continue at Buckingham Palace. On Friday the Queen visited the Duchess of Kent. The Prince Consort presided at a meeting of the Fine Arts Commission. In the evening the Queen and Prince Consort, accompanied by the Princesses Alice and Helena, honoured the performance at the Adelphi Theatre with their presence. On Saturday morning the Queen and Prince Consort, accompanied by Prince Arthur and the Princesses Alice, Helena, and Louisa, visited the Royal Botanical Gardens in the Regent's Park. The Prince Consort afterwards presided at a meeting of the Council of the Duchy of Cornwall. The Princess Beatrice took a drive in an open carriage-and-four and visited the Duchess of Kent. In the afternoon the Queen, accompanied by Prince Arthur and the Princess Alice, visited the Duchess of Kent. Her Majesty afterwards took a carriage drive. In the evening the Prince Consort dined at the London Tavern with the officers of his regiment, the Grenadier Guards. The Queen paid a visit to the Duchess of Kent, accompanied by the Princess Alice, and afterwards honoured the Royal Italian Opera, Covent Garden, with her presence. On Sunday morning the Queen and Prince Consort, the Princesses Alice, Helena, and Louisa attended Divine service in the private chapel of Buckingham Palace; the Rev. Daniel Moore preached the sermon. In the afternoon her Majesty and the Prince Consort, the Princesses Alice and Helena, and the Duke de Nemours visited the Duchess of Kent. On Monday morning the Queen and Prince Consort, accompanied by the Princess Alice, rode on horseback. The Prince Consort afterwards attended a meeting of a committee of the Governors of Wellington College. In the afternoon the Queen held a Court and Privy Council at Buckingham Palace. The Sheriffs of London and Middlesex, accompanied by the City Remembrancer, had an audience, when her Majesty appointed Saturday (to-day) after the Drawing Room for the reception of an Address from the Corporation of the city of London. At the Council the Queen's Speech, on opening the session of Parliament, was submitted and approved. Earl De-la-Warr, the Earl of Malmesbury, the Earl of Derby, and the Lord President had audiences of the Queen. After the Council the Queen, accompanied by the Princess Alice, visited the Duchess of Kent. Her Majesty afterwards took a carriage drive. The Prince Consort rode on horseback. In the evening her Majesty had a dinner party. On Tuesday the Queen went in State to the House of Lords and opened the session of Parliament with a Speech from the Throne. In the afternoon her Majesty and the Prince Consort visited the Duchess of Kent. Her Majesty, accompanied by the Princesses Alice and Helena, afterwards took a carriage drive. The Prince Consort rode on horseback. In the evening her Majesty and the Prince Consort honoured the Royal Italian Opera with their presence. On Wednesday morning the Queen distributed the Victoria Cross to several officers and privates in the quadrangle of Buckingham Palace. The Queen, the Princes Arthur and Leopold, and the Princesses Alice and Beatrice afterwards visited the Duchess of Kent. In the afternoon her Majesty took a carriage drive. The Prince Consort rode on horseback. In the evening the Queen gave a State ball, to which a party of 1900 were invited. On Thursday the Marquis of Exeter, Lord Steward of the Household, had an audience and presented the Address from the House of Lords in answer to the Speech from the Throne. The Queen, accompanied by the Princess Alice, visited the Duchess of Kent. The Princesses Helena and Louisa also visited her Royal Highness. The Prince Consort presided at a meeting of the Finance Committee of the Commissioners for the Exhibition of 1851. In the afternoon the Queen, accompanied by the Princess Alice and Prince Leopold, took a drive in an open carriage-and-four. The Prince Consort rode on horseback. The Court is expected to leave town for Windsor on Tuesday for the Ascot Races.

THE PRINCESS FREDERICK WILLIAM arrived at Berlin on Sunday. On leaving the Thames on the previous Thursday, the progress of the yacht was impeded by a dense fog which prevailed in the Channel, and on Friday morning in passing up the Scheldt the Belgian pilot ran her ashore. As it was found impossible to get her off Captain Denman telegraphed to the Vivid, which had gone on to Antwerp, and on the return of that vessel the Princess left the Victoria and Albert, and proceeded in the Vivid to Antwerp, where she arrived about half-past 5 P.M., having been detained nearly 12 hours by the accident. Her Royal Highness was met at Antwerp by several members of the Belgian Royal family, who accompanied her to the station of the railway leading to Cologne. On her way to Berlin her Royal Highness paid a short visit to the Court of Hanover. Previous to reaching Berlin, the Prince Frederick William met the Princess, and accompanied her to the capital. They were received at the railway station by the Duke of Oporto, and by Lord Bloomfield, the English Ambassador. On Monday morning the Prince and Princess visited their new residence, and after inspecting the progress made towards its completion, proceeded to pay a visit to the King and Queen of Prussia at Sans Souci. The Royal yacht Victoria and Albert arrived at Portsmouth on Monday morning from Antwerp with one engine disabled, from the ship getting ashore.

THE PRINCE OF WALES left Gibraltar on Saturday last in the royal yacht Osborne for Cadiz and Lisbon, on his return to England.

THE DUCHESS OF KENT is so much improved in health that her Royal Highness left Clarence House on Thursday for Frogmore, where she intends to remain several weeks.

COURT MOURNING.—The Court has gone into mourning for the late King of Naples for 10 days, commencing from Thursday last, the 9th inst.; but in order to prevent any injury to trade her Majesty has commanded that the mourning shall not be worn at the Drawing Room to-day.

THE CABINET.—A Cabinet Council was held on Saturday at the official residence of the Chancellor of the Exchequer in Downing Street.

DIPLOMATIC APPOINTMENTS.—The Queen has appointed Sir Arthur Charles Magenis, K.C.B., now Minister at Stockholm, to be Minister at Naples; Augustus Berkeley Paget, Esq., now Minister at Dresden, to be Minister at Stockholm; the Hon. Charles Augustus Murray, C.B., late Minister in Persia, to be Minister at Dresden; William Lowther, Esq., now Secretary of Legation at St. Petersburg, to be Secretary of Legation at Naples; and George Glynn Petre, Esq., Paid Attaché to the late Legation at Naples, to be Secretary of Legation at Hanover.

COLONIAL BISHOPRICS.—The Queen has constituted the new colony of Queensland in New South Wales to be a Bishop's See by the title of the Bishopric of Brisbane; and has appointed the Rev. Edward Wyndham Tufnell, D.D., to be bishop thereof. Her Majesty has constituted the Island of St. Helena to be a Bishop's See by the title of the Bishopric of St. Helena, and has appointed the Rev. Piers Calvely Claughton, D.D., to be bishop thereof. The consecration of these bishops, as well as of Archdeacon Campbell as Bishop of Bangor, will take place in Westminster Abbey on Tuesday next.

LAW APPOINTMENT.—The Queen has appointed William Henry Bodkin, Esq., barrister-at-law, to be Assistant-Judge of the Middlesex Sessions, in the room of the late Robert Pashley, Esq.

VICTORIA CROSS.—The Queen invested the Hon. Captain Augustus Anson, 7th Hussars, with the Victoria Cross, previous to the State Ball at Buckingham Palace, on Wednesday evening. On the following morning her Majesty invested the following officers and soldiers with the Cross in the quadrangle of Buckingham Palace, in the presence of the Royal family, the Commander-in-Chief, the Secretary for War, and the members of the Court. The Queen placed the Cross, suspended from a red riband, on the left breast of each officer and soldier:—Commander T. J. Young, R.N.; Commander Nowell Salmon, R.N.; Lieut.-Colonel Sir Henry Marsham Havelock, Bart., 18th Foot; Major James Leith, 2d Dragoons; Major Frederick Miller, R.A.; Staff-Surgeon Anthony Dickson Home, late 90th Regiment; Assistant Surgeon William Bradshaw, 32d Foot; Thomas Hancock, late private of Lancers; Lance-Corporal Abraham Boulger, 84th Regiment; Private David Mackay, 93d Regiment; Capt. Frederick Robertson Aikman, Bengal Native Infantry; Lieut. F. S. Roberts, Bengal Artillery; Lieut. Hastings E. Harrington, Bengal Artillery; Lieut. John Watson, 28th Bombay Native Infantry; Lieut. Thomas Adair Butler, 1st Bengal European Fusiliers.

MEETING OF THE LIBERAL PARTY.—A meeting of the Liberal members of the House of Commons was held on Monday at Willis's Rooms, and was attended by 274 gentlemen, representing the various sections of that party. The proceedings were opened by Lord Palmerston, who said that the issue upon which Government had dissolved Parliament was not the question of Reform, or any other matter of legislation, but simply and solely whether or not they possessed the confidence of the country. He thought that the late election had given a conclusive answer to that question, and that it was the business of the Liberal party to determine whether or not they should accept the challenge which had been given them. He believed it would be the more manly and straightforward course to do so, and he briefly sketched out the terms of the proposed amendment, expressive of a want of confidence in the present Government, which he stated that Lord Hartington and Mr. Hanbury were respectively willing to propose and second, should the meeting deem it advisable for them to do so. In adverting to the war in Italy, his lordship dwelt on the signal failure which the Government had met with in their endeavours to maintain peace between the contending parties, and contended that a Cabinet, which had manifestly lost all weight in the Councils of Europe upon so momentous a question as that of peace and war, was not fit to be any longer intrusted with the conduct of our foreign relations. He also insisted very strongly on the duty of maintaining a strict neutrality, which he said that the speech of Lord Derby, previous to the outbreak of the war, had tended to impair; and declared that he could not foresee any circumstance which would render the hostile intervention of England necessary. Lord John Russell next addressed the meeting; and, after strongly deprecating the continuance of the Government in the hands of a minority, which he characterised as most unconstitutional and dangerous, expressed his hearty desire either to co-operate with Lord Palmerston, in the event of that noble lord being called upon to form an Administration; or to avail himself of his assistance, in the event of his being required to conduct the affairs of the country himself. His lordship adverted to the state of the Liberal party, and expressed his opinion that in the event of a Liberal Government being formed it was essential that the three great sections of that party — the old Whigs, the Peelites, and the advanced Liberals—should each be represented in it. Mr. Bright followed, and said that he considered himself in some measure responsible for the dissensions which had hitherto existed in the Liberal party, but he justified them on the ground that the old members of that party, who had carried the Reform Bill of 1832, had not acted up to the principles which inevitably flowed from that measure, but had made a point of excluding from any share of power all those independent members who usually sat below the gangway, and who considered that they had duties to perform to their constituents as well as to the nominal leaders of the party to which they belonged. If however they were willing to act henceforth on a more comprehensive system, he should have no hesitation in sinking minor differences, and in giving such a Government his most cordial support. He was not quite satisfied however with what had fallen from Lord Palmerston on the subject of our foreign relations; and if he thought that peace was more likely to be secured by keeping the present Government in office, nothing should induce him to assist in turning them out.—Lord Palmerston explained that, in his opinion, nothing was so conducive to the interests of Europe and the preservation of peace as the maintenance of a strict alliance between England and France.—Mr. Sidney Herbert strongly advocated a decided movement on the part of the Liberal members, and said that even if unsuccessful it would do them no harm, and would at least have the effect of determining the question as to whom the country was to be governed by.—Mr. Roebuck repeated the substance of his speech at Milford, and declared that he felt no confidence in the sudden change which had taken place in the relations between Lord Palmerston and Lord John Russell. He reminded the meeting that this country had both commenced and ended the war with Russia at the instigation of France, and declared his absolute want of confidence in Lord Palmerston, who had already, he said, forfeited the confidence of the country by truckling to that Power.—Mr. Coningham deprecated any tone of hostility towards France, and Mr. Horsman questioned the policy of the movement which had been recommended by the leaders of the party.—Mr. Ellice impressed upon the meeting the necessity of immediate action, which, he said, was not to be regarded as an act of aggression against the Government, but simply as an acceptance of the challenge which had been given them by Lord Derby. After some remarks from Mr. M. Milnes and Mr. Lindsay, it was agreed that the amendment to the Address should be moved in accordance with Lord Palmerston's suggestion.

## Foreign.

FRANCE.—The Empress received the following despatch from the Emperor on Sunday, announcing the victory of Magenta:—

"Novara, June 4.

"At 11.30 a great victory was won at the bridge of Magenta. 5000 prisoners are taken, and 15,000 of the enemy are killed or wounded. The details will be despatched by telegraph later."

At 7 o'clock on Sunday evening the cannon at the Hôtel des Invalides fired salutes in honour of the victory of Magenta, and at night the public offices, the theatres, and court tradesmen, the *cafés*, and some private houses were illuminated. The Empress and the Princess Clotilde came in from St. Cloud, and at 10 o'clock passed along the Boulevards and the Rue de Rivoli in an open carriage, without escort. They were received with cries of "*Vive l'Impératrice!*" "*Vive l'Empereur!*" and numerous groups followed the carriage from the moment of its appearance, and continued all through shouting most vigorously. The *Moniteur* publishes General M'Mahon's report of the passage of the Ticino at Turbigo by the allies on the 3d June, and of the surprise of the enemy at Robecchetto, by which considerable loss was inflicted on the Austrians. The French loss is stated to be one captain and seven privates killed, and four officers (among whom is one colonel) and 38 privates wounded. The Emperor has ordered the names of the killed and wounded officers and privates to be sent by the Minister of War to those who may be interested in their fate. With regard to the subsequent battle of Magenta

little is known beyond the fact that the French loss was much greater, and the Austrian loss much less, than the first despatch had led the public to believe, the French loss being now estimated at from 6000 to 7000, and the Austrian from 4000 to 5000. The Emperor in his despatch to the Empress states that the Imperial Guard alone supported the shock of the Austrians for two hours. It is stated that the *corps d'armées* engaged in the battle, exclusive of the Guard, were those commanded by General M'Mahon and Marshal Canrobert. General M'Mahon and General Regnault de St. Jean d'Angely were created Marshals of France on the field of battle, and several colonels were raised to the rank of general. Marshal M'Mahon also received from the Emperor the title of Duke of Magenta. The Austrian force is said to have been about 130,000 men, the French about 100,000. The divisions of Marshal Canrobert and General M'Mahon and the Imperial Guard are said to be those that took the greatest part in the battle. Generals Espinasse and Clery were killed—Generals Niel, Canrobert, and M'Mahon wounded. The Imperial Guard and the three regiments of Zouaves suffered greatly. The news of this battle was immediately transmitted by the Minister of the Interior to all the Prefects of Departments, who report that it was received with enthusiasm, the houses being decorated with flags, and preparations made for illuminations. The Neapolitan envoy, Marquis Antonini, has delivered to the Empress the notification of the death of King Ferdinand and of the accession to the throne of King Francesco II. The Marquis also presented letters accrediting him as Envoy Extraordinary to the French Court. The Empress has gone into mourning for 21 days for the late King. The Emperor has given orders for the construction of 60 flat-bottomed boats, 20 of which are to be of a larger size than any yet built: they are to be employed in landing troops on an enemy's coast from ships of war, and are intended, it is said, for the Adriatic. 22 additional battalions of Foot Chasseurs are to be organised on the plan of the original Chasseurs de Vincennes.

Austria. — Accounts from Vienna state that on Saturday morning a great religious solemnity, with procession and public prayers, took place in that capital, imploring Heaven to bless the Austrian arms with victory. All the members of the Imperial family and the Ministers were present. The mass was read by the Nuncio of the Pope. It is said that an army of 120,000 men is about to be formed in Bohemia, and that the Archduke Albert is to be appointed to the command in chief of all the troops of the Empire with the exception of those of Italy and Hungary. The Archduke is not, as at first intended, to be placed at the head of any army which Austria might send if necessary to the Rhine.

Italy.—The following official news announcing the battle of Magenta has been received from the French headquarters:—

"On Friday bridges were thrown across the Ticino, and after a fight, in which the enemy suffered considerable loss our army began to cross to the opposite bank. The enemy were compelled to retreat, leaving in our hands several pieces of cannon and a great quantity of small arms and ammunition. On Saturday morning there was a great victory at the bridge of Magenta, between Buffalora and Milan. 5000 Austrians were made prisoners, and 15,000 killed and wounded, making a total of 20,000 Austrians put *hors de combat*. The loss of the allies was considerable."

The *Moniteur* contains the following message:—

"The Emperor to the Empress. Magenta, June 5.

"Yesterday our army was under orders to march on Milan across the bridges thrown over the Ticino at Turbigo. The operation was well executed, although the enemy, who had repassed the Ticino in great force, offered a most determined resistance. The roadways were narrow, and for two hours the Imperial Guard sustained unsupported the shock of the enemy. In the meantime General M'Mahon made himself master of Mageuta. After sanguinary conflicts we repulsed the enemy at every point with the loss on our side of about 2000 men placed *hors de combat*. The loss of the enemy is estimated at 15,000 killed and wounded. 5000 Austrian prisoners remained in our hands. Summary of the details:—Austrians taken prisoners, at least 7000; Austrians placed *hors de combat*, 20,000; three pieces of cannon and two flags captured from the enemy. To-day our army rests for the purpose of reorganising itself. Our loss is about 3000 killed and wounded, and one cannon taken by the enemy."

The Austrian account gives the following version:—

"There was a fierce battle at Turbigo and Buffalora on the 4th. At first only two brigades of the First Corps under Count Clam were engaged, but they were subsequently reinforced by other brigades under Prince Lichtenstein. In the afternoon of the same day the Third Austrian Corps took part in the action. There was very hard fighting at Buffalora, sometimes to the advantage of the French, sometimes of the Austrians. The battle lasted till late at night. On the 5th the battle was renewed at Magenta. The allies made no progress. On this day two fresh Austrian corps were engaged. The Fifth and Eighth Corps were not in action. In the afternoon of the same day the Austrians took up a flank position between Abbiate Grasso and Binasco. The Austrians have taken many prisoners. The loss on both sides has been very great. Among the wounded were Baron Rosschach, three Generals, three officers of the Staff. Two officers of the Staff were missing, and one major was killed. The loss on both sides was very great. Milan is entirely evacuated by our troops. The telegraphic communication between Milan, Pavia, and Verona is interrupted."

On Monday last the Austrians evacuated Milan and the castle after having spiked the guns. The municipality of Milan immediately proceeded to the head-quarters of the allies and presented an address to the King of Sardinia, in the presence of the Emperor Napoleon, announcing that they had proclaimed the annexation of Lombardy to Piedmont. On Wednesday morning the Emperor and the King entered Milan, and met with an enthusiastic reception. Further south the Austrian *corps d'armée* of Generals Zobel, Schwarzenberg, and Lichtenstein, after abandoning the line of the Po, evacuated Mortara, taking the direction of Vigevano, Beregnardo, and Pavia. The retreat was so precipitate that they left behind them corn and other articles, which they had levied on the country. On Tuesday evening they evacuated Pavia, after having spiked their guns and thrown their ammunition into the water. On Wednesday the French gained another victory at Malegnano. The Austrian *corps d'armée* under General Benedeck being intrenched in that village, Marshal Baraguay d'Hilliers was sent by the Emperor to dislodge them, and took the village with little loss, driving out the Austrians and capturing 1200 prisoners. It is credibly stated that General Gyulai has been dismissed, and Field-Marshal Hess appointed Commander-in-Chief. The Austrians are retiring on the Adda, where they will offer the allies battle. From the lake district we learn that the Government of the King of Sardinia is already in operation at Como and Sondrio. A detachment of General Garibaldi's corps has sailed along the shores of the Lago Maggiore in several barques, disarmed the Austrian Customs guards, and everywhere carried off the public treasure. Volunteers are rapidly arriving from all parts to join Garibaldi, who is pursuing the Austrians beyond Monza. General Urban's army, after a precipitate retreat from Varese, has successfully effected a retreat with his troops by Cassano, though some of his scattered soldiers have been taken prisoners and disarmed. The funeral of the late King of Naples took place on the 31st ult., with all the formalities of Spanish etiquette, with the exception of demanding at intervals what the deceased Sovereign desired to do or eat. A modification has since been made in the Neapolitan Ministry, Signori Salvatore Murena, F. Scorza, and Ludovico Bianchini having been dismissed from the posts of Public Works, Justice, and Police. A provisional police has been established under one intendant and two magistrates. A royal decree has been published, appointing as Ministers without a portfolio General Filangieri, Prince Cassaro, and the Duke of Serra Capriola—reserving the right to make use of their enlightenment and experience. An official declaration of neutrality has been made. A levy of 2500 men for the royal navy has been ordered. The Hon. Henry Elliot, the English Minister Extraordinary, arrived from Marseilles in the steam gunboat Coquette, on the 5th inst., and the English fleet, consisting of the Marlborough, Euryalus, Brunswick, Princess Royal, Renown, Victor Emmanuel, and Lapwing, arrived on the 9th.

The Adriatic.—On the 5th inst. near Biancho, the Austrian war steamer Eugen captured the French three-master Raoul, of Nantes, bound from Cuba for Trieste, with a cargo of coffee. The blockade comprises the mouths of all rivers on the Venetian coast. Up to the present 40 Austrian vessels have been taken by the French.

Turkey and Bosnia.—A combat has taken place in Bosnia, between the Turkish troops and the insurgents, near Kolienich, not far from Trebingen. Gosco has, it is said, been destroyed by Derbich Pacha.

India.—The Bombay mail has arrived with advices to the 12th May, and the Calcutta mail has arrived with news from that Presidency to May 5th. The papers mention four engagements with the rebels. On the 20th April about 1000 men, chiefly of the Nusseerabad Brigade, under Dabee Deen, were attacked on the Chitonee Pergunnah, about 5 miles north of Bumiaon. The cavalry pursued, and about 50 of the rebels were cut up, including two native officers; and two colours were taken. No loss on our side. On the 21st, 127 sowars and 76 camp followers gave themselves up to Major Henry, at Lotun. Sir Hope Grant reported from Gonda that a force sent on the 27th to the jungles met with complete success. Surda Sing, with 150 of his men, were killed, and the remainder dispersed. Brigadier Horsford crossed the Kowreella River into the Khyreeghur Jungles, and surprised a body of rebels, numbering between 2000 and 3000 cavalry and infantry, under Ummur Singh, dispersing them with the loss of upwards of 200 men. Ummur Singh, with 200 sowars and 100 infantry, escaped towards the hills; our casualties were not numerous. Captain Rennie met a considerable body of rebels on the Gurwa Nuddee, and routed them with considerable loss. The other engagement took place on the 18th of April, when the Hosungabad Military Police surprised a body of rebels, some 500 strong, under Dost Mahomed; ten men were killed, and six taken prisoners. The standing camp of the rebels with about 100 horses and ponies, and 80 to 100 arms of various descriptions, including several English muskets, fell into our hands. The towns of Neeraoow and Nuggur, as well as the village of Kaswa, all in the Nuggur Parkur district, were occupied by British troops between the 1st and the 4th of May, and the Rana of Nuggur with his followers had fled to the Kalinwur hills, adjoining Nuggur, which the British forces had invested. Our troops on the Oude frontier continue to encounter and discomfit small parties of the rebels, many of whom have surrendered. The last brigade of the Central India field force, that hunted down Tantia Topee, has been broken up and gone into cantonments. The principal event in Calcutta is the change of the Lieutenant Governor of Bengal. Mr. John Peter Grant has been appointed as Mr. Halliday's successor, subject to the sanction of the Queen. The Government of India has offered ½ per cent. loan on the 1st inst.; it has also announced the issue of Treasury bills bearing interest 2 per diem.

China.—Baron Gros, French Ambassador to China has arrived at Marseilles by the Ellora.

United States.—A declaration made by the French Minister in regard to enforcing the doctrine of the right of search has created quite a stir in diplomatic circles in America. It appears that Count Sartiges on his recent departure from Washington, had a conversation with an ex-governor of New York, in which he remarked that he did not see how the impending war in Europe could be prevented from affecting the commercial relations of the United States, as he had no doubt, in the event of an European war becoming general, the doctrine of the right of search would be reiterated and enforced. Despatches have been received from Governor Cumming, of Utah, to the 28th April. Considerable excitement still existed among the Mormons, and it was with great difficulty that he could keep them in subjection.

Mexico. — Advices from Mexico state that the Miramon Cabinet had issued a decree restoring Santa Anna all rights and titles he formerly possessed, and inviting him to return *viâ* Tampico, where General Woul is marching to meet him.

The Pacific.—The French have abandoned the Marquesas, and design establishing a strong military depôt near Caledonia Islands.

# Parliament.

## HOUSE OF LORDS.

Tuesday.—The first Session of the Sixth Parliament of the present reign was opened to-day by her Majesty in person. The House was crowded in every part. The Commons having been summoned to the bar, the Queen read the following gracious Speech:—

"My Lords and Gentlemen,

"I avail myself with satisfaction, in the present anxious state of public affairs, of the advice of my Parliament, which I have summoned to meet with the least possible delay.

"I have directed that papers shall be laid before you, from which you will learn how earnest and unceasing have been my endeavours to preserve the peace of Europe.

"Those endeavours have unhappily failed; and war has been declared between France and Sardinia on one side and Austria on the other. Receiving assurances of friendship from both the contending parties, I intend to maintain between them a strict and impartial neutrality; and I hope, with God's assistance, to preserve to my people the blessings of continued peace.

"Considering however the present state of Europe, I have deemed it necessary, for the security of my dominions and the honour of my Crown, to increase my naval forces to an amount exceeding that which has been sanctioned by Parliament.

"I rely with confidence on your cordial concurrence in this precautionary measure of defensive policy.

"The King of the Two Sicilies having announced to me the death of the King, his father, and his own accession, I have thought fit, in concert with the Emperor of the French, to renew my diplomatic intercourse with the Court of Naples, which had been suspended during the late reign.

"All my other foreign relations continue on a perfectly satisfactory footing.

"Gentlemen of the House of Commons,

"The estimates for the year, for which provision has not been made by the late Parliament, will be immediately laid before you, together with such supplementary estimates as present circumstances render indispensably necessary for the public service.

"My Lords and Gentlemen,

"I have directed a Bill to be prepared for giving effect, so far as the aid of Parliament may be required, to certain suggestions of the Commissioners whom I had appointed to inquire into the best mode of efficiently manning the Royal Navy; and I recommend this important subject to your immediate attention.

"Measures of legal and social improvement, the progress of which in the late Parliament was necessarily interrupted by the dissolution, will again be brought under your consideration.

"I should with pleasure give my sanction to any well-considered measure for the amendment of the laws which regulate the representation of my people in Parliament, and should you be of opinion that the necessity of giving your immediate attention to measures of urgency relating to the defence and financial condition of the country will not leave you sufficient time for legislating with due deliberation during the present Session on a subject at once so difficult and so extensive, I trust that at the commencement of the next Session your earnest attention will be given to a question of which an early and satisfactory settlement would be greatly to the public advantage.

"I feel assured that you will enter with zeal and diligence on the discharge of your Parliamentary duties, and I pray that the result of your deliberations may tend to secure to the country the continuance of peace abroad and progressive improvement at home."

At the close of the Queen's Speech the House adjourned till 4 o'clock. *The Address.*—On the reassembling of the House, the Earl of Powis moved, and Lord Lurgan seconded, the Address in answer to the Speech from the Throne.—Earl Granville reviewed at some length the foreign policy of the Government, and expressed his regret that no effort had been made to induce Russia to co-operate with us to preserve the peace of Europe—that peace had been violated by a great, a disastrous, and an unnecessary war, and it was impossible to foresee whether any good result would spring from it. The question was, had everything been done by the Government to avert a war? As far as zeal and good wishes went, he doubted not that everything had been done; but he could not yet say whether the necessary skill, ability, and determination which would have averted war had been shown. At present there was so little information on the subject that no decided opinion could be formed of it. He was glad to observe that it was the intention of the Ministry to maintain our neutrality, but he did not wish it to be understood that our neutrality would be maintained under any circumstances, as it would only encourage the belligerent Powers to disregard any remonstrances we might address to them. He could hardly conceive any cause which would justify this country in plunging into this war. The event, however, required great skill and great firmness than her Majesty's Government had yet shown. It was not his intention to move any amendment to the Address. The Government had appealed to the country, and the result of that appeal would be declared in the other House. If the vote of the House of Commons was favourable to the Ministry, he said most distinctly for himself and friends that, although they should not abstain from watching the course of public affairs, they would abstain from anything like factious opposition. If the vote should be unsatisfactory to the Government, he could only express his hope that it would be satisfactory to the country.—The Earl of Malmesbury said it was his intention to lay before the House the whole of the correspondence relating to the war and to the efforts which had been

made by the Government to secure peace. He would not in the absence of papers go further into this matter, but he was quite sure that these documents would bear comparison with the Italian papers of 1848.—Lord HOWDEN stated it as his opinion that if France established herself in Italy this country would be drawn into the war. He asked the Government whether they were ready to repeat the denial that no secret treaty or understanding existed now between France and Russia. He had reason to believe that some agreement had been concluded between those two Powers within the last three weeks.—The Marquis of NORMANBY thought that the Government had been deceived in the late negotiations. He described the intrigues of Sardinia and France, and especially of Russia, in extending her influence in the Mediterranean, and said that it was one of the objects of the Treaty of Tilsit to reject from that sea all those whose territories did not abut on it, and it was the duty of this country to be prepared for any such attempt. Condemning the sympathy which Lord Palmerston had expressed for the Italians, he expressed his satisfaction that no amendment had been moved, as he deprecated a change of Government at such a critical moment as the present.—The Earl of CARLISLE was glad to observe the unanimity among the leading statesmen to adhere strictly to neutrality. He drew the attention of the House to the strange coalition which had taken place between the Roman Catholics and the Conservative party during the recent elections.—The Earl of EGLINTOUN contradicted the reports in the newspapers of some unholy compact existing between himself and Cardinal Wiseman. In the most unequivocal manner he denied that any understanding either before or during or after the elections had been come to between the Roman Catholic party and the Irish Government.—LORD BROUGHAM said that no one was more eager than himself to see the Austrians driven from Italy, but not merely to hand them over from one master to another. Such a course, guaranteed as these provinces were to Austria by treaty, would be nothing but plunder. To disregard such a right to possessions would be contrary to the soundest principles of international law. If Lombardy, however, could be erected into an independent kingdom it would be a positive benefit to Austria by the relief it would afford to her finances. We had no reason, he thought, to distrust the Emperor of the French, yet, considering his position, we ought to be, not mistrustful, but on our guard. To increase our navy, to establish and stimulate the enrolling of volunteer rifle corps in every part of the country, would be the best means for gaining that object. —The Earl of ELLENBOROUGH cordially concurred with Lord Brougham, and said that what was wanted in the present crisis was a strong Government. He expressed his conviction that this result had not been gained by the dissolution, and wished that the House of Commons would imitate the example of Mr. Fox, who in 1804 had relinquished his opposition to Mr. Pitt when the emergencies of the time required such a sacrifice.—The Duke of ARGYLL agreed that in the present condition of affairs a strong Government was imperatively necessary. He argued, from the various measures introduced by the present Government, that they were not capable to conduct the affairs of the country.—The Earl of DERBY said that he had heard much nonsense of the efforts made by the Government to influence the late elections. In regard to Ireland they had heard the denial of Lord Eglintoun, and he for himself denied as strongly that any compact existed between him and Cardinal Wiseman. If he could see any chance of a strong Government he would gladly lay down the responsibility he had assumed, but, considering the state of foreign affairs, he thought it was his duty to remain at his post. He had accepted office with the intention of appealing to the country in case of a defeat in the House of Commons. He would admit the Government were in a minority, but at the same time he was convinced that no Government could be formed so strong and united as the one in office. The dissolution was not to discover whether the country approved the Reform Bill, but whether it approved the mode of proceeding adopted by its opponents. Whatever our feelings on the present struggle in Italy, we were bound by treaties not to give way to them. He thought this war had been undertaken on false pretences, at the instance of Sardinia, but neither on one side nor the other was there any ground for quarrel which might not have been arranged by diplomacy. It was for this country to maintain a strict neutrality between all parties. But the position of a neutral was most delicate and difficult, and it would be madness in a statesman, however sincerely desirous of neutrality, not adequately to provide for the defence of the country, as the only neutrality to be respected must be an armed neutrality. He entertained no fear of an approximate invasion, but when he saw the increasing armaments of other nations it became the duty of the Government to place the navy of the country on a strong footing. In the present state of things he believed no demand for the defence of the kingdom would be refused by the House of Commons. If it should be proved that her Majesty's Government does not possess the confidence of the country, and that another party does, he could only say that he should lay down with greater pleasure than he had taken up the responsibility of office. Should however, as he expected, a contrary decision be arrived at, he hailed with pleasure the promise of Lord Granville that no factious opposition would be offered to the Government.—The Address was then agreed to.

THURSDAY.—The *Law of Property and Trustees' Relief Amendment Bills*, were read a second time.—The Earl of SHAFTESBURY inquired whether there was any intention of granting a charter to the *Roman Catholic University of Dublin*?—The Earl of DERBY replied that as at present advised it was not the intention of the Government to recommend the granting of a charter.—The *Reply of Her Majesty* to their lordships' Address was brought up by the Marquis of EXETER. The *Malicious Indictments Bill*, the *Law of Debtor and Creditor Bill*, and the Bill relative to *Joint-stock Companies* were read a first time.—Lord SHAFTESBURY moved for copies of the correspondence between the trustees of the National Gallery and the Council of the Society of Arts, with reference to the opening of the *Vernon and Turner Galleries* of Pictures at the South Kensington Museum of an evening; and also for copies of all letters and memorials on the subject which may have been received by the trustees.—The Marquis of SALISBURY had no objection to the motion, which was agreed to.

FRIDAY.—*Dissenters' Trusts.*—Lord BROUGHAM said it was his intention to have introduced a Bill to remedy the evil effects of the Lords Justices' decision by which Dissenters are excluded from the trusteeships of endowed schools; but he abstained from doing so, as such a Bill had been brought forward in the other House. The *Vexatious Indictments Bill*, the *Debtor and Creditor Bill*, and the *Companies Winding-up Bill* were read a second time and committed. The *Law of Property and Trustees Amendment Bill* was read a third time and passed.

## HOUSE OF COMMONS.

MONDAY.—The *Jewish Members.*—On the re-assembling of the House for the purpose of swearing in members Baron ROTHSCHILD presented himself, and objected to take the oaths in the usual form.—Lord J. RUSSELL then moved the resolution to omit in this instance the words "on the true faith of a Christian."—Mr. NEWDEGATE recapitulated his arguments against the resolution, protesting against depriving the Legislature of its Christian character, and objecting to Baron Rothschild in particular, as an Austrian nobleman.—Lord J. RUSSELL declined to argue a question already settled.—The SPEAKER put the question, and declared the resolution carried.—Mr. NEWDEGATE and Mr. SPOONER both declared that they had said "no" when the question was put.—After some discussion on this point Baron ROTHSCHILD, Baron M. ROTHSCHILD, and Alderman SALOMONS took the oaths according to the terms of the resolution.

TUESDAY.—*The Address.*—Mr. A. EGERTON having moved and Sir J. ELPHINSTONE seconded the Address in answer to the Speech from the Throne, the Marquis of HARTINGTON moved an amendment expressing a want of confidence in Ministers, justifying this course by the precedent of 1841, and upon the ground that this question was the real issue which they had put to the country. If this motion was successful, it could not be otherwise than satisfactory to Ministers to be relieved from a position which they could not desire to occupy. He criticised the principal measures proposed by the present Government, and especially condemned the manner in which they had received the sentence of the House upon their Reform Bill, by dissolving Parliament at a crisis when its advice was so much needed. With regard to their foreign policy, he thought it was impossible not to infer from its results that there had been mismanagement in it. He might be told, he said, that this amendment was a party move; he admitted it; but it was not a party move for the political aggrandisement of any individuals. He wished to see power in the hands of the Liberal party, whose differences, he observed, were not of principle, but only of detail, rather than in those of a party antagonistic to all progress. He concluded by reading the terms of his amendment, which represented to her Majesty that the confidence of the House was not reposed in her Majesty's present advisers.—The amendment was seconded by Mr. HANBURY.—The CHANCELLOR of the EXCHEQUER said he found no fault with the course taken by Lord Hartington and his friends, which was a convenient one; but he denied that there was any analogy between the present case and that of 1841. It was of great advantage that it should be known whether the advisers of the Crown possessed the confidence of the House. It was desirable that this question should be decided without delay, and he hoped the House would be able to divide that night. He proceeded to discuss the grounds assigned for the vote of want of confidence. He insisted that the failure of the Government measures in the last Parliament was not a fair ground upon which to rest such a vote in the present. He justified the dissolution, and congratulated Lord Hartington upon his having abstained from repeating certain trash which had, during the recess, been the subject of charges against the Government out of doors. He spoke in terms of severe reprehension of the allegations made by Sir J. Graham at Carlisle, to which he gave an indignant denial. The supposed compact with the Roman Catholics he utterly repudiated. The manner in which our foreign negotiations had been conducted was another ground for the vote of want of confidence; but he contended that it was neither just nor conformable to the practice of the House to decide this question in the absence of the necessary documents. The last ground for the vote was the failure of the Reform Bill proposed by the Government, and their insufficiency to deal with the question of Parliamentary Reform. He compared that measure with the last Bill upon this subject introduced by Lord J. Russell, and asked why the present Ministers should be less qualified to deal with it than that noble lord, whose Bill exhibited so many shortcomings, or than Lord Palmerston, who had shrunk from it altogether. Adverting to the two main topics in the Royal Speech, he said, with respect to the first, the Government had endeavoured by all the means in their power to preserve peace, and he was ready to vindicate them on this head. He retained the opinion he had formerly expressed, that the vote at which the House had arrived upon Lord J. Russell's resolution had a serious influence upon the negotiations; but still the representations of the Government, backed by public opinion, had been listened to with respect; they had since adopted the principle of a strict and impartial neutrality, and endeavoured to act in the spirit of that principle. With regard to the other subject, that of Parliamentary Reform, he said at once that it was the opinion of the Government that that great question could not be satisfactorily dealt with during this session. If that was a fair ground for a censure of the Government they were ready to meet the issue. At the same time they did not desire to shrink from the responsibility of dealing with this question, which ought not to be monopolised by any person or party. He reviewed some of the elements of this question, maintaining that the present Government were perfectly free to deal with it without being bound or hampered by their proposition in the last Parliament. Treating the question raised by the amendment as really one of personal sufficiency, which he admitted was a fair ground for a vote of want of confidence, he met it upon that ground, and made some sarcastic comments upon the personal claims of some of those who expected to succeed the present Government. He acknowledged that the area of selection for the public service was limited; but the Conservative party was not a federation of great families, and he hoped that the House would not hastily adopt an amendment which came from a limited and an exclusive party.—Lord BURY, in supporting the amendment, said that in the present state of affairs he was not disposed to entrust the conduct of our foreign negotiations to the present Government, the sincerity of whose professions of neutrality he distrusted, and who, in his opinion, had shown a partiality towards Austria.—Mr. MELLOR and Mr. HUGESSEN likewise supported the amendment.—Sir C. NAPIER made some observations on the state of the Navy.—Mr. WILSON blamed the Government for dissolving the late Parliament, and entered at great length into the subjects of finance and of the war.—Mr. DIGBY SEYMOUR opposed the amendment.—Mr. LAING supported it.—Lord PALMERSTON said that the present conduct of the Government proved the necessity of the amendment, and that they showed by their conscious weakness how unworthy they were of the confidence of the House. Their silence in the face of the charges against them was most extraordinary. It might have been expected that they would have pressed forward eagerly in their own defence, instead of which they demanded to be taken upon trust, and only asked that there should be no inquiry into their conduct. This was too grave a matter to be disposed of in so light and airy a manner, and the conduct of the Government was disgraceful in the face of the serious circumstances of Europe. Their mistakes in domestic—their errors in foreign policy—their proceedings in regard to the dissolution, justified the House in withholding its confidence. They came into power by a manœuvre, and not under circumstances which entitled them to the support of the country. They had failed in their legislative measures, and the late dissolution, under the circumstances of the country and of Europe, was culpable and unconstitutional. It was his conscientious opinion that the course they had pursued brought on the war. They entertained the notion that the danger of war arose from France and Sardinia, and it was the language which they held in consequence that prevented peace from being preserved. If they had known, as they ought to have known, what was going on at Vienna, their conduct towards Austria would have been very different. It was due to the country that it should at once be cleared up, whether the late elections had or had not given a majority to the Ministers. His belief was that the verdict would be against them, but, whatever was the result, it should be given at once, to enable them, if they succeeded, to pursue their course without fear or interruption.—Mr. Serjeant DEASY moved the adjournment of the debate.—The CHANCELLOR of the EXCHEQUER assented, and the debate was accordingly adjourned to Thursday.

WEDNESDAY.—The House sat for a short time.—Mr. DILLWYN obtained leave to bring in a Bill to amend the law relating to *Endowed Schools*. A motion by Mr. HADFIELD, that a certain return relating to *Affghanistan* should be printed, gave rise to some discussion. The motion was ultimately agreed to.—Mr. DUNLOP obtained leave to introduce a Bill to amend the Act for allowing verdicts on *Trials by Jury in Civil Causes* in Scotland to be received, although the jury may not be unanimous.

THURSDAY.—Sir J. TRELAWNY obtained leave to bring in a bill for the *Abolition of Church Rates.*—Mr. BLACK obtained leave to bring in a bill to abolish the *Annuity Tax* in the city of Edinburgh, the parish of Canongate, and the borough of Leith.—Mr. AYRTON obtained leave to bring in a bill to amend the *Laws Relating to Newspapers.*—The *Adjourned Debate on the Address* was resumed by Mr. Serjeant DEASY in favour of the amendment, which was opposed by Col. DICKSON and Mr. FITZGERALD, and supported by Mr. DUFF.—Mr. BRIGHT said he was not about to defend Lord Palmerston, and had no wish to convince him that the Government had not done all in their power to prevent the war now raging in Italy; but, as to the neutrality to which the Government had pledged themselves, he wanted to know whether it was real or pretended. The question applied almost entirely to France. The increase of our naval force in the Mediterranean, the bounties offered for enlistment in the navy, and the formation of rifle corps were not directed against Austria; and was it not likely, or even inevitable, that these preparations would destroy in the minds of the French Government and people confidence in our professions of neutrality? There was no reason to distrust the Emperor of the French; there was increased cause of suspicion; yet in Germany the general belief was that the Government of England was disposed rather to side with Austria than with France. He was not disposed to blame the present Ministers for all this; but he could not confide in a Government whose neutrality, so far as he had an active explanation of it, was to be found in continued and gigantic preparations for war. He did not doubt that from the next Government there would be the same professions of neutrality; but, with regard to France, all classes of the people would feel that there would be somewhat more of sympathy towards France on the part of their successor than, as far as he knew, was entertained by the present Government. He was not, however, one of those who approved the personal alliance between France and England, which, in his opinion, did not add to the dignity or to the advantage of either nation. He should prefer a generous and dignified conduct on the part of both Governments to an alliance that seemed to separate them from other nations. On the subject of Parliamentary Reform, after a strong condemnation of the late Bill, he insisted that there was still sufficient time in the present session to bring forward another measure; but, besides this question and that of our foreign policy, there were other reasons why the present Government had not the confidence of the House. He believed that with a new Government there would be a more friendly feeling with France, and that there would be laid upon the table a measure of reform which it would be the duty of the House and the people to accept. But his support of any Government would depend upon their measures and their policy.—Lord ASHLEY, Mr. BAXTER, Mr. CROSSLEY, and Mr. HORSMAN supported the amendment; Mr. PALK, Mr. LIDDELL, Mr. GURNEY, Mr. SPOONER, and Mr. K. SEYMER opposed it.—Sir J. GRAHAM said that it was impossible for him to give a silent vote on this occasion. He maintained that, although he had been wrong in stating that the change in the billet system had been effected without the authority or sanction of Parliament, still that he was right in stating that the change had been carried on the eve of a general election, and that the most undue influence had been exercised to return candidates for Devonport and other places. Having defended himself at some length from the recent attack of the Chancellor of the Exchequer, he said he be looked upon that right hon. gentleman as the Red Indian of debate. By the use of the tomahawk he had cut his way to power, and by the help of the scalping knife he hoped to prevent the loss of it. He was astonished at the rudeness of the assault; still he was ready to forgive it, as he felt it was to be traced to disappointed feelings and blighted hopes. After reviewing the principal measures adopted by the Government during the interregnum, he characterised the steps taken—their own responsibility with reference to manning the navy and organising rifle clubs as improvident and impolitic, and forestalling the decision of Parliament. The shortcomings of the Administration had reached their culminating point. Forbearance and hints were alike exhausted. The time for using the plainest language had arrived, and therefore, without hesitation, he was prepared to support the amendment.—Mr. WHITESIDE contended that the Government had been calumniated, and that, if a Cabinet should be formed of such extraordinary elements as the right hon gentleman, Mr. Sidney Herbert, Lord Palmerston, and Mr. Bright, would soon collapse by reason of its own internal weakness. With regard to the alleged compact with the Catholics, he repudiated the insinuation that the Government had made any corrupt advances to that body, that there was the slightest truth in the allegation that they had agreed to give a public contract to the Galway Mail Packet Company in return for political support, or that they had promised a charter for a Roman Catholic University in Dublin. He called upon the House not to destroy the Ministry before it had been tried and found wanting.—On the motion of Mr. MILNER GIBSON the debate was again adjourned

FRIDAY.—The *Adjourned Debate on the Address* was resumed by Mr. GIBSON, who spoke at some length in favour of the amendment, censuring the conduct of the Government during the recent elections, and expressing his opinion that with regard to foreign policy, there was not that neutrality on the part of the government which was alleged.—Mr. LINDSAY supposed the amendment. He considered that he was as earnest an advocate of reform as the right hon. gentleman who had just sat down; and he believed that in voting with the government on this occasion, he was best supporting the interests of his Liberal constituents.

[Left sitting.]

## City Intelligence.

BANK RATE OF DISCOUNT.—The Directors of the Bank of England on Thursday made a reduction of ½ per cent. in their minimum charge for discount and interest, and the rate is now 3 per cent. instead of 3½ per cent., to which point it was reduced a week ago.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 93⅞ to 94 for Money and Acct.; Bank Stock, 219½; Reduced and New Three per Cents., 92⅝ to ⅞; Indian Four per Cent. Debentures of last year, 94¾; Scrip of New Indian Loan, 93½; India Bonds at par; Exchequer Bills, 22*s.* to 25*s.* pm.—FOREIGN: Dutch Two and a Half per Cents., 62⅜; Ditto Four per Cent. Certificates, 95⅝; Equador New Consolidated Bonds, 15; Mexican Three per Cents., 18½; Ditto for Acct., 17⅞ to 18; New Granada Deferred Bonds, 4; Peruvian Four and a Half per Cents., for Acct., 78; Ditto Uribarren Four and a Half per Cents., Russian Five per Cents., 105 to 104½; Spanish Three per Cents., for Acct., 41⅛ to 42; Ditto New Deferred Three per Cents., 29¼; Turkish Six per Cents., 1854, 70

Ditto for Acct., 69¼; Ditto for 1858, 58; Venezuela Five per Cents., for Acct., 39¾ to 40; Ditto Deferred Two per Cents., 17.

SAWYER, Sheffield, Tool Manufacturers—M. TOWLE, Lenton, Nottinghamshire, Lace Manufacturer.

## Metropolis and its Vicinity.

LOSS OF HER MAJESTY'S SHIP HERON.—Her Majesty's sloop Heron was totally lost at 4 A.M. on the 9th of May, 200 miles from the coast of Africa. She was caught in a tornado and instantly capsized, with the loss of 107 lives. Captain Truscott, his gunner, boatswain, 16 seamen, four Portuguese, and two Kroomen saved themselves in a boat, which was picked up and conveyed to Sierra Leone; but Captain Truscott subsequently died on the passage to Liverpool, of yellow fever. Previously to her loss the Heron captured a slaver, after a chase of 12 hours. The list of the lost includes Lieut. Collingwood; Lieut. Porter; Mr. Smart, master; Mr. Freeman, paymaster; Dr. Sproule; Dr. James Reid; Mr. Blair, mate; Mr. Johnston, clerk; Mr. Utney, midshipman; Mr. Abbott, master's assistant; Mr. Richard Hicks; 76 seamen and marines, 9 Kroomen, and 11 Spaniards belonging to the slaver, making a total loss of 107. The slaver has arrived at Sierra Leone in charge of Lieut. Chapman and a prize crew.

THE EARL OF ELGIN ON CHINA AND JAPAN.—A grand banquet was given by the Lord Mayor on Friday at the Mansion House to her Majesty's judges. Among the guests was the Earl of Elgin, who in returning thanks for the toast of his health, made the following remarks on the state of China and Japan:—

"I have just been in a country which boasts of its laws. Now, these laws certainly contain many things deserving of commendation, and not wholly unworthy of our imitation. They profess a pure and elevated morality; but one thing neutralises all their merits, viz., the integrity of those who administer them. The administration of the law is not wholly above suspicion, and this gangrene penetrates the whole moral and political system of China, and produces everywhere corruption and decay. Therefore it is a great pleasure to a wandering Englishman like me, on returning home, to find that, for integrity, wisdom, learning, and impartiality the judges of his country are as distinguished as they ever were, and are held in as high estimation by the public; and I believe that, so long as a wandering Englishman makes this discovery on his return, he may cherish the conviction that the foundation on which our social and political fabric rests is sound and lasting. But while casting this reflection on the administrative system of China, it is fair I should say that it provides some securities against maladministration, which, according to received opinions, ought to be highly efficacious. In the first place all candidates for vacancies in the public service of China have to pass through that ordeal which many ardent reformers here think presents an infallible test not only of capacity but of all the virtues. They all have to go through the ordeal of a competitive examination, but in a rather different form from that we adopt. Now, it is a matter of custom, or rather of positive enactment, in this celestial land that every official of high rank—for this privilege is only confined to such persons—accepts his position with the comfortable assurance that if he fails to extricate himself creditably out of his difficulties and embarrassments he will sooner or later terminate his career by decapitation. No doubt that system has some inconveniences which press somewhat hardly on individuals, but it provides vacancies, and its effects in that way are undoubtedly a powerful encouragement to enterprising young men desirous of entering the public service. But I cannot help sometimes thinking that if that practice was introduced into this country it would at first at least produce considerable perturbation among the heads of public departments. At any rate, it would have a powerful tendency to reduce that plethora of prime ministers—that determination of blood to the head—which would seem to be the disease, judging from present appearances, from which England is most likely to perish. However, my experiences in the East lead me to the conclusion that competitive examinations, even when completed by decapitation, are not an adequate substitute for that morality which is the product of the free institutions and the Christian training of England. It is an extraordinary fact that though the late Parliament, which lately died of an unnatural death, was elected for the express purpose of looking after affairs in China, it observed during the whole of its brief existence so discreet a silence on the subject that it neither asked for nor received any communication whatsoever with respect to our proceedings in that country; and, if I were now to open my whole heart with regard to our diplomatic relations with China, the chances are that I might unwittingly betray some secrets of State, and after feasting luxuriously at the Mansion House to-night, find myself taking breakfast to-morrow under the auspices of the Constable of the Tower. In speaking of the probable effects of the recent treaty made with China on our commercial relations with that country, I am anxious to avoid all exaggeration, but it is very difficult to talk about 400,000,000 of people without making some statements which may sound extravagant. A friend of mine said to me that if I wished to calculate what would be the extent of the demand by China for our cotton manufactures, I was just to estimate how much cotton would be required to supply nightcaps to 400,000,000 of people. As my experience of the Chinese was confined to the daytime, I am unable to say whether they wear nightcaps or not; but, if they do, certainly the quantity of cotton necessary to make them large enough to tie up their long tails with, will be something extraordinary. But I do know, in the first place, that the 400,000,000 Chinese wear blue cotton blouses, and in the second that they wear another garment, and that the Chinese ladies are in this respect habited like their lords. Yet I never heard that the practice was attended by any of those domestic inconveniences which it is said would attend them here. But, talking seriously, China and Japan are now both open to British enterprise. The barriers which separated 400,000,000 of people from their fellow-men have been absolutely swept away; so far at least as that can be done by international engagements. It is a great mistake, however, to suppose, as was done on the occasion of a former treaty with China, that diplomacy can accomplish all that is requisite. Our manufacturers must tax their ingenuity to supplant those native fabrics which are produced by that industrious, sober, and frugal population in their hours of rest from labour. The work has been begun by the feeble hand of diplomacy, and it must be continued and extended by the stalwart arms of the manufacturers of England. If it is, I feel assured that the result will be a great extension of the commerce of England, and the opening up of a new era of civilisation and prosperity for a large portion of the human race."

SIR JOHN LAWRENCE ON THE INDIAN REBELLION.—At the meeting in Guildhall on Friday Sir J. Lawrence in returning thanks for the presentation of the freedom of the City spoke as follows on the affairs of India during the late rebellion:—

"I thank your lordship and this hon. court for the distinguished honour which has this day been conferred on me—an honour which I share with some of England's greatest worthies—the bravest, the noblest of our countrymen—an honour the value of which, if possible, is enhanced by the handsome terms in which it has been conveyed. The Chamberlain has paid a kind, but just tribute to the merits and services of my lamented brother, Sir Henry Lawrence. He was a man of the highest aspirations and of unbounded benevolence. During a long career of upwards of 35 years in Burmah, in Affghanistan, in the Punjaub, and in Rajpootana, he served with great distinction, maintaining the honour of his country and the reputation of its arms. The personal influence which he exercised over those with whom he came in contact was remarkable. Few men in their generation have effected more good for the means at their disposal. Few have lived more honoured or died more lamented. In the closing scenes of his life at Lucknow his merits were more especially conspicuous. By his tact, his temper, and his conciliation, he maintained the public tranquillity, so long as this was practicable; while by his sagacity and prudence he foresaw and made preparation for the conflict which was inevitable. It has been admitted by the most distinguished of the defenders of Lucknow, that to Sir H. Lawrence they owed the success which attended that struggle. Regarding myself it becomes me to say but little. If I was placed in a position of extreme danger and difficulty, I was also fortunate in having around me some of the ablest civil and military officers in India. In times of peace we had worked so as to be prepared for times of commotion and danger. We had laboured to introduce into a new country order, law, and system. Our object had been to improve the condition of the people, and obtain their goodwill and sympathies, and hence it happened that, by God's help, we were able to meet the storm which must otherwise have overwhelmed us all. I have received honours and distinctions from my Sovereign; I have been welcomed by my countrymen of all classes since my return home with consideration—I may say with affection; but I hope that some rewards will even yet be extended to those who so nobly shared with me the perils of the struggle, and by whose aid my efforts to maintain the supremacy of my country were crowned with success."

THE REMAINS OF SIR THOMAS PICTON.—On Wednesday morning, with the approbation of her Majesty, the Government removed the coffin containing the remains of General Sir Thomas Picton from the cemetery in the Bayswater Road, in which they were hastily interred after the battle of Waterloo, to St. Paul's Cathedral. The removal took place at 11 o'clock when the coffin was placed on a gun-carriage, provided by command of the Duke of Cambridge, and accompanied by the carriages of several of the surviving officers who were comrades of Sir Thomas Picton, and of others who wished to pay a tribute of respect to so illustrious a man. In the first mourning coach, as chief mourner, was Mr. John Picton, nephew of the General, and among the other mourners was the Rev. Dr. Macnab, of Canada, representing his uncle, Captain Alexander Macnab, of the 30th Regiment, who was aide-de-camp to General Picton, and also fell at Waterloo. The procession passed along Oxford Street, Regent Street, the upper part of Trafalgar Square, and so by the Strand and Fleet Street to St. Paul's, where it arrived about 1 o'clock. There was no funeral service or other religious or military ceremony. On arriving at the Cathedral the body was met by Dean Milman, Archdeacon Hale, and several prebendaries and minor canons, who preceded the body to the crypt, where it was deposited in a vault which had been constructed not far from the tomb of the Duke of Wellington.

UNIFORM MUSICAL PITCH.—A private meeting of a number of leading scientific men and those interested in music, both as professors and amateurs, was held at the house of the Society of Arts on Friday, by invitation of the Council of that Society, for the purpose of discussing the propriety of adopting in this country a uniform musical pitch, as has been recently done in France. The Rev. Dr. Whewell, Master of Trinity College, Cambridge, presided; and among those present were the Earl of Cawdor, the Earl of Westmoreland, Sir George Smart, the Dean of Hereford, Lord Gerald Fitzgerald, Dr. Arnott, Dr. Wylde, Messrs. Benedict, Blagrove, Bowley, H. F. Chorley, George Cooper, F. Davison, J. Ella, Otto and Madame Goldschmidt, H. Griesbach, Hogarth, E. Hopkins, John Hullah, J. Köhler, H. J. Lincoln, H. C. Lunn, G. Metzler, A. Nicholson, W. Pole, Lindsay Sloper, C. N. Wornum, C. W. Dilke, and several members of the Council of the Society.

LAUNCH OF THE ARIADNE.—Another addition was made to the navy on Saturday afternoon, by the launch from Deptford Dockyard of the 26-gun screw frigate Ariadne, in the presence of many thousands of spectators. The Ariadne is 3202 tons, 318 feet in extreme length, and is to be fitted with engines by Messrs. Maudsley & Co. in the Victoria Docks, as the requisite accommodation cannot be provided at Woolwich yard on account of her great length.

MEETING OF ROMAN CATHOLICS.—On Wednesday afternoon a meeting of the Roman Catholic body was held at St. James's Hall, for the purpose of impressing upon the Government the necessity of granting them the privilege of chaplains in workhouses and prisons. The Hon. Charles Langdale was called to the chair, and there were present several members of the old Catholic families, several members of Parliament, and numerous clergymen and laymen who had become converts from the Church of England. The chairman read letters from Lord Stourton, Lord Vaux, and Lord Dormer, expressing their regret that they could not attend, and their hearty sympathy with the objects of the meeting. He said that all the Catholic bishops of England had sympathised with the movement, and the "Bishop of Birmingham" had written to say that the Catholics would never be content until they were placed upon an absolute equality with their fellow-countrymen in the undisturbed exercise of religion. Resolutions in accordance with the object of the meeting were agreed to.

PUBLIC DRINKING FOUNTAINS.—A meeting was held in St. Martin's Hall a few days since in favour of the Association for Promoting the Erection of Free Drinking Fountains in the Metropolis. Mr. Gurney, M.P., presided, and said that he knew of no other movement more likely to promote the cause of temperance. The movement had been originated by Mr. Melly, of Liverpool, who had expended 2000*l.* in erecting fountains in that town out of his own pocket. He should like to see the movement general through London and the provinces; they should also be erected in all factories for the use of the workpeople, and he hoped in hot weather that drinking troughs would be provided for dogs. Mr. Wakefield then read an account of the proceedings of the association, from which it appeared that most of the metropolitan vestries had promised to render every assistance in promoting the movement, 2000*l.* had been subscribed by private persons, in addition to donations of seven fountains. Among the donors of these fountains were the Earl of Carlisle and Lord John Russell. Mr. Gurney had subscribed 500*l.* In Liverpool, according to Mr. Melly, 43 fountains had been erected, and there was room for 23 more in that town. According to that London would require 400. The association hoped that the movement would be cordially supported by the working classes. The Earl of Carlisle addressed the meeting and said that it was in the power of the upper classes to procure water and other beverages which they might more highly prize; and it was the hope of the association that water would be supplied to the working classes in every district of this large city. His lordship in conclusion moved a resolution, "That drinking fountains would supply a great want and promote the comfort and temperance of the working classes." Mr. Hanbury, M.P., seconded the resolution. He said it was of great importance that pure water should be provided for the fountains, not such water as was supplied to the pumps. It had been calculated that if the fountains were erected in London 132,000,000 draughts would be taken in the course of a year. The resolution was also supported by the Rev. Mr. Garwood, of the London City Mission, and carried unanimously. A resolution was moved by Mr. Slaney, M.P., inviting the working classes to contribute to the erection of drinking fountains for their own use. The resolution was seconded by Mr. Smithies, and carried unanimously. Mr. Whitmore, a working man, moved that a committee of working men should be formed for the purpose of co-operating with the association, and dwelt upon the benefit that would result from the erection of drinking fountains. The motion was seconded by Mr. Howlett, also a working man, who said that every fountain that was erected in the streets of London would be a blessing, and every beershop that was established a curse. The motion was carried unanimously.

PUBLIC DRINKING FOUNTAIN ON BLACKHEATH.—Lord Haddo has erected a drinking fountain near Chesterfield's Walk, Blackheath. It is suggested that the Commissioners of the Royal Hospital would do good service by erecting another fountain near the reservoir, Greenwich Park.

DISTURBANCES AT ST. GEORGE'S-IN-THE-EAST.—On Sunday afternoon the church of St. George's-in-the-East was the scene of an extraordinary uproar, in consequence of the form of service conducted by the Rev. Bryan King, the rector, in opposition to the officials and ratepayers of the parish, who assembled to the number of 3000 to interrupt the ceremony. It had previously been announced that the Rev. Hugh Allen, the afternoon lecturer, would not preach as usual, the Bishop of London having recommended him to abstain from officiating for the present. A large body of police constables of the K division were present by order of the Commissioners of Police to keep order, and a mounted police officer patrolled the street to keep the carriage way clear. As soon as the gates were thrown open the church was speedily crowded in every part. On the appearance of the choristers, followed by the Rev. Bryan King and the curate, they were greeted with hisses, and as they proceeded up the middle aisle the confusion increased. The curate commenced reading the service when he was inter-

lapted by loud cries of "No Popery," and continued hissing from the congregation. The disturbance then became so general and alarming that fears were entertained by the authorities for the safety of the furniture, &c., when the Rev. Mr. Richardson, of St. Matthew's Church, offered to conduct the service, and was introduced by the churchwardens to the rector, who declined the offer. The excitement at this juncture became so great that it was found impossible to proceed with the service. The rector then retired to the vestry, and shortly afterwards left the church and returned to the rectory amidst renewed cries of "No Popery," accompanied by groans and hisses. In the evening, at the 7 o'clock service, there was a similar demonstration towards the rector, who went through the service without interruption; but the hissing again commenced as soon as the preacher ascended the pulpit, and was repeated at intervals until the service was over, when the rector retired with his choir followed by repeated cries of "No Popery," "No Puseyism." The rush was so great at the moment of his leaving the church, that a large number of police hurried up to guard him, or he might have been injured. He was again groaned and hissed into the rectory, after which the people dispersed.

THE LATE ACCIDENT AT THE WESTMINSTER PALACE HOTEL.—The adjourned inquest on the bodies of the seven unfortunate workmen who were killed by the fatal accident in Victoria Street was resumed on Thursday, when the jury after an absence of two hours returned the following verdict:—

"The jury appointed to inquire as to the cause of the late lamentable accident at the Westminster Palace Hotel, which resulted in the deaths of seven persons, are of opinion that such deplorable occurrence was entirely owing to the accidental falling of an overloaded scaffold on which these unfortunate men were at work; the jury are further of opinion that there is not sufficient evidence before them to affix the blame of such overloading on any particular person or persons; but that some blame attaches to William Coleman in not promptly carrying out the orders he received from his employers to make a new scaffold. They cannot conclude this most painful and distressing inquiry without expressing an earnest and fervent hope that in all such erections, whether of scaffold or platform, where the lives of their fellow-men are likely to be jeopardised, more caution and circumspection will be practised by the workmen in future. The jury cannot separate without expressing their strong disapprobation of the loose, confused, and unsatisfactory manner in which the evidence in this case has been collected and put before them."

THE PUBLIC HEALTH.—The Registrar-General's weekly return states that the deaths in London in the week that ended Saturday, June 4, were 998. In the corresponding weeks of the ten years 1849-58 the average number was 979; which, if raised in proportion to the increase of population, will become 1076. The return of last week was therefore 78 below the average. During the week the births of 786 boys and 807 girls, in all 1593 children, were registered in London. In the ten corresponding weeks of the years 1849-58 the average number was 1485.

## Provincial.

CHELTENHAM.—Two public meetings were held in this town on the 2d inst., for the purpose of forming a Rifle Corps—one in the afternoon and the other in the evening. The evening meeting was called in favour of those tradesmen, shop assistants, and others who could not be present in the middle of the day. The Earl of Ellenborough presided, and spoke as follows on the subject of the war in relation to the national defences:—

"If there were tradesmen present, and he supposed there were, they, of all others, in his opinion, were especially interested in preventing an enemy landing on these shores, as being likely to suffer most from such an occurrence. All monetary transactions of the country would be altogether impaired and injured from the very instant it was known an enemy had landed. What would be the effect of that panic occasioned by the approach of an enemy to London, and what could be the mode of conducting monetary transactions with the means of communication interfered with? And what must we do? It was not enough to feel satisfied that if the enemy landed we should be enabled to repel him; we must be so strong as to deter him from attempting invasion. They might depend upon it that the mere act of invasion, if the enemy were but a week in the country, and if it terminated by his expulsion or the destruction of all his forces, that single week of invasion would produce an injury to the material interests of this country which a hundred years would hardly recover. He dared say there were a good many among them who thought it possible to avoid all these misfortunes by preserving a strict neutrality. There could be no one more desirous than himself that we should not be involved in war. But he would tell them this, that neutrality, although it put off war, did not prevent it. On the contrary, it might ultimately bring upon us a war infinitely more dangerous than that in which we refused to engage before. While two great nations were contending against each other, if we engaged in a war, at least, we should have one of these nations with us; if we waited till one of these nations was trampled upon and beaten by the other, and was deprived of strength to contend in the field, and then we were disposed to contend against the conqueror, we should contend alone against a Power which had matured its forces, against a force disciplined in the field, and therefore to our disadvantage. However desirable we might think it to maintain neutrality, neutrality alone could give us no security, and might render war more dangerous; and was it this we should declare absolutely to be our policy? If France should understand and be convinced, under any circumstances, that England would not interfere, her conduct would assuredly be very different from what it otherwise might be; but, in point of fact, we might be practically creating a state of things by declaring our persistence in neutrality which might compel us to violate it, and engage in war besides. He knew not that it was necessary for him to say anything of the nature and character of the present war. But there was one point connected with it about which he hoped they were under no delusion. He trusted they did not suppose it was really a war for the independence of Italy. If he could think it were so, no one would rejoice in its success more than he should. He had been earnestly desirous of seeing a great and really independent State in Italy from the earliest period of his life. He was looking back the other day, and he saw that as much as 43 years ago he expressed himself to that effect, when he was a member of the House of Commons, and it had been the desire of his whole public life. No event would more strongly conduce to the security of Austria herself than the creation of a great and independent Power in Italy. He had not the smallest hope of any such result from any interference on the part of France. The object of France was to transfer to herself that supremacy in Italy which had been possessed by Austria since 1814. Austria had held it for defensive purposes; France would hold it for the purposes of offence, and in her hands it would be an important step towards making the Mediterranean a French lake. They were told, and the French were told that this war in Italy was in obedience to the traditional policy of France. Now about three centuries and a half ago Italy was really independent, and was then divided into a number of different States. There was one kingdom, several principalities, duchies, and republics. Every one of these different States was governed by a native, to the exclusion of the foreigner. The country was represented as having been thoroughly cultivated, and as distinguished more than any other country in the arts, sciences, literature, and in everything that elevated the character of man. What happened then? Why in came a French King; he overturned all independence, and from that time to the present there had been no instance in which French sovereigns of whatever race had not, whenever they had the opportunity, struck a blow at the independence of Italy for their own advantage. That was the traditional policy of France, and that the species of independence which she would in reality give to Italy. He was not going to defend the civil government of Austria. He believed that in some of the States it was good government, suited to the people, who were contented and absolutely devoted to their Government. In foreign countries it was of a different character. But we must not undertake the reform of the civil government of any nation. If we were to do so he thought we might begin with material advantage at no distance so great than from our own shores. However they did not enter into that. We only looked at Austria as a great military Power, to which in its strength was mainly entrusted the independence of Central Europe. And it was altogether contrary to our interests, and the interests of every State in Central Europe that Austria should maintain unimpaired the military power she possessed. If they looked back to past times, and the wars of the French Revolution, they would see with what gallantry Austria came forward, and what advantage we derived from her actions. In 1805 Austria, at her own great risk, rushed forward and prevented the invasion of this country. In 1809 she again moved forward, she again suffered great defeats, but she facilitated by her movements the advance of the Duke of Wellington on Madrid, and laid the foundation of the liberation of Spain. Notwithstanding all the defeats of 1805 and 1809, and her weakness, Austria again in 1813 joined the allies, gave into their hands her territory in Bohemia, for the purpose of enabling them to act against the French, and mainly contributed in Germany, and afterwards in France, to the liberation of Europe. We must not, therefore, allow ourselves to be diverted from the recollection of past times in dealing with the present. He would not go into another point of great importance, and well worthy the attention of the public; he meant the understanding wich evidently existed between Russia and France, an understanding existing between two great despotic military Powers with reference to what their conduct shall be in supporting the independence and freedom of Italy. There was reason, he believed, to suspect the purity of the motives of both parties; but this they might observe, while Russia, by bringing 150,000 men on the frontiers of Poland practically paralysed Germany, we, likewise, in the movements of our fleet, were already, if not paralysed, yet greatly checked and controlled by the presence of a Russian fleet of 30 sail of the line, which had been largely increased since the commencement of this war, for we could not venture to send the whole of our force to the Mediterranean, knowing, if we did, that that fleet might anchor at Spithead. Yet we were told that Russia had assured the English Government that there was nothing whatever existing between France and herself contrary to our interests; and they accepted that explanation. If the Government was not afraid of an understanding between Russia and France, it the more behoved the people of this country to be afraid, and to take their own course for their deliverance. There had not been in this country since the time of King John the foot of one single armed foreigner. All other nations had suffered the ruin, the spoliation, and the disgrace which attend successful invasion. We were the only military State in Europe which had not in the course of the last 50 years seen an invading enemy in its capital. They could have no idea of the extent of the horrors of foreign invasion, and whatever it might be in other countries, here they would be worse, since the enemy would come with the accumulated hatred and revenge of six centuries. He heartily hoped the public spirit of the people of this country would raise a force which would protect us from such a visitation."

MALTON.—The body of Mr. Jennings, who has been missing for nearly six months, was found on Thursday week in the Derwent, and though far advanced in decomposition, the features were sufficiently perfect to be easily recognised. The papers and rate books were found in his pockets, but no money of any kind. An inquest was held on Friday, when Joseph Bowman, a shepherd, deposed to finding the body fast to a tree root in the Derwent, and said that the front of deceased's breeches was gone. Police-Superintendent Ord said that he found, on examining the body, some parish-rate books, two handkerchiefs, and a pair of gloves, but no money; and although the front part of the breeches and pockets were gone, he could not say that they had been torn away by violent means. Mr. Isaac Shepherdson, of Malton, fellmonger, said that deceased went into the Oddfellows' Arms beer-house, about a quarter past 10 on the night of the 21st of December, and that after remaining some time deceased who was tipsy, and said he had no money, went out of the house alone. This witness was examined as to his own conduct on the night in question, and according to his evidence, he remained at the beer-house for three-quarters of an hour after Jennings left, and then went to the Cross Keys Inn, where he remained till nearly 12 o'clock. He then went home and to bed, and did not go out again till next morning. He declared that he never saw Jennings after he had left the beer-house, and that he had no horse yoked to a cart that night after he saw Mr. Jennings, and was not with any one who had. Ann Jones and Sarah Wray gave evidence contradictory to that of the last witness. Both women stated that Shepherdson's cart had been out with clean straw in it on the night on which Mr. Jennings was lost, and that a man and woman had been with it. They said that the cart was in a different position the next morning. Mr. George Jennings, nephew of deceased, said that his uncle had been in the habit of staying from home for two nights at a time; that he often had large sums of money with him, and often lost himself and went home without his horse. Mr. W. Colby, surgeon, [illegible] having made an external examination of the body as soon as it was taken from the water. There was a lacerated wound on the right side, in a line with the [illegible] about 4 inches long, which in his opinion, had been received just before, or immediately after death. He had since made a *post-mortem* examination, but found no other injury. He scarcely thought that the wound would of itself have caused death. The coroner, in summing up, urged upon the jury the necessity, if any doubt remained on their minds, to return an open verdict. The jury, after a short deliberation, returned a verdict of Found Drowned, there not being sufficient evidence to implicate any one. The body was immediately interred, and Bowman will receive the reward offered for its discovery, the 50*l.* offered by Government being limited to the proof of the murder.

PORTSMOUTH.—An inquest has been held on the body of a child picked up out of the water after the late explosion of the Eastern Monarch, and which was suffocated by the fumes on the after part of the lower deck. After a short deliberation the jury returned a verdict to the effect that the child came by its death from suffocation caused by the inhalation of smoke, the product of a combustion, the origin of which there was no evidence to show. It has been satisfactorily ascertained that the total loss of life was seven, the woman and four children who were killed or suffocated by the explosion, a woman and a soldier who died soon after reaching the shore of exhaustion from being in the water, and one child who died in the Hospital from burns. A large number received contusions or burns. The pilot was missing for some time, but it was subsequently ascertained that he was picked up in the water by a Southampton boat and conveyed to Cowes, much bruised and shaken by the explosion.

WROXETER.—The recent excavations have thrown considerable light on the character of the buildings of the Roman city of Uriconium. A continuous wall has been traced, bordering what was evidently the Roman street (now the Watling Street Road), and facing the west, to a distance of about 80 feet southward, where another wall was found running eastward at right angles from it. Within these walls is a large open court, with a fine brick herring-bone pavement, and in the building first laid open to the north of the wall. The sides of this court towards the street appear to have been occupied by rooms of small dimensions, which perhaps served for shops or offices. In one of them, the floor of which is about 10 feet from the present level of the ground, was found a quantity of wood charcoal, as though it had been a charcoal depôt for sale or for the use of the more important buildings to the east. One or two weights, with numbers upon them, and various other objects, have been found in the small rooms. Among other things found in this part of the excavations are one or two finger-rings and some bone remains. At the north-western corner of the court there is a wide opening in the western wall, apparently from the street by an inclined plane formed of some large flagstones, as though to allow carriages to enter the court, the level of which is higher than that of the street. A little further south there is another smaller entrance through the same wall, approached by stone steps. The stones of both are considerably worn by use. The back or eastern side of the court appears to have been occupied by the better apartments of a very important mansion, running southward from the hypocausts already opened, and these will now be immediately uncovered, and we may hope for interesting results. It may be remarked that traces of the use of mineral coal in the houses of Uriconium have also been met with.

## Ireland.

MEETING OF THE IRISH SOLICITORS.—The [illegible] indignation meeting of the attorneys and solicitors was held on Friday, when strong resolutions were adopted condemnatory of the manner in which the legal rights of the attorneys of Ireland have been disregarded by successive Governments, in appointing members of the bar to ministerial offices connected with the law department which have been held and the duties which they consider would be more efficiently discharged by attorneys and solicitors of experience in their profession. The appointment of a barrister to the office of Solicitor to the Inland Revenue was strongly condemned, and it was resolved to petition for a repeal of the Act of George IV., which operates injuriously against the second branch of the legal profession. A petition embodying all these grievances is to be presented to the Lord Lieutenant, and petitions to the same effect are to be presented to both Houses of Parliament. Portions of the speeches delivered at the meeting show that since the present Government came into office they had given to the bar of Ireland 42,000*l.* [illegible] First Registrar, 15,000*l.*; Clerk of the Hanaper, [illegible] six chairmen of counties; three judgeships—making all 42,000*l.* During the same period the solicitors got just 750*l.* a year.

LAW APPOINTMENTS.—The lucrative office of Solicitor to the Treasury vacated by the resignation of Sir Henry Hemmins, has been conferred by Lord [illegible] upon Mr. Thomas Mostyn, Clerk of the Crown for the county of Sligo. The emoluments of the office are estimated at 2000*l.* a year. Mr. Thomas [illegible] Solicitor and Registrar to the Lord Chief Justice, has been appointed Registrar of Judgments, in room of Mr. Edward Scriven, resigned. The [illegible]

301. a year. The Crown Solicitorship of the city and county of Dublin, also resigned by Mr. Hemsdin, has not been yet filled up. Mr. James Meglee, Q.C., has been appointed by the Attorney-General for Ulster to the counties of the north-west circuit, in addition to the county of Fermanagh, already held by him; and Mr. Samuel Johnston has been appointed to the remaining two counties.

LANDED ESTATES COURT.—The Tipperary estates of Count Charles were sold on Monday in 25 lots, the gross produce being 40,000*l*. The rates of purchase were extremely high, beyond in some instances the average prices realised in the land market.

## Scotland.

EPISCOPAL CHURCH IN SCOTLAND.—At an adjourned meeting of the Diocesan Synod of Aberdeen on the 2d instant the Rev. P. Cheyne, M.A., appealed against the judgment and sentence of suspension pronounced by a court of four bishops, who by a majority of three to one had condemned him for having preached certain doctrines contrary to those of his church. Mr. Cheyne argued his appeal on the Bishop's alleged plea that Mr. Cheyne had been guilty of canonical disobedience by exercising his office while under suspension. The canon enjoins that two admonitions shall be given before inflicting the penalty; so that the Synod adjourned to Friday, when Mr. Cheyne was "publicly declared to be no longer a clergyman of the Episcopal Church in Scotland."

## Sporting.

EPSOM MEETING.

FRIDAY.—*The Chevening Stakes.* Mr. Barnard's Pan beat Sedbury, Old Fellow and 7 others.—*The Derby Stakes.* Lord Lichfield's Stockwell beat Scott, West Rose, and 10 others. Betting at starting: 6 to 4 on Mayonnaise, 5 to 1 against Stockwell, 10 to 1 each West Rose. The Race.—Directly Mr. Wilson lowered the flag Alarm assumed the lead, followed by Stockwell and Mayonnaise, the second and third pulling hard next at the rails, Pompadour, who, with Prelude at her quarters, and Dervish, the pick, in the centre of a line were Mayonnaise and Stockwell, the Wizard a long way last of all. On reaching Tattenham Corner Mayonnaise was in difficulties, and the running was one length in front of Prelude, followed by Stockwell, and the remainder close together. Entering the straight Mayonnaise came to the front, and Stockwell took up a position on the lower side next to her. Then Prelude was assisted by Pompadour, West Rose, and Scott, and at the distance Prelude had just the best of it, Mayonnaise and Stockwell being next, the latter beginning to make his effort. Prelude and Mayonnaise struggled together for a few strides, when the latter, answering to the call of the jockey, drew away from her opponent, and beat West Rose the second place by a good length. Mayonnaise was thereby enabled to obtain fourth place, a neck from West Rose. Prelude was fifth, Amadine sixth, Meg Merrilies seventh, Wizard in Black eighth; Little Agnes, Scottish, the Dervish boy, and Alarm were next. The last three horses of whom Pompadour and Scott, the latter being the favourite.—*The Sixth Great Surrey Foal Stakes.* Mr. F. Robinson's Artaxerxes beat Urbian, Rachmanoff, Eremite, and Cheapside.—*The Grosvenor Plate.* Mr. Greville's Grand Duchess beat Gilt Arrow, and 6 others.—*The Surrey and Sixth Mile.* Mr. Bartlett's Polly Johnson beat Spotted Dick, Fiesco, Cymbeline, Ann and Sister to Alarm.—*The Manor Plate.* Mr. Bartlett's Polly Johnson beat Mushroom, Orlando, and Donna Carmen.

## Law.

HOUSE OF LORDS.—*The Thellusson Will Case.*—*Judgment.* Their lordships sat for the first time this session to hear appeals and delivered judgment in the case of Thomas Roberts Thellusson, appellant, v. Woodford, Woodford, Edwards, Jones, Bacon, Charles Sabine Augustus Thellusson, the Right Hon. Peter Pendarves, and Arthur The several respondents. The question in this case was simply whether the eldest male lineal descendant of the testator, Peter Thellusson, must be the eldest in point of age or the eldest in point of years. The Master of the Rolls decided that Lord Rendlesham is the person who answers the description in the will of eldest male lineal descendant of the testator, Peter Thellusson, and is entitled to the estate, and that Charles Sabine Augustus Thellusson is the person who answers the description of eldest male lineal descendant of Charles Thellusson, the grandfather, and is entitled to the other half; and that Thomas Roberts Thellusson, the appellant, the eldest male lineal descendant of Peter Thellusson, is entitled to a set of Charles Thellusson's shares, and not the eldest male lineal descendant of the latter of Charles Sabine Augustus, although he is the eldest male lineal descendant of the said Charles in point of years, as was contended. The present appeal was against these two decisions. Their lordships, after the conclusion of the arguments, saw no reason to differ from the decision of the learned judges, a majority of whom were therefore in favour of the judgment of the case below, and agreed that the appellant, as eldest male lineal descendant in point of years, Lord Cranworth even agreeing that the decision of the Master of the Rolls be affirmed. Having at length the reasons why he was of opinion that that decision was right, Lord St. Leonards, Lord Wensleydale, and Lord Brougham having expressed their concurrence, the Lord Chancellor said that as he had been summoned for the purpose of hearing the case he had resolved not to take part in the decision, and as there was no necessity for there being an equality of votes he was relieved from giving his opinion. He had only to pronounce that the decree of the court below declaring that Charles "eldest male lineal descendant," applied to the eldest in point of time, and not in point of years, was affirmed, and the appeal dismissed.

COURT OF CHANCERY (before the Lord Chancellor).—*Lord Talbot de Malahide v. Lord Talbot de Malahide and others.*—*Practice.*—*Motion to dismiss Bill.*—*Costs.*—*Lunatic.*—*Petition.*—*Will Case.*—*Judgment.*—This was an appeal from a judgment of Vice-Chancellor Wood, refusing an injunction to restrain the defendants from taking proceedings at Lancaster Assizes, in the name of the plaintiffs and the Right Hon. Richard Lord Talbot de Malahide, for the recovery of property in the county of Lancaster, and for an account of the rents and profits thereof, during the time the defendants had been in possession. The Lord Chancellor in giving judgment said that the parties had agreed to submit the case to his decision, and that he could not have come to a more satisfactory conclusion than that arrived at by the Vice-Chancellor. The plaintiffs were clearly entitled to resist all use of the joint line by any except the legitimately traffic of the South Western, and an injunction must be granted from so doing, offered against the South Western, with liberty however for them to apply if the former any alteration should be made by a legal agreement, or by an act of Parliament. There would be no personal benefit, but the South Western must pay the plaintiffs the whole costs of the suit. No costy would be given as to the Portsmouth Company.

COURT OF COMMON PLEAS.—*Sittings in Banco* before Lord Chief Justice Cockburn and Justices Williams, Willes, and Byles.]—*The Earl of Shrewsbury v. Scott and others.*—*Judgment.*—The case, after occupying the attention of the Court for nine days, was brought to a conclusion on Thursday, when the Lord Chief Justice gave judgment to the effect that the plaintiff was entitled to recover possession of Alton Towers and the other estates of the Talbot family, on the ground that they were improperly subjected to the entailing by a settlement made by Earl Talbot in 1787, carried into effect by the 6th Geo. I., cap. 18, and confirmed by a recognition and made by Earl John, in 1841, by the statute of the 6th & 7th Victoria. It had been contended by the defendant that Earl Talbot, being a Jesuit, had no reversion in the estate in consequence of the operation of the penal laws against Catholics which were then in force, and was incapable of making the settlements of 1787 and founded upon the view of the case the last case cited, a Scotch deed which purported to cut off the entail, and afterwards by will left the estates to the infant son of the Duke of Norfolk, on whose behalf the defendants, who are executors of the duke's will, had sued them. But he was clearly of opinion that the deed and will had no power to override the deed, and that under the peculiar circumstances which had been fully explained none of the plaintiffs had been guilty of laches or acquiescence. The plaintiffs had allowed those estates for a long series of years, and they [illegible] who had had the beneficial enjoyment of those estates should abide by the conditions on which they took that enjoyment. The other points argued were unfavourable, and the rule to set aside the verdict for the plaintiff was therefore discharged. The result was received with suppressed applause by a very crowded court. It was understood to be his intention from the last to bequeath 10,000*l*. and to pay a year, and the case derived additional interest from the fact that upon the decision of the present depended the possession of the property, which had been for some years held by Roman Catholics, should now go into Protestant hands.

## Miscellaneous.

THE TOMB OF A CELTIC CHIEFTAIN.—We have already mentioned in our Foreign news the very interesting discovery which has been recently made by M. Legrand, architect, at the very gates of Paris at the tomb of a Celtic chieftain, interred more than 2000 centuries ago, with the remains of his wife, his horse, and his armour. The following particulars given by Galignani will be read with interest. "It had long been supposed that the origin of the Parisii did not date further back than the time of Julius Cæsar, who is the first historian that mentions them. Some discoveries made at different times in the neighbourhood of old Lutetia, as well as in the bed of the Seine, have indeed tended to contradict that opinion, but M. Legrand's discovery of a Celtic tomb leaves no doubt of the existence of that nation at least 2000 centuries ago. It would seem that a Celtic town of some importance formerly stood on the site of La Varenne-St.-Hilaire, where the tomb in question, which is that of a Celtic chief and his wife, with his arms and horse, has been found not more than a few yards underground, and what is still more remarkable the soil had covered it was vegetable mould. It consisted of a complete or sacred circle formed with 18 blocks of quartz, in the centre of which there is the tumulus or sepulchre, containing two skeletons in good preservation, both placed face downwards and lying in a south-east direction. The skeleton on the left, that of the chief, had its head resting on both hands; the jaws had nearly all their teeth, 28 in number, with their enamel in a perfect state. At its side, headed with a piece of sharp horn, and a lance made of the antlers of a stag, lay beside him. Around were placed other arms, such as a battle-axe of polished flint, a javelin, and a broken knife, all of white stone, all bearing traces of the action of fire. The female skeleton lay in token of a violent death, showing that the wife of the chief had been sacrificed on the tomb of her husband. Between her head and that of her husband lay a hatchet of flint, but much injured, showing that it had been frequently used. The horse, as the skeleton showed, had also been sacrificed. M. Legrand has offered this monument to the Minister of State for the Museum of the Hôtel de Cluny, where it will shortly be visible to the public."

THE WARMING AND VENTILATION OF DWELLINGS.—A blue book has been recently issued containing a report addressed to the General Board of Health by the Commissioners appointed to inquire into the warming and ventilation of dwellings. The Commissioners were Mr. W. Fairbairn, F.R.S., Mr. J. Glaisher, F.R.S., and Mr. Charles Wheatstone, F.R.S. Dr. Playfair was appointed Commissioner, but did not append his signature on account of absence through other engagements from the sittings. The Commissioners enter into minute details as to their observations and experiments, and print an abstract of inventions which they consider sound in principle and from which they think some form might be constructed suitable to all descriptions of dwelling-houses, preventing smoke and economising fuel. In regard to fire grates in general the Commissioners recommend—1, the use of reflecting surfaces to direct an increased amount of radiated heat into rooms; 2, that the chimney flue be of small dimensions (not above 9 inches in diameter at the widest part); 3, that chimney flues should not be situated in the outer walls of houses so as to become chilled by contact with the air outside; 4, that each flue be provided with a closing apparatus; 5, that the aperture for the escape of the smoke be placed at the back of the fire so as to increase the intensity of combustion and promote the radiation of heat; 6, that the back linings of grates should be in general use; 7, that sunken ash-pits and hidden ash-pans be employed to prevent the diffusion of dust; 8, that the fire be set as a level with the floor (made evident by experiments with Leslie's grate); 9 that as a rule, the low grate is best proved which is seen from the greatest number of points in the room; 10, that a good frontage of fire surface be exposed; 11, that those stoves be used which prevent the formation of smoke, which represent imperfect combustion and wasted fuel; and 12, that the fire-grate should be studied in its construction with the view to its effecting a better and more economical consumption of fuel and a more equal distribution of heat, not as a contrivance for the ventilation of rooms. It will not answer the twofold purpose of warming and ventilating. The altering of a common grate into an Arnott stove has entirely failed on trial. A proposed plan for the improvement of the construction of dwelling-houses is recommended and illustrated by diagrams; among other things, the use of double panes of glass in small, and of double sashes in large rooms is suggested. The use of gas or coke would preclude smoke, but the former is too expensive for heating purposes in ordinary houses and districts. The Wellington Barracks are adverted to in reference to the sanitary state of the army, and the Commissioners state that "a more defective system of warming and ventilation could not be devised than that which is there exhibited." Condemning the want of space allotted to the soldiers, and the disgusting practice of using open tubs as urinals in barrack rooms, the Commissioners appear to direct the attention of the Master of War and the Horse Guards to the absolute necessity of providing more room and accommodation for soldiers in barracks, and that, instead of 500 cubic feet of space, 700 to 800 cubic feet be allowed per man, or, as in the case of the Wellington Barracks, only 10 persons occupy the space allotted to 16; and that these regulations be enforced throughout the United Kingdom. A more economical system of heating and ventilation in barracks is also recommended. The Commissioners in conclusion say:—"Should these suggestions be adopted, and the remedies properly applied, the time will soon arrive when the sanitary returns of the British army will bear a comparison and prove equally satisfactory to that of any other part of the community."

BIRTHS.—On the 1st inst., at the Deanery, Bocking, Yorkshire, the Hon. Mrs. [illegible] Monckton, of a daughter.—On the 2d inst., at King's Pyons, Hereford, the wife of the Rev. [illegible] Evans, Rector, and Vicar of Eardisley, Herefordshire, of a son.—On the 3d inst., at Hyde Hall, Sawbridgeworth, Herts, the wife of Sir Henry Dukinfield, Bart., of a son and heir.—On the 4th inst., at Ryde, Isle of Wight, the Countess of Ilchester, of a daughter.—On the 4th inst., at Bryanston Square, the wife of Lieut.-Colonel Anstruther, C.B., Royal Artillery, of a son.—On the 4th inst., at 4, Montagu Place, Russell Square, the wife of the Rev. [illegible] Bowyer, Rector of St. George's, Bloomsbury, of a son.—On the 4th inst., at 26, Belgrave Square, the Countess of Strafford, of a daughter.

MARRIAGES.—On the 31st ult., at St. Joseph's Church, the Rev. and Hon. Francis Byng, third son of Viscount Enfield, and grandson of Field Marshal the Earl of Strafford, to Frances Louisa, youngest surviving child of Sir William Miles, Bart., M.P.—On the 1st inst., at St. George's Hanover Square, Granville Augustus Fitzroy, Esq., of the Bengal Civil Service, son of the late Lieutenant-General Sir Charles Fitzroy, G.C.B., to Lady Frances Elizabeth Caroline Paget, youngest daughter of the late Earl of Uxbridge.—On the 1st inst., at Wargrave, Laura Maria, youngest daughter of the late Canon Harford, of Hillfield, at Bristol, to Thomas William B. Daniel, late Lieut.-Colonel 67th Regt.—On the 1st inst., at Portland, Thomas Wynne Talbot, Esq., of Wood Dalen, Buckinghamshire, Warrister, and late Colonel of the Royal Buckinghamshire Militia, aged 80—16th 16th, and 8th April, at the Cape of Good Hope, Edward William Robinson, aged six years; Emma Sophia, aged seven; Frederick Robert, aged three years; children of Captain Robert Lee, H.E.M.'s Commissioner, Cape Good Hope, at Simon's Town, after a short illness.—On the 1st inst., at Kensington, Mary Elizabeth, aged 20 years, daughter of the late [illegible] Hammersley, Esq., of Bromley, aged 20 years, at Hobbs-town, Hungerford Daniel Fawkes, second daughter of Captain Fawkes, late of Warrens, Wiltshire, aged 30 years, at the parsonage House, the Hon. Lady Liddell, wife of Rear-Admiral the Hon. Henry Keppel, R.C.B.

DEATHS.—On the 1st inst., at Oxford, [illegible] Vansittart, the Hon. Mrs. [illegible] Monckton, of a [illegible] Wyatt, aged 70 years, Spanish Town, Jamaica, the wife of the Presidency Captain Henry Darrigan, late of [illegible] at Lower Tooting, Surrey, Frances Mary, youngest daughter of the late [illegible] Fellowes, Esq., of Ramsey Abbey, Huntingdonshire, aged 20 years.—On the 2d inst., at Ryde, Isle of Wight, the wife of [illegible] Lieutenant-Colonel [illegible], aged 70 years.—On the 2d inst., at Wargrave, Laura Maria, youngest daughter of the late Canon Harford, of Hillfield, at Bristol, aged 20 years.—On the 3d inst., at Portland, Thomas Wynne Talbot, Esq., of Wood Dalen, Buckinghamshire, Warrister, and late Colonel of the Royal Buckinghamshire Militia, aged 80—16th 16th, and 8th April, at the Cape of Good Hope, Edward William Robinson, aged six years; Emma Sophia, aged seven; Frederick Robert, aged three years; children of Captain Robert Lee, H.E.M.'s Commissioner, Cape Good Hope, at Simon's Town, after a short illness.—On the 1st inst., at Kensington, Mary Elizabeth, aged 20 years, daughter of the late [illegible] Hammersley, Esq., of Bromley, aged 20 years, at Hobbs-town, Hungerford Daniel Fawkes, second daughter of Captain Fawkes, late of Warrens, Wiltshire, aged 30 years, at the parsonage House, the Hon. Lady Liddell, wife of Rear-Admiral the Hon. Henry Keppel, R.C.B.

## Markets.

COVENT GARDEN.—June 11.

Grapes though now comparatively plentiful, still realize good prices. Strawberries from the open ground continue to reach this [illegible]. From Algiers potatoes of a superior quality, French Cherries may still be obtained. Pine are however not [illegible] to be met with [illegible] Grapes [illegible] at 6s. per lb. Peaches [illegible] Nectarines [illegible] Apricots, 1s. each. Cherries [illegible] Strawberries [illegible] Green Peas [illegible]

Horn Carrots, and Globe Artichokes may also be obtained. Cauliflowers fetch from 4s. to 6s. per doz. New Potatoes realise from 12s. to 20s. per cwt. Cucumbers abundant. Cut flowers chiefly consist of Orchids, Gardenias, Heliotropes, Lily of the Valley, Violets, Mignonette, Heaths, and Roses.

FRUIT.

| | |
|---|---|
| Pine Apples, per lb., 5s to 8s | Cherries, per lb., 3s to 4s |
| Grapes, per lb., 4s to 8s | Apples, per doz., 6s to 12s |
| Strawberries, per lb., 2s to 6s | Pears, per doz., 6s to 12s |
| Melons, each, 4s to 6s | — stewing, p. doz., 2s 6d to 5s |
| Peaches and Nectarices, per doz., 15s to 30s | Oranges, per 100, 6s to 10s |
| Figs, per doz., 8s to 12s | Lemons, per doz., 1s to 1s 6d |
| | Cobs, per lb., 1s 3d to 1s 6d |

VEGETABLES.

| | |
|---|---|
| Cauliflowers, per doz. 2s to 4s | Cucumbers, p. doz., 2s to 6s |
| Green Peas, p. quart, 1s to 2s | Tomatoes, per doz., 3s to 4s |
| Greens, per dozen bunches, 1s to 1s 6d | Artichokes, per doz., 4s to 6s |
| Cabbages, do., 1s 6d to 2s 6d | Beet, per doz., 1s 6d to 2s |
| Asparagus, p. bundle, 2s 6d to 5s | Celery, p. bundle, 1s to 1s 6d |
| Rhubarb, p. bundle, 6d to 9d | Shallots, per lb., 6d to 8d |
| French Beans, p. pun., 1s to 1s 6d | Garlic, per lb., 6d to 8d |
| Potatoes, p. ton, 90s to 100s | Lettuces, Cabb., per score, 1s to 1s 6d |
| — per bus., 2s to 2s 9d | Endive, p. score, 1s to 1s 6 |
| — per cwt., 4s to 6s | Horse Radish, p. bun. 1s 6d to 4s |
| — new, per lb., 6d to 1s | Mushrooms, p. pott, 9d to 1s 3d |
| Carrots, per bunch, 1s | Parsley, p. 12 bunches, 2s to 4s |
| Turnips, per bunch, 9d to 1s | Savory, do., 2d to 4d |
| Spinach, p. sieve, 1s 6d to 2s | |

HOPS.—BOROUGH MARKET, FRIDAY, June 10.

Messrs. Pattenden & Smith report that the accounts from Sussex, Weald of Kent, Farnham, and Worcester state that both fly, lice, and honeydew continue to increase. A portion of Mid and East Kent is at present in a better state.

POTATOES.—SOUTHWARK, Monday, June 6.

During the past week the arrivals have been limited, but more than equal to the demand; the weather has been very warm and trade extremely dull, and to effect sales a reduction in price has been submitted to. The following are this day's quotations:—Yorkshire Regents, per ton, 100s. to 120s.; do. Flukes, 120s. to 150s.; Lincolnshire Regents, 80s. to 100s.; Dunbar Reds, 80s. to 90s.; Perth, Forfar, and Fifeshire Regents, 60s. to 80s.; do. Reds, 50s. to 60s.; Rocks, 50s. to 60s.; foreign whites, 60s. to 70s.

BRITISH WOOLS.—LONDON, FRIDAY, June 10.

The price of the new clip is not yet settled, as there is scarcely any arrived as yet.

COAL MARKET.—FRIDAY, June 10.

Walls End Gosforth, 15s. 3d.; Walls End Haswell, 17s.; Walls End Eden Main, 15s. 6d.; Walls End Cassop, 16s.; Walls End Heugh Hall, 15s. 9d.; Walls End Hunwick, 16s.; Wall's End West Hetton, 15s. 9d.; Walls End Whitworth, 16s.; Tanfield Moor Butes, 13s. 6d.; West Hartley, 16s. 9d.; Wylam, 16s. 6d.; Buddle's Hartley, 16s. 9d.; Howard's Hartley, 16s. 9d.—79 ships at market.

METROPOLITAN CATTLE MARKET.

MONDAY, June 6.

The number of Beasts is much smaller than on Monday last. Trade is by no means brisk; prices are, however, good, and a fair clearance is effected. The supply of Sheep is very short for the time of year; prices have advanced in all descriptions. Good Lambs and Calves are scarce, and rather dearer. From Germany and Holland there are 140 Beasts, 1580 Sheep, and 109 Calves; from Scotland, 140 Beasts; from Norfolk and Suffolk, 2400; from Ireland, 90; and 100 from the northern and midland counties.

| | s. | d. | s. | d. | | s. | d. | s. | d. |
|---|---|---|---|---|---|---|---|---|---|
| Best Scots, Herefords, &c. | 4 | 6 to 4 | 10 | | Best Long-wools | 4 | 8 — 5 | 0 | |

| | | | | | Calves | 3 | 10 — 5 | 0 | |
| | | | | | Pigs | 3 | 8 — 4 | 8 | |

Beasts, 3690; Sheep & Lambs, 20,730; Calves, 178; Pigs, 270.

THURSDAY, June 9.

The supply of Beasts is again small, but the weather is favourable; consequently late quotations are fully supported. There are a few more Sheep and Lambs, but the average quality is not good. Choicest descriptions are readily sold. Good Calves are in demand. From Germany and Holland there are 330 Sheep, and 260 Calves; from Norfolk and Suffolk, 500 Beasts; and 106 Milch Cows from the home counties.

Beasts, 966; Sheep & Lambs, 10,390; Calves, 524; Pigs, 160.

MARK LANE.—MONDAY, June 6.

The supply of English Wheat to this morning's market was one of the smallest of the season, nevertheless it met a slow sale at last Monday's prices, and a good proportion remained on hand late in the day; the sale of foreign was very restricted, but in the business transacted former rates were maintained. Good sweet Barley brings last week's rates, but out-of-conditioned is difficult of disposal. Beans and Peas are a slow sale at barely late quotations. The Oat trade is very heavy at a decline of 6d. to 1s. per qr. upon the prices of this day se'nnight. The top price of town-made Flour is unaltered, and Norfolk is offered at 34s. to 35s.

FRIDAY, June 10.

Between Friday and Monday last some very heavy thunderstorms fell in parts of the adjacent counties, and have lodged the Wheat in many places. The plant is coming into ear, and is generally so luxuriant that rain would probably prove detrimental to it. Since Monday the weather has been dry and warm, to-day cooler. The Wheat trade continues inanimate, and in the majority of markets a further decline varying from 1s. to 2s. per qr. has occurred. Very little was done here on Wednesday, and some proportion of the Kent supply of Monday remained over unsold. The trade for all descriptions of Spring Corn has also been depressed, with a declining tendency. Flour in the provincial markets has been generally reduced 1s. to 2s. per sack. The arrivals of grain and seed-laden vessels from Southern Europe off the coast are becoming more numerous; they comprise 2 cargoes of Wheat, 9 of Maize, 6 of Barley, 1 of Rye, 3 of Millet, and 2 of Linseed. The sales are very limited. The arrivals this week of English grain have been moderate, those of foreign considerable. The attendance at to-day's market was small, and the large supply of foreign Wheat induced millers to act with extreme caution; factors being unable to obtain Monday's prices for English, a considerable quantity of Kent left over from that day remains unsold. Of the foreign a large proportion goes to the millers direct, and holders being disinclined to accept any material reduction, no sales could be effected, and the great bulk will be landed. The value of Barley, Beans, and Peas is unaltered. The Oat trade is very dull, and sales are made with difficulty even at a decline of 6d. to 1s. per qr. In Flour there is very little doing, and Norfolk, &c., is 6d. to 1s. per sack cheaper.

ARRIVALS FROM JUNE 6 TO JUNE 10.

| Foreign .. | 45140 ,, | 4170 ,, | 31760 ,, | 11420 ,, — bris. |

LIVERPOOL, Tuesday, June 7.—We had a fair attendance of millers and dealers at our market this morning, but they still held off buying, and the market consequently wore a very lifeless feeling. Wheat must be noted about 3d. and Flour 6d. per cental lower than the nominal quotations of last market day. Indian Corn was very difficult of sale, though offered at a concession of fully 2d per cental. Oats and Oatmeal were each 1d. to 2d. lower on the week. Egyptian Beans, Peas, and Barley in a great measure nominal.

FRIDAY, June 10.—Corn market dull and inactive; the demand for all articles is small at Tuesday's rates, barely supported in some instances. A slight reduction has been necessary to effect sales in Wheat, Flour, and Indian Corn.

THE BURIAL BOARD of the Parish of St. Helen's, in the county of Lancaster, will, at their Meeting on the 25th day of July next, appoint a SUPERINTENDENT and REGISTRAR of the Cemetery of such parish. He will be required to reside at the Cemetery and devote his whole time and attention to the duties of his office, and must possess a good knowledge of Book keeping and sufficient of Surveying to enable him to lay out the ground in grave spaces. One who has some knowledge of the Management of Trees and of the care of Grounds would have a preference. The salary is 70l. per annum, with the use of a house, rent and tax free. Candidates are requested to send applications in their own handwriting, stating former or present occupation, and accompanied by testimonials as to character and competency on or before the 30th inst., to THOS. HADDOCK, Clerk to the Board.
Hardshaw Street, St. Helen's, Lancashire, June 11.

WANTED, A competent Person to act as FOREMAN in an extensive Nursery in the south of Ireland. Satisfactory testimonials as to character and capability will be required.—Communications to be addressed to A. B., *Constitution* Office, Cork, Ireland.

WANTED, in the County of Pembroke, an experienced and active BAILIFF to Superintend a Farm of 130 Acres. Salary 50l. per annum, or, if single, and live in the house, 30l. Applicants will state age, and the situations previously held by them.—Address X. Z., Post Office, Narbeth.

WANTED, a respectable, steady MAN, who thoroughly understands the propagating of Fruit Trees, Roses, Coniferæ, and Knife-work generally. Liberal wages will be given.—Address, A. B., Messrs. Noble & Co., Seed Merchants, Fleet Street, London.

WANTED, A MAN AND WIFE.—The Man as thorough GARDENER, and to take entire charge of a few acres of Land, some Woods, and Stock, to Buy and Sell, Keep Accounts, &c. Wife to take Dairy and Poultry, and care of House when family absent. In a beautiful part of the South of England. Both to be thoroughly trustworthy and with the best recommendations in all respects.—Apply by letter, post paid, B. B., Messrs. Street, Serle Street, Lincoln's Inn, London, W. C.

WANTED, A MAN AND A LAD, the former as GARDENER. Must understand Early and Late Forcing, Vines, Kitchen and Flower Gardens; if a knowledge of Cows, preferred. Lad under him.—Apply personally, to 121, Long Acre, London, Monday or Wednesday next, between 2 and 4.

HEAD SHOPMAN.

WANTED, AS HEAD SHOPMAN, in a London Nursery, a respectable Man; a thorough knowledge of the Seed and Nursery business indispensable.—Apply by letter only, F. F., *Gardeners' Chronicle* Office.

WANTS PLACES.—Letters to be Post Paid.

GARDENER (HEAD).—Age 37, married, no incumbrance; thoroughly understands Gardening in all departments. All applications to be made to Mr. WATSON Ripley Castle, Yorkshire.

GARDENER (HEAD).—Age 40, married, no family; has a thorough knowledge of his profession in all branches; also Land and Stock.—F. C., 13, Campden Grove, Kensington.

GARDENER (HEAD).—Age 27; has a good practical knowledge of his profession. Can be well recommended for ability and general good conduct.—E. BARNES, Wentworth Castle Gardens, Barnsley, Yorkshire.

GARDENER (HEAD).—Age 46, married; experienced in all branches; seven years' character for capability and integrity. Wages 60l., with cottage and firing.—J. B. Messrs Nash & Teuten, 4, Saville Place, Regent Street, W.

GARDENER (HEAD).—Age 38, married, one child, 9 years of age; understands his profession in all the various branches. Wife a good Cook. Can be well recommended.—A. B., The Nursery, Winchmore Hill, Edmonton, Middlesex.

GARDENER (HEAD).—A Lady can with confidence recommend an active middle-aged married Scotchman without family, who has given her great satisfaction in Forcing Grapes, Peaches, Grape Vines in pots loaded with fruit, Pines, months old, Strawberries, Figs, Melons, Cucumbers, French Beans, Mushrooms, and Asparagus. Has a good knowledge of Plants, and is an excellent Kitchen Gardener; has taken many prizes; four years' high testimonials.—A. B., 8, Lime Cottages, Buckland Road, Dover, Kent.

GARDENER (HEAD).—Age 29, single; intelligent, industrious, and strictly temperate in habits; fully understands his profession, including the Forcing of Vines, Pines, Peaches, Strawberries, Melons, Cucumbers, &c., with good knowledge of Stove and Greenhouse Plants; also first-rate Management of Flower Gardens. Has had very extensive practice in the north and south of England.—J. T. W., Sir E. Meux, Bart., Theobald's Park, Cheshunt, Herts.

GARDENER (HEAD), OR GARDENER AND BAILIFF.—Age 36, of good practical experience both in Gardening and Farming, married, small Family; no objection to live at the Lodge. Can be highly recommended. Parties requiring the services of a good practical Man will find the Advertiser to be relied on.—B. B, Messrs. Thos. Mander & Co., Ranelagh Nursery, Leamington Spa.

GARDENER.—Age 22; under a Head Gardener. Good instructions. Good character.—F. WINGFIELD, Donington Park Gardens, Leicestershire.

GARDENER.—Age 24, single; understands Kitchen and Flower Gardens, Orchid, Stove, and Greenhouse and Forcing in general. Good character.—A. HARDEN, Clarendon Park, near Salisbury.

GARDENER.—Widower, without incumbrance, understands the management of Kitchen and Flower Gardens, Fruit Trees, &c. Can be well recommended for sobriety, industry, and honesty. His sister can manage Laundry if required.—C. C., Mr. Young's Nurseries, Milford, near Godalming.

GARDENER (SINGLE-HANDED).—Age 27, married, understands Greenhouse, Early Framing, Kitchen and Flower Gardens. Eight years' good character.—J. F., Post Office, Hampton, Middlesex.

GARDENER (SECOND).—Age 23; has a good practical knowledge of Stove and Greenhouse Culture, &c. Good character and reference.—G. M., 5, Lea Bridge Road, Lower Clapton.

GARDENER (UNDER).—Age 24, at liberty for any part of England; can take the management of a Stove.—A. L., Post Office, Lower Tooting.

GARDENER (UNDER).—In a nobleman's or gentleman's establishment, where he can Improve himself; small Premium given. 18 months' good character.—W. HANCE, Bookseller, 55, King's Road, Chelsea, S. W.

GARDENER (UNDER, in a gentleman's or nobleman's Garden).—Age 27, married; strong and active. Can have 6 years' good character from a nobleman's Gardener.—J. H., 29, Westbourne Street, Eaton Square, Pimlico, London.

GARDENER (UNDER) OR GROOM AND GARDENER.—Age 28, single; can manage Farm Land and Stock. Good character.—W. D., Poddington, near Wellingborough.

GARDENER AND BAILIFF.—Can take the management of a large Farm, Woods, &c. Good character.—K. J., 2, Anerley Vale, Crystal Palace.

GARDENER AND BAILIFF.—Age 41, married, three children; a native of Scotland; perfectly understands his profession. Good reference.—W., Post Office, Cirencester.

BAILIFF (WORKING).—Married, active; has had much practice both in Scotland and the northern, midland, and southern counties of England; has a thorough knowledge of Stock of all descriptions. Good reference.—J. B., Post Office, Cirencester.

TO NOBLEMEN AND GENTLEMEN.

STEWARD OR BAILIFF, OR AS IMPROVER ON AN ESTATE.—Practical, thoroughly acquainted with his business; well understanding Clearing, Grubbing, Draining, Building, Buying, Selling, &c., having had experience in many of the principal counties of England. Testimonials as to character and abilities.—A. C., 26, Chiswell Street, Finsbury.

Will shortly leave his present situation, which he has successfully filled upwards of 5½ years.—MAY, Mr. Glendinning's, Chiswick Nursery, near London, W.

ROSE BUDDING AND CONIFERÆ GRAFTING BY THE 1000.

PROPAGATOR.—One of the fastest and most successful as above. Continental and English experience.—C. G., *Gardeners' Chronicle* Office.

# The Gardeners' Chronicle Newspaper.

*SATURDAY, JUNE* 18, 1859.

GREEN'S PATENT LAWN MOWERS have proved to be the best by the appointed judges in all cases of competition. Full illustrations, with particulars of improvements for the present season, will appear in this Paper next week.

THOMAS GREEN, Patentee and Sole Manufacturer, Smithfield Iron Works, Leeds, Yorkshire; and 2, Victoria Street, bottom of Holborn, London. Repairs done at either of the Establishments, where every information may be obtained.

**SHANKS'S PATENT MOWING MACHINES.**

J. AND C. LEE, NURSERYMEN, Hammersmith, have great confidence in recommending these as the most complete Mowing Machines offered to the public. They have had large experience with SHANKS's Machines, and have ever found them do their work admirably, effecting a great saving of labour, and not liable to get out of order. For terms, apply to the Agents, J. & C. LEE, Nurserymen, Hammersmith.

SHANKS'S PATENT LAWN MOWERS are unquestionably the most perfect Machines for Mowing Lawns, Verges, &c., extant. SHANKS's Horse and Pony Machines are the only Machines that Mow, Roll, Collect, and Deliver the Grass.—London Agents: COTTAM & Co., 2, Winsley Street, Oxford Street, W.

**LAWNS—IN USE IN THE ROYAL GARDENS.**

SAMUELSON'S PATENT BOYD LAWN MOWING and ROLLING MACHINE, the only one that will cut wet as well as dry Grass, is guaranteed efficient in use, easily handled, and readily kept in working order. Doing the work of five or six men. Prices, including case and carriage to any railway station in England, from 4*l.* 17*s.* 6*d.* and upwards. Copies of testimonials post free on application to Mr. SAMUELSON's London Warehouse, 76, Cannon Street West, City; Messrs. DEANE's, London Bridge; or the Works, Banbury, Oxon.

THE NEW PATENT MOWING MACHINES may be used anywhere at any time, are self sharpening, and admit of the use of duplicate sets of cutting parts. Prices from 4*l.* 10*s.* upwards. Illustrated Circulars free by post.—Manufactured and Sold by JAMES FERRABEE & Co., the original introducers of Mowing Machines.

Several infringements of their patent having taken place, the Makers respectfully caution the public to see that the words "FERRABEE's Patent" are cast on every Machine.

JAMES FERRABEE & Co., Phœnix Iron Works, Stroud.

PICKSLEY, SIMS, AND CO.'S (by ROYAL LETTERS) PATENT LAWN MOWING MACHINE.

LEIGH, LANCASHIRE.

P., S., & Co., in introducing this Lawn Mowing Machine, particularly request a strict examination, or comparison and trial, for simplicity of construction, lightness, regularity of draught, adaptability for mowing every kind of plain, circular, and verge work.

Firstly, we have encased the wheels so as completely to protect from injury flower borders, shrubs, &c., whilst working the machine, at the same time not being liable to obstruction or damage.

Secondly, this machine works easily on undulated and sloping ground; it can be thrust forward or be drawn from behind, the latter being the easiest.

Thirdly, this is the only machine made that will work round quick curves; it will work easily and effectively round circular rollers so small as 12 inches in diameter. This very desirable improvement has been obtained by fixing to the front part of the machine our newly-invented universal action, and self-cleaning, anti-friction spherical guiding balls. The continual revolving of these spherical guiding balls, under the most trying circumstances, never fails.

Fourthly, we have attached to this machine a rack and pinion action, for adjusting the cutting parts (there being a rack and pinion on each side of the machine to act conjointly at the same time upon the full length of the knives), in other machines a slow, tedious, and uncertain operation, into one of quickness, ease, and certainty.

JAMES FAHEY, Sec.

## News of the Week.

THE House of Commons, on Saturday morning, by a majority of 13 in a house of 638 members, adopted the amendment to the Address, declaring that her Majesty's Ministers do not pos-

sess the confidence of Parliament. As a necessary consequence of this decision Lord DERBY lost no time in placing the resignations of himself and colleagues in the hands of HER MAJESTY. The QUEEN having accepted their resignations commissioned Lord GRANVILLE to form an Administration, considering that his lordship would be able to facilitate the union of the two great sections of the Liberal party under Lord PALMERSTON and Lord JOHN RUSSELL. Lord PALMERSTON at once expressed his readiness to act under Lord GRANVILLE, but Lord JOHN RUSSELL intimated that, though willing to serve under Lord PALMERSTON, he will serve under no other Premier. In these circumstances the QUEEN sent on Sunday evening for Lord PALMERSTON, and after an audience which lasted an hour and a half, Lord PALMERSTON proceeded to Richmond to confer with Lord JOHN RUSSELL. The remainder of the week has been occupied with negotiations with the leading members of the Liberal party, and it was announced yesterday that Lord PALMERSTON has succeeded in forming an Administration which will command the support of the majority of the House of Commons. The Cabinet will consist of Lord PALMERSTON as First Lord of the Treasury; Lord JOHN RUSSELL, Foreign Secretary; Mr. GLADSTONE, Chancellor of the Exchequer; Lord CAMPBELL, Lord Chancellor; Earl GRANVILLE, President of the Council; Sir G. C. LEWIS, Home Secretary; the Duke of SOMERSET, First Lord of the Admiralty; Duke of NEWCASTLE, Colonial Secretary; Sir C. WOOD, Secretary for India; Mr. SIDNEY HERBERT, Secretary for War; Duke of ARGYLL, Lord Privy Seal; Earl of ELGIN, Postmaster-General; Sir G. GREY, Chancellor of the Duchy of Lancaster; Mr. COBDEN, President of the Board of Trade; Mr. MILNER GIBSON, President of the Poor-Law Board; and Mr. CARDWELL, First Commissioner of Works. The other appointments include Sir ALEXANDER COCKBURN as Lord Chief Justice of England; Mr. LOWE as Vice-President of the Council; Lord CLARENCE PAGET, Secretary to the Admiralty; and Mr. C. FORTESCUE, Lord WODEHOUSE, and Mr. MASSEY, Under-Secretaries to the Colonial, Foreign, and Home Offices respectively.

The *Moniteur* has published an official account of the battle of Magenta, from which it appears that the concentration of French troops on the Po deceived the Austrians into the belief that they intended to cross that river. The battle was fought with desperate valour on both sides, and the village of Magenta was taken and retaken no less than seven times. The brunt of the battle was for some time sustained against an overwhelming force by the French Zouaves and the grenadiers of the Imperial Guard, commanded by the EMPEROR in person. The large number of prisoners taken by the French is explained by the fact that the Hungarian regiments laid down their arms during the battle. Since the entry of the French into Milan the Austrians have evacuated Piacenza, Lodi, Laveno, Ancona, and Bologna, abandoning at the former place all their provisions, cannon, and ammunition, and blowing up the citadel. On the departure of the Austrians the Papal Legate immediately quitted Bologna, leaving the Government of the city to the municipal authorities. A commission was thereupon appointed by which the KING OF SARDINIA was proclaimed Dictator. The cities of Forli, Faenza, Imola, and other municipalities of Romagna, as well as the city of Parma which was abandoned last week by the DUCHESS, have since proclaimed VICTOR EMMANUEL, and declared their adhesion to the national cause. In the north Bergamo has been taken by GARIBALDI, who is now threatening the Southern Tyrol. The EMPEROR of the FRENCH has crossed the Adda, and advanced his head-quarters to Gorgonzola; and the EMPEROR OF AUSTRIA is about to assume the command-in-chief of his army, with Count SCHLICK as second in command, in the room of Count GYULAI. The latest news states that the French are about to attempt a landing in the Adriatic between Venice and Trieste, and that both the allied and Austrian armies are preparing for another general engagement, which it is feared will be more sanguinary than even the battle of Magenta.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Royal family left town on Tuesday for Windsor Castle, where they still remain. On Friday the Queen held a Court, at which Prince Carini had an audience and presented a letter from the King of Naples notifying his accession. The Prince also delivered a second letter with his credentials as Minister from his Majesty. The Judge Advocate General had an audience, and submitted to her Majesty the proceedings of some courts martial. The Prince Consort visited the British Institution, and afterwards rode on horseback. In the evening his Royal Highness went to the Royal Institution, and the Queen, accompanied by the Princess Alice, honoured the performance at the Olympic Theatre with her presence. On Saturday morning the Earl of Derby had an audience of the Queen. In the afternoon her Majesty held a Drawing Room at St. James's Palace, at which 200 ladies had the honour of being presented. After the Drawing Room the Queen received an address from the Corporation of the City of London, to which her Majesty returned a gracious answer. The Queen afterwards held a Council, at which an order was issued continuing certain of the naval bounties. On the return of the Court to Buckingham Palace Earl Granville had an audience of her Majesty. On Sunday morning the Queen and Prince Consort, the Princesses Alice, Helena, and Louisa, attended Divine service in the private chapel of Buckingham Palace; the Dean of Windsor officiated. Earl Granville had an audience of the Queen. In the evening Lord Palmerston had an audience of her Majesty. On Monday the Prince Consort rode on horseback. The Princess Beatrice took a carriage drive. In the afternoon Lord Palmerston had an audience of the Queen. The Earl of Clarendon also had an audience. In the evening her Majesty had a dinner party. On Tuesday the Right Hon. Colonel Forester, Comptroller of the Household, had an audience, and presented to her Majesty the Address from the House of Commons, in answer to the Speech from the Throne. Lord Palmerston had an audience of her Majesty. In the afternoon the Queen and Prince Consort, accompanied by the Princes Arthur and Leopold, and the Princesses Alice, Helena, Louisa, and Beatrice, left Buckingham Palace for Windsor. Shortly after arriving at the castle, the Queen, accompanied by Princess Helena, visited the Duchess of Kent at Frogmore. The Maharajah Duleep Singh, the Duchess of Manchester, the Duke of Beaufort, the Duke and Duchess of Buccleuch, the Duchess of Sutherland, the Marquis of Exeter, the Marquis of Abercorn, and Earl de la Warr arrived at the castle on a visit. On Wednesday morning the Queen and Prince Consort walked and drove in the Home Park, accompanied by Prince Leopold and the Maharajah Duleep Singh, and visited the Duchess of Kent at Frogmore. Princess Helena and Princess Louisa rode on horseback. The Duchess of Cambridge and Princess Mary, and the Duke of Cambridge, the Prince and Princess de Chimay, the Countess de Caraman Chimay, the Duke of Manchester, the Earl and Countess of Lichfield, the Earl and Countess of Elgin, and Lord John Lennox arrived on a visit. In the evening her Majesty had a dinner party. On Thursday the Queen and Prince Consort, accompanied by the Princess Alice, Helena and Louisa, the visitors at the castle, and the principal officers of the household, went to Ascot races. The Royal party occupied 10 open carriages and four. On her return from the races her Majesty visited the Duchess of Kent at Frogmore. In the evening the Queen gave a dinner in St. George's Hall to a party of 70, and afterwards had an evening party.

THE PRINCE OF WALES landed at Tangier on the 28th ult., and was received with great distinction by the authorities. His Royal Highness left Tangier on the 30th, and arrived the same afternoon at Cadiz, where he was received with similar honours. On the 31st his Royal Highness left for Seville, and returned to Cadiz on the 2d inst., calling at San Lucar on his return, to visit the Duke and Duchess of Montpensier. On leaving Cadiz the Prince proceeded to Lisbon, where he arrived on the 5th inst. on a visit to the King of Portugal. He was expected to remain in Portugal a fortnight, and to visit Cintra and the celebrated lines of Torres Vedras during his stay. On his return to England in about a fortnight, his Royal Highness, after spending a short time with his Royal parents at Buckingham Palace, will proceed to Edinburgh, and reside at Holyrood Palace for some weeks for the purpose of pursuing a course of study preparatory to going to Oxford in October, in which city his Royal Highness will attend lectures, and take advantage of the facilities for completing his education afforded by the University. It is not improbable that his Royal Highness will pursue a similar course at a later period at the University of Cambridge.

THE LEVÉE.—Notice has been given that the levée announced for the 20th inst. is postponed until the following Friday, the 24th inst.

THE CABINET.—A Cabinet Council was held on Saturday morning at the official residence of the Chancellor of the Exchequer in Downing Street. It is stated that her Majesty, as a mark of special favour, will confer upon Lord Derby the Order of the Garter, and, as there is no Garter vacant, will summon an Extraordinary Chapter of the Order for that purpose. The Gazette of last night announced that her Majesty has ordered a special statute conferring the Grand Cross of the Bath upon Lord Malmesbury and Sir John Pakington.

THE NEW MINISTRY.—The *Times* of yesterday gives the following list of the new Ministry, and states that as it has not yet been approved by her Majesty, no changes may still be made:—

THE CABINET.

*First Lord of the Treasury.*—Viscount Palmerston, K.G.
*Chancellor of the Exchequer.*—Mr. W. E. Gladstone.
*Secretary for Foreign Affairs*—Lord John Russell.
" " *Home Department.*—Sir G. Cornewall Lewis.
" " *Colonial Department.*—The Duke of Newcastle.
" " *War.*—Mr. Sidney Herbert.
" " *India.*—Sir C. Wood, G.C.B.
*First Lord of the Admiralty.*—The Duke of Somerset.
*Lord Chancellor.*—Lord Campbell.
*President of the Council.*—The Earl Granville, K.G.
*Privy Seal.*—The Duke of Argyll, K.T.
*Postmaster-General.*—The Earl of Elgin, K.T.
*President of the Board of Trade.*—Mr. Cobden.
" " *Poor Law Board.*—Mr. Milner Gibson.
*First Commissioner of Works.*—Mr. Cardwell.
*Chancellor of the Duchy of Lancaster.*—Sir G. Grey.

*Joint Secretaries to the Treasury.*—Mr. F. Peel; Mr. [illegible]
*Secretary to the Admiralty.*—Lord Clarence Paget.
*Under-Secretary for Foreign Affairs.*—Lord Wodehouse.
" " *the Colonies.*—Mr. Chichester Fortescue.

It is understood that Sir Alexander Cockburn, Chief Justice of the Common Pleas, will succeed Lord Campbell as Lord Chief Justice of England, that B. Hall will be raised to the Peerage, and that Wilson and Mr. Vernon Smith will be appointed Members of the Council of India.

PARLIAMENTARY MOVEMENTS.—The accession of new Ministers to office will render several re-elections necessary. An opposition is threatened to Mr. Gladstone's re-election for the University of Oxford. The names of Mr. Roundell Palmer, Mr. Sotheron Estcourt, Sir John Pakington, and Mr. Henley have been mentioned as those of possible candidates.

CONSECRATION OF BISHOPS.—The consecration of Archdeacon Campbell as Bishop of Bangor, Dr. Tyrrell as Bishop of Brisbane, and Dr. Claughton as Bishop of St. Helena took place on Tuesday in Westminster Abbey. The Archbishop of Canterbury officiated, and was assisted by the Bishops of London, Winchester, Salisbury, Llandaff, Argyle and the Isles, Columba, and Cape Town. The consecration sermon was preached by the Rev. Thomas Legh Claughton, M.A., honorary canon of Worcester, vicar of Kidderminster, and Professor of Poetry at Oxford.

VOLUNTEER RIFLE CORPS.—Since our last [illegible] meetings have been held in various parts of the kingdom for the establishment of rifle clubs or corps. With one or two exceptions these meetings have been marked by the utmost unanimity, and influential committees have been appointed to carry the resolutions into effect. Among the more important places at which meetings have been held may be mentioned St. George's Hall, Langham Square, Halifax, Lymington, Woodbridge, Newport, Bath, Brechin, Brecon, Plymouth, Devonport, Exeter, Falmouth, Torquay, St. Mary Church, Ilfracombe, Harwich, Hereford, Lichfield, Manchester, Margate, Birmingham, Bradford, Leeds, Newport, Pontypool, Stamford, Tenterden, Newark, Tenby, Sheffield, Winchester, Wolverhampton, Chelmsford, Derby, Edinburgh, Newport, Monmouth, Gateshead-on-Tyne, Great Yarmouth, Norwich, Northampton, Romford, Ipswich, Bury St. Edmunds, Tynemouth, Wisbeach, Wolverhampton, and York. The lord-lieutenants of the metropolitan county have had a meeting at the Guildhall, Westminster, the Marquis of Salisbury, K.G., the lord-lieutenant, in the chair, and have resolved to form themselves into committees for the several divisions in which they reside in the county, and organise the formation of a rifle corps in each locality.

SEAMEN'S BOUNTIES.—An order in Council has been issued in reference to the proclamation offering a bounty of 10*l.* to able seamen, 5*l.* to ordinary seamen, and 2*l.* to landsmen, directing that from the 15th inst. the offer be limited to able and ordinary seamen, and extending the period during which it will be payable until the 31st July.

## Foreign.

FRANCE.—The following Proclamation has been issued by the Emperor of the French respecting the war in Italy. It was addressed to the Italians on his entry into Milan, but it possesses European interest as a definition of the Imperial policy in the present war:—

"The fortune of war having conducted me this day to the capital of Lombardy, I come forward to tell you why I am here. When Austria unjustly attacked Piedmont I resolved to support my ally the King of Sardinia. The honour and the interests of France made that my duty. Your enemies, who are also mine, have endeavoured to diminish the noble sympathy that existed in Europe for your cause, by representing that I was only making war from personal ambition, or to extend the territory of France. There are some men who cannot understand that one can make war if he am not of that number. In the enlightened state of public opinion a man is greater at the present day by the moral influence which he exercises than by battles; by the moral influence I seek with pride my conquests; and this moral influence I seek with pride by contributing to render free one of the most beautiful nations of Europe. Your welcome has already proved to me that you have understood me. I do not come here with a meditated scheme for deposing Sovereigns, nor for imposing upon you my will. My army will only occupy [illegible] two things: to fight your enemies, and to maintain [illegible] order. It will not place any obstacle to the free manifestation of your legitimate wishes. Providence [illegible] favours nations, as individuals, by giving them [illegible]

tunity of growing suddenly great, but it is upon the condition that they know how to profit by it. Profit, then, by the fortune which is offered to you. Your desire for independence, so long expressed, so often frustrated, will be realised if you will show yourselves worthy of it. Unite yourselves, then, in one purpose—the deliverance of your country. Organise yourselves militarily; enrol all under the banner of King Victor Emmanuel, who has already so nobly shown you the road to honour. Remember that without discipline there can be no army; and, animated by the sacred fire of patriotism, only be to-day soldiers, to-morrow you will be the free citizens of a great country. Done at the Imperial Head Quarters at Milan, 8th June, 1859. "NAPOLEON."

**On the same day the Emperor issued the following proclamation to the army:—**

"Soldiers,—A month ago, confident in efforts of diplomacy, I still hoped for the maintenance of peace, when suddenly the invasion of Piedmont by the Austrian troops called us to arms. We were not ready. Men, horses, *matériel*, and supplies were wanting, and we had, in order to assist our allies, to pass in small divisions beyond the Alps before an enemy formidable and prepared beforehand. The danger was great; the energy of the nation and your courage supplied all; France has again found her old virtues, and united in one feeling and for one object it has shown the power of her resources and the strength of her patriotism. It is now only 10 days since operations commenced, and the Piedmontese territory has been already cleared of its invaders. The allied army has fought four combats and gained a decisive victory, which has carried it to the gates of the capital of Lombardy. You have put more than 75,000 Austrians *hors de combat*, taken 17 cannon, two colours, and 8000 prisoners; but all is not terminated, you will have more struggles to support and obstacles to overcome. I rely on you: courage, then, brave soldiers of the Army of Italy. Your forefathers from above contemplate you with pride.—Given at head-quarters, Milan, 8th June."

The *Moniteur* says that the Emperor, wishing to re-establish old and glorious traditions, has decided that any regiment which shall take a colour from the enemy shall bear the cross of the Legion of Honour attached below its eagle. Lieut.-Colonel Schmitz has arrived in Paris on a mission, charged by the Emperor to deliver to the Empress the flag of the 9th Regiment of Austrian infantry, which was taken at the battle of Magenta. The body of General Espinasse has been brought to Marseilles by sea, and has since been honoured by a public funeral. When the coffin containing the body was carried on board the steam-frigate which conveyed it to France, the deck was crowded with Austrian prisoners. On a sign from their officers, they all fell into line, and by their attitude, in the absence of arms, paid military honours to the remains of their brave adversary.

SPAIN.—The *Madrid Gazette* of Sunday publishes a document, by which the Infante Don Sebastian, brother of Don Carlos, solemnly recognises the Queen.

BELGIUM.—The Duchess of Brabant was safely delivered of a Prince on Sunday afternoon at the Castle of Laeken. The royal infant has received the names of Leopold-Ferdinand-Elie-Victor-Albert-Marie. The Council of Ministers has since presented an address to the King praying his Majesty, in the name of the people, that the young Prince might bear a name that should be a personification near the throne of the Walloon and Flemish people, who were united to the Belgian monarchy in 1830, and suggesting that the royal infant should bear the title of Count of Hainault. His Majesty has complied with this request, and a Royal Ordinance to that effect has been published.

SWITZERLAND.—The Federal Council has disbanded the troops in the Canton Valais, and reduced the number of troops in the Canton Tessin to 3000, on account of the seat of war having become removed from that frontier to Switzerland. On the frontiers of the Grisons, near Nanders, Austrian troops have arrived and begun making intrenchments.

RUSSIA.—Prince Gortschakoff, the Minister for Foreign Affairs, has addressed a circular to the representatives of Russia at foreign courts in reference to the war, from which the following is an extract:—

"Our desire, like that of the majority of the great Powers, is now to localise the war, because it arose out of local circumstances, and because it is the only means of accelerating the return of peace. The line followed by some States of the German Confederation tends, on the contrary, to generalise the struggle by giving it a character and proportions which go beyond all human prevision, and which, under any circumstances, would lead to increased devastation, and would cause torrents of blood to be shed. We can the less understand this tendency, as, independently of the guarantees offered to Germany by the positive declarations of the French Government, accepted by the great Powers, and the very force of circumstances, the German States thereby deviate from the fundamental basis which unites them. The German Confederation is a combination purely and exclusively defensive. It is on that condition (*à ce titre*) that she participated in the international law of Europe, on the bases of treaties to which Russia's signature is affixed. Now, no hostile act has been committed by France against the Confederation, and there does not exist any obligatory treaty for the latter to attack that Power. Should, consequently, the Confederation take hostile measures towards France on conjectural data, and against which it has obtained more than one guarantee, it would have falsified the object of its institution, and disowned the spirit of treaties upon which its existence rests. We confidently entertain the hope that the wisdom of the Federal Governments will set aside determinations which would turn to their prejudice, and would not contribute to strengthen their own position. If, which God forbid, it should happen otherwise, we shall at all events have fulfilled a duty of frank and sincere friendship. Whatever may be the issue of the present complications, the Emperor, our august master perfectly free in his action, will only be inspired by the interests of his country and the dignity of his Crown in the determinations which his Majesty will be called upon to take."

PRUSSIA.—An order has been issued for mobilising the whole Prussian army; and though it is asserted in official circles that this measure is not of an aggressive character, it is reported at Berlin that Prussia will take part in the existing conflict if the French army cross the Mincio. Prussian Commissioners were at Dresden on Thursday negotiating for the transport by railway of considerable bodies of Prussian troops. A satisfactory result was arrived at, and the Commissioners then started for Munich with a similar object. The official *Gazette* in announcing the issue of this order, says:

"The greater dimensions the events at the seat of war assume the more serious becomes the duty of Government to place itself in such a position as may enable Prussia, in the regulation of the Italian question, to proceed in concert with her confederate German Powers, with that weight which Prussia is called upon to use, and which corresponds to the position of Germany as a Power in Europe. Looking from this point of view, and regarding the continually increasing armaments even of neutral Powers, Government has found it imperative partly to mobilise the army, and will take further steps in connection therewith, in order that coming events may not take Prussia and Germany by surprise and unprepared. The character of measures of precaution is so fully impressed on all these steps that it is needless to make any new declaration respecting them. The country will grant them its concurrence, and the German federal Powers will also as we hope see in this new measure, taken in the interest of the security and the position of Germany as a Power, their confidence in the circumspect initiative of Prussia realised."

AUSTRIA.—An Imperial decree has been issued ordering the payment of interest on the national loan during the continuance of the war, to be made in banknotes, with a premium of 25 per cent., or in Government bonds to be redeemed with compound interest after five years from the date of their issue.

ITALY.—The *Moniteur* of Friday publishes the following account of the battle of Magenta:—

"Head-quarters, San Martino, June 5.

"The French army assembled round Alessandria had great difficulties to overcome. If it marched on Piacenza it would have had to besiege that fortress and force a passage of the Po, there 900 metres in width, and that difficult operation would have had to be effected in presence of a hostile army of 200,000 men. If the Emperor crossed the river at Valenza he would have found the enemy concentrated on the left bank at Mortara, and he could only have attacked him by separate columns manœuvring in the midst of a country intersected by canals and rice-fields. On both sides, therefore, there was an almost insurmountable obstacle; the Emperor resolved to obviate it, and he deceived the Austrians by concentrating his forces on the right, by occupying Casteggio and even Bobbio on the Trebbia. On the 31st May the army received the order to march to the left, and crossed the Po at Casale, the bridge of which had remained in our possession; it at once took the road to Vercelli, where the passage of the Sesia was carried out to protect and cover our rapid march on Novara. The efforts of the army were directed on the right, on Robbio, and two combats, glorious for the Sardinian troops, fought on that side made the enemy believe we were marching on Mortara. Meantime, the French army was advancing on Novara, and it took position on the very same ground where 10 years previously King Charles Albert gave battle. Here it was able to meet the enemy if necessary. Thus this bold march had been protected by 100,000 men encamped on our right flank at Olengo in front of Novara. Under these circumstances it was then to the reserve that the Emperor had to intrust the execution of the movement taking place behind the line of battle. On the 2d June a division of the Imperial Guard was advanced towards Turbigo, on the Ticino, and not finding any resistance it threw three bridges across. The Emperor having received confirmatory intelligence that the enemy had withdrawn to the left bank of the river, ordered the Ticino to be crossed at this point by the *corps d'armée* of General M'Mahon, followed on the morrow by a division of the Sardinian army. Our troops had scarcely taken position on the Lombard bank when they were attacked by an Austrian corps from Milan, brought up by the railway. They drove it back victoriously in presence of the Emperor. On the same day (June 2) Espinasse's division having advanced on the road from Novara to Milan as far as Trecate, from which place it threatened the bridge at Buffalora, the enemy hastily evacuated the intrenchments it had thrown up at this point, and retired to the left bank, attempting to blow up the stone bridge across the river. The attempt was not successful, the two arches attempted were not sufficiently damaged to prevent the passage. The 4th June had been fixed by the Emperor for the definitive occupation of the left bank of the Ticino. General M'Mahon's *corps d'armée*, strengthened by the division of the Voltigeurs of the Imperial Guard, and followed by the whole army of the King of Sardinia, was to advance from Turbigo on Buffalora and Magenta, while the division of the Grenadiers of the Imperial Guard was to carry the *tête-de-pont* of Buffalora on the left bank, and Marshal Canrobert's *corps d'armée* was to advance along the right bank to cross at the same point. The execution of this plan was frustrated by one of those incidents which must always be expected in warfare. The army of the King was delayed in crossing the river, and only one of his divisions was able to follow the corps of General M'Mahon at a distance. The advance of Espinasse's division was also delayed, and, on the other hand, when Marshal Canrobert's corps left Novara to join the Emperor, who had proceeded in person to the bridge at Buffalora, it found the road so encumbered that it only arrived very late on the banks of the Ticino. So matters stood, and the Emperor awaited, not without anxiety, the signal of the arrival of General M'Mahon's corps at Buffalora, when about 2 o'clock he heard a heavy fusillade and cannonade in that quarter. The General was coming up. This was the moment to support him, by advancing on Magenta. The Emperor at once threw Wimpffen's brigade against the formidable positions occupied by the Austrians in front of the bridge. Cler's brigade followed up the movement. The heights which border the canal and village of Buffalora were soon carried by the impetuosity of our troops, but they then found themselves opposed to formidable bodies, whom they could not drive back, and who stopped their advance. Marshal Canrobert's column had not yet come up, and, on the other hand, the cannonade and fusillade which had announced the arrival of General M'Mahon had completely ceased. Had the General's column been repulsed, and would the division of the Grenadiers of the Guard have to sustain alone the whole strength of the enemy? This is the proper place to explain the manœuvre of the Austrians. When they learnt on the night of the 2d of June that the French army had made itself master of the passage of the Ticino at Turbigo, they rapidly recrossed the river at Vigevano with three of their *corps d'armée*, who burnt the bridges behind them. On the morning of the 4th they were opposite the Emperor 125,000 strong, and it was against such a disproportionate force that the division of the Grenadiers of the Guards, with whom was the Emperor, had to compete. At this critical moment General Regnault de Saint Jean d'Angely displayed immense energy, as did also the Generals under his orders. General of Division Mellinet had two horses shot under him, General Cler fell mortally wounded, General Wimpffen was wounded in the head. Commandants Desmé and Maudhuy, of the Grenadiers of the Guard, were killed, the Zouaves lost 200 men, and the Grenadiers suffered a loss not less considerable. Finally, after [illegible] expectation of four hours, during which Mellinet's Division sustained without flinching the attacks of the enemy, Picard's brigade, led by Marshal Canrobert, arrived on the field of battle. Shortly afterwards Vinoy's Division joined, of General Niel's corps, which the Emperor had sent for, and finally Renault's and Trochu's Divisions of Canrobert's corps. At the same time General M'Mahon's cannon became again audible in the distance. The General's corps, retarded in its advance, and less numerous than it should have been, had advanced in two columns on Magenta and Buffalora. The enemy having attempted to cut in between those two columns, General M'Mahon ordered his right column to turn back on his left towards Magenta, and this explains the cessation in the firing at the commencement of the action on the Buffalora side. In fact, the Austrians, finding themselves hard pressed on their centre and left had evacuated the village of Buffalora and had brought the greater portion of their forces to bear against General M'Mahon before Magenta. The 4th of the Line boldly attacked the farm of Casa-la-Nova on the outskirts of the village, and which was defended by two Hungarian regiments. Fifteen hundred men of the enemy laid down their arms, and the colours were taken away from the Colonel's body. However, Motterouge's Division found itself hard pressed by considerable forces, which threatened to separate it from Espinasse's Division. General M'Mahon had placed in second line the 13 battalions of the Voltigeurs of the Guard under the command of the brave General Camou, who, advancing to the front, sustained the shock of the enemy, and gave time to Motterouge's and Espinasse's Divisions vigorously to resume the offensive. At this moment of general attack General Auger, commanding the artillery of the Second Corps, opened fire with 40 guns on the railway embankment, which taking the Austrians in flank and crossways made fearful havoc. At Magenta the combat was terrible. The enemy defended the village most obstinately. Both sides felt that it was the key of the position. Our troops took it house by house, cannon [illegible] loss to the Austrians. More than 10,000 men were put *hors de combat*, and General M'Mahon took about [illegible] prisoners, including one whole regiment, the 1st Chasseurs à pied, commanded by Colonel Reuser. But the General's corps suffered considerably, 1500 men were either killed or wounded. In the attack on the village General Espinasse and his *officier d'ordonnance*, Lieutenant Prodefond, were both killed. While leading on their men Colonel Dumont, of the 65th of the Line, and Colonel Chabrière, of the 2d, fell mortally wounded. On the other side Vinoy's and Renault's Divisions were doing prodigies of valour, under the orders of Marshal Canrobert and General Niel. Vinoy's Division, which had left Novara in the morning, had scarcely reached Trecate, where it purposed to bivouac, when it was sent for by the Emperor. It advanced at quick step as far as the bridge of Magenta, driving the enemy from the positions they occupied, taking about 1000 prisoners, but engaged with superior forces, it suffered heavy loss—11 officers were killed and 30 wounded, [illegible] non-commissioned officers and men were placed *hors de combat*. The 50th of the Line suffered most. Colonel Delort fell at the head of his men, and all the officers were wounded. General Martimprey received a bullet wound while leading on his brigade. Marshal Canrobert's troops also suffered considerably. Colonel de Senneville, the Chief of his Staff, was killed at his side; Colonel Charlier of the 50th fell mortally wounded by five bullets, and many officers of Renault's division were placed *hors de combat*, while the village and bridge of Magenta were taken and retaken seven times. Finally about half past 8 at night the French army remained masters of the field of battle, and the enemy withdrew, leaving in our hands four guns, one of which was taken by the Grenadiers of the Guards, two flags, and 700 prisoners. The number of Austrians placed *hors de combat* may be estimated at 20,000. 12,000 muskets and 30,000 haversacks were found on the battle-field. The Austrian corps which fought against us are those of Clam-Gallas, Zobel, Schwartzenberg, and Lichtenstein. Field-Marshal Gyulai commanded in person. Three days after their departure from Alessandria the allied army had given three combats, gained a battle, forced the passage of the Austrians, and opened the gates of Milan. Since the combat of Montebello the Austrian army has lost 25,000 men in killed and wounded, 10,000 prisoners, and 17 guns."

The Austrians are gradually retreating within the celebrated military triangle formed by Peschiera, Mantua, Legnano, and Verona. On Friday they evacuated Piacenza, after having blown up the citadel and other fortifications. They abandoned to the allies a great quantity of provisions, cannon, and ammunition. The allied troops afterwards entered the town, invited by the municipality. The Austrians also evacuated Lodi, and after having crossed the Adda destroyed the bridges. They also evacuated Pizzighettone after having burned the bridge and thrown their guns and ammunition into the water. On Saturday night they evacuated Bologna, taking the direction of Modena. After their departure a popular demonstration took place, expressing the sense of the public in favour of the national cause. The Cardinal Legate at once took his departure, leaving to the municipality the government of the town. The municipality thereupon appointed a commission, which immediately proclaimed Victor Emmanuel Dictator. The Austrians have also left Ancona and marched towards the lower Po, to join the troops in the provinces of Venice. Forli, Faenza, Imola, and the other municipalities of Romagna have since pronounced in favour of the national cause, and proclaimed Victor Emmanuel King. The Austrians have also withdrawn from the river Oglio, taking the direction of the Venetian provinces. On the 12th the Emperor of the French removed his head-quarters to Gorgonzola; and in the afternoon personally superintended the throwing of two bridges of boats across the Adda. The operation, which presented serious difficulties, was however perfectly effected, and as soon as the bridges were completed the army began its onward movement. The Emperor of Austria will forthwith assume the immediate command-in-chief of his army, which has been ordered to take up a new position. General Count Schlick has taken the command of the Second Army instead of General Gyulai. From the lake district we learn that the Government of the King of Sardinia is already in operation at Como and Sondrio. Garibaldi has taken Bergamo, and is threatening the Southern Tyrol, from Val Canonica, Val Trompia, and Bagolino. The Austrian force at Laveno has abandoned that place after spiking their guns, and taken refuge in the Swiss territory. The Duchess of Parma quitted her dominions on Thursday week at noon, after having released her troops from their oaths. She left the Government to the Municipality, who proclaimed the Government of King Victor Emmanuel. On Sunday night the Austrians evacuated Reggio and Brescello, and were also making preparations to evacuate the other parts of Modena. A deputation from Modena has arrived in Turin. The Duke of Modena arrived at Mantua on Tuesday, and was received by the Archduke William.

GREECE.—The Greek Chambers have passed a Bill introduced by the Minister of Finance, establishing free trade in corn. A popular manifestation has taken place at Athens in celebration of the victories in Italy. The French Ambassador, in addressing the crowd assembled before his hotel, said that he would not fail to communicate to the Emperor the sympathies of Greece. The steam communication between Trieste and Constantinople is now carried on by Greek steamers.

THE ADRIATIC.—It is reported that the French fleet in the Adriatic received powerful reinforcements on Saturday, and it is expected that a landing of troops will soon be attempted on the coast between Venice and Trieste.

UNITED STATES.—Accounts from New York to the 4th inst. state that the State Department at Washington had received voluminous despatches from Mr. M'Lane, the American Minister to Mexico, setting forth in an official form the condition of affairs in that country. He explains his misunderstanding with Miramon. It appears that he simply followed the precedent set by the British Government in making demands of one Government while recognising the other, but Miramon declined to receive Mr. M'Lane's communication. The latter complains bitterly to the United States' Government. Miramon, after forbidding any communication between the city of Mexico and Vera Cruz, sold to a party the exclusive privilege of transporting goods between the two places, in consideration of the payment of an *ad valorem* tax to the Government of 26 per cent. on all goods. The latest despatches forwarded to Mr. M'Lane had not reached him. It was believed that they would result in the speedy conclusion of a treaty with the Juarez Government, as special instructions relative to the transit question were included. The Navy Department had also received despatches from Captain Faragut, commanding the United States' steamer Brooklyn. He announced his intention, according to the desire of Mr. M'Lane, to send a naval force immediately to Tampico, in anticipation of an attack on that place by the Miramon party, the object being the protection of the United States' Consulate and other American interests there. The law officer of the general Government, by direction of the President, has just given an important opinion upon the recent conflict of authority which has arisen between the federal executive, judicial, and military officers stationed in Utah territory. It appears that the course of Governor Cumming is sustained. Mr. Cobden was to embark at Quebec for England on the 18th inst. Madame Piccolomini has arrived by this packet.

# Parliament.

## HOUSE OF LORDS.

FRIDAY. — *Ministerial Statement.*—The House having reassembled after the Whitsun recess, the Earl of DERBY announced that after the vote of Saturday morning, he and his colleagues had resigned their offices, and only held them until their successors were appointed. He vindicated the foreign policy of his Government, and in conclusion expressed his regret that the details of all that had passed between Lord Granville and her Majesty had been allowed to transpire in the *Times* newspaper.—Earl GRANVILLE said that he had only stated the conversation to a few political and private friends, and now regretted that he had not maintained a complete reserve on the subject. The House then adjourned to Tuesday.

## HOUSE OF COMMONS.

FRIDAY.—The *Adjourned Debate on the Address* having been resumed by Mr. GIBSON, in favour of the amendment, Mr. LINDSAY spoke in opposition to the amendment, on the ground that a substantial measure of Reform was more likely to pass by the instrumentality of the party now in power than by that of Lord John Russell.—Mr. SIDNEY HERBERT supported the amendment. He was not disposed to continue his confidence in the Government, because he did not consider that their antecedents, either with regard to their foreign or domestic policy, were such as to justify it. He referred to the long and steady support which the Liberal party had given to the cause of progress, and said he wished to see a Government composed of stronger materials than that which now held the reins of office. Such a Government he believed might be formed by mutual concessions and forbearance, and when formed, he hoped it would not forget that there was a people who were struggling for freedom.—Mr. BENTINCK opposed the amendment, and ridiculed the idea that the new coalition Ministry could secure the confience of Parliament or the country.—Mr. DANBY SEYMOUR supported the amendment, and stigmatised the Government with having sympathised with despotism all over the world, while every triumph they had achieved at home had been obtained by an abandonment of principle.—Captain VERNON complained that the amendment was nothing more than a desperate determination on the part of hon. gentlemen, who had long been cooling their heels on the chilly benches of the Opposition, to warm their backs at the Treasury fire. There were no sympathies in common between them, for the ballot which was odious to Lord Palmerston was a sweet smelling savour to the nostrils of Mr. Bright.—Mr. LEATHAM supported the amendment on the ground that the Administration had failed as practical statesmen.—Sir C. LEWIS said that the Government having dissolved Parliament on the Reform Bill, had thrown down the present challenge, and the Opposition would have been guilty of political cowardice if they had not accepted it. The amendment therefore was demanded by circumstances. He then reviewed the financial policy of the Chancellor of the Exchequer, and declared that all his anticipations had been falsified by the events, and that the Administration of which he was a member was not entitled to the confidence of Parliament.—Sir J. PAKINGTON denied that any case had been made out against the Government sufficient to warrant so extreme a penalty as a vote of censure. He defended the measures of the Government, and said that the Reform Bill had not been defeated on its merits. In fact the second reading would have been carried had not the Opposition changed their tactics and adopted a party move. No country had so much reason to be proud of its foreign policy as England since that policy had been directed by the Earl of Malmesbury, and yet the House was called upon to condemn the Government without having heard the evidence. With regard to the defences of the country, he claimed credit for having rescued before. When he took office there were only 25 sail of the line, and there were now 37 effective ships, and 17 more would be launched in the course of the present year, making 15 line-of-battle ships, or double the number they found 15 months ago. Instead of being censured for their domestic or foreign policy they ought to be thanked. With regard to the French alliance he was of opinion that it had conferred great blessings upon the two countries, and he trusted the day was far distant when there would be any interruption of it. If the Government were defeated that night they would at least have the satisfaction of knowing that they had discharged their duty to their Sovereign and their country.—Lord J. RUSSELL repudiated the allegation that those who supported the amendment were influenced by any factious motives, and contended that if Parliament thought the destinies of the country were not in proper hands, they would be guilty of a grave dereliction of duty if they refrained from interfering. He characterised the Reform Bill of the last session as a measure which would have gone far to repeal the Reform Bill of 1832. He rejoiced therefore that he had been the means of inducing the House to reject it. With respect to foreign affairs, the advice which had been given by Lord Malmesbury to the Portuguese Government, in the matter of the Charles-et-Georges, was most undignified for a British Minister to address to a friendly Power. He did not, however, mean to say that Lord Malmesbury was responsible for the war which had broken out between Austria and Sardinia, because he believed that no British Minister could have averted the calamity. Austria had attempted to destroy all liberty in Italy; and Sardinia, relying on the assistance of France, had exceeded her international duties by raising volunteer forces from among the subjects, or perhaps the conscripts, of Austria. As to the future policy of Great Britain in relation to neutrality he had no confidence that the present Government could maintain peace, for already under its Ministry the alliance with France had been weakened. He saw no reason whatever why a Reform Bill should not be passed this year, but to accomplish that object the present Administration must be replaced by a stronger and more Liberal Government. The noble lord concluded by describing the character of the Premier as a man whose levity of mind and instability of principle disentitled him to the confidence of the country.—Mr. ROEBUCK expressed his inability to vote for the amendment, on the ground that he had no assurance that the new Administration would prove better Reformers at home or abroad than the old.—The SOLICITOR-GENERAL entered into an elaborate defence of the Government, in the course of which he reviewed their policy, home and foreign, contending that they had done nothing to justify Parliament in withdrawing its confidence from them. At a quarter to 2 o'clock the SPEAKER put the motion, when the numbers were—For the amendment, 323; against it, 310; majority in favour of the amendment, 13. The result was hailed with loud cheers from the Opposition benches.—The CHANCELLOR of the EXCHEQUER then moved that the House should adjourn until 12 o'clock on Saturday, which was agreed to.—The committee to prepare the Address was then appointed, and the House adjourned at a quarter-past 2 o'clock.

SATURDAY.—The House met at noon when the Marquis of HARTINGTON brought up the report on the amended Address. On the motion of Lord J. RUSSELL, it was agreed that her Majesty's Speech be taken into consideration on Friday next.

FRIDAY.—*Ministerial Statement.*—The CHANCELLOR of the EXCHEQUER announced that Lord Derby and his colleagues had resigned, and only held their offices until their successors were appointed. He believed it would be for the convenience of the new Ministers if the House adjourned to Tuesday, and he therefore moved an adjournment to that day. The second reading of the *Newspapers Bill* was adjourned for a fortnight, and the *Assistant-Judge Middlesex Bill* was read a second time. The House then adjourned to Tuesday.

# Metropolis and its Vicinity.

THE EARL OF DERBY ON THE MINISTERIAL CRISIS.—At a banquet at Merchant Taylors' Hall on Saturday Lord Derby in returning thanks for her Majesty's Ministers, announced their resignation of office, and spoke as follows on the circumstances which had led to it:—

"My colleagues and myself accepted office under circumstances of no ordinary difficulty, and in a time of no ordinary anxiety. We have laboured sedulously and diligently each in the discharge of his separate duties; we have endeavoured honestly and faithfully to perform our arduous duties to our Sovereign, who placed power in our hands, and to the country which has enabled us to carry on the public business. We have, I trust, not acted in any manner which could be injurious to the domestic happiness, to the tranquillity, to the welfare, or to the wealth of this great community. With respect to the foreign interests of the country, while I will venture to say for ourselves that we have diligently and successfully laboured in raising the power, moral as well as physical, of this great country, to apply it in case of need—I may state that if we have been unsuccessful in preventing other countries from entering into mad and causeless hostilities, which might have been obviated by reasonable concession, we have at least been successful in keeping this country out of that turmoil of war; we have hitherto preserved to her the blessings of peace; we have protected her from all entangling and embarrassing alliances—and we are enabled to hand over the government of this country to our successors, whoever they may be, in a position, I hope, prepared for war, and equally determined, so long as it is possible, to maintain peace—in a position in which they may, either for peace if it be possible to maintain it, or for war if we are driven into it, be enabled to make use—as I am sure every British Minister would do—of those means, both moral and physical, which we have been carefully engaged in collecting and strengthening. This is neither the fitting time nor opportunity for entering into any discussion of the causes which have compelled us to resign our offices. I do not in the slightest degree complain of the course which has been pursued by those who upon general grounds did not think we were entitled to their confidence and support. On the contrary, I think they have taken a manly and straighforward course in at once declaring that we did not enjoy their confidence. I regret it. I regret unfeignedly that the decision of the House of Commons, by a small majority, has been that we are not entitled to their confidence and support; but, that verdict having been given, I am not the man not to bow to it with respect and submission. And, while I am not conscious of having deserved that vote of want of confidence, I yet bow to a verdict which renders it impossible for me to satisfactorily conduct the business of the country; for I need not say that, not being possessed of the confidence of the House of Commons, no Minister, however much greater than mine may be his abilities, can conduct the affairs of the country with satisfaction to himself, to his Sovereign, or to the people. I have consequently been compelled this day to resign into the hands of my Sovereign the trust with which I have been honoured; and I can only say that, in resigning that trust, I most anxiously and earnestly hope, for the advantage of the country, that it may not be long before final arrangements may be made for the completion of another Administration. A period of uncertainty, a period when there is no Government, is at this moment fraught with extreme danger to the country. However I may differ in political opinions from those who may succeed me—though upon many subjects, and those of a most important character, I believe there is so much unanimity of opinion that men of all parties can cordially combine for the public welfare—I will say this for myself, and for that great Conservative party with which I have so long had the honour of being connected—that, acting in the truest spirit of Conservatism, their earnest and anxious services out of office will continue to be given to their Sovereign and to the country—that there will be no factious course taken which may be either embarrassing to the formation of the Government or to the subsequent proceedings of the political rivals; that so long as their successors shall walk in the light of the constitution, and as long as they shall show a due interest for the honour, the welfare, and the prosperity of the country, not from their own supporters will they receive a more cordial assistance than from those opponents whom they displaced, but whose sanction and support will ever be given to the maintenance of the welfare and prosperity of the country. I am certain that such are the opinions which will find favour with the true Conservatism of this country. This is no time to indulge in selfish feelings, or to enter into any political struggles for the possession of a short-lived power. It is a time when great interests are stake, when private interests must be merged into them, and I for one will never for a single moment consider my personal position except so far as that position may enable me to be of service to my Sovereign and to my country."

STATE OF THE THAMES.—At the last meeting of the Metropolitan Board of Works a report was read from Dr. Miller, of King's College, stating that the progressive rise of the temperature both in the atmosphere and in the river during the past week, accompanied by a diminished fall of rain, has been attended by a marked change for the worse in the state of the river, particularly at the up flow of the tide. Dr. Miller recommends the admixture of lime in regulated quantities in the sewerage districts before allowing them to become mixed with the water of the river as tending directly to diminish the effluvium. Other but more expensive deodorising agents might be had recourse to in case of urgency, but for the present he thought lime would answer the purpose. The report contained tables showing in detail the temperature of the river at various states of the tide. After some discussion the subject was referred to the consideration of the Main Drainage Committee, the chairman in the meantime being empowered to act in co-operation with Dr. Miller, and to order what may be necessary, in order to check the evil. On Thursday the measures recommended by Dr. Miller were put into operation in various parts of the metropolis. Sheds were erected in Farringdon Street, on the line of the Fleet sewer; in Trafalgar Square, adjoining the fountains; and in various parts of the east and west of London, under which machinery was used for the preparation of a deodorising liquid, which was poured into the several sewers.

LIGHTING PUBLIC GALLERIES WITH GAS.—In order to have an authoritative investigation into the whole question of lighting public galleries with gas, the Lord President of the Council has named a commission of inquiry, consisting of Professors Faraday, Hofmann, and Tyndall, with Mr. Redgrave, R.A., and Captain Fowke, R.E., who will commence their investigations forthwith.

VICTORIA BRIDGE, PIMLICO.—The foundation-stone

of this important work, the first railway bridge over the Thames within the metropolis, was laid a few days since by the eldest son of Mr. Fowler, the engineer. The works of the Victoria Station and Pimlico Railway, of which this bridge forms an important part, have been carried on with great energy since the Act of Parliament received the Royal assent last year, and it is confidently expected that the whole undertaking will be completed next summer, when the Brighton, East Kent, Great Western, and London and North-Western Railway Companies will be in a position to give their passengers access to a new west-end station. The bridge over the Thames will present some interesting peculiarities of construction by which great lightness of appearance will be combined with unusual strength and rigidity. The superstructure, which will consist of four arches, each of 175 feet span, will be formed entirely of wrought iron. The piers and abutments are founded on the London clay, at a sufficient depth to be safe against the possibility of any injury arising from the future deepening of the bed of the river, by scour or otherwise, which has been so destructive to Westminster and Blackfriars Bridges; they will be constructed of massive ashlar work, for which the greater part of the stone is wrought and on the ground ready to be placed in the work. The total cost of the bridge will be under 100,000*l.*, and it will be completed in less than two years from its commencement.

ROMAN CATHOLIC PRIESTS IN WORKHOUSES.—At the weekly meeting of the directors of the poor of St. Pancras, held on Tuesday at Camden Town, a discussion took place relative to the recent meeting in St. James's Hall, for the purpose of agitating for the appointment of Roman Catholic priests in workhouses, and Mr. Turner, churchwarden, gave the following notice of motion to be considered at a special meeting:—

"That in consequence of the meeting held in St. James's Hall, on the 8th of June, for the purpose of securing the appointment of Roman Catholic priests to workhouses on an equality with Protestant chaplains, a committee be appointed to watch the further progress of the agitation, and to devise such means as they deem fit to render any such attempt fruitless, and report the same to the board, and that the vestry be requested to co-operate with the directors for that purpose."

DEPARTURE OF M. KOSSUTH.—On Thursday morning M. Kossuth left London for Paris, having been provided with a passport "by superior order" at the French Embassy. He will remain in Paris a day or two and then proceed by way of Marseilles to Genoa, where the formation of a Hungarian legion has been commenced by General Klapka.

THE GREAT EASTERN.—The Great Ship Company have taken advantage of the Whitsun holidays to throw open their leviathan vessel to the public, in order that they may see the progress that has been made in her internal fittings. A large number of persons took advantage of the opportunity on Monday and Tuesday, some proceeding by the steam-boats and others by rail. The appearance of the ship on entering the deck affords evidence that busy hands have been at work in carrying out the innumerable details which were necessary to make the Great Eastern a perfect ship. The deck, which a short time since presented a rude succession of iron girders, is now completely planked from end to end. The skylights are also in their places, and give a look of finish where all was before incompleteness and confusion. Three masts and two funnels are in their places, and the completed bulwarks all round take away the sense of insecurity with which people used formerly to approach the sides of the ship. The lower decks have also been planked, and great progress has been made in partitioning them off into permanent compartments. The grand saloon is in a very forward state, and would be a noble apartment, more like a drawing-room in a mansion on shore than the cabin of a ship were it not for the two immense funnels which run up the centre, and inconveniently interrupt the sweep of the apartment. On each side elegant cabins are fitting up, and the same may be said of the other six saloons. One of the cabins has been finished, in order that the visitor may judge of what they are intended to be. This completed department is what is called a family cabin, containing bed-room, sitting-room, and dressing-room, all of them lofty and well ventilated, and possessing a much greater number of conveniences than could be found in a similar suite on shore. The other cabins are also in a forward state, and as an immense number of men are kept incessantly at work there is every prospect of the ship being ready for her trial trip on the 4th of August.

MURDER AND SUICIDE IN ST. PANCRAS.—On Wednesday morning a woman named Elizabeth Croft, wife of a working jeweller in Swinton Street, St. Pancras, in the absence of her husband on business, murdered her two children by cutting their throats, and afterwards committed suicide. The youngest child was only two months old, and since its birth the mother has been in a low and desponding state. An inquest was opened on Thursday and adjourned for medical evidence as to her state of mind.

THE FATAL FIRE IN LIME STREET.—The men employed in digging out the ruins of the late fire in Lime Street have found the charred remains of a human body. An inquest was held on the body on Monday, when the jury returned a special verdict, expressing their opinion that the remains were those of William Bengough, a man employed by Messrs. Hubbuck, and that he accidentally perished in the fire which occurred on their premises on May 20; and reiterating the opinion of the former jury as to the dangerous accumulation of combustible materials on the premises.

THE PUBLIC HEALTH.—The Registrar-General's report states that the deaths in London in the week that ended Saturday, June 11, were 938. In the corresponding weeks of the 10 years 1849-58 the average number was 984, which, if raised in proportion to the increase of population, will become 1082. The present return is therefore 144 below the average. During the week the births of 834 boys and the same number of girls, in all 1668 children, were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1533.

## Provincial.

APPLEBY.—On Saturday afternoon a fire broke out on Burton Fell, the property of Mr. John Wybergh, one of the Crossfell range of mountains. It appears that the fire was discovered on the previous day by a farmer who was looking after his stock, but having no idea that it would extend far, he took no steps to extinguish it, although, it is alleged, a canful of water at that time would have been sufficient to put it out. Since then, owing to the extreme dryness of the moss and heather, aided by a strong easterly wind, the fire has made considerable progress, having reached Hilton Fell, the property of the Earl of Lonsdale, and spread over an extent of ground roughly estimated at 1000 acres. The fire has got a strong hold of the peat moss, among which it smoulders until it reaches the dry heath when it bursts into flame and then rapidly spreads. An attempt has been made to extinguish it by digging a deep trench to cut off the communication, but whether the plan will be successful remains to be seen. This fire will entirely destroy the prospects of the sportsmen for the season, as the birds are mostly all sitting at this time of the year.

BIRMINGHAM.—At a meeting of the Town Council on Tuesday it was resolved "that petitions be presented to both Houses of Parliament, urging upon them the earnest desire of the corporation that the Government should observe a strict neutrality in the war now raging on the continent of Europe."—The statue of the late Mr. Thomas Attwood, which has been erected at Birmingham by his friends and fellow-townsmen in honour of his memory, and to perpetuate the remembrance of his public services, was uncovered on the 7th inst. in the presence of the mayor and corporation, and a vast concourse of spectators. The statue is of Sicilian marble, and is said to be an admirable likeness. The figure is 9 feet, and, with pedestal and base, stands 22 feet high. It is the production of Mr. John Thomas, of London.

FALMOUTH.—Another Austrian vessel, the brig Pasqualina, from Odessa, laden with rye, has succeeded in reaching this port in safety, thus making five ships of that nation lately arrived here.

MALTON.—About 12 months ago, a very fine early English church was opened for Divine service, which had been built at a great cost, to replace an old Norman structure which had gone to decay. During the erection of the new building a high wind blew down the whole of the west end and the tower, destroying the ancient bells. It is now found necessary to suspend the service, owing to the walls of the nave showing large defects, and which are, in fact, pushed outward by the timbers of the roof. The church contains many valuable painted windows. It is feared that the destruction of the building is inevitable. A parish meeting has resolved to refer the matter to the judgment of a competent architect.

NEWCASTLE-ON-TYNE.—Another dividend of 5*s.* in the pound is about to be paid to the creditors of the Northumberland and Durham District Bank, whose stoppage was among the worst features of the panic of 1857. Several of the smaller creditors accepted an immediate compromise of 15*s.* in the pound, but the majority, representing about 2,000,000*l.*, remain to be satisfied. The former dividend was also 5*s.*, making, with the amount now proposed, a total of 10*s.*, and the realisation of the assets is said to be proceeding favourably, although it will be tedious. It is understood that payment will be made in the first week of July.

PORTSMOUTH.—An inquiry into the loss of the ship Eastern Monarch was concluded on Monday, when the Court came to the unanimous decision that the fire which caused the destruction of the ship was not caused by spontaneous combustion; that the steward had orders not to go into the store-room with a naked light, that he did so in defiance of orders; that he used candles lit from lucifer matches when there; that he was in the store-room on the day previous to the fire between 8 and 9 P.M. with a light; that the fire originated in the store-room or magazine; and that the fire was caused by the culpable and criminal neglect of the steward, Charles Gardner, while in the magazine the night prior to the fire; that the master and his officers did all that could be desired; that very few of the crew rendered much assistance; that the greater part of the crew behaved in a most disreputable and unseamanlike manner; and that Mr. Narracott's, the chief officer, giving the key of the magazine to the steward amounted to a dereliction of duty. On the finding of the Court being read, Charles Gardner, the steward, was taken into custody on application from Captain Morris on a charge of manslaughter.

SHEFFIELD.—A public meeting convened by the Mayor was held in this town last week, on the subject of the position to be taken by England in the present Italian war. A resolution in favour of neutrality was adopted, and an address to her Majesty founded thereon unanimously agreed to.

TIPTON.—A horrible murder has been recently committed in the neighbourhood of Prince's End, South Staffordshire. On Thursday night the body of a woman called Hughes, 22 years of age, the wife of a puddler at Wolverhampton, was found floating in the canal near the Moat Colliery, with marks of violence upon all parts of her person; both eyes being blackened, her nose broken and flattened, and a wound on the right side of the head about an inch in length, produced by a blow from a blunt instrument. She was also dreadfully bruised and battered about the chest and bosom, as if from kicks, and her dress was torn and disordered in such a manner as to leave no doubt that she had struggled hard in the hands of her murderers. Subsequent inquiries have shown that her death was planned and carried out by a man with whom she has been cohabiting. It appears that she left her husband four years ago, 10 days after marriage, and has since lived with this man. Within the last month she has become possessed of a considerable sum of money from a questionable source, and as she refused to allow the man to have the control of it, he determined to obtain it by other means. He therefore inveigled her, while the worse for liquor, to a pre-arranged spot, where he caused her to be so ill-treated by a number of men and lads as to cause insensibility. He had thus the chance afforded him of securing the money, and of inflicting the disfiguration which was revealed when the body was found in the canal. An inquest was opened on Saturday, and adjourned for a fortnight. In the meantime the magistrates have committed six forgemen for trial on the charge of rape. They had been taken into custody on suspicion of being concerned in the murder, but the evidence was not considered clear enough to establish the capital charge. The instigator of the crime has not since been seen or heard of, and his real name has not transpired. The excitement in the neighbourhood is so great that on Sunday several ministers of the district alluded to the case in their sermons.

WEST BROMWICH.—A crime only little less appalling than the one recently committed in this town has been perpetrated at a village about 2 or 3 miles distant on the Walsall Road. On Friday last a man named William Worsey, the keeper of a beerhouse, and his wife quarrelled, the husband sitting up at night to brew. On Saturday the quarrel was resumed, Partoun, a milkman, being at the time in the house. Partoun perceived the woman sitting in a nursing-chair, with a child three months old at her breast. His attention was attracted in another direction, and he had scarcely turned his head when the woman shrieked out, "He's cutting my neck!" At the same moment she leaped from her seat and ran from the house, with the child still at her breast and a large carving-knife imbedded in a frightful wound in her throat, from which blood was streaming upon the infant and her own clothes. On reaching the street she was seized with the pangs of death, and fell to the ground. She had been closely followed by her husband, who raised her from the ground and carried her back into the house. Here he laid her upon a settle, and with a towel attempted to staunch the wound. The knife had separated all the integuments of the neck, the jugular vein included, back to the spine. In a few minutes, and before surgical aid could reach her, she was a corpse. The prisoner was apprehended and taken before the magistrates, when, after a short examination, he was remanded. He is a man of a very violent temper, and has frequently displayed it in his conduct towards his wife, whom he has frequently turned into the streets at night, and not again admitted her till the morning. A coroner's inquest was held on the body on Monday, when a verdict of Manslaughter was returned—it appearing from the evidence that deceased had greatly exasperated the prisoner.

## Ireland.

MEETING OF ROMAN CATHOLIC CLERGY IN DUBLIN.—A special meeting of the dignitaries and canons of the "metropolitan chapter" was held on the 9th inst. in Dublin, Dr. Cullen presiding, to consider the question of the establishment by Government of intermediate schools. The unanimous resolution of the chapter was that no system could be safely sanctioned or tolerated which should be based on the principle of mixed education. Several means were proposed and discussed for giving effect to what appeared to be the fixed resolve of the Catholic hierarchy, clergy, and laity on this point, viz., that Catholics should receive a just proportion of whatever public money may be allotted for the promotion of intermediate education on the principles of the separate system, and on terms consistent with the discipline of the Catholic Church regarding education.

THE LATE MURDER AND SUICIDE IN GALWAY.—The remains of Captain Ffrench were buried last week in Ffrench Park near the grave of his grandfather, the late Lord Ffrench, who on the failure of the bank in Tuam committed suicide in Trinity College Dublin, in 1814. The estate of Castleffrench has now passed away from the family, and its present owner, Mr. James Thorngate, was averse to the burial taking place on the property, and accordingly closed the gates. An entrance, however, was effected through the wayside ditch, and the remains of the deceased were deposited in their last resting-place without further opposition. The remains of Mr. Burke, attended by a vast concourse of the gentry, farmers, and others of the district, were conveyed to Chapelfinerty. When the procession had halted at the entrance to the little graveyard, and

when the coffin was about to be taken in, a number of those who had relatives buried in it stated that the graveyard was a Roman Catholic one and objected to allow any Protestant clergyman to officiate. One individual said that if a Protestant minister began to read his service, all that had been buried in Chapelfinerty for the last two centuries would turn round on their faces! Persuasion was in vain, and rather than have recourse to unpleasant means, the friends of the deceased submitted. The coffin was laid on two chairs on the Queen's high road, and the clergyman having read the service there, the interment afterwards took place.

## Railways.

FALL OF A RAILWAY BRIDGE.—On Saturday as a number of trains containing iron ore were passing over the railway bridge connected with the Ebbw Vale Ironworks, the bridge suddenly gave way, and precipitated men, horses, and trains into the road below, a distance of about 30 feet. Two men were killed and one was seriously injured. The jury at the inquest returned a verdict of Accidental Death.

THE GREAT NORTHERN AND THE COAL TRADE.—The Great Northern Company have consented to abandon the monopoly they had hitherto enjoyed of the coal trade of the districts by which their line is fed. On Saturday last the directors held an extraordinary meeting at Doncaster, to which the Yorkshire coal owners were invited. Nearly every colliery in the district was represented. Mr. Denison, the chairman, stated that the directors having given their careful consideration to the subject, had come to the conclusion that both the railway company and the coal owners would be benefited by the company becoming merely carriers, charging upon all coal one and the same rate from Doncaster to London. He then read a paper, stating that the rate would be 6*s*. per ton, waggon hire included, from March 1 to August 31, in each year, and 7*s*. from the 1st September to the 28th February in the following year, the coalowner to pay the dues upon the South Yorkshire, the City of London dues, and the expenses attending screening, loading, and advertising in London. The change to commence from the 1st July next. As, however, the company had a large trade at King's Cross, which it was desirable to keep together, the present agent, Mr. Herbert Clarke, would still be retained as manager, receiving orders as usual, saving that each colliery in the Barnsley district would be separately quoted in the advertisements, and would also have its produce sold unmixed with any other coal; but this arrangement would not prevent the coalowner having an independent agent as well. In reply to several questions it was stated that the present arrangement was not intended to supplement the sliding scale complained of, but to supersede it; the company would be merely carriers. The manager would divide the traffic which was not directed to any special colliery, fairly and equally amongst all the collieries, and only in cases where the share of general trade added to the special orders exceeded the supply from the pit would they be transferred to another colliery. The arrangement met with the approval of the meeting, and was at once adopted; and a vote of thanks to the company for the liberal manner in which they had acceded to the wishes of the coal-owners was then unanimously passed

## Sporting.

### ASCOT RACES.

TUESDAY.—The *Trial Stakes*. Mr T. Parr's Sedbury beat Ardour, Fadladeen, Fright, and 10 others.—The *Ascot Derby Stakes*. Sir S Monck's Gamester beat Brother to Sydney and Phantom.—The *First Year of the Second Ascot Biennial Stakes*. Mr. J. Merry's Thormanby beat Rupee, Lupullus, King of Diamonds, and 7 others.—The *Gold Vase*, given by her Majesty. Mr. W. Day's Schism beat Leamington, Tournament, Miss Cath, and Black Tommy.—*Handicap Plate*. Mr. Locke's New Brighton beat Little Gerard, Delusion, Lord Wilton's colt, and 14 others.—The *Ascot Stakes*. Mr. C. Bernard's Rouble beat Prince of Denmark, Compromise, and 10 others.—*First Year of the Ninth Ascot Triennial Stakes*. Sir J. Hawley's f beat Lady Falconer, Baron Munchausen, Jason, Leprachaun, Allington, and The Monk.

WEDNESDAY.—The *Fern Hill Stakes*. Mr. Merry's Lady Falconer beat Actæon, Spicebox, and 3 others.—The *Coronation Stakes*. Lord Ailesbury's Cantine beat May Morning, Heroine of Lucknow, and 4 others.—The *Royal Hunt Cup*. A dead heat between Colonel Pearson's King-at-Arms and Schism, beating 33 others. The 35 competitors were drawn up in a line almost with the precision and order of a troop of cavalry. The only two animals that evinced impatience were Zuyder Zee and Lord Nelson, but when once under orders they did not fall out of the rank. Mr. Hibburd dropped his flag to a start which, for the compact line in which the horses quitted the post, has been rarely equalled and never surpassed. As the glistening colours rose above the hill those of Woodburn were seen prominent in the van, with Blackthorn, King-at-Arms, and Brother to Sydney slightly in advance of the ruck, which stretched almost in an equal line across the course. Over the road the scarlet of Zuyder Zee showed directly behind the orange jacket and blue belt of Woodburn. It was impossible to discern the changes which the shifting mass of colours presented, until the distance was nearly reached, when Zuyder Zee and then Blackthorn disappeared from the front, King-at-Arms, Schism, and Brother to Sydney being left in pursuit of Woodburn. Before reaching the grand stand enclosure Woodburn dropped back, and Schism took up the running, with King-at-Arms and Brother to Sydney in close attendance upon her. Midway between the enclosure and the winning chair Schism seemed to "die away," but she rallied again, and after a very fine race the judge pronounced a dead heat between her and King-at-Arms, the spectators mistaking the latter for Blackthorn, whose colours on the card were a "black jacket and a red cap."—those in which King at-Arms ran—but the cap of Blackthorn was changed to white, in order to make the distinction between the two horses. Three lengths from the first two, Brother to Sydney was third, and next, at the head of a body of beaten horses, were Woodburn (fourth), Wanderer, Turret, and Mutineer. The last lot comprised Kestrel, Lord Nelson, Glenmasson, Botany, Blackthorn, Zuyder Zee, Gracchus, and Harry Stanley. Adamas pulled up very lame, and has ended his racing career. Deciding heat.—6 to 5 was alternately betted on each, King-at-Arms having the call at the close. Schism made play at the distance, where she was beaten, and King-at-Arms won at his ease by two lengths.—*Plate*. Mr. T. Stevens's Ardour beat Herman, Romsey, and 13 others.—*Second Year of the Eighth Ascot Triennial Stakes*. Mrs. Osbaldestone's St. Clarence beat May Morning, Reynard, Hop Merchant, and 5 others.—*Sweeps*. Mr. Gulliver's Contract beat Vigo and Orleans.

THURSDAY.—The *Visitor's Plate*. Mr. J. Evans's Kinnersley beat Odd Trick, Commodore, and 8 others.—The *Royal Stand Plate*. Mr. Lowe's Wild Rose beat Fright, Tournament, Zuyder Zee, and Starke.—The *Gold Cup*. Mr. F. Higgins's Fisherman beat Saunterer, Beacon, and 4 others. The horses had proceeded to the starting post before the Royal party had reassembled in the saloon of the stand after luncheon. Mr. Hibberd, therefore, brought them back, in order that they might make the usual promenade round the enclosure of the Queen's stand. This preliminary business over they returned to the starting post with all convenient haste. They were soon sent on their journey, Nimrod running in the centre of the course, taking the lead, with Saunterer by himself on the outside second, and Bevis in the track of his stable companion third; North Lincoln and Defender being next, with Fisherman last. As they made for the Swinley turn Nimrod was nearly 20 lengths ahead, but on rounding it Saunterer, who had been pulling double, took his place at Nimrod's quarters, Bevis being third, upwards of six lengths behind the leading pair, North Lincoln, Beacon, and Defender following him in the order named, Fisherman still biding his time in the rear. In this order they disappeared behind the hill, but on coming into sight Nimrod and Saunterer were close together, and at a clear interval behind them were North Lincoln, Bevis, and Beacon side by side. At the Old Mile post Saunterer pulled to the front, and Beacon and North Lincoln went on second and third; Nimrod, giving up the chase and dropping, lay last. At the Brick Kiln turn Fisherman began to improve his position, and soon showed in the second place alongside of Saunterer, Defender being third, Beacon fourth, and North Lincoln fifth. On entering the straight the race was reduced to a match between Fisherman and Saunterer, every other animal being dead beaten. Fisherman quitted Saunterer before reaching the distance, and won by a length and a half. The others, headed by Defender, were pulled up some distance from home. Nimrod was lost in the crowd, and was never seen at all at the finish.—The *New Stakes*. Mr. Hamilton's Rupee beat Thormanby, Contadina, Aurora, and 16 others.—The *St. James's Palace Stakes*. Mr. J. H. C. Wyndham's Cynricus beat Mouravieff, Antonio, and 3 others.—*Plate*. Mr. Seymour's Infanta beat The Speaker, Little Poll, and 8 others.—*Plate*. Lord Palmerston's Romsey beat Ardour, Star of the East, and Tame Deer.—The *Queen's Plate*. Mr. F. Higgins's Fisherman beat Newcastle, Nimrod, and Southampton.—*Sweeps*. Duke of Bedford's Rechab beat Luscious.

FRIDAY.—(By Electric Telegraph).—*Stand Plate*. York beat Vigo, Yorkshire Miss, and 1 other.—*First-class Wokingham Stakes*. Penalty beat Soapy Sam, Bribery C, and 7 others.—*Sweeps*. of 20 sovs. Contadina walked over.—*South Western Plate*. Misty Morn beat Roman Candle, Commodore, and 10 others.—*Borough Members' Plate*. Turret beat Soothsayer, Greenwich Fair, and 5 others.—*Sweeps*. of 50 sovs. Reynard beat Commodore.

## Law.

COURT OF QUEEN'S BENCH.—[Sittings in Banco, before Lord Campbell, Mr. Justice Wightman, Mr. Justice Erle, and Mr. Justice Hill.]—*Regina* v. *Storrer—The London University*.—In November last the defendant, Dr. Storrer, was elected a member of the Medical Council (under the Act of last session) by the Senate of the University—that is, by the chancellor the vice-chancellor, and fellows. The question raised was, whether the election was not void on the ground that the election ought to have been made by the body ordained by charter to form the University, and which would comprehend the graduates. Lord Campbell delivered the judgment of the Court, to the effect that the election rested with the senate, and therefore that the election of Dr. Storrer was perfectly valid. *The Queen* v. *The Rev. Bryan King*.—In this case the Court had granted a rule calling upon the Rev. Bryan King, the rector of St. George's in the East, to show cause why a *mandamus* should not issue, commanding him to admit the Rev. Hugh Allen, who had been appointed lecturer of the said parish, to the use of the pulpit of the said church from time to time. It will be remembered that Mr. Allen has been recently appointed lecturer by the vestry, but the rector has altogether prohibited him from the use of the pulpit, and in consequence of this disturbances have taken place in the church, rendering it necessary to call in the police and shut up the church. On Thursday after hearing cause against the rule, Lord Campbell said the rule would be made absolute, but he hoped it would not be drawn up, and that there would be no further dispute. The intention of the Legislature was, that the lecturer should have a right to the use of the pulpit, subordinate to that of the rector; but he had a right to use it, without express permission, when the rector did not use it as rector of the parish. Rule absolute for a *mandamus*.

CENTRAL CRIMINAL COURT.—*The Poisoning Case at Richmond*.—*Dr Thomas Smethurst* was placed at the bar for the purpose of pleading to the indictment found by the grand jury, and the coroner's inquisition, both of which charged him with the wilful murder of Isabella Bankes. The prisoner pleaded Not Guilty to both charges in a firm voice. Serjeant Ballantine, on behalf of the prosecution, applied for a postponement of the trial on the ground that it was absolutely necessary for the ends of justice that further time should be granted to get up the case, and that they might be frustrated if the trial were to take place at this session. Serjeant Parry opposed the application, but Mr. Justice Crompton, after consulting with Baron Bramwell, said it was the opinion of the Court that the trial should be postponed to the first day of next session. *The Murder at Kingsland*.—*Samuel Adams*, 35, shoemaker, was indicted for the wilful murder of Martha Christmas Page, his sister-in-law, by stabbing her with a knife on the 5th ult. The particulars of this case were noticed at the time in our Metropolitan News. An attempt was made by the prisoner's counsel to reduce the crime to manslaughter, but the jury after a few minutes' deliberation returned a verdict of Guilty on the capital charge. Mr. Justice Crompton having put on the black cap passed sentence of *Death* in the usual form, stating that he entirely concurred in the verdict, and holding out no hope of mercy. *The Bermondsey Murder*.—*Jeremiah Coghlan*, 21, was charged with the wilful murder of James Fadden, his brother-in-law, at Bermondsey, by stabbing him in the neck with a knife in a drunken brawl. The deceased was seriously injured, and died in Guy's Hospital three weeks after the occurrence. The jury found the prisoner *Guilty* of Manslaughter. Baron Bramwell said that the prisoner had been guilty of a very enormous crime, and one as nearly approaching to murder as could be imagined, and sentenced him to be kept in penal servitude for 20 years.

## Obituary.

PRINCE METTERNICH, DUKE OF PORTELLA, died at Vienna on the 11th inst. He was born at Coblentz on the 15th May, 1773, and was consequently in his 87th year. His ancestors had been distinguished in the wars of the Austrian Empire against the Turks; his family had given more than one Elector to the Archbishoprics of Mayence and Treves; and his father, Count Metternich, had obtained some reputation as a diplomatist and as the associate of Kaunitz. At an early age he entered the diplomatic service, and after having filled various posts at the Hague, St. Petersburg, Dresden, and Berlin became Austrian Ambassador at the Court of Napoleon I. at the battle of Austerlitz. On the breaking out of the war in 1809 he returned to Vienna and became Minister of Foreign Affairs; and while holding that office struck out the idea of a marriage between Napoleon and an Austrian Archduchess as a means of purchasing a respite for the Empire. He conducted the negotiations with Champagny, and after Napoleon had been divorced from Josephine, he escorted Marie Louise to Paris. This humiliating sacrifice could not be a permanent settlement; and in 1813, after the great French catastrophe in Russia, war was again declared by Austria against France. In the autumn of that year the grand alliance was signed at Toeplitz, and on the field of Leipzig Metternich was raised to the dignity of a Prince of the Empire. In the subsequent conferences and treaties he took a very prominent part. He signed the Treaty of Paris on behalf of Austria. He afterwards paid a visit to this country, and received the honorary degree of D.C.L. from the University of Oxford. When the Congress of Vienna was opened, Prince Metternich, then in his zenith, was unanimously chosen to preside over its deliberations. In this presidency in the Congress may be regarded as typical an ascendancy which, from that time, he exerted for many years in the affairs of Europe. He became the presiding genius of the Holy Alliance, and the intimacy which he established between the three Northern Courts was confirmed and strengthened by the French revolution of 1830, which placed Louis Philippe on the throne. He took advantage of the revolution to send troops to Italy to crush every symptom of popular liberty, while throughout the lesser States of Europe he brought the whole weight of his power into play for the repression of popular aspirations and the destruction of national independence. Upon these principles he administered the affairs of the Empire till 1848, when the French revolution, which overturned half the thrones of Europe, caused the downfall of the Government of Vienna in spite of the resistance of Prince Metternich, who maintained his policy to the last. Having been compelled to resign the office of Chancellor, which he had held for about 40 years, he left the city the next day with an escort of cavalry. He came to England, and remained till the old state of things began to return. In 1851 he ventured to appear at Vienna, and though he never regained his power in the political world, his advice was often taken in affairs of State. Long renowned as the most celebrated statesman of Europe, he has died at the very moment when the Treaties of Vienna have been set aside by the sword of a Bonaparte, and the expulsion of Austria from Italy seems a mere question of time.

GENERAL GERARD GOSSELIN died on the 11th inst. at Moor Ospringe, Feversham, at the advanced age of 90 years. He was the brother of Admiral Le Marchant Gosselin, who died at an advanced age about two years ago. He was one of the senior Generals in the army, which he entered as far back as November, 1780. He commanded a brigade on the expedition against Genoa under Lord W Bentinck, and on its capture was appointed Commandant there until the peace with France. Subsequently he commanded a brigade in the American war, and was present at the attack and capture of Castine, on the Penobscot. He attained the rank of General in 1841.

MAJOR GENERAL DAVID MACADAM, R.M., died on the 1st inst at Edinburgh. He had been 54 years in the Royal Marines, and had greatly distinguished himself in his professional career. While serving in L'Aigle, between 1806 and 1809, he was at the attack on the French fleet by Admiral Cornwallis on the 21st August, 1805; gunboats in Vigo Bay 29th October following; the blockade of Fort Cygo, July and August, 1807; action with French frigate off L'Orient, 23 March, 1808; Basque Roads, 11th and 12th April, 1809, and various other affairs in the ship or her boats, and was 40 times under fire. During service in the Thames, between 1809 and 1812, he landed at Mount Circile, Amanthea, Citraco, in the Gulf of Policastro, and near to Cape Palinuro, and several other places on the coast of Calabria and in the Roman States. Aboard the Forth, from 1813 to 1815, he was most actively employed, and was on the staff of the Anglo-Russian force forming the siege of Batlits. He subsequently served on the North American coast. He had on repeated occasions been honourably noticed in the public despatches, and is stated to have been above 70 times under fire. He obtained his commission as Second Lieutenant in 1805, and attained the rank of Major-General in 1855.

THE BISHOP OF ANTIGUA (DR. RIGAUD) died on the 16th ult. of yellow fever, and had a public funeral on the 18th. He was the son of Professor Rigaud of Oxford, and was formerly assistant master of Westminster School, and head master of the Grammar School at Ipswich. Mrs. Rigaud and family, who also suffered from fever, have returned home by the Plata.

JUDGE M'CAN, one of the judges of the Court of Bankruptcy, was found dead in his bed on Wednesday morning at Bloome's Hotel, Kingstown. He presided on the previous day in his court, and then appeared in the enjoyment of good health. An inquest was held on the body, when the jury found that he died of disease of the heart. He was 80 years of age.

MR. DAVID COX, the greatest master of English water-colour landscape art, died a few days since at his residence, Harborne, near Birmingham. He has died as full of years as of artistic honours, and there is little likelihood that any living rival will supply the place he leaves void.

WILLS.—The will of Sir Isaac Lyon Goldsmid, Baronet, Goldsmid, has been sworn above "a million" personalty. The highest amount in the scale of probate duties. The personalty however is estimated to exceed two millions, and the real estates are stated to be of equal amount. The will of Mr. W. Broderip, F.R.S., has been sworn under 60000*l*. personalty. The late Mr. Fagan, M.P. for Cork, has left an estate of 2000*l*. a year and 51,000*l*. to his second son, his eldest son being attached to a convent on the Continent.

## Miscellaneous.

NEW ATLANTIC TELEGRAPH.—A new company has been formed under the name of the British Trans-atlantic Telegraph Company, for the purpose of laying a cable from the Land's End, in Cornwall, to Blanc Sablon, an island in the Straits of Belle Isle, at one of the entrances of the Gulf of St. Lawrence, and a little to the north of Newfoundland. A short wire, to be laid by a separate company, will take the cable in from Blanc Sablon to the Island of Anticosti, where it will meet lines already open, communicating with Quebec, Montreal, and indeed all parts of Canada. Another short line from Anticosti will be submerged to Cape Breton, where it will join the network of lines which communicate with Halifax, Nova Scotia, Boston, New York, &c. The advantages which such a route presents over one starting from the west coast of Ireland are said to be great, both in point of economy and freedom from the submarine dangers which beset the track from

Valentia to Newfoundland. In the first place, the average depth of the entire route is supposed to be less, while by starting from Land's End the steep range of submarine mountains on the west coast of Ireland, on which the Atlantic telegraph was lost, is entirely avoided. On the Atlantic side, the lines not being hampered with such conditions for messages as those which would check their transmission over Newfoundland, the tariff for their re-transmission will be less than one-half of what would be charged if sent by the American Company from St. John's, while the line, being all submerged, is, of course, less exposed to injury than in crossing the almost unexplored wilds of Newfoundland. On this side of the water the advantages of having the terminus at Land's End are almost greater. The increased distance is very little over 150 miles; but a message arriving at Land's End is transmitted direct to its destination at a small cost, while the cost from Valentia is much greater, and the message itself has to be re-transmitted always four times, and sometimes oftener. If it merely avoided the necessity of messages coming from America to London being first known at Liverpool, where by the Irish route they must be transmitted, the gain to merchants by a Land's End terminus would be most important. The new company propose to use a cable of the very lightest description, the outer covering of wire being entirely done away with. The conductor is to be composed of seven copper wires having about twice the sectional area of that used by the old Atlantic Company. It will be coated with a combination of gutta percha with manifold insulators, the outer portion being wound round with a textile fabric in a peculiar manner, so as to perfect and strengthen the rope and its insulation to the utmost. The outer covering of all will be of hemp, interwoven longitudinally, so as to be without either turn or stretch. This outer covering, before being used, will be passed through a solution of either india rubber or gutta percha; the rope afterwards being compressed under a steel die will insure a uniform gauge and the solution penetrating to the very utmost. The diameter of the gutta percha insulator will be about double that used in the rope of the old company, and the diameter of the whole cable about two-thirds of an inch. The weight is less than 8 cwt. per mile, the breaking strain about two tons, or equal to supporting nearly six miles of its own weight in air and no less than 25 miles of its own weight in sea water. The cost of the whole cable will be about half of that which was lately lost by the old company. This cable is to be contracted for under a special arrangement which guarantees the shareholders against any risk of loss. The contract will not be at so much per mile, but for a certain sum under 350,000*l.* the contractors undertake to make the wire, insure it, submerge it, and deliver it over to the company in working order.

THE RED SEA TELEGRAPH.—The Red Sea Telegraph Company have received a telegram from Aden, announcing that the cable had been successfully laid to that place on the 28th ult. The attempt however to lay the cable between Alexandria and the Island of Candia, which would have completed the connection from Aden to London *vid* Constantinople, has temporarily failed. The expedition started from Alexandria on the 25th ult., and the line appears to have parted on the 1st of June, when the whole had been laid within 60 miles. It is hoped that at that point its recovery will not be impracticable.

TELEGRAPH TO GIBRALTAR.—The existing war on the Continent has placed in so striking a light the importance of securing a means of telegraphic communication with the British possessions in the Mediterranean, independent of any continental medium, that Government have entered into arrangements for laying down, as speedily as possible, a telegraphic cable direct from Falmouth to Gibraltar—a distance of 1100 nautical miles. Although the line is at present to be carried only to Gibraltar, its ultimate extension to Malta and Alexandria, there to form a junction with the wires to India, is said to be decided on.

TELEGRAPH TO DENMARK.—The Submarine Telegraph Company are about to submerge a cable from Weybourne, on the Norfolk coast, to Tonning, on the shores of Denmark. The cable, which will comprise three wires, will be 388 miles in length.

---

BIRTHS.—On the 13th inst, Lady WENLOCK, of a daughter—11th inst, at 72, South Audley Street, Lady WORSLEY, of a son—12th inst, at 43, Upper Mount Street, Dublin, the wife of Sir BERNARD BURKE, of a son—9th inst, at Leamore Park, County Wicklow, the wife of THOMAS SMITH, Esq., of a son.

MARRIAGES.—On the 14th inst, at St. George's, Hanover Square, the Hon. THOMAS LITTLETON POWYS, eldest son of Lord Lilford, to EMMA ELIZABETH, youngest daughter of the late ROBT WM. BRANDLING, Esq., of Low Gosforth, in the county of Northumberland—14th inst, at the Church of the Bavarian Legation, Warwick Street, and afterwards at St. George's, Hanover Square, GEORGE ELLIOT RANKEN, Esq., to GEORGINA ELIZABETH, eldest daughter of the Rev. HENRY W. BUCKLEY, Rector of Hartshorne, Derbyshire; and at the same time and place, RICHARD ARCHIBALD FARQUHARSON, Esq., 24th Foot, to HENRIETTA JANET, second daughter of the Rev. HENRY W. BUCKLEY—9th inst, by special license, at 28, Merrion Square, Dublin, ROBERT HIGGINSON BORROWES, Esq., Gilltown, county Kildare, to the Hon. LOUISA CATHERINE BROWNE, third daughter of Lord Kilmaine—9th inst, at Blatherwycke, in the county of Northampton, the Rev. EDWARD SALMON BAGSHAW, to EMMA LOUISA, daughter of GERARD NOEL HOARE, Esq., of Mill Hill, in the county of Middlesex, and granddaughter of Stafford O'Brien, Esq., of Blatherwycke Park—2d inst, at St. Andrews, Sir ALEXANDER GRANT, Bart., to SUSAN, second daughter of JAMES FREDERICK FERRIER, Esq., Professor of Moral Philosophy and Political Economy in the University of St. Andrews—7th inst, at Monkstown Church, County Cork, CHARLES HENRY, youngest son of Sir JOHN KINGSTON JAMES, Bart., D.L., of Dublin, to KATE MARY, second daughter of the late Rev. JOHN ROWLEY, LL.D., and niece of the late Admiral Sir Josias Rowley, Bart., G.C.B.—9th inst, at St. Marylebone Church, ROBERT TAIT, Esq., of Queen Anne Street, to HARRIET, eldest daughter of H. H. WILSON, Esq., Boden, Professor of Sanscrit at Oxford.

DEATHS.—On the 7th ult, MONTOLIEU ELIHANU POCHIN, Lieutenant H.M.S. Heron, lost off the coast of Africa—9th ult, drowned, by the capsizing of H.M.'s sloop Heron, FREDK HORATIO BLAIR, son of Captain H. Blair, R.N., aged 21—9th ult, on board H.M.'s ship Heron, lost off the coast of Africa, CHARLES VILLIERS UDNY, midshipman, second son of the late Charles Grant Udny, of the Bengal Civil Service, aged 17—9th ult, lost in H.M.S. Heron, EDWARD CHARLTON ABBOTT, Master's-Assistant R.N., second son of Edwin Abbott, Esq., Head Master of the Philological School, aged 18—8th inst, at Rolleston Hall, in the county of Stafford, Lady MOSLEY, the beloved wife of Sir Oswald Mosley, Bart.—7th inst, at Eagle Hill, in the county of Galway, MARGARET, wife of Captain HENRY PIGOTT, and daughter of the late Sir Scrope Bernard Morland, Bart., of Nether Winchindon, Bucks, England—25th April, at Fyzabad, ROBERT JONES L PERCY, Paymaster of the 34th Regiment, second son of the Rev. Wm Alexander Percy, rector of Kilterbart, Carrick-on-Shannon, aged 33—21st April last, at Camp, Roy Bareilly, Oude, Lieut. KENRIC AP EYTON PARRY JONES, 38th Regiment, aged 20—12th inst, at Cheshunt Park, CHARLES WILLIAM CROMWELL RUSSELL, Esq., aged 45—13th inst, at his residence, 27, Montpelier Square, Brompton, the Rev. J. MORRISON, D.D., LL.D., aged 67—14th inst, at St. Andrews, Dr ANDREW ALEXANDER, Professor of Greek in the University of St. Andrews—10th inst, at 11, Park Place, Cheltenham, SYDNEY JANE, widow of the late Colonel RICHARD BELLEW, of the Bombay Establishment, and daughter of the late General Robert Bell, of the Madras Artillery—12th inst, at Tunbridge Wells, JACOB BELL, Esq., of 15, Langham Place, and 338, Oxford Street, aged 49—5th inst, at Old Brompton, CHARLES OLLIER, author of "Ferrers," &c., and the original publisher of the chief works of Shelley, and of the first poems of Keats, aged 71.

# Markets.

## COVENT GARDEN.—June 18

Grapes still realise fair prices. Strawberries are now plentiful and cheap. Pine Apples maintain former prices. English Cherries may now be obtained. Oranges fetch 3s. 6d and 10s. per 100. Nuts of all kinds continue to realise fair prices. Cabbages and French Beans are plentiful. Rhubarb, Asparagus, and Seakale are getting over. Green Peas, Beans, Horn Carrots, and Globe Artichokes may now be obtained in quantity. Cauliflowers are cheaper. New Potatoes realise from 12s. to 20s. per cwt. Cucumbers abundant. Cut flowers chiefly consist of Orchids, Gardenias, Heliotropes, Lily of the Valley, Violets, Mignonette, Heaths, and Roses.

FRUIT

| | |
|---|---|
| Pine Apples, per lb., 5s to 8s | Cherries, per lb., 6d to 2s 6d |
| Grapes, per lb., 4s to 8s | Apples, per doz., 6s to 12s |
| Strawberries, p. lb., 6d to 2s 6d | Pears, per doz., 6s to 12s |
| Melons, each, 4s to 6s | — stewing, p. doz., 2s 6d to 5s |
| Peaches and Nectarines, per doz., 10s to 15s | Oranges, per 100, 6s to 10s |
| Figs, per doz., 6s to 8s | Lemons, per doz., 1s to 1s 6d |
| | Cobs, per lb., 1s 3d to 1s 6d |

## HOPS.—BOROUGH MARKET, FRIDAY, June 17.

Messrs. Pattenden & Smith report the accounts favourable from Mid and East Kent, but much worse from the blighted parts of Weald Kent, Sussex, and Worcester. The market is in a quiet state, and to effect sales lower prices must be submitted to.

## BRITISH WOOLS.—LONDON, FRIDAY, June 17.

We have no new wool worth mentioning arrived at present, as farmers are busy shearing; prices consequently are not yet fixed.

## METROPOLITAN CATTLE MARKET.

MONDAY, June 13.

The number of Beasts is rather larger and trade is slow, but prices are not much lower for choice qualities. The supply of Sheep and Lambs is considerably greater. On the average prices are rather on the decline. Calves are selling about the same as on Thursday. From Germany and Holland there are 180 Beasts, 2470 Sheep, and 155 Calves; from Scotland, 200 Beasts; from Norfolk and Suffolk, 2800; from Ireland, 100; and 100 from the northern and midland counties.

| | s. | d. | s. | d. |
|---|---|---|---|---|

Beasts, 3780; Sheep & Lambs, 24,450; Calves, 240; Pigs, 870

THURSDAY, June 16

We are but moderately supplied with Beasts; trade for them is slow; Monday's quotations are, however, fully maintained. Sheep and Lambs are more plentiful than for some time past. There is considerable difficulty in obtaining late rates. A clearance cannot be effected. Good Calves are in demand at rather higher prices. From Germany and Holland there are 50 Beasts, 590 Sheep, and 210 Calves; from Norfolk and Suffolk, 500 Beasts; and 140 Milch Cows from the home counties.

---

MARK LANE.—MONDAY, June 13

The supply of English Wheat to this morning's market was good, and although offered at a decline of 2s. to 3s. per qr. upon the prices of this day se'nnight, a large proportion remained unsold towards the close. Foreign being only saleable by forcing at a considerable reduction, holders prefer to land, and nearly the whole of the arrivals are going to granary; we reduce our quotations 2s. per qr. Barley is a slow sale, and out-of-conditioned parcels are rather cheaper. Beans and Peas bring last week's prices. The Oat trade is very dull, and sales could only be effected at a reduction of 1s. per qr. upon the rates of Monday last. The top price of town-made Flour remains the same, other descriptions are a very heavy sale, and prices quite nominal.

FRIDAY, June 17.

The weather this week has been dry and cool for the time of year. The arrivals of foreign Wheat and Flour at the chief ports of the kingdom have been considerable, principally from France, and being greatly in excess of the present demand a further decline varying from 2s. to 3s. per qr. on the former and 2s. to 3s. per sack on the latter has resulted, at which the amount of business transacted was almost nominal. The value of all kinds of spring corn also had a downward tendency, and in many markets purchases of each description might have been made at a reduction of 1s. per qr. upon the rates of last week. The crop of Wheat on the Continent is represented as greatly resembling our own, being in appearance about two fortnights' last spring corn and Grass in the Baltic is reported to be suffering for the want of rain. The crop of Wheat has slightly revived in the Baltic, but prices there are far too high to admit of profitable importation at present. The arrivals of grain-laden vessels from Southern Europe during the week are moderate. The arrivals of Foreign Wheat, Flour, and Barley this week continue to be good, of all other grain moderate. The market this morning was badly attended, and factors not being able to dispose of the Essex Wheat left over from Monday unless at a further reduction of 1s. per qr. preferred holding it for next week. Owners of foreign being indisposed to follow the English market, scarcely any sales were effected, and Monday's quotations must be considered nominal. Barley is a slow sale at about late rates. Beans and Peas are unaltered in value. The Oat trade is exceedingly heavy, and Monday's prices are hardly supported.

ARRIVALS FROM JUNE 13 TO JUNE 17.

| | Wheat. | Barley. | Oats. | Flour |
|---|---|---|---|---|
| English | 1890 qrs. | — qrs. | 1140 qrs. | 980 sks. |
| Irish | — ,, | — ,, | 2690 ,, | — ,, |
| Foreign | 13410 ,, | 5580 ,, | 11720 ,, | 7510 ,, / — brls. |

LIVERPOOL, Tuesday, June 14.—We had a fair attendance of millers and dealers at our market this morning, but they seemed to have no intention whatever of buying, and the market consequently partook quite of a nominal character. The decline since this day se'nnight may be quoted at from 4d. to 6d per cental on Wheat and 6d on Flour and Indian Corn. Oats, Oatmeal, and Barley, have each given way about 3d. per cental. Egyptian Beans are held for former prices.

FRIDAY, June 17.—The Corn market has been steady to-day, with a quiet demand for Wheat and Flour at a moderate reduction from last week.

POTATOES.—SOUTHWARK, Monday, June 13.

Since our last report the arrivals have been far in excess of the demand, and together with the hot weather has caused a great reaction in the trade; second rate sorts are unsaleable except for cattle feed. The following are this day's quotations:—Yorkshire Regents, per ton, 60s. to 90s.; do Flukes, 100s.

to 140s.; Perth, Forfar, and Fifeshire Regents, 40s. to 70s.; do. Reds, 25s. to 30s.; Rocks, 30s. to 40s.; foreign whites, 25s. to 60s.

MONEY (£50).—A Gentleman is in want of this amount for One Month. He will deposit security valued at at least 100*l.* and will give 10*l.* for the accommodation.—Address J. R., Reading Rooms, 76, Strand.

THE BURIAL BOARD of the Parish of St. Helen's, in the county of Lancaster, will, at their Meeting on the 25th day of July next, appoint a SUPERINTENDENT and REGISTRAR of the Cemetery of such parish. He will be required to reside at the Cemetery and devote his whole time and attention to the duties of his office, and must possess a good knowledge of Book-keeping and sufficient of Surveying to enable him to lay out the ground in grave spaces. One who has some knowledge of the Management of Trees and of the care of Grounds would have a preference. The salary is 70*l.* per annum, with the use of a house, rent and tax free. Candidates are requested to send applications in their own handwriting, stating former or present occupation, and accompanied by testimonials as to character and competency on or before the 30th inst., to THOS. HADDOCK, Clerk to the Board.
Hardshaw Street, St. Helen's, Lancashire, June 18.

WANTED, in an extensive Provincial Nursery, a middle-aged married Man, to act as FOREMAN, SALESMAN, and PROPAGATOR. Not only is it indispensable that he should understand the Propagation and Cultivation of Roses, Fruit trees, American plants, and Coniferæ, but the general routine of nursery work, including Stove and Greenhouse Plants. To a person possessed of the above qualifications, combined with energetic and sober habits, a liberal salary, including use of a comfortable cottage, will be given.—Address, with references as to character and wages required, to THOS. CRIPPS, Nurseryman, Tunbridge Wells, Kent.

WANTED, a competent Person to act as FOREMAN in an extensive Nursery in the south of Ireland. Satisfactory testimonials as to character and capability will be required.—Communications to be addressed to A. B., *Constitution* Office, Cork, Ireland.

WANTED, a respectable, steady MAN, who thoroughly understands the propagating of Fruit Trees, Roses, Coniferæ, and Knife-work generally. Liberal wages will be given.—Address, A. B., Messrs. Noble & Co., Seed Merchants, Fleet Street, London.

WANTED, AS COWMAN.—Married, without incumbrance preferred. He must have been accustomed to Milking, to Drive a Cart, and attend to Poultry.—Address, stating wages expected.—Mr. ROGER, Berry Hill, Taplow, Maidenhead.

WANTED IMMEDIATELY, in Canterbury, a MAN and his WIFE, without incumbrance; the Man as Gardener, and the Wife to take charge of a Small Dairy.—Apply to Mr. WIGHTWICK, Canterbury.

WANTED, in a large family in Devonshire, a thoroughly experienced DAIRYMAID to manage a new Cream Dairy.—Apply (if by letter post paid) to Miss TUCKER, 35, High Street, Exeter.

## WANT PLACES.—Letters to be Post Paid.

GARDENER (HEAD).—Can take the Management of a small Farm if required. Good character.—T. H. MORRESS, Landscape Gardener, Bromley, Kent.

GARDENER (HEAD).—Age 37, married, no incumbrance; thoroughly understands Gardening in all departments. All applications to be made to Mr. WATSON, Ripley Castle, Yorkshire.

GARDENER (HEAD).—Age 27; has a good practical knowledge of his profession. Can be well recommended for ability and general good conduct.—E. BATLEY, Wentworth Castle Gardens, Barnsley, Yorkshire.

GARDENER (HEAD).—Age 30, single; understands the Management of Grapes, Peaches, all kinds of Fruits and Kitchen and Flower Gardens. Two years and nine months' character.—A. Z., Arfsten Cottage, Barnes, Surrey.

GARDENER (HEAD).—A gentleman wishes to recommend a respectable, middle-aged, married Man, without incumbrance; understands his profession in all its branches. Fourteen years' good character.—A. B. C., Mr. Dove's, 5, Fitzroy Place, Kentish Town, N. W.

GARDENER (HEAD).—Age 29, single; experienced in extensive gardens in the management of the Kitchen, Fruit and Flower Gardens, Vinery, Conservatory, and Forcing department. Unexceptionable references.—W. H., Royal Botanic Gardens, Regent's Park, London, N.W.

GARDENER (HEAD).—Age 26, single; has a thorough knowledge of Early and Late Forcing of Vines, Cucumber and Melon growing, the management of Kitchen and Flower Gardens, and Stove and Greenhouse Plants. Upwards of three years' good character from last employer.—J. Y., Mr. Davey's, Kingston Vale, near Putney, Surrey.

GARDENER (HEAD).—Age 31, married; has had 16 years' practice in several noblemen's Gardens in Scotland and England, and considerable practice in Early and Late Forcing; is a good Plantsman and can draw Plans and lay out Geometrical Flower Gardens, &c. Three years' excellent character from the gentleman now with. References if required.—A. B., Post Office, Cockfoster's, Barnet, N.

GARDENER (HEAD).—Age 43, married; practical knowledge of Gardening in all branches; can be highly recommended for sobriety, industry, and honesty, by the gentleman with whom he has lived upwards of 17 years, who parts with him only in consequence of change of residence. Northern or midland counties would be preferred.—J. I., Bolton-by-Bolland, Clitheroe.

GARDENER (HEAD).—Age 33, married, no incumbrance; steady, active, and thoroughly understands his profession in all its various branches, including the Forcing of Flowers, Pines, Vines, Peaches, &c. Has been a successful Exhibitor at the Horticultural Society and Regent's Park. Wages, 80*l.* per annum, with House, &c.—A. Z., John Brown, Fawsley Park, Daventry.

GARDENER (HEAD OR SINGLE-HANDED).—Where there is a little Forcing preferred. Three years' unexceptionable character.—G. C., Messrs. Cutbush & Son, Highgate.

GARDENER (HEAD), or GARDENER AND BAILIFF.—Age 40, married; 25 years' practical experience. Good character from the gentleman he is leaving.—A. B., Hanover Park Lodge, Peckham.

GARDENER (HEAD), OR GARDENER AND BAILIFF.—Age 29, married; well understands Early and late Forcing of Fruit, Flowers, and Vegetables, Hardy Fruit, Kitchen and Flower Gardens; can superintend the erection of Glass Structures, Heating, &c.; good practical knowledge of Farming, Wife well understands Dairy, &c.—A. B., Post Office, Crouch End, London, N.

GARDENER.—Age 35, single; 20 years' experience in the Culture of Pines, Vines, and Plants. Testimonials good.—S. H., Mr. Kernan, Seedsman, Covent Garden.

GARDENER.—Age 28; thoroughly understands Forcing, also Kitchen and Flower Gardens. No objection to a single-handed place.—Mr. BEE, 2, New Roman Road, Bow.

GARDENER.—Middle-aged, married, without incumbrance; thoroughly understands his profession. Three years' good character.—M. P., Barker's Library, Hammersmith, W.

GARDENER.—A gentleman (going abroad) wishes to obtain a situation for a steady, very industrious, and obliging Man; well understands the Management of Cattle. Wife is also industrious and trustworthy, and an excellent Dairywoman.—J. D., Mr. Golding's, News Agent, Dartford, Kent.

GARDENER.—Middle-age; thoroughly understands his profession in all its branches, Orchids and Ferns, and all kinds of Flowers and Fruit, also Early and Late Forcing. Good character. No single-handed place accepted.—L. L., 18, Haverstock Street, Hampstead Road.

GARDENER.—Age 35, married; has had many years' experience in one of the best London Market Gardens, where Pines, Grapes, and Plants were grown to the highest perfection, and can produce 5 years' character from a nobleman with whom Gardening was carried out to the greatest excellence. Well understands Land and Cattle.—M. M., 3, Andover Cottages, Hornsey Road, Holloway.

GARDENER.—A gentleman is desirous of recommending his Head Gardener, who has been with him between two and three years, and who can also have good testimonials from Edward Jesse, Esq., of East Sheen; P. Marnock, Esq., Botanic Gardens, Regent's Park, London; Mr. Veitch, Exotic Nursery, Chelsea; Mr. Waterer, American Nursery, Bagshot; John Noble, Esq., 50, Westbourne Terrace, London; either of whom will answer any inquiries addressed to them.

GARDENER (UNDER), or IMPROVER, for two years.—Age 21; good character. With a Premium.—A. B., Stransone's Library, Colnbrook, Bucks.

GARDENER, OR BAILIFF AND GARDENER, or place of trust.—Married, without incumbrance; Wife understands Poultry.—Unexceptionable reference to JNO. DEVERELL, Esq., Purbrook Park, Portsmouth.

FOREMAN AND PROPAGATOR.—Practical ability in all branches of the Nursery business; good Salesman and Grafter; has Travelled.—G. C., *Gardeners' Chronicle* Office.

PROPAGATOR AND GROWER, OR FOREMAN, &c.—Well experienced in the profession.—T. G., care of Mr. C. Riddick, Hot-house Builder, Effra Road, Brixton.

LAND STEWARD OR GENERAL MANAGER.—Thoroughly business Young Man, accustomed for many years to the Management and Improvement of Estates, the Erection of Horticultural, Agricultural, and other Buildings, Farming Light and Heavy Soils, Letting and Receiving Rents. Good security and first-class references given.—A. L., 11, Basinghall Street, London.

SALESMAN.—A young Man in any Town or Country Market; has been 12 years in Covent Garden Market, and thoroughly understands his profession.—J. C. T. B., 8, York Buildings, Adelphi.

SHOPMAN.—Age 21; seven years' experience in one of the first Provincial firms.—J. L., 15, Tavistock Street, Plymouth.

R. WOODS, 94, Goswell Road, near the "Angel," Islington, London, E.C. Priced Lists can be had on application.
Please notice the Address—94, Goswell Road.

GUTTA PERCHA TUBING FOR WATERING GARDENS.
THE GUTTA PERCHA COMPANY have the pleasure to acknowledge the receipt of the following *Testimonial from* Mr. J. FARRAH, *Gr. to* BOSWELL MIDDLETON JALLAND, Esq., *of Holderness House, near Hull.*
"I have had 400 feet of your Gutta Percha Tubing, in lengths of 100 feet each, with union joint, in use for the last 12 months for watering these gardens, and I find it to answer better than anything I have ever yet tried. The pressure of the water is very considerable, but this has not the slightest effect on the tubing. I consider this tubing to be a most valuable invention for Gardeners, inasmuch as it enables us to water our gardens in about one-half the time, and with one-half the labour required."
Manufactured by the Gutta Percha Company, Patentees, 18, Wharf Road, City Road, London, and sold by their Wholesale Dealers in town and country.

SHAW'S TIFFANY is universally acknowledged to be the best, neatest, and cheapest material for shading conservatories, and other Hothouses. Effectually securing Plants from the scorching rays of the sun, without obscuring the light. Also, for protecting the Bloom of Wall Trees from spring frosts, and Fruit from birds and wasps. Sold in pieces.
No. 1.—20 yards long, by 38 inches wide, 5s. per piece.
No. 3.—Double strength, 18 yards long, by 39 inches wide, 7s. 6*d.* per piece.
No. 4.—Treble strength, 18 yards long, by 39 inches wide, 9s. per piece.
A liberal allowance to the Trade when ten or more Pieces are taken.—JOHN SHAW & Co., Princess Street, Manchester.

HORTICULTURAL BUILDINGS AND HEATING BY HOT WATER.
JOHN R. PEILL, 17, New Park Street, Southwark, Manufacturer of every description of Buildings for Horticultural purposes, and Inventor of the Improved Conical Boiler for heating the same, is prepared to undertake works of any magnitude, and refers among others to the celebrated range of FORCING HOUSES at HER MAJESTY'S GARDENS, FROGMORE, and at SIR ROBERT PEEL'S, DRAYTON MANOR, constructed under the superintendence of his Manager, MR. JOHN JONES; and also to his BOILERS fixed at the CRYSTAL PALACE, the ROYAL BOTANIC GARDENS, REGENTS PARK, and KEW, and at several hundreds of the Nobility's seats, Public Establishments, and Manufactories in London and the provinces. J. R. P. also manufactures every description of Iron Roofs, Iron Houses, and Iron Fencing, plain and ornamental. Strong Iron Hurdles for Sheep (6 feet long, 3 feet high, with 5 bars), 4s. 3*d.* each; ditto for cattle, 4s. 9*d.* each.
Prices and other particulars forwarded on receipt of one postage stamp.

VASES, PEDESTALS, SUNDIALS, FOUNTAINS, FLOWER BOXES, JARDINETS, FERN CASES, BALUSTRADES, EDGINGS AND CURBS FOR FLOWER BORDERS, SEATS, &c., in Imperishable Siliceous Stone, at reduced prices, for the adornment of the Villa Garden, the Mansion Grounds, or the private or public Park.
For Priced Illustrations apply to FREDERICK RANSOME, at the Show Rooms, Cannon Row, Westminster, S.W., or Patent Stone Works, Ipswich.

KEATING'S PERSIAN INSECT DESTROYING POWDER.
POULTRY, DOGS, AND PLANTS are effectually freed from Fleas, and all other Vermin with which they are infested by the above Powder, which is quite harmless to animal life. The Farmer, the Gardener, or the Sportsman, will therefore find it invaluable. Bugs, Cockroaches, Beetles, Moths in Furs, and every other species of Insect are also instantly destroyed. In packets post free, for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice each genuine packet bears the above name and address. See "THE FIELD," Oct. 2d and 9th, pp. 263, 283, and 294.

VINEGAR.—Patronised by her Majesty's Government.
CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.—Families, by using this delicious Vinegar, insure purity, and effect a saving of 50 per cent. See Report of Dr. Letheby, City Officer of Health; Dr. Hassall of the *Lancet* Commission, and others. Six Quart Sample sent free to any Railway for 3s. 6*d.*—Sold by the Trade, in bottles, labelled and capsuled; wholesale, 63, King William Street, London Bridge, E.C.

WHITE AND SOUND TEETH are indispensable to personal attraction and to health and longevity by the proper mastication of food. ROWLANDS' ODONTO, or Pearl Dentifrice, compounded of oriental ingredients, is of inestimable value in improving and beautifying the teeth, strengthening the gums, and in rendering the breath sweet and pure. It eradicates tartar from the teeth, removes spots of incipient decay, and polishes and preserves the enamel, to which it imparts a pearl like whiteness. As the most efficient and fragant aromatic purifier of the breath, teeth, and gums ever known, ROWLANDS' Odonto has for a long series of years occupied a distinguished place at the toilets of the sovereigns and the nobility through Europe: while the general demand for it at once announces the favour in which it is universally held.—Price 2s. 9*d.* per box. CAUTION.—The words "ROWLANDS' Odonto" are on the Label, and "A ROWLAND & SONS, 20, Hatton Garden," engraved on the Government stamp affixed on each box.—Sold by the Proprietors, and by Chemists and Perfumers.

HOLLOWAY'S OINTMENT AND PILLS.—SORE THROAT, QUINSY, ULCERATED THROAT, AND DIPHTHERITE.—The sore throat with more or less hoarseness prevailing at this season of the year, has for 20 years been treated with the above remedies with a degree of success far surpassing that of any other mode of treatment. The cures have been so remarkable, speedy, and numerous, that it will be predicted the new disease, diphtherite, consisting of small ash coloured ulcers in the interior of the throat, attended by fever, often fatal, might be arrested by the same means, and such has been the case. This disease in its first stage seems even more amenable to HOLLOWAY'S Ointment and Pills than the simpler forms of inflammatory sore throat.

# The Gardeners' Chronicle Newspaper.

*SATURDAY, JUNE 25, 1859.*

VASES, PEDESTALS, SUNDIALS, FOUNTAINS, FLOWER BOXES, JARDINETS, FERN CASES, BALUSTRADES, EDGINGS AND CURBS FOR FLOWER BORDERS, SEATS, &c., in Imperishable Siliceous Stone, at reduced prices, for the adornment of the Villa Garden, the Mansion or Grounds, or the private or public Park.

For Priced Illustrations apply to FREDERICK RANSOME, at the Show Rooms, Cannon Row, Westminster, S.W., or Patent Stone Works, Ipswich.

BEDSTEADS, BATHS, AND LAMPS.—WILLIAM S. BURTON has SIX LARGE SHOW ROOMS devoted exclusively to the SEPARATE DISPLAY of Lamps, Baths, and Metallic Bedsteads. The stock of each is at once the largest, newest, and most varied ever submitted to the public, and marked at prices proportionate with those that have tended to make his establishment the most distinguished in this country.

SAMUEL ROGERS'S RECOLLECTIONS of Personal and Conversational Intercourse with

| | |
|---|---|
| CHARLES JAMES FOX, | PRINCE TALLEYRAND, |
| EDMUND BURKE, | LORD ERSKINE, |
| HENRY GRATTAN, | SIR WALTER SCOTT, |
| RICHARD PORSON, | LORD GRENVILLE, and |
| JOHN HORNE TOOKE, | THE DUKE OF WELLINGTON. |

Edited by Mr. Rogers's Nephew, WILLIAM SHARPE; with a Preface by SAMUEL ROGERS.

"Samuel Rogers has provided for us in these notes a very singular pleasure. The great people of the past come before us in the flesh,—made visible by a touch, a spell. He recalls us to the mood by a magic like that of the eye and voice of an actor: narrator—for his record is of conversations, and has all the scatter and fire, and informal, vivid portraiture of real talk, where a trait, an anecdote, an interruption of voice yields a character more distinct and impressive than a more elaborate historical presentation—just as a ray of sun often catches the truth of a face with a brilliancy beyond the studied skill of the Royal Academician."—*Athenæum.*

London: LONGMAN, BROWN, & Co., Paternoster Row.

Just published, in square crown 8vo, with numerous Maps and Illustrations, price 21*s.* cloth,

PEAKS, PASSES, AND GLACIERS:

| R. W. E. FORSTER. | A. WILLS, of the Middle Temple, Barrister-at-Law, and |
| Rev. J. F. HARDY, B.D. | J. TYNDALL, F.R.S. |

Members of the Alpine Club.

Edited by JOHN BALL, M.R.I.A., F.L.S., President of the Alpine Club.

"The volume edited by Mr. Ball appears to us to be one of the most entertaining, and in many respects one of the most curious, which have fallen under our observation for a long time."—*Saturday Review.*

London: LONGMAN, BROWN, & Co., Paternoster Row.

Now ready, in post 8vo, with a Map of the District, 4 Illustrations in Chromo-lithography from Original Sketches by Mr. G. Barnard, and 8 Engravings on Wood, price 14*s.* cloth,

A LADY'S TOUR ROUND MONTE ROSA; With Visits to the Italian Valleys of Anzasca, Mastalone, Camasco, Sesia, Lys, Challant, Aosta, and Cogne. In a Series of Excursions in the Years 1850, 1856, 1858.

"She has a true eye for the natural beauties of the scenery through which she passes and as we all like to be as comfortable as we can when travelling, her story will not only be found interesting, but full of useful practical knowledge to those who would explore the same ground."—*John Bull.*

"Her narrative entitles her to be received as an associate of the Alpine Club; and, if the coming July and August shall give birth to events which will restrict the motions of Swiss and Italian travellers, those who are obliged to shrink to the tame life of English watering places, or to put up with Ben Nevis, or Snowdon, or Croagh Patrick, instead of the Ortler Spitz, or the Finster Aar horn, may do worse than think over the pleasures and perils of glaciers by the aid of her pleasant descriptions."—*Athenæum.*

London: LONGMAN, BROWN, & Co., Paternoster Row.

MR. WELD'S TRAVELS THROUGH THE PYRENEES.
Just published, in post 8vo, with 8 Illustrations in Chromo-xylography, price 12*s.* 6*d.* cloth,

THE PYRENEES FROM WEST TO EAST. By C. R. WELD, Barrister-at-Law; Author of a "Vacation Tour in the United States and Canada, and Vacations in Ireland."

"Mr. WELD has drawn up a lively narrative of his excursions, and described with graphic pen and pencil the towering summits, the dangerous glaciers, the jagged pointed crags and deep ravines which he visited. . . . His volume, which furnishes more interesting information respecting the Pyrenees than any other book of travels which can be named, is written in an easy agreeable style, and sketches with great animation as well the habits of the mountaineers as the wild features of the scenery amidst which they dwell."—*Morning Post.*

London: LONGMAN, BROWN, & Co., Paternoster Row.

MR. SENIOR'S JOURNAL IN GREECE AND TURKEY.
Just published, in post 8vo, with Maps of the Bosphorus and Troad, and Views in Chromo-lithography of Therapia and Stamboul, price 12*s.* cloth,

JOURNAL KEPT IN TURKEY AND GREECE in the Autumn of 1857 and the beginning of 1858. By NASSAU W. SENIOR, Esq.

"The following pages contain extracts from a Journal which I kept in Therapia, the Troad, Smyrna, and Athens, in the autumn and winter of 1857—18[illegible]. It was written with no view to publication; but, as it throws light on questions of political importance, I think that I ought not, under present circumstances, to withhold it. The state of affairs in the East is strange, and is imperfectly understood in England. We have had to take part in them, we may have to do so again, and every one must be anxious that our conduct should be governed by as much knowledge as can be obtained."—*Extract from the Author's Preface.*

London: LONGMAN, BROWN, & Co., Paternoster Row.

CHARLES KNIGHT'S POPULAR HISTORY OF ENGLAND.
On June 30 will be published, price 7*s.*, Part 41, commencing Vol. VI. of

THE POPULAR HISTORY OF ENGLAND.
By CHARLES KNIGHT.

THE FIVE VOLUMES of this History, which are now complete,—having also been issued in *Five Shilling Parts*—bring down the annals of our country from the invasion of Cæsar to the Death of Queen Anne. It was the object of the author to close a volume at the period of the Accession of the Constitutional Dynasty under which these realms have now flourished for nearly a century and a half. The remainder of his undertaking will form the HISTORY OF ENGLAND UNDER THE HOUSE OF BRUNSWICK.

It is the author's intention to comprise this eventful era in Three Volumes, which will complete the entire work. The First portion of this important work, from the earliest Times to the Revolution of 1688, is complete in Four Volumes, with a copious Index, price 36*s.*

London: BRADBURY & EVANS, 11, Bouverie Street.

HOULSTON & WRIGHT, 65, Paternoster Row.

## News of the Week.

A PRIVY COUNCIL was held at Windsor Castle on Saturday, at which the new Ministers took the oaths, and received from HER MAJESTY their seals of office. In the House of Commons on Wed-

nesday the writs for the seats vacated by the new Administration on their acceptance of office were ordered to be issued; and as no responsible Minister can be in his place for some days to come, both Houses have formally adjourned to Thursday next. The Ministerial appointments announced during the week include Mr. FITZROY as First Commissioner of Works; Mr. CARDWELL Secretary for Ireland; the Earl of CARLISLE, Lord-Lieutenant of Ireland; Mr. WILSON as Vice-President of the Board of Trade with the rank of a Privy Councillor; Mr. BRAND and Mr. LAING, Secretaries to the Treasury; the Earl of RIPON, Under-Secretary for War; Mr. THOMAS BARING, Under-Secretary for India; Mr. G. CLIVE, Under-Secretary for the Home Department; Mr. GILPIN, Secretary to the Poor Law Board; Sir R. BETHELL, Attorney-General; Sir H. KEATING, Solicitor-General; Mr. HEADLAM, Judge-Advocate General; Mr. MONCREIFF, Lord-Advocate for Scotland; Mr. J. D. FITZGERALD, Attorney-General for Ireland; Mr. Serjeant DEASY, Solicitor-General for Ireland; Sir W. DUNBAR, Mr. BAGWELL, Mr. WHITBREAD, and Mr. HUGESSEN, Lords of the Treasury; Mr. WHITBREAD, Civil Lord of the Admiralty; the Earl of ST. GERMANS, Lord Steward; Viscount SYDNEY, Lord Chamberlain; the Marquis of AYLESBURY, Master of the Horse; the Earl of BESSBOROUGH, Master of the Buckhounds; Viscount CASTLEROSSE, Vice-Chamberlain; Lord BURY, Comptroller of the Household; and the Duchess of SUTHERLAND, Mistress of the Robes. Sir BENJAMIN HALL and Mr. VERNON SMITH are to be raised to the peerage, the former by the title of Lord Llanover, and the latter by that of Lord Lyveden. Mr. Justice ERLE has been appointed Chief Justice of the Common Pleas, in the room of Sir ALEXANDER COCKBURN, who has succeeded Lord CAMPBELL as Lord Chief Justice of England, and Mr. WILDE is expected to succeed Mr. Justice ERLE as one of the Puisne Judges of the Queen's Bench.

From the seat of war we learn that the French are now quite close to the Mincio and the Lago di Garda, and that a great battle is close at hand. Prince NAPOLEON is marching northwards towards the Po, through the Duchy of Modena, with the object of co-operating with the allied troops which are ascending that river to besiege Mantua. The French fleet under Admiral Count BOUET WILLAUMEZ is approaching Venice, where an army is to be landed to take the Austrians in the rear. As these operations will bring the war into close proximity with the territories of the Germanic Confederation, the REGENT OF PRUSSIA has given orders for the early march of several army corps to the Rhine, and has announced to France and Sardinia that the line of the Mincio must be considered a defence of Germany,—a decision in which he is supported by all the minor States of Germany.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Royal family returned to Buckingham Palace on Tuesday from Windsor. On Friday morning the Queen and Prince Consort walked and drove in the Home Park, and visited the Duchess of Kent at Frogmore. The Princess Helena rode out on horseback. The Duchess of Cambridge and Princess Mary, the Duke of Cambridge and all the other visitors, left the castle for London. The Earl of Derby had an audience of her Majesty, and afterwards returned to London. In the afternoon the Queen and Prince Consort rode on horseback, accompanied by Princess Alice, and honoured Madame van de Weyer with a visit at New Lodge, Windsor Forest. On Saturday morning the Queen and Prince Consort walked and drove in the Home Park, and visited the Duchess of Kent at Frogmore. At 1 o'clock the members of the late Ministry arrived at the castle, and had audiences on retiring from office. The Marquis of Salisbury had an audience on resigning office as Lord President of the Council. Lord Chelmsford had an audience, and delivered to her Majesty the Great Seal. The Earl of Hardwicke had an audience, and delivered to the Queen the Privy Seal. The Earl of Malmesbury, Sir E. B. Lytton, Gen. Peel, Lord Stanley, and the Right Hon. T. Sotheron-Estcourt had audiences, and resigned their respective seals as Secretaries of State. The Right Hon. B. Disraeli had an audience, and delivered to her Majesty his seal as Chancellor of the Exchequer. Sir John Pakington had an audience on resigning office as First Lord of the Admiralty. The Marquis of Exeter, K.G., had an audience, and delivered to the Queen his Wand of Office as Lord Steward of the Household. The Duke of Beaufort had an audience on resigning office as Master of the Horse. The late Ministers then quitted the castle, and returned to London by a special train on the Great Western Railway. At half-past 4 the Queen held a Privy Council, at which her Majesty declared Earl Granville Lord President of the Council. The Queen delivered the Great Seal to Lord Campbell, to whom the oath of Lord Chancellor was administered. The Marquis of Ailesbury, Sir W. G. Hylton Jolliffe, Bart., James Wilson, Esq., and T. E. Headlam, Esq., by the Queen's command, were sworn of her Majesty's Most Hon. Privy Council. The Duke of Argyll received from the Queen the Privy Seal, and took the oath of Keeper. The Duke of Newcastle, Lord John Russell, the Right Hon. Sidney Herbert, Sir C. Wood, Bart., and Sir G. C. Lewis, Bart., were sworn as Secretaries of State, and received from her Majesty their seals of office. The Right Hon. W. E. Gladstone took the oath as Chancellor of the Exchequer. Her Majesty in Council declared the Earl of Carlisle Lord Lieutenant of Ireland. The Right Hon. James Wilson was appointed Vice-President of the Board of Trade. The Earl of St. Germans had an audience, kissed hands on being appointed Lord Steward of the Household, and received his Wand of Office. The Marquis of Ailesbury had an audience, and kissed hands on being appointed Master of the Horse. The Earl of Besborough had an audience, and kissed hands on being appointed Master of the Buckhounds. Previous to the Council, Viscount Palmerston, Lord John Russell, and Earl Granville had audiences of her Majesty, and subsequently the Duke of Somerset and Sir Charles Wood. The Ministers left the castle soon after 5 o'clock, and travelled to London by a special train on the Great Western Railway. After the Council the Queen, with the Princess Alice, Princess Helena, and Princess Louisa, drove to Virginia Water. The Prince Consort accompanied her Majesty on horseback. On Sunday morning the Queen and Prince Consort, Princess Alice, Princess Helena, Princess Louisa, and Prince Arthur attended Divine service in the private chapel; the Dean of Windsor officiated. On Monday morning the Queen, accompanied by Princess Alice, visited the Duchess of Kent at Frogmore. The Prince Consort visited the Wellington College. Princess Helena and Princess Louisa rode out on horseback. In the evening her Majesty had a dinner-party. On Tuesday morning the Queen and the Prince Consort went to Frogmore, and visited the Duchess of Kent. In the afternoon her Majesty, the Prince Consort, and the Royal family left the castle for Buckingham Palace, travelling to town by a special train on the Great Western Railway. The Hereditary Grand Duchess of Mecklenburgh-Strelitz visited the Queen on her arrival in town. Her Majesty, accompanied by Prince Arthur and Princess Alice, took a drive in an open carriage and four. The Prince Consort rode on horseback. In the evening the Queen and Prince Consort, accompanied by the Princesses Alice and Helena, honoured the performance at the Haymarket Theatre with their presence. On Wednesday the Queen held a Court at which the Duke of Montrose had an audience, and delivered to her Majesty his seals of office as Chancellor of the Duchy of Lancaster. The Right Hon. Sir George Grey, Bart., had an audience, was sworn into office as Chancellor of the Duchy of Lancaster, and received from her Majesty his seals of office. In the afternoon the Queen, accompanied by the Princesses Alice and Helena, took a drive in an open carriage and four. The King of the Belgians, accompanied by the Count of Flanders, arrived at Buckingham Palace on a visit to the Queen. The Prince Consort, accompanied by the Count of Flanders, rode on horseback. In the evening the Queen gave a concert, to which a party of 360 were invited. On Thursday morning the King of the Belgians, accompanied by the Count of Flanders, paid visits to the Duchess and the Duke of Cambridge at St. James's Palace. The Duke of Cambridge visited the King of the Belgians at Buckingham Palace. In the afternoon the Queen held a Court, at which Earl Delawarr had an audience, and delivered to her Majesty his Gold Key and Wand of Office as Lord Chamberlain. Viscount Sydney had an audience, kissed hands on his appointment, and received from the Queen his Gold Key and Wand of Office as Lord Chamberlain. Viscount Newport had an audience, and resigned his Gold Key and Wand of Office as Vice-Chamberlain. Viscount Castlerosse had an audience, kissed hands on his appointment, and received from the Queen his Gold Key and Wand of Office as Vice-Chamberlain. Colonel the Right Hon. Cecil Forester had an audience of the Queen, and resigned his Wand of Office as Comptroller of the Household. Lord Bury had an audience, kissed hands on his appointment, and received from the Queen his Wand of Office as Comptroller of the Household. The Right Rev. Dr. Campbell had an audience of the Queen, and did homage upon being appointed Bishop of Bangor. Lord Harris had an audience on his return from India. Sir G. C. Lewis and Sir C. Wood had audiences of her Majesty. Her Majesty, accompanied by Prince Leopold and Princess Alice, took a drive in an open carriage and four. The Prince Consort rode on horseback. The Prince of Leiningen arrived at Buckingham Palace on a visit to the Queen. In the evening her Majesty had a dinner party.

THE KING OF THE BELGIANS, accompanied by the Count of Flanders, landed at Dover on Wednesday at half-past 12 under the usual salutes. His Majesty dined at the Lord Warden Hotel at half-past 3, and afterwards proceeded by the South-Eastern Railway to London, where he arrived shortly before 6. The Prince Consort received his Majesty at the Bricklayers Arms Station, whence the Royal party proceeded to Buckingham Palace in three of the Queen's carriages, escorted by a detachment of Light Dragoons. The Queen received his Majesty at the grand entrance of the Palace, accompanied by the Princes Arthur and Leopold, the Princesses Alice, Helena, Louisa, and Beatrice, the great officers of State, and the members of the Court.

THE CABINET.—A Cabinet Council was held on Monday at the official residence of the First Lord of the Treasury in Downing Street. Another Council was held on Wednesday, and another yesterday.

THE NEW ADMINISTRATION.—The following Ministerial arrangements have been announced during the week:—

*Lord-Lieutenant of Ireland.*—Earl of Carlisle.
*Secretary for Ireland.*—Mr. Cardwell.
*First Commissioner of Works.*—Mr. Fitzroy.
*Vice-President of the Council.*—Mr. Lowe.
*Vice-President of the Board of Trade.*—Mr. Wilson.
*Civil Lord of the Admiralty.*—Mr. Whitbread.
*Lord of the Treasury.*—Sir W. Dunbar.
" " Mr. Hugessen.
" " Mr. Bagwell.
*Financial Secretary of the Treasury.*—Mr. Samuel Laing.
*Under-Secretary for the Home Department.*—Mr. G. Clive.
" " *India.* Mr. Thomas Baring.
" " *War.*—Lord Ripon.
*Secretary to the Poor Law Board.*—Mr. Gilpin.
*Attorney-General.*—Sir R. Bethell.
*Solicitor General.*—Sir H. Keating.
*Attorney-General for Ireland.*—Mr. J. D. Fitzgerald.
*Solicitor-General for Ireland.*—Mr. Serjeant Deasy.
*Lord-Advocate of Scotland.*—Mr. Moncreiff.
*Judge Advocate-General.*—Mr. Headlam.
*Lord Steward.*—Lord St. Germans.
*Lord Chamberlain.*—Viscount Sydney.
*Master of the Horse.*—The Marquis of Ailesbury.
*Master of the Buckhounds.*—The Earl of Bessborough.
*Vice-Chamberlain.*—Viscount Castlerosse.
*Comptroller of the Household.*—Viscount Bury.
*Mistress of the Robes.*—The Duchess of Sutherland.
*Lords in Waiting.*—The Earl of Caithness, Viscount Torrington, Lord Camoys, Lord Rivers, Lord De Tabley, Lord Cremorne, and Lord Methuen.

JUDICIAL APPOINTMENTS.—Mr. Justice Erle has succeeded Sir A. Cockburn as Chief Justice of the Common Pleas, and it is most probable that Mr. James Wilde will succeed to the Puisne Judgeship vacant by Sir W. Erle's promotion.

PARLIAMENTARY MOVEMENTS.—New writs, rendered necessary by the accession of the new Ministry to office, have been issued for Tiverton, Oxford University, Radnor, Halifax, South Wilts, Morpeth, Ashton-under-Lyne, Oxford, Lewes, Calne, Devonport, Newcastle-on-Tyne, Wolverhampton, Norwich, Reading, Edinburgh, Ennis, Cork County, Kerry, Wigton Burghs, Clonmel, Bedford, and Sandwich. The Marquis of Chandos has been brought forward by the Conservative party as a candidate for the University of Oxford in opposition to Mr. Gladstone. The Conservatives of Newcastle have brought forward Mr. Cuthbert, of Beaufort, near Hexham, in opposition to Mr. Headlam. The elevation of Sir B. Hall to the peerage has caused a vacancy in Marylebone. The candidates at present in the field are Lord Fermor, Colonel Dickson, and Major Lyon, all in the Liberal interest. The Conservative party have invited Mr. B. B. Cabbell to come forward, but his decision is not yet known. Mr. Bernal Osborne, Mr. Raikes Currie, and Sir J. Walmesley were invited to offer themselves in the Liberal interest, but declined the invitation. The elevation of Mr. Vernon Smith to the peerage has caused a vacancy at Northampton. Lord Henley has offered himself for the vacant seat, and is expected to be returned without opposition. The Conservatives of Norwich have resolved to bring forward a candidate in opposition to Lord Bury. Sir Samuel Bignold is mentioned, but no positive choice has yet been made. Sir F. H. Goldsmid, Bart., has announced himself a candidate for Reading in opposition to Sir H. Keating. Colonel Wood has retired from the contest for Cork. Colonel Edward Somerset has resigned his seat for Monmouthshire, and Lord Poulett Somerset has offered himself as his successor.

THE NAVY.—The whole of the mechanics and labourers who have been employed working overtime in Portsmouth dockyard received orders from the Admiralty on Saturday to discontinue working extra hours, and it is reported that the Chancellor of the Exchequer will largely retrench the naval expenditure.

CONVOCATION.—Both Houses of the Convocation of Canterbury met at Westminster on Wednesday. In the Upper House, after the usual address to the Queen had been agreed upon, a petition was presented from Mr. H. Hoare for the revival of the powers of Convocation, and a discussion took place on a proposed new order of Missionary Bishops suggested by the Bishop of Oxford. In the Lower House the question of church-rates was the chief subject of discussion, and an address to the Upper House against their abolition was agreed to. On Thursday, in the Upper House, a discussion took place on the decay of chancels caused by the impropriation of tithes, and a committee was appointed to consider the laws of simony. It was resolved to appoint a joint committee to prepare a series of occasional services, and to consider a report on the expediency of appointing Missionary Bishops. In the Lower House the Address to the Crown led to a discussion of six hours, in reference chiefly to church-rates, Christianity in India, the Special Sunday Evening Services, the Divorce Act, and the admission of the Jews to Parliament. On the two latter points, amendments were moved by Archdeacon Denison for the introduction of clauses condemnatory of the mea-

sures, but a direct decision was evaded in each instance by the adoption of "the previous question." The address as amended was then agreed to. Yesterday morning the Upper House accepted certain paragraphs which had been added by the Lower House deprecating the abolition of church-rates, and the proposed revision of the Prayer Book, and praying for an extension of the episcopate. The House formally adjourned until Thursday next, when it will be communicated to the members on what day the address will be received by the Queen. The Lower House was engaged during the morning in discussing the resolution of the Upper House on the subject of missionary bishops, and appointed eight of its members to act with a committee of the Upper House in drawing up occasional services.

THE RIFLE CORPS MOVEMENT.—A numerously attended meeting of the members of the Middle and Inner Temple was held on Wednesday at Middle Temple Hall, and a similar meeting was held on Thursday in Lincoln's Inn, at which it was resolved to form a rifle corps to be composed of members of all the Inns of Court, and a committee was appointed to carry the resolution into effect.

## Foreign.

FRANCE.—Admiral Count Bouet-Willaumez has sailed from Toulon for the Adriatic with the first division of the siege fleet, consisting of the flagship Mogador, Gomer, Descartes, and Vauban, having in tow three floating batteries, the Tonnante, Dévastation, and Lave. The second division, composed of gunboats, will sail in a few days, escorted by the squadron of Admiral Desfosses. The *Gazette de France* publishes an article affirming that in 1830, when the Restoration fell, Charles X. was taking measures for the complete revision of the treaties of 1815, and that overtures on the subject had been made by the French Government to Russia, through its Ambassador, M. de Mortemart. It says:—

"In the month of September, 1829, a memorandum was read at a Council of Ministers, presided over by the King, and approved by him, containing the whole plan to be carried out, either by means of a Congress, or by a separate understanding with Russia and Prussia, and by the swords of the French soldiers. We shall simply give here the substance of the paper, which was based on the enfranchisement of the Greco-Slavonian soil, and on the thrusting back of the Turks on their Asiatic provinces. Russia was to receive, in Europe, Moldavia and Wallachia. Austria was to add to her possessions Bosnia, Turkish Croatia, the Herzegovina, and Servia. Servia and Bosnia, better defended by nature and art than Moldavia and Wallachia, were to serve as a counterpoise for what Russia gained on the Danube. Prussia was to be extended and strengthened towards Austria by the annexation of the kingdom of Saxony; she was thus to become a maritime Power, by the acquisition of Holland, and anti-English; but she was to yield up to France Sarrebruck and Sarrelouis; to Bavaria a portion of her Rhenish provinces, which enabled the latter State, by means of exchanges, to join two detached fragments of her territory, and to cede Landau to France; lastly, 1,400,000 Catholic subjects of Prussia would recover their Rhenish nationality, with a capital at Aix-la-Chapelle and a sovereign of their own religion, the King of Saxony. By this combination Prussia would no longer touch the French frontiers; a State incapable of injuring France was placed between her and Prussia; the bonds of religious unity would connect France with the intermediate State, and France also acquired three fortified places, which increased her security on the northern frontier. The King of Holland, it is true, lost his possessions, but he was to place upon his head the crown of the Constantines, and was to reign at Constantinople over an empire of 10,000,000 of souls. France was to enter into possession of the Belgian provinces to the Rhine and the Meuse. This plan, as a whole, conciliated all the interests of the Continent, and was susceptible of every modification of a nature to satisfy them."

—The *Siècle* contains the following observations on the elevation of Lord Derby to the dignity of Knight of the Garter:—

"In granting to Lord Derby the Order of the Garter, especially when there is no vacancy, which is contrary to all ordinary usages, Queen Victoria has acted in the plenitude of her power. But has she acted in conformity with the spirit and traditions of the English constitution? With all the respect we feel for our gracious ally, we must say that we do not think she has so acted in the present instance. What! The Cabinet of which Lord Derby is the head has been compelled to retire before the free and legal manifestation of public opinion. By its undecided attitude, its ambiguous and tortuous policy, it has incurred the heaviest responsibility that statesmen can assume; and yet its head is to be rewarded! If France is now in Lombardy, if blood is flowing, if Austria has imprudently provoked the severe chastisement which she has received, Lord Derby may smite his breast and say, 'It is my fault!' A word from him, a single word in harmony with the genius and traditions of England, would have arrested Austria, and prevented the war. That word he did not utter. When first condemned by the Parliament he did not yield, but made an appeal to the nation at large, which has solemnly confirmed the sentence of the first judges. It is before that sovereign verdict that Lord Derby's Cabinet is obliged to retire, and yet to this very Cabinet in the person of its chief, the Queen of England grants a signal honour. There is no vacancy in the Chapter of the Garter, and a new stall is created expressly for him, as if there were danger in delay; as if Lord Derby had just saved his country, or rendered to England one of those glorious services which public gratitude must immediately acknowledge. We do not hesitate to say that Queen Victoria, in so acting, has done a most impolitic act, and one altogether in discord with the prudent reserve which the head of a Constitutional State should always maintain. France might regard it as a distasteful proceeding—an indirect blame for her conduct—but we are unwilling to consider the matter from that point of view. We are far more inclined to dwell upon whatever may draw closer than on what may loosen our union with England. We therefore consider the fact in question in a purely English point of view."

SPAIN.—The Madrid journals are principally occupied with the acquittal of M. Collantes, and with the recognition of the Queen by the Infante Don Sebastian, which they regard as a death blow to the Carlist party. Two of the persons accused with M. Collantes, MM. Luque and Beratarrechea, were acquitted with him; the third, M. Maria Mora, formerly Director of Public Works, who did not present himself, and was tried by default, was declared guilty, and condemned to 20 years' hard labour at the galleys, to perpetual privation of political rights and of the privilege of occupying public offices, to 40 years' surveillance of the police, commencing on the expiration of his 20 years' hard labour, and, lastly, to a fine of 20,000 reals, and to pay back to the Treasury the 975,000 reals which he was accused of having embezzled.

PRUSSIA.—The news that Count Pourtalès, the Prussian Ambassador, has been sent to the headquarters of both the belligerent armies is said to be untrue. The count is expected soon in Paris. The official *Gazette* of Wednesday in a leading article says:—

"The Franco-Sardinian army is moving near the frontiers of Germany. The Prussian Government has repeatedly declared that it regards the security of Germany as intrusted to its care. The Italian conflict is assuming ever-increasing dimensions. England and Russia are arming on the greatest scale. The Prussian Government would be faithless to its duty, and to the sense of the nation, if it should neglect to act commensurately with that spirit by which Prussia has become great. Prussia is free from every engagement; she obeys only those obligations which spring from the innermost nature of her State interests. It will soon be seen whether Prussia's initiative will be supported with the necessary weight by the German States. Prussia's policy stands firm, and whoever lays obstacles in its way may consider that he is rendering services to the enemies of the Fatherland."

The subscriptions to the last loan of 30 million thalers amount to 31,875,100 thalers. The surplus of 1,875,100 thalers thus subscribed for will be deducted from the different allotments.

WEIMAR.—The Grand Duchess Dowager of Saxe Weimer, mother of the Princess of Prussia, and aunt of the Emperor Alexander, died on Thursday last.

BAVARIA.—Major-General von Tann left Munich on Monday for Berlin on a special mission.

AUSTRIA.—Count Rechberg left Vienna on Saturday for Verona, and it is believed that communications which were made to him on the previous Thursday by Baron Werther, the representative of Prussia at the Court of Austria, occasioned his departure for the headquarters of the Emperor. On the day mentioned Baron Werther was closeted with the Austrian Minister for more than two hours, and it does not admit of a doubt that matters of high importance were discussed during the prolonged interview. Men in office profess to think that Prussia is about to place herself at the head of the Germanic Confederation, and to make a demonstration on the Rhine, but that she will not take such a decisive step until she has come to a perfect understanding with Austria.

ITALY.—Despatches from the seat of war state that the Austrians, who in great force had occupied strong positions at Lonato, Castiglione, and Montechiaro, where they had fortified themselves with care, by embattling the walls, breaking the bridges, and constructing numerous batteries, have abandoned all those positions. The Emperor of the French, who entered Brescia on the 18th inst. with the King of Sardinia, left that city on Monday amid the enthusiasm of the inhabitants for the camp, and the allies have since occupied Lonato, Castiglione, and Montechiaro. The two great armies are now face to face, and a great battle is hourly expected. Prince Napoleon has commenced the advance of his troops from Tuscany, and at the latest dates was at Massa, on the borders of Modena, with the object of marching north towards the Po, through that Duchy, in order to join the main body of the liberating army under the Emperor, or to co-operate directly with the troops ascending the Po to besiege Mantua. It is asserted that the French are about to occupy Ancona. Fano, Urbino, Fossombrone, Jesi, and Ancona have pronounced for the national cause. The first Swiss regiment has left Rome for Perugia. The Russian Ambassador has given a banquet at Rome in honour of the French Commander-in-Chief, General Goyon. On Saturday morning the Emperor of Austria reviewed the 7th and 8th *corps d'armée* at the Camp of Lonato, before that position was abandoned. He was most enthusiastically cheered, and the Vienna journals state that the confidence of the troops has reached the highest point. An official account has been published of the losses of the Austrians at the battle of Magenta—63 officers and 1302 soldiers are said to have been killed, 218 officers and 4130 soldiers wounded, 4000 soldiers missing. The *Moniteur* recapitulates the French loss at Magenta as 323 killed, 2165 wounded, and 470 missing. The French loss at Melegnano was—154 killed, 725 wounded, and 64 missing. The news that a French *corps d'armée* has arrived in the Valteline is untrue. The news referred to a Lombard corps led by some of General Garibaldi's officers, which was stationed in the Valteline. Garibaldi has pushed his outposts as far as Balladore, in the direction of Bordio, which is occupied by 400 Austrians. On the 20th he marched from Salo towards Desenzano; but, meeting the enemy in considerable force withdrew. An Austrian steamer on the Lago di Garda fired on his men; but the Sardinian artillery silenced it. In conjunction with General Cialdini he has driven the Austrians from Castenedole, after having blown up the bridge over the Chiese, before the town of Montechiaro. The Austrians in great force have occupied the pass of the Stelvio, blown up the Devil's Bridge, and brought up their artillery into the pass. Austrian troops of the Italian regiments are repassing through the Tyrol for Germany; 3000 of them have arrived at Malo, and 3000 more are to follow. The Austrians continue to construct block-houses, redoubts, and fortifications at Nauders. Kossuth has arrived at Genoa from Marseilles. Count Cavour last week addressed a note to all the Ministers of Sardinia abroad, charging the Austrian General d'Urban with an act of barbarity and a violation of the laws of war in shooting a family of nine persons called Cignoli, because a small quantity of shot for sporting purposes was found in their house. In reply to this note the Austrian Government formally declares that the cruelties attributed to General d'Urban are entirely devoid of foundation, and that details will be published shortly. Letters from Rome to the 18th inst. announce that 2000 Papal troops which had been sent to Perugia to restore order, attacked that city on the 20th inst. Great resistance was made, although the defenders were few. After three hours' fight outside the town the Swiss entered, and the combat continued for two hours in the streets. The Swiss trampled down, and killed even women and inoffensive persons. The next day the outrages, arrests, and firing on the people recommenced. The town is in a state of siege. A collision has also taken place at Cervia between a detachment of Papal troops and the inhabitants. King Victor Emmanuel has refused the military dictatorship offered him by Bologna, and has stated to the Commissioners that he will disapprove of every act subversive of, or contrary to equity, and prejudicial to the cause of national independence. The King has also sent an aide-de-camp to the Pope to assure his Holiness that he has nothing to fear from the events now happening, and that the independence of the peninsula would be a guarantee and not a menace to the neutrality and integrity of the States of the Church. An amnesty has been proclaimed at Naples. Those condemned for political offences are amnestied, not including those amnestied on the 27th December and 18th March. The latter are to remain under surveillance: those suspected are pardoned. Common sentences are shortened by three years.

GREECE.—The King of Greece, in closing the legislative session at Athens on the 5th inst., congratulated the Chambers on the completion of a quarter of a century since his arrival, and promised to continue to carry out his views with regard to the "great interests and honour of the country." A change of Ministry has since taken place. Major-General Milius has been appointed Minister of War; Riga Palamedi, Minister of the Interior; Conduriotthis, Minister for Foreign Affairs; Zaïnis, Minister of Public Instruction and Public Works.

THE ADRIATIC.—The *Austrian Correspondence* announces that the French Government has strongly disapproved the conduct of the Admiral of the French fleet before Venice in capturing some barques belonging to fishermen. The Austrian vessel Buona, of the class No. 2, which had been captured by the French, has been given up as free, because its proprietor and its captain are Venetians.

RUSSIA.—The St. Petersburg official journal publishes an Imperial ordinance, authorising the Governor of Finland to contract a loan of five millions of roubles at 4 per cent. The sum is intended principally for public buildings. The committee on Jewish affairs has decided that Russian Jewesses married to Austrian Jews may remain in Russia, in case the Austrian Government, not recognising the marriage, shall prohibit their residence in Austria.

INDIA.—We have news from Bombay to the 23d May. The discontent of the European troops of the East India Company against the transfer of their services to the Crown, in the manner in which it has been effected, is the chief topic of interest in India. At Meerut, Allahabad, and Gwalior, a mutinous spirit has been exhibited by a portion of the troops; and though no overt act has yet been done by that branch of the European troops which belong to the Bombay Presidency, it is generally believed that they share the discontent of their brethren in garrison on the Bengal side. There are as yet no rumours of sympathy on the part of the Madras European forces. Lord Clyde appears to have acted with promptitude and discretion. Immediately on hearing of the disaffection at Meerut, he left Simla for Meerut, and having reached Kussowlee on his way thither, he issued an order directing a special court of inquiry to be convened for investigating the complaints of the men, and in the meantime the men who had been struck off duty for their disobedience have been allowed to return to their posts. At Kussowlee he received a telegram stating that his presence was no longer required, and accordingly he retraced his steps. Col. Johnson, Assistant-Adjutant-General of Artillery, shortly afterwards started from Meerut for Calcutta, to consult the Governor-General. Some of the Queen's troops, and among them a troop of the Royal Artillery, are said to sympathise with the malcontents. At the trial of the Nawab of Furruckabad, who has been sentenced to be hanged, it transpired that before his surrender a letter had been written to him by Major Barrow, the special commissioner with the camp of the Commander-in-Chief, in which he was invited to surrender, and that in his letter he was told that pardon had been extended to all who had not personally committed the murder of British subjects, and that if he had not personally committed the murder of British subjects he might surrender without apprehension. On the receipt of this letter he immediately surrendered. He now claims the fulfilment of the promise of pardon, being found guilty not of having personally committed the murder of English subjects, but of having been an accessory before the fact. The Governor-General in Council entirely con-

demns and disavows the act of Major Barrow, in making a promise contrary to the royal proclamation, and contrary to the express order of the Government, excepting the prisoner from all benefit of pardon. "But," says an Order in Council, "his Excellency in Council will not suffer it to be said that the prisoner, having been induced to surrender on the promise of a British officer in Major Barrow's position, has in consequence of that surrender been put to death for a crime of less degree than that which was designated by the officer as alone rendering him liable to punishment. The Governor-General in Council has therefore resolved to forbear from carrying out the sentence of the Court on Tufuzzal Hosein, on the condition that he shall immediately quit the British territory for ever. If he accepts this condition, he will be conveyed to the frontier as a convict under a military guard, and there set at liberty. If he refuse the condition, or if, having accepted it, he shall break it, or attempt to break it now or at any future time, the capital sentence pronounced upon him will be carried out."

EGYPT.—A supplement to the *Progresso di Egitto*, published on the 10th inst. at Alexandria, gives an important notification regarding the Suez Canal. It consists of a circular addressed by Scheriff Pacha, the Egyptian Minister for Foreign Affairs, to all the Consuls-General, recapitulating that it was expressly stipulated by the Egyptian Government that the cutting of the canal should not be commenced without the authorisation of the Porte, and announcing that although the Viceroy has manifested great interest in the enterprise, he has resolved not to tolerate its progress under any pretext until that authorisation shall have been obtained. The works actually going forward are considered to be in violation of this understanding, and the foreign consuls are therefore requested respectively to warn such of their countrymen as may be engaged upon them to desist forthwith, and not to force the Egyptian Government to resort to direct measures of interference.

UNITED STATES.—Accounts from New York state that the home squadron is to be still further increased, and that the frigate Sabine will soon proceed to the Gulf, where there will then be 10 vessels of war with an aggregate of 212 guns. It is also proposed to increase the Mediterranean squadron on the event of the extension of war in Europe. One of the great shipbuilders of New York has just completed a large screw steamer for the Russian Government. She is said to be the largest war steamer afloat, exceeding 8000 tons American measurement, and is furnished with an auxiliary screw of 800-horse power, which can be increased to 2000. Her trial trip, from which she has just returned, is reported to have been successful. She sails for Russia without guns, and takes them on board at Cronstadt.

# Parliament.

## HOUSE OF LORDS.

TUESDAY.—*The New Ministry.*—Lord REDESDALE, as Deputy Speaker, in the absence of the Lord Chancellor, said that he had been requested by Lord Granville to move that the House adjourn until Thursday next; but at the same time to state that no public business would be transacted until Thursday week.

THURSDAY.—The House met for about an hour and forwarded some Bills a stage.

## HOUSE OF COMMONS.

TUESDAY.—*Charing Cross Terminus.*—Considerable discussion took place on two private bills, one for the establishment of a terminus at Charing Cross for the South-Eastern and Brighton Railways, and the other the *London City Gas Bill*. Ultimately the opposition to both was withdrawn. The first was read a third time and passed, and the latter was read a second time. *Reform Bill.*—Mr E. JAMES gave notice that on Monday next he should ask the Government whether it was intended to bring in a Bill during the present session to reform the representation of the people. *The Navy.*—Lord CLARENCE PAGET said that he did not intend to proceed with the motion for a select committee to inquire into the shipbuilding department of the navy which stood in his name for that night; at the same time he hoped the House would place confidence in the sincere desire evinced by the noble Duke at the head of the Admiralty to carry out reform in this important branch of the public service. For his own part he could say that there was no necessity to spur a willing horse.—Mr. JACKSON then gave notice that early next session he should move for the appointment of a select committee on the subject. *The Admiralty.*—Sir C. NAPIER postponed for a fortnight his motion for a select committee to inquire into the state of the Admiralty with a view to its reconstruction. He expressed his opinion that, looking to the enormous naval armaments of France and Russia, it was absolutely necessary, even if the income tax were to be trebled for the purpose, to man every British ship that could be built.—Mr. WILLIAMS deprecated the continued croaking of the gallant admiral, and reminded him that he was the only naval officer in England who was afraid of invasion. *Public Playgrounds.*—Mr. SLANEY obtained leave to bring in a Bill to provide public walks and places of exercise for the working classes in great towns.—The Earl of MARCH obtained leave to bring in a Bill to provide for the payment of debts incurred by *Boards of Guardians* in unions and parishes, and boards of management in school districts. *The New Ministry.*—Mr. BRAND intimated, on the part of the Government, that as no responsible Minister could be in his place for some days to come, he should to-morrow move that the House at its rising adjourn until Thursday, the 30th June.—*Election Petitions* were presented complaining of undue elections at the following places:—Roscommon, Great Yarmouth, Sandwich (2), Athlone (2), Cheltenham, Kidderminster, Weymouth (2), Preston, Windsor, Carlisle, Dundalk, Dover, Bodmin, Bridgewater, Lyme Regis, Hull (2), Newry, Frome, King's County, Chatham, Peterborough ( ), Beverley (3), Wakefield, Merionethshire, Carlow, Kent, and Barnstaple (2). *Law of Landlord and Tenant.*—Mr BRADY gave notice that he would on the 30th inst. ask the First Lord of the Treasury if he intended to introduce any measure this session for the alteration of the laws in reference to landlords and tenants in Ireland

WEDNESDAY.—*New Writs* were ordered to be issued for the several seats vacated by the members of the new Ministry on their acceptance of office. Some discussion arose as to the writ for Sandwich, vacated by Mr. Hugessen. A petition had been presented against the return for the borough, on the ground of bribery, and it was contended that the writ ought not to issue till that petition was disposed of. Ultimately, the writ was ordered to issue, the petition progressing notwithstanding. *Breach of Privilege.*—On the motion that the House adjourn to the 30th inst., Mr. O. STANLEY drew the attention of the House to a statement which had appeared in the *Times* to the effect that Mr. Gilpin, one of the members for the borough of Northampton, had exhibited letters from the agents of the Tory party, in which a direct attempt was made to corrupt him in the discharge of his duties, and to influence him in giving his vote at the late no-confidence decision by the offer of pecuniary considerations of the grossest description. —Mr. BLACKBURN called attention to another paragraph, in which it was stated that Mr. V. Smith had been offered a peerage as compensation for the unwarrantable attacks that had been made on him while holding the office of President of the Board of Control.—Mr. T. DUNCOMBE observed that the latter statement was a mere squib, with which the House could not interfere. As for the former, those who had made the statement ought to be summoned to the bar of the House, and asked what authority they had when they ventured to put it forth.—Colonel DUNNE took the opportunity of vindicating his own conduct in regard to his votes on the Ecclesiastical Titles Bill, which had also been misrepresented by the public press. — After some remarks from Mr. CLIVE, Mr. LOCKE KING thought that the writer of the paragraph relating to Mr. Gilpin should be summoned to the bar of the House.—Mr. DUNCOMBE said that the matter could not remain where it was, and that the editor ought to be cited.—The SPEAKER observed that the question should be entertained as a motion of breach of privilege, and not on the adjournment of the House.—Subsequently Mr. GILPIN, who had not been present during the debate, made his appearance, and said that he had not seen the publication referred to, but at the same time he was prepared to give an immediate answer. It was true that he had received letters, the tendency of which, if he had been disposed to attend to them, might have biassed his vote. He had shown them to the political friends with whom he usually acted, and he was bound to say he had no proof whatever—neither had he ever said he had any proof, nor could he say he entertained the belief—that the offers in question came from the agents of the Conservative party. They were made in a way which might be considered as suggestions rather than offers; and he certainly should not have brought them under the notice of the House if the hon. member had not put the question to him.—Mr. BRADY said he did not consider Mr. Gilpin's reply altogether satisfactory, as he thought the hon. gentleman should have stated the nature of the offers made him.—Mr. STANLEY expressed his intention to consider the subject, with a view of again bringing it under the notice of the House. The House then adjourned until Thursday next.

## ELECTION ADDRESSES.

LORD PALMERSTON has issued the following Address to the Electors of Tiverton:—

94, Piccadilly, June 20.

"Gentlemen,—Her Majesty having been graciously pleased to confer upon me the office of First Lord of the Treasury, my seat in the House of Commons has become vacant, and I again solicit the honour of continuing to be one of your Representatives in Parliament. I have so lately had the honour of being among you that I deem it unnecessary in this address to enter at length into the grounds on which I rest my claim to your confidence. I have been charged by our Sovereign with the duty of forming an Administration, and I trust that I have been enabled to perform that task in a manner that will prove satisfactory to her Majesty, to Parliament, and to the country. It will be one of the great objects of the Government so formed to preserve for their country the blessings of peace, and to take advantage of any favourable opportunity that may present itself to exert the moral influence of Great Britain to assist in restoring peace to the Continent of Europe. We shall also have to consider the important question of the amendment of the laws which regulate the representation of the people in Parliament; and I trust that we may be able so to deal with that subject as to strengthen the institutions of the country by placing them on a broader and firmer foundation.—I have the honour to be, gentlemen, your obedient and grateful servant, PALMERSTON."

MR. GLADSTONE has addressed the following letter to the Provost of Oriel in reference to the approaching election for the University:—

"11, Carlton House Terrace, June 17.

"My dear Provost of Oriel,—This day is the first on which I have felt myself at liberty to address any statement respecting my intended assumption of office as Chancellor of the Exchequer even to those who will have either to grant or to refuse me re-election. The question raised by the proposal I have received has for me been a simple one. I trust it may be equally so to others if I recall their attention to past events. Various differences of opinion, both on foreign and domestic matters, separated me, during great part of the administration of Lord Palmerston, from a body of men with the majority of whom I had acted, and had acted in perfect harmony, under Lord Aberdeen. I promoted the vote of the House of Commons in February of last year which led to the downfall of that Ministry. Such having been the case, I thought it my clear duty to support as far as I was able the Government of Lord Derby. Accordingly on the various occasions, during the existence of the late Parliament, when they were seriously threatened with danger or embarrassment, I found myself, like many other independent members, lending them such assistance as was in my power. And, although I could not concur in the late Reform Bill, and considered the dissolution to be singularly ill-advised, I still was unwilling to found on such disapproval a vote in favour of the motion of Lord Hartington, which appeared to imply a course of previous opposition, and which has been the immediate cause of the change of Ministers. Under these circumstances it was, I think, manifest, that, while I had not the smallest claim on the victorious party, my duty as towards the late advisers of the Crown had been fully discharged. It is hardly needful to say that, previously to the recent vote, there was no negotiation or understanding with me in regard to office; but when Lord Palmerston had undertaken to form a Cabinet he acquainted me with his desire that I should join it. A proposal of that kind must be answered by reference to the paramount interests and duties of the period when it is made. These, in the present instance, are without doubt to be found, first, in the guidance of our foreign policy with respect to the Italian war; and, secondly, in the settlement of the weighty subject of Parliamentary Reform. With respect to the first of these, ever since my mind was turned to the case of Italy, my views and convictions have been in unison with those of the statesmen who will now be chiefly charged with our foreign affairs. It is thus my clear duty, in or out of office, to support them in the difficult task of so maintaining the neutrality of England as not to lose the openings which events may offer for using her impartial influence on behalf of the stability and justice of political arrangements abroad, and of the peace and happiness of Europe. With respect to reform I understood the counsels of Mr. Walpole and Mr. Henley, and I believe that if they had been followed the subject of reform would in all likelihood have been settled at this date, without either a dissolution of Parliament or a change of Administration. But I have never understood the principles on which that subject has been managed since the schism in the late Government. I also think it undeniable that the fact of the dissolution, together with the return of an adverse and now no longer indulgent majority, rendered the settlement of this question by the late Ministers impossible. I therefore naturally turn to the hope of its being settled by a Cabinet mainly constituted and led by the men together with whom I was responsible for framing and proposing a Reform Bill in 1854. It thus appeared clear to me, not only that opposition on my part to the Government of Lord Palmerston would be an unprincipled course, but that these were precisely the circumstances which brought into its fullest force the duty of rendering service and support to those who, having been honoured with the confidence of her Majesty in a critical state of Parliament and of parties, are to be charged with the conduct of affairs graver and more arduous perhaps as a whole for England than any since the peace of 1815. I have long known and lamented the public inconvenience brought about by separate action; and, subject to the conditions of honour and of public utility, I could not with propriety pass by any opportunity of bringing it at least in my own person to a close. I understand that misgiving exists with respect to my sitting in a Cabinet of which Mr. Gibson is a member, and which Mr. Cobden will be invited to join. The very same feelings were expressed, as I well recollect, when the late Sir William Molesworth entered the Cabinet of Lord Aberdeen. Sir William Molesworth never to my knowledge compromised his political independence; yet these apprehensions were, I think, not justified by the subsequent course of events. But all experience, by no means excepting that of the late Government, seems to show that Cabinets cannot in the present state of things be constituted without including some, and perhaps wide, differences of opinion, even upon questions of high import. The real moment of these differences cannot be tested by mere reference to anterior and abstract declarations; but only in the practical application of principles, under the weight of responsibility for the conduct of affairs. I may perhaps venture to add, that among the faults which have at any time been found in me, has never been that of an undue subserviency to the opinions of others. Were I permitted the mode of address usual upon elections, I should, after this preliminary explanation, proceed to submit with confidence to my constituents that, as their representative, I have acted according to the obligations which their choice and favour brought upon me, and that the Ministry which has thought fit to desire my co-operation is entitled in my person as well as otherwise to be exempt from condemnation at the first moment of its existence. Its title to this extent is perhaps the more clear, because among its early as well as its very gravest duties will be the proposal of a Reform Bill, which, if it be accepted by Parliament, must lead after no long interval to a fresh general appeal to the people; and will thus afford a real opportunity of judging whether the public men associated in the present Cabinet have or have not forfeited by that act, or by its legitimate consequences, any confidence of which they may previously have been thought worthy. Your kindness in proposing my name to Convocation on so many successive occasions has led me to trouble you with this lengthened letter. I hope it may be justified by the gravity of the present juncture; and, having so far trespassed on your patience, I cheerfully leave in the hands to which it belongs the task of considering what course the honour of the University may require.—I remain, my dear Provost of Oriel, very sincerely yours, "W. E. GLADSTONE."

# Metropolis and its Vicinity.

ELECTION OF SHERIFFS.—At a common hall yesterday, under the presidency of the Lord Mayor, Mr. Alderman Phillips and Mr. Alderman Gabriel were elected Sheriffs of London and Middlesex for the ensuing year.

DINNER TO THE BISHOPS AT THE MANSION HOUSE.—On Tuesday evening the Lord Mayor gave a banquet to the Archbishops, Bishops, and Clergy on the annual celebration of the Society for the Propagation of the Gospel in Foreign Parts, in behalf of which a sermon had been preached in the morning at St. Paul's by the Bishop of Bath and Wells. The Lord Mayor, in proposing the health of the Archbishop of Canterbury,

noticed the support given by the City to the Society for the Propagation of the Gospel, of which his grace was the president. He then referred, in terms of strong reprobation, to the refusal of the late Ministry to introduce the Bible into the Government schools in India. They had heard in the sermon preached before them that morning what were the feelings of the bench on that subject, a feeling which he was sure was shared by the clergy at large. The Archbishop of Canterbury, in returning thanks, said that the peculiar position of Great Britain involved peculiar duties towards those with whom she came in contact. She received rich commodities from the rest of the world, and it was incumbent on her to give in return that truth with which she was entrusted by God's providence. The merchant who obtained boundless wealth by the teas of China, or the silks of India, could not but feel that he was bound to contribute to the efforts of a society like that of the Propagation of the Gospel in Foreign Parts; while the trader to Africa for his ivory or gold dust must remember the utter degradation of the countries from whose productions he derived his profits. He quite agreed with the Lord Mayor in the necessity of introducing the Scriptures into India. Referring to the development of missionary societies, he observed that if the increase of commerce in London has been fourfold during the course of the century, that of missionary societies had been fifty-fold. At the commencement of the century the income of the Society for the Propagation of the Gospel had been but about 2000*l.*; it was now 100,000*l.* There were then only two or three societies, of which the aggregate income was not more than 10,000*l.*; there were now several societies with an aggregate income of 100,000*l.* The feeling of the British people would, he was persuaded, carry them yet further. The Bishop of London in returning thanks for his health said that it was now only 18 years since his eminent predecessor had laid the foundation of our great colonial episcopate, under the auspices of that society, which had by itself been mainly instrumental in founding the see of Gibraltar. At that time no one could have anticipated the importance to which the Colonial Church of England had attained. Adverting to his own diocese, he said that many had expressed fears that the Church would not be able to keep up with the spirit of the age. He could contradict this from his own experience; each succeeding ordination brought forward young men more and more fully alive to the duties of their office, and able to undertake and to sustain them. As to the Society for the Propagation of the Gospel, its efforts were not confined to the heathen. It had effected great good both in the colonies and at home. The Bishop of Brisbane having acknowledged the toast of the "Colonial Bishops," and the Marquis of Westminster having returned thanks for the House of Lords, the **Lord Mayor proposed the health of Lord John Russell in connection with the toast of the House of Commons.**

Lord J. Russell, in acknowledging the toast, said he hardly knew how properly to make a speech in answer to it, because he did not at that moment legally belong to the House of Commons, and was not therefore the proper person to represent it at his lordship's table. However, he had had the honour in former times of being a member for the City of London, and he hoped he would at some future time enjoy the same honour. Therefore he might, perhaps, on that occasion venture to return thanks for the House of Commons. He could still less venture to make any speech in the capacity of Secretary of State for Foreign Affairs, but he could heartily respond to the wish of the right rev. prelate that this country might remain at peace. It was not with any selfish view that they adopted that policy of neutrality which had met with the general assent of the country. It was not merely with the view of saving expenditure, though that was a great public object; it was not merely to save life, though that was a humane object, but his belief was that peace was more likely to be restored to the world while we refrained from entering into hostilities and awaited for the time when contending passions would be somewhat calmed down, and the voice of reason would be heard recommending terms to which the belligerents and all parties would assent. He thought his lordship was quite right in wishing health to the House of Commons when it was remembered that its members were about to sit day and night together during the months of July and August in the close vicinity of the Thames. There was one topic to which his lordship had alluded which was too serious for discussion on such an occasion. He alluded to the introduction of the Bible in the schools of India, upon which the wishes of all men were the same, but with regard to which the mode of proceeding to be adopted required the greatest caution and the greatest toleration for the opinions of our fellow-subjects in India. But with respect to the object no man could more heartily agree with it than he did.

PREACHING IN COVENT GARDEN MARKET.—On Sunday afternoon many hundreds of persons were attracted to Covent Garden Market by an announcement that the Rev. Lord Wriothesley Russell, Canon of Windsor, and Deputy Clerk of the Closet to the Queen, and half-brother of Lord John Russell, M.P., and of the Duke of Bedford, would preach the first of a series of out-door sermons under the auspices of the London Diocesan Home Mission, of which the Bishop of London is president. At a few minutes before 3 o'clock a temporary platform was raised in the large space to the north of the grand avenue, and upon this, precisely as the clock of the church of St. Paul struck 3, Lord W. Russell and the Rev. Henry Hutton, the rector of the parish, took their stand. Lord W. Russell wore his black preaching gown. Mr. Hutton gave out the 23d Psalm, which was sung by the congregation; after which he read a chapter from the New Testament and offered up a prayer. The 100th Psalm was then sung, printed copies of it being handed about for the accommodation of those who might not be acquainted with the words. Lord W. Russell then proceeded to deliver his sermon, taking his text from the 11th chapter of St. Matthew, verse 28—"Come unto me all ye that labour and are heavy laden, and I will give you rest." His lordship engaged with great earnestness on the all sufficiency of Christ, and dwelt upon the rest and happiness of those who trusted in Him with the full assurance of faith. After preaching about half an hour, during which time he was listened to with marked attention, he stated that it had been with the greatest pleasure he had responded to the call to preach there that afternoon, and then informed the people that the services would be continued every Sunday afternoon until further notice. The sermon to-morrow afternoon will be preached by the Rev. Henry Hutton, rector of St. Paul's, who will take his stand near the western end of the grand avenue, the situation taken last Sunday not having been found a favourable one for the conveyance of sound. These services, promoted by the Diocesan Home Mission, are designed for the working classes, but the congregation in Covent Garden Market on Sunday was composed chiefly of well-dressed persons, principally men. When prayer was offered nearly every man present took off his hat, and the most respectful silence prevailed. Lord Charles Russell, (the Serjeant-at-Arms of the House of Commons), Lord E. Russell, and Mr. Alcock, M.P., were among the auditory.

THE HANDEL COMMEMORATION FESTIVAL.—The grand full rehearsal took place on Saturday morning in presence of a vast audience, amounting to 19,680 persons. The first of the three festivals took place on Monday, when the "Messiah" was performed with complete success in the presence of 17,109 persons. The second festival, which comprised the "Dettingen Te Deum," and other compositions, took place on Wednesday, and was attended by 17,644 persons; and the third festival took place yesterday, when "Israel in Egypt" was performed in the presence of the Prince Consort, Princess Alice, Princess Helena, the Count of Flanders, and a numerous suite. The homage to Handel was not restricted to a performance of his music but embraced portraits, relics, MSS., &c., which for the admirers of the composer had an interest second only to his mighty inspirations. The Roubillhac statue of Handel, the property of the Sacred Harmonic Society, was placed in front of the orchestra, as in 1857. Among the decorations of the orchestra and in the Handel court were the portrait of Handel, by Denner, presented to the Sacred Harmonic Society by Lady Rivers; and another portrait by Hudson, the property of Mr. Martin, of Lee, who kindly lent it for exhibition during the festival week; autograph scores of the composer's works contributed by her Majesty and by M. Victor Schoelcher, an autograph letter, a duplicate of his will, the original inventory of his effects, taken after his decease, his watch, his tuning fork, miniatures, &c.

PRESENT TO M. AND MADAME GOLDSCHMIDT.—A few months ago M. and Madame Goldschmidt (Jenny Lind) gave a concert at Exeter Hall in aid of the Nightingale Fund, which realised more than 2000*l.* A meeting was held a few days since at the Mansion House, at which the Lord Mayor presided, for the purpose of presenting them with a copy in marble of Mr. Durham's bust of the Queen, as a mark of the regard and admiration of those interested in the undertaking. M. Otto Goldschmidt acknowledged the present in feeling and impressive terms, and said he and his wife would receive the bust in their new home as one of its *penates*, and that the gift would be preserved by their children and their children's children.

NEW GUN VESSELS FOR HER MAJESTY'S SERVICE.—The following shipbuilding firms have contracted with the Government for the supply of 18 new gunboats of 150 tons each:—Mr. Green, 2; Mr. Wigram, 4; Mr. Mare, 3; Mr. Pitcher, 1; Scott Russell & Co., 3; Thames Shipbuilding Company, 2; Miller & Co., of Liverpool, 2; Mr. White, of Cowes, 1. These vessels are required for speed, and will therefore have fine lines and light scantling, and be fitted with engines of 80-horse power. From the specifications it appears that they are intended to carry Armstrong's guns.

COLONIAL OFFICE.—Sir E. B. Lytton, while Secretary of State for the Colonies, requested the Council of the Royal Society to favour him with any scheme or suggestions with reference to the preparation of works descriptive of the zoology, botany, and the geology of the British colonial empire. In accordance with this request the Council has forwarded a report to the Colonial Office, embodying various suggestions, and adding a strong recommendation that the scheme should also comprehend researches in terrestrial physics.

STATE OF THE THAMES.—At the last meeting of the City Commissioners of Sewers, Dr. Letheby, the medical officer of health, presented a report on the present state of the Thames, from which the following is an extract:—

"The water is now in a high state of putrefaction; in fact the Thames has been in a very offensive condition for rather more than a fortnight, and has been evolving the same kind of gases and vapours as were let loose from it during the hot summer of last year. It will be remembered, however, that on that occasion the foul state of the river was not observed until about the middle of June, when the temperature was as high as from 70° to 80°, which is nearly 15° above the average for the season, and then there had been a long continuance of dry weather. But this year it is seen a month earlier, without any remarkable elevation of temperature, for the last of the preceding three weeks was below the average (60°), and there was a total fall of nearly 2 inches of rain. I fear, therefore, that it is a sign of what may be expected during the hot months of July and August, and it clearly indicates the necessity for sanitary precautions. The investigations which were carried on during the last summer may perhaps be of service in the present case, for at the request of Messrs. Bidder & Hawksley, who were anxious to discover the cause of the fetid condition of the river, I made a full inquiry into the matter. The water was examined chemically and microscopically, it was tested at high and low tides, at mid-stream and near to the shore, it was collected at many places between Isleworth and London Bridge, and the inquiry was conducted with regularity every day during the whole time that the river was foul. The general results of the investigations were that the river was highly charged with sewage and sea water, and that the circumstances which attended or preceded the fetid decomposition, were a remarkably hot season, a continued absence of rain, a diminution in the public water supply, a flowing up of the oceanic or tidal sea wave to an unusual height, and the sudden discharge of a large quantity of very offensive sewage from the sewers and stagnant sewers, by a heavy fall of rain—the discharge occurring about low tide, when instead of its passing away to sea, it flowed upwards to the higher districts of the river and then oscillated between the extreme ranges of the tide. The inquiries which I have again instituted during the last fortnight have shown a similar condition of things, for the river at London Bridge is now overcharged with sewage and sea water. In ordinary times the proportion of soluble matter in the water of that locality, at mid stream, is about 20 grains per gallon, of which nearly 30 are common salt, and from three to four organic impurity, but at present it contains about 97 grains per gallon of solid matter, of which 61 are common salt, and rather more than seven are organic impurities, and these are in a high state of decomposition, and are giving off ammonia, with that peculiarly offensive vapour which I have already described. The water near to the shore is still more offensive from sewage and corrupting mud, but it does not contain so large a proportion of solid saline matter. This, compared with the mean of all experiments made during the last seven of last summer, shows that the river is not yet charged to so high a degree as it was then; for the average proportion of solid matter in the water at London Bridge was 166 grains per gallon: at Blackfriars, 154 grains; at Hungerford, 116; at Westminster, 118; at Vauxhall, 67; at Chelsea, 84; and at places between Chelsea and Isleworth it was from 33 to 17 grains. It may therefore be concluded that 17 grains per gallon is the amount of solid matter naturally contained in the inland water of the Thames; but as the stream flows downwards, and gets the sewage of the metropolis and the tidal current of the ocean, it rapidly becomes charged with impurities to the extent of from 166 grains per gallon to nearly 409, of which from 14 to 24 are dissolved organic matter. The last number in each case is the average of high water in mid stream at London Bridge, and the second at Greenwich. As it was last year, so also it is now—the water in the middle of the river is charged with the highest forms of infusorial life, but that which is near to the shore is poisonous to every living thing but vitriones, and the simplest of vegetable fungi."

THE MURDER AND SUICIDE IN ST. PANCRAS.—The inquest in the case of Elizabeth Cruft, who murdered her two children by cutting their throats, and afterwards committed suicide was concluded on Saturday. The evidence showed that her grandfather and three uncles had committed suicide, and that she was suffering from hereditary madness, though she was in all other respects a kind-hearted gentle creature. The jury found that "Mrs. Cruft inflicted the wounds on her children and herself, not being in a sound state of mind at the time." The Coroner made some forcible observations on the imprudence and danger of young men contracting marriages with members of families where symptoms of lunacy had manifested themselves. Madness was hereditary, and it would surely display itself. Men inevitably made misery for themselves by contracting such marriages. A juror remarked that people did not generally think of such things. The Coroner said it was not that people did not think of such things, but unfortunately other feelings too frequently overpowered the judgment. The reasoning powers were not sufficient to overcome other feelings.

MURDER AT WALWORTH.—William Abraham Moore, a general dealer, late of Trafalgar Street, Walworth, for whose apprehension on a charge of murdering his wife a reward of 100*l.* had been offered by Government, was captured on Saturday evening, at Notting Hill. It appears that on the 23d ult Moore and his wife were among a few friends, when a young man, one of the party, who was paying his addresses to deceased's sister, kissed Mrs. Moore. A feeling of jealousy was consequently excited in the mind of Moore, ending in his determination to take the life of his wife. That night they slept in separate beds, and on the following morning he carried his design into execution by stabbing her in the lower part of the back, the wound causing her death. A coroner's jury found a verdict of Wilful Murder against him, and a warrant for his apprehension was accordingly issued. He however absconded immediately after the infliction of the fatal wound, and had not since entered the neighbourhood. On Saturday last he was seen at Notting Hill and information having been given to the police, he was taken into custody and conveyed to Carter Street station, Walworth Road, where he was again identified. On searching the prisoner a letter which had been torn asunder was found upon him, with an empty phial and sixpence. The letter was addressed to his mother, and set forth that he had committed an act against God but not against man, and that his wife was too indiscreet to entertain the proper feelings between man and woman. It further stated that when she would be in possession of that letter he would be no more, as it was really necessary that he should commit suicide. After expressing his good wishes for the welfare of his children, the letter concluded by subscribing himself her unhappy son. On the presentation of this letter Moore remarked that it was only by strong persuasion that he had not carried his design into execution, which would have prevented his presence there. The charge being entered against him he was conducted to a cell, a constable remaining with him. On Sunday he appeared in a very desponding mood, and spoke but little. He was brought up on Monday for examination at the Lambeth Police Court and remanded to a future day.

THE PUBLIC HEALTH.—The Registrar-General's report states that the deaths in London in the week that ended Saturday, June 18, were 913. In the corresponding week of the 10 years 1849-58 the average number was 973; which, it raised in proportion to the

increase of population, becomes 1070. The return of last week was therefore 157 below the average. During the week the births of 852 boys and 841 girls, in all 1693 children, were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1470.

## Provincial.

BRADFORD.—A burglary was committed on Saturday morning in a lonely farmhouse, called the Ing Head, occupied by a young woman named Sarah Gledhill. For the last five months, since her father's death, Miss Gledhill has been the only occupant of the house. On Saturday morning she was awakened by a noise at the parlour window. She immediately rose, and, while hastily dressing, a man came across the parlour, and as he stood before her she demanded what he wanted. He answered that he was on his way to Halifax, and that he had come for money, and intended to have it. He then seized Miss Gledhill roughly by the throat, and demanded her money. She offered a firm resistance, and called aloud for "Jane," an old woman who chanced on that night to be sleeping in the house. The burglar, evidently disconcerted by the presence of another person, instantly withdrew his grasp, and beat a hasty retreat. Miss Gledhill seized the poker, but the burglar hastily turned upon her, and, after a violent struggle, disarmed and threw her with great violence against the wall on one side of the room. He then disappeared, taking with him the poker. Miss Gledhill saw his features by the light of the moon, and felt satisfied that she knew the burglar. On Saturday evening she proceeded to this town, in company with a police officer, in search of the delinquent. He was immediately recognised from the description by an officer of the borough police, and in a very short time an Irishman, who gave his name as James Renza, was apprehended, and identified by Miss Gledhill as the burglar. On Saturday night he was lodged in the Court House, and on Sunday morning he hung himself in the cell. The gaoler, on going to the cell at the next hour, discovered him suspended by a neckerchief to a ring in the wall. On Monday the coroner held an inquest on the body, and the jury returned a verdict of *Felo de se*.

CHATHAM.—A murder was attempted on Sunday morning in this town from motives of jealousy. A man named Masters had until lately been for some time living with a woman of disreputable character, who was known to have a husband still living. Another man named Wilkins, with whom she had before been intimate, recently came to Chatham, and induced her to leave Masters and return to him. Masters then conceived the most deadly animosity towards Wilkins, and has frequently been heard to make use of threatening language towards him. On Saturday night Wilkins, Masters, and the woman were at a public-house in High Street, drinking together. Wilkins and the woman after a time went away to a beer-house in Skinner Street, and remained drinking there for some time. During the time they were in the beer-house Masters was standing outside the back of the house, as if waiting for them to come out. Nothing more was seen of him, but about 3 o'clock the woman was awoke by blood trickling over her, when to her horror she discovered Wilkins lying by her side with his throat cut from ear to ear, and apparently dead. The window of the room in which they were sleeping was wide open, and it was evident that the person who had committed the act had entered and escaped by that means. The police were soon on the spot, and Wilkins, who gave signs of life, was at once removed to the Naval Hospital, where the wound was sown up, but from the frightful gash inflicted but small hopes are held out of his recovery. Up to the present time Masters has not been apprehended, though he appears to be well known to the police.

LIVERPOOL.—On Saturday, at the Borough Police Court, four gentlemen, natives of Chili, named Manuel Matta Anjal and Custodio Gallo (both members of the Chilian Parliament), Guillemo Matta, and Benjamini Mackenna, the latter a gentleman of Irish descent and editor and proprietor of the *Aramblad Constitujenta*, published at Santiago, applied for a warrant against the captain of the ship Louisa Braginton, of Bideford, which arrived in the Mersey on Thursday night from Valparaiso, for false imprisonment and illegal detention. Mr. Mackenna stated that the other three gentlemen and himself, differing in some political views from the Chilian Government, were arrested on December 19 at Santiago, and remained so until March 9, when they were taken to Valparaiso, and there shipped on board the Louisa Braginton, the captain of which had been paid 3000 dollars for their passage, on condition that he landed them in England. They were escorted about 15 miles out to sea by a Chilian war steamer. On that vessel leaving them they remonstrated with the captain, offered to pay him 3000 dollars if he would land them at some Peruvian port, and even proffered to indemnify him against all risk by an extra 1500 dollars. He refused, and the consequence was they were carried to England against their will. Whilst on the voyage they were ill-treated, their provisions were of the coarsest kind, and altogether the treatment they were subjected to was unbecoming and ungentlemanly. They therefore sought a remedy against this illegal conduct of a British captain. Mr. Mansfield asked why they did not apply to a superior court on such an important matter? Mr. Aspinall on their behalf replied that the term was over, and the case was pressing. Mr. Mansfield said he recollected a similar case in which the late Marquis of Waterford carried off a returning-officer from Ireland to Denmark on the eve of an election. He granted a summons for the appearance of Captain Leslie, the master of the ship. On Wednesday the captain appeared in answer to the charge, when the magistrate after hearing the evidence said he should not, in a case of such great magnitude, where so many points of international law were raised, arrogate to himself the right to decide it, but send it to the assizes. There had been no assault at all. The real thing was false imprisonment, and it must be borne in mind that the complainants had been in the custody of the defendant for 98 days. The defendant was then ordered to enter into recognizances to appear at the assizes himself in 600*l*., and two sureties in 300*l*. each.

PORTSMOUTH.—The adjourned inquest on the persons killed by the explosion of the Eastern Monarch was resumed last week, when the jury also returned a verdict of "Manslaughter" against Charles Gardner, the steward. The coroner immediately made out his warrant for his committal to Winchester Gaol, to take his trial at the ensuing assizes.

WATCHET.—A fatal boat accident by which several persons were drowned occurred off Watchet, a pretty little watering-place on the Somersetshire coast, on Tuesday week. A steam-packet named the Neath Abbey was advertised for a Whitsuntide holiday excursion of two days to Minehead and Watchet, and, the weather proving particularly favourable, a large number of persons availed themselves of the opportunity which it offered. The packet when she left this city was crowded with persons of both sexes, of all ages, and of different grades in life. The coast slopes out so gently at Watchet that vesseis of much burthen cannot run in near the shore, and passengers have to be landed and re-embarked by means of boats. The landing was effected safely, and the passengers remained ashore during the night. On Tuesday afternoon when the time arrived for rejoining the ship, the boats, all of them well filled, were put off from the beach, and after they had stood out for some distance it was found that two of them were unseaworthy and were filling fast. The persons who were in one of them succeeded in getting to a sort of reef which lies off some distance from the beach, and were thus enabled to keep above water until boats could be put off to their rescue. The second boat, containing about 14 persons, was less fortunate. The poor creatures were observed frantically waving their hands and making other signs of distress, and their screams could be heard both from the vessel and the shore. Boats were despatched from the steamer and from the shore with all possible despatch, but before they could reach the leaky boat, which was half a mile from them, she sank with all that were in her. The boats succeeded, after the most strenuous exertions, in picking up eight of those who had been thrown into the water, but one of that number, who was unconscious when taken into the boat, died a short time afterwards, in consequence of the injudicious mode of treatment adopted by the boatmen for his resuscitation. The greatest excitement prevailed both on board the steamer and on shore at the time of the accident, and crowds of the inhabitants of the town were speedily upon the spot. The passengers who remained on shore refused to embark, and the steamer proceeded to Bristol without them. Captain Mear, of the Somerset constabulary, superintended the efforts that were made to recover the bodies of those who had been drowned, and these as they were brought ashore were promptly attended by two surgeons, with a view to restore animation. The number of bodies recovered was six, and it is believed that these were all who were drowned, although for want of accurate information as to the number of persons in the boat at the time of the accident it is impossible to say how many lives were lost. The bodies were all placed in shells and subsequently identified. The following is a list of the persons who have been drowned, but whose bodies have been recovered:—James Lewis, market gardener, Bristol; Susan Lewis, his wife; George Mogg, of Bristol; Henry Larkham, jun., Wellington Street, Cathay; Samuel Venn, jun., porter in the goods department of the Bristol station of the Great Western Railway; Sarah Seymour, a young woman employed at the establishment of Messrs. Robinson, stationers, Redcliff Street. With the exception of Sarah Seymour the whole of these persons were natives of Watchet or of the parish of Quantoxhead, and had been visiting their friends in that locality. The persons who were rescued from the sinking boat, and who are all now suffering more or less in consequence of the accident, were—George Lackham, sen., Jane Mogg, Edwin Edwards, Amos Greenslade, — Burton, George Wedlake, and Alfred Short. An inquest has been held upon the sufferers at which the jury returned a verdict of "Manslaughter" against George Wedlake and Alfred Short, who had charge of the boat which foundered with the persons who were drowned.

WEST BROMWICH.—The statement of the result of the inquest on the body of a woman named Worsey, who was killed by her husband on Saturday week, was not correct. The jury found a verdict of Wilful Murder against the prisoner, and not of Manslaughter, as previously announced.

## Ireland.

THE QUEEN'S VISIT TO IRELAND.—It is reported in Dublin that her Majesty will visit Ireland at the commencement of her autumnal trip; and will then proceed by sea to Scotland in the same manner as on the occasion of the first visit. In anticipation of this visit, all the available troops in the country, artillery, cavalry, and infantry, will shortly be congregated for a grand review at the Curragh.

THE IRISH COURT.—The farewell levee of the Earl of Eglintoun will take place on Monday the 4th of July, on which day the noble earl takes his departure from Ireland.

THE LAW APPOINTMENTS.—The Right Hon. Maziere Brady has been re-appointed to the office of Lord Chancellor, which he has already held under two Cabinets. It is said that the serjeancy about to be vacated by Mr. Deasy, on his appointment to the post of Solicitor-General, will be conferred on Mr. Thomas O'Hagan, Q.C., chairman of the county of Dublin, and that Mr. George Henry Hughes, who filled the higher office during the premiership of Lord John Russell, and who could not, therefore, accept an inferior distinction, will within a month, or perhaps less, be elevated to a high judicial office. It is also stated that Judge Plunket, the second judge of the Court of Bankruptcy, sent his resignation on Saturday to Lord Eglinton, but that his excellency declined to receive it, and intimated to the learned judge that it should be dealt with by his successor in the viceroyalty.

ARCHBISHOP CULLEN'S PASTORAL.—Dr. Cullen has issued a long pastoral address to the Roman Catholic clergy of the diocese of Dublin, in which he thus notices the condition of affairs in Italy:—

"Italy, the cradle of European civilisation, the hallowed residence of Christ's Vicar on earth, the birthplace of innumerable saints and Christian heroes, appears doomed to pass through the furnace of affliction; many of her proud monuments of art will be destroyed, her cities perhaps laid waste, and her beautiful and fertile fields reduced to a desolate wilderness. Perhaps, also, she may become a prey to more than infinitely worse than physical sufferings. Piedmont has long for many years the den and refuge of revolutionists and disturbers and enemies of the peace of the world. The men who have had the power of that country in their hands have displayed the greatest hostility against the Catholic religion to which the people of that country are devotedly attached. They have persecuted and banished some most venerable bishops, and subjected the Church to an irksome slavery. Convents and monasteries have been suppressed, and the pious inmates treated with the greatest harshness. Church property has been confiscated, public education has been rendered dangerous, and, in some cases, open enemies of religion have been placed at the head of universities and entrusted with the instruction of youth. In fine, under the hypocritical pretence of introducing liberty, a system of the direst persecution has been established. If the principles of a handful of men, who have inflicted such evils on their own country and have outraged the feelings of its inhabitants, should be propagated by war, not only religion, but human society will sustain the greatest loss, and other States will have to undergo the same sad ordeal to which the unhappy inhabitants of Piedmont have been subjected during the last ten years. While such dangers are impending, there is one State to which all Catholics must turn their eyes with peculiar interest—I mean Rome and its territory, whose tranquillity is so necessary for the administration of the affairs of the universal Church. Promises have been made of a most decided character that the Pope's states shall not be interfered with; but even if they be disturbed by the enemies of the Holy See, we may rest assured that God, who watches over his Church, though he may allow her ministers to suffer trials and persecution, will turn all such sufferings to his greater honour and glory, and to the advantage of religion. Indeed, if we review the history of the Church in past ages, we shall find that all those who have sacrilegious hands on the property and States of the Church have invariably incurred the severest punishment of Heaven, and many will recollect that, even in our own days, the greatest conqueror and emperor of modern times, soon after usurped the dominion of Rome, was compelled to sign an abdication in the palace of Fontainebleau, the very prison in which he had kept the holy Pope Pius VII in close confinement. We therefore entertain no fears for the safety and final triumph of the Church and its chief pastor; but we are to join in fervent prayer, begging of God to avert the miseries and calamities of war, to preserve his Church and Supreme Pontiff from trials and afflictions, to restore peace and harmony among Christian nations, and to spread God's kingdom on earth. Let us also pray that the peace which empire has so long enjoyed may never be interrupted by sin, the occasion of all the evils that afflict mankind, may cease to abound; that heresy and schism, infidelity and the fruitful sources of so many unhappy dissensions, and of many evils in the world, may be suppressed, and that religion and virtue may spread and flourish and adorn the earth."

ROMAN CATHOLIC MOVEMENTS.—A meeting of the Roman Catholic prelates, to take into consideration the present state of the education question, and to devise means for obtaining for Ireland the "great benefit and blessing of free Catholic education," is to be held in the course of a few days. The Limerick paper publishes an address to the Irish Liberal members, signed by Archbishop Leahy (Cashel) and 105 of his clergy, calling upon them to unite in demanding a settlement of the land question, the institution of vote by ballot, free Catholic education, an alteration in the Poor Law, and a charter for Dr. Cullen's University. The same prelate has published a pastoral in reference to the war, in which he says:

"We may abide the issue without any fear for the glory of our Father—nay, with the full confidence that God will turn it to the glory of His name; for, looking at the course of Divine providence, particularly to the special care He has taken of the Holy See in the worst of times, we may without rashness predict that at the conclusion of this war, whenever it comes, although some who now march at the head of victorious armies may be humbled and fallen, Rome will still remain, and the States of the Church will remain, and the successor of Peter will remain holding mild sway over earth."

## Scotland.

THE BIBLE IN INDIA.—A numerously attended meeting was held at Edinburgh on Friday, to petition Parliament for the removal of the prohibition of the Bible in the Government schools in India. The Lord Provost presided. A letter was read from the Marquis of Tweeddale, ex-Governor of Madras, expressing strong concurrence with the views of Sir John Lawrence

regard to voluntary Bible classes in the Government schools in India, and adding :—"I cannot help thinking that the peaceable and orderly conduct of the inhabitants and the loyalty of the native army in the Madras Presidency, where Christianity has really made progress, show how little the native mind is affected by the conversion of their countrymen to Christianity." Resolutions were passed, and a petition was adopted praying Parliament to take measures for removing the authoritative exclusion of the Word of God from the system of education pursued in the Government schools in India.

## Law.

COURT OF QUEEN'S BENCH.—*Ruck* v. *Stilwell and another.*—This case was tried before Mr. Justice Hill and a special jury, and occupied the Court for three days. It was an action brought by Mr. Ruck, formerly a patient of Moorcroft Asylum, near Uxbridge, who was liberated upon being declared sane by a jury on the 27th August last, against Dr. Stilwell and others, for assault and illegal detention in Moorcroft Asylum. For the plaintiff, it was alleged that he had been illegally assaulted and imprisoned among lunatics for 10 months; that defendants were the keepers of the house in which he had been confined, and that they had received him upon the order of his wife, and under two medical certificates; that while the plaintiff was under charge of defendants he recovered, and that they neglected the duty which devolved upon them of communicating this fact to the wife and to the Commissioners in Lunacy. The defendants denied the material allegations. To prove the assault it was necessary to impugn the validity of the medical certificates, and this was done by proving that Dr. Conolly, by whom one of them had been granted, had a compact with Dr. Stilwell, under which he received 15 per cent. on all payments made on behalf of the patients in Moorcroft Asylum, and in particular that on account of Mr. Ruck he had received 15*l*., being one quarter's commission. On inquiry, Mr. Ruck could not have been removed from the asylum by *habeas corpus*, because the certificates had the appearance of being regular; being a "private" patient, he could not be removed by the Commissioners in Lunacy without the consent of his wife, by whose order he had been confined; and the only means by which he could regain his liberty was by the legal proceedings adopted by his agents, which proved successful, and so paved the way for this action. The jury by their verdict found that Dr. Conolly's certificate was invalid, because he was the regular medical attendant of the establishment and received commissions on the receipts, the defendants (the proprietors) being aware of these facts when they received his certificate. They therefore gave a verdict of 500*l*. damages in favour of the plaintiff.

## Obituary.

VICE-ADMIRAL SIR DAVID DUNN, K.C.H., died on the 16th inst. at Rocklands, near Chudleigh, Devon, in his 73d year. He served as a midshipman on board the Donegal, at the battle of St. Domingo, and obtained his commander's rank for his services on board the Amphion frigate at the defeat of a French squadron in the Adriatic on the 13th March, 1811. He was subsequently distinguished on the Mediterranean station, particularly at the siege of Trieste, and the attack on Leghorn in 1813. He became Vice-Admiral on the reserved list in 1856, and received a good service pension.

MR. JACOB BELL died on the 12th inst. at Tunbridge Wells in his 49th year, after a long and painful illness. He was one of the most eminent dispensing chemists in England, and spent a fortune in starting and in advancing the Pharmaceutical Society, which has raised enormously the educational standard of the class. He was the president of the society, and it is some proof of the estimation in which he was held, not only in his profession but throughout the district where he resided, that on the day of his funeral there was scarcely a town in the kingdom in which some "Pharmaceutical chemist" had not his shutters closed to mark the event. Subsidiary to the professional views which were the absorbing object of his life, Mr. Jacob Bell was a most generous patron of the arts, and had collected in his house at Langham Place a very valuable gallery of pictures, the best of which he has bequeathed to the nation. Among them are the following by Sir Edwin Landseer:—"The Maid and the Magpie," exhibited last year at the Royal Academy; the celebrated picture of the "Shoeing," "The Sleeping Bloodhound," "Alexander and Diogenes," "Dignity and Impudence," and the "Defeat of Comus." In addition to these there is "The Sacking of a Jew's House," by Mr. Charles Landseer; two landscapes in which Messrs. Lee and Sidney Cooper have united their efforts; there is Mr. O'Neil's picture of "The Foundling examined by the Board of Guardians;" one of Mr. Ward's best historical works—"James II. receiving the news of the Landing of the Prince of Orange;" the "Derby Day" of Mr. Frith, and the "Horse Fair" of Rosa Bonheur, a small edition of the large picture with which everybody is familiar, and painted simultaneously. There are 13 pictures, and the commission for a 14th has been given to Mr. Frank Stone. In this bequest the public have received a most valuable gift, and the testator has attached no conditions to the acceptance of his legacy.

BIRTHS.—On the 19th inst, at 12, Hyde-park Street, the Lady ELINOR CAVENDISH, of a son—20th inst, at Horton Manor, Bucks, Lady YARDLEY, of a daughter—16th inst, at Inverness, the Hon. Mrs. ARTHUR EVANS, of a daughter—16th inst, at Clifton, York, the Hon. Mrs. CHARLES ST. CLAIR, of a daughter—16th inst, at Rokeby Rectory, Yorkshire, the wife of the Rev. GEORGE A. TREVOR, of a son.

MARRIAGES.—On the 15th inst., at 6, Moray Place, Edinburgh, Captain GEORGE SINCLAIR, of the Bengal army, second son of Sir John Sinclair, Bart., of Dunbeath, to AGNES, only daughter of the late JOHN LEARMONTH, Esq., of Dean—31st ult, at Houghton, near Dover, the Rev. JOSEPH WILKINSON, curate of Christ Church, Houghton-in-Dover, youngest son of Charles Wilkinson, Esq., of Tunbridge Wells, to WILHELMINA CATHERINE TRACEY, youngest daughter of the late Sir DAVID JAMES HAMILTON DICKSON—21st inst, at the Cathedral of St. George's, Southwark, according to the rites of the Catholic Church, D. W. MITCHELL, Esq., of Barton Manor, Beds, to GERTRUDE EMILY, youngest daughter of the late JOSEPH A. DE LAUTOUR, Esq., of Hexton House, Herts, and Windeford House, Hampshire—13th inst, in London, Major CHARLES EDWARD MANSFIELD, to ANNIE MARGARET ELIZA, second daughter of the late Colonel the Hon. AUGUSTUS ELLIS—7th inst, at Viewfield House, near Nairn, N.B., HENRY ROSE, Esq., H.M. Bengal Civil Service, son of General Sir John Rose, K.C.B., of Holme, Inverness, to JAMESINA, daughter of JAMES A. GRANT, Esq., of Viewfield—16th inst, at Cologne, WILLIAM GAGE BLAKE, Esq., second son of Sir Henry Blake, Bart., of Ashfield Lodge, Suffolk to MARY, eldest surviving daughter of the Rev. JAMES T BENNET, Rector of Cheveley, Cambridgeshire—16th inst, at Calbourne, in the Isle of Wight, EDWARD WILKES WAND, Esq., son of Edward Wand, Esq., of Manston Hall, Leeds, to ELIZABETH, eldest daughter of the Hon. WM. A'COURT HOLMES, of Westover, in the Isle of Wight.

DEATHS.—On the 19th inst, at 42, Moray Place, Edinburgh, MARION, wife of JAMES ANSTRUTHER, Esq., W.S., and daughter of the late Right Hon. Sir John Anstruther, Chief Justice of Bengal—At the Governor's residence, Royal Military College, MONTAGU HORNSBY JONES, Ensign 34th Regiment, fifth son of Major-General Sir Harry Jones, K.C.B., aged 20—19th inst, at Richmond, the Hon. ROSALINDA ELEANOR MARSHALL, relict of Lieutenant-Colonel Marshall late 31st Regiment, and daughter of the late, and sister to the present, Lord Dunboyne, aged 58—18th inst, at NEWICK PARK, the seat of his brother-in-law, James H Schalch, Esq., Lieutenant-Colonel WILLIAM BASSETT SAUNDERSON—19th inst, at Curzon Street, Mayfair, LYDIA LADY SCOTT, widow of the late Sir Edward Scott, Bart., of Great Barr, Staffordshire, aged 50—7th inst, MARGARET, wife of HENRY PIGOTT, Esq., of Eagle Hill, Galway, and eldest daughter of the late Sir Scrope Bernard-Morland, Bart.—17th inst, at Clifton, of consumption, WILLIAM STRATFORD SLEIGH, late Captain 6th Inniskilling Dragoons, only surviving son of General Sir James Wallace Sleigh, K.C.B., of 58, Westbourne Terrace, Hyde Park, aged 24—15th November last, at Ballarat, Australia, HEATON, fourth son of the late Sir WILLIAM and Lady SARAH CHAMPION DE CRESPIGNY, aged 62—15th inst, at Shrewsbury, Lady EDWARDES, widow of the Rev Sir John Cholmondeley Edwardes, Bart., aged 95—13th inst, WILLIAM FAIRLIE CUNNINGHAM, son of the late Capt. William Cunningham, 44th Regiment Madras N.I., grandson of Major-General Andrew Harvey, C.B., and nephew of the late Sir Charles Cunningham Fairlie, Bart., aged 22—4th inst, at sea, on board the mail packet Ethiope, of yellow fever, WILLIAM HENDERSON THESIGER, Commander R.N., aged 27—Lost on board H.M.S. Heron, when that vessel sank off the coast of Africa, on the 9th May, Lieutenant THOMAS HAGGERSTON COLLINGWOOD, fourth (and third surviving) son of the late H. J. W. Collingwood, Esq., of Lilburn Tower and Cornhill House, Northumberland, age 28—Lost in H.M.S. Heron, on the west coast of Africa, WILLIAM SEALE EDWARD FREEMAN, Paymaster Royal Navy, eldest son of W. L. Freeman, Esq., R.N., of H.M.'s Dockyard, Sheerness, aged 28—14th inst, in Hugh Street, Pimlico, EDWARD GANDY, Esq., youngest son of the late Rev. John Gandy, vicar of St. Andrew's, Plymouth, and formerly of the Admiralty, Somerset House, where he had served her Majesty and her three predecessors for nearly 50 years—15th inst, at Bruges, PATRICK LYNCH, Esq., late of Tara Hall, county Meath, and of Rathtarmon, Sligo, aged 69—16th inst, at Ilfracombe, by a fall from the Cliff, WILLIAM BLATHWAYT, an Ensign in the 83d Regiment, youngest son of Colonel Blathwayt, of Dyrham Park, Gloucestershire, aged 20.—14th inst, at Jersey, Mr. BERNARD SAUNDERS, of Alphington, Devonshire, aged 67.

## Markets.

### COVENT GARDEN.—June 23.

Good Grapes still realise comparatively high prices. Strawberries are now plentiful and cheap. Pine Apples maintain former quotations. English Cherries are now pretty plentiful. Oranges fetch 8s. 6d. and 10s. per 100. Nuts of all kinds continue to realise fair prices. Cabbages and French Beans are plentiful. Rhubarb, Asparagus, and Seakale are getting over. Peas, Beans, Horn Carrots, and Globe Artichokes may be obtained in quantity. Cauliflowers are cheaper. New Potatoes realise from 6s. to 15s. per cwt. Cucumbers abundant. Cut flowers chiefly consist of Orchids, Gardenias, Heliotropes, Lily of the Valley, Violets, Mignonette, Heaths, and Roses.

FRUIT.

| | |
|---|---|
| Pine Apples, per lb., 5s to 8s | Cherries, per lb., 6d to 1s 6d |
| Grapes, per lb, 4s to 8s | Apples, per doz., 6s to 10s |
| Strawberries, p. lb., 6d to 2s | Pears, per doz., 6s to 12s |
| Melons, each, 4s to 6s | — stewing, p. doz., 2s 6d to 5s |
| Peaches and Nectarines, per doz., 8s to 12s | Oranges, per 100, 6s to 10s |
| Figs, per doz., 6s to 8s | Lemons, per doz., 1s to 1s 6d |
| | Cobs, per lb., 1s 6d to 1s 6d |

VEGETABLES.

| | |
|---|---|
| Cauliflowers, per doz. 2s to 4s | Cucumbers, p. doz., 2s to 6s |
| Green Peas, p. quart, 1s to 2s | Tomatoes, per doz., 3s to 4s |
| Greens, per dozen bunches, 1s to 1s 6d | Artichokes, per doz., 4s to 6s |
| Cabbages, do., 1s 6d to 2s 6d | Beet, per doz., 1s 6d to 2s |
| Asparagus, p. bundle, 2s 6d to 5s | Celery, p. bundle, 1s to 1s 6d |
| Rhubarb, p. bundle, 6d to 9d | Shallots, per lb., 6d to 8d |
| French Beans, p. pun., 1s to 1s 6d | Garlic, per lb., 6d to 8d |
| Potatoes, p. ton, 95s to 100s | Lettuces, Cabb., per score, 1s to 1s 6d |
| — per bus., 2s to 2s 9d | Endive, p. score, 1s to 1s 6 |
| — per cwt., 4s to 6s | Horse Radish, p. bun. 1s 6d to 4s |
| — new, per lb., 6d to 1s | Mushrooms, p. pott, 9d to 1s 3d |
| Carrots, per bunch, 1s | Parsley, p. 12 bunches, 2s to 4s |
| Turnips, per bunch, 9d to 1s | Savory, do., 2d to 4d |
| Spinach, p. sieve, 1s 6d to 2s | |

HOPS.—BOROUGH MARKET, FRIDAY, June 24.

Messrs. Pattenden & Smith report the accounts worse this morning from the Weald of Kent, Sussex, Worcester, and Farnham districts, and there is more disposition to buy Hops this morning. Duty 170,000*l*.

POTATOES.—SOUTHWARK, Monday, June 20.

During the past week the arrivals have been more than equal to the demand, and second-rate samples have only been saleable for cattle feed. As a few days will finish the old Potatoes at this market there will be no further report until September. The following are this day's quotations:—Yorkshire Regents, per ton, 60s. to 80s.; do. Flukes, 100s. to 140s.; Perth, Forfar, and Fifeshire Regents, 40s. to 70s.; do. Reds, 25s. to 30s.; Rocks, 30s. to 40s.; foreign whites, 25s to 50s.

BRITISH WOOLS.—LONDON, FRIDAY, June 24.

We have no new wool worth mentioning arrived at present, as farmers are busy shearing; prices consequently are not yet fixed.

METROPOLITAN CATTLE MARKET.

MONDAY, June 20.

The supply of Beasts is scarcely as good as on Monday last. Trade is very slow, however there is but little alteration in price. The number of Sheep and Lambs is considerably larger. Prices are lower for all descriptions, and several remain unsold. Trade is heavy for Calves. From Germany and Holland there are 137 Beasts, 2930 Sheep, and 245 Calves; from Spain, 197 Beasts; from Scotland, 200; and 2700 from Norfolk and Suffolk.

| | s | d | | s | d | | s | d | | s | d |

| | | | | | | Pigs | 3 | 8 | — | 4 | 8 |

Beasts, 3570; Sheep & Lambs, 30,540; Calves, 912; Pigs, 500.

THURSDAY, June 23.

The supply of Beasts is again short; trade is consequently active at fully late quotations. The number of Sheep and Lambs is about the same as on Thursday last, and the prices of that day are pretty generally realised, although trade is slow. We have a very large supply of Calves. Prices are lower. Our foreign supply consists of 95 Beasts, 2120 Sheep, and 410 Calves. Milch Cows 126.

MARK LANE.—MONDAY, June 20

The supply of Wheat from Essex and Kent to this morning's market was small, but added to that left over from last week made a good show; a tolerable clearance was effected at about 1s. to 2s. per qr. decline upon the prices of last Monday. Foreign attracted rather more attention, but without leading to more than a few retail sales, and we leave our quotations unaltered, but to have forced any quantity a reduction of many shillings would have been necessary. Good sweet Barley brings last week's prices, and out of conditioned parcels are very difficult of sale, and cheaper. Beans and Peas bring late rates. Oats are a heavy sale at barely the quotations of this day week. The top price of town-made Flour is reduced to 46s. per sack, and Norfolk brings 43s. per sack.

FRIDAY, June 24.

Although the weather since Friday last cannot be designated otherwise than fine, it has become less settled, and the country has been visited with occasional heavy showers. A somewhat improved tone has been observable in the Wheat trade. For English Wheat the full prices of last week have been obtainable, and an occasional sale both here and in some of the provincial markets was effected on slightly improved terms. Foreign has also commanded rather more attention, and it has been possible to force sales, although at very low prices, but at better rates than could have been obtained last week. Business has been transacted in Danzic at 52s. 6d., 53s., 54s., and 56s., new Konigsberg at 58s., Rostock at 48s. and per 496 lbs. In the value of spring corn no material change has taken place. The top price of Flour was reduced 1s. per sack on Monday, but prices for current marks remain much the same as last week. Of grain and seed laden vessels none have arrived off the coast during the week, and few transactions have occurred. The arrivals of Foreign Wheat and Flour this week have been to a fair extent, of all other grain very moderate. The attendance at this morning's market was small; the little English Wheat fresh up was disposed of at fully Monday's prices. Foreign was held very firmly, but its value (French excepted) being considerably above that of English, scarcely any business resulted. There is no alteration in the value of Barley, Beans, or Peas. Oats are in fair demand at the quotations of Monday. Norfolk Flour is held for rather more money.

ARRIVALS FROM JUNE 20 TO JUNE 24.

| | Wheat. | Barley. | Oats. | Flour. |
|---|---|---|---|---|
| English | 1020 qrs. | — qrs. | 240 qrs. | 1090 sks. |
| Irish | — ,, | — ,, | 1000 ,, | — ,, |
| Foreign | 11130 ,, | 2910 ,, | 8920 ,, | 3110 ,, / — brls. |

LIVERPOOL, Tuesday, June 21.—We had rather a better attendance at our market, and for prime qualities of red Wheat there was a fair inquiry, and an advance of 2d. per cental obtained over the prices of this day se'nnight. Flour was also in improved request, though buyers were indisposed to give any increased price, and but little business consequently resulted. Oats and meal both very dull, and about 2d lower. Beans and Barley unchanged. Indian Corn, attracted more attention and may be quoted 4d. dearer; say Galatz, 6s. 6d. Ibraila and mixed American 6s. 4d., and white 8s. 8d. per 100 lbs.

FRIDAY, June 24.—Market moderately attended. The improved tone of Tuesday continues, and without much business being done, the consumptive demand has slightly improved, and full prices have been realised.

## TO EMIGRANTS.

BRITISH COLUMBIA.—A Lady about to proceed *viâ* Cape Horn with her children to this rising Colony, wishes to meet with a respectable young WOMAN, who can be thoroughly well recommended, and who could not only assist in taking charge of the children, but render herself useful with her Needle during the voyage. A *free berth* in the Lady's own cabin is all that is offered for the passage, with board and lodging after arrival in the Colony, until the young woman shall have either entered the service of the Lady permanently or formed some other engagement. It is immaterial whether the young woman is married or not, all that is required being perfectly satisfactory references as to character, activity, and good temper, and the attendance and assistance above described in return for the passage that is offered.—Address, post paid, A. B., 5, Westbourne Place, Eaton Square, London, S.W.

AGRICULTURAL INSTRUCTION.—A Gentleman thoroughly acquainted with the science and practice of Farming, and residing near the sea coast in one of the best districts of Hampshire, has a vacancy in his house for the son of a gentleman desirous of instruction as above. Satisfactory references given and required.—Terms and further particulars may be obtained of Mr. THOMAS GEORGE GIBSON, Solicitor, 19, Gracechurch Street, London.

TO AGRICULTURISTS.—A young Man, respectably connected, with some experience in Agriculture, wishing to improve himself before taking a Farm on his own account, is desirous of meeting with a situation where his active services on the Farm would be considered equivalent to his board and lodging.—L.M., Post Office, Bovey Tracey, Devon.

WANTED, AS HEAD GARDENER, a respectable Man, of good character, from the country.—Apply by letter, with full particulars as to ability, wages, &c., to C. E. KINGSTONE, Esq, 98, Bishopsgate Street Within.

WANTED, AS HEAD GARDENER, who thoroughly understands Forcing Grapes, Peaches, Strawberries, &c., and the management of Flower and Kitchen Gardens. A Man with a large family objected to.—Address, stating wages and all other particulars, to A. Z., 22, Dover Street, Piccadilly.

WANTED, A HEAD GARDENER in the country, about 70 miles west of London. He will have three men under him. To take charge of the Houses, Kitchen Garden, and House Garden; the whole about three acres. He must have lived in a similar situation, and not only fully understand his profession in all its branches, but take a delight in having all things under his charge in good order. Must be a married man; a cottage will be found. State age, wages, his last situation, how long he remained in it, when he left, and why.—Address (post paid) A B., Mr. Bascourt, 19, Mortimer Street, Cavendish Square, London.

WANTED, AS GARDENER, a Young Man, about 25 years of age. He must be well recommended for activity, and be acquainted with care of Vineries, Early and Late, and a good Mower. Wages 1*l.* per week.—Apply personally, or by letter, to A. Z., 57, Coal Exchange, London.

WANTED, a respectable, active Man, who is a good and practical GARDENER; he must understand thoroughly every department. Also a young Man as UNDER GARDENER in the same place. He must have a general knowledge of Gardening, must have recommendation for neatness as well as good character in other respects, and be able to Milk in case of need. It is requested that no application be made for either situation by any one who cannot be strongly recommended by letter stating qualifications and requirements to A., Messrs. Moore & Co., 34, Lime Street, City.

WANTED, A PROPAGATOR, who thoroughly understands his profession, and can have a good character for sobriety and honesty.—Apply to OSBORN & SONS, Fulham Nursery, near London.

WANTED, a Man as PROPAGATOR, and to do the work of a small Nursery. Must be well experienced in the general routine of nursery work. State wages required.—E. T., 2, Melvill Terrace, South Street, Greenwich, Kent.

WANTED, AS CLERK AND BOOKKEEPER, a steady respectable Man, in a large Seed establishment. He must have a good knowledge of the trade, as he will have to assist when required at the counter.—Apply with references, which must be unexceptionable, to K. P., *Gardeners' Chronicle* Office.

WANTED, AS HEAD SHOPMAN AND CLERK, a sharp industrious Man, having a thorough knowledge of the Seed Business in every department. He must have a good address, be of an active pushing disposition, and prepared to enter on the duties of his situation with spirit. As the salary to be given is liberal, no one need apply who cannot produce the most satisfactory references to character and ability.—Applications (confidential) with full particulars to be addressed to X. O., *Gardeners' Chronicle* Office.

WANTED, a respectable Man, of good character and address, and who has been accustomed to assist in a SEED SHOP, and would make himself generally useful. Situation permanent.—Apply personally, 154, Kingsland Road, London.

WANTED, in a family residing a few miles from London, a MAN and WIFE, the former to take charge of a Pony, Cow, and Garden; the latter as General Servant. A NURSEMAID wanted in the same family.—Address, stating age and wages expected, J. B. G., Post Office, 1, Broad Street, Bloomsbury, W. C.

## WANT PLACES.—Letters to be Post Paid.

GARDENER (HEAD).—Age 30, unmarried; understands the management of Pines, Vines, and Peaches, the Forcing of Fruits, Flowers, Vegetables, &c.—C. C., 5, Streatham Hill, Brixton.

GARDENER (HEAD).—Age 30, married, no incumbrance; understands all sorts of Early and Late Forcing, Fruit, Flowers, and Vegetables; also Flower and Kitchen Gardens. Good character.—F. R., Mr. Hooke's, Stationer, Guildford.

GARDENER (HEAD).—Married, without incumbrance; perfectly understands his profession in its separate branches. Seven years' good character from last place.—A. B., Post Office, Little Sussex Place, Hyde Park Gardens.

GARDENER (HEAD).—Age 32, married; thoroughly practical and methodical in every branch of his profession. Can have an excellent character from the gentleman he last served, who expresses regret at his leaving. Wife can take charge of Dairy or Poultry if required.—F. D., 4, Providence Row, Waltham Green.

GARDENER (HEAD OR SINGLE-HANDED).—Age 26, single; has a practical knowledge of Gardening in all its branches. Unexceptionable references.—M. A. R., Post Office, Cobham, Surrey.

GARDENER (HEAD OR SINGLE-HANDED).—Single, active, and strictly sober; understands Early and Late Forcing, Grapes, Greenhouse, and Frames, Flower and Kitchen Gardens. No objection to a little Stock. Can have a good character.—J. P. S., Calverley Library, Tunbridge Wells.

### IRELAND.

GARDENER (HEAD) AND STEWARD.—An Englishman (married, without incumbrance); thoroughly conversant with the management of a nobleman's Estate, the Laying out of Pleasure Grounds, Plantations, &c., and the Early and Late Forcing of Fruit, Flowers, and Vegetables. Leaving his present situation in a nobleman's family (which he has filled for a considerable time), on his own account; testimonials unexceptionable.—ALPHA, 2, Oxmantown Mall, Parsons Town, King's Co.

GARDENER (SINGLE-HANDED).—A young Man, with a thorough practical knowledge of his profession. Good character.—J. PATRICK, West Parade, Spring Bank, Hull.

GARDENER OR FOREMAN in a gentleman's Garden.—Age 24, married, no incumbrance. Two and a half years in last place. Good character.—J. T. A., W. H. Wheeler's, Florist, Farnham, Surrey.

GARDENER (FOREMAN).—Age 23, single; wishes to engage in a good establishment; is well acquainted with Forcing, &c., and has a good general knowledge of his profession. Good testimonials.—J. S., 42, Faulkner Street, Chester.

GARDENER AND BAILIFF.—Experienced in the general management of an Estate, chiefly on light lands, Breeding and Rearing Stock, Marketing, Measuring and Sale of Timber, Collecting of Rents, &c. Excellent references.—J. K., 2, Anerley Vale, Upper Norwood, Surrey.

GARDENER.—Middle-aged, married, without incumbrance; thoroughly understands his profession; also Land. Three years' good character.—M. P., Barker's Library, Hammersmith, W.

GARDENER (UNDER).—Age 21; has a thorough knowledge of Hard-wooded Plants. Good character.—J. M., Mr. Forsyth's Nursery, Rectory Road, Stoke Newington.

FOREMAN AND PROPAGATOR (House Department).—AMOS MAY, Chiswick Nursery, near London, W.

PROPAGATOR, OR FOREMAN AND PROPAGATOR.—Hard and Soft wooded Plants, and expert at Grafting, Azaleas, Camellias, Coniferæ, Rhododendrons, and Roses. First class references as to abilities.—Messrs. OSBORN & SONS, Fulham Nursery, Fulham, S.W.

JOBBING GARDENER, FOREMAN, &c.—Steady, first-rate practical Man in Training, Budding, Layering, or anything else; Kitchen and Flower Gardens.—G. O. S., 3, Princess Road, Notting Hill, London.

### TO THE NURSERY AND SEED TRADE.

CLERK AND TRAVELLER.—Age 33; perfectly understands the business. Unexceptionable references.—S. J., *Gardeners' Chronicle* Office, Wellington St., Strand, London.

TO FARMERS.—If you wish to PRESERVE YOUR HAY, go to DAVIS & Co., 64, West Smithfield, E.C., where you may purchase a RICK CLOTH of the best material and workmanship, cheaper than at any house in London.

### WHY NOT PRESERVE YOUR HAY?

### SIXTY YEARS OF SUCCESS

HAVE PROVED BEYOND QUESTION THAT

ROWLANDS' MACASSAR OIL possesses extraordinary properties for promoting the growth and improving and beautifying the human hair. It prevents hair from falling off or turning grey, strengthens weak hair, cleanses it from scurf and dandriff, and makes it beautifully soft, pliable, and glossy. In the growth of the beard, whiskers, and mustachios, it is unfailing in its stimulative operation. For children it is especially recommended as forming the basis of a beautiful head of hair, while its introduction into the Nursery of Royalty, and the numerous testimonials constantly received of its efficacy, afford the best and surest proofs of its merits.—Price 3*s.* 6*d.* and 7*s.*; Family bottles (equal to four small), 10*s* 6*d.*; and double that size, 21*s.*—CAUTION. On the wrapper of each bottle are the words, "ROWLANDS' MACASSAR OIL," &c., in white letters, and their signature, "A. ROWLAND & Sons," in red ink.—Sold at 20, Hatton Garden, London, and by Chemists and Perfumers.

### FRUIT TREES, RIPE STRAWBERRIES, ETC.

R. WOODS, 94, Goswell Road, near the "Angel," Islington, London, E.C. Priced Lists can be had on application.

Please notice the Address—94, Goswell Road.

### GUTTA PERCHA TUBING FOR WATERING GARDENS.

THE GUTTA PERCHA COMPANY have pleasure to acknowledge the receipt of the following

*Testimonial from* Mr. J. FARRAH, *Gr. to* BOSWELL MURRAY JALLAND, Esq., *of Holderness House, near Hull.*

"I have had 400 feet of your Gutta Percha Tubing in lengths of 100 feet each, with union joint, in use for 12 months for watering these gardens, and I find it to answer better than anything I have ever yet tried. The pressure of the water is very considerable, but this has not the slightest effect on the tubing. I consider this tubing to be a valuable invention for Gardeners, inasmuch as it enables me to water our gardens in about one-half the time, and with about half the labour required."

Manufactured by the Gutta Percha Company, Patentees, 18, Wharf Road, City Road, London, and sold by their Wholesale Dealers in town and country.

# The Gardeners' Chronicle Newspaper.

*SATURDAY, JULY 2, 1859.*

| 1848 .. .. | £35,472 .. .. | £19,840 .. .. | £388,990 |
| 1853 .. .. | 113,612 .. .. | 49,128 .. .. | 620,896 |
| 1858 .. .. | 276,058 .. .. | 121,411 .. .. | 1,156,035 |

THE ANNUAL INCOME EXCEEDS 450,000*l.*

Policies expiring on MIDSUMMER DAY should be renewed before 9th July.

SWINTON BOULT, Secretary to the Company.

EDUCATION.—A YOUNG LADY 20 years of age and residing with her parents in the country, wishes (in consequence of reverse of fortune), to meet with a little girl or boy, with whose welfare and education she may be entrusted. A child possessing a taste for music would have great advantages. The family are of the Church of England.—Particulars, and the highest references will be given on application by letter to C. E., Post Office, Wolverhampton.

## News of the Week.

BOTH Houses of Parliament reassembled on Thursday after the recess rendered necessary by the change of Ministry. Earl GRANVILLE in the Lords, and Lord PALMERSTON in the Commons made the expected Ministerial statement respecting the intentions of the Government in regard to the Reform Bill and the war in Italy. Lord PALMERSTON said that having succeeded with the co-operation of Lord JOHN RUSSELL in forming a Ministry on principles and on a basis which would, he trusted, secure the support of the House and of the country, it had become their duty to consider what course they should recommend for the conduct of public business in the present state of affairs. Two great questions pressed upon their attention—one the state of our foreign relations, and the other that of the representation of the people. With regard to the first, they would follow the course chalked out by their predecessors, that of a strict neutrality, and at the same time would strengthen the defences of the country and avail themselves of the first favourable opportunity to tender the good offices of England, either separately or conjointly with other Powers, in order to restore to Europe the blessings of peace. With regard to the Reform Bill, they were of opinion, looking to the time of the year, and to the short period which remained for disposing of the routine business, that it would be trifling with so great a subject to enter upon its consideration during the present session. They had therefore resolved to postpone their Bill until next year, and in the meantime they would pledge themselves to introduce their measure at the earliest possible period of the next session. In the House of Lords, Earl GRANVILLE, after making a similar statement, proceeded to contradict the rumours which had prevailed in regard to a reduction of our naval armaments, and said that it was the decided opinion of the Government that the defences of the country should be placed in a state of thorough efficiency. With respect to foreign affairs, he said that the policy of the Government would be one of strict neutrality. It would be their object to keep this country out of the war, and to promote peace, not by a too early intermeddling, but by carefully watching the course of events, to take the first favourable opportunity of bringing their influence in co-operation with the other European Powers to insure not only present peace, but arrangements which may lead to peace for the future.

The Ministerial arrangements have been completed this week, and the re-elections which have taken place have all terminated in favour of Ministers. The only places where there was opposition were Norwich, Bedford, Newcastle, Sandwich, and Oxford University. At the first four Lord BURY, Mr. WHITBREAD, Mr. HEADLAM, and Mr. KNATCHBULL HUGESSEN have been re-elected respectively by large majorities; and at the latter, after five days' polling, Mr. GLADSTONE was re-elected yesterday by a majority of 191.

The great battle which has long been looked for was fought on Friday on the west bank of the Mincio. It commenced at sunrise and lasted until sunset, covering an area the front of which extended over five leagues. Upwards of 300,000 men were engaged in the battle, and the three armies were commanded by the EMPEROR OF AUSTRIA, the EMPEROR OF THE FRENCH, and the KING OF SARDINIA in person. The result was the complete defeat of the Austrians, who were compelled to recross the Mincio, leaving 35,000 killed and wounded on the field, and more than 15,000 prisoners, 30 cannons, and 3 flags, in the hands of the allies. On the night of the battle the EMPEROR OF THE FRENCH slept in the very room at Cavriana which had been occupied by the EMPEROR OF AUSTRIA in the morning. The latest news states that the French have crossed the Mincio in pursuit of the Austrians, that the Sardinian army has invested Peschiera from the Lago di Garda to the Mincio, and that the EMPEROR OF AUSTRIA has given up the command of his army to General HESS, and returned to Vienna on important Government business.

The Revenue Returns for the Year and Quarter ended on the 30th of June are much more satisfactory than was anticipated. The Return for the Quarter shows an increase of 212,290*l.*, after allowing for a diminution of 417,481*l.* in the Property Tax caused by the reduction of the duty, and a diminution of 123,788*l.* in the Stamps, which may be considered as a postponement rather than a loss, in consequence of the interruption given to business by the general election. The return for the year shows a decrease of only 1,190,143*l.*, though the diminution of Property Tax caused by the reduction of the duty was no less than 4,064,056*l.* In every other branch of Revenue the return exhibits a steady increase.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Royal family continue at Buckingham Palace. On Friday morning the Queen and Prince Consort rode on horseback. The Prince Consort, accompanied by the Princesses Alice and Helena and the Prince of Leiningen, afterwards went to the Handel Festival at the Crystal Palace. The Princess of Hohenlohe-Langenburg arrived at Buckingham Palace on a visit to the Queen. The Prince of Hohenlohe-Schillingfurst accompanied her Serene Highness to the Palace, and afterwards proceeded to the Brunswick Hotel, Jermyn Street. The Countess de Neuilly and the French Royal family visited the King of the Belgians at Buckingham Palace. In the afternoon the Queen, accompanied by the Princess Helena, the Princess of Hohenlohe-Langenburg, and the Prince of Leiningen, took a drive in an open carriage and four. In the evening the Queen had a dinner party. On Saturday morning the Prince Consort was present at a Committee of the Governors of Wellington College. In the afternoon the Queen held a Levée in St. James's Palace, at which 470 gentlemen had the honour of being presented. Before the Levée the Queen received in the Royal Closet a deputation from Canada, which presented an address to her Majesty praying her to visit Canada on the opening of the Victoria Bridge in 1860. After the Levée the Prince of Leiningen took leave of her Majesty and returned to Portsmouth. The Queen and Prince Consort, accompanied by the Prince of Wales and Princess Alice, drove out in an open carriage and four. The Princess of Hohenlohe-Langenburg left Buckingham Palace for Frogmore on a visit to the Duchess of Kent. In the evening the Queen and Prince Consort, accompanied by the King of the Belgians and the Prince of Wales, honoured the Royal Italian Opera with their presence. The Count of Flanders attended the performance at the Princess's Theatre. On Sunday morning her Majesty and the Prince Consort, the King of the Belgians, the Prince of Wales, and the Princesses Alice, Helena, and Louisa attended Divine service in the private chapel of Buckingham Palace; the Rev. Dr. Cureton preached the sermon. In the afternoon the King of the Belgians went to Frogmore and visited the Duchess of Kent. On Monday morning the Prince Consort, as President of the Horticultural Society, presided at a meeting of the Council at Buckingham Palace. Prince Arthur visited the Crystal Palace. The Duke of Oporto arrived at Buckingham Palace on a visit to her Majesty. In the afternoon the Queen, accompanied by the Prince of Wales, went to Frogmore by a special train on the Great Western Railway, and visited the Duchess of Kent. In the evening the Queen had a dinner party. On Tuesday the Queen held a Chapter of the Order of the Garter. Her Majesty afterwards held a Court, at which Lord de Ros had an audience and resigned his Gold Stick of office as Captain of the Yeomen of the Guard. The Earl of Shrewsbury and Talbot had an audience, and resigned his Gold Stick of office as Captain of the Corps of Gentlemen-at-Arms. Earl Ducie had an audience, kissed hands on his appointment, and received from her Majesty his Gold Stick of office as Captain of the Yeomen of the Guard. Lord Foley had an audience, kissed hands on his appointment, and received from the Queen his Gold Stick of office as Captain of the Corps of Gentlemen-at-Arms. The Earl of Carlisle had an audience. In the afternoon the Duke Nicolas de Leuchtenberg and his brother, Prince Eugene, nephews of the Emperor of Russia, visited the Queen. The King of the Belgians and the Count of Flanders went to Tunbridge and visited the Countess de Neuilly. The Duke of Oporto visited the Duke of Cambridge. In the evening the Queen had a dinner party. On Wednesday morning the Prince Consort presided at a meeting of the Council of the Duchy of Cornwall, at which Sir William Dunbar attended and took the oaths, on his appointment as Keeper of the Privy Seal in the room of Mr. Whitmore, resigned. Messrs. White and Hankey had the honour of submitting for her Majesty's inspection the "Great Welcome Nugget," from Australia, weighing 2200 ounces, and valued at above 9000*l.* The Prince of Wales visited the exhibition of the Royal Academy. The Duke of Oporto went to Greenhithe, and returned to town in the afternoon. In the evening the Queen gave a State Ball to a party of 2000. On Thursday the Prince Consort visited the Provident Institution in St. Martin's Place. The Duke of Oporto went to Tunbridge and visited the Countess de Neuilly. Viscount Bury had an audience of the Queen, kissed hands upon his appointment as Treasurer of her Majesty's Household, and received his wand of office. In the afternoon the Queen held an Investiture of the Order of the Bath, and afterwards drove out in an open carriage and four accompanied by the Princesses Alice and Louisa. In the evening the Queen and Prince Consort, accompanied by the King of the Belgians and the Count of Flanders, honoured the performance at the Adelphi Theatre with their presence. The Prince of Wales and the Duke of Oporto honoured the performance at the Princess's Theatre with their presence. The Queen, Prince Consort, and the youthful members of the Royal family, according to present arrangements, will leave London next week for Osborne for the summer.

THE PRINCE OF WALES arrived at Buckingham Palace on Saturday afternoon from the Continent. On Thursday his Royal Highness went to Harrow and heard the speeches in the school.

COURT MOURNING.—The Queen, Prince Consort, and the Royal family went into mourning on Monday for a week for the late Dowager Grand Duchess of Saxe-Weimar, maternal grandmother to Prince Frederick William of Prussia.

ORDER OF THE GARTER.—A Chapter of the Order of the Garter was held by her Majesty on Tuesday, at which the Earl of Harrowby and the Earl of Derby, having previously been knighted with the Sword of State, were invested by her Majesty with the insignia of the order with the usual ceremonies. The Prince of Wales appeared at the Chapter for the first time, wearing the robes and

insignia of the order, and took his seat on the left of the Queen.

ORDER OF THE BATH.—The Queen held a Chapter of the Order of the Bath on Thursday, at which the Earl of Elgin, Rear-Admiral Sir Michael Seymour, the Earl of Malmesbury, the Right Hon. Sir John Pakington, General Sir Thomas M'Mahon, Bart., General Sir William M. Gomm, and General Sir Robert W. Gardiner were knighted and invested by her Majesty with the insignia of Knights Grand Cross; Colonel John Douglas, 79th Regiment; Major-General Henry G. Roberts; Dr. John M'Andrew, Inspector-General of Hospitals; General Henry Wyndham; and Lieut.-General John Aitchison, were knighted and invested with the insignia of Knights Commanders; and Captain E. S. Sotheby, R.N.; Colonel C. Hagart, late 7th Hussars; Lieut.-Col. W. A. Middleton, R.A.; Colonel H. R. Jones, 6th Dragoon Guards; Colonel M. W. Smith, 3d Dragoon Guards; Lieut.-Col. J. D. Carmichael, 32d Regiment; Lieut.-Col. L. Nicholson, R.E.; Lieut.-Col. Sir W. Russell, Bart., 7th Hussars; Lieut.-Col. T. Lightfoot, 84th Regiment; Lieut.-Col. E. G. Bulwer, 23d Regiment; Captain the Hon. Keith Stewart, R.N.; Captain Sir F. W. E. Nicolson, Bart., R.N.; Lieut.-Colonel A. S. S. Walsh, Royal Marines; Captain E. G. Fishbourne, R.N.; D. J. Simpson, Esq., Paymaster-in-Chief, R.N.; W. D. Jeans, Paymaster, R.N., Secretary to Rear-Admiral Sir Michael Seymour; and John Edye, Esq., F.R.S., late Assistant-Surveyor of the Navy, were invested with the decoration of Companions of the Bath.

THE CABINET.—A Cabinet Council was held on Wednesday at the official residence of the First Lord of the Treasury, in Downing Street.

MINISTERIAL APPOINTMENTS.—The following arrangements have been announced during the week:—

*Solicitor-General for Scotland.*—E. F. Maitland, Esq.
*Treasurer of the Household.*—Lord Bury.
*Comptroller of the Household.*—Lord Proby.
*Captain of the Gentlemen at Arms.*—Lord Foley.
*Captain of the Yeomen of the Guard.*—Earl of Ducie.
*Groom in Waiting in Ordinary.*—Lieut.-Col. Kingscote.
*Groom of the Stole to the Prince Consort.*—Earl Spencer.
*Lord in Waiting to the Prince Consort.*—Lord Waterpark.
*Equerry and Clerk Marshal.*—Lord Alfred Paget.

THE PEERAGE.—The *Gazette* of Tuesday announced that the Queen has directed letters patent to be passed under the Great Seal, granting the dignity of a Baron of the United Kingdom to the Right Hon. Robert Vernon Smith, and the heirs male of his body lawfully begotten, by the title of Baron Lyveden, of Lyveden, in the county of Northampton; and to the Right Hon. Sir Benjamin Hall, Bart., and the heirs male of his body lawfully begotten, by the title of Baron Llanover, of Llanover and Abercarn, in the county of Monmouth.

KNIGHTHOOD.—At the Levée on Saturday the Queen conferred the honour of Knighthood upon Sir James Macaulay Higginson, K.C.B., Vice-Admiral Alexander Dundas Arbuthnott, Hercules George Robert Robinson, Esq., Governor of Hong-Kong, and Stephenson Villiers Surtees, Esq., Chief Justice of the Mauritius.

PARLIAMENTARY MOVEMENTS. — Lord Palmerston has been re-elected for Tiverton, Lord John Russell for London, Sir G. C. Lewis for Radnor, Sir C. Wood for Halifax, Mr. Cardwell for Oxford, Mr. M. Gibson for Ashton, Mr. Sidney Herbert for South Wilts, Mr. Fitzroy for Lewes, Mr. Lowe for Calne, Mr. Wilson for Devonport, Sir R. Bethell for Wolverhampton, Sir H. Keating for Reading, Mr. Moncrieff for Edinburgh, Sir W. Dunbar for Wigton, and Mr. Bagwell for Clonmel, all without opposition. The election for Oxford University terminated yesterday in the return of Mr. Gladstone, by a majority of 191, the numbers being for Mr. Gladstone, 1050; for the Marquis of Chandos, 859. The election for Norwich has terminated in the return of Lord Bury by a majority of 361, the numbers being for Lord Bury, 1922; Sir S. Bignold, 1561; Colonel Boldero, 39. The election for Newcastle-on-Tyne has terminated in the return of Mr. Headlam by a majority of 1067, the numbers being for Mr. Headlam, 2153; for Mr. Cuthbert, 1086. The election for Sandwich has terminated in the return of Mr. Knatchbull Hugessen, by a majority of 283, the numbers being for Mr. Hugessen, 463, for Sir J. Fergusson, 180. The election for Bedford has terminated in the return of Mr. Whitbread by a majority of 52, the numbers being for Mr. Whitbread, 441; for Capt. Polhill-Turner, 389. The appointment of Lieut.-Col. Kingscote to be one of the grooms in waiting to the Queen has caused a vacancy in the representation of West Gloucestershire; and the appointment of Lord Alfred Paget to the office of Equerry and Clerk Marshal to the Queen has caused a vacancy in the representation of Lichfield. No opposition to their re-election is anticipated. A new writ was issued on Thursday for Marylebone, in the room of Sir B. Hall, now Lord Llanover. Lord Fermoy, Colonel Dickson, and Major Dickson are still in the field as candidates in the Liberal interest, and it is expected that a Conservative candidate will be brought forward.

THE NEW JUDGE.—Mr. Colin Blackburn (brother of Mr. P. Blackburn, M.P.) has been appointed one of the judges of the Court of Queen's Bench, in the room of Sir W. Erle, promoted to be Chief Justice of the Common Pleas.

THE NAVY.—It was reported last week that the whole of the mechanics and labourers who had been employed working over-time in Portsmouth dockyard had received orders from the Admiralty to discontinue working extra hours, and that the Chancellor of the Exchequer would largely retrench the naval expenditure. It appears that there is no foundation for the former rumour, and the latter has been contradicted by the Chancellor of the Exchequer himself in the following letter to the chairman of his London committee:—

"11, Carlton House Terrace, June 24.

"My dear Sir F. Rogers,—Statements have appeared in the public press with respect to the defences of the country which render it necessary for me to trouble you with a few lines. It is alleged that when Chancellor of the Exchequer I starved the Crimean war (that is, I presume, limited the expenditure upon it); and that, when the war was over, I caused the Government to reduce the estimates and forces, and even to break faith with seamen. In neither of these statements with respect to the past is there one word of truth. It is also said that there are menaces of present reduction. On this I have to say that I know nothing whatever of any proceedings calculated to diminish the efficiency of our defences; and I am confidently of opinion that when the estimates for the year are finally submitted, and when the demands necessary to meet them are made upon the House of Commons, those who are most anxious respecting the defences will find in them ample satisfaction. I am able to add, that no orders for reduction of any kind have been given or suggested by the new Board of Admiralty, which has not yet been constituted; and that if any such order is in operation it must have been given by the late Government in the course of public business.—I remain, very sincerely yours, "W. E. GLADSTONE."

THE REVENUE.—The Revenue returns for the year and quarter ended June 30 show a decrease of 1,190,143*l.* on the year, and an increase of 212,290*l.* on the quarter. The year's account shows an increase in the Customs of 1,508,528*l.*; Excise, 277,000*l.*; Stamps, 232,383*l.*; Taxes, 30,967*l.*; Post Office, 210,000*l.*; Crown Lands, 3886*l.*; Miscellaneous, 611,149*l.*; the only item which shows a decrease being the Property Tax, in which there is a diminution of 4,064,056*l.* The Quarter's account shows an increase in the Customs of 229,379*l.*; Excise, 319,000*l.*; Taxes, 23,000*l.*; Post Office, 20,000*l.*; Crown Lands, 500*l.*; Miscellaneous, 161,680*l.*; and a decrease in the Stamps of 123,788*l.*; Property Tax, 417,481*l.*

## Foreign.

FRANCE.—Paris was illuminated on Saturday night in honour of the victory of Solferino, and to-morrow a *Te Deum* will be sung in all the churches of France in celebration of the victory. The Empress and all the great bodies of the State will attend the service in Nôtre Dame. Telegraphic despatches from the provinces state that the enthusiasm of the people on receiving the news of the victory was very great. The *Moniteur* publishes an Imperial decree, dated Brescia, naming M. de Morny President of the Legislative Body, and M. Schneider and others Vice-Presidents and Quæstors. These appointments, at a period much earlier than usual, are supposed to be the precursors of an extraordinary session of the Chambers, with the view, as some suppose, of announcing new levies of troops and another new loan. Count Paul Schouvaloff, aide-de-camp of the Emperor Alexander, arrived in Paris on the 23d ult., on his way to the Emperor Napoleon's head-quarters as Russian Military Commissioner. The count is the bearer of an autograph letter of the Emperor of Russia to Napoleon III. The *Constitutionnel* notices the language of the German press with respect to France as highly unbecoming and unjustifiable. The Emperor Napoleon, it says, has undertaken the war in Italy only for the single object of freeing that fine country from tyrannical rule, and has no intention of attacking Germany or any other country. Hence, it says, the apprehensions expressed by the German press are unfounded, and the armament of the various States amounts to a positive menace. It says:—

"We are told of M. Kossuth and General Klapka, the former of whom, say the Austrian partisans, is gone to Italy with a French passport, while the latter has published a proclamation to the Hungarians, dated from the Imperial head-quarters. Not one word of all this is true. The Imperial Government has nothing whatever to do with the proceedings or attempts of those two refugees; but France can scarcely be expected to deprive them of their liberty for the greater security of Austria. Besides, neither Kossuth nor General Klapka is in the habit of accepting a mission from any one; and when one of the English journals friendly to Austria speaks of them as agents of the French Government, it misrepresents their position, and at the same time throws doubt on the straightforward conduct of France. We cannot affect to be surprised if the Hungarians do not feel quite happy under the Austrian yoke, but we must not confound causes altogether distinct. We are in Italy for a determined object, which has nothing threatening for European international rights. The cause has the sympathy of all the great States, as well as of all civilised nations, and it is solely with a view to compromise it that attempts are now being made to associate with it passions which France cannot encourage. But we can affirm these efforts to alarm Cabinets and mislead public opinion will prove unsuccessful. There is one more accusation which requires an immediate answer. Certain foreign journals assert that French intrigue is active on the banks of the Danube in creating embarrassments for Turkey and exciting the Roumain Principalities against her government. To these insinuations we give the most positive denial. On the very day of the Emperor's departure for the army of Italy Count Walewski informed Lord Cowley of the intentions and views of his Majesty on that delicate question. Such a declaration ought to suffice, as the Imperial Government has given no one the right to question the sincerity of its language."

SWITZERLAND.—On receipt of the news of the massacre at Perugia the Swiss residents at Milan were ill-treated by the populace, but the police interfered. The Federal Council has addressed circulars to the Swiss Consular agents in Italy, protesting against denominating regiments composed of foreigners as Swiss regiments, and requesting that use may be made of the circulars in order that this subject may be put in its proper light before the eyes of the public.

BELGIUM.—The Belgian Chambers are to be convoked for an extraordinary sessions for the 5th July, at the same time that the provincial councils will assemble. The bill for the fortifications of Antwerp, according to the plan of M. Brialmont, will be submitted to the Legislature.

HOLLAND.—General Gunkel, of the Dutch army, has appealed to the Supreme Court at the Hague against the condemnation to death passed on him by the Criminal Court for poisoning; but the court rejected the appeal.

BADEN.—The Grand Duke of Baden has addressed to his army an order of the day which concludes as follows:—"The time for peace and repose has not yet arrived, and we may yet have to impose on ourselves greater sacrifices, and to undergo more painful trials than any we have hitherto borne. Hold yourselves, therefore, ready to respond to my call, and to fight under my flag, like valiant Germans, for the honour of the country."

FRANKFORT.—In the sitting of the Federal Diet on Saturday, Prussia made the proposal to place a corps of observation on the Upper Rhine, under the superior orders of Bavaria. This proposal was referred to the Military Committee, which will not give its decision for a fortnight; but it is reported that the members of the Committee are in favour of its adoption.

BAVARIA.—Major-General von Tann left Munich last week for Berlin on a special mission. Baron de Pfordten, ex-Minister of Foreign Affairs, and now representative of Bavaria at the Germanic Confederation, made his appearance suddenly at Munich on the 17th, and was received by the King. M. de Pfordten afterwards went to Stuttgardt, to confer with the Ministers of Wurtemberg, and thence returned to Frankfort.

SAXONY.—Baron Beust has addressed a long despatch to the Russian Government in answer to the recent circular of Prince Gortschakoff, from which the following are extracts:—

"The King's Government did full justice at the time to the efforts made by the St. Petersburg Cabinet to prevent those calamities by means of a European Congress; but unless we fail in the duty of impartiality towards a confederate Government, it would be impossible for us to dwell on the episode of a Congress which was a mere phase, and not on the circumstances which preceded and brought about the war. We cannot forget that the Austrian Government, having done nothing which could give offence to its neighbours, or to any Power whatever in Europe, was first of all disquieted and afterwards menaced in the peaceable exercise of its rights of sovereignty. It is still difficult for us not to entertain the conviction that if such enterprises, instead of encountering the sympathies, had incurred the unequivocal blame of Europe, the scourge of war would probably have been averted even before the question of a Congress was raised." In answer to the assertion of Prince Gortschakoff that the Confederation is an exclusively defensive body, and that it is only in that character that Europe can recognise it, Baron Beust replies "that the Confederation is a Power like any other, and has the right to declare war whenever it shall conceive its interests to be menaced. Whether it waits to be attacked or takes the initiative is a matter for its own judgment. Yet in this case the action of Germany would be purely defensive. Austria is a State of the Confederation, and if she be attacked in any part of her dominions the other States may deliberate as to how far the event compromises the safety of her German provinces." On this question Baron Beust quotes the proceedings of the Diet during the Russian War. "At that epoch the Germanic Confederation, on the proposition of Austria and Prussia, took a resolution that any act of aggression against the non-German possessions of Austria and Prussia should be considered as equivalent to an attack on the Federal territory; and when some months after the Austrian troops occupied the Danubian Principalities the Confederation amplified the said resolution to the effect, that an attack on that armed force, which was not only out of the Federal but even the Austrian territory, should be considered as an aggression against the Confederation."

PRUSSIA.—The Cabinet of Berlin has intimated to the French Government that the mobilisation of the six *corps d'armée* must not be considered as a measure hostile to France, or as having in any sense an aggressive character.

AUSTRIA.—The Emperor is daily expected at Vienna. On Monday his Majesty was at Villafranca, and the report is current that he will shortly have an interview with the Prince Regent of Prussia. Two decrees favourable to Protestants and Jews are expected.

HUNGARY.—It is said that the Russian Ambassador at Turin has remonstrated against the organisation of a Hungarian Legion, and that the Prussian Government have also declared their intention of assisting in putting down an insurrection in Hungary.

ITALY.—The following despatches announcing the great battle on the Mincio have been received by the Empress of the French:—

"THE EMPEROR TO THE EMPRESS.—Cavriana, Friday evening. Great Battle—Great Victory. The whole Austrian army formed the line of battle, which extended five leagues in length. We have taken all their positions, and captured many cannon, flags, and prisoners. The battle lasted from 4 o'clock in the morning till 8 o'clock in the evening."

"THE EMPEROR TO THE EMPRESS.—Cavriana, Saturday, 1 P.M. It is impossible to obtain details of the battle of yesterday. The enemy withdrew last night. I have passed the night in the room occupied on the morning of the battle by the Emperor of Austria. General Niel has been appointed Marshal of France."

"THE EMPEROR TO THE EMPRESS.—Cavriana, June 26, 11 A.M. The Austrians, who had crossed the Mincio to attack us with the whole of their army, have been compelled to abandon their positions and retire to the left bank of the river. They have blown up the bridge of Goito. The loss of the enemy is very considerable; ours is much inferior. We have taken 30 pieces of cannon, three flags, and captured more than 9000 prisoners. General Niel and his corps, as well as the entire army, have covered themselves with glory. General Auger has lost an arm. The Sardinian army, which occupied the extreme left of our position, inflicted severe losses on the enemy, after having contended with great obstinacy against superior numbers."

"THE EMPEROR TO THE EMPRESS.—Cavriana, June 28, 2 20 P.M.—Our troops are passing the Mincio without resistance. the enemy having retired beyond the river."

The *Moniteur* states that the battle is to bear the name of "the Battle of Solferino," and publishes the following details received from Cavriana, under the date of the 25th:—

"Yesterday was distinguished by one of those battles which, if they do not terminate a war, enable us at least to anticipate its conclusion. The Emperor of Austria commanded in

...ppose. In the new sketch with what a nation he has engaged in that strife. The Austrians in their previous retreats still ...ntained a renewal of the attack. Their last decided retreat behind the Mincio was intended to inspire us with an excess of confidence, to leave a wide space open to the rapidity of our movements, and thus to expose our columns, placed at a distance from each other by their order of march, to a sudden attack which might have weakened by isolating them. But, fortunately, the Emperor had not departed from that extreme discretion which governs even his courage. The farther the allied army advanced the more our columns strengthened each other by being brought closer together. During the night of the 2d we found that the Austrians were repassing the Mincio, and advancing to meet us. A battle was imminent. The whole army of the enemy, retracing its steps, was prepared to oppose our forward movement; Solferino, San Cassiano, Cavriana, all formidable positions, were occupied by the Austrians, who, supported by a strong force of artillery, crowned all the heights as far as Volta. To their left, in the plain, between Volta, Guidizzolo, and Medole, numerous columns of infantry, mixed with artillery and cavalry, were advancing to turn our right. Between Solferino and Peschiera the enemy had also a considerable force, intended to oppose the troops of the King of Sardinia, marching from Desenzano to Pozzolengo. The two armies occupied these respective positions when, at 5 o'clock in the morning, the 1st Corps (Marshal Baraguay d'Hilliers') commenced the engagement before Solferino. The heights and the village were taken and occupied after an obstinate engagement. During this time the 2d Corps (Marshal M'Mahon's), which was on the right of the 1st in the plain, was extended towards its own right, in order to unite with the force under General Niel, who was advancing upon Medole. The Emperor had taken the command of the whole army; his Majesty ordered the infantry and artillery of the Guard to move forward into a position between the 1st and 2d Corps, and to take San Cassiano. Then, to protect the right of Marshal M'Mahon (2d Corps), which was slightly weakened by the distance from it of General Niel, his Majesty ordered all the cavalry of the Guard and the two divisions of Cavalry of the 1st and 3d Corps to occupy the vacant space between the 2d Corps and 4th. Marshal Canrobert had been directed to watch the Austrian movement expected from the side of Mantua. Our army fought the whole day, advancing slowly, but always advancing in good order, the different corps in combination with each other. The 1st Corps after having carried Solferino took all the Austrian positions in the direction of Pozzolengo successively; the night only stopped its advance. The Guard moved upon San Cassiano and Cavriana, occupying the summits of the hills. This last village was taken by a rapid attack under the eyes of the Emperor, who himself directed the fire of the artillery. As to the 4th Corps under General Niel, it advanced step by step, always gaining ground. Towards 4 o'clock in the afternoon the Austrians, to sustain their retreat, made a last effort to penetrate between the 4th and 2d Corps. An obstinate conflict then commenced, in which the infantry and artillery took part. The cavalry, by several charges, decided the success of this great day. This was the last act of the battle. Along their whole line the Austrians began their retreat; it was favoured by a frightful storm, that raged for nearly an hour—thunder, hail, and wind; at last a deluge of rain produced such an effect that nothing could be distinguished on the field of battle. When the weather again became calm the enemy had disappeared, but in the distance could be seen the direction their retiring columns were taking. The Emperor of Austria, who had lodged at Cavriana in the house in which the Emperor later in the day established his head quarters, quitted the field of battle about 4 o'clock, and went by the road to Goito. The cloud of dust raised by his escort could be seen from the heights of Cavriana. The Emperor Napoleon has in a degree surpassed himself; everywhere, and at all times, he was seen directing the battle. Every one about his person trembled at the dangers that unceasingly threatened him; he alone seemed not to perceive them. The protection with which Providence shielded him was extended to his Staff; only one of the Cent Gardes was wounded near his Majesty; several horses of the Staff and escort were wounded and killed."

Another account states that during the battle the Emperor was constantly in the hottest fire. General Larrey, who accompanied the Emperor, had his horse killed; two horses of the escort of the Cent Gardes were also killed. General Auger had his arm shot off, and Generals Forey, Ladmirault, and Dieu were wounded. The Piedmontese army which took part in the battle was commanded by the King of Sardinia in person. A private message from Berne puts down the Austrian loss at the enormous number of 35,000 *hors de combat* and 15,000 taken prisoners, together with 16 flags and 75 pieces of cannon captured. The following despatch from Vienna gives the Austrian account of the battle:—

"Verona, June 25.

"The day before yesterday our right wing occupied Pozzolengo, Solferino, and Cavriana, and the left wing pressed forward yesterday as far as Guidizoffo and Castelgoffredo, driving back the enemy. The collision of the two entire armies took place yesterday at 10 A.M. Our left wing under General Wimpffen advanced nearly as far as the Chiese. In the afternoon a concentrated assault of the enemy was made upon the heroically defended town of Solferino. Our right wing repulsed the Piedmontese; but on the other hand the order of our centre could not be restored. Losses extraordinarily heavy, a violent thunder-storm, the development of powerful masses of the enemy against our left wing, and the advance of his main body against Volta, caused our retreat, which began late in the evening."

On Thursday last the head-quarters of the Emperor Napoleon were at Volta; the French army was then proceeding with the continued passage across the Mincio, which the Austrians made no attempt to defend. The Emperor had gone over to the left bank to visit the position of Valeggio, already occupied by the French troops, and had caused several bridges to be thrown across the river to replace those which the Austrians had blown up in their retreat. The Sardinian army has since invested Peschiera. The *Austrian Correspondence* of Monday evening says that the Emperor of Austria, who commanded his army in person in the late battle, has given up the command and returned to Vienna on account of important Government business. The command-in-chief of the army, which is preparing for a new battle, has been given to General Hess. The Austrian authorities have selected Laybach as the seat of the military and civil Government of Lombardy, and of the *employés* of the Government. The French troops have entirely evacuated Tuscany, and Prince Napoleon, with more than 60,000 men, is already very close to Mantua. With regard to the late massacre at Perugia the Turin papers state that the Dominican fathers let the Swiss into the place by one of their own gates, by which means they made themselves masters of the city. The Swiss, it is said, threw the women and children out of windows whilst employed in pillaging the city. The *Giornale di Roma* of the 21st, after stating that the legitimate government had been restored in Perugia by the Swiss, under Colonel Schmidt, announces that the Pope, as an acknowledgment of his bravery, has raised him to the rank of General of Brigade. All those who have distinguished themselves in this affair are to be mentioned in an order of the day. At Rome on Sunday a crowd assembled before the French garrison, and were about to display the tricoloured flag, and to proclaim the dictatorship of Victor Emmanuel, but General Goyon prevented it. The Pope has notified his protest against the dismemberment of his States to the Powers represented at the Paris Conferences. At Gaeta on the 23d ult. the Pope addressed the Consistory on the separation of the Romagna from the States of the Church, and communicated to the Cardinals a letter of the Emperor Napoleon, guaranteeing the independence of the Papal States. The *Moniteur* contains a note explaining the nature of the Dictatorship offered by the whole of Italy to the King of Sardinia. It says:—

"It is a false conclusion that Piedmont, without consulting the wishes of the different peoples or the great Powers, reckons on uniting the whole of Italy in a single State. Such conjectures have no foundation. The different peoples, whether delivered or abandoned, desire to make common cause against Austria. With this intention they have placed themselves under the protection of the King; but the Dictatorship is purely a temporary power, which, while uniting the common forces in the same hands, in no way presages combination for the future."

The Adriatic.—On the 28th the following French ships were at Antivari:—Five ships of the line, 8 frigates, 6 war steamers, 13 floating batteries, 9 gunboats, 9 brigs, and 2 three-masted vessels. The fleet has many troops and enormous supplies of provisions and ammunition on board, so that it can act independently of the mother country, should any other Power attempt to interfere. Admiral Bouet is about to open sealed orders. Consul Hecquardt is in continual correspondence with Montenegro.

Turkey.—Advices from Constantinople to the 8th inst. state that the Grand Duke Constantine and his Grand Duchess arrived there on the 6th inst., and were received with honours never before accorded to giaours. The news of the battle of Magenta has produced a lively impression at Constantinople. The Divan has simply acquiesced in the Paris protocols concerning the Principalities, and granted also the berats of investiture. —Erzeroum was visited by a destructive earthquake on the morning of the 2d ult. The catastrophe, which principally consisted of one terrible shock lasting 15 seconds, occasioned immense loss of life and property, more than 1500 human beings and nearly all the larger buildings of the town having been destroyed. Slight shocks continued to occur up till the evening of the 3d, but the principal damage was occasioned by the single convulsion of the previous day.

United States.—A despatch from Washington says, "Recently received information from Madrid of an altogether reliable character shows that, however desirable it may be for the United States to acquire Cuba, there is no prospect whatever of such a consummation, nor is there any probability of the negotiation of a commercial treaty between Spain and this country."

Mexico.—The news from Mexico is important. Miramon and the clergy had fallen out; the Church tried Miramon for suppressing a manifesto in favour of Zuloaga, who was said to be imprisoned; and Miramon in turn imprisoned the priests. The town of Morella had been ravaged, and the women stripped naked and whipped, to make them discover some treasure supposed to be hidden.

Buenos Ayres and Paraguay.—News from Buenos Ayres states that 2000 men have invaded the Argentine Confederation. Paraguay promised to assist General Urquiza with four steam-vessels. The Brazils remain neutral, but they are increasing their naval forces in the Plata.

St. Domingo.—The Government of St. Domingo on the 5th of May, in violation of existing treaties and of their own laws, called in all the paper money issued by the previous Government of President Baez, the circulation of which had been arbitrarily prohibited since the capitulation of that city in June, 1858, fixing upon it a merely nominal value, which was to be repaid at distant and uncertain periods. This paper money was the only currency of the place, and had been replaced by other notes issued by the present Government. As the largest amount of this paper was in the hands of foreigners, and represented the value of the merchandise they had imported, the Consuls of Great Britain, France, and Spain, who had for some time previously endeavoured by their advice to prevent the adoption of so arbitrary a measure, presented to the Government a joint protest against this decree, which was returned to them in a most offensive manner. They again sent their protest to the Government, but it was returned to them a second time, and their right to interfere politically for the protection of the interests of their fellow subjects was denied. The consuls therefore suspended their official relations with the Government of St. Domingo, which carried its insolence to the extreme of refusing to grant to them the usual passports to leave the country. They however chartered the Dutch schooner Ozama, and arrived at Kingston on the 30th of May, on their return to Europe. In consequence of these proceedings the official relations between the Government of St. Domingo and all European nations have been suspended, and there only remains in that city a commercial agent from the United States, who declined to join his colleagues in the matter.

# Parliament.

## HOUSE OF LORDS.

Thursday.—Lord Campbell took his seat on the woolsack as Lord Chancellor.—Lord Chelmsford gave notice that he will on Thursday next call attention to the state of business in the *Divorce Court*, with the view of further legislation on the subject.—Lord Stratford de Redcliffe gave notice that on Friday next he will call attention to the correspondence that had taken place in relation to the *Affairs of Italy*.—Earl Granville made a *Ministerial Statement* respecting the intentions of the Government during the present session, which was in substance that her Majesty's advisers intend to observe a policy of strict impartiality in the war now raging in Italy, and that with regard to Reform, it would be wholly impossible to deal with the subject in a satisfactory manner in the present session.—The Duke of Rutland said that the war was to be attributed to the ambitious enterprise of the King of Sardinia, and eulogised the zeal displayed by the late Government in their efforts to preserve the peace of Europe.—The Earl of Malmesbury vindicated the foreign policy of the late Government from the criticisms of their opponents.—The Duke of Newcastle declared that the intention of the Government was to follow up the course pursued by their predecessors with respect to the national defences, and said they would probably increase the measures already adopted.—After some observations from Lord Howden, in reference to the intrigues of the French in Italy the House adjourned.

Friday.—*The New Judge*.—Lord Lyndhurst called attention to the recent appointment of Mr. Blackburn to the bench, and said that it had been very unsatisfactorily carried. He had been asked by many persons who Mr. Blackburn was, and was able to answer that he was a profound lawyer and was calculated to add lustre to the bench.—The Lord Chancellor said that he had appointed Mr. Blackburn because he was one of the ablest lawyers in Westminster Hall.—Lord Wensleydale and Lord Cranworth expressed their entire approval of the appointment.

[Left sitting.]

## HOUSE OF COMMONS.

Thursday.—*Affairs of Italy*.—Lord Elcho gave notice that on Tuesday week he will move a resolution to the effect that, in the opinion of the House, the correspondence published on the affairs of Italy showed that the late Government had directed their best attention to the maintenance of peace; and, while preserving strict neutrality, had upheld the honour and dignity of the country. The noble lord also expressed his intention to append a paragraph to his resolution pledging the House to the policy of strict neutrality, as laid down by the late Government.—*Ministerial Statement*.—Lord Palmerston referred to the circumstances under which the change of Administration had taken place, and said that two questions were of pre-eminent importance at the present moment, namely, the state of our foreign relations and the necessity of amending the laws for the representation of the people. With reference to the former subject her Majesty's Government would inflexibly pursue the course which had been chalked out for them by their predecessors in office—that of strict and impartial neutrality. He trusted that nothing would occur which could involve this country in the war of which Lombardy was now the field. It might possibly be the duty of her Majesty's Government to offer their mediation, but they ought not to interpose their good offices until they were of opinion that their advice would be acceptable. With regard to Reform, looking to the period of the year at which we were now arrived, and the unavoidable business remaining to be disposed of, it would be merely trifling with the subject to attempt to deal with it in the present session. He would, however, promise on behalf of the Government that they would avail themselves of the earliest moment next session to introduce a Bill on the subject. Events might require a session at an earlier period than usual, but the Government would reserve to themselves the right to decide that point hereafter. Under any circumstances there could be no doubt that the estimates, the budget, and perhaps the measures consequent thereupon, would occupy the attention of the House down to the latest period at which it would be possible to secure the attendance of members.—Mr. Whiteside obtained leave to bring in a Bill to consolidate the *Criminal Statute Law* of England and Ireland.—Sir J. Shelley obtained leave to bring in a Bill to regulate the proceedings of *Gas Companies* and others supplying the metropolis with gas.—Mr. Walpole obtained a select committee to inquire into the operation of the Acts of Parliament and regulations for the *Care and Treatment of Lunatics and their Property*.—The House then went into committee of supply, when, on the motion of Lord Palmerston, Mr. Massey took the chair.—On the question that supply be granted to her Majesty, Sir H. Willoughby inquired whether it was the intention of Government to make that which had not been made for many months, viz., a financial statement.—Lord Palmerston requested the hon. baronet to repeat the question when the Chancellor of the Exchequer was in his place, as he hoped he would be by Monday afternoon.

Friday.—*Volunteer Rifle Corps*.—In answer to Sir J. Shelley, Mr. S. Herbert said, the Government proposed to accept the rifle corps on certain conditions. First, that there should be a safe and sufficient range in which they might practise, and in order to secure this, that a military officer should be sent down to examine the ground. The second condition was, that the arms should be in safe custody; third, that the rules should be sanctioned by the Secretary of State for War; and fourth, that the corps should be under military inspection. Upon these conditions being fulfilled, the Government would supply 25 stand of arms to every 100 men. It was not necessary that every man should be armed, and by issuing 25 per cent. of rifles one section would be always armed.—Lord Elcho asked whether those men might arm who placed at their own expense.—Mr. S. Herbert said there would be no objection to an individual purchasing an arm.—Lord Galway asked what arm would be used.—Mr. S. Herbert said the Enfield rifle of the pattern of 1853.

[Left sitting.]

## ELECTION ADDRESSES.

Lord John Russell, Secretary of State for Foreign Affairs, at his re-election for the City of London on Monday spoke as follows on public affairs:—

"I have to return you my most grateful thanks for the honour you have done me in returning me for this the ninth time as your representative in Parliament. You are all aware of the occasion of this election. Lord Derby thought it right to advise her Majesty to consult the electors of this country upon the question whether or not they had confidence in his Administration. That challenge was taken up, and it was decided by the House of Commons that the late Administration had not the confidence of that body. According to all constitutional usage, Lord Derby resigned his office into the hands of her Majesty; and her Majesty sent for Lord Palmerston, who was charged with the duty of forming a new Administration. Now, gentlemen, you may perhaps remember that I

stated to the electors previously to the last election that if the late Administration should be overthrown, I did not think that any other Administration would be satisfactory to the country that did not contain a representation of the various sections of that great Liberal party which now for some 20 or 30 years had carried the important measures that had signalised that period. Lord Palmerston has endeavoured faithfully to fulfil that task. That there might be individual disappointments was impossible to avoid; but my belief is that, having endeavoured to perform the task faithfully, Lord Palmerston has presented an Administration to the country which will have the support of the country, and consequently the confidence of the House of Commons. There are two questions, gentlemen, which it will become the duty of the present Administration to consider. The first is the present state of foreign affairs; and being charged with that branch of the administration, while I feel the difficulty and responsibility of the charge, I feel it likewise incumbent on me not to go at any length into that matter. I have told you on former occasions what, as I conceived, was the deep-seated cause of the present war,—that it was not the ambition of one man, or of two men, or of three men; but that it was the grievous misgovernment of Italy, which had lasted for 40 years, and which the Italian people had at various times endeavoured to throw off. I should have been happy had that which I thought perfectly possible been accomplished,—had the Powers of Italy, together with France and Austria, been able to make an amicable arrangement upon the subject. That was not the case; and these three Powers—Austria, France, and Sardinia—are now engaged in a bloody and destructive war. We may hope that the moderation of the successful party and the wisdom of the defeated party may lead in no long time to an honourable and satisfactory peace; but our duty is to continue in the path of neutrality, which the whole country has determined to adopt. If, however, that moderation and that wisdom should not be manifested, it is impossible to say how far this war may extend and what Powers may take part in it. It therefore behoves this country, for her own security, for the defence of her own honour and her own interests, not to neglect her navy or her army, but to be prepared for any contingencies that may arise; and I will repeat here what I said in the House of Commons—that I shall at all times be willing to pay my tribute of applause to the late First Lord of the Admiralty (Sir J. Pakington), and to the Board which served with him, for the energetic exertions which they made to place the navy in an effective condition. Such being the state of foreign affairs, then, the first duty incumbent upon us is vigilance. We must watch every move that takes place, and consider what bearing it may have on the future. In the next place, whenever the time shall arrive—and I hope it may soon arrive—when the belligerents may be disposed to terminate this destructive contest, it will then be the business of this country to give such counsels as may lead to a termination of the war honourable to all parties, and as may afford better hopes for the independence and liberties of Italy. Such, gentlemen, is, in short, the only explanation I can give you with regard to our foreign policy. With respect to our domestic policy we shall have to consider—although not in the present session—the great question of the amendment of the representation of the people in Parliament. I have always told you that in my opinion an extension of the franchise—the admission of greater numbers of the people to the enjoyment of that franchise—would strengthen the institutions of the country by placing them upon a broader and safer foundation. How far that extension should go, in what degree representation should be transferred from smaller places to large communities, must be the subject of anxious deliberation with the Cabinet. I believe they will consider that question fairly; and I trust the measure they may produce will be satisfactory to the country. I cannot at the present time enter into any further development of the policy of the Government. In a very few days that Government will stand before the House of Commons. I trust their merits will be sufficient to sustain them in the eyes of the people of this country. So long as they deserve confidence I hope they will receive support. I ask for nothing more for the Government of which I am a member, and I have only again to return thanks to you for the confidence you have placed in me—a confidence which I trust I shall not forfeit on this, as I have not forfeited it on any previous occasion."

**Sir George Cornewall Lewis, the Home Secretary, at his re-election for Radnor made the following remarks on the change of Ministry:—**

"An objection had been made to the course taken by the Liberals against the late Government, and he really believed it was the only objection which had any appearance of plausibility about it—that it was a 'party move.' This might have great weight with persons unacquainted with the real working of politics, and who might think badly of men who could join in a party move. Well, he admitted, without the smallest hesitation or concealment, that it was a party move. He joined in it with the full belief and knowledge it was so—that it was a combined operation of the Liberals in opposition, for the purpose of expressing a want of confidence in the Government. But he wished to call attention to the fact that our Parliamentary system was a system of political parties, and that by political parties only could it be worked. All great questions have been carried by party movers; and it was only by them we could hope to make any progress in the future; and the move on this occasion was an operation conducted in accordance with the scheme and system of constitutional government, by which it has always hitherto been worked, and by which, so long as it retained its present most happy character, it must continue to be worked. It is only when party is used for private and personal objects—when it is perverted from the real object of political party, which is the promotion of public objects by a number of men combined in entertaining the same political principles—it is only when it is prostituted to low and unworthy objects that a party move becomes a term of reproach. But when it was used, as he maintained it was on the late occasion, for a worthy purpose, in accordance with the opinions of the persons combined in union, then, he contended, it was a constitutional and Parliamentary move—one sanctioned by the authority of all the great statesmen of the country—one which our form of government renders the only means by which men can maintain and enforce their opinions. He then adverted to the vacillating conduct of the late Government and to the unsatisfactory measures they had brought forward. Persons, he observed, who so easily shift their opinions—who blow hot or cold—who adapt their political conduct merely to the temperature of the day—who are hot when the thermometer is high, and are cold when the thermometer is low—who are always steering by what they see will be the probable number of votes on the opposite side of the House—seemed to be unworthy of the confidence of the country. If the late Government had retained in power the principles they professed in Opposition—if they had been consistently what they were in name, a real Conservative Government—he confessed his objections would have been much less than they were under existing circumstances. He should have voted against those measures which he believed were bad, but he should have reposed confidence in their honesty and sincerity. In the present divided state of parties—because they knew that the Conservative party mustered strongly in the House of Commons, and would act up to the principles they professed before the late official episode, and would resume those opinions which for the convenience of the moment they discarded—he quite admitted that what was called a strong Government could not be formed. But there was sometimes a little mistake about what was called a strong Government. A strong Government might mean a Government commanding a very large majority of votes, supported by men prepared, when the country was divided on great questions, to give them a consistent support. That was not the state of the country at present; but a Government which has a clear policy, which is formed by persons having pronounced and decided opinions, prepared in office to act upon the opinions they entertained in opposition—which does not, to use the well-known words of Lord Palmerston, take the Government with the 'engagements' of their predecessors, but takes Government with its own engagements as it held them in opposition—he said that a Government of that sort, although it might not be strong in the popular sense of the word, is, so long as it conducts the affairs of the country in a proper spirit, likely to meet with that support which would enable it to defy unreasoning opposition and to act with honesty and sincerity. Although a Government strong in the popular sense of the word might not be possible, yet he believed it was possible to get, and he trusted we had got, an honest and sincere Government—a Government not afraid to avow its principles, not afraid to act up to them when possessed of power. There were two questions now agitating the public mind—the Reform Bill and the state of our foreign relations. That was not the place or the moment to enter into a discussion of the question of Parliamentary Reform. He could only say he felt satisfied that the present Government would, at the earliest time which may be consistent with the proper conduct of public business, propose to Parliament a measure of Parliamentary Reform which they would be able to support upon their united responsibility, and which he felt confident would not be founded upon the same principle as that of the late Government, namely, of taking back with one hand what you appeared to give with the other. With respect to foreign affairs, he sincerely trusted that if any great success had been achieved by the allies, and if it should lead to negotiations with the Austrian Government, that a spirit of moderation might be evinced by the conquerors, and a spirit of reasonableness by the conquered; and that the result of such negotiations might be to place the government of the Italian provinces in a more satisfactory and less afflicting position than we have witnessed for some years."

**Sir Charles Wood, at his re-election for Halifax, spoke as follows on the state of the navy and the forthcoming budget:—**

"Attacks have been made of late upon Lord Palmerston's Government as having neglected the defences of the country. Gentlemen, believe me there is no truth in such an accusation. Lord Derby stated the other day that when we left office the navy was in a state of impotence and decrepitude. Great orators are apt to indulge in oratorical flourishes, but I am happy to be able to quote the evidence of the late Government itself, not in words but in acts, to prove that when they did accede to power they found the navy in a most efficient state. We had a superiority over the French when I left office of no less than 240 vessels of steam power—a superiority greater than the whole number of the French navy at the time; and the best testimony that can be given to what we had done is that they accuse me of having done too little, but they reduced the means which we proposed for the increase of the navy. Would they have done that if they had thought that our navy was insufficient? Could they have reconciled it to themselves, in spite of the remonstrances of those who were in the permanent service of the country. Could they have reduced the means which we had prepared if they thought our means insufficient? They boast of adding ships to the navy. True it is they were launched in their time, but they were built in ours. Of the ships which have been added to the navy in the last year—12 line-of-battle ships—eight were built by us, four were converted by them. The fact of adding is true, but credit is due not to those who launched but to those who built. I have thought it right to make these observations, because I think I should not have done my duty to my constituents if I had betrayed my duty to my country, and my constituents have a right to know from my own lips the answer to those accusations, which are as unjust as they are untrue. Now, gentlemen, the other question of importance is the question of the Reform of the representation of the people. Upon that subject you know my opinions. I don't believe it is possible to pass a Reform Bill during the present session of Parliament. We are now, owing to delays for which we are not accountable, beginning a session on the 1st of July which usually begins early in February. The whole of the estimates are to be voted, the budget and financial measures to be proposed; and when I tell you that the deficiency is nearer 5,000,000*l.* than 4,000,000*l.*—that is the legacy that our predecessors have left to us, that is the deficiency which they have created, and which we have to make good—you will, I think, admit that it is no slight task we have to undertake, and that it will require some time for discussion. The estimates and the budget are never in ordinary times completed before Easter—about two months after the assembling of Parliament. Two months from the beginning of July, and it will probably be about the end of August before we can have completed the estimates and financial business of the session. I do not think that it will be easy to induce the House to begin upon a Reform Bill on the 1st of September. It must be the first business to be undertaken on our reassembling, but before we separate I don't believe it can be performed. What that Reform Bill may be of course you cannot suppose that I can tell you. It must be the object of early and serious deliberation among those who compose the present Cabinet. That Cabinet comprehends Lord John Russell, Mr. Cobden, and Mr. Gibson, and I think you may look at this as a common security, independently of our own opinion, that the Bill will not be of a retrograde nature, like the last, but that what it does will be soundly done, framed upon sound principles, promoting popular power, and extending the franchise to many of those, at least, to whom we think it ought to be given."

**Sir George Grey, Chancellor of the Duchy of Lancaster, at his re-election for Morpeth referred to public affairs in the following terms:—**

"The first duty of the Government must be to endeavour to keep this country from any participation in the war, and not to take any part in the warlike proceedings now agitating Europe, unless such a course was imperatively demanded by a consideration of the honour and the clear interests of this country. If the war could be restrained within its proper limits there could be no doubt that no occasion whatever could arise which would implicate us in it. Their next duty would be to avail themselves of any favourable opportunity that might offer to obtain peace and a settlement of those questions which had occasioned hostilities. However, this country must be prepared to meet any emergency, and he was sorry to say that the consideration of financial matters in the coming session would be so protracted as to interfere to a great extent with those questions of social and political importance in which the House of Commons would be much more gladly and usefully engaged. But, whatever might be the course of business during the present session, he hoped and trusted and believed that at the earliest period consistently with their duty to the country the Government would be prepared to deal with the question of Parliamentary Reform. He trusted that measure would be conceived in a spirit which, while it would give no undue preponderance to any one class of the community, might widen the basis of our representative system so as to strengthen our institutions and extend the interest of their maintenance among many who had now no direct share in the representation of the people."

**Mr. Milner Gibson, President of the Poor Law Board, at his re-election for Ashton on Monday made the following remarks on his acceptance of office:—**

"It may be said by many that I ought to have joined no Government, and especially a Government in which there are men with whom I may have previously disagreed. Sir the other evening, when I had the honour of addressing a meeting of the electors and non-electors, I made some observations on that point. I must tell you frankly that I began for one to be a little sick of a continual charge that was brought against the Liberal party of this country, that we were so divided into sections and so dissevered from one another that, however numerous we might be, we should always be totally incapable of carrying on the government of the country. We have been repeatedly taunted with our divisions, and now I find that when there is a prospect of union and of harmony we are taunted with our agreement, and it is called a factious coalition. Now, I say it is no factious coalition upon which the present Government is founded. It is founded upon certain broad fundamental principles, in which all members of the Cabinet are prepared to agree. Their differences are matters of degree, and perhaps may not turn out to be matters of principle; and their desire is to co-operate cordially together, in order to give effect to the general principles of the great Liberal party of this country, that now is inclined to trust them with the administration of affairs. In what position would a great party have been when, after a general election, they had declared that the Government of Lord Derby was no longer to conduct affairs, if they, the great Liberal party, had been unable to form a Government themselves? To form a Liberal Government was a necessity arising out of the situation in which we are placed. The attempt has been made. I believe that attempt will be successful, and let us hope that the success of the Government, or its failure, at any rate, will not for the future turn upon those internal personal questions with which the Liberal party have been taunted; that if they fail they will fail fairly and honestly by being placed by constitutional methods in a minority, but not thrown out of the Government by an apparent impossibility to act together in the administration of affairs. If a Government falls constitutionally and fairly, according to our old English usages, nobody need complain, but I am rather sick myself of Governments representing great parties, being broken up by mere dissensions and divisions, not upon questions of principle, and which dissensions and divisions ought, therefore, to be studiously avoided. It certainly is the desire, I believe, of a great portion of those who support the Liberal cause that a Government should be formed in which the bulk of the Liberal members of Parliament may have confidence, and which they can support. That being so, the attempt that is now made I hope will be permitted to have a fair trial, that the Government may be allowed to get fairly on its legs, to have an opportunity of considering its policy. When it has had that opportunity I, for one, ask no favour and no partiality, but merely that it should stand or fall by its public policy, and by the confidence that it has been able to inspire among the great body of the people. We shall, no doubt, be required, as the late Government felt an obligation to undertake a similar duty, to deal with the question of Parliamentary Reform. I doubt not that that question will be dealt with in the right spirit. I don't say that all will be done that ought to be done. If a number of men act together there must be concessions, provided they be not vital concessions of principle. I am one of those that are always prepared to take an instalment of a good thing, without at all committing myself not to come afterwards and ask for the rest. I believe that whatever is done in the way of Reform will be sound in principle, and will have no tendency to make the representation more exclusive than it now is, but, on the contrary, will have a decided tendency to give greater political power to the body of the people, and thus to popularise the institutions and government of the country. That will be its honest tendency. The amount of that measure of Reform it is impossible for me, as an individual, to predict. The measure must be the result of the joint deliberations of the present Government, and I hope, for one, that it may be such a measure as will be suited to the times in which we live, and will meet the approval of all the intelligent and thoughtful men of this country. We have, no doubt, differences upon the question of Reform among us, as upon all other political questions, but there is one thing that the Liberal party will not, and ought not, to assent to, that there should be any change in the representative system called Reform, but which may not be amendment—which may be a change for the worse instead of for the better, as I believe the Bill would have proved to be, if it had been passed, that was recently introduced by the Government of Lord Derby. My political opinions and principles are exactly where they were. It is my desire to give effect to those principles in the Government, as I have attempted to give effect to them out of the Government; and I shall now take leave of you, hoping that you will view my conduct with a fair consideration. I ask no favour or partiality at your hands on personal grounds; my only claim upon you is on public grounds, and by my public conduct only I ask to be permitted to stand or fall."

**Mr. Cardwell, Chief Secretary for Ireland, at his re-election for Oxford made the following remarks on the state of Ireland:—**

"Perhaps you will permit me to refer more particularly to the country with which I am about to be more immediately connected. In considering the vast importance of union amongst ourselves, few things can be more gratifying than to take a review of the change which has, within our memory, taken place in the sister country. The time has, indeed, long gone by when a distinguished Irish statesman could meet with the fate of Mr. Burke, and be rejected by his constituency in an important English city for no other offence than having advocated freedom of religious opinion and equality of commercial privileges. But even in our time, that great improvement which has been visible in our own country has taken place in an increased degree in the sister island. I remember when I first visited it, now more than 20 years ago, I saw every part of it. The first sod for its internal communications had not been then dug, and that vast mine of wealth, agricultural improvement, was in its earliest and its rudest beginning. Now Ireland, like England, is traversed by railways, agricultural improvement is making progress still more rapid and remarkable than that we all see it is making in this island, and above all, by the universal acceptance of better feelings and principles of government, a common feeling is growing up which I trust under all Governments that may hereafter succeed to power will be fostered and increased, so that England and Ireland may present the spectacle of a united kingdom in heart and in affections, governed by one Sovereign and one Government, animated by one heart and one spirit, and constituting together the noblest and greatest of all the peoples on the surface of the earth. It is impossible to expect or desire that in all particulars the two islands should exactly resemble one another. The resemblance should be that which has been so beautifully described by the poet—not an exact one, but rather that family resemblance which belongs to the relations of sisterhood—'Two lovely berries on one stem, seeming divided, but yet a union in partition.' And I sincerely trust that throughout the difficulties which our foreign relations may entail, the union of this people within itself in all its parts, both in this and in the other island, may carry us in safety through them, and cause the flag of our Sovereign to wave higher and higher amid all the conflicts which may shake the thrones of the rest of the world."

MR. LOWE, Vice-President of the Council, at his re-election at Calne, spoke as follows on the war and its probable effects on England:—

"He cordially recognised the principle of maintaining a strict neutrality, and hoped they would be able to maintain it: but he must deal candidly with them. He was not without some apprehension on the subject. He believed it was the intention of the Parliament and the people to maintain a position of neutrality in the war, but they must look the thing boldly in the face, and see how the matter stood. There was a talk about localising the war in Italy, but he would ask how was it likely that they could confine the war to Italy? They had the Hungarians with Kossuth and Klapka sent into Hungary for the purpose of exciting the people, and France was already in possession of Genoa and Leghorn, and perhaps was now possessing herself of Venice, and she was also drawing close to the frontiers of Germany. Germany was preparing to meet her, and Prussia had made proposals to Germany for concerting together. Therefore unless through the interposition of one who ruled over Kings, it seemed impossible, unless some wonderful and unaccountable change took place in the minds of the Emperors of France and Austria, that another month should elapse without war being declared between France and Germany. France was a gallant and military nation, and was flushed with her successes over an enemy trained to war. He would say, then, that there was danger lest the tide of success should flow now as it flowed at the beginning of the present century under the great Napoleon, and lest the country should find itself in a position in which participation in an European war is unavoidable. This was a reason, therefore, why we should prepare ourselves to meet such a contingency, should it occur; we should not begrudge any sacrifice in order to be prepared. Whatever might be our sympathy with the Italians, there had never been any war so provoked as this war. It was a tearing up of the treaty of 1815. We must be prepared to defend our own coast and to prevent an invasion; for a single week of the presence of an invader on our shores would do us more injury than a century could repair."

**MR. WILSON, Vice-President of the Board of Trade,** at his re-election for Devonport made the following remarks on the war and the Reform Bill:—

"He had no great confidence in the professions of the Emperor of the French, that he had no object in waging war other than securing liberty to that great and noble people the inhabitants of Italy. He was not prepared to say that without good reason he would give credence to the professions of the French Emperor, but under present circumstances he believed that the proclamations which had more than once been sent out to the world represented the true state of the Imperial mind at the moment. This country ought to continue in the course of neutrality, for there was but one circumstance in which she would be called upon to interfere. Should it so happen that the Germans came to the assistance of Austria and Russia to that of France, and should they endanger the independent kingdom of Belgium, then by treaty England was bound to preserve the independence of that country; and the day, he trusted, would never come when a matter obligatory on England would be set aside or met with a negative. It would be the duty of the Government and Parliament to keep the fleet in an effective condition, and to hold naval supremacy in the Channel and the Mediterranean. In reference to the coming Reform Bill, he said he had no doubt that when introduced it would be found a measure of progress, and that it would not, like the Reform Bill of the late Government, give with one hand what it took away with the other; extending the franchise in one way and compensating for that extension by a reduction in another way. He trusted that the measure as far as it would go—and he hoped it would go so far as to satisfy all reasonable expectations—would satisfy those who wish to go further, that it was a step in the right direction, and one that should inevitably lead hereafter to a further advance.

## Metropolis and its Vicinity.

PRESENTATION OF AN ADDRESS TO SIR JOHN LAWRENCE.—A meeting was held at Willis's Rooms on Saturday, for the purpose of presenting an address to Sir John Lawrence, Bart., on his return to this country from India; the Bishop of London occupying the chair. Sir Culling Eardley having addressed the meeting on the object which had called them together, the Bishop presented the address in a speech of great length commending the unceasing efforts made by Sir John Lawrence to spread the Christian Scriptures throughout the length and breadth of India. Sir John Lawrence then rose and was most enthusiastically received, the whole company rising, and the rounds of applause being repeated again and again. Having apologised for being obliged to read his reply, observing that the state of his health rendered it difficult for him to speak without suffering pain, and without the danger of suffering more hereafter, he read the following reply:—

"My Lord Bishop, ladies, and gentlemen,—I heartily thank your lordship and the many noblemen and gentlemen who have signed the address, for the high honour which they have done me. You have been good enough to attribute to me a large share of the credit which is considered due to those who fought to maintain the supremacy of England and secure the safety of her people, so sorely jeopardised in the late dreadful struggle in India. I am grateful for the good opinion of my countrymen, and deem their suffrages the highest honour I could gain. There were, however, in that crisis many men by my side who are fairly entitled to participate in this distinction, and whose services I have endeavoured to bring to notice. All, however, which we did was no more than our duty, and even our immediate interest. It was no more than the necessities of our position impelled us to attempt. Our sole chance of escape was to resist to the last. The path of honour, of duty, and of safety was clearly marked out for us. The desperation of our circumstances nerved us to the uttermost. There never, perhaps, was an occasion when it was more truly necessary to win or die. To use the words of my heroic brother at Lucknow, it was incumbent on us, 'never to give in.' We had no retreat, no scope for compromise. That we were eventually successful against the fearful odds which beset us, was alone the work of the great God who so mercifully vouchsafed His protection. Nothing but a series of miracles saved us. To Him, therefore, alone is the glory due. I see no valid reason for changing the opinion which I expressed on the expediency of allowing the Bible to be read in all our schools and colleges in India by those who desire to do so. Far from apprehending evil from this liberty, I believe that the results for some years would be scarcely perceptible. In progress of time no doubt, however, the seed which was sown would bring forth fruit. It is not possible to introduce western learning and science into India without leading its people to throw off their own faith. If this position be correct, surely we are bound to give them facilities for acquiring a knowledge of the true faith. This is our true policy, not only as Christians but as statesmen. In doing our duty towards them we should neither infringe the rights of conscience nor interfere with the free will of man, while we should be working in the true way to maintain our hold on India. Had the mutineers of the Bengal army possessed some insight into the principles of the Christian religion they would never have been misled in the manner they were—they would never have banded themselves together to resist and to avenge imaginary wrongs. Ignorance in all ages has been productive of error and delusion. India has formed no exception to this rule. I pray that the misfortunes entailed by this mutiny may teach England true wisdom, without which her tenure of India can never prove prosperous and enduring."

ARRIVAL OF MR. COBDEN FROM AMERICA.—Mr. Cobden arrived at Liverpool on Wednesday morning by the steamer Indian, and proceeded in the course of the evening to Manchester on his way to London. On arriving in the Mersey he was received by his brother, a deputation from his constituents at Rochdale, and a deputation of gentlemen resident in Liverpool, numbering altogether about 200, who cheered him loudly as soon as he was perceived on deck. The hon. gentleman on landing proceeded with his brother to the Adelphi Hotel, where he received letters from Lord Palmerston and Lord John Russell, and numerous addresses, including one from the merchants and inhabitants of Liverpool, one from the Liverpool Financial Reform Association, one from the Liverpool Peace Society, and one from the Liverpool Reform Association, all of which expressed a hope that he would accept the office offered him in the Government. In replying to the first of these addresses, which was presented by Mr. W. Brown, Mr. Cobden spoke as follows on his proposed acceptance of office:—

"I am quite unprepared to offer any opinion as to the subject of my taking office, or on the formation of Government. Nothing more surprised me than to find myself included in such contemplated arrangements. You will agree with me that this is not a matter which I ought to refer to now. I have a letter in my pocket from Lord Palmerston, written in a most frank and courteous spirit, offering me the appointment of President of the Board of Trade. I think the answer to the letter is due to his lordship in the first place. All I can say is that the answer which I shall send to that will be founded entirely upon what I believe to be the interest of the public in this question. You must be good enough to bear in mind that in a case of this kind the person most interested is the only one who can be thoroughly competent to form a conclusion, because it is he alone who bears the responsibility of the step which he takes, and although friends may advise one course or another, they cannot afterwards share his responsibility, and therefore he ought, in duty to himself and the public, to be very deliberate and careful in coming to a decision upon the matter. I will say no more upon this subject than that so far as my humble judgment enables me to decide, I will take the course which I believe will be most conducive to the interests of the public in that respect, and in doing so I feel that I shall have the friendly interpretation of the gentlemen I see around me in whatever may be the course I shall feel bound to take."

ADDRESS TO SIR BENJAMIN HALL.—A special meeting of the Marylebone vestry was held on Saturday, at which Sir Benjamin Hall attended and took leave of his constituents on his ceasing to be a member for the borough, by reason of his elevation to the peerage. It had previously been resolved on the motion of the Rev. C. J. P. Eyre, the Rector, to present an address congratulating Sir B. Hall on his elevation to the House of Lords; and at the same assuring him of the sense which the vestry entertains of the great ability and zeal with which he has devoted himself to all matters affecting the interests of the parish, and of the readiness of access and courteous attention which he has shown to all persons connected with it during the 22 years he has represented the borough of Marylebone in the Commons House of Parliament. In acknowledging the compliment Sir Benjamin Hall spoke as follows:—

"He felt deeply gratified by the resolution they had passed; and when he reflected that it was the expression of feeling of a body in which there were many gentlemen of political opinions widely differing from his own, the resolution was still more gratifying to him. He was grateful for the support he had received during the long period he had represented that borough in Parliament. After his long connection with the borough of Marylebone it might be expected that he should state generally the circumstances which have led to his retirement from its representation. During the progress of the formation of the new Administration Lord Palmerston sent for him and expressed his regret that at the present time he could not offer him a seat in the Cabinet, but that he would not give the office of First Commissioner of Public Works to any other person, without placing it at his disposal; and that if, upon consideration, he should be of opinion that he could not, as a member of the House of Commons, again accept that appointment unaccompanied by a seat in the Cabinet, he was of opinion that there should be some public recognition of his services, and he proposed to submit his name to the Queen for elevation to the peerage. He also said that his services would still be of value. He did consider that he could not remain in the House of Commons, holding office, without a place in the Cabinet; and he therefore accepted the seat in the House of Peers, which had been offered him in so gratifying a manner. With regard to his public life, he said he had represented Marylebone for a period of 22 years. When he first came forward, in 1837, personally unknown to the electors, although not publicly unknown, for he had previously for some years been member for Monmouth, and consequently his political opinions were well known, he did so on a requisition signed by 2000 electors, requesting him to come forward in the place of Mr Henry Lytton Bulwer. There were then but 8000 electors, and having a requisition from one fourth he was induced to comply, and he returned at the head of the poll. It was a remarkable fact in the history of that borough that no one man, except himself, had ever sat as its representative for two entire Parliaments. Since that time he had had no less than six different colleagues. The first was Sir Samuel Whalley, whose seat became void for want of the property qualification. Next came Lord Teignmouth, who only sat out the remainder of the Parliament; Sir C. Napier, who sat in but one Parliament; Lord Dudley Stuart, who sat in one Parliament and the half of another; then came Lord Ebrington, and next Mr. Edwin James. He had had the honour of being elected for Marylebone no less than eight times, and during a long period a very large proportion, and at times the whole of the business of the borough had devolved upon him. He believed, from the communications he had received from all parts of the borough, that he had discharged that business in a satisfactory manner. He had brought forward a measure which he felt was calculated to benefit the metropolis, and he trusted that that measure would ultimately work well for the benefit of the people of the metropolis. He had now only to thank them for the confidence which they had placed in him, and for the support they had given him during a long series of years. This in all probability would be the last time he might have the honour of addressing them in that Court-house at a public board, although he might have the pleasure of meeting them upon other occasions. All he hoped was, that in their future member they would find a gentleman who would care as much for their interests as he had done during a period of 22 years, and who would do them honour and be a credit to the borough which he would represent in the most important assemblage in the whole world."

THE LOSS OF THE SAPPHO.—A despatch dated the 12th of April last has been received at the Admiralty from the Governor of Victoria, New South Wales, stating that the Colonial Government steamer Victoria had returned to Melbourne after an unsuccessful search for anything to indicate the loss of her Majesty's sloop Sappho in the neighbourhood of Bass's Straits, although each island and rock in the vicinity of the Straits was examined by the ship or boats, and the Victoria was assisted in her search by her Majesty's sloop Elk.

REPORT OF THE GAS COMMITTEE.—The select committee of the late House of Commons appointed to inquire into and report as to the existing arrangements for the supply of gas to the metropolis, have reported to the House the evidence taken before them, which fills a blue-book of 130 pages. The witnesses examined were Dr. John Challice, Mr. W. Crossley, Mr. T. Pelling Slee, and Mr. Samuel Hughes. The report proper occupies about a dozen lines; the committee, finding the subject a difficult one, having printed the evidence without abridgment. The appendix includes a series of tables, which presents some interest, as showing the cost and other particulars of street lighting. The price paid for each public light per annum varies in different parishes, ranging from 65*s.* to 135*s.* This is explained, however, by reference to another column, which shows that some lamp-posts belong to the vestry and some to the gas company. The number of hours per annum during which the lamps are burning is 4804 in all town parishes, less in the country and suburban ones. The number of cubic feet per hour burnt is in most cases five, though less in some few instances.

NATIONAL PORTRAIT GALLERY.—Several works have within the last few days been added to this Gallery. They consist of portraits of Cowley, the poet, Selden, the Marquis of Ormond, Lord Hood, and the seven bishops who were tried and acquitted in James II.'s reign. The two first, however, are the only ones of these new acquisitions which are yet hung up in the rooms.

THE OPERA FLORAL ARCADE.—When the plan of the new Opera House was determined on it was intended to erect adjacent to it a large Floral Arcade, which was at first expected to be completed by the commencement of this season, and to form an important adjunct to the attractions of the new Opera. The

Arcade, however, is not yet completed, and is not likely to be during the summer; nor is it intended to form a mere ornamental accessory of the Opera, for although on four grand occasions every year it is to be used with that view, the object with which it has been constructed has been to erect a great flower market and nothing more. When complete it is expected to be the handsomest market of flowers in the world, and a most important addition to the very scanty show of ornamental edifices in London. It has a frontage of 75 feet in Bow Street, in which is the principal entrance, and its total length when completed will be 280 feet. The interior is divided into a nave and side aisles, the former being 50 feet wide, and the latter 12 feet 6 inches each. The nave is covered with a large semicircular-headed arch, entirely composed of iron and glass. The height from the floor to the underside of the ribs is 50 feet, in addition to which, on the crown of the arch, a lantern light roof, 6 feet wide, runs the whole length. The basement underneath the principal floor is 16 feet 8 inches in the clear. It will thus be seen, adding the lantern light, that the total height from the basement floor level to the apse of the lantern roof ridge is about 70 feet. The main roof is composed of 11 principal ribs, 21 feet 5 inches centre and centre, and connected by light purlins. The ribs are supported by 24 columns, extending from the basement, which in the hall, at the springing of the arches, have enriched capitals. The side avenues have 'lean-to' roofs, and are connected with the principal roof by elegantly-designed spandrels. The supporting columns rest on York stone slabs, 2 feet 6 inches by 2 feet 8 inches in thickness, underneath which is a solid body of concrete 2 feet in thickness. The floor of the hall when completed will form an excellent example of iron construction. It will consist longitudinally of 32 arched girders of great strength, with 200 others intersecting them transversely; these are flanged and adapted to have hollow tile arches turned between them. The longitudinal girders are 18 inches in depth, and the transverse ones 13 inches. The whole of the roofs are covered with bent glass, 21 onnces to the foot. The *façade* in Bow Street is of a highly ornamental character. It is designed in five compartments, the central one having a circular-headed arch, divided into 13 radiating panels, with a rim of circles round its lower line, similar circles being introduced to divide the different compartments on each side of the great central opening, which thus produce an agreeable harmony of design. The minor portions on each side of the great arch are also circular-headed, and have their spandrels filled with pierced ornamental work, of excellent design and workmanship. Over these are circles of laurel wreaths, having *paterœ* in their centres. The extreme compartments at each end of the front are to be used as entrances, and are each about 9 feet in width, the chief one in the centre being about 32 feet wide in the clear. To these details, given by the *Building News*, we may add from the *Times* that when the Arcade is entirely complete it will be decorated in white and gold, a style which will admirably suit its light and elegant details. Through all parts of the structure pass hot-water pipes for keeping up the temperature during winter, and gas is also laid on, so that the interior can be lighted up for night fêtes in an instant. The building will of course be divided among the principal growers, and all the flowers will be arranged in a large bank in the centre nave, with smaller ones in the aisles. Seeds, cuttings, tools, seats, and garden furniture of all kinds will be sold only in the aisles—the centre being reserved exclusively for flowers. The night promenade in connection with the opera will only be given four times in a season. On these occasions the Arcade will be closed earlier than usual, in order that it may be carefully swept and arranged. The whole Arcade will be lit up at dusk and thrown open to the opera audience for the night. On such occasions there will be no ballet, and a sufficient space allowed between the acts of the opera to enable all who choose to promenade among the flowers. In order to give great facilities of ingress and egress on these nights there is an entrance into the Arcade from the grand staircase, and one for the opera entrance hall. A large entrance in the north wall, about 50 feet from Bow Street, leads from the pit, and a fourth door above from the orchestra stalls. Thus there are no less than four additional means of exit provided from the theatre. The doors leading from the grand staircase and entrance hall will, as soon as the Arcade is finished, be left open on every opera night. A passage formed of a short glass and iron screen shuts off the Arcade from the Bow Street entrance, where carriages of visitors to the opera can both set down and take up, and by this additional convenience 11 carriages can take up at the same time.

Case of Poisoning at Poplar.—On Tuesday morning a coroner's jury assembled for the third time in Gough Street, East India Road, Poplar, to inquire into the death of Ziporah Wright, aged 21, who died under mysterious circumstances from the administration of an irritant poison, supposed to be cantharides. The evidence proved that the deceased and a man called George F. Royal had been lodging for about eight months at No. 44, Gough Street. On the 31st May deceased (who had only been confined five weeks) was seized with violent pains in the stomach and sickness. The landlady was called, when some brandy was administered to her, but the symptoms increased. The landlady asked deceased what she had been taking, when she replied "Only some coffee, which my husband gave me in a cup and made me drink, although it was very bitter." She continued to get worse, when a surgeon was sent for, and found her suffering from intense thirst and a burning sensation in the throat. On Friday the man Royal left the house and did not return. The deceased continued to get worse, and died on Saturday morning, the 4th June. On a *post mortem* examination it was evident that death had been occasioned by some irritant poison; but Dr. Letheby, who analysed the contents of the stomach, could not state positively what it was. It appeared from the evidence that the deceased and Royal had quarrelled. The jury returned a verdict of Wilful Murder against Royal, who is not in custody, and the coroner issued a warrant for his apprehension.

The Public Health.—The Weekly Return of the Registrar-General states that the total deaths in London in the week ending Saturday, June 25, was 970. In the corresponding weeks of the 10 years 1849-58 the average number was 1000; which, if raised in proportion to the increase of population, will become 1100. The present return is therefore 130 below the average. During the week the births of 936 boys and 829 girls —in all 1765 children—were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1555.

## Provincial.

Boroughbridge.—Among the obituary notices in the *Leeds Intelligencer* is the following:—"On the 20th June, aged 45, Mr. Peter Matterson, of Low Dunsford, near Boroughbridge. He and his ancestry have been the owners and occupiers of the farm on which he died for more than 800 years. The farm was not entailed, and the owner has always been a Matterson, without adoption."

Bristol.—The sale of the Buckingham and Chandos estates situated at Priddy, Gheddar, Stoke, Draycot, and Westbury took place a few days since in this city. The sale consisted of 190 lots, and about 2000 acres of land. Much of the best land obtained very high prices, a great portion fetching more than 200*l*. per acre. The manor house and estate were purchased by Mr. C. Tyley, the present occupier, for the sum of 21,500*l*.

Broxbourne.—A shocking occurrence took place on Saturday last in the vicinity of Rye House, by which two young women were drowned, and four other persons very nearly met with a similar fate. It appears that on Saturday morning an excursion party of between 80 and 100 workpeople employed at Messrs. Abbott's brewery at Bow arrived at Rye House in numerous vans, accompanied by a band of music. It was the annual feast given by the firm, and the men were accompanied by their wives and families. On their arrival they dispersed in different directions, amusing themselves at cricketing and other games, while a party of six got into a light boat for a row down the river. They had proceeded about half a mile when the boat capsized, and immersed the whole of the party into deep water. Every possible means were taken to rescue those who were clinging to the bottom of the boat and screaming for help. With difficulty four of the party were brought to the banks of the river; one or two were insensible, and it was a considerable time before they were restored. The remaining two of the party, named Sarah Maria Hall, aged 17, and Lizzie Ferguson, aged 14, sunk before assistance arrived, and were both drowned.

Cardigan.—A memorial of 95 ministers, composing the Conference of the Annual Assembly of the Independents for the counties of Cardigan, Pembroke, and Carmarthen, held at Llanelly, June 7, has been presented to Lord Palmerston, urging the policy of non-intervention in the war in Italy. To this memorial Lord Palmerston has sent the following reply:—

"Sir,—I am desired to acknowledge the receipt of the memorial from the annual assembly of the Independents for the counties of Cardigan, Pembroke, and Carmarthen, urging the necessity of non-intervention on the part of this country in the war between France, Sardinia, and Austria, and to inform you that her Majesty's Government have no intention of advising her Majesty to take part in the present war, and that they do not foresee the probability of any events that would lead them to depart from the policy of neutrality.—I remain, sir, your obedient servant, "C. G. Barrington."

Cheltenham.—This fashionable watering-place has been thrown into no little excitement by the discovery of a most disgraceful affair, the circumstances attending which have only just been brought to light, through the elopement of the principals to America. For some time past Dr. Humphreys, the master of the Cheltenham Grammar School, had been regarded as one of the lights of the town since Mr. Close had been removed to the deanery of Carlisle. The week before last, however, he tendered his resignation of the office on account of pecuniary difficulties, and left Cheltenham on a visit (as he said) to some relatives in Derbyshire, with the view of enlisting their sympathy to extricate him from his difficulties. In a day or two he wrote to Mrs. Humphreys, whom he left behind him at Cheltenham, from Liverpool, representing that he had been disappointed in his expectations of obtaining assistance, and that he should be detained from her a few days longer. By the next post Mrs. Humphreys received a letter from the very friends in Derbyshire whom her husband had represented he was visiting, inviting her and Dr. Humphreys to visit them. This aroused her suspicions; she consulted her friends, inquiries were instituted, and Mrs. Humphreys proceeded to Liverpool. There she ascertained that he had taken a passage for America in an assumed name with a married woman, the wife of one of his largest creditors, a physician [illegible] Cheltenham, and the mother of eight children himself having six. It seems he had sent large quantities of luggage to Liverpool, in anticipation departure. On the morning of his departure [illegible] pool he obtained from Mrs. Humphreys her watch all the money she had, and left her and her children totally unprovided for. Dr. Humphreys had moved in the first circles, and made large professions of religion and morality.

Dudley.—A woman named Sarah Wilton Hughes, native of Sedgley, near this town, died a few days since at the great age of 113 years, without any previous illness. She was an inmate of Sedgley workhouse. Her career was a notable one, and for miles around she was recognised as "the nine lives woman," and in speaking of her people said, "She is like a cat, she will never die." She lived in single blessedness and never had any children. She out-lived all her brothers and sisters, though one was born more than 40 years after. During the whole of the time she was in the workhouse, although entirely blind, she knitted, without any aid, all the stockings for the paupers, numbering [illegible] She enjoyed good health, was very cheerful, and remarkably active.

Hull.—A double suicide was committed on Friday night at Aldborough, a little watering place on the Yorkshire coast, about 14 miles from this place. A young man named Webster Tomlinson, 18 years of age, apprenticed to a shoemaker in the village, courted a young woman about his own age, named Ann [illegible] Johnson, who at this time was nursing her aunt, the second wife of Tomlinson's uncle. It is believed that there was an impediment to their marriage in the fact that the young woman was already the wife of a person filling a situation as tutor in a school, and that she had an interview about a fortnight ago with her husband, when he discarded her. On Friday night she was seen walking with Tomlinson to the north end of the village, and there is no doubt that they spent the night together. On the following morning their bodies were found floating in the sea, their bodies being tied together by a handkerchief which went twice round the neck of the girl. She had previously divested herself of her crinoline petticoat and every other article of dress which might have kept her afloat. The jury at the inquest returned a verdict of "Found drowned," and on Monday they were both interred in the same grave, in the ground belonging to the parish church. A large crowd of persons assembled to witness the funeral, and the event has caused immense excitement in the district.

Ilfracombe.—Our Obituary last week recorded the death of Ensign Blathwayt, of H.M.'s 83d Regiment, youngest son of Colonel Blathwayt, of Dyrham Park, Gloucestershire, from an accidental fall from the cliff. It appears that the young officer formed one of a pic-nic party held on the Combe on the 16th ult., and in the course of the afternoon climbed down the cliff in search of gulls' eggs. While so engaged, he missed his footing, slipped, and was literally dashed to pieces. The deceased was on the eve of marriage, and his untimely death has naturally created great distress both in his own family and in that of his affianced bride.

Oxford.—It is understood that the University of Oxford will confer the honorary degree of D.C.L. on Sir John Lawrence at the approaching Commemoration.

Shields.—A reply to the resolutions of the South Shields Town Council, relative to the defences of the Tyne, has been received from the Secretary of State for War, stating that the necessity of providing works for the important trade of the river Tyne has not been lost sight of by her Majesty's Government, the armament of Clifford's Fort having been already prepared and probably by this time sent to its destination; and the armament for Tynemouth Castle has been ordered and will be supplied with as little delay as possible; that measures are now in contemplation for [illegible] and arming the works of the Spanish Battery, at the mouth of the river.

Shrewsbury.—The solicitor of the Earl of Shrewsbury and Talbot has issued a circular to the tenants who declined acknowledging the earl's title to the estates, informing them of the recent decision in the full Court of Common Pleas in his lordship's favour, and cautioning them that if they, at the next day for rent, refuse to acknowledge the earl as their landlord, steps will be taken to vindicate his lordship's rights. The majority of the tenantry have long since acknowledged his lordship as their landlord.

York.—William Atkinson, who was tried at the assizes for the murder of Elizabeth Scaife at [illegible] and acquitted on the ground of insanity, has since remained at York Castle, and has lately been very violent, attacking indiscriminately the [illegible] officers, and prisoners who happened to be near him. Within the last week he inflicted severe injuries on a man confined with him, and would probably have killed him if one of the prison officials had not separated them. In all probability these outbreaks will cause his removal to another place of security.

Tipton.—A resumed inquiry into the late supposed and murder at Prince's End was made on Saturday. The poor woman is now supposed to have been the daughter of Mr. Jabez Rolands, who formerly lived at Tipton. No more additional evidence was adduced. After the jury had conferred about an hour they returned a verdict of Wilful Murder against [illegible] Allen, Thomas Watkins, E. Faraday, and Acton.

## Ireland.

THE LATEST CRISIS.—The Corporation of Dublin were thrown into a state of surprise and excitement on Tuesday by the receipt of a letter addressed to the Lord Mayor by the Earl of Carlisle, in which his Excellency intimates his desire that the usual congratulatory address on his exemption of the Viceregal office should be dispensed with. This communication has spread a panic among the officers, and the old cry of "Whig treachery" is raised, as the abolition of the Viceregalty is said to be openly whispered forth in the letter of Lord Carlisle.

LAW APPOINTMENTS.—Mr. Serjeant Berwick has accepted the office of Judge of the Bankrupt Court, the first-class chairmanship of the East Riding of Cork, worth 1100*l.* a year, and a serjeantcy becomes vacant on his appointment. Mr. Charles Barry, of the Munster Circuit, has been appointed Crown Prosecutor for the city and county of Dublin, in the room of the late Mr. O'Loughlen.

THE FENIAN TRIALS.—The *Dublin Morning News* states that the present Attorney General for Ireland has, to a large extent, abandoned the prosecution of the parties charged with complicity in the Fenian conspiracy.

THE IRISH MILITIA.—An official notice has been issued calling out, with two exceptions, all the Militia regiments in Ireland. An order to this effect has been despatched from the proper office to the head-quarters of all the regiments throughout the provinces.

## Scotland.

THE WESTERN BANK.—The initiatory step in the prosecution of the directors of the West Bank was taken on Saturday by the service of the summonses at the instance of the liquidators. The document, which extends to about 80 pages, sets forth at great length the grounds on which it is sought to make the directors liable for the losses sustained by the bank, including "wrongous, culpable, and gross violations and neglect of duty, excess of power and contravention of the company's contract of co-partnery, carrying on business after 25 per cent. of the capital had been lost, fraudulent concealment and false and fraudulent representations made to the bank and its shareholders, by the directors and superintendents of management."

THE MORGAN HOSPITAL, DUNDEE.—In 1850 Mr. John Morgan, a gentleman who had made his fortune in India, and had lived in retirement for about 30 or 40 years, died at Edinburgh, at a very advanced age, leaving property at the value of nearly 100,000*l.*, chiefly personal, and a third part, with certain small legacies deducted and bequeathed to public purposes, indicating an intention to found an hospital for the education and maintenance of 150 boys in his native town, Dundee. He had no near relations, but the estate was the immediate subject of competition among different parties claiming to be next of kin, and the litigation was carried on for several years on the footing of intestacy, the Court of Session ultimately affirming the claims of two families of competitors to the personal estate and of two of their number as heir-at-law to the small landed property. Finally the town council and nine incorporated trades of Dundee stepped in to claim the succession to found an hospital in terms of the holograph writings above referred to. The Court of Session refused to give effect to those writings as testamentary, but upon appeal to the House of Lords that judgment was reversed, and the holograph writings were sustained as making a bequest "of so much of the testator's personal estate as was necessary to found an hospital in the town of Dundee to accommodate 150 boys," it being left to the Court of Session to determine the character and style of the hospital and the amount necessary to found it. When the case came back to the Scottish court the litigation was carried on between the town of Dundee and the next of kin, the former proposing a scheme for a first class hospital resembling George Heriot's at Edinburgh, and the latter seeking to cut down the bequest to the lowest amount. Considerable discussion took place as to the class of boys to be admitted, the architecture of the building, and the character and extent of the establishment. The result of these proceedings is, that the Court of Session has now appointed a person to report a scheme for their approval "for the erection of an hospital in Dundee for the education, lodging, boarding, and clothing of [illegible] boys, the sons of tradesmen, mechanics, and persons of the working classes generally, whose parents stand in need of assistance to enable them to educate their families, or who are orphans in need of such assistance," having regard to these considerations—that the property left by the testator (deducting expenses for litigation) does not exceed 80,000*l.*; that the testator's will does not authorise unnecessary expenditure on architectural structure or decoration, or internal fittings and furnishings; that the mode of administration should be as economical as is consistent with the right conduct of the establishment; and that the education should be suitable to the class of boys to be received. It is likely that at least three-fourths of the estate will be found necessary to give effect to the bequest.

MURDER AND SUICIDE IN EDINBURGH.—On Saturday last the discovery was made of a murder committed in a house at Fountainbridge, by James Howat Ferrier upon his wife, Agnes Gourlay, or Ferrier, followed by suicide. The wife was of very intemperate habits, which led to frequent quarrels between her husband and herself. The neighbours had heard a good deal of scuffling in the house on Wednesday night the 22d ult., of words they had little notice owing to the frequency of such disturbances, but another husband saw his wife having been seen on Thursday and Friday. A suspicion taking was made on the police, and on Saturday the door was broken open, when the bodies of both were found on the floor with their throats cut, and having, apparently, been dead some days. The man was lying with his face downwards, while a razor under the neck. It was evident that he had first murdered his wife and then cut his own throat. Beside him was found a slip of paper with these words:—"I am now ready for my business. I have applied to the authorities of both Ayr and Edinburgh for graduation, and many got laughed at. I now appeal to God. I am still with her, so let us be laid beside my boy, but if the women is to be buried there, let my body be given to the dissecting room, and after they have done with me let my body be burned." The deceased were both about 40 years of age. The man was not engaged in business further than looking after some property, from which he drew his income.

## Railways.

OPENING OF THE SOUTH DEVON AND TAVISTOCK.—The railway from Plymouth to Tavistock was opened on the 21st ult., giving to the latter town a means of cheap and rapid communication with the commercial metropolis of the west. The inhabitants of Tavistock celebrated the event with rejoicings on a scale of unexampled splendour.

DESTRUCTION OF THE SOUTH-EASTERN STATION AT READING.—A fire of a fearful character, which has resulted in the entire destruction of the railway station belonging to the South-Eastern Company at Reading, occurred at nearly half-past one on Sunday morning. The station was an entirely wooden structure, containing booking offices, first and second class waiting-rooms, superintendent's office, &c. Adjoining was a covered platform about 100 feet in length, and from it all the trains were despatched for London. A lamp-room was erected at the extreme end of the platform, and in this place the fire appears to have originated. About half-past 3 o'clock the flames had spread along the covered platform and gained the booking office. A high wind prevailed at the time, and the fire having got possession of the building, it was impossible for any one to enter and attempt to remove any portion of the property from destruction. By 4 o'clock the station was a mass of flame, and pieces of burning wood flying about set fire to the thatch of a stable by a yard about 20 feet below the level of the railway. Fourteen horses belonging to the company in this stable, and as it was manifest that the building must be destroyed, the attention of some of the railway officials was directed to effecting their rescue. With some difficulty they were all got out. By 5 o'clock the roof of the station fell in, followed by a stack of chimneys. In less than half-an-hour afterwards the station was one mass of ruins. The most important book, containing the accounts of the traffic at the station, was fortunately saved from destruction, but the large iron chest, containing books and money, was so injured that it cannot be unlocked. The iron chest belonging to the South Western Company, who used the same office, has not been found. The silver and gold, though discovered, was scattered, but a number of Bank of England notes placed in a leathern bag, to be forwarded to the head office at Waterloo, have been destroyed. The notes have appeared to have entirely singed or dried up the bag, and nothing is left but the brass ring that was at the top. The telegraph communication was stopped by the destruction of the instruments and the melting of the wires. The total loss of property is very considerable, as, in addition to the station being burnt down, a large quantity of luggage belonging to passengers has been destroyed. The stock of books, opera glasses, &c., at Messrs. Smith, the newsvenders, was of more than 2000*l.* value.

## Law.

COURT OF QUEEN'S BENCH.—*Judges' Duties in Joint Concern-ment.*—*The Queen v. Mansfield and others.*—This was an indictment preferred by the Commissioners of Sewers, charging the three defendants, *Thomas Baker Mansfield, Edward John Mansfield*, and *Henry Spencer Mansfield*, with a misdemeanor in respect to the mode of the sale of a property in the county, and on bringing cases up on affirmation for the sale of said property. The defendants all pleaded Not Guilty, and Edwards and Lewis acting on the advice of counsel, retracted their plea and pleaded "Guilty." It will be remembered from the details which have already appeared in our Metropolitan News that the defendants, who had established an office in Bedford Street under the name of Armstrong & Co., received from a Mr. Lawless the sum of 500*l.* for obtaining for his brother, Mr. Henry Charles Coote, a magistracy, through a Queen's Counsel, a commissioner in the army "without purchase." A rule nisi had been obtained to quash the indictment, and was to-day (the 20th) made absolute.

## Obituary.

THE MARCHIONESS OF SLIGO died at an early hour on Sunday morning at the family residence in Harley Street. She was confined on Thursday last, and on the following day underwent the usual painful manifestations which attend the same. She was the daughter of Mr. Anthony Nugent, of Donore, county Meath, and was early married to the Marquess on the second wife, in the autumn of last year. It will be remembered that on the Queen of Spain's marriage some impediments were considered by his lordship being Protestant and her Majesty being of the Roman Catholic faith, but these were afterwards removed by a dispensation from the Pope.

THE HONOURABLE LEGGE WILLIAM BRIDGEMAN died on Saturday morning at his residence in Hertford Street, Mayfair, after a protracted illness. The deceased, Charles Augustus Bridgeman, Earl of Bradford, and Baron Bradford, of Bradford, county of Middlesex, in the Peerage of Great Britain, was eldest son of Charles fourth earl, and Maria, second daughter and co-heiress of Sir Edward Cobbrooke, Bart. He was born in 1778, and was consequently in his 82nd year. He married in 1801 Matilda Catherine Grosvenor, daughter of the late Hon. Sir Grosvenor, by whom he leaves surviving issue the Countess of Malmesbury and Lord Charles, now Earl of Bradford.

ROBERT KNIGHTLEY, Esquire, Equerry to the Duke of Cambridge, died on Friday morning, at St. James' Palace, after a few days' illness. Robert Knightley was for many years Chamberlain of the Household of the Royal Highness the late Duke of Cambridge, and since the Duke's decease has continued his valuable services to the Royal Highness's family, who most deeply deplore the loss of a faithful and devoted servant and friend.

BIRTHS.—On the 23d ult. at 15, Bailey Street, the Marchioness of Sligo of a daughter.—On the 21st ult. at Wykeham Hall, county Durham, Lady Eden, of a son.—24th ult. at 13, Grosvenor Place, the Lady Caroline Richards, of a daughter.—At Hartham Grange, Lacock, the Hon. Mrs. Talbot, of a son.—25th ult. at Worcester Wood, Monkton Farleigh, the wife of the Right Hon. J. R. Mowbray, M.P., of a son.—27th ult. at 102, Westbourne Terrace, Hyde Park, Lady Chamberlain, wife of Sir Henry Oxenden R. Chamberlain, Bart., of a daughter.

MARRIAGES.—On the 25th ult. at St. George's Hanover Square, London, the Hon. Henry William Capell, fourth surviving son of the late Lord Essex, to Emma Georgiana, eldest daughter of Colonel George Campbell—and on the 30th ult. at Westminster Abbey, the Ven. Archdeacon Thynne, Rector of Kilkhampton, Cornwall, to Caroline Eliz. Kendall, eldest daughter of the late Russell Kendall, Esq.—and on the 30th ult. at St. George's, Hanover Square, Charles Pelham Villiers, M.P. for Wolverhampton, to Theresa Emma, second daughter of Thomas Lewellin Bassett, Esq., of Knowle, Devonshire.—On the 30th ult. at Iver Church, near Uxbridge, the Very Rev. Edward Craig Wilkins, Dean of Waterford, to Barbara, widow of the Hon. and Rev. Robert Wyndham, late rector of [illegible], Norfolk.—22d ult. at St. James's Church, Piccadilly, Charles Barnes Mansfield Lynley, Esq., Barrister-at-Law of the Inner Temple, younger son of William John Lynley, Esq., M.P. of Brynkynall Hall, to Laetitia Emma Maria, eldest daughter of Colonel James Cowell (late Assistant Adjutant-General of the Indian army), of 5, Queen's Gardens, Hyde Park.

DEATHS.—On the 25th ult. in Wilton Crescent, of diphtheria, Walter Charles Trevelyan, second son of Sir Walter Calverley Trevelyan, Bart., aged 6 years.—And on the 26th ult. in Wilton Crescent, of the same disease, Lucy Trevelyan, only child of the Honourable Charles Edward Trevelyan, aged 4 years.—On the 27th ult. at Arbury Hall, Nuneaton, Warwickshire, the Right Hon. Frances Anne, Countess Dowager of Chesterfield, in the 84th year of her age.—On the 28th ult. at Moor Park, Farnham, Surrey, Lieut.-Gen. Sir Thomas Bradford, K.C.B., Colonel of the 1st Battalion of Rifle Brigade, and Deputy Adjutant-General of the Forces at Woolwich.—And on the 29th ult. at Ashley Hall, Cheshire, Mary Ann Lowndes, widow of the late John Lowndes, Esq., of Barrow Hall, in the county of Warwick, and formerly Staffordshire.—On the 30th ult. at 24, Grosvenor Street, London, Mary Ann Lowndes, daughter of the late John Lowndes, Esq., of Barrow Hall, Warwickshire.—On the 30th ult. at Moor Park, Farnham, Surrey, Lieut.-Gen. Sir Thomas Bradford, K.C.B., Colonel of the 1st Battalion of Rifle Brigade, and Deputy Adjutant-General of the Forces at Woolwich.—And on the 31st ult. in Upper Seymour Street, Portman Square, the Rev. Stephen Edmund Pepys, Chancellor of Lincoln Cathedral.—23rd ult. at the Rev. William Hodge Mill, of the College, Winchester, and Rector of St. Swithin's, in that city, aged 47.—21st ult. at 44, Castle Street, Edinburgh, Lieutenant David Ogilvy, late of the 4th Foot (or Royal Regiment). He had [illegible] the war, and was severely wounded at [illegible] on the 18th ult. at [illegible], Hampshire, Lieut.-Colonel Thomas Hall, late of the Bengal Artillery, and 3rd Madras Light Cavalry.—On the 29th ult. at Hampstead, Mary Ann Wilkinson, widow of the late Rev. Thomas Wilkinson, Rector of Ashton-under-Lyne, and Vicar of Bowden, Cheshire.—On the 30th ult. at Ashley Hall, Cheshire, Mary Ann Lowndes, widow of the late John Lowndes, Esq., of Barrow Hall, Warwickshire, and formerly of

realise from 6s. to 15s. per cwt. Cucumbers abundant. Cut flowers chiefly consist of Orchids, Gardenias, Heliotropes, Lily of the Valley, Violets, Mignonette, Heaths, and Roses.

HOPS.—BOROUGH MARKET, FRIDAY, July 1.

Messrs. Pattenden & Smith report that the accounts from parts of the plantations speak of fresh fly, lice, and honey-dew, still the bine at present keeps growing, but unless the filth soon decreases many think it must go into blight. Market quiet, but little doing on duty.

BRITISH WOOLS.—LONDON, FRIDAY, July 1.

The prices of fleeces have been fixed by a large number of wool fairs all over the country, and the bulk of the wool has been sold at several pence a pound over the anticipated rate; the fact being that the stock of wool in the consuming counties had got much lower than was ever confessed to.

METROPOLITAN CATTLE MARKET.

MONDAY, June 27.

The supply of Beasts is rather larger than on Monday last, still it is by no means excessive. The hot weather makes buyers cautious and prices are lower. The number of Sheep and Lambs is larger, and the demand is smaller; prices are consequently lower, and a clearance cannot be effected. Calves are selling about the same as on Thursday. From Germany and Holland there are 240 Beasts, 3300 Sheep, and 270 Calves; from Scotland, 200 Beasts; from Norfolk and Suffolk, 2800; and from Irelaud 50 Beasts and 1000 Sheep and Lambs.

Beasts, 3718; Sheep & Lambs, 31,100; Calves, 336; Pigs, 400.

THURSDAY, June 30.

We have a few more Beasts than on Thursday last. Trade is slow, but quotations are not altered from Monday. The supply of Sheep and Lambs is good; the best qualities are pretty readily disposed of, but several of other descriptions remain unsold. The number of Calves is again large; trade is heavy for them at late rates. From Germany and Holland there are 118 Beasts, 2080 Sheep, and 425 Calves; from Spain, 12 Beasts; and 108 Milch Cows from the home counties.

MARK LANE.—MONDAY, June 27.

The supply of Wheat from Essex and Kent to this morning's market was small, and met a slow sale at 1s. per qr. advance upon the prices of this day se'nnight. The market was thinly attended, and foreign Wheat neglected; its value remains nominally the same as last week. Barley brings the extreme prices of last Monday. Beans are rather dearer. Peas are unaltered in value. Oats are a steady sale at an advance of 6d. per qr. from Monday last upon all fine qualities. The Flour trade is very dull without alteration in prices.

FRIDAY, July 1.

With the exception of a thunder-storm on the 26th, and some hours' heavy rain on the 28th, the weather has been fine and dry the last eight days. Although in many parts of the kingdom Tuesday's rain has beaten down the Wheat and Barley, we hear of no serious complaints; indeed in Scotland it has been most beneficial, but it is thought the crops there had already suffered too much from drought to be abundant. The improved tone observable in the Wheat trade towards the close of last week has again subsided, owing probably to the fine weather and large importations from France and the Baltic into the principal ports of the kingdom; and although sellers have insisted upon full prices, business has been inactive. The value of spring corn was well supported, that of Flour unchanged. There are no arrivals of grain-laden vessels from Southern Europe reported during the week, and the transactions of cargoes arrived are limited to 1 cargo of Odessa Ghirka Wheat at 45s. 6d. per 492 lbs., and 1 cargo of Cavalla Maize at 28s. per 480 lbs., c. f. and i. On passage were sold 3 cargoes of Taganrog Ghirka Wheat at 44s. per 492 lbs., 1 Polish Odessa at 43s. 1½d., 3 Galatz Maize at 29s. to 29s. 6d. per 492 lbs., c. f. and i.; 1 cargo of Odessa Barley at 24s. per 400 lbs., and 1 Odessa Linseed at 48s. per qr. delivered. The arrivals of Foreign Wheat this week are large, fair of English, good of foreign Barley, and small of other grain. To-day's market was very thinly attended. The English Wheat left over from Monday and fresh up during the week remained unsold towards the close, although offered at that day's prices. There being scarcely any business in foreign our quotations must be considered nominal. Barley, Beans, and Peas are unaltered in value. For Oats there is a fair inquiry at the extreme prices of Monday.

ARRIVALS FROM JUNE 27 TO JULY 1.

| Foreign .. | 20220 ,, | 4490 ,, | 4510 ,, | 3680 ,, / — brls. |

LIVERPOOL, Tuesday, June 28.—We had a fair attendance of millers and dealers at our Corn Exchange this morning, but the demand for Wheat was quite in retail, and the rates of last market day may be nominally repeated; where sales, however, are forced ex ship it is necessary to make a reduction. Flour was held firmly at former prices. A good consumptive inquiry was experienced for Indian Corn at the extreme quotations of Friday. Oats advanced 1d. to 2d. per bushel; Oatmeal unchanged. Egyptian Beans were a shade better. Peas and Barley unaltered in value. The market ruled wthout animation.

FRIDAY, July 1.—Corn market poorly attended and business dull. Wheat saleable at 2d. decline on Tuesday. Flour 6d. per sack cheaper. Indian Corn, Beans, and Oats steady, at late rates. Oatmeal and Barley quiet without change.

PARTNER.—An eligible opportunity offers itself to an industrious Man of steady energy to take a joint share in a well-established and thriving NURSERY and SEED TRADE, situate in an excellent thoroughfare of one of the leading towns of a southern county. The coming-in is moderate, and the returns, which are ample, may be increased *ad libitum*.—Apply by letter only to Mr. LAMBDEN, Spa Wharf, Gloucester.

TO AGRICULTURISTS.—A young Man, respectably connected, with some experience in Agriculture, wishing to improve himself before taking a Farm on his own account, is desirous of meeting with a situation where his active services on the Farm would be considered equivalent to his board and lodging.—L. M., Post Office, Bovey Tracey, Devon.

TO EMIGRANTS.

BRITISH COLUMBIA.—A Lady about to proceed *vid* Cape Horn with her children to this rising Colony, wishes to meet with a respectable young WOMAN, who can be thoroughly well recommended, and who could not only assist in taking charge of the children, but render herself useful with her Needle during the voyage. A *free berth* in the Lady's own cabin is all that is offered for the passage, with board and lodging after arrival in the Colony, until the young woman shall have either entered the service of the Lady permanently or formed some other engagement. It is immaterial whether the young woman is married or not, all that is required being perfectly satisfactory references as to character, activity, and good temper, and the attendance and assistance above described in return for the passage that is offered.—Address, post paid, A. B., 5, Westbourne Place, Eaton Square, London, S.W.

WANTED, A FARMING MAN, who can take charge of the Stock and the Management of a small Farm of 90 acres. A married Man from 30 to 40 would be preferred. The Wife to undertake the Washing for the Family, for which a stipulated price will be paid.—Direct, stating qualifications, A. B. C., Post Office, Keston, Bromley, Kent.

WANTED, a married GARDENER (Single-handed) without incumbrance, to reside on the premises, in Buckinghamshire. The Wife would be preferred with some knowledge of the Laundry department. A good character must be had with both for honesty and sobriety.—Apply to Mr. R. TREES, 27, Queen Street, City, London, E.C.

WANTED, in the country, a plain WORKING GARDENER, who understands the common routine of a Flower and Kitchen Garden, where there is but little glass; an Assistant is given. Wages 16s. per week and a cottage.—Apply J. L. GOWER Esq., Westwood, Colchester, Essex.

PROTHEROE AND MORRIS are in want of a first-rate PROPAGATOR.—Address, in own handwriting, American Nursery, Leytonstone.—July 2.

WANTED, A PROPAGATOR, who thoroughly understands his profession, and can have a good character for sobriety and honesty.—Apply to OSBORN & SONS, Fulham Nursery, near London.

WANTED, AS PROPAGATOR, a respectable single man, well qualified in Hard and Soft-wooded plants. None need apply unless well experienced.—Address J. GRAY, Nurseryman, West Derby, Liverpool.

WANTED, an experienced industrious Man as PROPAGATOR AND PLANT GROWER, and who is also competent to undertake the Management of the Grounds during the absence of the employer. He must possess a thorough knowledge of Roses, Conifers, and Hardy Shrubs, also Soft and Hard-wooded Greenhouse Plants. Unexceptionable references required. An excellent Cottage and good Garden.—Apply, giving full particulars, and stating amount of wages expected, to JOHN CRANSTON, King's Acre Nurseries, near Hereford.

WANTED, a respectable young Man as UNDER GARDENER. He must be well recommended. None other need apply.—Address, stating particulars and wages required, to J. C., Post Office, Ingatestone, Essex.

WANT PLACES.—Letters to be Post Paid.

GARDENER (HEAD).—Age 39, single; thorough knowledge of his profession in all its branches; Land and Stock if required.—E. C., 21, Culford Road, De Beauvoir Town.

TO NOBLEMEN AND GENTLEMEN.

GARDENER (HEAD).—Age 28, single; unexceptionable character.—B. L., Mr. Phillips, Dairyman, Stockwell, Surrey, S.

GARDENER (HEAD).—Age 30, single; thoroughly understands the management of Pines, Vines, and Peaches, the Forcing of Fruits, Flowers, Vegetables, &c.—C. C., 5, Streatham Hill, Brixton.

GARDENER (HEAD).—Age 32, married, without incumbrance; perfectly understands his profession in all its branches. Seven years' good character from last place.—A. B., Batchelor's Library, Dover, Kent.

GARDENER (HEAD).—WILLIAM HOWARD, Gardener to W. P. Milner, Esq., Dykes Hall, Sheffield, will shortly be at liberty to enter into an engagement with any nobleman or gentleman requiring the services of a thorough practical Gardener.—Direct as above.

GARDENER (HEAD).—Age 30, married; has a good practical knowledge of his profession. Wife capable of taking charge of Dairy, &c. Can be well recommended for ability and good conduct.—T. P. G., Mr. Wood's Nursery, Sydenham, Kent.

GARDENER (HEAD).—Age 29, single; experienced in extensive Gardens in the Management of the Kitchen, Fruit, and Flower Gardens, Vinery, Conservatory, and Forcing Departments. Unexceptionable references.—W. H., Royal Botanic Gardens, Regent's Park, London, N.W.

GARDENER (HEAD).—Age 33, married, with one child; thoroughly understands his profession, especially with Early and Late Forcing, Kitchen and Flower Gardens. No objection to look after Land if required. Unexceptionable references can be given both from the last employer and others.—H. W., Church Square, Ealing, W.

GARDENER (HEAD).—A gentleman wishes to recommend his Gardener, a middle-aged, married man without incumbrance. Understands the management of the Kitchen, Fruit, and Flower Gardens; Vinery, Greenhouse, and Conservatory, and Forcing generally.—A. B., Mr. Dow, 5, Fitzroy Place, Kentish Town, N.W.

GARDENER (HEAD).—Age 34, married, no incumbrance; is well experienced in all the various departments of Horticulture, Forcing of all kinds of Fruits, Vines, Pines, Kitchen and Flower Gardening; also has had great practice in the general routine of Landscape Operations, Levelling, Draining of Land in both Public and Private Grounds, Laying out, Ornamental Planting, and Building Operations. Has lived as Head Gardener, and is fully competent to take charge of a gentleman's establishment, keep Accounts, &c., having filled situations of great trust from which he can be highly recommended, and can furnish the most satisfactory reasons for leaving. Wages 75*l.* per annum, with house and Vegetables.—Apply for all particulars to Messrs. A. HENDERSON & Co., Pine-Apple Place, Edgware Road, London, W.

GARDENER (HEAD OR SINGLE-HANDED).—Age 28, where there is a little Forcing preferred. Character unexceptionable.—F. H., Mrs. Winn's, Wembley, near Harrow.

GARDENER (HEAD), OR GARDENER AND BAILIFF.—Age 37, married, little incumbrance; thorough knowledge of his profession in all its branches. Four years' excellent character.—R. H. MORRIES, Landscape Gardener, Bromley, Kent.

GARDENER (FOREMAN).—Age 23, single; wishes to engage in a good establishment; is well acquainted with Forcing, &c., and has a good general knowledge of his profession. Good testimonials.—J. S., 42, Faulkner Street, Chester.

GARDENER.—Middle-aged, married, no incumbrance; thoroughly understands his profession; cultivation of Ferns, Orchids, all kinds of Hothouse and Greenhouse Plants, Melons and Cucumbers, Late and Early. Good character.—A. B., Mr. Griffin, 16, Hampton Terrace, Canonbury Town.

GARDENER.—Age 35, married; perfectly understands his profession in all its branches, including a practical knowledge of Botany, the Cultivation of Exotic Plants, Flowers, &c., with the most satisfactory reference as to ability and character. No single-handed place accepted.—C. I. I. Cooke, Cornwall Road, Brixton Hill, London, S.

GARDENER (SINGLE-HANDED).—Age 29, single; no objection to look after a Pony Chaise, or whatever may be required of him. Can have good character from last place.—D. D., Mr. George Threader, Stationer, Cheshunt, Herts.

GARDENER (SINGLE-HANDED).—Age 42, steady; has a perfect knowledge of the Management of the Flower, Fruit, and Kitchen Gardens. Good character.—W. M., M. Morris & Co., Newsvenders, opposite the Church, Stratford, Essex.

GARDENER AND BAILIFF.—Age 41, married, three children, native of Scotland; thoroughly understands his profession. Good reference.—W., Mr. Halsey, Nurseryman, Lancaster.

GARDENER AND BAILIFF.—Experienced in the general management of an Estate, chiefly on light land; Breeding and Rearing Stock, Marketing, Measuring and Selling Timber, Collecting of Rents, &c. Excellent references.—A. 2, Anerley Vale, Upper Norwood, Surrey.

BUDDER, GRAFTER, AND PROPAGATOR.—Age 21, single; two years' good character.—R. B., 29 Office, Brighton.

PROPAGATOR, OR FOREMAN AND PROPAGATOR.—Hard and Soft-wooded Plants, and experienced in Grafting; Azaleas, Camellias, Coniferæ, Rhododendrons, and Roses. First class references as to abilities.—C. A. Q., Messrs. Osborn & Sons, Fulham Nursery, Fulham, S.W.

TO NOBLEMEN AND GENTLEMEN.

FARM BAILIFF OR STEWARD.—Age 34, married; understands the improved system of Cultivation both heavy and light soils, the management of Stock, Buying and Selling the same, and Corn; well versed in Accounts. Satisfactory reference and cause of leaving present situation.—K. Y. Z., 220, Post Office, Great Wilbraham, Cambridgeshire.

TO NOBLEMEN AND GENTLEMEN.

FARM STEWARD OR BAILIFF.—Age 29, single; will shortly be at liberty, or immediately if required; of active, energetic, business habits, possessing a thorough knowledge of Modern Farming in all its branches, Draining, Farm Buildings, &c., having had extensive practice in different counties, and Breeding, Buying, and Selling Stock. The highest testimonials and reference can be given.—L. M., Messrs. Lawson & Son, 27, Gt. George St., Westminster.

HOULSTON & WRIGHT, 65, Paternoster Row.

## News of the Week.

AN armistice has been agreed upon between the EMPEROR OF AUSTRIA and the EMPEROR OF THE FRENCH, and Commissioners have been named to settle its duration and clauses. Nothing is at present known of the circumstances which have led to this suspension of hostilities, nor are we informed from which side the proposal originated. The news which had previously been received from the seat of war had led Europe to anticipate that another great battle would speedily be fought in the celebrated quadrangle of fortresses in which Austria was expected to make her last stand. Peschiera was already invested by the Sardinians, and the EMPEROR OF THE FRENCH, having been reinforced by 35,000 men under Prince NAPOLEON, had approached Verona and was watching Mantua. At the same time Venice was threatened by the French fleet, and GARIBALDI's force had repulsed the Austrians from Bormio and driven them back into the Stelvio Pass. The conclusion of the armistice has of course arrested these operations, and there is no doubt that England, Prussia, and Russia will now offer their mediation and exert all the powers of diplomacy to prevent the re-commencement of the war.

In the House of Lords on Monday, on the motion of the Duke of MARLBOROUGH, a select committee was appointed to inquire into the present operation of the law and practice respecting the levy and assessment of Church-rates. On Tuesday Lord LYNDHURST called attention to the state of the national defences, and gave rise to a long debate on the condition of the Navy, and on the best means of securing the country from invasion. On Thursday Lord CHELMSFORD called attention to the state of business in the new Divorce Court. The Lord CHANCELLOR stated in reply that a Bill was in preparation for the improvement of the Court, but that it was not intended at present to extend its provisions to Ireland. The Earl of RIPON said there was no intention to add to the militia force of Ireland; but none of the regiments now embodied would be disbanded.

In the House of Commons on Monday Mr. M. MILNES obtained leave to bring in a Bill to remove doubts as to the qualification of persons holding diplomatic pensions to sit in Parliament; and on the motion of Mr. S. HERBERT a select committee was appointed to inquire into the effect of the alterations which were made in 1855, in regard to the administration of the War Office and the Board of Ordnance. On Tuesday Mr. FITZROY announced his intention to carry out the views of his predecessor in office, by taking a vote in the estimates for the purification of the Serpentine during the autumn of this year. Mr. COLLIER obtained leave to bring in a Bill limiting the power of imprisonment for small debts exercised by the county court judges; Mr. ALCOCK obtained leave to bring in a Bill for the voluntary commutation of church-rates; and Sir W. SOMERVILLE obtained leave to bring in a Bill to enable Roman Catholic barristers to accept the office of Lord Chancellor of Ireland, on the ground that it was an office to which no Church patronage attached. Mr. WRIGHTSON's motion for leave to introduce a Bill to alter the law with respect to the vacating of seats on the acceptance of office, was negatived by a narrow majority of 2, the numbers being 53 to 51. On Wednesday, the second reading of Mr. DILLWYN's Endowed Schools Bill was carried by 210 to 192, and the Bill was subsequently referred to a select committee. On Thursday, on the motion of the CHANCELLOR of the EXCHEQUER, a select committee was appointed to inquire into the contracts formed by her Majesty's Government with various steam-packet companies for the conveyance of the mails by sea, and likewise into any agreements which have been adopted at the public charge for the purposes of telegraphic communications beyond sea. Mr. COWPER's motion for leave to bring in a Bill to restrain the erection of advertising columns and other permanent structures in the carriage ways of the metropolis was carried by 165 to 46; and Mr. SCHOLEFIELD's motion for the second reading of the Adulteration of Food Prevention Bill was carried by 227 to 103.

Mr. COBDEN has declined to accept the seat in the Cabinet which Lord PALMERSTON had reserved for him at the formation of the present Ministry, considering that the purposes of his public life will be best promoted by his remaining an independent member of Parliament. Mr. MILNER GIBSON has now been appointed President of the Board of Trade, and Mr. C. P. VILLIERS has been appointed to succeed Mr. GIBSON as President of the Poor Law Board, with a seat in the Cabinet.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Princess Alice left Buckingham Palace yesterday for Aldershott, and will proceed thence to Osborne on Monday. On Friday morning the Prince of Wales visited the Water Colour Exhibition. The Duke of Oporto went to Greenhithe. In the afternoon the Prince Consort, accompanied by the Prince of Wales, went to Windsor by the South-Western Railway, and distributed the prizes in the Home Park at the annual meeting of the Royal Association. The Queen, accompanied by the Princess Alice, went to Windsor by a special train on the Great Western Railway and visited the Duchess of Kent at Frogmore. Her Majesty and the Prince Consort returned to Buckingham Palace about 7 o'clock, accompanied by the Prince of Wales and the Princess Alice. In the evening the Queen had a dinner party and a concert. On Saturday morning the Prince Consort presided at a meeting of the Royal Commissioners for the Exhibition of 1851, held at the Palace of Westminster. The Prince of Wales went to Tunbridge, and visited the Countess de Neuilly. The Duke of Oporto and the Count of Flanders visited the Royal Arsenal at Woolwich. In the afternoon the Queen held a Court, at which the Hon. Charles A. Murray had an audience on proceeding to Dresden as Minister Plenipotentiary to the King of Saxony, and the Hon. G. S. Stafford Jerningham, her Majesty's Minister at Stuttgard, had an audience on arriving from Wurtemburg. Lord John Russell had an audience of her Majesty. The Queen afterwards took a drive in an open carriage and four, accompanied by the Princess Alice and the Duke of Oporto. The Prince Consort and the Prince of Wales rode on horseback. In the evening her Majesty and the Prince Consort, accompanied by the King of the Belgians, the Princess Alice, the Prince of Wales, the Duke of Oporto, and the Count of Flanders, honoured the Royal Italian Opera with their presence. On Sunday morning the

Queen and Prince Consort, the King of the Belgians, the Prince of Wales, the Princesses Alice, Helena, and Louisa, attended Divine service in the private Chapel of Buckingham Palace; the Rev. C. J. Phipps Eyre preached the sermon. On Monday morning the Prince Consort visited the South Kensington Museum. The Prince of Wales and the Duke of Oporto visited the United States Institution. In the afternoon the Queen held a Court for the purpose of receiving an address on the Throne from the Convocation of the Province of Canterbury. The Prince Consort and the Prince of Wales rode on horseback. In the evening the Queen had a dinner party. On Tuesday morning the Prince Consort went to the Trinity House and was sworn in on his re-election as Master of the Corporation. The Princess of Hohenlohe-Langenburg arrived from Frogmore, and visited the Queen. In the afternoon the Duke of Oporto left the palace for Greenhithe. The Prince of Wales and the Count of Flanders honoured Mr. Albert Smith's Chinese entertainment with their presence. The Queen, accompanied by the Princesses Alice and Helena, took a drive in an open carriage and four. The Prince Consort rode on horseback. In the evening her Majesty and the Prince Consort, accompanied by the King of the Belgians and the Princess Alice, honoured the Royal Italian Opera with their presence. The Prince of Wales and the Count of Flanders honoured the Haymarket Theatre with their presence. On Wednesday morning the King of the Belgians, the Prince Consort, and the Count of Flanders visited the Royal Botanical Gardens, in the Regent's Park. In the afternoon the Queen held a Privy Council at which the Right Hon. T. Milner Gibson was declared to be President of the Board of Trade; Earl Spencer, Groom of the Stole to the Prince Consort, the Earl of Ducie, Captain of the Yeomen of the Guard; Sir William Erle, Lord Chief Justice of the Court of Common Pleas; Viscount Bury, Treasurer of the Household; Lord Proby, Controller of the Household; and Sir James William Colvile, were sworn as Privy Councillors, and the Education Committee was reappointed. Earl Granville, Viscount Palmerston, the Duke of Newcastle, and the Right Hon. Sidney Herbert had audiences of the Queen. After the Council the Queen visited the Duchess of Sutherland at Stafford House. The Prince Consort and the Count of Flanders rode on horseback. In the evening the Queen had a dinner party. On Thursday the King of the Belgians and the Count of Flanders left Buckingham Palace on their return to Brussels. The younger members of the Royal family left the Palace for Osborne. In the afternoon the Duke of Oporto visited the Queen. The Prince of Wales went to Frogmore and visited the Duchess of Kent. The Prince Consort rode on horseback. In the evening the Queen and Prince Consort, accompanied by the Prince of Wales and the Princess Alice, honoured the Haymarket Theatre with their presence. Yesterday the Queen held a Privy Council at Buckingham Palace. After the Council her Majesty, the Prince Consort, and the Princess Alice left town for the Royal Pavilion at Aldershott. To-day her Majesty, accompanied by the Prince Consort and the Princess Alice, will review the whole of the troops in camp. To-morrow the Queen will attend Divine service in the North Camp church, and on Monday will proceed to Osborne.

THE QUEEN'S SUMMER TOUR. — It is announced that the Queen will pay her usual visit to Scotland this summer, but will not remain in the Highlands more than three weeks. It is not the intention of her Majesty to visit Ireland this year.

THE PRINCE OF WALES will leave London on Wednesday next for Holyrood, where his Royal Highness will remain until the arrival of the Court in Scotland, when the Prince will accompany the Queen to Balmoral.

THE DUCHESS OF KENT.—The health of the Duchess of Kent being re-established, her Royal Highness will leave Frogmore House next week to visit the Queen at Osborne.

DEPARTURE OF THE KING OF THE BELGIANS.—The King of the Belgians, accompanied by the Count of Flanders, left Buckingham Palace on Thursday for Dover, where he embarked for Ostend. The Prince Consort and the Prince of Wales accompanied the King to the Bricklayers' Arms Station, whence his Majesty proceeded by a special train to Dover.

THE GRAND DUCHESS MARIA NICOLAEVNA, sister of the Emperor of Russia, will pass the autumn and winter with her family in England. Her Imperial Highness's arrival is expected shortly. The Princes Nicolas and Eugène Romanofsky, Dukes of Leuchtenberg, have left town for Torquay.

THE CABINET.—A Cabinet Council was held on Saturday at the official residence of the First Lord of the Treasury, in Downing Street. Another Council was held on Wednesday, and another on Thursday.

MINISTERIAL APPOINTMENTS.—Mr. Milner Gibson has been appointed President of the Board of Trade in the room of Mr. Cobden, who has declined to accept the seat in the Cabinet offered him by the present Government. The office vacated by Mr. Gibson's promotion has been conferred on Mr. C. P. Villiers.

PARLIAMENTARY MOVEMENTS. — The Marylebone election terminated on Wednesday in the return of Lord Fermoy by a majority of 1901 over Major Lyon, and of 3136 over Colonel Dickson, the numbers being for Lord Fermoy 4219, Major Lyon 2318, Colonel Dickson 1083. Lord Alfred Paget has been re-elected for Lichfield, Colonel Kingscote for West Gloucestershire, Lord Castlerosse for Tralee, and Mr. Deasy for Cork county, all without opposition. Colonel Poulett Somerset has been elected for Monmouthshire, in the room of Colonel E. A. Somerset, without opposition. Lord Henley has been elected for Northampton without opposition in the room of Lord Lyveden.

POOR LAW BOARD.—Lord Palmerston has appointed Mr. Fleming, for many years Assistant-Secretary of the Poor Law Board, to the office of permanent Secretary, in the room of Lord Devon, resigned.

THE CHANNEL FLEET. — The screw line-of-battle ships Royal Albert, 121, bearing the flag of Rear-Admiral Sir Charles Fremantle; the James Watt, 91, Hero, 91, Algiers, 91, Mersey, 40, and the screw despatch gunboat Flying Fish, 6, left Portland harbour on Wednesday morning for a cruise in the Channel. The Agamemnon, 91, Emerald, 51, Blenheim, 60, and Pioneer, 6, remain at Portland.

## Foreign.

FRANCE.—The following circular has been addressed to the French diplomatic agents relative to the attitude of Germany:—

"Paris, June 20.

"Monsieur,—You know of the circular addressed by the Russian Cabinet to its agents in Germany, and you will have appreciated the justice of the views which it submits so opportunely to the consideration of the Federal Governments. One does not know better how to define the respective positions of the Powers in the affairs of Italy, or to arrive at a more correct judgment on the general situation. The Russian Government renders full justice to the sincerity of the assurances which we have given to Germany from the commencement of the war, and it sees in them, with reason, sufficient motives for the Confederation to regard with perfect confidence the development of the struggle in which we are engaged in Italy. My intention is not to return to an exposé of which you will have easily conceived the object. I point, nevertheless, your particular attention to the considerations in this document which belong more especially to the relations of the Confederation with the pending question. Not only in the opinion of the Russian Government is there no occasion for Germany to interfere, because neither her interests nor her rights are in danger, but in mixing herself up in the conflict she departs from the position which treaties have assigned to her. Not only is she unable to show in the existing state of affairs the necessity of protecting the European equilibrium, which is not menaced, and which she herself compromises if she pretends to say that she is necessarily interested in a war undertaken by Austria as a European Power, and that the action of the Federal body, considered as such, ought to be exercised beyond the limits of the Confederation; but such a doctrine would be productive in effect of nothing less than the complete incorporation of the non-German provinces of Austria into the Federal Union, and in this way it would be as much opposed to the real interests of the German States as to the spirit of the European treaties which have agreed to the conditions of their existence. The organs of Austria object, we know, that the possession of the Lombardo-Venetian kingdom in her hands would be necessary for the security of the Federal frontiers. When that Assembly had to occupy itself with the military organisation of the Germanic Confederation, the members of the association who have German possessions were called upon to name those of their provinces which they understood would participate in the common charges and obligations. Thus the *procès verbal* of the deliberations dated April 6, 1818, amply proves that Austria, after having enumerated her German territories, spoke of those of Italy, and declared in positive terms that she in no way entered into the view of extending beyond the Alps the line of defence of the Confederation. It was under consideration, we repeat, to fix the bases of the Germanic military system. The discussion assumed at this moment all the importance which belonged to it on a subject so closely connected with the essential interests of Germany. No voice was raised to assert that the Lombardo-Venetian kingdom, nor yet the Po nor its affluents, nor even the Adige itself, were necessary to the security of the Confederation; it was at the Alps, according to the proposition of Austria, that the Diet ought to place the frontier and the line of defence for Germany. I do not insist at greater length upon a fact which replies with such authority to all objections, and against which those based on false appreciations, and raised only by the pressure of circumstances, cannot prevail. The new military measures which have just been adopted in Prussia do not inspire us, therefore, with disquietude. The Prussian Government, in mobilising an important part of its army, declares that it has no other object than to protect the security of Germany, and to put itself in a state to exercise a just influence on the ulterior arrangements in accordance with the other Great Powers. We cannot in this find any reason to dissent from the Cabinet of Berlin. The Government of the Emperor, which was desirous that the affairs of Italy might be debated in Congress, very far from refusing what all the Powers concurred with it in seeking—their regulation—did, when necessary, itself call for their participation at an opportune moment. The circular of the Russian Government indicates, in a manner sufficiently plain, in what manner it will not fail to act when the proper time arrives. As this document recalls, and as I have myself informed you, the English Government, at the commencement of hostilities, tendered to the German Governments the best advice, counselling them by no means to make common cause with the Austrians against us. Without yet having official information of the disposition of the new British Ministry, we are authorised to infer, from the debate which preceded their coming into power, conclusions most favourable to the independance of Italy; and we are under the firm persuasion that the English Government is, in its views, as well as in the support of its influence, favourable to the solution that we ourselves seek. "WALEWSKI."

The *corps d'armée* of Marshal Pélissier, which is destined to observe the frontier of the Rhine, is to be completely formed and established in its cantonments by the 15th of this month. It is to consist of 160,000 infantry, 12,000 cavalry, and 400 cannon. The French Minister of Public Instruction has addressed a circular to the rectors of the several academies in France, requesting them to have all the bulletins of the army of Italy, as published in the *Moniteur*, read before all the pupils of the colleges, and stuck up in the interior of those establishments. "The French armies," says the Minister, "led on by the Emperor, are struggling to wrest Italy from foreign domination, and let our children in their turn join in all the impressions of the country." The *Moniteur* of the 30th publishes the following paragraph:

"Two detachments sent from the depôts of their respective corps having joined the army of Italy without being provided with the articles and utensils required for the campaign, the Minister of War has punished the superior officers who organised the departure of these troops with 15 days' arrest, and has published a censure on the general officers, who did not properly superintend the execution of his reiterated orders."

SPAIN.—The Madrid journals of the 30th ult. state that considerable sensation had been caused by M. Mora, one of the accused in the Collantes affair, having threatened to make revelations which will, he says, prove that some important political personages have been engaged in fraudulent transactions.

PORTUGAL.—Letters from Lisbon state that a week's hot weather, after the previous unseasonable rains, had developed the grape disease in the Bucellas and other wine districts round Lisbon upon a much more extensive scale than last year, and had checked the favourable anticipations in respect to the coming vintage.

SWEDEN.—Letters from Stockholm of the 26th June state that the disease from which King Oscar has been suffering for the last two years has lately increased to an extreme degree. His weakness has become so great that he cannot speak, and he has completely lost the use of his limbs.

HOLLAND.—Prince Henry of Holland, as Viceroy of Luxemberg, has just opened an extraordinary session of the States of the duchy by a speech, in which he announced that "in consequence of the measures which, in obedience to the resolutions of the High Germanic Diet, are carrying into effect throughout the Confederation, in order to place the armies of the States of Germany on a war footing," extraordinary expenses had become necessary; and the Government had therefore convoked the States in an extraordinary session to "complete the budget of expenses by voting the sums indispensable for the maintenance of the Federal contingent."

PRUSSIA.—The following is a summary of a Circular which has been forwarded to the representatives of Prussia at the various German Courts, in reference to the placing of a corps of observation on the Rhine:—

After explaining the policy of the Cabinet, the mission of General von Willisen in May last, and the motives that led to it, the Circular says that the Prussian Government has had to combat with separatist tendencies in Germany, and indicates the springs of that diplomatic action. It has desired and still desires the maintenance of peace. To arrive at that end, the Government is pursuing a mediation, to which it hopes to obtain the adhesion of England and Russia. For the interest of the security and power of Germany, and to support a common intervention in favour of peace, Prussia has decided on the necessity for a mobilisation of German and Prussian corps *d'armee*. The contingency of a war should always be taken into consideration, and in view of that contingency a junction of German *corps d'armée* with those of Prussia, necessary as it is in the interest of the security of Germany, should also be induced for the purpose of concerting military co-operation.

Prince Windischgratz has arrived at Berlin from Vienna on a special mission. The Empress Dowager of Russia arrived on Saturday at Potsdam, accompanied by the Prince Regent and other members of the Royal family.

FRANKFORT.—In the sitting of the Federal Diet on Saturday the proposal of Prussia to place a corps of observation on the Upper Rhine was almost unanimously agreed to. Several Governments were without instructions. On Monday in an extraordinary sitting of the Diet Prussia brought in new and further proposals respecting the establishment, extension, and command-in-chief of the corps of observation. These proposals were as follows:—1. The junction of the 9th and 10th *corps d'armée*. 2. The appointment to the command in-chief of the four non-Prussian and non-Austrian Federal *corps d'armée*. 3. The placing of all reserve contingents in readiness to march. On Thursday, at the re-assembling of the Diet, Austria proposed that the whole Federal Contingent should be mobilised, and that the Prince Regent of Prussia should be requested to assume the command in chief of it.

AUSTRIA.—It is reported at Vienna that the Austrian Government has called upon the Federal States to protect the Tyrol and other frontiers of the German Confederation, as the late defeat had obliged Austria to concentrate all her forces in Italy. It is also said that very alarming reports have reached Vienna from Hungary and Croatia. The reaction of military events appears to be already making itself felt in the domestic policy of Austria. The supporters of the Concordat have up to the present time succeeded in frustrating any attempt to give to the Protestants and Jews of the empire freedom of conscience, and the institutions destined to guarantee that freedom, as promised them by the organic ordinances. The *Vienna Gazette* now endeavours to pacify the public mind by stating that the Government is actively occupied in regulating the civil relations of the non-Catholic inhabitants in a sense of progress.

SWITZERLAND.—The Federal Council, in concert with the belligerent Powers, has decided that any corps *d'armée*, or soldiers taking refuge on Swiss territory, should be sent back to the side to which they may belong, the different Governments undertaking not to employ them again in the present war. Arms and ammunition are to be given up at the end of the war, and the cost of keeping them to be repaid to the Swiss Government. In consequence of this convention the garrison of Laveno and the soldiers of General Garibaldi's *corps d'armée* will be returned. The steamers on the Lago Maggiore which had been captured are to be given up for mercantile service, upon condition that they are not to be used again for the war.

ITALY.—The following important despatch announcing the suspension of hostilities, was published in an extraordinary edition of the *Moniteur* on Thursday.

"THE EMPEROR TO THE EMPRESS.—An armistice has been concluded between the Emperor of Austria and myself. Commissioners are about to be named to settle the duration and clauses of the armistice."

The *Moniteur* of yesterday, after giving this despatch, adds:—

"It is necessary that the public should not misunderstand the extent of the armistice; it is limited merely to a relaxation of hostilities between the belligerent armies, which, though leaving the field open for negotiations, do not enable us for the present to foresee how the war may be terminated."

A previous despatch from Valleggio dated Monday, the 4th, informed us that the French army, increased by Prince Napoleon's corps, was about to operate against Verona, while part of the Sardinian army carried on the siege of Peschiera. On the 29th ult. the Sardinian army closely invested the exterior fortifications of Peschiera on the right bank of the Mincio, and on the 30th crossed the river for the purpose of investing it also on the left bank. The Emperor having sent back the wounded Austrian officers without exchange, and having requested an exchange of prisoners, an Austrian officer has arrived with the announcement that the Emperor of Austria will also send back without exchange the wounded prisoners of the Allies, and that his Majesty is equally disposed for an exchange of other prisoners. The Austrians have abandoned the line of the Mincio, and fallen back on Verona, after having burnt the bridges at Monzambano, Valleggio, and Goito. Private letters from the head-quarters of Prince Napoleon state that another great battle on the banks of the Adige is expected, and that the Austrians were believed to have about 200,000 men in line. The *Moniteur* contains an official bulletin of the battle of Solferino, together with voluminous reports from the different generals of division. It appears from these accounts that the force of the Austrians amounted from 250,000 to 270,000; and that the new rifled cannon produced terrible effect. Its discharges reached the enemy at a distance whence the heaviest guns could not reply, and covered the plain with dead. The loss of the French was 720 officers put *hors de combat*, 120 of whom were killed, and 12,000 privates killed and wounded. Among the killed were 7 colonels and 6 lieut.-colonels, and among the wounded were 5 generals. The *Austrian Correspondence* says that the Austrian loss, as yet ascertained, was 1900 killed and 8100 wounded. The *Vienna Gazette* sums up the Austrian loss at Solferino as follows:—officers, killed 78, wounded 381; soldiers, killed 1855, wounded 7834; total, 10,148. The *Wanderer* says that of the general staff there were killed—Field-Marshal-Lieutenants Count Crenneville, Baron Blomberg, and Count Palffy, Major-General Baltin, and four captains. Among other deaths named are those of Prince Solms, lieutenant in the 6th battalion of Austrian Chasseurs, Prince Bruno of Isenburg and Badingen, who had only just entered the service, and Colonel Prince Windischgratz, who was found dead on the field of battle, surrounded by 1200 killed and wounded, both Austrians and French. The reports of the Sardinian army state that all the four divisions of which it is composed were engaged, and that its loss was 49 officers killed and 167 wounded, 642 privates killed and 3405 wounded, with 1258 missing. In one division three colonels were killed, and some of the regiments lost one-fourth of their whole number. On comparing the different accounts there is little doubt that in this single action about 40,000 men were killed or wounded. It appears that the plan of the Austrians was to surprise the French at 9 o'clock on the morning of the battle, but the Emperor of the French suspecting their movements, sent up Mr. Goddard in a balloon, and having thus obtained full details of the Austrian position, determined to take the initiative and attacked the Austrians at daybreak. The Emperor had one of his epaulettes shot off in the battle, and not only slept in the room which had been occupied in the morning by the Emperor Francis Joseph, but eat the dinner which had been ordered for the Emperor of Austria. Letters from Rome state that an inquiry into the disturbances at Perugia has been ordered. The Pope has addressed an encyclical letter, dated June 18, to the patriarchs, primates, archbishops, and bishops in communion with the Holy See, expressing confidence in the Emperor of the French, and threatening with the major excommunication any one who may attempt to interfere with the temporal possessions of the Holy See. Advices from Naples to the 2d inst. state that Prince Ottajano has been despatched to the Court of St. James on a mission reciprocating that of Mr. Elliot to the Neapolitan Court.

The Tyrol.—The Austrians occupy the Stelvio Pass, on the side next the Tyrol, with a force of 13 companies of infantry, and two companies of carbineers. On Monday a corps of from 3000 to 3500 Tyrolese Chasseurs had been threatening the Valtelline, but several columns of Garibaldi's and Cialdini's corps repulsed them from Bormio and drove them as far as the first part of the Stelvio Pass. The Austrians suffered considerable loss, and abandoned their provision chests and cattle. Garibaldi's loss was 10 severely wounded, and Cialdini's was three killed and four wounded.

The Adriatic.—Letters from Fiume, dated July 6, state that the French, amounting to 10,000, have disembarked at Lussienpiccolo, that the bridge to Cherso has been destroyed, and that 1000 French soldiers have occupied Cherso. The occupation of Fiume by Austrian troops continues. The Archducal yacht Fantasie, after having successfully broken through the blockade, arrived at Trieste on Thursday from Venice. Advices from Corfu to the 28th ult. state that the English squadron, consisting of the screw liner Marlborough, four sailing ships-of-the-line, and one despatch-boat, originally bound for Athens, on receipt of important despatches last week took another direction. The frigate Euryalus, having on board Prince Alfred has also been ordered to proceed on its way with all speed. The Russian steam service between Odessa and Trieste has been discontinued.

Sicily.—On the 26th ult. disturbances took place in Messina. Four Sardinian war-steamers were in the port, of which three had left for the Adriatic.

Russia and Persia.—Letters from Teheran state that 60,000 Russians have been sent against Khiva, by way of the Caspian. Persia has given her assent to the expedition, the object of which is to reduce the Turcomans to submission.

Turkey.—Advices from Constantinople to the 29th ult. state that the Divan has decided that reasons of State require the presence of the Sultan in Egypt, and he will therefore leave for that country immediately after the fêtes of the Beiram. Magnificent preparations are making for his journey. It is said that the Sultan will subsequently visit Candia, where the popular agitation has rendered fresh reinforcements necessary. In the Danubian Principalities the news of the victories gained by the allies has produced much enthusiasm among the people, and the Porte is in fear of demonstrations in favour of a complete union. The last note has still more increased the existing difficulties.

India.—The Overland Mail has arrived with news from Bombay to June 4, Calcutta May 19, Hong Kong May 5. The following are the details:—

*Calcutta.*—The discontent of the European troops in the late Company's service has become less audible, though the sentiments of the malcontents remain unchanged. At Meerut the Court of Inquiry is going on, but elicits nothing except a distinct statement from each man as he passes in that he is "an Englishman and not a slave, and won't be transferred like a 'oss." The men abstain from all violence, but are "cheeky" to a degree which seems to exasperate their officers beyond all bounds. At Delhi the 24 Fusileers are quiet, but await the final decision. At Berhampore the 5th Europeans and the Light Cavalry made some kind of demonstration, and were, like the rest, waiting the official decision. If private letters can be trusted they also on parade gave "three groans for Mrs. Queen," and "three cheers for John Company," but this is formally denied. At Hazareebagh the recruits of the 6th, twice displayed the same spirit; it was found difficult to arrest some ringleaders, and the men were quieted chiefly by the order for inquiry. Two companies of the 3d Bengal Europeans now on detachment duty at Sepore have, with the leave of Lord Clyde, drawn up a petition to Parliament setting forth their wrongs. It is rumoured that some of the Sikh regiments are about to raise the profitable cry of "A fresh bounty or discharge."

*Central India.*—Sir Hope Grant has at last succeeded in bringing to action the enemy under the Nana and Bala Rao who had been long hovering about our lines. On the 23d May he attacked the rebel force with the 7th Punjab Infantry. The enemy were under the Nana and Bala Rao, and were strongly posted in the Irdwah Pass, with two guns in position. The heights on both sides were crowned, and the enemy driven from their guns, which were taken with trifling loss on our side, while a large number of the enemy were killed. All the leaders and sirdars are reported to have been congregated together, Mummoo Khan, Dabur Bux, and the Rajah of Gondah, besides Bala Rao and the Nana. On the 16th of May a large body of Sepoys, said to be 800 or 1000 strong, made their appearance near Lahar, in the neighbourhood of the Scinde river, to the north of Jhansi, with Burjan Singh at their head. The police, under Lieutenant Swiney, set off in pursuit of them, and engaged them for five hours, but found their numbers too great. Before reinforcements had arrived the rebels had decamped.

*Furruckabad.*—The Nawab, having had his life spared on condition that he shall quit British India for ever, has selected Mecca for his place of exile. The Nawab of Futtehghur, also a murderer of the blackest dye, has been taken to Mynpoorie heavily ironed and strongly guarded; and his companion in crime, Bukht Khan, who commanded the rebels in Delhi, has been shot in a skirmish with the outposts.

China.—Accounts from Hong Kong to May 5th state that Mr. Bruce and Admiral Hope were to proceed to Canton on the following day, and it was hoped that some definite arrangements would be come to with reference to the site of the future foreign settlement, and also with regard to the indemnity for losses sustained by British subjects. Pee-kwei, the Governor of Canton appointed by the Allies, died on the 25th April, after a short illness. An expedition is projected to the town of Hungshan, the Mandarin of which has made himself so conspicuous during the last two years by ordering the Chinese servants to leave the employment of foreigners, and by similar annoyances.

Cochin-China.—The *Moniteur* contains the following despatch dated Saigon, Cochin-China, April 22:—

"We have attacked the army of Annam, 10,000 strong. Before defeating the enemy we took a fort mounting 19 cannon or swivel guns. The loss of the enemy was 500 killed, our loss 14 killed and 30 wounded, seven of them severely."

United States.—It is said that General Cass is preparing a circular on the subject of neutral rights, and that he does not acquiesce in the British view, but insists that all regular articles of commerce, with the exception of powder, lead, muskets, saltpetre, &c., are not contraband of war; and that the fact of goods being on board vessels carrying the flag of the United States exempts them from seizure, the broad ground being taken that the flag carries protection with it. The Secretary of War has refused to permit any more officers on leave to depart for Europe, fearing they might join some of the armies, and, in the event of being taken prisoners, cause serious complications. The new Russian steam frigate General Admiral, just built at New York, sailed on the 16th ult. for Cronstadt.

# Parliament.

## HOUSE OF LORDS.

Friday.—*Volunteer Rifle Corps.*—In answer to a question from Lord Vivian on the subject of volunteer rifle corps, the Earl of Ripon stated that it was the intention of the present Government to issue 25 stand of arms to every 100 men on the four following conditions:—That a safe range of 300 yards should be provided for practice; that a proper place should be appointed for keeping the arms; that the [illegible] of each corps should be selected by the Go[illegible] and that a periodical inspection should be made by a proper military officer. In case however of an invasion, the Government would be prepared to supply every corps with arms. It was also proposed to provide drill sergeants for each corps, who would be paid, not by the Government but by the corps themselves. The services of a number of sergeants and sergeants belonging to the [illegible] militia, who were receiving instruction at the School of Musketry at Hythe, would be soon rendered available to instruct the various companies of volunteers. It was the intention of the Secretary at War to allow the officers of the corps at their own expense to attend the School of Instruction at Hythe. The Government also contemplated the formation of artillery companies, which would be supplied with instruction guns and ammunition by the Royal Artillery. In reply to Lord Aveland his lordship stated that Enfield rifles would be issued to the embodied militia after they had been instructed to use them.—After a few words from Lord Ellenborough, Lord Howden recommended the enrolment and encouragement of Volunteer Corps, because it was the daily wish and nightly dream of every Frenchman and woman to humiliate this country by an invasion.—In answer to a question from Lord Hardwicke, the Earl of Ripon said it was intended not to give but to lend the arms to the Volunteer Corps.—After a few remarks from Lord Granville and the Duke of Newcastle, Lord Derby explained that the reason the late Government had not offered to supply the Volunteer Corps with arms was that on inquiry it was found it was not right to furnish the necessary quantities of arms from the Government stores. *The Navy.*—Lord Brougham asked if there were any truth in the reports of a proposed reduction of the naval estimates, and took the opportunity to review the state of feeling in France towards the English nation. Arguing from the antecedents of France to its present conduct, he expressed the strongest opinion that no reductions ought to be made at the present moment in our naval defences.—The Duke of Somerset said that there had been no reductions in the estimates. On the contrary the Government were convinced of the necessity of keeping the defences of the country in a state of thorough efficiency.—The Earl of Hardwicke said the French were not only a military, but a maritime Power, and had manifested such alacrity in supplying the deficiencies of their navy that though much had been done last year in increasing the efficiency of our naval defences, much still remained to do.—Lord Ellenborough thought the importance of our naval defences could not be exaggerated. Considering the facilities for invasion afforded by steam, and the undefended condition of the southern coast of England, he thought that 60,000 or 80,000 men might during six months of the year be landed on our shores. There was, however, this advantage to be gained by the possession of a powerful navy by this country, that the invading army would be cut off from its communications. While, however, we were intent on rendering the navy efficient, he expressed a fervent hope that the interests of the army, on whom if a landing were effected the safety of the country would depend, might not be neglected. In his opinion it would be necessary to fortify Portland and other similar places where a landing might be attempted. He declared his conviction, which struck him with the force of prophecy, that an invasion of this country would be attempted, not indeed during the present war, but when France had exhausted the military strength of Austria, and when her victorious and disciplined soldiers, recruited perhaps by Russian allies, were prepared to carry out the traditions of the first Emperor.

Monday.—*Divorce Court.*—Lord Brougham called attention to the working of the Divorce Court. With regard to the general principle there could be no doubt that the establishment of the court had been a success; but the amount of business showed the absolute necessity of an increase in the judicial force. There could be no doubt, too, that the pleadings ought to afford more information than the present form of petition at present contained. The precautions against collusion were insufficient, and he was pleased to find that the Attorney General or his representative should be present on every occasion. He could not close his remarks without bearing testimony to the efficiency with which the learned Judge-Ordinary discharged the laborious duties of his office.—The Lord Chancellor said that there could be no doubt that there was a want of judicial strength in the court, but it still remained to be seen whether the arrears of business were not merely temporary. He thought that the necessities of the case would be met if all the 15 judges were made assessors in the court, so that any two of them might sit with the Judge-Ordinary and constitute a full court. He thought that some public functionary should be appointed to investigate the circumstances of each case, with a view to guarding against collusion, and that the Court should have the power of sitting with closed doors whenever the question of a dissolution of marriage arose. The Judge-Ordinary, too, should have the power of disposing of the custody of children. These and other points he hoped to deal with in a Bill which would be laid before the House in a few days.—Lord Redesdale said that the working of the Act had realised his worst fears and justified the strong opposition which he had offered to it. *Church Rates.*—The Duke of Marlborough moved for a Select Committee on church rates and proceeded to review the inquiries and attempts at legislation which had already taken place on the subject. His own opinion was that the abolition of church rates was a blow aimed at the Established Church, and though the session was short, he had no doubt that before it was over the Select Committee would have collected a mass of evidence which would be of the highest importance. He trusted that their lordships would ever be found the best defenders of the Established Church, which was the surest safeguard of an hereditary monarchy.—Lord Teynham said the Church of England was the "rich man's church." He thought the Committee would do well to terminate the strife which sprung out of church rates by recommending their abolition.—The Archbishop of Canterbury thought the House is indebted to the Duke of Marlborough for bringing the question forward. The remedy for the honest scruples of Dissenters to church-rates need not be the extreme measure of releasing property from an obligation to which it had always been subject.—Lord Portman thought that the matter might have been settled long ago if the Church had been willing to accept some of the propositions that had been made. He could not but fear that if the settlement were much longer delayed a collision would take place between the two Houses of Parliament.—The Bishop of London defended the Church from the imputation made by Lord Portman, and denied that any encouragement had ever been given to any one to undertake the settlement of the question. Under these circumstances he thought the Bench of Bishops had exercised a wise discretion in not originating any measure on the subject of church rates. He thought that the abolition of these rates would be a blow aimed at the Established Church, which was the Church of 87 per cent. of the population of England, while a large body even among the Dissenters would deplore anything which tended to weaken that Church.—Lord Granville thought the proposed committee would do no good, but did not feel justified in opposing the motion. The committee was then agreed to.

Tuesday.—*National Defences.*—Lord Lyndhurst called attention to the state of the national defences. He referred to the changes in the conditions of naval warfare brought about by modern invention, and especially by the application of steam. It was now no longer possible that England by her fleets alone could maintain herself safe from invasion. It was however necessary to keep those fleets in a condition of the highest efficiency, and to make them able to cope with the

united navies of any other two countries in the world. He contrasted in detail the past and present force of the British and French navies, and contended that much remained to be done in order to raise the former to its proper relative superiority. Last year we were surpassed both in steam men-of-war and steam frigates by the French navy. In the first we had now recovered our supremacy, and should increase that supremacy still further next year; but our inferiority in frigates yet remained, and, as he was well assured, in the training and discipline of the seamen. As we had no fleet to secure us against invasion, we ought to maintain a land force able to resist any invading force that might be thrown upon our shores. For this purpose not less than 100,000 regular troops, and an equal number of militia, would be required, with the additional precaution of the construction of strong fortifications in our garrisons and arsenals. With regard to the intentions of the continental Powers, he attributed no ill faith to the Emperor of the French, but he could not conceal the hostile feelings of the French people towards us, and he would not trust a Sovereign who had no reliance on himself, but who was compelled to act according to the exigency of circumstances. In every case Great Britain ought to be secure in her own strength, without trusting either to the alliance or the forbearance of foreign Powers.—Lord STRATFORD DE REDCLIFFE agreed that it was a great humiliation that this country should live by sufferance, as it was thereby debarred from adequately fulfilling its duties to the world. Looking to the commercial position of this country, and to the unsettled state of foreign affairs, we ought not, he thought, from too great confidence in past successes, to wrap ourselves in a false security, and hesitate to increase the defences of the country.—Earl GRANVILLE doubted whether any practical good could result from these discussions. He did not know whether they were intended to stimulate the Government to its duty, but he was sure they would not conduce to a better state of feeling in another country. As to the idea of an invasion, he said it was not likely that France, engaged in a terrible war, or Russia, employed in improving the condition of her own subjects, would attack this country. Still the feeling of the people was that our defences needed augmentation, not in order to take part in the war, but to give security to the nation. In regard to the army, he admitted that it was insufficient to meet a large force which might be landed on this island, and that the dockyards and arsenals ought, if possible, to be made impregnable. In forwarding this object the services of volunteers, of artillery companies, and of rifle corps would be of great service. There was no harm in telling other nations that while all Europe was arming we were arming too; but in doing this he deprecated most vehemently the system of introducing frequent debates on topics of such a delicate and dangerous nature.—The Earl of HARDWICKE thought that 100 sail of the line would be necessary to protect us. It would be too late to arm when war had broken out; the time to arm was during peace.—The Duke of SOMERSET said that since he had been in office he had done his best to strengthen the navy, and had on his own responsibility taken an additional sum to supply the requirements of our dockyards. If, however, such language as had been that night employed were to be continued, it would be necessary to ask for larger estimates than contemplated, as it would certainly result in war.—Lord BROUGHAM thought we might increase our forces without its being deemed invidious to foreign nations and their rulers. He denied that the French people wished for war with this country, and thought the contrary was the case. Whether, however, we trusted or mistrusted them, it would be as well to be prepared for all contingencies.—Lord ELLENBOROUGH thanked Lord Lyndhurst for distinctly placing before the House our past and present condition. Of all nations we are the most vulnerable at sea, on account of the numerous interests we had to defend, and of all nations we were the most vulnerable on land. When the organisation and rapidity which had been shown by the French in transporting their armies into a strange land were remembered he did feel some apprehension. He desired to see this country in an impregnable position, in order to restore strength to our diplomacy. He did not believe in moral influence, unless supported by physical force, and until this country was placed in a position in which it would be madness to invade it the efforts of the Government at mediation would be useless.—The Duke of ARGYLL thought that if suggestions of continual increase of the army and navy were to be made it would be better to bring forward a war budget at once. He warned the House of the danger of creating a reaction in favour of small armaments by the introduction of large estimates. The feeling with regard to this Italian war would be only temporary, would be followed by a cry for reduction, and would involve the country in financial difficulties.—The Duke of RUTLAND thought no reaction would take place in this country so long as the present war in Italy continued.

THURSDAY.—*Divorce Court.*—Lord CHELMSFORD, in calling the attention of the House to the state of the Divorce Court, said that the defects of its present constitution consisted in an inadequate judicial staff, whereby the business fell into arrear, and occasioned great delay, vexation, and expense to the suitors. To remedy these evils he proposed the appointment of two additional judges, who might, when unemployed in the court, assist the Judicial Committee of the Privy Council. He also thought that the action of the court should be extended to Ireland.—The LORD CHANCELLOR said that he held in his hand a sketch of a Bill for the improvement of the Divorce Court, the scope of which regarded only England. As the court was an experiment, it would, he thought, be injudicious, before they were aware of its results, to extend its operations to Ireland.—Lord CRANWORTH said that if Sir C. Cresswell had the power of annulling marriages, as he had of decreeing a judicial separation, the difficulties complained of would soon vanish.—After some observations from Lords BROUGHAM, WICKLOW, and DENMAN, the subject dropped.—A conversation then took place on the *Irish Defences*, in which the Duke of CLEVELAND, Lords LONDONDERRY, BANDON, HARDINGE, and CLANRICARDE took part.—Lord RIPON, in reply, stated that it was not the intention of the Government to extend the formation of rifle corps to Ireland, nor to embody any fresh regiments of Irish Militia, although it was not impossible that those regiments now embodied might be disembodied, and untrained men embodied in their place.

FRIDAY.—*Affairs of Italy.*—Lord STRATFORD DE REDCLIFFE said that in consequence of the important news of the armistice in Italy, he thought it best to abandon the motion of which he had given notice, reserving to himself full liberty to take it up at any future time.—Lord BROUGHAM said that for some weeks their lordships should abstain from even touching on the question of foreign affairs.—Earl GRANVILLE thanked Lord Stratford on behalf of her Majesty's Government, he thought he might say of the whole House, for having withdrawn his notice. At the present moment discussion might create difficulties abroad and prevent the settlement of the great Italian question in an advantageous manner.

## HOUSE OF COMMONS.

FRIDAY.—*Public Business.*—On the motion of Lord PALMERSTON, on and after the 14th inst. Thursdays were ordered to be Order days. *Breach of Privilege.*—Mr. O. STANLEY drew attention to the statement made by Mr. Dennis at a public meeting of the electors of Northampton, that an offer had been made to Mr. Gilpin by the agents of the late Government to influence his vote in Parliament, and called upon the Secretary of the Poor Law Board to communicate to the House the letters referred to by him, with the name of the person from whom they originated, insisting that he was bound to give up the name of the party.—Mr. GILPIN repeated what he had previously stated, that letters had been sent to him containing suggestions which, if acted upon, would have biased his political course in Parliament; that he could not trace them to agents of the Conservative party, and that therefore it was not his intention to take any further steps in the matter. He added that the writer of the letters was a lady; that to ask for the name was an inquiry which he should not have thought a gentleman would have made; and he declined to give it.—Mr. GLAY concurred in thinking that after Mr. Gilpin had acquitted the Conservative party of any participation in the letters it was far better that the subject should be dropped. *The Indian Loan.*—Mr. CRAWFORD asked the late Secretary of State for India whether he was aware, when he proceeded on the 21st of April to receive and adjudicate upon tenders invited to be sent in for the Indian loan, that the Austrian *ultimatum* to Sardinia had been made known to her Majesty's Government on the previous evening by a telegram from Vienna and also by a written communication from the French Ambassador to the Secretary for Foreign Affairs.—Lord STANLEY said that the first intelligence of the Austrian *ultimatum* did not reach him until 4 o'clock in the afternoon of April 21, or until three or four hours after the transaction referred to had been completed.—Mr. CRAWFORD expressed himself quite satisfied with the explanation. *Roman Catholic Chaplains.*—Mr HENNESSY asked what steps the late Board of Admiralty had taken with reference to the complaints which had been submitted to the Board respecting the treatment of Roman Catholic sailors in the navy.—Sir J. PAKINGTON said he thought that Roman Catholic sailors should, as far as possible, be placed upon the same footing as Roman Catholic soldiers, and he had, on reading the memorial, come to the conclusion that the majority of the complaints it contained were fair and reasonable. He had communicated his views to the Board of Admiralty, and he intended to propose that the necessary instructions should be issued to remove the grievances complained of. The change of Government however put it out of his power to carry out his views.—Mr. NEWDEGATE said that this question was one of the phases of a combined operation which implied additional aggressions on the Established Church. He warned the House to guard against such assaults. *Divorce Court.*—Mr. JAMES asked whether it was the intention of the Government to bring in any measure to remedy the delay which now exists in the trial of causes in the Matrimonial and Divorce Court?—The ATTORNEY-GENERAL stated that a measure would be introduced to improve the Court, which he hoped would pass during the present session.—Mr. JOHN LOCKE obtained leave to bring in a Bill to amend the Act 5 and 6 Wm. IV., relating to *Weights and Measures.* The *Newspaper Bill* was read a second time.—Mr. FITZROY obtained leave to bring in a Bill to enable the Commissioners of her Majesty's Works to acquire a site for the purposes of Her Majesty's *Court of Probate* and other courts and offices. The House then adjourned to Monday.

MONDAY.—*Indian Finance.*—Mr. BRIGHT asked whether the Secretary for India could fix a day for a statement relative to Indian Finance.—Sir C. WOOD said that, until he was in possession of the necessary information, he would not be in a condition to make a satisfactory statement, and could not therefore fix a day. *The Budget.*—In answer to Sir H. WILLOUGHBY, the CHANCELLOR of the EXCHEQUER said he did not intend to make any statement relative to the expenditure apart from his general financial statement, which he would fix for as early a day as possible after the Estimates. *The Navy.*—Lord C. PAGET, in reply to a question addressed to him on a preceding evening, whether it was intended to bring in a Bill with a view of carrying into effect the recommendations of the Royal Commission in regard to manning the Navy, said that such was the intention of the Government. *Reform Bill.*—In return to Mr. JAMES, Lord PALMERSTON repeated what he had already stated—that, considering the lateness of the year, it was not the intention of her Majesty's Government to propose a measure this session to amend the representation of the people in Parliament. The *Law of Property and Trustees Relief Amendment Bill* was read a second time, and the *Jury Trial (Scotland) Act Amendment Bill* passed through committee. On the order for resuming the debate upon the second reading of the *Criminal Justice Middlesex (Assistant Judge)* Bill, the object of which is to raise the salary from 1200*l.* to 1500*l.* a year, Mr. L. KING opposed the Bill, and moved to defer the second reading for six months.—Mr. S. ESTCOURT explained the reasons for its introduction, and for increasing the salary of the Judge.—Mr. ALCOCK and Mr. W. WILLIAMS opposed the Bill, which was supported by Mr. MALINS and Mr. BYNG.—Sir G. LEWIS said that Mr. BODKIN had accepted the office of Assistant-Judge upon an understanding that he should give up his practice on receiving 1500*l.* a-year, proposed that the sum of 1200*l.* should continue to be paid out of the Consolidated Fund, and suggested an arrangement with reference to the remaining 300*l.* After some further discussion the amendment was withdrawn, and the Bill was read a second time.—Mr. M. MILNES obtained leave to bring in a Bill to remove doubts as to the qualification of persons holding *Diplomatic Pensions* to sit in Parliament. *State of the Thames.*—Sir M. PETO, in moving for leave to introduce a Bill to provide for the prevention of noisome effluvia from the river Thames within the metropolis, observed that it was a measure of a simple and practical character, and was not intended to reflect upon the Metropolitan Commissioners.—After remarks by Lord J. MANNERS and Sir J. SHELLEY, Mr. TITE entered into details connected with this evil, and the measures adopted by the Metropolitan Board to contend with it, whereby its effects had been much diminished. The motion was ultimately negatived. *Opening Public Galleries on Sunday.*—Mr. COWPER moved an address for copies of all letters and memorials addressed to the Committee of Council on Education, or the Trustees of the National Gallery, with reference to the admission of the public in the evening to the Turner and Vernon galleries of pictures, and enlarged upon the expediency and safety of such admission. The motion was agreed to. *Law Reform.*—Mr. DUNLOP obtained leave to bring in a Bill to afford facilities for the more certain ascertainment of the law administered in one part of her Majesty's dominions when pleaded in the courts of another part thereof.—Mr. LOWE obtained leave to introduce a Bill to make perpetual the *Public Health Act* (1858); and a Bill to provide for the authentication of certain orders of the *Privy Council* in the absence of the Clerk of the Council in Ordinary.—Mr. S. HERBERT moved for a Select Committee to inquire into the effects of the alterations in military organisation regarding the *War Office and Board of Ordnance* which were made in the year 1855; and also to inquire whether any changes are required to secure the utmost efficiency and economy in the administration of military affairs.—Mr. HORSMAN suggested whether, at so late a period, it was worth while to appoint the committee.—Mr MONSELL urged the same objection.—Mr. S HERBERT thought some beneficial progress might be made in so large a subject.—Mr. DISRAELI was of opinion, on the contrary, that very little advantage would be obtained by the appointment of the committee, and that greater progress would be made if it were deferred until next session.—Lord PALMERSTON hoped that the House would not lose what remained of the present session. The motion was agreed to.

TUESDAY.—*The Indian Army.*—In reply to a question by Mr. TORRENS, Sir C. WOOD stated his inability to say that any practical steps had been taken to effect the formation of a permanent local army in Bengal, or that any levies had been discontinued or disbanded.—In answer to Mr. VANSITTART, Sir C. WOOD said, that some degree of excitement had prevailed among the late East India Company's European troops, who had advanced claims which were deemed unfounded, and that an investigation on the subject was going on. *The Serpentine.*—Sir M. FARQUHAR asked the First Commissioner of Works whether he proposed to carry out the intention of his predecessor in office by taking a vote in the Estimates for purifying the Serpentine during the ensuing autumn.—Mr. FITZROY said that he intended to include the vote in the Estimates of the year. *Galway Mail Contract.*—Mr. BAXTER asked if the attention of the present Government had been called to the contract entered into with the Atlantic Steam Navigation Company to carry the mails between Galway and the United States, and whether they consider it advisable, in the interests of the public, that the said contract should be cancelled.—Mr. GLADSTONE said that no decision had been yet arrived at in this matter, which had occupied the earnest attention of the Government. It was thought advisable that the whole system of contracts, which extended over many years, and had grown into a system, should be submitted to the consideration of the House of Commons. He should, therefore, on Thursday move for the appointment of a select committee to examine into all these contracts, whether for steam or telegraphic communication, with a view to the improvement and arrangement of the entire system. *Case of Mr. Ryland.*—Mr. GREENE moved for a select committee to inquire into the arrangement under which Mr. G. H. Ryland was induced to resign the patent office of clerk of the council in Canada.—Mr. FORTESCUE said that the sum of 9000*l.* had already been awarded to Mr. Ryland as compensation, half of which had been paid by the Imperial Government. He should therefore oppose the motion. On a division the motion was negatived by 235 to 20. *Railway Arbitration.*—Colonel W. PATTEN obtained leave to bring in a Bill to enable railway companies to settle their differences with other companies by arbitration. *County Court Imprisonment.*—Mr. COLLIER moved for leave to bring in a Bill limiting the power of imprisonment for small debts exercised by the county court judges, who imprisoned as a mere punishment for non-appearance only, contrary to what he believed to have been the intention of the Legislature, which, he thought, meant that imprisonment should be inflicted only in cases of fraud.—Mr. MALINS reprobated the use made by many of the county court judges of their power of imprisonment, some of them having issued 700 committals in one year. The mischief arose from the absence of a bar which could exercise a sufficient control upon the judge.—Mr. B. COCHRANE thought that the Bill would be inadequate to put a stop to the tyranny of the county court judges.—Mr. HENLEY said that the condition of debtors imprisoned by these courts was nearly as bad as that of felons. The effect was that the debtor had to be maintained by the county, and his family by the parish.—Mr. CLIVE said that the Government would not oppose the introduction of the Bill.—Mr. BRISCOE read a return showing that the number of commitments for non-appearance was 8000, while those for fraud were but 69. Leave was then given to bring in the Bill. *Volunteer Rifles.*—Mr. PALK moved an address to her Majesty praying that the necessary arms accoutrements, and ammunition may be furnished to Volunteer Rifle Corps under the provisions of the Act 44 George III. c. 54, as well as to Artillery Corps in maritime towns. He denounced the plan proposed by the Government wholly unsatisfactory, and thought that the country had a right to demand that our coasts should be rendered safe against sudden attacks.—Captain JERVIS seconded the motion and insisted upon the importance of clothing the Volunteer Corps, so that in case of their turning out, they might be recognised by the enemy as troops.—Mr. H. BERKELEY thought all that was wanted was to teach the use and practice of the rifle, and that the movement, with the arms and the clothing, should emanate from the Government.—Colonel DICKSON hoped the House would hesitate before they gave too great an encouragement to Rifle Corps, and that the Government would confine themselves to the formation of Artillery Corps in maritime towns.—Lord H. VANE concurred in this opinion, and thought means should be taken to bring to bear on the coast large forces, by railways, adequate to meet an enemy, which would be a more effectual defence than a volunteer force.—Mr. W. E. DUNCOMBE differed from both the preceding speakers, believing that the country was anxious to carry on the movement.—Mr. BRISCOE suggested that the Government should make up their minds whether these Volunteer Corps should be a temporary or permanent force.—General PEEL approved of the part of the present Government for furnishing rifles to 25 per cent. of the effective force. He agreed that Artillery Corps were to be especially encouraged, as they afforded the best possible defence. Although he had no dread of invasion, we ought to be prepared, and the best thing, in his opinion, was to decide what fortifications were absolutely necessary and to complete them as soon as possible.—Lord ELCHO was of opinion that the volunteer system would be a useful adjunct to the regular army, and would utilise for defensive purposes the services of a large and intelligent class now perfectly worthless owing to their not being trained to arms. The value of volunteer corps was shown by Garibaldi's force in the North of Italy.—After some remarks by Colonel DUNNE and Sir J. SHELLEY, Mr. S. HERBERT considered that the discussion had been a very useful one. In reply to Mr. Briscoe's suggestion, he said, if the movement should turn out successful, he saw no reason why the system should not be permanent. Government, however, were most anxious to promote these corps, believing that as auxiliaries, they would be most useful.—After some remarks from Colonel NORTH, Mr. SELWYN said that many persons were prevented from joining the volunteers owing to the difficulty of finding good practising grounds.—Mr. PALK withdrew his motion. *Admiralty Court.*—Mr. HADFIELD moved for leave to bring in a Bill to enable serjeants, barristers-at-law, attorneys and solicitors to practise in the High Court of Admiralty.—Sir G LEWIS assented to the principle of opening the Admiralty Court; the only question was as to the manner in which the principle should be carried into effect. Leave was given.—Mr. DIGBY SEYMOUR moved for leave to bring in a Bill to amend the *Foreign Enlistment Act* so far as it relates to coaling ports and store ships. He contended that the Act was not intended to apply to privateers, and its application to store ships was productive of difficulty and injustice.—Sir G LEWIS said that the present was an inopportune time to alter the law which had just been appealed to by Royal proclamation, and therefore did not feel justified in assenting to the introduction of the Bill.—Mr. BOWYER believed that the proposed Bill would render the preservation of neutrality more difficult, and would lead to serious contraventions of international law.—Mr. COLLIER agreed that the present was not a fit time for altering the law.—Mr. D. SEYMOUR withdrew his motion. *Pension Suits.*—Mr. WRIGHTSON moved for leave to introduce a Bill repealing the Act which compels a member accepting office under the Crown to vacate his seat.—Mr. A. SMITH opposed the motion, as doing away with an important constitutional safeguard.—Mr. INGRAM thought that the law was intended for times different from the present, and ought to be altered.—After some On a division the motion was negatived by 53 to 51. *Abolition of Turnpikes.*—Mr. ALCOCK moved an address to her Majesty praying for a royal commission to inquire into and report to the best means of abolishing the tolls on the turnpike roads and bridges in England and Wales.—Sir G. LEWIS urged that great improvement which had of late years taken place in the management of turnpike trusts, and the many interests involved, as a reason for opposing the motion.—Mr. HORSFALL thought that it was very easy to abolish tolls, but not easy to establish a rate instead.—After some remarks by Mr. CRAUFURD and Mr. B. CARTER the motion was negatived without a division.—Mr. ALCOCK obtained leave to introduce a Bill for the *Commutation of Church-rates.*—Mr. HOPWOOD obtained leave to introduce a Bill for the more effectual preservation and increase of the *Breed of Salmon*, and for the better regulating

the fisheries in the rivers in England.—Colonel NORTH moved a resolution for the purpose of increasing the half pay of certain officers who, since their retirement, had become general officers.—The motion was opposed by Mr. S. HERBERT and supported by General PEEL. On a division the motion was negatived by 42 to 22.—Sir R. FERGUSON obtained leave to bring in a Bill to facilitate *Internal communication in Ireland* by means of tramroads or tramways.—SIR W. SOMERVILLE moved for leave to introduce a Bill repealing so much of the Roman Catholic Relief Act as prohibited a Roman Catholic from holding the office of Lord Chancellor of Ireland. The prohibition was simply founded on a mistake in supposing that the Lord Chancellor of Ireland possessed Church patronage.—Mr. P. URQUHART seconded the motion.—Sir G. LEWIS assented to the motion, showing, by an extract from the speech of Sir R. Peel, that when that statesman introduced the Relief Bill he inadvertently believed that the Irish Chancellor possessed the distribution of Church patronage.—Sir B. BRIDGES did not believe in the alleged inadvertence, but would not now oppose the introduction of the Bill, reserving his opposition to a future stage. Leave was then given to bring in the Bill. The *Jury Trial (Scotland) Act Amendment Bill* was read a third time and passed.

WEDNESDAY.—*Endowed Schools Bill*.—A great number of petitions having been presented for and against this Bill, which stood upon the paper as the first order of the day, Mr. DILLWYN moved the second reading of the Bill, and disclaimed any intention of wresting from the Church any property which justly belonged to it. He proposed that Dissenters should be eligible as trustees in schools, unless it was shown that the founders intended that they should be conducted upon the principles of the Church of England.—Sir S. NORTHCOTE moved as an amendment that the Bill be read a second time that day three months. He objected to the Bill as leading to litigation, inasmuch as it would alter the relations of Churchmen and Dissenters with regard to schools.—Mr. PELLER seconded the amendment, and said that the Bill would substitute mere secular for religious instruction in all the schools to which it should be applied.—The ATTORNEY-GENERAL contended that there was a great necessity for a change in the law relating to endowed schools. The presumptions which guided the course of justice with regard to them were of an arbitrary character, and it was not desirable to have them continued.—Sir H. CAIRNS supported the amendment, on the ground that if the Bill were carried it would be impossible to give any religious instruction at all.—Sir G. LEWIS suggested that the Bill should be referred to a select committee, in order that principles might be settled, and that the evils existing might be inquired into with a view to a remedy.—After some remarks by Mr. MELLOR, Mr. A. MILLS, Sir E. PERRY, and Mr. WALTER, Mr. WALPOLE said that the principle sought to be affirmed by the Bill was one which the House ought not for a moment to listen to, and which the Attorney-General ought to have been the last person to recommend.—Mr. BRIGHT said that the terms of the Bill might be easily altered so as to apply equally to Churchmen and Dissenters. Here was a Bill, having the name of the Attorney-General on its back, and which was yet opposed by the Home Secretary. Such was the spectacle of a united Government the first time it was put to the test.—Sir G. GREY thought that the subject ought to be referred to a committee, but would consent to the second reading.—Lord J. MANNERS approved of inquiry, but objected to the Bill.—Mr. GLADSTONE said that all sides were agreed that there was a grievance to be remedied, and deprecated discussion when there was so little real difference. The only question was, whether it was the Bill or the subject that was to be referred to a committee. As he did not approve of Bills being vitally altered in committee, he preferred the latter course.—Mr. HENLEY would consent to inquiry, but not to the Bill in its present form.—Mr. DILLWYN, in reply, said that on the course taken by the Government depended whether he should or should not give them his cordial support.—The House divided, when the second reading was carried by 210 to 192.—Lord J. MANNERS inquired what course the Government intended to take with regard to the future stages of the Bill?—Sir G. LEWIS said he should move that it be referred to a select committee.—Mr. DILLWYN wished to know, before he consented to this motion, of whom the committee would consist, and what it would do with the Bill. After some discussion the debate was adjourned. Mr. M'MAHON moved the second reading of the Bill for giving a right of *Appeal in Criminal Cases*.—The SOLICITOR-GENERAL opposed the Bill. If the right of appeal was given to the prisoner it ought also to be given to the Crown, whereby a prisoner might be tried twice for the same offence, and one of the first principles of English justice would be violated.—Mr. LONGFIELD supported the Bill.—On the motion of Mr. BOWYER the debate was adjourned. The *High Sheriff Expenses Bill* was read a second time.

THURSDAY.—*City of London Reform*.—In answer to Mr. J. LOCKE, Sir G. LEWIS said that the Government intended to bring in a Bill for the Reform of the Corporation of London in the present session, in accordance with the report of the select committee. *Mail Contracts*.—The CHANCELLOR of the EXCHEQUER moved for a select committee to inquire into the manner in which contracts extending over periods of years have been formed or modified by her Majesty's Government with steampacket companies for the conveyance of the mails by sea, and into any arrangements adopted at the public charge, actual or prospective, for telegraphic communications beyond seas, and to report their opinion, with any recommendation as to rules to be observed by the Government in making contracts for services not yet sanctioned by Parliament, or which extend over a series of years. In stating the general reasons for the motion, he adverted to the origin of contracts by Government for postal services in anticipation of the judgment of the House, which t nded, he observed, to oust the House of Commons of its jurisdiction over a form of public expenditure. He pointed out the evils which might arise unless the House took serious cognisance of the subject, and he thought the time had come when the matter should be subjected to a systematic and searching examination. After a desultory discussion in relation chiefly to the Galway contract, the motion was agreed to. *Highway Acts*.—Sir G. LEWIS obtained leave to bring in a Bill to amend the laws relative to the management of highways, stating that it was almost identical with one introduced last session by Mr. Hardy. Mr. COWPER called attention to the *Advertising pillar* erected by a French Company at Hyde Park-corner, and with a view to prevent similar structures being erected, moved for leave to bring in a Bill to restrict the erection of permanent structures in the carriage ways of the metropolis. The House divided on the motion, which was carried by 165 to 46. Mr. SCHOLEFIELD moved the second reading of the *Adulteration of Food Prevention Bill*.—Mr. HARDY said that the Bill would give rise to a system of informing and annoyance, and moved to defer the second reading for three months. After some discussion on the details of the measure, the House divided, when the second reading was carried by 227 to 103. The *Court of Probate, &c. (Acquisition of Site) Bill*, passed through committee. The *Public Health Bill*, the *Clerk of the Council Bill*, and the *Admiralty Court Bill* were read a second time. On the order for the second reading of the *Roman Catholic Relief Act Amendment Bill*, Mr. S. ESTCOURT moved that the debate be adjourned for a week.—Sir W. SOMERVILLE assented, and fixed the second reading for Tuesday.—On the motion of Mr. DILLWYN the *Endowed Schools Bill* was referred to a select committee.

FRIDAY.—*The Armistice in Italy*.—In reply to Mr. WALPOLE, Lord J. RUSSELL said it had been officially announced in the *Moniteur* that an armistice had been agreed upon between the Emperors of France and Austria. Beyond that her Majesty's Government had received no information on the subject.—In answer to Mr. S. FITZGERALD, Lord J. RUSSELL said that the present Government had sent a despatch to the Court of Berlin, setting forth that our Government would deeply lament any circumstance that might extend the theatre of the war. [Left sitting.]

## City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: The news of the armistice in Italy has caused a rise in the funds. Consols closed at 94⅝ to ¼ ex div.; Bank Stock, 221½; Three per Cents. Reduced, 94⅝ to 95⅝; New Three per Cents., 94⅝ to 95½; Indian Four per Cent. Debentures of 1858, 95½ to ½; Scrip of New Indian Loan, 94⅝; India Bonds, 10*s.* dis.; Exchequer Bills, 23*s.* to 27*s.* prem.—FOREIGN: Brazilian Old Five per Cents., for Acct., 102½; Ditto Four and a Half per Cents., 1852, 92½; Dutch Two and a Half per Cents., 64¼ ex div.; Mexican Three per Cents., for Acct., 18⅝ to 19; Peruvian Four and a Half per Cents., for Acct., 88 to 87½; Ditto Uribarren Four and a Half per Cents., 79 ex div.; Ditto Three per Cents., 66¼ to 67; Portuguese Three per Cents., 1853, for Acct., 43⅜ to 43¼ ex div.; Russian Four and a Half per Cents., 95, ex div.; Sardinian Five per Cents., 83; Spanish Three per Cents., for Acct., 42¼ ex div.; Ditto New Deferred Three per Cents., for Acct., 31¼ to 30¼ ex div.; Turkish Six per Cents., 1854, for Acct., 81 to 79; Ditto 1858, for Acct., 65 to 69; Ditto Guaranteed Four per Cents., 103½; Venezuela New Two and a Halfs, 27½ to 28½ ex div.

## Metropolis and its Vicinity.

ANNIVERSARY OF AMERICAN INDEPENDENCE.—The 83d anniversary of the Declaration of Independence of the United States was celebrated on Monday night by a public meeting at St. James's Hall. General Campbell, United States' Consul in London, presided on the occasion, and was supported by his Excellency Mr. Dallas, Mr. Bright, M.P., and about 170 other gentlemen. The hall in which the banquet was held was decorated with flags, among which the stars and stripes and union jack were pre-eminent. At the lower end of the room the portraits of General and Lady Washington, painted by Rembrandt Peel, an American artist, were hung, while Winterhalter's portrait of the Queen, which was kindly lent by her Majesty for the occasion, overhung the chair of the President. The galleries surrounding the hall were filled with ladies. The Chairman, in proposing the first toast, said that sunrise that day 83 years ago dawned on 13 States and 3,000,000 people, subjects of a foreign King, but before the sun had set those subjects met, and declared the independence of the American colonies, and left George III. not one subject in America, from the water meadows of Florida to the mouths of the St. Lawrence. Since that time the United States had advanced at a pace unparalleled in the annals of other nations; they had grown with more than a giant's growth and more than a giant's power—a power which he was proud to say had never been abused, but used for the most beneficent ends. While, then, the firmness and decision of their ancestors was a source of pride to all Americans, they ought also, on the other hand, not to forget the common mother from whom they sprung. He concluded by proposing, "The Day we celebrate," which was received with loud and prolonged applause. Mr. Dallas, in returning thanks, drew a parallel between the struggles of the United States for independence in 1776, and the war which was now in progress for the independence of Italy, contending that both contests resemble each other in the fundamental wish for national independence worked out with the aid of France, in the one case under the rule of a Bourbon, in the other under that of a Bonaparte. "Who now," he said, "doubts that this vast empire of Great Britain has immensely benefited by the conversion of her western colonies into sovereign confederated States? Who doubts that, since the fierce passions of revolutionary strife have died away, a keen yet generous competition in the pursuits of commerce, of science, of art, and of renown has enriched and elevated the peoples of both countries? Yes! the country in which we are enjoying communion and hospitality, and the country to which we give our allegiance and love, may well unite in grateful eulogy of the Declaration of American Independence. In the spirit of these desultory remarks I offer in conclusion this sentiment:—National independence! success to it, whenever and wherever naturally desired and honestly pursued!" The Chairman then gave in succession the health of the President of the United States, the health of Queen Victoria, and the memory of Washington. In proposing the toast of the Queen, the Chairman said that prosperity and elevated rank, which had placed her Majesty above all human responsibility, had not developed a single vice or blemish; her high merits had enshrined her in the hearts of all her subjects, and gained her the applause of all nations. Placed in the exalted station which she occupied, she had been the "cynosure of neighbouring eyes," and had set an example as a daughter, wife, and mother worthy of universal imitation. The toast was drunk with loud and enthusiastic cheers, the whole audience rising, while the band played "God save the Queen." Among the other toasts was one of "Non-intervention, the true Policy of Free Governments," coupled with the name of Mr. Bright. Mr. Bright, who was loudly cheered, in acknowledging the compliment spoke as follows:—

"He felt grateful for the way in which they had received the name of one who was almost a stranger to all in the room. He was there that evening because he felt profound sympathy and profound admiration for those broad principles of equality and human right on which the American constitution is founded. He was a citizen of a country in which monarchy had endured for centuries, and in which it had never been more respected than at the present moment—a country in which a mixed constitution existed, but which he took the liberty to think was not quite equally mixed—a country in which were laid the foundations of that freedom of which they the American people were so justly proud. In connexion with the toast with which his name had been coupled he gave it his heartiest and his strongest assent. That toast practically meant that non intervention was the true policy of the United States and of England, for there were few Governments in the world which were free except the Government of the United States and that of the United Kingdom. To the people of America the doctrine of non-intervention was not new. It was as old as their independence, and took its origin on the same day. A legacy which the prescient mind of Washington had bequeathed to them was never to entangle themselves in alliances with foreign States. But that which has been a settled faith in America has unhappily been repudiated as foolish on this side of the Atlantic, and the results of the different policy pursued by the two countries was visible in the fact that our Chancellor of the Exchequer would soon have to ask for the financial wants of this country five times as much as the financial Minister will ask of the people of the United States. On this great question of policy the people of this country were as children, to whom at length a ray of light has been given after having been the victims of a phantom fraught with the greatest danger. He then proceeded to contrast the different policies of the executives of the two countries, and said that there was no fear of the President between the sessions of Congress plunging the country into an expensive and disastrous war. There was no tradition in the United States that it was necessary to keep up a large fleet to make weight and counsels felt in the various European Courts. Had the same policy, which Washington enunciated 80 years ago, been pursued in this country no man would be now speculating on the probabilities of Lord Derby, or Lord Palmerston, or any other Minister dragging England into the struggle in Italy. The whole question was one of sentiment, and sentiment alone. He was glad to believe that an increasing feeling of the folly of such a policy was springing up in England, and rapidly assimilating itself to the feeling in the United States. The principle of small armaments was excellent, for if the principle of having a small but sufficient navy were carried out, there would be small inducement for rushing into strife. Large armaments, besides, were antagonistic to liberty, for supposing one man in England was intrusted with the command of 40,000 or 500,000, where would liberty be then? After commenting on the present advantages and glorious future of the States, he expressed his opinion, in conclusion, that after numerous generations of Englishmen had passed away the existence and prosperity of the United States would be a blessing to countless millions and an example to freemen in every part of the world."

THE PROPOSED EXHIBITION OF 1861.—The annual report of the Council of the Society of Arts states at great length the prospects of success of another great exhibition of the products of industry, and the postponement of such exhibition on account of the war on the Continent, which it was feared would seriously interfere with its success. Resolutions to that effect were passed by the council on the 18th of May:—"It was not without long consideration, and even a slight difference of opinion, in the council," says the report, "that their resolutions were carried. It was felt by some members that it was the duty of the society, as a body independent of politics, to enter a protest against war being allowed to interfere further than is inevitable with arts, manufacture, and commerce, stopping thereby the progress of civilisation; and it was urged—and well urged—that even assuming war to continue, England alone could produce an exhibition worthy of public patronage. The majority of the council, however, felt that the public mind was never occupied by two great subjects at once, and that even a partial failure would be more prejudicial to future exhibitions than a postponement, and they, therefore, though with deep regret, passed the resolutions already read. The next great international exhibition stands, therefore, postponed until the earliest favourable opportunity."

PUBLIC ADVERTISING COLUMNS.—A French company has recently been formed for the erection in the public

streets of advertising columns, exhibiting in glazed frames a miscellaneous collection of trading advertisements, with the addresses of parochial officers, &c. One of these columns has been erected in Piccadilly opposite Apsley House, and has excited so much dissatisfaction, not only with its general appearance, but with the character of its advertisements and the obstruction it has caused in such a leading thoroughfare. The subject was discussed on Tuesday at a meeting of the Commissioners of Sewers, and notice of motion was given to rescind the resolution of the Court giving permission to erect similar columns near the Royal Exchange and in Holborn.

IMPROVEMENTS IN LEADENHALL STREET.—On Tuesday, by direction of the Fishmongers' Company, the well-known Printing Office of the "Minerva Press," in Leadenhall Street, with several other houses which are to be cleared away for the purpose of the improvement of the neighbourhood, were sold by auction. The houses extend from Leadenhall Street to Lime Street Square. It is intended to erect large warehouses and other buildings on the site.

LONDON SCOTTISH RIFLE CORPS.—A meeting of Scotchmen resident in the metropolis, convened under the auspices of the Caledonian and Highland Societies, was held on Monday at the Freemasons' Tavern, for the purpose of considering the propriety of forming a volunteer rifle corps. Lord Elcho, M.P., took the chair and addressed the meeting at some length in favour of the establishment of such a corps, expressing his opinion that the danger was not imminent, but whenever it should be imminent that would be too late to prepare. Sir J. H. Maxwell moved and Sir C. Forbes seconded a resolution approving the formation of a Scottish volunteer corps in the metropolis, which was unanimously agreed to. In answer to questions, the Chairman said it was intended to invite the co-operation of all classes of Scotchmen, and he hoped that all his countrymen resident in the metropolis would come forward. Sir C. Forbes moved and Sir W. Forbes seconded a resolution approving the formation of a fund for defraying the expenses of equipment of persons who might be unable to provide their own accoutrements, which was agreed to unanimously. A committee was then appointed, with power to add to their number.

THUNDERSTORM.—On Saturday night, about 10 o'clock, the metropolis and suburbs were visited by a very severe storm of thunder and lightning, accompanied by rain, the latter causing the destruction of an almost incalculable amount of property. Many persons were struck by lightning, and in most cases very seriously injured. In the neighbourhood of Newington, Clapham, and Wandsworth the storm was felt with great severity, and the low-lying districts along the river as far as Kingston were laid under water. At Sydenham, Fulham, Richmond, Kew, Twickenham, and other places, the market gardens and private grounds were seriously damaged, and some of the embankments on the railways were injured. In Hyde Park the lightning shattered a lofty elm-tree near the Cavalry Barracks and killed 14 sheep which had collected near it; and in Kensington Gardens 16 others, which had taken shelter under a tree that was struck, were also killed. Many of the principal thoroughfares were overflowed to the depth of 2 feet, the water rushing into the basements and cellars, and destroying much property of all kinds.

EXECUTION AT NEWGATE.—On Monday morning Samuel Adams, aged 36, a shoemaker, who was convicted at the last assizes at the Central Criminal Court of the murder of his sister-in-law Martha Page, was hung in front of Newgate in the presence of several thousands of persons, who though of a similar character to those who assemble on such occasions, were more orderly than usual. He had previously expressed his sorrow for his crime, and freely admitted the justice of his sentence.

THE PUBLIC HEALTH.—The weekly return of the Registrar-General states that the deaths in London in the week that ended Saturday, July 2, were 1024. In the corresponding weeks of the 10 years 1849-58 the average number was 1126; which, if raised in proportion to the increase of population, will become 1238. The return of last week was therefore 214 below the average. During the week the births of 883 boys and 907 girls, in all 1790 children, were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1610.

## Provincial.

BIRMINGHAM.—At the borough sessions last week, Antonio Calvocoresi, a Greek, lately carrying on business at Manchester, surrendered on a conviction at the January sessions, for coining in imitation of Turkish piastres. At the time the trial took place the defendant was in bad health, and judgment was respited until the Easter sessions, bail being taken for his appearance. Subsequent to the trial defendant travelled to Egypt for the benefit of his health, and while at Alexandria was detained for debt, and was unable to reach England until two hours after the sessions had concluded; his recognisances were accordingly estreated. The Recorder in passing sentence said that he was of opinion the estreat ought to be removed, because it had been shown that the defendant had made an endeavour to surrender at the Easter sessions and receive the judgment of the Court. With regard to the offence of which defendant had been found guilty, he did not think that a severe punishment was called for; therefore, taking into consideration the state of defendant's health, the sentence was that he be imprisoned for three months in the borough gaol.

DEVONPORT.—In addition to the fortifications which have been for some time in progress at the back of Mount Edgecumbe, the Government have determined to strengthen the batteries at Mount Wise, commanding the entrance to Hamoaze. A breastwork, 6 feet high, is to be raised on the redoubt, and two of Sir William Armstrong's heavy guns are to be placed on the angle. At Bovisand Point, near the eastern entrance to Plymouth Sound, preliminary arrangements have been made for the erection, close to the water's edge, of turf batteries, which will extend from the flagstaff to the gate.

FALMOUTH.—A tragical occurrence took place a few days ago in this town. It appears from the evidence given at the inquest on Friday that on the preceding evening Mr. Stephen Bell, a surgeon, who has recently been in practice at Weston-super-Mare, but who is a native of Falmouth, called at the house of his mother, an invalid lady residing in the town, and demanded money from his two sisters. The mother had been in the habit of making him an allowance, which had been discontinued for some time. The sisters refused to give their brother any money, whereupon he became very violent, and they sent for Captain Caddy, a friend of the family, who remonstrated with Mr. Bell, but he still continued violent, and took from the wall a spear, which was placed there as an ornament, with which he stabbed the captain in the thigh. The wound was deep, and blood flowed profusely from it. Mr. Bullmore, a surgeon, was speedily on the spot, and rendered all the assistance in his power, but Mr. Caddy died a short time afterwards. When Mr. Bell was apprehended he said, "I'm a gone man; I don't deny that I did it." He also said—"After Captain Caddy threatened to call for the police to turn me out I took hold of the lance, and Captain Caddy sprang upon me, and it must have occurred in this way," or words to that effect. Captain Caddy, who was 72 years of age, was for many years in command of the Swiftsure packet. Mr. Bell is 50 years of age. The jury returned a verdict of Wilful Murder against him, and he was fully committed to take his trial at the ensuing assizes.

HULL.—On Sunday afternoon the inhabitants of Blackfriargate and neighbourhood were startled by a rumour that a murder and suicide had been committed. It appears that for some time past a man named John Ryley and his wife and two children (aged 8 and 11 years) have resided in Mariners' Court, Blackfriargate. They have lived together most unhappily, however, and it is only a short time ago since the wife summoned her husband before the magistrate for violently assaulting her, when he was committed to one month's imprisonment. His sentence had only just expired, when he had recourse to his former treatment, and apparently with a firm determination to end the woman's existence. On Sunday afternoon a woman went to the house for the purpose of getting a sucepan. She knocked at the door, but no one answered her. She then looked in at the window, and not being able to see any one stirring she threw it open, when to her dismay she saw Ryley suspended by the neck from the bed. An immediate alarm was given, and the door burst open, when Ryley's wife was discovered in bed, with her throat cut from ear to ear. A surgeon was sent for, and Ryley was cut down, just as he was beginning to turn black in the face. Under the care of the surgeon he shortly afterwards recovered, and was then conveyed to the police-station. The poor woman's life however was quite extinct. The murder appeared to have been committed with a dinner knife, and while the woman was asleep in bed. Ryley was brought before the stipendiary magistrate, and on Monday committed for trial at the ensuing assizes.

LEEDS.—On Wednesday week the Leeds Town Hall was crowded by a fashionable audience, the occasion being the presentation of several testimonials to the Very Rev. Dr. Hook, Dean of Chichester, and Mrs. Hook, on their leaving this town. The day being also the commemoration day of the Leeds parish church, a sermon was preached in the morning by Archdeacon Dodgson, and in the evening by Dr. Hook. In the afternoon, at 3 o'clock, luncheon was served in the Victoria Hall, the chair being occupied by Sir Peter Fairbairn, the Mayor. After the usual loyal toasts, several addresses were presented and presentations made to Dr. and Mrs. Hook. The committee appointed at the recent public meeting brought up an address, accompanied by a purse containing 2000 guineas. These were enclosed in an elegant oaken casket and presented by Mr. W. B. Denison, the address being read by the Rev. Alfred Barry. An address from the Manchester Unity of Odd Fellows, (with a beautiful silver centre-piece representing the cardinal virtues of the order, Faith, Hope, and Charity), was next presented by Councillor William Longley, P.G. The Short Time Committee of the West Riding next thanked Dr. Hook for his services in their behalf. In the last place, the choristers of the parish church, headed by their precentor, presented the dean with a timepiece and candelabra. These various addresses and presents having been deposited with the Mayor, he then formally delivered them over to Dr. Hook, amid the applause of the meeting. His worship concluded by proposing, "Health and happiness to the Very Rev. Dr. Hook." The Dean of Chichester expressed his deep acknowledgments for the kindness which had that day been manifested towards them. He should ever look back upon his sojourn in Leeds with deep feelings of satisfaction and thankfulness, and whithersoever he went he should never forget that town of his adoption. The ladies of the parish of Leeds, who had subscribed a purse of 270*l.* for Mrs. Hook, next presented their offering to that lady through Mr. John Smith, banker, and Dr. Hook acknowledged the gift on Mrs. Hook's behalf.

LIVERPOOL.—On Sunday her Majesty's ship Nile, of 91 guns, commanded by Captain A. P. E. Wilmot, C. B., arrived in the Mersey, from the Clyde, on the recruiting service. The Nile is the first 91 gun ship that ever entered the Mersey.

OXFORD.—In a convocation held in the Theatre on Wednesday the Earl of Carnarvon was admitted to the office of High Steward of the University. In the same Convocation the honorary degree of Doctor in civil law was conferred on the Right Hon. John Inglis, M.A., Balliol College, Lord Justice Clerk of Scotland, the Right Hon. Sir John Laid Mair Lawrence, Bart., G.C.B.; Major General Sir Archdale Wilson, Bart., Delhi, K.C.B.; Colonel Greathed, C.B.; George Boole, Esq., Professor of Mathematics in Queen's College, Cork, and Antonio Panizzi, Esq., Principal Librarian of the British Museum.

WIGAN.—An alarming riot took place in this town on the 30th ult., on the delivery of a lecture against Popery by the Baron de Camin. The Roman Catholics first attacked the hall where the lecture was delivered, but on the reading of the Riot Act, the police, assisted by a large body of people, drove back the assailants, and captured a number of prisoners. All the men taken were armed, some of them with most dangerous weapons, which they fortunately had not much opportunity of using. The mob on the other side, consisting of Orangemen and colliers, determined to make reprisals, and the most disgraceful rioting took place till late at night. The windows of the Roman Catholic chapel and of the houses in the Irish quarter were destroyed, and two men were so seriously injured as to leave little hope of their recovery. The rioting was renewed on the following night, when a mob of colliers and Orangemen attacked a lot of houses inhabited by the Irish population, and after a fight of some duration, succeeded in forcing an entrance, breaking all the property, and attempting to set fire to the houses. While they were thus engaged the whole of the borough police were marched to the spot, followed by a detachment of the county constabulary, which had been stationed at the police office, and after subduing the fire, captured 13 prisoners. The Baron de Camin gave his lecture the same night on Auricular Confession.

YARMOUTH.—The Mayor of this town has received a letter from the War Office in answer to an inquiry he had addressed to the Government respecting the defences of the port, stating that an inspection of the coast and entrance of the harbour has already been made by a committee of naval and military officers, and in addition to the two batteries recently erected in front of the town, an armament of five heavy guns has been proposed at Gorleston, commanding the entrance to the harbour. This latter work is intended for execution in the current year, should a site be obtained in time, for which negociations are now in progress.

## Ireland.

DEPARTURE OF THE EARL OF EGLINTOUN.—The Earl and Countess of Eglintoun held their farewell levée on Monday afternoon in Dublin Castle. Previous to the levée addresses were presented from the Corporation, the Royal Dublin Society, the citizens and traders of Dublin and the county and town of Galway, to each of which a suitable reply was given. In answer to the Corporation his Excellency said:—

"That Ireland is progressing beyond all precedent is as undoubted as it is gratifying, and I earnestly trust that the steady and progressive improvement which has taken place within the last few years will not be impeded by party strife or religious dissension, but that it will be fostered and developed by a firm and impartial administration of the law, by a strict adherence to the principles of religious tolerance, and by the exhibition of judicious liberality on the part of the executive Government and the Imperial Legislature. More matured consideration and a longer experience of this country have but confirmed me in the opinions I have on all previous occasions expressed of the great importance of the office I have held among you, and I trust no party in the State will ever sanction the short-sighted policy which would be involved in its abolition."

THE IRISH JUDICIAL BENCH.—Mr. Henry Gerald Hughes, Q.C., ex-Solicitor-General, has been appointed a Baron of the Exchequer, in the room of Baron Richards, who retires.

MARSHAL M'MAHON.—The *Nation* proposes that a sword, purchased by subscription, shall be presented to Marshal M'Mahon on the ground of his Irish extraction.

THE ATHLONE ELECTION.—An Athlone paper announces that 115 warrants from the Speaker of the House of Commons have been served upon the supporters, friends, and agents of Mr. John Ennis at the late general election. The total number of voters in the borough is only 225, so that the warrants have been served on more than half the constituency.

## Scotland.

INAUGURATION OF THE GLASGOW STATUE TO SIR ROBERT PEEL.—Mr. Mossman's statue in honour of Sir Robert Peel, erected in George Square, was inaugurated on the 28th ult in the presence of the Lord Provost, sheriffs, magistrates, and members of town council

Mr Dalgleish, M.P., Mr. Buchanan, M.P., Sir Andrew Orr, and a number of influential citizens. In handing over the statue to the care of the corporation, Mr. Dalgleish expressed a hope that the committee would have no cause to regret having entrusted the execution of the statue to a Glasgow artist. A public dinner was afterwards given in the Queen's Rooms.

Edinburgh Banquet to Lord Brougham.—It is understood that the complimentary dinner to be given by the citizens of Edinburgh to Lord Brougham will take place about the third week in October, and that it is probable that Lord Chancellor Campbell will be present.

Gold Seeking in Moffatdale.—Mr. Griffin from Leamington passed through Moffat last week provided with all the tools necessary for gold digging and washing and accompanied by two miners from Leadhills. The scenes of their explorations are to be at the head of Moffatdale, and in the neighbourhood of St. Mary's Loch.

## Law.

Court of Chancery.—*Gee v. Graziani and Smith.*—Vice-Chancellor Wood on Saturday gave judgment in this case, the argument in which occupied nearly three days of last week. The plaintiff was [illegible] Graziani and Miss Smith, engaged to marry the plaintiff, and the bill was filed by the plaintiff complaining that the defendants had, by the latter's procurement, Graziani and Miss Smith, gone beyond the limits of London and the neighbourhood. All the costs of the suit to be paid by the two defendants, and as to the inquiry at chambers as to damages, with liberty to apply with respect to any payments claimed under the agreement.

Court of Queen's Bench.—(Sitting in Banco, before Mr. Justice Wightman and Mr. Justice Hill.)—*The Queen v. The Bishop of Chichester.*—In this case a rule had been granted calling upon the Bishop of Chichester to show cause why a mandamus should not issue, commanding him to issue a commission under the 3rd section of the Church Discipline Act, to examine into certain charges and reports in circulation against the Rev Richard William Randall, the rector of Washavington-cum-Graffham, in the county of Sussex and diocese of Chichester. The rule was granted on the application of the Rev Charles Portales Golightly, of Oxford, upon the suggestion that the Rev W Randall had introduced and taught certain Romish practices and doctrines in his parish, and that the bishop, having heard Mr Randall's explanations, had refused to issue a commission of inquiry. The rule was argued on the 16th ult., when the Court took time to consider their judgment. In the meantime Lord Campbell had been made Lord High Chancellor and Mr. Justice Erle Lord Chief Justice of the Court of Common Pleas. The other two judges who heard the arguments were Mr. Justice Wightman and Mr Justice Hill, who now severally gave judgment to discharge the rule. Mr Justice Wightman held that the bishop's communication was discretionary with the bishop, and that he therefore had power to withhold the issue of a Commission if he thought proper to do so. Mr. Justice Hill considered that the question of discretion would deserve very careful argument if it could come before the Court, but that it did not call for present consideration, inasmuch as there was a preliminary question which was fatal to the rule—viz., that Mr Golightly was not entitled to make the application, and therefore, the Court, in the exercise of their discretion, ought not to make the rule absolute. His lordship added that the present Lord Chancellor and the Lord Chief Justice of the Common Pleas, who were both members of this Court when the case was argued, had authorised him to state that they were also of opinion that the present rule should be discharged. Dr. Phillimore applied to the Court to grant the bishop the costs of the rule, upon the ground that the application had been made by a gentleman who was out of the diocese. Mr. Justice Wightman, after conferring with Mr Justice Hill, said that as the application was made by a stranger, and under all the circumstances of the case, the rule must be discharged with costs.

Court of Exchequer.—(Sittings at Guildhall, before the Lord Chief Baron and a Special Jury.—*Swinfen v. Lord Chelmsford.*—The trial of this important case, which has long been looked for with considerable interest, particularly by the bar, as involving a question as to the rights of counsel to enter into a compromise on behalf of their clients, commenced on Monday morning. Long before the appointed hour the approaches to the court were occupied, and the greatest anxiety to obtain admission was manifested. On the doors being opened every available seat was occupied, chiefly by the members of the bar, who mustered in great force. Mr Kennedy, Mr George Denman, and Mr M'Mahon were counsel for Mrs Swinfen, the plaintiff, Sir Fitzroy Kelly, Mr Bovill, Mr M Smith and Mr. Ellis represented the defendant, Lord Chelmsford. The declaration stated that the plaintiff, Patience Swinfen, and the Right Hon Frederic Lord Chelmsford; that Samuel Swinfen decreed all his estates to the plaintiff, who was his daughter-in law, and her heirs; that after the death of the testator Frederick Hay Swinfen, claiming to be entitled to the estates as heir at law, filed a bill in the Court of Chancery, praying that an issue might be directed to try the validity of the decree; that the Master of the Rolls ordered an issue at which the now plaintiff should affirm, and Frederick Hay Swinfen should deny, the validity of the will, that the same was tried at Stafford, before Sir Cresswell Cresswell, that the defendant, being then a barrister, was her leading counsel; yet that he, without her authority and against her will, and wrongfully and fraudulently, and contrary to his instructions, entered into and concluded a compromise and signed a paper set out in the declaration, and consented that a juror should be withdrawn, the terms being that the estate should go to Frederick Hay Swinfen, on the now plaintiff being secured [illegible] a year. The second count, like the first, stated that the defendant had been retained as the plaintiff's counsel, that after the commencement of the trial Sir Cresswell Cresswell, the judge who tried the cause, privately, clandestinely, and illegally communicated with the defendant as the counsel for the plaintiff, and gave him to understand that he had formed an unfavourable opinion of the plaintiff's case and that she would probably lose the verdict, for the purpose of intimidating defendant and inducing him to compromise the case, and that the defendant, without the knowledge of the plaintiff, although she required him to proceed, being unduly and improperly influenced by the said judge, did unduly and wrongfully and fraudulently become a party to the purpose of the judge, by reason of which a juror was withdrawn and the trial was not proceeded with. The declaration then stated special damages, and the plaintiff claimed 10,000*l*. Lord Chelmsford, as to the whole of the declaration, pleaded not guilty. As a second plea to the first count, he said that he entered into the compromise in good faith and without fear, and in the belief that he had full authority from the plaintiff. In a third plea to the second count he denied that Sir Cresswell Cresswell did privately, clandestinely, or illegally communicate with him. In a fourth plea as to the second count, he denied that he did wrongfully or fraudulently, or in collusion with Sir Cresswell Cresswell, enter into the said arrangement, as alleged. In a fifth plea to the second count he said that the plaintiff did not require him to proceed. In a sixth plea he said that when he entered into the agreement he did so in good faith, and in the belief that he had full authority from the plaintiff. In a different plea to the second count he said that after he had been retained, and after he had advised plaintiff to enter into a compromise and she had refused, Charles Sharpe, the plaintiff's attorney, communicated to him a fact, which, in his judgment, rendered it necessary and expedient to make the compromise, and that, acting to the best of his judgment and in the interests of the plaintiff, and without fraud, he had entered into the agreement adduced; and for a last plea, that he was not retained by the [illegible] alleged. On these pleas issue was joined. Mrs Swinfen, the plaintiff, and several witnesses were examined in support of her case; Lord Chelmsford, Lord Chief Justice Cockburn, Mr Alexander, Q.C., and other gentlemen were examined for the defence. After two days' trial, the Lord Chief Baron proceeded to sum up. He told the jury that in the case of persons upon the second count, that no evidence had been and before them to which defendant could be called upon to make any answer. Sir Cresswell Cresswell had been called, and after hearing his evidence there did not appear to be any evidence; therefore upon that count the defendant would be entitled to a verdict. He must be permitted to say that he did not think it was decent to put the second count in the declaration on the record, and that any apology could be no sort of satisfaction either to the judge whose feelings had been outraged, or to decency or public morality, which had been attacked by putting on the record such a count without a tittle of evidence being adduced in support of it. He would lay it down as a principle of law, that all that the law required a barrister to do was to discharge his duty towards his client as best he could. He might be actively wrong in a statement—he might be at the moment for the plaintiff but suppose, under the influence of fear—that if he attended to act honestly by his client he was not responsible. The simple question which the jury had to decide was whether the defendant had acted fraudulently or improperly or in the best interests of his client. The jury immediately found a verdict for the defendant upon both counts. A bill of exceptions was tendered by Mr Denman to the Chief Baron's ruling before the verdict was given. The case did not terminate until 20 minutes to 10 o'clock at night.

Central Criminal Court.—*The Rochford Poisoning Case.*—*Thomas Smithurst*, who was stated in the calendar to be 48 years of age, and described as a surgeon, was placed at the bar on Thursday before the Lord Chief Baron, charged on an indictment and the coroner's inquisition with the wilful murder of Isabella Barrow. He pleaded not guilty in a low tone of voice. After the jury had been sworn the prisoner addressed the Court and objected to be tried by the Lord Chief Baron on the ground that he was a personal friend of Dr. Taylor, an important witness for the prosecution. The Lord Chief Baron said he might as well object to be tried at all, for all the judges were acquainted with Dr Taylor. He would however consult Mr Justice Wightman on the subject. After a conference between the judges his lordship said the trial must proceed. A juror then applied to be excused from serving, on the ground that he had formed a strong opinion against the prisoner. The Lord Chief Baron, after again consulting Justice Wightman, said that the Court had no power to relieve the juryman who should have stated his objection before he was sworn. The trial then proceeded and occupied the Court during the whole of Thursday and part of yesterday when it was suddenly stopped by the illness of one of the jurymen who fainted during the medical evidence for the prosecution, and had to be carried out of court. Dr. Copland and other medical men were sent for, and on their stating that the juryman would not be able to discharge his duties for two or three days, the Lord Chief Baron said that as they could not go on with the trial, it was his duty to discharge the jury. The jury were then discharged, and the trial was postponed to the next sessions.

## Sporting.

### NEWMARKET JULY MEETING.

Tuesday.—*Match.* Mr. R. Ten Broeck's Lecturer beat Apollo.—*Handicap Sweeps.* Baron Rothschild's Mentmore beat Killgrew and Merry May.—The *July Stakes.* Lord Portsmouth's Buccaneer beat Nicholas, Blue Ruin, and 7 others.—*Match.* Sir J. Hawley's Twang beat Umpire.—*Handicap Plate.* Baron Rothschild's Boston beat Orbitree, Artless, and 6 others.—*Sweeps.* Mr Barnes's Fleetwood beat Mr G Fleming's Lily and Lord Strathmore's colt.

Wednesday.—*Match.* Duke of Bedford's Eda beat Harrietan.—*Sweeps.* Mr Alexander's Brine beat Asphodel and Mr J. Ward's filly.—The *Town Plate.* Baron Rothschild's North Lincoln beat Luff.—*Sweeps.* Baron Rothschild's Magnum beat Qui Vive and Antonio.—*Handicap Plate.* Baron Rothschild's Boston beat Dame Alice, King of the Gipsies, and 7 others.—*Sweeps.* Sir J Hawley's Twang beat Mr Fleming's filly and Dapple.

Thursday.—*Match.* Mr Payne's Rechab received, Mr R. Ten Broeck's Dixie paid.—*Handicap Plate.* Sir R. W. Bulkeley's Knowsley Duster beat Pulverizer, Rose, and 7 others.—*Handicap Sweeps.* Colonel Towneley's King of the Gipsies beat Layton.—*Match.* Duke of Bedford's Killgrew beat Starling.—*Sweeps.* Count Batthyany's Olympus beat Layton, Mr G Fleming's filly, Pantaraca, and Target.—The *Chesterfield Stakes.* Mr R. M Jacques's High Treason beat Trevalgan, Blue Ruin, and 4 others.—The *Midsummer Stakes.* Baron Rothschild's North Lincoln beat Rechab and Coxcomb.—*Plate.* Mr H. Lowther's Brine beat Chantress, Mr G Fleming's filly, and 7 others.—*Match.* Duke of Bedford's Orlando beat Apollo.

## Obituary.

The Right Rev Bishop Maltby, late Lord Bishop of Durham, died on Sunday, at 1, Upper Portland Place, in his 90th year. The bishop, who was of the Evangelical school in the Church, was the son of Mr George Maltby, of Norwich, and was born in St. George Tombland, in that city, in 1770. He was educated at Pembroke College, Cambridge, where he graduated as B.A. in 1793, M.A. in 1794, B.D. in 1801, and D.D. in 1806. He gained the prize medals for Greek odes in 1790 and 1791, and the Chancellor's medal in 1792 for classics, in which year he was eighth wrangler. He afterwards became chaplain to the Bishop of Lincoln, and held one of the prebends of his cathedral, as also the living of Barkston. He published an edition of Mant's "Lexicon Græco-Prosodiacum," "Sermons," &c. He was consecrated Bishop of Chichester in 1831, and was translated to Durham in 1836. He resigned the latter see, under Act of Parliament, in September 1856, which took away his seat in Parliament, and left him an annuity of 4,700*l*.

Lieut.-Colonel Patrick Campbell, formerly of St. Catharine's, Argyleshire, and of H.M.'s 49th, 48th, and 95th Regiments, died on the 24th ult., at Tours, France, in his 80th year. He served with the army in Holland under the command of the late Duke of York, and was present, under Lord Nelson, at the battle of Copenhagen in 1801, for which he received a medal, and served in the Peninsula from 1808 to 1811, for which he received the medal and three clasps for Talavera, Busaco, and Albuera.

## Miscellaneous.

Loss of the Alma.—The Peninsular and Oriental Company's new iron steamship Alma, which brought the present overland mail, grounded at Mooshedgerah, near the Harrasis Islands, in the Red Sea, at 3 A.M. on the 12th June, and immediately hoisted over and filled. The mails, passengers, and crew were all saved, and it was believed that the vessel might be got off.

Sir John Bowring, the late governor of Hong Kong and Minister to China, and his eldest daughter, were among the passengers, and it will be learned with regret that a large portion of his valuable MSS. and public documents were lost in the disaster.

The Atlantic Telegraph.—Mr. Robert Stephenson, C.E., M.P., Professor Wheatstone, F.R.S., and Professor Thompson, LL.D., in connection with Mr. C. F. Varley (the managing electrician of the Electric Telegraph Company in Lothbury), have agreed to form a committee to advise with the directors of the Atlantic Company, and to decide for them, with the aid of such other scientific men as the board may think proper to consult, as to all the details of the next cable, and as to the form of its external covering, internal conductor, and extent of insulation. When these details are determined on, and the cable most suited for Atlantic depths shall have been settled by means of the valuable data placed at board's disposal from the archives of the company, experiments as to submersion will take place, and any points not exactly cleared up at the present moment will be carefully decided by actual experiment.

BIRTHS.—On the 26th ult, at Hertingfordbury Rectory Hertford, the wife of the Hon and Rev Gopolphus Hastings, of a son—1st inst, at the Deanery, Christ Church, Oxford, Mrs. Liddell, of a daughter—29th ult, at Redland Park, near Bristol, the wife of Lieut.-Colonel W Cross, H.M.'s Madras Army, of a son—1st inst, at Ballyarthur, county of Wicklow, the seat of Colonel Bayly, Mrs. Talbot, of Mount Talbot, of a son and heir.

MARRIAGES.—On the 5th inst, at Castle Ashby, the Marquis of Northampton, to Miss Eugenia Vyner, daughter of Mr and Lady Vyner, of Newby Hall, Ripon.—4th inst, at St. James's, Piccadilly, Graham Alanson Cayley, Esq., eldest son of Sir Digby Cayley, Bart., of Brompton, in the county of York, to Catherine Louisa, eldest daughter of Sir William Worsley, Bart., of Hovingham.—30th ult, Henry Gregory Conroy, Colonel Grenadier Guards, second son of the late Sir John Conroy, Bart., to Fanny, daughter of the late William Ashburner Broderip Marshall, Esq.—4th inst, at the Parish Church, Weaverham, Cheshire the Rev Thos. Wm. Whale, to Emma Lady Cockburn.—30th ult, at Swindon, near Cheltenham, John Edward Sutherland Little, Esq., Bengal Civil Service, eldest son of Sir John Scott Lillie, C.B., to Cecilia Mary, eldest daughter of the late Major J. Nott, Bombay Engineers.

DEATHS.—On the 1st inst, at Thorp Perrow, Yorkshire, Mary Emily, daughter of Mr and Lady Augusta Milbanke, aged 25.—4th inst, at 5, Conduit Street West, Paddington, Lieut.-Colonel George Edward Raitt, late Barrack Master, Bristol, and Deputy Adjutant-General of the Forces in the Mediterranean from 1814 to 1828, aged 78.—27th ult, at Nice, Juliana, wife of Rear-Admiral Bligh.—27th ult, at sea, on board the Alfred, Francis Berkeley Drummond, Esq., of the Bengal Civil Service, aged 33.—24 inst, at his residence, 77, St. John's Wood Terrace, Mr. John Thompson, Superintendent of the Gardens of the Zoological Society of London, Regent's Park, formerly manager of the late Earl of Derby's collection at Knowsley, Lancashire, aged 48.—4th inst., at Granton Hotel, near Edinburgh, David, second son of the late Robert Graham, Esq., M.D., Professor of Botany in the University of Edinburgh.—4th inst, at Cadiz House, Cardiff, Doña Maria de los Dolores de Pico, eldest daughter of Don Juan Pico y Villanueva, Count of the Queen of Spain for the Principality of Wales.—28th ult, at the residence of his sister, 1 Norton Terrace, Longsight, near Manchester James Heywood, Esq., for nine years Assistant Secretary to the Royal Society, and upwards of 20 years Secretary to the Royal Agricultural Society of England, aged 55.—23rd ult, at Shorne, near Gravesend, Kent, Mr Joseph Wells, for many years Gardener at Redleaf, Penshurst, in the same county.

## Markets.

### COVENT GARDEN.—July 5.

Grapes and Pine Apples have this week been more abundant. Strawberries are also plentiful and cheap, as are likewise Cherries, Currants, and Raspberries. Of Apricots, foreign examples only can be had. English fruit not yet having made its appearance. Greengage Plums obtain 2s a dozen. Oranges fetch 4s 6d and 5s per 100. Nuts of all descriptions continue to realise fair prices. Cabbages and French Beans are plentiful. Rhubarb, Asparagus, and Seakale are getting over. Peas, Beans, Horn Carrots, and Globe Artichokes may be obtained in quantity. Cauliflowers are cheaper. New Potatoes realise from 6s. to 14s per cwt. Cucumbers abundant. Cut flowers chiefly consist of Orchids, Gardenias, Heliotropes, Lily of the Valley, Violets, Mignonette, Heaths, and Roses.

FRUIT.

| | |
|---|---|
| Pine Apples, per lb., 5s to 7s | Plums, per doz., 1s to 2s |
| Grapes, per lb., 3s to 6s | Apricots, do., 2s to 3s |
| Strawberries, p. lb., 6d to 2s | Figs, per doz., 6s to 8s |
| Raspberries, p. pint., 6d to 1s | Cherries, per lb., 6d to 1s 6d |
| Melons, each, 3s to 4s | Apples, per doz., 6s to 10s |
| Peaches and Nectarines, per doz., 8s to 15s | Oranges, per 100, 6s to 10s |
| | Lemons, per doz., 1s to 1s 6d |

VEGETABLES.

| | |
|---|---|
| Cauliflowers, per doz. 2s to 4s | Cucumbers, p. doz., 2s to 6s |
| Green Peas, p. quart, 1s to 2s | Tomatoes, per doz., 2s to 4s |
| Greens, per dozen bunches, 1s to 1s 6d | Artichokes, per doz., 2s to 3s |
| Cabbages, do., 1s 6d to 2s 6d | Beet, per doz., 1s 6d to 2s |
| Asparagus, p. bundle, 2s 6d to 5s | Celery, p. bundle, 1s to 1s 6d |
| Rhubarb, p. bundle, 6d to 9d | Shalots, per lb., 6d to 8d |
| French Beans, p. pint, 1s to 1s 6d | Garlic, per lb., 6d to 8d |
| Potatoes, p. ton, 90s to 100s | Lettuces, Cabb., per score, 1s to 1s 6d |
| — per bus., 2s to 2s 3d | Endive, p. score, 1s to 1s 6 |
| — per cwt., 4s to 5s | Horse Radish, p. bun. 1s 6d to 4s |
| — new, per lb., 6d to 1s | Mushrooms, p. pott, 9d to 1s 3d |
| Carrots, per bunch, 1s | Parsley, p. 12 bunches, 2s to 4s |
| Turnips, per bunch, 6d to 1s | Savory, do., 2d to 4d |
| Spinach, p. sieve, 1s 6d to 2s | |

### METROPOLITAN CATTLE MARKET.

Monday, July 4.

The number of Beasts is smaller than on Monday last. Prices are rather better than on that day, and a tolerable

demand is effected. The supply of Sheep is also considerably less, and trade is more cheerful at a very small advance on the average. Calf trade is about the same as on Thursday. From Germany and Holland there are 128 Beasts, 3300 Sheep, 202 Calves, and 50 Pigs; from Scotland, 200 Beasts; from Norfolk and Suffolk, 2100; from Ireland, 30; and 200 from the northern and midland counties.

| | s | d | s | d | | s | d | s | d |

| | | | | | Pigs .. .. | 3 | 6 | — 4 | 6 |

Beasts, 3310; Sheep & Lambs, 28,900; Calves, 270; Pigs, 290.

THURSDAY, July 7.

We have a good supply of Beasts. The hot weather causes a slow trade, and on the average prices are rather lower. The number of Sheep and Lambs is about the same as of late. There is a fair demand for best qualities at Monday's quotations. Trade is slow for Calves at late rates. Our foreign supply consists of 193 Beasts, 1900 Sheep, and 443 Calves. Milch Cows 112.

| | | | | | | | | | |

**MARK LANE.—MONDAY, July 4.**

The supply of English Wheat at this morning's market fresh arrived was moderate, but added to what was left over from last week made a good show. Being held in the morning for an advance of 1s. to 2s. per qr. it stopped sales, which subsequently proceeded slowly at the prices of this day se'nnight. Foreign was quite neglected; the arrivals being considerable, sales could only be effected by forcing at lower prices. Barley is a slow sale at last week's rates. Beans and Peas are unaltered in value. The Oat trade is slow, and the quotations of Monday last are barely supported. In Flour there is very little doing.

FRIDAY, July 8.

The weather this week has been fine and forcing, and if it remains so Wheat cutting on the forward soils is expected to be pretty general in the southern counties by Monday week. Excepting that the corn is much and very generally laid, we do not hear it complained of; we may therefore expect a fair yield if the weather continues dry; on the other hand wet would be very disastrous. Accounts from the north of France are very similar to the above, excepting that the crops there are more liable to damage from the greater quantity of weeds. From Germany Wheat is represented as promising well, but spring corn suffers from the want of rain. Great inactivity continues to be the characteristic of the Wheat trade; indeed, during the past week not only has this market been bare of country buyers, but even several of the town millers have failed to attend it. Prices throughout the kingdom have declined 1s. to 2s. per qr. The value of spring corn has not altered materially. Flour is written 1s. cheaper in the majority of the country towns. Since Friday last 12 cargoes of Wheat, 8 Maize, and 3 Barley are reported as arrived off the coast from Southern Europe, of which the sales are limited to a cargo or two of Odessa Maize at 29s. 6d. to 30s. per 492 lbs., and 1 cargo of Reny Barley at 23s. 10½d. per 400 lbs. The arrivals of foreign Wheat and Barley continue to be good, of all other grain moderate. The news of an armistice between France and Austria has increased if possible the dulness hitherto prevailing in the trade, and nearly the whole of the English Wheat left over from Monday remains unsold, the only offers made for the same being many shillings below the rates of that day, factors prefer to hold it over. Foreign was altogether neglected, and our quotations are therefore quite nominal. Spring Corn of all descriptions is difficult of sale; Barley and Oats must be quoted 6d. per qr. lower. The Flour trade is very heavy, and Norfolk difficult of sale at a decline of 1s. to 2s. per sack.

ARRIVALS FROM JULY 4 TO JU

LIVERPOOL, Tuesday, July 5.—We had a short attendance at market this morning, and buyers were just as much disinclined to operate as ever. Wheat and Flour were each offered at the rates of Friday, without leading to anything more than a small retail business. Indian Corn had only a slow sale, without change in quotations. Oats and Oatmeal dull. Egyptian Beans the turn easier. Peas and Barley were little dealt in, and value unaltered.

FRIDAY, July 8.—Corn market quiet, owing to peace news, and Tuesday's rates have been scarcely reported. Oatmeal rather firmer. Barley and Beans steady. Indian Corn in active demand, at 2s. advance. Beans firm.

## FRUIT FOREMAN.

WANTED, a Working Man, who thoroughly understands Budding, Grafting, and general management of Fruit Trees, &c.—Apply by letter only to H. LANE & SON, The Nurseries, Great Berkhampstead, Herts.

WANTED, AS FOREMAN, to take the thorough charge of a SMALL NURSERY, within 4 miles of Hyde Park Corner.—Address, with references and wages required, A. D., Ladbroke Nursery, Notting Hill, W.

WANTED, A GROWER in a small Nursery.—He must thoroughly understand the growing of Soft-wooded Plants.—Address, Ladbroke Nursery, Notting Hill, W.

WANTED, a MAN without incumbrance used to GARDENING, to put a Horse to if required, and make himself generally useful. Wages 12s. per week, with Lodging and Vegetables.—Apply by letter, A. D., 31, Cambridge Place, Paddington.

WANTED, in the country, a plain WORKING GARDENER, who understands the common routine of a Flower and Kitchen Garden, where there is but little glass; an Assistant is given. Wages 16s. per week and a cottage.—Apply J. L. GOWER, Esq., Westwood, Colchester, Essex.

WANTED, AS PROPAGATOR, a respectable single man, well qualified in Hard and Soft-wooded plants. None need apply unless well experienced.—Address J. GRAY, Nurseryman, West Derby, Liverpool.

## TO BAILIFFS.

WANTED, AS BAILIFF, in one of the Midland Counties, an active married Man, under 45 years of age, who thoroughly understands the Management of Stock, and has had experience in Draining, Surveying, setting out Farm Buildings, and can Manage the Sale of Timber on a gentleman's Estate. All applications must be accompanied by a statement as to the nature of the employment the parties have been last engaged in, the name of their employer, and the salary they require, House and Garden being found.—Apply, by letter only, 504, *Herald* Office, Birmingham.

WANTED, a steady, active Man as FARM BAILIFF, who thoroughly understands the management of Heavy Land, Sheep and Stock of all kinds, and who would, if required, be capable of taking the management of a Farm of 500 acres of Heavy Land.—Address, M. S., Post Office, Sudbury, Suffolk.

## MAN AND WIFE.

WANTED, on a Farm of about 70 acres in Surrey, a WORKING GARDENER to take the management of the above, with about 5 acres of Orchard and Garden Land. He must be thoroughly conversant with Stock and with the management of Fruit trees. No Glass houses; no Flower Garden. The wife must be a first-rate Dairywoman, and a good manager of Poultry. There are about 8 Cows. A very comfortable house.—Address, with full particulars and wages required, to B., 23, Old Jewry, E.C.

## WANT PLACES.—Letters to be Post Paid.

GARDENER (HEAD).—Age 43, married, no incumbrance; twelve years' character from his last employer, six years in his previous situation.—W. Y., *Gardeners' Chronicle* Office.

## TO NOBLEMEN OR GENTLEMEN.

GARDENER (HEAD).—Married; understands Forcing, Fruits, Vegetables, &c., Orchids, Ferns, Stove, Greenhouse, and all kinds of ornamental Plants, Kitchen and Flower Gardens. Seven years' recommendation from last employers.—ALPHA, care of Mr. Sage, The Earl Howe's, Gopsall Hall, Atherstone.

GARDENER (HEAD).—Married, middle-aged, no incumbrance; thoroughly understands his profession in all its branches. Wife can take Dairy and Poultry, and Bake, if required. Both can have 7 years' good character from their last place. More than 40 miles objected to.—A. P., Highgate Wood Cottage, Jackson's Lane, Highgate, N.

GARDENER (HEAD).—Middle-aged, married, two children; possesses first-rate abilities in every branch of Gardening, civil and obliging, a good workman, quick at Accounts, well understands the management of Hay and Grass Land. Good character.—D., Post Office, Whetstone, Middlesex.

GARDENER (HEAD).—ROBERT MILLER, aged 37, married (Scotchman), Gardener to F. Cooper, Esq., Tathwell Hall, Louth, Lincolnshire, well skilled in the profession, and will be most happy to treat with any nobleman or gentleman in want of an experienced and energetic Man. Satisfactory reasons given for leaving.—Direct as above.

GARDENER (HEAD).—Age 34, married, no incumbrance; perfectly understands his profession in all its branches. Seven years' good character from last employer.—J. G., Batchelor's Library, Dover, Kent.

GARDENER (HEAD).—Age 30, single; thoroughly understands the management of Pines, Vines, Peaches, the Forcing of Fruits, Flowers, Vegetables, &c.—C. C., 5, Streatham Hill, Brixton.

GARDENER (HEAD).—Age 30, married, without incumbrance; thoroughly understands his profession, Early and Late Forcing, Flower and Kitchen Gardens.—Can have a good character from the gentleman he has just left.—J. F., Mr. Knott's Green, Leyton, Essex.

GARDENER (HEAD).—WM. CUTBUSH, of Barnet Nurseries, Herts, can with confidence recommend a highly respectable Man, married, knowing him to be a thorough knowledge of his profession. His Wife would take charge of Laundry or Dairy if required.

GARDENER (HEAD).—Age 28, single; good experience in Grapes, Pines, Peaches, and Cucumbers, Stove and Greenhouse Plants, including Ferns, and Fruit and Flower Gardening. Good character.—H. B., Mr. Le Love's, Surbiton Hill, Kingston, Surrey.

WORKING GARDENER (HEAD).—Age 30, married; perfectly understands the Culture of Pines, Melons, Cucumbers, and Plants, Flower and Kitchen Gardens, and Pasture Land. Can be highly recommended.—A. B. C., Mr. Ashton, Seelsman, Uxbridge.

GARDENER.—Age 30, married; understands the Management of Greenhouse, Grapes, Cucumbers, Melons, Kitchen and Flower Gardens. Good character from present employer.—C. WRIGHT, B. H. Hunt, Esq., Lewes.

GARDENER.—Middle-aged, married, without incumbrance; understands Growing Pine, Grape, Stove and Greenhouse Plants, also Flower and Kitchen Garden. Has no objection to go to America. Good character of many years standing.—D. F., Mr. Veitch, Royal Exotic Nursery, Chelsea, London.

GARDENER.—Age 35, married, without incumbrance. Wife can take the Management of the Laundry or Dairy. A good reference as to character.—A. B., Mr. Rollisson's Nursery, Lower Tooting.

GARDENER.—Married, without incumbrance; understands Fruit, Flower, and Kitchen Gardens, Vineries, and Greenhouses. Good character and recommendation.—Mr. J. GREEN, The Gardens, Sir E. Antrobus, Bart., Cheam, Surrey.

GARDENER.—For many years has had the management of a first-class London Market Garden, where Grapes, and Peaches are grown in the best perfection; a good Plant Grower; well understands Ferns and Ornamental Plants, &c. Can produce first-rate testimonials.—M., 1 Durham Place, Seven Sisters Road, Holloway.

## TO NOBLEMEN AND GENTLEMEN

GARDENER.—Married; who for 17 years had the entire Management of the Gardens, Pinery, Vinery, Stove and Greenhouse Plants, Ferns, Orchids, at Sowber Hill, near Northallerton, the residence of the late John Hutton, Esq. Is leaving his present employment on account of the death of his master. A similar place would not be accepted.—H. N., Sowber Hill, Northallerton.

GARDENER or SUPERINTENDENT to a nobleman or gentleman, either in Great Britain or any part of the Globe.—Middle aged; practical Horticulturist and Nurseryman in all its branches. Liberal wages expected.—*Gardeners' Chronicle* Office.

GARDENER (UNDER or SINGLE-HANDED).—Age 25. Good references.—A. B., Young's Library, Westow Hill, Upper Norwood, S.

STEWARD AND GARDENER.—Age 40, married; nine years' General Manager to present employer. Has had the care of the Farm, Woods, Kitchen and Flower Gardens, Hothouses, &c., Saw mill Steam engine. Erection of Hothouses, Underdraining, taking the Rents, and Superintendence of Estate of 5000 acres.—A. B., Oxburgh, Stoke Ferry, Norfolk.

PROPAGATOR AND GENERAL PLANT GROWER.—A young Man, who thoroughly understands the Propagation of Hard and Soft-wooded Plants, and Plants in general.—E. C., Post Office, Stratford, Essex.

PROPAGATOR AND GROWER, OR FOREMAN, &c.—Well experienced in the trade.—T. G., Mr. Hardwick, Hothouse Builder, Effra Road, Brixton, London.

## LANDSCAPE GARDENING.

FOREMAN.—Skilled in Laying-out Cemeteries, Gardens from Plans, and Ornamental Planting.—Mr. Kay, East Acton, Middlesex.

MANAGER OF A NURSERY.—A young Man has had good practice in Geranium Growing, Propagating, and also in Managing. Good references can be given.—W. H. L., 4, Woodhome Cottages, Green Park, Tottenham, Middlesex, N.E.

FACTOR, OR AGENT AND BAILIFF.—A practical Man, having great experience in the Management of Land upon the most improved systems, Breeding and Rearing of Cattle, reclaiming Waste Lands, and managing of Woods, &c., has the highest testimonials for practical skill and integrity from noblemen and gentlemen in Great Britain and Ireland.—G. B. L., Messrs. Drummond & Sons, Bankers, Dawson Street, Dublin.

## TO CORN AND SEED MERCHANTS.

SALESMAN OR OTHERWISE.—Age 26; has been a London Seedsman's Warehouse, and for many years in the Corn Trade.—E. F., Post Office, Newbury, Berks.

## TO SEEDSMEN.

SHOPMAN.—A young Man, who has had long experience in a Scotch house, latterly as principal, can have Satisfactory references.—T. G. T., *Gardeners' Chronicle* Office.

CLERK.—Age 32; thoroughly understands Book-keeping, and the Nursery and Seed Trade in all its branches. Good references as to character, ability, &c., from first class houses.—S. W., 6, Union Road, Lavender Hill, Clapham, S.W.

KNOW THYSELF.—MARIE COUPELLE continues to give her graphic and interesting delineations of character, discoverable from an examination of the handwriting in an unique style of description peculiar to herself. All persons desirous of knowing themselves, or anxious to know what they are intended, must send a specimen of their writing, stating the sex and age, and enclosing 1 penny postage stamps, and a directed envelope, to Miss C., 24, Castle street, Oxford Street, London, and they will receive in a few days a minute detail of the talents, tastes, virtues, and failings of the writer, with many other things hitherto unexpected. All letters are considered strictly confidential.

# The Gardeners' Chronicle Newspaper.

NEW WORK ON THE DOG BY STONEHENGE.
On Friday next will be published, in square crown 8vo, with numerous Illustrations engraved on Wood,
THE DOG IN HEALTH AND DISEASE: Comprising the various modes of Breaking and using him for Hunting, Coursing, Shooting, &c.; and including the Points or Characteristics of Toy Dogs. By Stonehenge, Author of "The Greyhound," &c.
This work is entirely new. Its object is to place in clear and precise language the characteristics of every description of sporting or toy dog before the owner or intending owner, so as to enable him to select the animal which he may intend to amuse himself with, as well as to manage it in health and sickness to the best advantage. Various sporting writers of authority in their respective departments have treated of these subjects separately; but no single writer has hitherto combined the whole of them satisfactorily; and it is hoped that the present work will be acceptable to all who take an interest in breeding, breaking, or training any variety of the canine species.
London: Longman, Green, Longman, & Roberts.

Parts I. and II. now ready, to be completed in Eight Parts, price 2s. 6d. each, plain; 3s. 6d. each, coloured.

VI. THE ISLANDS OF THE PACIFIC.
VII. BERKSHIRE
VIII. INVASION OF ENGLAND.
John Murray, Albemarle Street.

## News of the Week.

A Treaty of Peace has been concluded between the Emperor of Austria and the Emperor of the French. This important event, which puts an end to the Italian war within three months of its commencement, was agreed upon on Monday at an interview which took place between the Emperors at Villafranca, at the express desire of the Emperor Napoleon. The Treaty provides for a Confederation of Italian States, under the honorary

presidency of the Pope. The EMPEROR OF AUSTRIA surrenders Lombardy as far as the Mincio to the EMPEROR NAPOLEON, and the EMPEROR NAPOLEON gives it to the KING OF SARDINIA. The territory east of the Mincio, including Mantua, Peschiera, Verona, Borgoforte, and Venice, remains an Austrian possession, and is to form an integral part of the Italian Confederation under the name of Venetia. The GRAND DUKES of TUSCANY and MODENA are to return to their respective states, and a general amnesty is to be granted to all persons compromised by the recent events. It is also understood that the two Emperors agreed to demand reforms at the hands of the POPE, and that the EMPEROR NAPOLEON neither demanded the cession of Savoy to France, nor asked for any addition whatever to his dominions. Accounts from Turin state that Count CAVOUR, the Sardinian Prime Minister, and his colleagues, have testified their dissatisfaction with the conditions of peace by tendering their resignations. The KING OF SARDINIA has accepted their resignations, and has charged Count ARESE to form a new Administration. The EMPEROR OF AUSTRIA left Verona on Thursday for Vienna, and the EMPEROR OF THE FRENCH was expected to leave Milan yesterday on his return to Paris.

In the House of Lords on Monday the Earl of RIPON made a further statement respecting the drill and instruction of volunteer rifle corps, and Lord BROUGHAM called attention to the subject of Coolie labour in the West Indies, which had been perverted, he said, into a renewal of the Slave Trade. On Tuesday, on the motion of Lord LYNDHURST, an address for the appointment of a Royal Commission to inquire into the mode of taking evidence in the Court of Chancery was agreed to. On Thursday, in answer to the Earl of CARNARVON, the Duke of NEWCASTLE said it was not the intention of the Government to recommend the renewal of the Hudson Bay Company's Charter which expired in May last, but it would be necessary to pass a Bill for the prevention of disputes between the whites and the Indians, and to lay down rules for the regulation of trade.

In the House of Commons on Friday the House went into Committee of supply on the Navy Estimates, when Lord CLARENCE PAGET made a statement of our naval force, and votes were taken for 10,000 additional seamen and marines. In the course of his statement Lord C. PAGET announced that there are at present 106 ships in commission, besides a force of gunboats constituting our first line of defence. The second line consists of 9 block ships manned by the coast-guard, 3400 first-rate seamen on the coast-guard station, and 6000 coast volunteers sufficient to man 12 line-of-battle ships, independently of marines. There are also 10 ships of the line ready for commission, and 10 more in course of construction, and there will be a grand total of 50 ships of the line afloat by the close of the present financial year, independently of the block-ships, 37 frigates, and 140 sloops, corvettes, and other vessels of that class. On Monday the Lords' amendments to the Red Sea and Indian Telegraph Company Bill were agreed to after a division on a motion for adjournment, which was negatived by 177 to 130. On Tuesday the adjourned debate on the second reading of the Roman Catholic Relief Act Amendment Bill was resumed by Mr. NEWDEGATE, who moved as an amendment that the Bill be read a second time that day three months. After a long discussion Colonel DICKSON moved the adjournment of the debate. On a division the motion was negatived by 210 to 142. Lord PALMERSTON then suggested that the debate should be adjourned to Tuesday next, which was agreed to. On Wednesday, on the motion for the second reading of Sir J. TRELAWNY'S Church Rates Abolition Bill, Mr. DU CANE moved that the Bill be read a second time that day six months. The Bill was supported by Lord PALMERSTON, Lord J. RUSSELL, and Sir G. LEWIS, and the second reading was carried on a division by 263 to 193. On Thursday the House went into committee on the remaining Navy Estimates and made some progress with the Army Estimates. The Middlesex Assistant Judge Bill passed through committee after two divisions, in which the clauses were carried by large majorities.

## Home News.

THE COURT.—The Queen and Prince Consort, accompanied by the Prince of Wales, Prince Arthur, Princess Alice, and Princess Helena, left town on Friday for the season. The Royal party arrived at the Pavilion at Aldershott on Friday afternoon at 7 o'clock. In the evening her Majesty gave a dinner party to General Knollys and the colonels in command of regiments. On Saturday morning the Queen drove out, accompanied by Prince Arthur, Princess Alice, and Princess Helena, and went round a part of the camp. Her Majesty inspected the wards of the hospital in the south camp, the regimental schools, and the racquet court. The Prince Consort and the Prince of Wales rode out on horseback. In the afternoon her Majesty, accompanied by the Prince Consort, the Prince of Wales, and Princess Alice, reviewed the troops in camp. In the evening her Majesty had a dinner party. On Sunday morning the Queen, Prince Consort, and the Royal family attended Divine service in the South Camp church; the Rev. J. E. Sabin, senior chaplain, preached the sermon. In the afternoon the Queen, Prince Consort, and Royal family visited the new camp at Woolmer Common. In the evening her Majesty had a dinner party. On Monday morning at half-past 9 the Queen reviewed the cavalry division. In the afternoon her Majesty, the Prince Consort, and the Royal family left the Pavilion for Osborne, travelling to Gosport by a special train from the Farnborough station of the South-Western Railway. On Tuesday the Queen and Royal family walked and drove in the neighbourhood of Osborne. On Wednesday afternoon the Queen and Prince Consort, accompanied by the Prince of Wales, Princess Alice, Princess Helena, and Princess Louisa, embarked in the Fairy, and went up the Southampton River. The Prince Consort and the Prince of Wales landed at the Royal Military Hospital at Netley, and inspected the progress of the works. On Thursday the Prince of Wales left Osborne for London.

THE PRINCE OF WALES arrived at Buckingham Palace on Thursday evening from Osborne, and left town yesterday morning for Edinburgh.

HIS HIGHNESS TOUSSOON PASHA, son of the Viceroy of Egypt, accompanied by his suite, arrived in London on Saturday night.

COURT MOURNING.—An order from the Lord Chamberlain's office was issued on Tuesday, for the Court to go into mourning for the late King of Sweden and Norway for three weeks, commencing on Thursday the 14th inst.

KNIGHTHOOD.—The Queen has directed letters patent to be passed under the Great Seal, granting the dignity of a Knight of the United Kingdom unto William Byam, Esq., President of the Council of Antigua; and William Snagg, Esq., Chief Justice of Antigua and Montserrat. Her Majesty has also conferred the honour of Knighthood upon Richard Bolton McCausland, Esq., Recorder of Singapore.

THE CABINET.—A Cabinet Council was held on Saturday at the official residence of the First Lord of the Treasury in Downing Street. Another Council was held on Monday, and another on Thursday.

PARLIAMENTARY MOVEMENTS.—Mr. Milner Gibson was re-elected for Ashton-under-Lyne, and Mr. C. P. Villiers was re-elected for Wolverhampton on Saturday, without opposition.

VICTORIA CROSS.—The Queen has conferred the Victoria Cross on Mr. Thomas Henry Kavanagh, Assistant Commissioner in Oude, and on Mr. Ross Lewis Mangles, of the Bengal Civil Service, Assistant Magistrate at Patna, for their services as non-military volunteers during the rebellion in India.

THE NAVY.—An order in Council was issued on Friday granting a gratuity of one half the bounties offered to seamen entering the fleet by the Proclamation of the 30th April, to all seamen already in the fleets above 20 years of age who have five years to serve, or who having less than that period to serve, are ready to engage to serve for five years, if required, from the date of the present order.

## Foreign.

FRANCE.—An Imperial salute of 101 guns, fired from the Esplanade of the Invalides at 1 o'clock on Tuesday, announced to all Paris that a Treaty of Peace had resulted from an interview which took place between the two Emperors on Monday at Villafranca. The first intelligence of the event was received by the Empress in the form of a telegraphic despatch from the Emperor, announcing that peace had been concluded by the Emperor of Austria and himself. Count Walewski, the Minister for Foreign Affairs, is said to have been as much taken by surprise by the announcement as the diplomatic body, who regard it as an innovation which merits the reprobation of all professional diplomatists that so important a step should have been taken without the knowledge, much less the aid, of either minister or plenipotentiary. The *Moniteur* contains the following remarks on the subject of the armistice which has led to this result:—

"We are anxious to explain under what circumstances the suspension of hostilities agreed on by the Emperor of the French and the Emperor of Austria was concluded. The three great neutral Powers have exchanged communications with each other, with the purpose of uniting in an offer of their mediation between the belligerents. The first act of this mediation would have tended to procure the conclusion of an armistice; but, notwithstanding the facilities for correspondence by means of the telegraph, the communications that had to be established between the Cabinets to allow this result to be obtained for several days the actions of our fleet against Venice were about to another conflict between the two armies might at any moment have taken place. Under these circumstances the Emperor, ever faithful to the sentiments of moderation that have always directed his policy, besides, above everything, to prevent all useless bloodshed, not hesitate to ascertain, in a direct manner, the views of the Emperor Francis Joseph, in the belief that with his own, it was a sacred duty on the part of both to suspend immediately hostilities that might jeopardize their object by the fact of a mediation. The views Austria having manifested similar intentions, Commissioners were named on both sides, and met to draw up the the armistice; it was definitively concluded on the and its duration fixed for five weeks."

The *Moniteur* publishes a decree signed by the Emperor at his head-quarters at Cavriana, by which Niel is raised to the dignity of marshal of France. also publishes a second warning to the Univers account of the article of its political director, L. Veuillot, in the number of the 10th of July.

SPAIN.—The *Esperanza* of Madrid states that in the Calle de Atocha there resides an English lady on certain days has Protestant worship celebrated a certain degree of publicity, in her drawing-room minister of the Anglican Church," and it suggests it is perhaps that lady and her friends who inoculated the "Bibles and other pernicious publications which have lately appeared in profusion at Madrid. The *Esperanza* therefore calls the attention of the authorities to the proceedings of this lady. *Espana* reproduces the paragraph, and declares "the Government cannot see with indifference the attempt made to break religious unity in a Catholic country as Spain."

DENMARK.—The Danish Government in reply to a demand of the Society of Merchants states that if the contingent of Holstein be obliged to join the war, the Danish Government will nevertheless respect the neutrality of Denmark and Schleswig, in which resolution the Great Powers have already agreed. The Government, it adds, aims at obtaining from the Powers an additional sanction for an armed neutrality.

SWEDEN.—Letters from Stockholm announce the death of King Oscar on the 8th inst., in his 67th year after an illness of two years.

SWITZERLAND.—The Federal Council has ordered all troops called in on the outbreak of the war to be also ordered all the Austrian steamers, together with cannon and other arms taken from Austrian and Sardinian refugees during the war, to be given up.

FRANKFORT.—The *Prussian Gazette* of Wednesday says that the proposal made on the 4th inst. by the Prussian Federal Ambassador to the Federal Diet is under present circumstances, withdrawn by the Government, and that the necessary orders have already been despatched to Frankfort. Counter-orders have been sent to the Prussian troops, who were to have begun their movement towards the Rhine on Thursday. The *Prussian Gazette* of Monday published an article in which the earlier proposals of Prussia and the later proposal of Austria to the Federal Diet were put in comparison. The article says:—

"Austria intends, by her proposal, to request the Regent to accept the post of Commander-in-Chief of the Federal army. The possessor of the chief power in the state of Prussia can never be personally responsible to the Diet. It is easy to perceive how a member of the Federal Diet, who at the same time a belligerent Power, can make a proposal the acceptance of which would render dubious the Diet's action, and force Germany to commence a war, by which it would be ruined. The Federal Diet has to choose between the proposals of Prussia and Austria. It can accept the latter, or, by the acceptance of the latter, deprive Germany of power of action, even also of the power of entering negotiating for peace. It would also lower the military power of the German States to the organisation of the old and not the German empire. The German nation will not decide at this moment on which side lie the recognition and decision which is now above all things needed for the Fatherland."

PRUSSIA.—The *Prussian Gazette* of Wednesday says that in consequence of the completion of the preliminaries of peace, orders have been transmitted to the troops on the march to halt at the respective places where they may now happen to be. Prince Windischgratz went to Potsdam on Wednesday to take his leave, and left on Thursday with his suite on his return to Vienna. The Empress Dowager of Russia left Potsdam on Thursday for the baths at Ems.

HUNGARY.—Letters from Hungary state that the whole country is inundated with proclamations from Kossuth, in which he says that the expulsion of the House of Hapsburg is the mission of the Hungarian nation, that he shall be supported by a power which 10 years ago replaced the House of Hapsburg on the throne, and that that power is now engaged in preparing its arms against the Hapsburgs. He concludes by saying, "I swear to you, by the God of the Magyars, that I will enrich your soil for a thousand years in reconquering Hungarian liberty." General Klapka has also issued a proclamation to the Magyars, calling on them to take up their scythes as well as their muskets and assemble under his command to recover the old Hungarian liberty.

AUSTRIA.—The Emperor has ordered the immediate cessation of the recruiting of soldiers. There is every reason to believe that the whole governing system will be changed in Austria, and the report of important changes is rife at Vienna. A change of the whole Cabinet is talked of, including the removal of Count Grunne, who has for the last 10 years had so much influence in the affairs of Austria.

ITALY.—The Emperor on Sunday issued the following order of the day:—

"Valleggio, July 10.—Soldiers! An armistice has been concluded on the 8th inst. between the belligerent parties, to extend to the 15th of August next. This truce will permit you to rest after your glorious labours, and to recover, if necessary, new strength to continue the work which you have so gloriously inaugurated by your courage and your devotion. I am about to return to Paris, and shall leave the provisional command of my army to Marshal Vaillant; but as soon as the hour of combat will have struck you will see me again in your midst to partake of your dangers."

The *Austrian Correspondence* of Sunday contained the following:—

"According to official news from Verona, an interview between the Emperor Napoleon and the Emperor of Austria will, in consequence of a desire expressed by the Emperor Napoleon, take place at Villafranca at 9 A.M. to-morrow, the 11th inst."

In accordance with this intimation the two Emperors met on Monday morning, and the result of the interview was announced in the course of the day in the following despatch from the Emperor of the French:—

THE EMPEROR TO THE EMPRESS.—"Peace has been signed between the Emperor of Austria and myself. The bases of the peace are—An Italian Confederation, under the honorary presidentship of the Pope. The Emperor of Austria cedes his rights over Lombardy to the Emperor of the French, who hands them over to the King of Sardinia. The Emperor of Austria preserves Venetia, but it forms an integral part of the Italian Confederation. General amnesty."

The Vienna papers give the following as the preliminary conditions of the treaty of peace:—

"Austria and France will support the formation of an Italian Confederation, which Austria will join, but probably with Venetia alone. Lombardy, as far as the line of the Mincio, is to be given up by Austria; but Mantua, Peschiera, Borgoforte, and the whole of Venetia, are to remain Austrian possessions. The Grand Dukes of Tuscany and Modena are to return to their States; and all persons compromised during recent events are to receive full amnesty."

The *Moniteur* of Wednesday publishes the following proclamation, by which the Emperor Napoleon announces the conclusion of the treaty of peace to the French army:—

"Soldiers,—The bases of a peace have been agreed on with the Emperor of Austria; the principal object of the war is attained; Italy will for the first time become a nation. A Confederation of all the States of Italy under the honorary Presidence of the Pope will re-unite in one group the members of the same family. Venice, it is true, will remain under the sceptre of Austria, but it will be, nevertheless, an Italian province, forming part of the Confederation. The union of Lombardy to Piedmont creates for us on this side of the Alps a powerful ally, who will owe to us his independence. The Governments that have taken no part in this movement, or are recalled to their territories, will comprehend the necessity of salutary reforms. A general amnesty will remove all traces of civil discord. Italy, henceforth the mistress of her own destinies, can only blame herself if she does not progress in order and liberty. You will soon return to France; a grateful country will receive with joy the soldiers who have carried to so high a point the glory of our arms at Montebello, Palestro, Turbigo, Magenta, Marignana, and Solferino; who in two months have liberated Piedmont and Lombardy, and have only stopped because the conflict was assuming a magnitude no longer in proportion to the interests that France had in this formidable war. Be proud, then, of your success; proud of the results obtained; proud, above all, of being the beloved sons of France, which will always be a great nation as long as she has the heart to comprehend noble causes and men like you to defend them."

The following proclamation from the King of Sardinia was posted up at Milan on Wednesday evening:—

"THE KING TO THE PEOPLE OF LOMBARDY.

"Heaven has blessed our arms. With the powerful aid of our magnanimous and valiant ally the Emperor Napoleon we arrived in a few days, after victory upon victory, at the banks of the Mincio. To-day I come back among you to tell you the happy news that Heaven has granted your wishes. An armistice, followed by the preliminaries of peace, assures to the people of Lombardy their independence. According to your desire, so many times expressed, you will henceforth form, with our ancient States, one single and free family. I will take your destiny under my direction, and hope to find in you that concurrence which the chief of a State needs in order to create a new administration. I tell you, people of Lombardy, trust to your King. Established on solid and imperishable bases, he will procure happiness for the new countries which Heaven has intrusted to his government."

A despatch from Turin states that Count Cavour and his colleague, in consequence of the conditions of the peace, have thought it their duty to tender their resignations, which have been accepted by the King; and Count Arese has been charged to form a new Cabinet. There is good reason to believe that the Emperor of Austria peremptorily refused to consent to the assembling of a Congress. A despatch from the Emperor Napoleon announces that his Majesty is in perfect health, and was preparing to set out for Paris. The Emperor being on the banks of the Lago di Garda, several gun-boats were successfully launched. Advices from the Tyrol to the 6th inst. state that all the Austrian troops had left Windschau, and were then concentrated on the Stelvio Pass, where a conflict was expected on the next day. Letters from Ancona to the 30th ult. state that General Calbermatten had taken the command of the town, and declared a state of siege. A general disarming had been ordered. Advices from Naples to the 9th inst. state that some Swiss troops on the evening of the 7th inst. mutinied in the barracks and killed the colonel of the 4th Regiment and several officers. They afterwards repaired to the Royal palace, but a battalion of Chasseurs and a regiment of Hussars posted there forced them to fall back as far as the Champ de Mars, where they were surrounded. The General Commander-in-Chief of the Swiss called upon them to surrender, but they replied by a discharge of firearms, wounding the general and about 20 privates. General Nunziante then gave orders to fire on the mutineers with grape, by which 75 were killed and 233 wounded. The King is at present residing at Naples.

RUSSIA.—The Grand Duke Constantine, after having been fêted in a most magnificent style in Constantinople, has left that place for Nicolaief. It is reported that he goes overland to St. Petersburg, leaving his squadron in the Mediterranean, and will perhaps bring out a fresh one from the Baltic.

TURKEY AND THE PRINCIPALITIES.—The affair of Prince Couza is settled. He will receive investiture by the Porte, and will be confirmed in the double election. But this exception is not to govern the future.

INDIA.—The Government of India has arrived at a decision on the question of the European grievances. All men who wish to quit the service in the three Presidencies are to receive their discharge and a free passage to Great Britain. The order affects all the Presidencies, and enables 14,000 men to claim their discharge. The larger moiety will, it is expected, remain; but the departures, especially from the light cavalry, will be numerous.

UNITED STATES.—Accounts from Washington state that Mr. Dodge, ex-Minister to Spain, had reported that the purchase of Cuba under present circumstances is inauspicious, but he believed that the course commenced by the President will lead to the consummation of that object by negotiation. The Argo screw steamer, employed on the Galway line, has been totally wrecked off Newfoundland on her way from New York to Ireland. She was one of the eight large vessels lately purchased by Mr. Lever from the European and American Company. It is stated that her loss was a result of false information given by a fisherman. Her passengers were safely landed at St. John's, Newfoundland, but with serious loss of luggage. Monsieur Blondin has successfully accomplished the feat of walking across the Niagara river on a tight rope, in the presence of several thousand persons. He first crossed from the American side, stopping midway to refresh himself with water raised in a bottle with a rope from the deck of the steamer Maid of the Mist. The time occupied in the first crossing was 17¼ minutes. The return from the British to the American side was accomplished in 12 minutes. A frightful railway disaster has occurred to a train from Chicago, about 2 miles east of South Bend, Indiana. The train of six cars was totally demolished, and more than 70 passengers killed. Sixty dead bodies had been recovered at latest dates.

MEXICO.—The American Minister has sent a remonstrance to Miramon's Minister for Foreign Affairs in the name of President Buchanan, expressing his great indignation at the withdrawal of the exequaturs from the American Consuls, and the murder of peaceful American citizens by Miramon's soldiers at Tacubaya. The measure is characterised as a violation of national rights and treaty stipulations, and Miramon is warned that this will be remembered, and redress obtained, whatever may be the result of the remonstrance.

# Parliament.

## HOUSE OF LORDS.

MONDAY.—*Volunteer Rifle Corps.*—The Earl of RIPON, in reply to questions from Lords VIVIAN, CLANRICARDE, and MALMESBURY, said it was not the intention of her Majesty's Government to pay instructors for the volunteer rifle corps; it was simply intended to supply them with trained instructors, who would be paid and boarded by the rifle corps themselves. Neither was it designed to issue pay and uniforms to the corps of volunteer artillery, but only to supply them with guns, ammunition, and instruction. Her Majesty's Government had also made preparations for the instruction of 25 adjutants and 100 sergeants at the school of musketry at Hythe, who, when sufficiently trained, would be employed to instruct their comrades in the use of the Enfield rifle, which would then be issued to the embodied militia.—The Earl of MALMESBURY thought that artillery corps would be more attractive to volunteers if it were understood that they would not be employed out of their own counties.—The Earl of RIPON declined to enter into a discussion on so important a matter.—Lord BROUGHAM called attention to the subject of *Coolie Labour* in the West Indies, and entered into the operation of local acts and practices, which had been perverted until they amounted to something very like the renewal of the slave trade.—After some remarks by the Duke of NEWCASTLE and the Earl of AIRLIE, the subject dropped.—The Earl of CORK asked if it was the intention of the Government to introduce any Bill for the better management of *Endowed Schools in Ireland?*—After some observations from Lord BROUGHAM, Earl GRANVILLE stated that it was not the intention of Government to bring forward a Bill upon the subject during the present session. The *Sale of Gas Bill* was read a second time, and the *Sessional Decisions Bill* a third time.

TUESDAY.—*The Treaty of Peace.*—Lord WODEHOUSE communicated to the House a telegram, just received from the British Ambassador at Paris, stating that "Peace had been signed between the Emperor of Austria and the Emperor Napoleon, on the bases of an Italian Confederation under the honorary presidency of the Pope; the Emperor of Austria ceding his rights to Lombardy to the Emperor of the French, who transfers them to the King of Sardinia; the Emperor of Austria preserving Venetia, which is to be an integral part of the Italian Confederation."—The Duke of NEWCASTLE, in reply to Lord CARNARVON, said it was not the intention of her Majesty's Government to introduce a measure in this country for a partition of the debt of the colonies of *New South Wales and Queensland*, but to leave the matter to the decision of the colonies themselves.—Lord LYNDHURST moved an address for the appointment of a Royal Commission to inquire into the mode of taking evidence in the Courts of Chancery and its effects, and pointed out the different modes of procedure in the courts of common law and equity, complaining of the complicated method of taking evidence in the latter courts. He explained that evidence was taken by one set of persons and decided on by another, and that counsel had the means of tampering with evidence, or, as it was technically called, "cooking an affidavit." He insisted on the necessity of taking steps to remedy the defects of a system which he characterised as almost useless, very expensive, and very dilatory.—The LORD CHANCELLOR thinking that the present system was susceptible of great improvement, agreed to the motion.—Lord CRANWORTH thought the motion for a Commission most desirable, and hoped that it would mitigate some of the evils so justly complained of.—Lord CHELMSFORD thought things were not so bad as described by Lord Lyndhurst, and that it would be better to remedy the defects by introducing a Bill for that purpose than by appointing a Royal Commission.—Lord BROUGHAM advocated the appointment of a Commission, as it would collect information as a basis for the drawing up of an effective measure on the subject.—Lord WENSLEYDALE made a few remarks, after which the motion was agreed to.—Lord GRANVILLE, in answer to a question from Lord Airlie in regard to the report of the Commissioners of the *University (Scotland) Act*, said he could not give any definite reply, as the report was still under the consideration of Commissioners, and had not been yet communicated to her Majesty's Government.

THURSDAY.—The LORD CHANCELLOR, in moving the second reading of the *Attorneys' and Solicitors' Bill*, explained that the object of the measure was to abridge the terms of the articles by one year of those young men who had passed an examination to the satisfaction of the examiners.—After a few remarks from Lord BROUGHAM, the Bill was read a second time.—*Hudson's Bay Company.*—The Duke of NEWCASTLE, in answer to a question from Lord CARNARVON, said that it was not intended to renew the charter of the Hudson's Bay Company which had expired last May. It would, however, be necessary to pass a Bill to prevent disputes between the whites and the Indians, and also to regulate trade. He was not prepared to promote colonisation by assisting emigrants, though all facilities should be given to settlers. He approved of railway plans for that country, but could not recommend any proposal for subsidising them.—*Arming of Merchant Ships.*—The Earl of ALBEMARLE asked whether the Government had considered any arrangements with the owners of private steamers whereby such vessels could be made available for carrying heavy guns.—The DUKE of SOMERSET said that a committee of naval officers had examined into the subject in 1852, and reported that of 1200 private steamers not more than 12 could be made available for war purposes, and that only at a heavy cost. Certain vessels, as the steamtugs on the Mersey, might probably be made available, and the Government had ordered an inquiry on the subject.—After some observations from the Earl of HARDWICKE, the subject dropped.

FRIDAY.—*Italian Affairs.*—Earl GRANVILLE said that her Majesty's Government would not be in possession of any definite information with respect to the terms of the peace between France and Austria till the Emperor of France returns to Paris. He thought, therefore, that it would be more conducive to the public service if the motion of Lord Malmesbury, for certain diplomatic papers, were postponed for the present.—The Earl of MALMESBURY said he would readily postpone till a future day the motion he had on the paper. (Left sitting.)

## HOUSE OF COMMONS.

FRIDAY.—*Roman Catholic Oath.*—In answer to Mr. MAGUIRE the ATTORNEY-GENERAL for IRELAND said that early next session the Government would introduce a Bill for the modification of the oath taken by the Roman Catholic members of Parliament. In answer to Mr. BRADY, the learned gentleman said that the laws regulating the relations between *Landlords and Tenants in Ireland* will be taken into consideration by the Government during the recess, with a view to legislation next session.—In answer to Mr KINNAIRD, Sir G. LEWIS said that he hoped in the course of next session to propose a measure to place *Roman Catholic Charities* under the superintendence of the Charity Commissioners.—*Outrage in Mexico.*—Mr. SCHOLEFIELD called attention to the present state of Mexico, especially with reference to outrages committed upon British subjects, and asked what steps had been taken to obtain redress.—Lord J. RUSSELL admitted that great outrages had been perpetrated upon British subjects, but a squadron had been sent out by the late Government, and every effort would be made to give effect to the presence of the English flag. The House then went into committee of supply on the *Navy Estimates*, when Lord C. PAGET made a statement of the exact condition of our naval forces at the present time. The number of steam ships of the line in commission was, at home, 12; and in the Mediterranean, 14; total 26. The number of steam frigates was 16, 13 at home, and 3 in the Mediterranean. Including corvettes, sloops, and other vessels, there were 54 in commission, besides a force of gunboats. These vessels constituted our first line of defence. The second line consisted of 8 line ships, manned by Coast Guards, which might be made very valuable ships, and the Admiralty proposed to place three of them at three of our principal ports. There was a reserve available in a few days in the event of any emergency in 3440 first-rate seamen on shore, and attached to them a large body of coast volunteers, sufficient to man 12 line of battle ships. The construction of ships during this year had been, he said, marvellous in extent. There were 10 sail of the line ready for commission; there would be three more in the course of the autumn, and one was under repair, so that we had at this time a total of 40 steam ships of the line, and at the end of the financial year there would be 50 sail of the line afloat (independent of the block ships), 37 frigates, and 141 corvettes, sloops, and other vessels of that class. Even this did not represent the naval force of England. There were 281 merchant steam-vessels, which might be easily adapted to receive an armament, and there was yet another source from which our navy could be easily recruited—namely, our merchant yards, where a vast number of vessels might be rapidly built, at the rate of half a dozen corvettes per month, fast and above the supply from our dockyards. His lordship then proceeded through the different estimates, and concluded by moving the first vote for an additional number of men.—Sir J. PAKINGTON indicated the steps taken by the late Government to restore the prestige of the navy, and inquired in what respect they had failed to maintain the honour and dignity of the country.—Sir C. NAPIER congratulated Lord Clarence Paget on his clear and sailor like statement, and criticised the shortcomings of the late Boards of Admiralty.—Mr. LINDSAY expressed his opinion that two millions might be annually saved in the expenditure of the navy by a more prudent arrangement with reference to wages to artificers, materials, and stores, seamen and marines, and the retired list of officers. He considered that under a proper naval administration the expenditure ought not to exceed from 8,000,000*l.* to 9,000,000*l.* per annum.—After some further discussion, in which Mr CARDWELL, Sir J. ELPHINSTONE, Sir F. BARING, and Admiral WALCOTT took part, votes were taken for 10,000 men and boys, for 479,695*l.* for wages, and 247,250*l.* for the victualling department.—The CHAIRMAN then reported progress. The *Public Health Bill* and the *Clerk of the Council Bill* passed through committee. The *High Sheriff's Expenses Bill* was read a second time.—Mr. WHITESIDE obtained leave to bring in a Bill to facilitate the *Transfer of land in Ireland*.—Sir G. Lewis obtained leave to bring in a Bill for the better regulation of the *Corporation of the City of London*.

MONDAY.—*Red Sea Telegraph.*—On the motion for the consideration of the Lords amendments to this Bill, Sir J. GRAHAM moved as an amendment that the Bill be deferred for a fortnight. It involved a guarantee of 4 per cent on the capital expended for 50 years, a form of guarantee which the House had hitherto passed without sufficient investigation.—Sir S. NORTHCOTE and Mr. DISRAELI contended that the money was expended on the faith of the guarantee, that it is guarantee was granted by the Government of the country, and that the undertaking was entered into at a time when the rapid transmission of intelligence was of the highest importance during the Indian mutiny.—The CHANCELLOR of the EXCHEQUER was quite willing that time should be given for inquiry, though he did not see how the arrangement of the late Government could be upset.—Mr. DISRAELI said that the late Government had exhausted every research as to the mode of

obtaining the required object without the interference of a public company. He was quite willing to consent that inquiry should be entered into, upon the view taken by the Chancellor of the Exchequer.—Mr. BOUVERIE said that it was now too late to hesitate. However bad the bargain might have been, the Government had made the contract—the House had passed the Bill. The company had gone on expending money, and if it had not been for a mere technicality, the question would not have again come before the House.—Mr. WILSON confirmed the statement of Mr. Disraeli that the late Government had exhausted every means before entering into the contract. The amendment was then put and negatived by 177 to 130, and the Lords' amendments were agreed to.—In reply to Mr. BAINES, Sir G. C. LEWIS said that the right of *Printing the Scriptures and Prayer Book* was granted by royal prerogative. The subject was under consideration, but he thought there was no practical grievance and that no competition was likely to increase either the accuracy or the cheapness of the present circulation of the Bible or Prayer Book, both of which had reached their utmost point.—Sir STAFFORD NORTHCOTE asked whether the *Submarine Telegraph Company* have been permitted by Government to lay down any additional wires between England and France, without requiring a surrender or modification of the monopoly recently granted to that company by the French Government, giving them an exclusive right to lay down lines of telegraph between the two countries.—Mr. LAING said that the late Government had invited that of France to induce them to withdraw the monopoly which they had granted to the submarine telegraph. This the French Government refused to do. The present Government then decided on refusing permission to the company to lay its wires close to the shore. Against this the company pleaded its Act of Parliament, which exempted them from such interruption till July 1862. The question had been referred to the law officers of the Crown, who had decided in favour of the company.—In answer to Mr. BUTLER, the CHANCELLOR of the EXCHEQUER said that it was not the intention of her Majesty's Government to introduce any measure during the present session by which the mode of assessment and collection of the *Income-tax* by local unpaid commissioners will be altered. *The Armistice.*—Mr. DISRAELI asked whether the Government had received any further information on the subject of the armistice, and if they would state whether it was a mere military convention, or involved any prospect of negotiations for peace?—Lord J. RUSSELL said that nothing appeared on the face of the armistice to induce the belief that it applied merely to military purposes. The armistice was, however, for five weeks, and he trusted that during that interval the belligerent Powers would be ready to propose terms by which hostilities would be put an end to. He repeated, however, that there was nothing on the face of the armistice further than the suspension of hostilities.—In answer to a further question from Mr. DISRAELI, Lord J. RUSSELL replied that no further official information had been received beyond a telegram from our Ambassador at Paris. *St. James's Park.*—On the motion for going into committee of supply, Mr. KINNAIRD called attention to the propriety of securing a road for the passage of carriages and horses from Charing Cross through Spring Gardens into St. James's Park, and asked the Chief Commissioner of Works whether he intended to avail himself of the opportunity afforded by the pulling down of Berkeley House, and to take steps for effecting this great improvement.—Lord DUNCAN, followed by Lord J. MANNERS, reminded the House that the important question of cost and compensation should be taken into consideration.—After some remarks by Mr. TITE, Mr. FITZROY said that Mr. Kinnaird should have shown the great advantage of the proposed "improvement," and that it could be accomplished at a small cost. He was prepared to take issue with him upon both points. He believed the advantage would be small, and that the expense would be not less than 53,000*l.* *Seamen's Bounty.*—Sir J. PAKINGTON asked for further explanation of the announcement made by the Government of their intention to extend the bounty offered to seamen joining the fleet to seamen who had already joined. In no other instances had bounties been made retrospective, and the precedent would act as a serious check upon future bounties, and would be very costly in the present instance.—Lord C. PAGET hoped that the discussion of the subject would be postponed till the vote for the extension of the bounty was brought forward. *The Army.*—In reply to Colonel DICKSON, General PEEL stated that the entire military force now in the country, on the 1st of June last, was 109,600 men, including the embodied militia, but not the marines ashore, pensioners, and constabulary.—Mr. W. WILLIAMS made some warm strictures against the practice of *Flogging in the Navy* on the sentence of a single man. If done at all, it should be by sentence of court-martial.—Sir C. NAPIER defended the system of bounty, which ought to be of sufficient amount to induce able men to enter the service. With regard to flogging in the navy, he did not believe that it could be done away with, but it should be inflicted by court-martial, and not at the arbitrary will of the captain.—After some remarks from Mr. LINDSAY, the House went into committee of supply on the *Navy Estimates*, which occupied the House till 12 o'clock, when the Chairman was ordered to report progress.—Mr. C. GILPIN moved the second reading of the *Poor Law Boards (Payment of Debts) Bill.*—Mr. WALTER said that portions of this Bill were unobjectionable; but the second clause had a retrospective action, its object being to set aside a judgment of the Court of Exchequer Chamber, and compel ratepayers, who had been assessed prospectively, paid their contributions, and obtained receipts, by an *ex post facto* law, to pay them over again to cover deficiencies occasioned by the acts of swindlers. He moved to defer the second reading for three months.—Mr. S. ESTCOURT defended the Bill. He explained the circumstances which had given rise to it, and was of opinion that it was fair and just that Boards of Guardians elected by the ratepayers should be enabled to pay debts incurred under those circumstances by a retrospective rate.—Mr. HENLEY moved that the debate be adjourned, but, after a short discussion, the motion was negatived by 64 to 44. The House then divided upon the original motion, which was carried by 60 to 43; and the Bill was read a second time. The *Court of Probate, &c. (Acquisition of Site), Bill* and the *Clerk of the Council Bill* were read a third time and passed.

TUESDAY.—On the second reading of *Grieve's Disabilities Removal Bill*, the object of which was to enable Mr. Grieve, a clergyman of the Episcopal Church in Scotland, to take his *status* as a clergyman of the Church of England, Mr. STEUART moved as an amendment that it be read a second time that day three months, on the ground that as Mr. Grieve had fallen under the censure of the Bishop of Aberdeen, in connection with the case of Mr. Cheyne, he ought not to be allowed an opportunity of disseminating his heretical doctrines in this country.—Lord PALMERSTON opposed the Bill, considering it high time to stop private Bills the object of which was to make exceptions to the standing law of the land. On a division the Bill was thrown out by 232 to 84. *The Peace.*—In reply to Mr. DISRAELI, Lord J. RUSSELL said he had been informed by the French Ambassador that peace between the two Emperors had been signed on Monday, and since then he had received a telegram from Lord Cowley, stating the terms of the peace, which he read. He added, with reference to a rumour that the Emperor of the French would require that Savoy should be ceded to him, that the Emperor had made no such demand, and did not ask any addition whatever to his dominions.—In reply to Colonel SYKES, Lord J. RUSSELL said the sovereignty of the *Fejee Islands* had been very much pressed upon her Majesty's Government; that the matter was under consideration, and no final decision had been come to.—At the instance of Mr. S. HERBERT, who made a brief explanatory statement, Sir A. AGNEW postponed his motion on the subject of *Salutes to Religious Processions*.—Mr. E. JAMES moved for a series of papers relating to the differences between *Mr. Chisholm Anstey* and the authorities at Hong Kong.—Mr. C. FORTESCUE stated that the Secretary of State for the Colonies, having only just entered upon his office, had found it impossible to make himself master of the correspondence upon this subject, but was ready to give all the papers which his public duty would allow, and he requested Mr. James to withdraw his motion for the present.—Mr. JAMES assented, and the motion was withdrawn.—Mr. HADFIELD obtained leave to bring in a Bill to amend the law for the regulation of *Municipal Corporations* in England and Wales.—Sir W. SOMERVILLE obtained leave to introduce a Bill to extend the act to facilitate the improvement of *Landed Property in Ireland*, and the acts amending the same, to the erection of dwellings for the labouring classes in Ireland.—Mr. COCHRANE moved an address to her Majesty to instruct the *Civil Service Examiners* that all persons who entered any service or profession prior to the 21st May, 1855, to which service or profession the present system of examination is applicable, shall be considered eligible for promotion without being subjected to any examination. He mentioned cases in which the existing rules operated harshly, and, in criticising the system of examination, the stringency of which he condemned, he adduced some rather ludicrous examples of the questions put to candidates.—The CHANCELLOR of the EXCHEQUER, after a general defence of the system, said that even if the House ought to interfere, it should not do so in the manner proposed in the motion. Objecting to the motion on its merits as well as its form he hoped it would not be pressed.—After some remarks by Mr. W. WILLIAMS, Mr. MONSELL, Mr. C. C. CLIFFORD, and Captain JERVIS, Lord PALMERSTON said, that although, like all other arrangements, this system was liable to some imperfections, he believed that, on the whole, it had tended very much to the advantage of the public service, while it had given a stimulus to education all over the country. He had represented to the Civil Service Commissioners that some of the questions were open to objection; and the answer was that they were supernumerary questions, added to the elementary questions, in order to test the general efficiency and comparative intelligence of the young men. The motion was withdrawn.—On the nomination of the Select Committee on the *Endowed Schools Bill*, the names being proposed by Mr. DILLWYN, Colonel DUNNE moved to substitute certain Irish members for certain English members; but after some discussion he withdrew the motion on an understanding that three Irish members should be added to the committee.—The CHANCELLOR of the EXCHEQUER moved the nomination of the Select Committee on *Packet and Telegraphic Contracts*.—Mr. ROEBUCK asked whether, in appointing this committee, it was intended to call in question the acts of past Governments, or only to bring upon the late Administration a responsibility for their conduct?—The CHANCELLOR of the EXCHEQUER repeated what he had stated when he moved for the committee—that he did not intend to place any limitation upon the functions of the committee.—Mr. MAGUIRE objected to the name of Mr. Baxter, and moved that it be omitted. On a division the name was retained by 135 to 34, and the other names were agreed to.—Mr. CARDWELL obtained leave to bring in a Bill to amend the Act relating to the *Survey of Boundaries in Ireland*. The *Admiralty Court Bill* passed through committee. The adjourned debate upon the second reading of the *Roman Catholic Relief Act Amendment Bill* was resumed by Mr. NEWDEGATE, who moved to defer the second reading for three months. He denied that the disqualification which this Bill was intended to remove was the result of a mistake of Sir R. Peel, of whose speeches he read extracts, observing that the Lord Chancellor of Ireland was the constitutional adviser of the sovereign, and of the Lord-Lieutenant of Ireland in the absence of the Sovereign, with respect to all matters touching ecclesiastical preferment. He entreated the Government not to suffer an independent member to tamper with the principles of a great settlement.—Sir B. BRIDGES seconded the amendment.—Mr. CARDWELL supported the Bill, he said, upon the principles announced by the author of the Roman Catholic Relief Act—namely, equal civil and religious privileges, and that the exceptions should be those only which were justified by special and peculiar circumstances.—Mr. WHITESIDE said that if the exception in the Act of Emancipation was owing to an inadvertence of Sir R. PEEL, all the advocates of emancipation were equally mistaken, for this very exception was found in all the Bills, of 1813, 1821, and 1825. The principle kept in view by Sir R. Peel, as shown in his published posthumous papers, was not limited to the exercise of ecclesiastical patronage by the Irish Lord Chancellor, but had regard to the security of the Protestant constitution and the Act of Settlement, since the Lord Chancellor of Ireland, as Lord Justice, might (as the present Lord Chancellor actually did) exercise delegated regal power in Ireland. He urged various objections to the Bill, which he denounced in strong terms as an insidious as well as impolitic measure, insisting that, whether the nature of the office was regarded or the duties performed by the Irish Lord Chancellor, his exception in the Act of 1829 was justifiable, and should not be repealed.—The CHANCELLOR of the EXCHEQUER said that Mr. Whiteside was mistaken in supposing that a Roman Catholic might fill the office of Lord Justice; this was expressly forbidden by statute, and it was not proposed to repeal that prohibition. The House would act in the spirit of Sir R. Peel and of the Act of 1829 by assenting to the second reading, and dealing with small matters of detail in the committee.—Mr. WALPOLE said it was incumbent upon the supporters of the Bill to show the reason for the change; and the only reason they had given was that a barrister should not be excluded from the office of Lord Chancellor. He deprecated such disturbances of a settlement, since, instead of promoting peace and union, they threw down apples of discord upon the floor of the House.—Col. DICKSON moved the adjournment of the debate.—Lord PALMERSTON thought the Bill was in strict conformity with the spirit of the Act of 1829, which was that Roman Catholics should be admitted to every civil and religious privilege not connected with the exercise of ecclesiastical authority, and the office of Lord Chancellor of Ireland was simply a political and judicial office. None of our institutions were in the slightest peril from the Bill, and he trusted that the House would read it a second time.—Mr. DISRAELI observed that he was surprised at the tone taken by Lord Palmerston. He did not think the question quite so clear as Lord Palmerston supposed; on the contrary, it was one of very considerable difficulty as to the functions exercised by the Lord Chancellor of Ireland. He did not say that a great settlement should not be disturbed, if the change were justly required; but this ought to be shown. He should like the question to be referred to a select committee, and if this was agreed to he should support the second reading.—Sir G. LEWIS was prepared to agree to this proposition, and recommended Sir W. Somerville to accede to it.—Sir W. SOMERVILLE accepted the proposal.—Sir W. MILES pressed the adjournment of the debate.—Colonel DICKSON, however, wished to withdraw his motion, but a division was called for, when the motion was negatived by 210 to 142, and, after some further discussion, the debate, at the suggestion of Lord PALMERSTON, was adjourned to Tuesday next.

WEDNESDAY.—*Church Rates.*—Mr. DILLWYN, in the absence of Sir John Trelawny from illness, moved the second reading of the Church Rate Abolition Bill.—Mr. DU CANE moved, as an amendment, that the Bill be read a second time that day six months. He contended that the Bill was neither more nor less than a measure of spoliation, and the first step to the destruction of the Established Church.—Lord R. MONTAGU seconded the amendment, believing the object of the measure was to sever the connection between Church and State.—Mr. BAINES, as a Dissenter, repudiated any desire to spoliate the Established Church, but simply wished that the Church should keep its hands off the non-conforming body, leaving each religious denomination to support its own place of worship.—Mr. ADDERLEY supported the amendment, and complained of the injustice of dictating to the people whether or not they were to tax themselves for the maintenance of the Establishment Church. In every place where the majority were indisposed to church-rates they could refuse to levy them. The grievance of the non-conforming body was therefore infinitesimal, and did not justify them in seeking to cripple the Established Church by robbing it of its ancient rights and privileges.—Mr. MELLOR supported the Bill.—Mr. PACKE supported the amendment.—Mr. HENNESSEY thought this was an assault on the Church of England by the Protestant Dissenters. As a Roman Catholic, he had long been of opinion that this action of the Protestant Dissenters against the Church of England on this question should not be promoted by Catholic members of this House. He should, therefore, cordially vote against the second reading of the Bill.—Mr. STANILAND supported the second reading.—Sir G. LEWIS entered into a variety of statistics to show that voluntary contributions for the maintenance of the fabric of the Church exceeded the sums levied in the shape of church-rates, and that the objection to the impost was to be attributed rather to conscientious scruples than to the severity of the burden.—Lord J. MANNERS regretted that the Bill submitted to the late Parliament by Mr. Walpole had not received the sanction of the House, as he believed it would have effected a satisfactory compromise of the question. The Bill now before the House had not for its object the relief of conscientious Dissenters, but the subversion of one of the principles of the British constitution.—Lord FERMOY supported the second reading, not from any desire to destroy the Church of England, but because he believed that the enforcement of church-rates weakened instead of strengthened her interests.—Mr. DRUMMOND deprecated any measure which would have the effect of subverting that which he considered to be necessary in every country—a national church.—Mr. MAGUIRE supported the Bill, and characterised the Established Church in Ireland as a monument of oppression and disgrace.—Lord PALMERSTON said he was prepared to vote for the first time in favour of the Bill. He considered it was essential to the interests and honour of the country, and for the cause of religion, that the fabric of the Church should be maintained, and, if it were possible to continue the rating system, he should have preferred it, but when he found that Parliament had repeatedly declared in favour of a change in the system he could no longer set up his individual opinion against the declared wish of the public. Under these circumstances he would vote for the second reading, in the hope that, in committee, some arrangement might be devised to exonerate Dissenters from the payment of what they considered an unjust burden, and at the same time maintain the fabric of the Church.—Mr. DISRAELI insisted that no measure for the abolition of church-rates ought to receive the sanction of Parliament which did not provide a substitute. At the same time he was bound to admit that the present state of things was so unsatisfactory that it called for legislation.—Lord JOHN RUSSELL admitted he had defended church-rates in former years, but said that the strong and general change in public opinion of late inclined him to believe that the time had at length arrived for their abrogation. The House divided, when the second reading was carried by 263 to 193.—The *Salmon Fishery Bill*, the *Tramways (Ireland) Bill*, and the *Railway Arbitration Bill* were read a second time.—Mr. WHITESIDE obtained leave to bring in a Bill to amend the *Settled Estates Act* (1856).

THURSDAY.—*City of London Reform.*—Sir G. LEWIS, in reply to Sir J. SHELLEY, said that he intended to proceed with the London Corporation Bill during the present session. He had hoped to have passed the Bill without opposition, and was sorry to find that he was mistaken in this expectation. He was, therefore, anxious to fix the earliest possible day for the second reading. *The Budget.*—In reply to Mr. HORSFALL, the CHANCELLOR of the EXCHEQUER said that if the House passed the Army and Navy Estimates during the present week, he should make his financial statement on Monday.—On the motion that the House go into Committee of Supply, Mr. H. BAILLIE called attention to the report of the commissioners appointed to inquire into the organisation of the *Indian Army*.—Mr. VANSITTART entered into details on the subject, contending that the forces in India ought to consist partly of Royal troops and partly of troops raised for that express service.—Sir C. WOOD admitted the importance of the subject, and said that the attention of the Government was directed to it.—After some remarks from General PEEL and other members, Lord STANLEY said that a large portion of the Indian army must at all times consist of local troops, if only to save the expense of transport.—Colonel SYKES said that the Indian finances could not support the expenditure of the European force now in India, which reached 80,000. The country could not afford more than 50,000.—Mr. GRIFFITH called attention to the recent case of "Santos *v.* Illidge," and asked whether the clauses in the Act 6 and 7 Victoria, cap. 98, authorising the *Sale of Slave British Joint-Stock Companies*, should not be repealed.—Lord J. RUSSELL said there was no intention on the part of the Government to introduce a Bill to repeal the clauses in question.—Mr. RICH called attention to the vote in the Navy Estimates for the *Dover Packet Contract*, and expressed his opinion that it should be postponed till the Committee on Postal Contracts have made their report. After some discussion it was agreed to omit the vote. The House then went into committee of supply on the *Navy Estimates*.—On the vote for the reserved half pay of seamen and marines, considerable discussion took place on the subject of promotion in the navy, in which Sir J. PAKINGTON gave the sketch of a plan he had matured when in office for the compulsory retirement of naval officers of a certain age, with proper compensation. Some such plan, he contended, was absolutely necessary to prevent stagnation in the navy, and to give a fair chance to officers below them.—Sir C. NAPIER declared his satisfaction that the right hon. gentleman had left office before he brought forward any such plan.—On the vote for the gratuities and bounty to seamen, Mr. LINDSAY, Sir J. GRAHAM, and other members strongly objected to the system as practised by the late Government.—The measure was defended by Sir J. PAKINGTON, who at the same time strongly objected to the extension of the bounty to seamen who had previously joined.—Lord C. PAGET contended that the extension of the bounty was a necessary consequence of the measure of the late Government.—Sir JAMES GRAHAM agreed in this opinion, and referred to the efforts of Sir Maurice Berkeley to man the Baltic fleet, and to the efficiency of that squadron, as a proof that bounty was necessary.—Sir C. NAPIER denied the accuracy of this representation, and said that the fleet sent out under his command was manned with tailors and tinkers, and was a disgrace to the country. This he could prove if Sir J. Graham would allow him to produce the private letters he had received from the right hon. baronet when First Lord of the Admiralty. The vote was then agreed to.—Mr. S. HERBERT, in moving the remaining *Army Estimates*, explained the steps which it was proposed to take with reference to the defences of Portsmouth, Milford Haven, Portsmouth, Spithead (opposite St. Helen's) and other places; and stated that the total number of men at present available was 110,000, of whom 29,000 belonged to the embodied militia.—Colonel PERCY HERBERT reviewed the condition of our effective force, and pointed out the deductions which must be made from the aggregate of 110,000 men before such an army could take the field.—Sir M. PETO described the admirable organisation of the French army as it had come under his notice [illegible]

...sations, and suggested whether, instead of burning [illegible] ...quality of the Elements of the French, we might not in any [illegible] ...ances our military position.—A motion for an address for the employed within and a few others was ultimately agreed to, and the Chairman reported progress. The House went into committee on the Abolition of [illegible] ...going local offices in addition to sanction, or for [illegible] ...ging in private practice. Considerable opposition was given to the proposition, and the committee divided on the first clause, which was carried by 167 to 88. The other clauses were passed through committee. A long discussion arose on an additional clause moved by Mr. Bernard, that the payment should be made out of the county rates. After a division on the question that the Chairman leave the chair, the clause was agreed to. On the order for going into committee upon the *Four Per Cents (Payment of Debts) Bill*, Mr. Williams proposed to refer the Bill to a select committee.—Mr. Walpole, considering the lateness of the hour, moved the adjournment of the debate, which was ultimately agreed to.

Friday.—*Withdrawal of Election Petitions.*—The Speaker informed the House that he had received letters from the petitioners intimating that it was not their intention to proceed with the petitions complaining of the undue election and return for Sandwich and Berwick-on-Tweed.—Mr. Hutchins and Lord C. Paget complained of this course, and said that they should be glad to compel the petitioner to proceed with the Sandwich petition.—After some remarks from several members on the subject of Italy, which resulted in no direct resolution, the House went into Committee of Supply.

(Until midnight.)

## City Intelligence.

Bank Rate of Discount.—The Bank of England on Thursday reduced their rate of discount from 3 per cent., at which it was fixed on the 10th ult., to 2½ per cent.

Money Market, Friday.—British Funds: Consols closed at 95½ to ⅝, both for Money and Account; Bank Stock, 221½ to 223; Three per Cents. Reduced, 95⅝ to ½; New Three per Cents., 95⅝ to 96; India Stock, 218½ to 221; Indian Four per Cent. Debentures of last year, 95½ to ½; Scrip of New Indian Loan, 95¼ to ½; India Bonds, 2s. dis.; Exchequer Bills, 27s. to 29s. prem.—Foreign: Brazilian Four and a Half per Cents., 1858, 94½; Dutch Four per Cent. Certificates, 101; Mexican Three per Cents., 19 to 19½; Ditto for Account, 19⅜; New Granada Deferred Bonds, 5¼; Peruvian Four and a Half per Cents., for Acct., 92; Ditto Uribarren Four and a Half per Cents., 81; Ditto Three per Cents., 71; Portuguese Three per Cents., 1853, for Acct., 44¼ to 44⅜; Russian Four and a Half per Cents., 99; Sardinian Five per Cents., for Acct., 86 to 87; Spanish Three per Cents., for Acct., 44; Ditto New Deferred Three per Cents., 32¼ to 32; Turkish Six per Cents., 1854, 84½ to 84; Ditto for Acct., 84¼ to 83½; Ditto for 1858, 72½ to 72; Ditto for Acct., 72½ to 71½; Ditto Guaranteed Four per Cents., 104¼ to 103½; Venezuela New Two and a Half per Cents., 29; Ditto New One per Cents., 15⅞.

## Metropolis and its Vicinity.

The City Reform Bill.—The Government Bill for the "better regulation" of the Corporation of the City of London was printed on Tuesday, prior to its second reading in the House of Commons. The city is to be divided into 20 wards; nine of the old wards will remain unaltered; these are Aldgate, Aldersgate, Broad Street, Castle Baynard, Coleman Street, Cripplegate Without, Farringdon Within, Portsoken, and Tower. The other wards, to be formed by union and divisions of existing wards, will be named Billingsgate, Bishopsgate Without, Bishopsgate Within, Bread Street, Candlewick, Cheap, Cornhill, Cripplegate Within, North Farringdon Without, South Farringdon Without, and Queenhithe. The last ward (by way of example) will include the old wards of Queenhithe and Vintry. The right of voting for aldermen and common councilmen is conferred on males of full age occupying, solely or jointly, any house, shop, office, wharf, or other tenement, and rated in respect of such holding on a net annual value of 10*l*. The list of electors will of course be revised periodically. On St. Thomas's Day the common councilmen will be elected by the 20 wards of the city, as now, for one year. The total number of common councilmen will be 130. On the 21st of December next each ward will also elect an alderman, who will hold his office during good behaviour, or until he die or resign. The duties and powers of the new aldermen and common councilmen will commence on New Year's Day, 1860, on which day all the existing aldermen and common councilmen, unless previously re-elected on Thomas's Day next, will have to vacate their offices. The Lord Mayor, however, as king of the city, will remain on his throne until the usual period (9th November). Next year his lordship will be elected by the persons whose names appear in the ward lists in force *pro tem.* under the Act. Three auditors will be annually chosen on the 15th March by the ward electors. The Lord Mayor and aldermen will be justices, as now. No clerk in holy orders or minister of a dissenting chapel may be elected as alderman, common-councilman, or auditor of the city. The qualification is to be the possession of an estate of 1000*l*., real or personal, or a rating on an annual value of 300*l*. Immediately will, *upon finis*, disqualify Lord Mayor, aldermen, and councilmen, and oblige them at once to resign their gowns. The Common Hall elections are to be transferred to the Court of Common Council. The exclusive rights of trading in the city are to be summarily swept away, and street tolls are to be abolished. The office of high bailiff of Southwark is also to be abolished. Salaried magistrates may be appointed by the Queen at the request of the Corporation. Freemen of the city may take apprentices for a term of three instead of seven years. The Court of Common Council on Thursday resolved to offer no opposition to the second reading of the Bill; but to present a petition against those clauses which, in the opinion of the Court, required to be amended or altered.

The Slave Trade.—On Wednesday evening a crowded meeting was held at the London Tavern, for the purpose of enquiring into the present state of the slave trade. Lord Brougham took the chair, and said that in consequence of the existing sugar laws, and the great demand for labour in our West Indian plantations, the planters were obliged to procure negro labourers in any manner they could. The consequence was that the coolies were obtained by fraud and carried off from their homes by force to slavery in the plantations, and the horrors of the old slave trade were revived. Mr. C. Buxton, M.P., Mr. Chisholm Anstey, Mr. G. Thompson, and other gentlemen addressed the meeting, and a memorial to the Duke of Newcastle as Colonial Secretary was adopted, praying him to promote the appointment of a committee of the House of Lords to inquire into the whole subject.

The Great Eastern.—The progress which, during the last four weeks, has been made in fitting and equipping the Great Eastern for sea has been so rapid, that within a month it is expected her steam will be up and she will be on her way across the Atlantic. Her three iron masts, which have been constructed by Messrs. Finch & Heath, of Chepstow, rise 122 feet above the upper deck, and have a diameter of 3 feet 6 inches for a height of 70 feet, when they decrease gradually to 2 feet 6 inches at the cap. The three wooden masts, which are in their places, were supplied by Messrs Ferguson, and are magnificent spars. They are not built masts, but are single "sticks," as they are called. The fore and mizen masts are 140 feet in height, and 34 inches in diameter at the deck; the jigger-mast is 122 feet in height, and of the same diameter. The trees which form these masts have been brought more than 13,000 miles to occupy their present position, being New Zealand pines. The topmasts are 76 feet in height, and are 22 inches in diameter, or nearly 6 feet in circumference at their base. The main yard is 120 feet long, and at its centre it is a yard in diameter, thick and strong as the masts themselves at the deck. The ship is built in water-tight compartments; and so completely water-tight are they, that a few days since the foremost one was filled with 6000 tons of water pumped into it from the river, and not a drop escaped into any adjoining portion. The object in pumping this mass of water into the fore part of the ship was to bring her down at the bows, and raise the stern while they fixed the screw. This weight brought her down till as the sailors said "her nose touched the water." She went down 11 feet forward, and was raised 7 feet aft; a portion of her keel was, in fact, raised out of the water; and yet so strongly and rigidly is she built, that under this enormous strain the ship did not deflect an inch. The engines for working the paddles, it is said, may be completed in a week, cylinders, pistons, and governors being all in their places. The engine for working the screw is in the same state of forwardness, and last week steam was got up for the first time in the boilers of the screw engines. In a few days the whole of the machinery will be in a state to drive the ship through the water with 12,000 horse power. Down in the depths of the engine-room the engineer will receive all his orders from the captain by an electric telegraph. There will be accommodation provided in the first instance for 15 officers of all ranks, and for a crew of 350. The first class portion of the ship will be fitted up in the first grade with 800 beds and sofas. In the second grade there will be accommodation for 400, and in the third grade about the same number. This accommodation for about 2000 persons for the first voyage will leave untouched some acres of saloons and vacant space in other parts of the ship. The part usually devoted to steerage passengers in other vessels will not be required at present, and the passengers to be carried in the fore part will be all first class, but of different grades, each grade having its separate deck. The cabins are roomy and commodious, admirably ventilated, and the dining rooms are lofty. The first trip will be made to Portland, in the State of Maine, early next month. The sum which had been expended on the ship up to the time of her launch amounted to 640,000*l*. The whole expenditure up to the time of her going to sea will be 970,000*l*., and probably some incidental charges and contingencies will bring the whole up to the round sum of 1,000,000*l*.

State of the Thames.—At the meeting of the Commissioners of Sewers on Tuesday Dr. Letheby made the following report respecting the present state of the Thames:—

"The foul condition of the river continues to increase, and is exciting considerable [illegible] and concern. I have received a number of communications relating to the subject and to the measures which are thought necessary for abating the evil. Some of these are before you; but as I have no authority to [illegible] ...I would recommend that they be forwarded to the Metropolitan Board of Works. One of these communications is from M. Frankland, Professor of Geology at Paris. It was received [illegible] through the Lord Mayor. Another is from M. Goettmann of Strasburg; and there are several others which have been directed to my consideration. M. Frankland is of opinion that the whole of the present nuisance is due to the quality of the soil through which the river flows, and he recommends that the whole of the infected bed of the river should be covered with [illegible] lime and pebbles. He thinks that the efficacy of the remedy thus formed will depend not merely upon its producing a solid bottom for the flow of the river, but also on the continuity of the coat, which will destroy the putrid organisms; and therefore he suggests that the whole course of the river should be covered at one time. He is, he says, aware of the magnitude of the undertaking, and he leads to England wealth and English skill to accomplish it. The other communication is from [illegible] and was very proper to be of opinion that they ought to be forwarded to the Metropolitan Board, who are now enquiring into the subject. I wish, however, to make this remark—that the foul state of the river is fast becoming worse and worse. The organic impurities are increasing from day to day, and are now [illegible] ...about as they were on the 11th of June."

Advertising Columns.—At the meeting of the City Commissioners of Sewers on Tuesday Mr. Ross brought forward his motion for rescinding previous resolutions of the Court authorising the erection of two advertising pillars in the City of London—namely, one in Holborn and one in front of the Royal Exchange. A memorial was now presented from M. Pontean praying the Court not to rescind the resolutions. Mr. Peasonby, manager of the Illuminated Indicator, 11, Southampton Street, Strand, attended to support the prayer of the memorial. He said that the proprietors had received permission from several parishes to erect pillars, viz., four in St. George's, Hanover Square; four in Islington; three at Westminster, and others in different parishes; that the pillar at Hyde Park corner had cost 400 guineas to erect, and would cost 100*l*. a year to maintain. Mr. Ross's motion was seconded by Mr. Bone, but after some discussion, in which it was stated that the company are bound to remove the columns if found to be a nuisance, the motion was negatived by a considerable majority.

Pauper Lunatic Asylum for the City.—At a Court of Common Council on Tuesday, the Lord Mayor presiding, a long discussion took place upon a report from the Lunatic Asylum Committee relative to the erection of a pauper lunatic asylum for the city. Mr. Deputy Dakin, chairman of the committee, submitted a motion on the subject, which was agreed to in an amended form, the report itself being adopted, and referred back to the committee to co-operate with the Court of Aldermen in obtaining plans and estimates for the erection of a suitable asylum upon the site already selected by the justices, to be paid for out of the city's cash.

The Statue of the Greek Slave.—This well-known statue, by Hiram Power, which was exhibited in the Crystal Palace, Hyde Park, in 1851, was sold by auction on Thursday by Mr. Phillips, of New Bond Street, to the Duke of Cleveland for the sum of 1800 guineas.

Close of the Westminster Abbey Services.—The Sunday evening services at Westminster Abbey were brought to a close on Sunday last. During the year 1859 there have been 28 services, at which many of the home and colonial bishops, deans, archdeacons, and distinguished clergymen have preached.

The City Coal Dues.—On Friday a numerous deputation waited on the Home Secretary, Sir G. C. Lewis, on the subject of the dues on coal imported into the port of London. The deputation was introduced by the Hon. G. Byng, supported by a great number of the members for the metropolitan boroughs. Mr. Byng stated that the object of the deputation was to ascertain what course the Government would pursue in the event of the Board of Works making an application to them to have the 9*d*. per ton that would revert to the Corporation of London in 1862 transferred to them. Sir G. C. Lewis said the question divided itself into two objections: the first, that the radius of 20 miles was too large, and went beyond the metropolitan area; and the second was as to the 4*d*., which the city claimed as corporation property. He saw no practical result from this deputation, because the Board of Works made no application to him for the transfer of the 9*d*. duty; and if they did their appeal must be considered on its merits; and with regard to the 4*d*. duty, it was corporation property, upon which he would not express an opinion. In answer to a question from one of the de-

putation, he said the scheme of allowing a drawback to manufacturers was impracticable.

DESTRUCTION OF FLOUR MILLS BY FIRE.—On Wednesday afternoon a fire broke out in the Shad Thames Flour Mills, Bermondsey, occupied by Messrs. Perks, and continued burning with great fury until a late hour on Thursday night, by which time the whole of the extensive mills, containing many thousand quarters of grain, were destroyed. The fire is said to have commenced in the following manner:—A number of men were employed in the dressing-room, on the fourth floor, when a wire of a machine broke, and as it required to be instantly repaired, a man took a light into the place to put on another wire; but the moment he entered the room the husk from the wheat came in contact with the light, and it was with difficulty that any person could manage to reach the street in safety.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Return exhibits a rapid increase of mortality. In the week ending the 2d of July the deaths were 1024; last week they rose to 1226, and exceeded the average (corrected for increase of population) of the corresponding weeks in 10 previous years by 128. During the week the births of 833 boys and 785 girls, in all 1618 children, were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1433.

## Provincial.

ALDERSHOTT.—On Saturday afternoon the Queen reviewed the Aldershott Division. As this will probably be the last visit of her Majesty this summer, the review was on the most extensive scale of which the camp resources admitted, 17 regiments of infantry, with six of cavalry and 42 guns, being in the field to execute the manœuvres. In order however to spare the men the fatigue and distress which would have resulted from rapid evolutions under a broiling sun, the troops did not parade till 3 o'clock in the afternoon, the sham fight commencing at 4 and lasting till about 7 in the evening. The Queen was on horseback during the review riding a superb bay charger, and wearing a scarlet riding-jacket with a general's sash over the shoulder and a general's plume in her riding hat. On her right and left rode the Prince Consort and the Duke of Cambridge, both in full uniform. The Prince of Wales, also in full uniform, rode with the Princess Alice. Prince Arthur and Princess Helena followed in an open carriage and four. On Sunday, after morning service in the South Camp Church, the Queen and Royal party visited the new camp at Woolmer, where three or four regiments with a small force of artillery, which left Aldershott on Saturday, was stationed under canvas, and conformed precisely to the same field regulations as if cantoned out in actual service against the enemy. On Monday morning at half-past 9 the Queen had a parade inspection and review of all the camp cavalry and horse artillery in the Long Valley. Her Majesty rode the same charger and wore the same half-military riding dress as on Saturday. The Prince Consort, the Prince of Wales, the Duke of Cambridge, and the Princess Alice accompanied her Majesty on horseback; and Prince Arthur and Princess Helena followed in an open carriage and four. The review lasted little more than an hour, for by that time the sun was at its fiercest, and the heat on the heath was unendurable. A little before 1 the Queen and Royal party returned to the Pavilion and partook of luncheon. Soon after 3 o'clock her Majesty and the whole of the Royal family left the camp in open pony carriages, and, escorted by a detachment of Light Dragoons, drove to the Farnborough station, and proceeded thence by a special train to Gosport on their way to Osborne.

CARISBROOKE.—A Roman villa of great interest has been discovered in the village of Carisbrooke, while laying the foundations of a stable in the grounds of the Rev. E. B. James, vicar of the parish. This discovery will add a fresh object of interest to those which the Isle of Wight previously possessed. Mr. James has liberally allowed his pleasure grounds to be cut up and excavated for the purpose of tracing the remains, and the result has brought to light a splendid tessellated pavement of rich pattern, almost as perfect as the day it was laid down; rooms whose walls are covered with plaster painted in panels, in the same style as those at Pompeii; a bath, with its hypocaust and flues still blackened with the soot of 17 centuries ago; with fragments of pottery and other household stuff enough to make the fortune of an incipient museum. It is believed that the vicar, though greatly to his inconvenience, will allow the remains to be preserved *in situ*.

CHATHAM.—After a search of about three weeks the police have succeeded in apprehending the sailor Burgess Masters, who in a fit of jealousy attempted to murder a private of the Royal Marines at a lodging-house in this town by cutting his throat, as reported in this Paper at the time. Although every effort had been made throughout the country to apprehend him, nothing was heard of him until last week, when he was captured at Sheerness. He was dressed in a man-of-war's suit of clothes, and was about to enter on board the Monarch, 84. He was immediately taken before the magistrates at Rochester, by whom he has been committed for trial. The marine Wilkins has so far recovered that he was able to attend and give evidence against the prisoner.

CHICHESTER.—In 1847 a large and substantial restoration of the cathedral was commenced by the Dean and Chapter, and has been carried on from time to time, as funds have been supplied by public beneficence, almost to the present year. The late Dean, Dr. Chandler, having bequeathed the sum of 2000*l.* to certain trustees, applicable, at their discretion, towards the work of restoration commenced by him, a committee has been formed, including several of the principal residents in the county, and the sanction of the present Dean and Chapter having been obtained, it is proposed to restore the choir to its original proportions, and, still retaining the distinctive cathedral arrangements, to remove the organ-screen, throw open the nave, and thus provide sittings for at least 700 persons as a fit memorial to the late dean. An appeal is about to be made to the diocese at large, and it is expected that the work of restoration will be commenced this autumn.

DONCASTER.—On Saturday morning a daring highway robbery, accompanied with violence, was perpetrated on the highway leading from this town to Pontefract. An Irish drover named Fitzpatrick had bought 14 head of cattle on Friday, intending to take them to the Doncaster cattle-market the following day. Early on Saturday morning he took them out to pasture by the road-side, and while watching them four men went up to him, and, while one of them unbuttoned his waistcoat, the rest of the party took from him 23*l.* 10*s.* which he had in his possession. After robbing him they brutally ill-treated him, and then threw him into a pond by the road-side. As soon as he recovered himself he proceeded to the police-station, and gave a description of the men, whom he says he can identify. The county constabulary are now engaged in investigating the case. The robbery has caused a good deal of excitement, as it is many years since anything of the kind was perpetrated in this neighbourhood.

LINCOLN.—The Bishop of Lincoln has presented the Rev. C. Bird, vicar of Gainsborough, to the Chancellorship of Lincoln Cathedral, vacated by the death of the Rev. G. T. Pretyman. The value of the chancellorship is about 1000*l.* a year, with a fourth share in the patronage of 21 vicarages, five rectories, and two perpetual curacies. In consequence of this appointment, the vicarage of Gainsborough, which is also in the patronage of the bishop, and which is worth about 600*l.* a year, has become vacant.

## Ireland.

THE EARL OF CARLISLE AND THE CORPORATION.—The corporate address to the Lord-Lieutenant was presented on Wednesday afternoon at the Castle with the usual civic state. The address, which was brief, touched upon the late war and the necessity for neutrality, and referred to Lord Eglintoun's good offices in the promotion of the Galway Packet station, and the necessity of preserving intact the Viceregal office in Ireland. In reply his Excellency said:—

"I retain the conviction under which I left your shores, that it would be most unadvisable to discontinue or tamper with the office which it is now my high honour for the second time to fill. Any efforts that I can make will be used in accordance with this opinion. But I do not apprehend that any designs are entertained on the part of those in whose behalf I can speak in a contrary direction. Besides the signal antiquity of the office, which would clearly give to its abolition all the risks of an untried experiment, the character and weight of authority with which it is invested have a tendency to secure consideration for matters affecting the welfare of Ireland; and although under a Parliamentary Government all persons holding office below the Crown itself will probably always, in a greater or less degree, belong to one or other of the parties into which the nation is divided, still the very notion of representing the Crown will be found to go some way in raising a Lord-Lieutenant above the rigid limits of mere party divisions. Most promptly and entirely I echo your wish, that we may abstain altogether from such destructive wars as that by which part of Europe was lately ravaged, but of which we may now hope, with the blessing of the Almighty, to witness a termination. At all events, may we be long permitted to reserve for higher and beneficent purposes the energies and lives of our countrymen!"

THE PHŒNIX TRIALS.—It appears that, after all the reports to the contrary, the State prosecutions are to be repeated at the coming assizes in Cork and Kerry, and that the new law officers mean to follow up the work left uncompleted by their predecessors. A Cork paper says that since the last assizes several additional witnesses have come forward on behalf of the Crown, and that a very important piece of evidence has been procured establishing the swearing in of several parties at a wake, throwing additional light on the designs of the confederacy, and lending fresh corroboration to the testimony of the chief witness for the Crown.

SALE OF LORD WATERFORD'S STUD.—The stud of the late Marquis has been sold by auction at Curraghmore. Gemma di Vergy, by Sir Hercules, sold for 1050*l.*, and several of the other racers brought high prices. The total amount realised was 13,166*l.*

THE WEATHER IN DUBLIN.—Some idea of the effects of the long continued dry weather in Dublin may be gathered from the fact that the Corporation have issued a public notice stating that the supply of water has become deficient even for domestic and manufacturing purposes. The consequence is that the watering of the streets in the southern districts of the metropolis has been curtailed, and the inhabitants of the most populous and fashionable portion of the city have been subjected to all the miseries of a perpetual dust storm. Such a deprivation as a short supply of water is a perfect novelty in Dublin.

PARTY RIOT AT KINSALE.—A disgraceful riot arising out of the commemoration of the 12th of July took place on Tuesday in the town of Kinsale. It appears that in the affray, in which the Antrim Militia played a conspicuous part, 30 persons were injured, and, among other outbursts, an attack was threatened on a Roman Catholic place of worship.

## Scotland.

ORANGE AFFRAY AT PAISLEY.—On Tuesday a Orange Lodges of Paisley and Johnstone were ing through Millarston, they were attacked of about 300 miners, who assailed them stones and bludgeons. The procession was back into the village in disorder, but a short delay they induced some of the coun to accompany them again to the bridge, they again essayed to cross. A desperate then ensued, in which firearms and knives were used, in addition to bludgeons, paling stobs, &c. man was killed, having had his skull fractured left breast stabbed with a clasp knife; and seven were seriously wounded.

## Obituary.

HIS MAJESTY KING OSCAR OF SWEDEN died on the at Stockholm, after an illness which has incapacitated from taking any active part in the government of his since September, 1857. His Majesty was the son of dotte, whom he succeeded in 1844. He was born in married in 1823 the Princess Josephine Maximilienne daughter of Eugene, Duke of Leuchtenberg, by whom had several children. He is succeeded by his eldest Prince Charles, who was appointed Regent by royal in 1857, when his father's illness rendered necessary abnegation of royal authority. The present King was 1826, and married in 1850 the Princess Louise, daughter Prince William of the Netherlands.

THE BISHOP OF SIERRA LEONE (THE RIGHT REV DR. died on the 28th May, of yellow fever. He was for some a resident in Canada, and having come to this country entered as a student of Trinity College, Dublin, graduated. He was ordained by the present Bishop who was at that time the Bishop of Ripon. In 185 to Palestine, and returned to England in 1851. After visited Nineveh, where he formed the acquaintance Layard, with whom he was associated during many investigations. He visited the East a second time in returned to England in 1856. Through Mr. Layard, relative of Lady Huntly, Dr. Bowen was presented Marquis of Huntly to the rectory of Orton Longueville Peterborough. The parish having but a small popula obtained without difficulty a license for non-residence that he might prosecute his Eastern travels. This held until he was appointed to the bishopric of Sierra which he was consecrated in Lambeth Palace in Septembe In the following December Bishop Bowen arrived at Sierra and on the 28th May last he died from a malignant yellow fever, making the third bishop who has thus sacrificed to the terrible climate of Sierra Leone since its establishment in 1852.

SIR RICHARD MUSGRAVE, BART., died on the 7th Whiting Bay, in the county of Waterford. He was born and married in 1815 the daughter of Archbishop Newton Armagh. He succeeded his father in 1826, and was Waterford from 1830 to 1832, and from 1835 to 187 years he had devoted himself to the promotion of improvements in the county of Waterford, especially communication, canal construction, steam navigation every other project that could aid in developing the wealth of the district. To him was to be attributed ing up of the navigation of the Blackwater, by steamer which he had placed upon that river. In other projects he passed a useful and honourable succeeded in his titles and estates by his son Richard Tourin, in the county of Waterford, in 1820, and mar 1845 to the daughter of John Ashton Yates, Esq.

THE REV. TEMPLE FRERE, M.A., Canon of Westminster at his Rectory of Roydon, near Diss, Norfolk, on the 8th the age of 80. Mr. Temple Frere was of an old Norfolk many of whom have distinguished themselves in politics ture, and recently in Indian affairs.

DR. WINTERBOTTOM, M.D., the father of the medical sion (his name being first in the new medical register, the 8th inst. at Westoe, near South Shields, in his Dr. Winterbottom is stated to have been the eldest brother slavery advocate in the kingdom. The principal portion fortune goes to found a school for the education of seamen belonging to the Tyne in nautical astronomy navigation.

WILLS.—The will of the Countess of Carlisle has been under 30,000*l.*; Sir Robert Williams Vaughan, Bart. Archdeacon Berens, 45,000*l.*; Archdeacon King, Arthur Ingram Aston, G.C.B., 16,000*l*: Captain H. T furd, R.N., 12,000*l.*; Mr. Edward Erskine Tustin, Richard Crawshay, 140,000*l.*; Rear-Admiral Thornton Colonel Fitzgerald, 40,000*l.*; Mr. Joshua Drinkald ford Square, 80,000*l.*; Mr. George Hadden, of Copthall 80,000*l.*; Mr. George Cary Elwes, of Cadogan Place

## Miscellaneous.

LORD PALMERSTON ON EDUCATION.—The following speech on the education of professional men and the advantages of competitive examinations was delivered by Lord Palmerston at the recent distribution of prizes to the students of University College:—

"Gentlemen of University College,—and I may be also to hope that what I am about to say may be addressed those ladies who have honoured us on this occasion—I assure you that it has been to me a source of the great tification to be allowed to preside on an occasion so interesting as this, and in a place so interesting as that in which we There can be nothing more interesting than to see ourselves rounded by that rising generation upon whose exertions talents, and conduct in the different paths of life which they may choose to pursue must depend the prosperity and future well-being of the nation to which we belong. It is the more gratifying to me to find that on the present occasion it has been my good fortune to witness a great instances of successful study, so many instances of the development of talent and the exercise of industry and so high a promise of the future in regard to those young members of this University. It is also most pleasing to me that those who have been honoured by the rewards conferred by the University upon industry and talent have been only the inhabitants of this great metropolis of the United Kingdom, but that our colonies have sometimes their share, and that Hungary, Greece, and Turkey have sent hither their promising youth to drink at the fountain of knowledge and to become ornaments to the countries to which they respectively belong. It is gratifying to see that the prizes which it has been my privilege to distribute are awarded for so extensive a range of human knowledge and the development of human intellect that there is no branch hardly of human knowledge in which some one or other or more young men have not obtained distinction, and that circumstance, as well as those who are present here to-day, tends to make those who are present feel proud of having mentioned,

pride in the success, but a hopeful expectation of the future promise of the institution. If I might address those who have been competitors in the recent examinations, I would congratulate sincerely those who have succeeded upon the distinction they have acquired, and I would urge those who have not been successful not to be discouraged by temporary failure, but to go on with the same spirit with which they entered into the competition, whereby they may depend upon it they will obtain on a future occasion the distinction which they have not succeeded in obtaining on the present. It was well said by Mr. Fox, a great master of human nature and of struggles in Parliament,—'It is all very well to tell me that a young man has distinguished himself by a brilliant first speech. He may go on, or he may be satisfied with his first triumph, but show me a young man who has not succeeded at first, and nevertheless has gone on, and I will back that young man to do better than most of those who have succeeded at the first trial.' I am persuaded, however, that those whom I see around me will not be too much elated by their first success, but will only be encouraged to pursue in the future that system of exertion which has obtained for them the distinction they enjoy to-day. All those whom I am addressing must feel that the struggle through which they have gone in the recent examinations is only a prelude to that more lengthened contest which awaits them in after life. The whole life of man in a country like this is a life of struggle, of competition—I will say of fight—competition with those who are running the same race, struggle with circumstances, fight against adverse fortune, which may every now and then overthrow him. But he who enters into the race with that dogged perseverance which is the peculiar characteristic of the English nation is sure to bring out successfully those talents with which nature may have endowed him, and, whatever the amount of his ability, will be always sure to improve that ability and apply it as successfully as circumstances will allow him. Gentlemen, in reference to your studies there is one maxim which I would earnestly impress upon your minds. Every man, I presume, intends to devote himself to one particular career. Let him make the objects of that career the subject of intense and earnest study, but do not let him devote himself singly and entirely to one pursuit. Let him make the business or profession which he intends to follow the object of his study, and let him make acquirements of every kind the object of his amusement. It is necessary that whatever the profession he means to pursue he should know that fully. Half knowledge in a profession is fatal to many who are contented with that moderate amount of acquirements, but full and complete knowledge of the one subject in which a young man means particularly to enter, ought not to prevent his acquiring such an amount of knowledge as his more leisure hours may enable him to gain on any other or every other branch of human knowledge and science. It is often said that people go on quoting poetic lines without seeing their meaning and application. It is often said 'A little knowledge is a dangerous thing.' No doubt much knowledge is better than little knowledge; but little knowledge is always a useful and not a dangerous thing. As my noble friend Lord Brougham says, 'A little knowledge is better than great ignorance.' But whatever a man learns, let him endeavour to learn it thoroughly. Let him endeavour to obtain clear and distinct ideas, however little his progress. Whatever he does know let him impress upon his own mind a clear and distinct knowledge of principles, and not content himself merely with superficial facts. Great progress has been made of late years in every department connected with the development of the human mind, and it is impossible anybody can have been present to-day and compared that which has passed and that which would have passed at a great examination only half a century ago without seeing the immense progress which the art of instruction has made. In times not beyond the memory of many now living the attention of youth was confined to classical and, perhaps, mathematical knowledge; but, with the greatest delight, we have seen to-day that the course of study in this University embraces a vast and wide range of human knowledge. There is scarcely anything which is useful to a man in his future career in life which is not taught here, and as the prizes which have been bestowed are proofs, taught with great and eminent success. Now, gentlemen, we are indebted for this greater range of human knowledge to many circumstances. Many have contributed to this extension of study, but I will venture to say that there is no man living who has so much contributed to that extension, and who has thereby conferred such great benefits on mankind as my noble friend. The great Lord Bacon has the merit of laying down those principles upon which knowledge should be sought and acquired. He conferred an immense benefit on mankind. My noble friend gave to those principles the wider development which was necessary for their practical utility. He has laboured incessantly in every department of human intellect, in creating institutions calculated to produce advancement in knowledge, and he has himself afforded one of the most striking instances of the application of the system which he has so greatly contributed to extend. My noble friend has the good fortune to combine in his person the experience of mature age and the bodily and mental vigour of early manhood. He has a mind which, like what has been said of the trunk of the elephant, can surmount the greatest obstacles and deal equally with the minutest details. I, therefore, addressing myself to the younger part of this audience, earnestly entreat them to make the career of my noble friend their guide and the object of their ambition. It is not given to every man to equal that which he aims at. We know that if we want to hit an object at a distance we must aim a little above the object which we mean to hit. But let that system upon which my noble friend has exercised the high faculties of his mind be the system which all endeavour to emulate. Study with deep attention the science of that particular profession in which you intend to engage and on which the fortunes of your future lives are to be founded, but do not allow yourselves to be deterred from pursuing for amusement and the expansion of your minds every other department of knowledge into which you are able to obtain an insight. Depend upon it that every little added tends to invigorate your faculties with regard even to that particular subject to which your active exertions must be confined. The more you know the more that which you know becomes useful. It is gratifying indeed to see that these public institutions, which are meant for the education of the rising generation, now open their doors wide to every branch of human knowledge. Whatever the branch which peculiarly suits the turn of mind of any one of the students, he finds opportunities for acquiring a deep knowledge on that subject, and if the mind be endowed with a spirit of industry and a desire and thirst for information, which is the character of genius of every kind, he will find ample opportunities for satiating himself with as much knowledge as time and labour can convey to him, thereby becoming not only more useful to himself and friends, but a more lasting ornament to the country to which he has the honour to belong. I can only add one word in reference to the system of examination of which they had today seen the results, and it is that I am glad that the system of examination and competition, more or less limited, more or less open to all, has been extended from academical circles to public employments. It may be, and undoubtedly is true that the application of that system has frequently shut out from the public service those who would in themselves have been perfectly fit for it. But the public have the security that none are appointed to official situations who do not possess high qualifications. The system of public examination has spread, and will spread still further the system of private education through every class of the community, and as the aggregate power of a nation depends on the aggregate abilities and cultivation of mind of all the members, so I am sure that the necessity under which young men will now feel of attaining a high standard of mental qualifications in order to be fit for any department, however humble, of the public service, will have an admirable effect in exciting their energy and making us in every respect a more prosperous and powerful community than we should otherwise be."

---

BIRTHS.—On the 10th inst, at Ickworth, the Lady ARTHUR HERVEY, of a daughter—10th inst, at Duffryn, Aberdare, the wife of H. A. BRUCE, Esq., M.P., of a daughter—11th inst, at 21, Wilton Crescent, the wife of HENRY LOWTHER, Esq., M.P., of a son—13th inst, Mrs STEVATFIELD of Chiddingstone, of a son—6th inst, at Gottingreenach House, Argyllshire, the wife of Major-General D. CUNNINGHAME, Indian Army, of a daughter.

# Markets.

## METROPOLITAN CATTLE MARKET.

**MONDAY, July 11.**

There are a few more Beasts than on Monday last: however, there is a fair demand, and the quotations of that day are fully realised. The supply of Sheep is by no means excessive, although quite sufficient for the demand. Trade is slow at late rates. Calf trade remains unaltered. From Germany and Holland there are 740 Beasts, 4810 Sheep, and 206 Calves; from Spain, 120 Beasts; from Scotland, 320; from Norfolk and Suffolk, 1000; from Ireland, 80; and 500 from the northern and midland counties.

| | s. | d. | s. | d. | | s. | d. | s. | d. |
|---|---|---|---|---|---|---|---|---|---|
| Best Scots, Herefords, &c. | 4 | 8 | to 4 | 10 | Best Long-wools | 4 | 6 | — 4 | 8 |
| Best Short horns | 4 | 4 | — 4 | 8 | Do. Shorn | .. | .. | — | .. |
| 2d quality Beasts | 3 | 6 | — 4 | 0 | Ewes & 2d quality | 4 | 0 | — 4 | 4 |

| Do. Shorn | .. | .. | — | .. | Lambs | .. | .. | 5 0 | — 5 8 |
| | | | | | Calves | .. | .. | 3 8 | — 5 0 |
| | | | | | Pigs | .. | .. | 3 6 | — 4 6 |

Beasts, 2735; Sheep & Lambs, 28,530; Calves, 291; Pigs, 350.

**THURSDAY, July 14.**

We have a good supply of Beasts. The hot weather causes a slow trade, and prices on the average are lower. The number of Sheep and Lambs exceeds the demand; choicest descriptions meet with fair buyers at about late rates, but of other kinds many remain unsold. Trade is very heavy for Calves. Our foreign supply consists of 170 Beasts, 1670 Sheep, and 420 Calves. The number of Milch Cows is 111.

## COVENT GARDEN.—July 16.

Grapes and Pine Apples still realise fair prices. West India Pines have been plentiful and good. Gooseberries, Currants, and Raspberries are also tolerably abundant and cheap. Cherries and Strawberries are scarcer. English Apricots have made their appearance. Greengage Plums obtain 2s. a dozen. Oranges fetch 3s. 6d. and 10s. per 100. Nuts of all descriptions continue to realise fair prices. Cabbages and French Beans are plentiful. Rhubarb, Asparagus, and Seakale are getting over. Peas, Beans, Horn Carrots, and Globe Artichokes may be obtained in quantity. Cauliflowers are cheaper. New Potatoes realise from 6s. to 8s. per lb. Cucumbers are selling. Cut flowers chiefly consist of Orchids, Gardenias, Roses, Lily of the Valley, Violets, Mignonette, Heaths, and Roses.

### FRUIT.

| | | | |
|---|---|---|---|
| Pine Apples, per lb., | 5s to 7s | Plums, per doz., | 1s to 2s |
| Grapes, per lb., | 6s to 8s | Apricots, do., | 1s to 6d |
| Strawberries, p. basket, | 1s to 2s | Figs, per doz., | 1s to 3s |

---

**MARK LANE.—MONDAY, July 11.**

There was a fair supply of Wheat from Kent to this morning's market, but little fresh up from Essex, which, however, with that remaining over from the last two weeks made a large show; some sales were effected at a decline of 4s. per qr. upon the prices of this day se'nnight, but even at this reduction the stands were not cleared. The few retail sales made in foreign were at a similar decline, and we reduce our quotations accordingly. Barley sells slowly at rather under last week's prices. Beans and Peas bring late rates. The Oat trade is heavy, and Russian qualities are rather cheaper. The top price of town-made Flour is unaltered, but Norfolk is reduced to 56s. per sack.

FRIDAY, July 15.

During the last eight days the wind has blown from all quarters, and been very variable, and the temperature has been unusually high. The Wheat trade during the same period has continued particularly inactive, and the decline quoted in the several markets varies from 1s. to 4s. and 5s. per qr., the majority being 3s. to 4s. Prices have now reached the point from which they started three months since, which fact, combined with greatly increasing complaints of Potatoes, and a few of blight in the Wheat, prevents holders from forcing sales; indeed, not many are willing to pay the market price of the day, but prefer to wait the result of the harvest, as few buyers are to be met with excepting on terms which they think must be safe, in the event of the crops being secured in good order and proving productive. Prices of Spring Corn have a downward tendency, and Barley in a few markets is written 6d. to 1s. lower. Flour has been difficult of disposal, and generally about 2s. per sack lower. Here on Wednesday the English Wheat left over from Monday was disposed of at that day's prices; foreign, however, continued to be neglected. The arrivals of grain laden vessels this week off the coast for orders from Southern Europe have increased, and also the sales. The arrivals of English grain this week are small, of foreign good. The attendance at this morning's market was very small, and included but few Wheat buyers, the value of both English and foreign must be written nominally the same as on Monday. Spring corn of all descriptions is a steady sale at Monday's prices. In Flour there is nothing doing.

ARRIVALS FROM JULY 11 TO JULY 15.

| | Wheat. | Barley. | Oats. | Flour |
|---|---|---|---|---|
| English .. | 920 qrs. | — qrs. | 2430 qrs. | 1710 sks. |
| Irish .... | — ,, | — ,, | 460 ,, | — ,, |
| Foreign .. | 15410 ,, | 3040 ,, | 23060 ,, | 2120 ,, — brls. |

LIVERPOOL, Tuesday, July 12.—Our market opened exceedingly dull this morning, but a good number of buyers making their appearance a better tone was established, and notwithstanding the depression in Mark Lane yesterday, holders were enabled to obtain an advance of 1d. to 2d. per cental on

French Wheats over the rates of Friday. Flour had only a very slow sale at Friday's reduction. Indian Corn attracted a fair inquiry at full prices. Oats and Oatmeal little dealt in. Egyptian Beans were a shade easier. Peas and Barley nominally unchanged.

FRIDAY, July 15.—Corn market thinly attended, and business inactive. Wheat and Flour quotably without alteration; tone rather in favour of buyers. Indian Corn and Beans steady. Oats, Oatmeal, and Barley in moderate retail inquiry. Weather fine.

WANTED, AS GARDENER, a practical middle-aged Man, without incumbrance, who can take charge of a Small Stove and Greenhouse, and who understands Kitchen and **Flower Garden Work. He must have good testimonials** of his skill and general conduct. Wages, without cottage, 50*l.* per annum, paid weekly.—Apply to T. S., Emsworth, Hants.

WANTED, Two Young Men acquainted with GARDENING, requiring further improvement in a large establishment. **Must be honest and sober.—Apply** E. J. B., Post Office, Dulwich, Surrey.

WANTED, two married Men, the one as UNDER GARDENER, the other as COWMAN; the Wives both in the Laundry. Wages for each couple 25*s.* per week; without family preferred.—Apply to the BAILIFF, Bolingbroke Farm, Wandsworth Common, S. W.

WANTED, AS UNDER GARDENER, a strong active **Lad from 18 to 20. Must be a good Mower.**—Apply, stating age, length of character, and wages required, to A. B., Mr. Slatter's, 6, Blenheim Terrace, Kentish Town, Middlesex, N.W.

## WANT PLACES.—Letters to be Post Paid.

GARDENER (HEAD).—Age 25, single; understands his profession in all its branches. Three years' good character.—A. B., Post Office, Twickenham, S.W.

GARDENER (HEAD).—Age 30, married; thoroughly undestands his profession. Two years' good character. C. J., West Street, Coggeshall, Essex.

GARDENER (HEAD).—Age 30, married, no incumbrance; unexceptionable references. Would not object to a comfortable single-handed place.—A. B., Royal Botanic Gardens, Regent's Park, London, N.W.

GARDENER (HEAD).—Age 42, married, no incumbrance; twelve years' character from his last employer. *Six years in his previous situation.*—W. Y., *Gardeners' Chronicle* Office.

GARDENER (HEAD).—Age 30, single; has a thorough knowledge of his profession; satisfactory reason for leaving present situation.—B. C., Streatham Place Nursery, Brixton Hill.

GARDENER (HEAD).—J. SMITH, age 35, married, Gardener to D. B. Chapman, Esq., Dawnshire House, Roehampton, Surrey, will shortly be disengaged, and will be glad to engage with any gentleman in want of an honest, sober, and energetic man.—Direct as above.

GARDENER (HEAD).—Age 28, single; good experience in Grapes, Pines, Peaches, and Cucumbers, also Stove and Greenhouse Plants, including Ferns, and Kitchen and Flower Gardening. Good character.—H. B., Mrs. Wellbelove's, Surbiton Hill, Kingston, Surrey.

GARDENER (HEAD).—WILLIAM HOWARD, Gardener to W. P. Milner, Esq., Dykes Hall, Sheffield, will shortly be at liberty to enter into an engagement with any nobleman or gentleman requiring the services of a thoroughly practical man well versed in every branch of the profession.

GARDENER (HEAD).—Age 46, married, no incumbrance; thoroughly understands Early and Late Forcing of Vines, Pines, Strawberries, &c., and can be well recommended as a good practical Gardener, both from his last and present employer.—J. R., Mr. Young's Nurseries, Milford, near Godalming.

GARDENER (HEAD).—Age 30, married, no incumbrance; has a thorough practical knowledge of his profession, including Forcing of every kind of Fruit, Flowers, and Vegetables, Growing Stove and Greenhouse Plants, Exotics, Orchids, &c. Highly recommended by the gentleman he is about to leave, and likewise by his late employers.—W. R., Hill House, Winkfield, Windsor, Berks.

GARDENER (HEAD).—Age 34, married, no incumbrance; thoroughly conversant with the Management of a large establishment; has had great practice in General Landscape operations, Levelling, Draining, Ornamental Planting; also Early and Late Forcing of Fruits, Flowers, and Vegetables, Keeping Accounts, &c. Has lived as Head Gardener, and filled situations of very great trust. Character unexceptionable.—Messrs. A. HENDERSON & Co., Pine Apple Place, Edgeware Road, London, W.

GARDENER (HEAD).—Age 33, married, has one child; thoroughly understands his profession in all its branches, including Early and Late Forcing, Kitchen and Flower Gardens. Can also Lay Out New Gardens or Cemeteries from plans; has been engaged under an eminent Landscape Gardener. No objection to undertake Land or Stock. Wife can take charge of Dairy and Poultry if required. Good references can be given from last and other employers.—H. W., near the old church, Ealing Middlesex.

### TO NOBLEMEN AND GENTLEMEN.

GARDENER (HEAD).—Age 33, married; has a thorough knowledge of his profession in all its branches. Six years' good character from last employer.—J. S. T., Mr. Hardie, Kenyon House, Kenyon Junction, Manchester.

### TO NOBLEMEN AND GENTLEMEN.

GARDENER (HEAD), or to take the entire charge of a nobleman's or gentleman's Estate.—Is proficient in all branches, expert at Land Surveying, Planning, Mapping, &c., and everything necessary for the improvement and management of Estates in general. First-class testimonials.—A. J. L., 12, Union Street, Ryde, Isle of Wight.

GARDENER.—Age 33, married, one child; understands Greenhouses, Flower and Kitchen Gardens. Three years 8 months' character.—G. G., 12, Albert Place, Lee, Kent.

GARDENER.—Age 36, no incumbrance; first class Graper, Fruit and Vegetable grower, a good knowledge of Propagation, Budding, Fruiting Vines in pots, &c. Character will bear the strictest investigation.—A. B., Hart's Weir, Lechlade, Gloucestershire.

GARDENER.—Age 30, married; understands the Management of Greenhouse, Grapes, Cucumbers, Melons, Kitchen and Flower Gardens. Can have a good character from the gentleman he has left.—C. WRIGHT, 2, Church Street, St. John's, Lewes.

GARDENER.—Age 35, single; practical knowledge of his profession, having had the management of Flower and Kitchen Gardens, Greenhouse, &c., where he has lately lived. High recommendation from late employer.—J. B., Mrs. Bryant, King Street, Maidstone, Kent.

GARDENER.—Middle-aged, married, without incumbrance; understands Growing Pine, Grape, Stove, and Greenhouse Plants, also Flower and Kitchen Gardens. Has no objection to go to America. Good character of many years standing.—D. F., Mr. Veitch, Royal Exotic Nursery, Chelsea, London.

GARDENER (UNDER).—Age 24; has been Groom, and assisted in the Garden. Two and a half years' good character.—A. B., Mr. J. Hollage, 2, Crown Lane, Norwood.

GARDENER (UNDER).—A Lady wishes to place a young man as above, whose character she has long known and who has been under her own head gardener. She is in town for a few days.—G., Post Office, Brompton Row, S.W.

GARDENER AND BAILIFF.—Age 41, married, three children, native of Scotland; thoroughly understands his profession. Good reference.—W., Mr. Halstead, Nurseryman, Lancaster.

STEWARD AND GARDENER.—Age 40, married; nine years' General Manager to present employer. Has had the care of the Farm, Woods, Kitchen and Flower Gardens, Hothouses, &c., Saw-mill Steam-engine, Erection of Buildings, Underdraining, taking the Rents, and Superintending an Estate of 5000 acres.—A. B., Oxburgh, Stoke Ferry, Norfolk.

### LANDSCAPE GARDENING.

FOREMAN.—Skilled in Laying-out Cemeteries or Gardens from Plans, and Ornamental Planting.—A. B., Mr. Kay, East Acton, Middlesex.

MANAGER OF A NURSERY.—Young; has good practice in Geranium growing, Propagating, and also in Managing. Good references can be given.—W. H. L., 4, Woodbine Cottage, Green Park, Tottenham, Middlesex.

FORESTER.—Young, native of Scotland; has had great experience in all matters appertaining to Foresting, and can produce unexceptionable testimonials and references.—FRANCIS AND ARTHUR DICKSON & SONS, Nurserymen, &c., 106, Eastgate Street, Chester.

SHOPMAN, in a Nursery or Seed Business.—Has had seven years' experience in first-class houses, and can be well recommended.—A. B., *Gardeners' Chronicle* Office.

### TO SEEDSMEN.

SHOPMAN.—A young Man, who has had 10 years' experience in a Scotch house, latterly as principal Shopman. Satisfactory references.—T. G. T., *Gardeners' Chronicle* Office.

ASSISTANT.—A lady wishes to recommend a respectable youth, aged 17, as ASSISTANT to a GARDENER; he has had some years' experience.—E. N., 47, Harley Street, Cavendish Square, W.

APPRENTICE.—Age 15; to a gentleman's Gardener where the gardens are extensive, and where he will have an opportunity of learning his profession in the most modern style. A moderate Premium will be given.—J. B., Post Office, Hinckley.

COWMAN OR HIND on a Small Farm.—Age 40, married, without incumbrance; Wife would have no objection to take charge of Dairy or Poultry.—W. C., Post Office, North Stainly, near Ripon, Yorkshire.

### PRIZE MEDAL, PARIS EXHIBITION 1855.

METCALFE, BINGLEY, AND CO.'S New Pattern and Penetrating Tooth Brushes, Penetrating unbleached Hair Brushes, Improved Flesh and Clothes Brushes, and genuine Smyrna Sponges; and every description of Brush, Comb, and Perfumery for the Toilet. **The Tooth Brushes search thoroughly** between the divisions of the Teeth and clean them most effectually—the hairs never come loose. M., B., and Co. are sole makers of the Oatmeal and Camphor and Orris Root Soaps—sold in Tablets (bearing their names and address) at 6*d.* each; of METCALFE'S celebrated Alkaline Tooth Powder, 2*s.* per box; and of the New Bouquets.—Sole Establishment, 130B and 131, Oxford St., 2d and 3d doors west from Holles St., London.

WHITE AND SOUND TEETH are indispensable to personal attraction and to health and longevity by the proper mastication of food. ROWLANDS' ODONTO, or Pearl Dentifrice, compounded of oriental ingredients, is of inestimable value in improving and beautifying the teeth, strengthening the gums, and in rendering the breath sweet and pure. It eradicates tartar from the teeth, removes spots of incipient decay, and polishes and preserves the enamel, to which it imports a pearl-like whiteness. As the most efficient and fragant aromatic purifier of the breath, teeth, and gums ever known, ROWLANDS' Odonto has for a long series of years occupied a distinguished place at the toilets of the sovereigns and the nobility through Europe: while the general demand for it at once announces the favour in which it is universally held.—Price 2*s.* 9*d.* per box. CAUTION.—The words "ROWLANDS' Odonto" are on the Label and "A ROWLAND & SONS, 20, Hatton Garden," engraved on the Government stamp affixed on each box.—Sold by the Proprietors, and by Chemists and Perfumers.

HEALTH WITHOUT PHYSIC.—Nervousness effectually cured by a novel and most successful mode of treatment, discovered in America. The most convincing proof of the efficacy of this wonderful remedy, with other details, will be sent to any address on receipt of one stamp.—Address, Mr. HILL, 27, Alfred Place, Store Street, London, W.C.

HOLLOWAY'S PILLS AND OINTMENT.—HOUSEHOLD MEDICINES.—Mothers and nurses would spare themselves infinite anxiety in case of accident or illness if they had always at hand the never failing remedies prepared by Professor HOLLOWAY. **The weaker sex, especially, may rely on their restorative powers in all cases of irregularity** or suspension of the functions peculiar to them. They may be used advantageously under any circumstances of ill-health, as their peculiar property of purifying the blood must mitigate the severity of any disease, whether recent or chronic, trifling or dangerous. They are harmless, but at the same time effective, and act as alteratives, deobstruents, and tonics. For the nursery and period of latter youth these fine corrective medicines are inestimable.

BOYD'S SELF-ADJUSTING SCYTHES are the cheapest and best, and being sold adjusted, are ready for immediate use. They can be regulated in an instant to suit any person, and to cut any crop without change of Scythes. For Amateur Gardeners they are very desirable, as they afford a healthy and interesting exercise. They have stood the test of public opinion for seven years, and for excellence, ease, economy, and durability, are highly recommended. Upwards of 50,000 of them have been sold. To be had of every Ironmonger, Hardwareman, and Seedsman in the United Kingdom, and wholesale of the Sole Licensed Makers, WM. DRAY & Co., at their New Agricultural Implement Warehouses, Adelaide Place, London Bridge.

GISHURST COMPOUND, PATENTED.—

THRIP (magnified).

MEALY BUG (magnified).

GREEN FLY on Roses and Greenhouse Plants safely got rid of by syringing with PATENT GISHURST COMPOUND, 2 oz. to the gallon of water.

Extract from leading article in *Gardeners' Chronicle*, April 9, '59.—"That it really kills red spider, aphides, mealy bug, thrips, and scale, it is impossible to doubt in the face of reports of practical men, among whom we may mention Mr. D. Judd, of Althorp Gardens"—then follows a caution against the use of a too strong solution.

The Gishurst Compound is sold in boxes at 1*s.* 6*d.* and 6*s.* each, with directions for use, and printed opinions of Mr Rucker's gardener, Lady Dorothy Nevill's gardener, Sir William Hooker, **Mr. Rivers, and other eminent authorities.** For Nurserymen **the large size is recommended,** but where the consumption is not large the compound keeps its strength best in the small. The undermentioned Seed Merchants, Nurserymen, &c., having taken in supplies are prepared to sell single boxes.

CHASE'S
BEETLE POISON.

EQUALLY DESTRUCTIVE TO RATS AND MICE, AND HARMLESS TO CATS AND DOGS.

A SAFE and most effectual Destroyer of BLACK BEETLES and COCKROACHES; one trial alone will suffice to prove its great efficacy, and one box will destroy thousands. The great advantage in this preparation is, that it does not leave their bodies to decay and corrupt the air, but completely dries up and destroys them, so that nothing is left to cause an unpleasant odour when dead. *Directions for use.*—Place four or five of the Balls each night where the Beetles mostly resort.—Sold in boxes at 1*s.* each, or sent *free* to any part of the kingdom for Twenty Stamps (or a case containing one dozen boxes sent *carriage free* on a receipt of a Post-office Order for 12*s.*), by THOMAS CHASE, Chemist, 14, Holborn, London, E. C., and may be obtained through all Chemists, Booksellers, and Medicine Vendors.

Testimonials from the Rev. Edwin Sidney, Cornard Parva Rectory, near Sudbury, Suffolk; James Veitch, jun., Esq., of the Royal Exotic Nursery, Chelsea; Lucombe, Pince, & Co.; E. G. Henderson & Son, Wellington Nursery, St. John's Wood; C. Loddiges, Esq., of Hackney, and many others.

*SATURDAY, JULY* 23, 1859.

QUEEN'S COLLEGE, BIRMINGHAM.
INCORPORATED BY ROYAL CHARTER.

The WINTER SESSION of the Faculties of ARTS, MEDICINE, ENGINEERING, AND AGRICULTURE, will commence on MONDAY, October 3. The system of study pursued at the College constitutes a complete Course of Education (with Collegiate discipline) in Arts, Science, Medicine, Law, and Theology, without residence elsewhere; and the Courses of the different Faculties are recognised in the Universities of London and Durham, with which the College is in connection, by the different Medical Examining Boards, and by those of Her Majesty's Army, Navy, and Indian Services.

The College is empowered by Royal Charter to confer a Diploma in Engineering.

Agriculture. Students are prepared by a special course of study for the Examination of the Royal Highland Agricultural Society.

Students in the Junior department of Medicine are prepared for the Matriculation Examinations of the University of London, College of Surgeons, Apothecaries' Hall, &c. Those who reside in the College may receive Indentures of Apprenticeship without premium.

For further information and Prospectuses, application may be made to the Dean of the Faculty; or to Dr. BOND, Hon. Sec. to the Medical Faculty, Queen's College.

NORWICH UNION LIFE INSURANCE SOCIETY.—INSTITUTED 1808.
Invested Capital exceeding 2,000,000*l.* sterling.

This Society is one of the very few purely Mutual Insurance Offices, the whole of the profits being divided among the Policyholders, and possesses large reserves applicable to future Bonuses. The rates are considerably below those usually charged. Thus at the age of 40 the sum of 33*l.* 19*s.* 2*d.*, which, at the ordinary premium, will insure 1000*l.*, with the Norwich Union WILL INSURE ONE THOUSAND AND NINETY-FIVE POUNDS FOUR SHILLINGS, giving an immediate bonus in addition to subsequent accumulations.

Annuities and special risks undertaken on favourable terms.

For forms of proposal and prospectuses apply at the Society's Offices, 6, Crescent New Bridge Street, Blackfriars, E.C., and 1 Surrey Street, Norwich.

RIFLE CORPS AND LIFE ASSURANCE.

THE SCOTTISH UNION INSURANCE COMPANY hereby intimate that they will NOT CHARGE any EXTRA PREMIUM for persons joining and serving in any Volunteer or Rifle Corps so long as they remain within the United Kingdom of Great Britain and Ireland.

The terms and conditions of this Company (established 35 years), are in every sense liberal.

Persons opening policies now and before the end of July, will participate in the profits of the year then ending.

The next division will be in 1861.

Prospectus, and forms of proposal, may be had at the Company's offices, 37, Cornhill, London; and of the agents throughout the kingdom.

F. G. SMITH, Secretary to London Board.
37, Cornhill, June, 1859.

NOTICE OF DIVIDEND.—BANK OF DEPOSIT (Established A.D. 1844), No. 3, Pall Mall East, London, S.W.—The WARRANTS for the HALF YEARLY INTEREST, at the rate of 5 per cent. per annum, on Deposit Accounts, to the 30th June, are ready for delivery, and payable daily between the hours of 10 and 4.

July 16. PETER MORRISON, Managing Director.
Prospectuses and Forms sent free on application.

TO PIG AND POULTRY FEEDERS.

RICE SWEEPINGS FOR CHICKENS, 8*s.* per cwt., in 1¼ cwt. bags. SCREENED RICE, 11*s.* per cwt., in 1¼ cwt. bags. RICE MEAL, 6*s.* 6*d.* to 8*s.* 6*d.* per cwt. OILCAKE, 10*l.* 10*s.* to 11*l.* 10*s.* per ton only. DOG BISCUIT, 14*s.* to 15*s.* per cwt.—Sold for cash only by W. & R. JUPP, 6, Cross Lane, St. Mary-at-Hill, Eastcheap, City, E.C.

GENUINE TOBACCO PAPER FOR FUMIGATING.

H. APPLEBY (Foreman to Messrs. Ivery & Son, Surrey), takes this opportunity of informing his patrons and the public that he is now offering the above at a very considerably reduced price. It is now sold in packets of 4 lbs. each, at 1*s.* 3*d.* per lb. A liberal discount allowed to the Trade. For testimonials that will guarantee its quality, see *Gardeners' Chronicle*, April 16, p. 353.

Sheet Iron Pots for fumigating, 3*s.* 6*d.* each.

N.B. All orders to be accompanied with a Post-office Order, payable to HENRY APPLEBY, Dorking, Surrey.

GREEN FLY, RED SPIDER, THRIPS, SCALE, MEALY BUG, AMERICAN BLIGHT, ANTS, &c. prevented and got rid of by the PATENT GISHURST COMPOUND, which should also be applied when dressing Fruit Trees in autumn and winter. Price 1*s.* 6*d.*, and 5*s.* per box exclusive of carriage: with directions for use and testimonials from the most eminent professional and amateur gardeners in the country. Where the consumption is not large the small sized boxes are recommended. Nearly 100 of the principal Nurserymen and Seedsmen in England, Scotland, and Ireland have taken in their supplies, most of the Nurserymen in the first instance for their own use, and are prepared to sell single boxes. A list of their names is occasionally advertised in the *Gardeners' Chronicle* and "Cottage Gardener," &c.

A new List of Testimonials stating the strength of solution and mode of application in the different cases will shortly be printed and issued with the boxes.

Nurserymen and Seedsmen supplied by PRICE'S Patent Candle Company Limited), Belmont, Vauxhall, London, S.

BARBER'S POISONED WHEAT Kills Mice and Sparrows on the spot.—In 1*d.*, 2*d.*, 4*d.*, and 8*d.* packets, with directions and testimonials. No risk nor damage in laying this Wheat about. From a single packet hundreds of Mice and Sparrows are found dead. Agents: Barclay & Sons, 95, Farringdon Street; W. Sutton & Co., Bow Churchyard; B. Yates & Co., 25, Budge Row, London; and sold by all Druggists, Grocers, &c. throughout the United Kingdom.

BARBER'S Poisoned Wheat Works, Ipswich, removed from Eye.

KEATING'S PERSIAN INSECT DESTROYING POWDER

POULTRY, DOGS, AND PLANTS are effectually freed from Fleas, and all other Vermin with which they are infested by the above Powder, which is quite harmless to animal life. The Farmer, the Gardener, or the Sportsman, will therefore find it invaluable. Bugs, Cockroaches, Beetles, Moths in Furs, and every other species of Insect are also instantly destroyed. In packets post free, for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice each genuine packet bears the above name and address. See "THE FIELD," Oct. 2d and 9th, pp. 263, 285, and 294.

HENRY J. MORTON AND CO.,
2, Basinghall Buildings, Leeds.

# News of the Week.

Two important documents in connection with the Treaty of Peace have been published this week, the one a manifesto from the EMPEROR OF AUSTRIA to his subjects, the other a reply from the EMPEROR OF THE FRENCH to the addresses of congratulation

presented by the Senate, the Legislative Body, and the Council of State, on his return from Italy. The EMPEROR OF AUSTRIA, in his manifesto, states that he was obliged to make peace because his "national and most ancient allies" obstinately refused to support him; while the EMPEROR NAPOLEON states that he found himself in the presence of Europe in arms, "ready to dispute his success or aggravate his reverses," and that if he had commenced the "long and sterile war of sieges," he must have broken through the barriers raised by neutral territories, have accepted the struggle on the Rhine as well as on the Adige, and have availed himself everywhere of the support of revolution. The means of accomplishing these objects would, he says, have been out of proportion to the results to be expected, and he therefore stopped short of his programme in consideration of the "interests of France." A Conference is about to take place at Zurich between the representatives of France, Austria, and Sardinia, to settle the affairs of Italy; and it is understood that the Great Powers will afterwards be invited to join in a Congress for the purpose of confirming the arrangements which may be found necessary to carry out the conditions of the Treaty of Peace.

In the House of Lords on Monday Lord CRANWORTH laid on the table five Bills prepared by the Statute Law Commission, and said that they were an instalment of a series with a view to the consolidation of the statute law. On Thursday the LORD CHANCELLOR, in moving the second reading of the Divorce Court Bill, said that it was intended by this measure to constitute all the Puisne Judges members of the Court, to empower the Court to sit in certain cases with closed doors, and to require the Attorney-General to watch petitions for divorce in cases where there may be reason to suspect collusion.

In the House of Commons on Monday the CHANCELLOR of the EXCHEQUER made his financial statement, from which it appeared that the estimated deficiency of the year will be 4,867,000*l.*, caused chiefly by the expenditure incurred in our naval and military defences. As this deficiency is likely to be temporary, Mr. GLADSTONE proposed to meet it not by resorting to loans, nor by augmenting indirect taxation, but by a temporary addition of 4*d.* in the pound to the income tax on all incomes above 150*l.* a year, to be leviable on the next half yearly payments, so that the supplementary duty may be in hand to meet the payments coming due before April next. He expected this addition to the income tax to yield something more than 4,000,000*l.*, and he proposed to supply the remainder of the deficiency by striking off six weeks from the six months' credit given to maltsters. In submitting this Budget to the House, Mr. GLADSTONE stated that it was not a measure of prospective or permanent finance, but one of temporary and provisional arrangement, as the lapse of the income tax and the falling in of the Long Annuities next year will make it necessary for Parliament to enter upon larger views of our financial system at the commencement of next session. On Tuesday, the third reading of the Public Health Bill was carried by 101 to 95, and the second reading of the Municipal Corporations Bill was carried by 130 to 44. Mr. C. FORSTER's motion in favour of a winter session of Parliament was negatived by 121 to 48; and Mr. BAINES's motion for a select committee to inquire into the nature and extent of the Queen's printer's patent for England and Wales, so far as relates to the right of printing the Holy Scriptures, was agreed to without a division. On Wednesday the second reading of the Edinburgh Annuity Tax Abolition Bill was carried by 162 to 108, on the understanding that it will not be further proceeded with, the Government having undertaken to bring in a Bill upon the subject next year. On Thursday, in Committee of Ways and Means, the CHANCELLOR of the EXCHEQUER moved his resolutions on the income tax and malt credit. Sir H. WILLOUGHBY moved two amendments, the first to reduce the additional tax on income from 4*d.* to 3*d.* in the pound, and the second to reduce the tax on Long Annuities to ½*d.* for every pound of dividend. Both amendments were negatived without a division. Mr. DISRAELI then moved an amendment for the purpose of distributing the payment over the year. This amendment was likewise negatived, and the resolutions were agreed to. Sir W. SOMERVILLE withdrew the Roman Catholic Relief Act Amendment Bill, on the ground that there was no chance of passing it in the present session.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Royal family continue at Osborne. On Friday afternoon the Prince Consort went to Portsmouth. Her Majesty embarked at a quarter before 6 in the Fairy, accompanied by Princess Alice, Princess Helena, and Prince Arthur, and crossed to Portsmouth, where the Prince Consort joined her Majesty and returned with her to Osborne. On Saturday the Duchess of Kent and the Princess of Hohenlohe-Langenburg arrived at Osborne on a visit to her Majesty. In the afternoon her Majesty and the Prince Consort, accompanied by Princess Alice and Princess Hohenlohe, drove out. On Sunday morning the Queen, Prince Consort, Princess Alice, Prince Arthur, Princess Helena, and Princess Louisa attended Divine service at Osborne; the Rev. G. Prothero officiated. On Monday morning the Queen, Prince Consort, and the Royal family walked and drove in the grounds. The Duchess of Kent visited the Prince and Princess Leiningen at Osborne Cottage. In the afternoon the Prince Consort went to Alverbank. Her Majesty, Princess Alice, Prince Arthur, and Prince Leopold afterwards embarked in the Fairy and crossed to Alverbank, where they were joined by the Prince Consort. The Royal party returned to Osborne at 8 o'clock. Viscount Sydney, Lord Chamberlain, arrived from London and presented an address to her Majesty from the House of Lords. On Tuesday the Queen and Prince Consort, accompanied by Princess Alice and Princess Helena, rode on horseback. The Duchess of Kent walked in the grounds in the forenoon, and took a drive in the evening. On Wednesday afternoon the Queen and Prince Consort, accompanied by Prince Arthur and Princess Hohenlohe, drove out and honoured Sir Thomas and Lady Cochrane with a visit. On Thursday morning Prince Alfred arrived from the Mediterranean.

THE PRINCE OF WALES arrived at Holyrood Palace on Friday evening, but as his visit to Edinburgh is for the purpose of continuing his studies, his movements were unaccompanied by any display. During his few weeks stay in the Scotch metropolis the Prince is to place himself under the tuition of Dr. Schmitz, rector of the Edinburgh High School, with an especial regard to historical studies and Italian literature.

RETURN OF PRINCE ALFRED.—His Royal Highness Prince Alfred landed at Dover on Wednesday afternoon, and proceeded to Osborne by an early train of the South Coast Railway on Thursday morning, having come home on leave of absence for some weeks. His Royal Highness left the Euryalus at Malta, and proceeded in the Banshee to Marseilles, from which place he travelled *incognito* to Calais, and there embarked for England.

PRINCE LUCIEN BONAPARTE is at present residing among the hills at Stanhope and St. John's, in Weardale, translating the Song of Solomon into the dialect of the county of Durham. He will proceed thence to Craven, for the purpose of translating the book into the Yorkshire dialect.

THE CABINET.—A Cabinet Council was held on Saturday at the official residence of the First Lord of the Treasury in Downing Street. Another Council was held on Wednesday, and another yesterday.

PARLIAMENTARY MOVEMENTS.—The last of the elections consequent upon the change of Ministry took place at Wicklow on Monday, when Lord Proby was re-elected without opposition.

THE CHANNEL FLEET, at present at Portland, will leave that anchorage, according to present arrangements, on Monday next, for Spithead, to undergo necessary repairs, when the crews will have leave of absence ashore.

VOLUNTEER RIFLE CORPS.—Mr. Sidney Herbert, as Secretary for War, has issued a circular to the Lords Lieutenants of counties on the future management and regulation of volunteer corps, whether artillery or rifle, which shall be hereafter embodied. This document is accompanied by a memorandum regarding the formation of these corps, but most of the details which it embodies have already been made public in the debates in Parliament and in other forms. At a public meeting held at Guildhall on Thursday, the Lord Mayor in the chair, it was resolved to form a rifle brigade under the title of the London Rifle Brigade, and Alderman Carter was requested to accept the colonelcy of the regiment, subject to the approval of Government.

## Foreign.

FRANCE.—The Emperor arrived at St. Cloud on Sunday morning from Turin. He reached the Lyons terminus at 10 o'clock, and proceeded by the railway round Paris to his destination. The Imperial carriage stopped at St. Cloud at 10.15, and in five minutes was at the Orleans Gate, which communicates with the Palace. The Empress, with the Prince Imperial, the attendants of the Palace, were assembled at the entrance to receive his Majesty. The Prince dressed in the uniform of the Imperial Guard, with a crown of laurel in his hand, ready to present to his father. When the Imperial carriage appeared it was hailed with cries of "*Vive l'Empereur!*" from the people of the railroad. The Empress, holding her son by the hand, came forward to meet the Emperor, who embraced her affectionately, and pressed the Prince repeatedly to his bosom. At noon his Majesty heard mass in the chapel of the Palace, and immediately afterwards received Prince Jerome, the Princess Marie Clotilde Napoleon, the Princess Mathilde, Prince and Princess Lucien Bonaparte and Princess Anna their daughter. The members of the Privy Council, of the Council of Ministers, the great officers of the Crown, and the officers and ladies of the Household were also received by the Emperor. On Tuesday evening his Majesty received the Senate, a deputation of the Legislative Body, and the Council of State. The Presidents of these bodies having addressed his Majesty in complimentary terms on the success of his Italian campaign and his safe return to France, the Emperor replied as follows:—

"Gentlemen,—Finding myself again in the midst of you, who during my absence have shown so much devotion to the Empress and to my son, I feel first of all the desire to address you, and then to explain to you the motives of my conduct. When, after a successful campaign of two months, the French and Sardinian armies pitched their camp before the fortresses of Verona, the struggle was evidently on the point of undergoing a change in a military as well as in a political point of view. I was fatally obliged to attack in front an enemy who was behind great fortresses, protected against any diversion on the flanks by the neutrality of the territories which surrounded him; and in commencing the long and sterile war of sieges, I found in presence of me Europe in arms ready either to dispute our success or to aggravate our reverses. Nevertheless the difficulty of the enterprise would never have shaken my resolution nor stopped the enthusiasm of the army had not the means been out of proportion with the results to be expected. It was necessary to resolve boldly to break through the barriers raised by neutral territories, and to accept the struggle on the Rhine as well as on the Adige. It came to this—to accept everywhere the support of revolution. More precious blood must have been shed, and more would have been shed already; in a word, to succeed it was necessary to stake what no Sovereign ought to stake, unless the independence of his country is in danger. If then I stopped short it was not from weariness or exhaustion, nor from a mistrust of the noble cause I wished to serve, but because a secret voice spoke within my heart—'the interests of France.' Do you imagine it cost me nothing to put a break upon the ardour of my soldiers, who, excited by victory, wished to advance? Do you suppose that it cost me nothing to brave the face of Europe to curtail from my programme the part which extends from the Mincio to the Adriatic? Do you imagine that it cost me nothing to behold noble hopes destroyed in honest hearts, patriotic hopes extinguished? I served Italian independence I waged war against the will of Europe. As soon as the destinies of my country were no longer perilled I concluded peace. And can it now be said that our efforts and sacrifices are a pure loss? As I said in my farewell address to my soldiers, we have a right to be proud of this struggle. In four combats and two battles a powerful army, inferior to none in organisation and bravery, has been destroyed. The King of Piedmont, once styled the Guardian of the Alps, has seen his country delivered from invasion, and the frontiers of his States extended from the Ticino to the Mincio. The idea of Italian nationality is admitted by its warmest adherents. All the Sovereigns of the Italian peninsula understand at last the imperious necessity of salutary reforms. Finally, after having given a new proof of the military power of France, the peace which I have just concluded will be fruitful in great results; the future will reveal them daily more and more. To the happiness of Italy, the influence of France, and the prestige of Europe."

On Thursday the Diplomatic Body had an interview, offered to the Emperor their congratulations on his safety and on his resolution to conclude peace. The Emperor in reply, said:—

"Europe was in general so unjust to me at the beginning of the war that I was happy to be enabled to conclude peace as soon as the honour and the interests of France were safe, and to prove that it could never have been my intention to overturn Europe and to provoke a general war. I hope now that all reasons for disunion will disappear, and that the peace will be of long duration. I thank the diplomatic corps for its congratulations."

A Conference, to settle the affairs of Italy, is to meet at Zurich in 10 days or a fortnight at the latest, and will be succeeded by a Congress, at which the great Powers will be invited to attend and take into consideration the arrangements necessary for carrying out the conditions of the treaty of peace. The Plenipotentiaries to the Conference to be held at Zurich are M. Bourqueney for France, and Count Colloredo for Austria. The representative for Sardinia has not yet been named, but it is even hinted that none will be appointed. The Austrian prisoners now in France, amounting to nearly 20,000, are about to be returned. Prince Esterhazy has arrived in Paris from Vienna on a special mission.

PORTUGAL.—Letters from Lisbon state that the young Queen had a rather severe attack of sore throat on Thursday, but was believed to be going on satisfactorily, when a relapse took place, and she died on Saturday. This melancholy event has caused great affliction at Lisbon.

SPAIN.—Several arrests were made last week at Seville, in consequence of the authorities having received information that disturbances were to break out during the night. The ramifications of a democratic conspiracy have been discovered.

PRUSSIA.—The *Prussian Gazette* publishes a leading article in defence of the attitude taken by Prussia during the last few months, and endeavours to prove that its policy has prevented an universal war. The article lays the chief stress upon the fact that a real and substantial basis for joining in the war was wanting. "Prussia," it says, "can draw her sword for Germany

and Prussian interests, but not for maintaining or re-establishing a state of affairs in Italy which Austria herself has recognised as not maintainable, nor for sustaining isolated articles in the treaties of 1815. The proposals for mediation made by Prussia were far more favourable than the preliminaries of peace which have now been agreed upon. Prussia, however, has no occasion to be dissatisfied with the unexpected turn matters have taken. Whilst discontinuing her military measures she awaits the further development of affairs with calmness." The following is a translation from the German of a despatch addressed by Lord John Russell to Lord Bloomfield, the British Minister at Berlin, on the subject of the war:—

"Foreign Office, June 22.

"My Lord,—Her Majesty's Government sees with great concern an indication manifesting itself in Germany to take part in the war which has broken out between France and Sardinia on one side and Austria on the other. It depends chiefly upon the moderate and sagacious behaviour of Prussia whether the present war is to be confined to Italy or extend to German territory, and perhaps to other parts of Europe. The Emperor Napoleon has declared that it is not his wish to attack Germany. It is hoped and believed that the Prince Regent of Prussia will not take part in an attack upon France. But it has been maintained that Germany is, if not directly, at least indirectly, threatened; that if she did not take part in a war on the Po she would soon have to defend herself on the Rhine; that the Austrian fortresses on the Mincio and the Adige were in reality the bulwarks of Germany against France. There is much loose and unproved assertion in this statement. The war between Austria and Sardinia has undoubtedly—perhaps inevitably—sprung from the state of things in Italy. Since 1815 Austria has exercised a supremacy *de facto* over the Italian States; in the course of the last few years Sardinia has favoured and fostered the passion of the Italians for independence. When Lord A. Loftus demanded from Count Buol a pledge that Austria would in no case order her army to cross her frontier in Italy without having previously come to an understanding with France, the reply was, 'No! I cannot give you that assurance, for it would be a surrender of our sovereign power. We shall not intervene in any State unless our aid is asked for, and in that case it will be granted, and the knowledge that it will be granted is the best preservative of order.' Consequently Austria was not prepared to give up the claim to a right of intervention in case she was appealed to for the latter, and Sardinia on the other hand would not give up the pretension to represent the sorrows and aspirations of Italy; but inasmuch as the King of Sardinia was not able to carry through such a dispute with his own force, he has demanded the assistance of the Emperor of the French, and it has been granted to him. I do not speak here of the immediate cause of the war—on this point my predecessor has already very completely developed her Majesty's views. But from the statement just made it is evident that the fundamental origin of the war is to be sought for in the diametrically opposite pretensions put up by Austria and Sardinia. This war has broken out without any reference to Germany. The assertion that the policy of France, when successful on the Po and the Brenta, will prove to be an aggressive policy on the Rhine, is a perfectly arbitrary assertion. The momentous question of involving the continent in war should not be decided on the ground of vague hypothesis and exaggerated apprehensions. Now, it is not a tenable statement that the fortresses on the Mincio and on the Adige are bulwarks of Germany. It must be borne in mind that the fortresses of Peschiera, Verona, and Mantua do not fall within the ancient limits of Germany; that, on the contrary, the whole territory from Verona to the Adriatic in the year 1792 formed part of a weak, unwarlike, and decaying Italian State. The utmost that can be said is that while many Germans look upon these fortresses as a bulwark of Germany, many Italians look upon them as a menace to Italy. The treaty of peace must decide about their future fate. The reasons adduced in favour of a war on the part of the German States thus being insufficient, very strongly resist so precipitate a course. The Prince Regent of Prussia will, in his wisdom, weigh the impolicy of exposing his country to be considered the champion of the maladministration of Italy. It cannot be necessary for the safety of Berlin and Magdeburg that the government in Milan and Bologna should be bad. But, in the eyes of the Italians, Prussia, should she appear in arms by the side of Austria, would be considered as a defender of everything Austria has committed and omitted. There is still another consideration of the utmost importance. Hitherto the war has produced but little excitement in France. As soon as the question of superiority in the field shall have been decided the two belligerent Powers will probably be strongly inclined to put a stop to this exhausting war. But should France, by a German attack, be called upon to defend her own frontiers, it is impossible to foretell to what pitch the passions of international hatred might not be inflamed, and for what space of time the continent of Europe might not have to suffer the desolations of war. You are already sufficiently informed of her Majesty's resolve, supported by the unanimous feeling of her people, to observe a strict neutrality. Her Majesty has kept this country free from all and every obligation which might interfere with her freedom of action. Her Majesty's Government entertains the hope that Prussia will adopt a course as nearly similar as the circumstances of Germany will permit. Possibly the time is very near when the voice of mediating friendly Powers will be able to make itself successfully heard, and when representations in favour of peace will no longer be without effect. Pray read this despatch to Baron Schleinitz, and leave a copy with him.

"I am, &c. "JOHN RUSSELL."

FRANKFORT.—In an extraordinary sitting of the Diet on Saturday Austria communicated the preliminaries of the peace, and proposed that the contingents should be returned and the Federal fortresses restored to a peace footing. Prussia further proposed that the former resolution of the Federal Diet, to assemble a corps of observation on the Rhine, be cancelled. In the sitting of Thursday both these proposals were unanimously agreed to.

AUSTRIA.—The following manifesto from the Emperor of Austria, signed at the Imperial Castle of Laxenburg, near Vienna, was published on Saturday:—

"When all concessions that were allowable, and compatible with the dignity of the crown and the honour and welfare of the country, have been exhausted, and when all attempts at a pacific arrangement have miscarried, there is no room for choice, and what cannot be avoided becomes a duty. This duty placed me under the stern necessity of demanding from my people new and painful sacrifices, in order to place in a state of defence their most sacred interests. My faithful people have responded to my appeal; they have pressed forward unanimously in defence of the throne, and they have made the sacrifices of every kind demanded by circumstances with an eagerness which merits my gratitude—which augments, if possible, the profound affection which I feel for them; and which was adapted to inspire the assurances that the just cause in defence of which my brave armies went forth with enthusiasm to the contest would be victorious. Unhappily the result has not corresponded with the general effort, and the fortune of war has not been favourable to us. The valiant army of Austria has in this instance again given proofs of its tried heroism and its incomparable perseverance so brilliant that it has commanded the admiration of all, even of its enemies. I experienced a legitimate pride in being the chief of such an army, and the country ought to feel indebted to it for having maintained vigorously, in all its purity, the honour of the Austrian flag. It is not less perfectly established that our enemies, in spite of the greatest efforts, in spite of the superior forces which they had for a long period been preparing for the conflict, have been able, even by making the greatest sacrifices, to obtain only advantages, not a decisive victory; while the Austrian army, still animated by the same ardour, and full of the same courage, maintained a position, the possession of which left a possibility of recovering from the enemy all the advantages he had gained. But for this purpose it would have been necessary to make new sacrifices, which certainly would not have been less bloody than those which have been made already, and which have deeply affected my heart. Under these conditions it was my duty as a Sovereign to take into serious consideration the propositions of peace which had been made to me. The consequences of the continuance of the war would have been so much the heavier, because I should have been obliged to demand from the faithful people of my dominions new sacrifices of blood and of money, much more considerable even than those which had been made up to that time. And, notwithstanding, success would have remained doubtful, since I have been so bitterly deceived in my well-founded hope that this contest not having been entered into for the defence of the rights of Austria only I should not be left alone in it. In spite of the ardent sympathy, worthy of acknowledgment, which the justice of our cause has inspired, for the most part, in the journals and peoples of Germany, our national allies, our most ancient allies have obstinately refused to recognise the great importance of the grand question of the day. Consequently Austria would have been obliged all alone to face the events which were being prepared for, and which every day might have rendered more grave. The honour of Austria coming intact out of this war, thanks to the heroic efforts of her valiant army, I have resolved, yielding to political considerations, to make a sacrifice for the re-establishment of peace, and to accept the preliminaries which ought to lead to its conclusion; for I have acquired the conviction that I should obtain, in any event, conditions less unfavourable in coming to a direct understanding with the Emperor of the French, without the intervention of any third party whatsoever, than in causing to participate in the negotiations the three great Powers which have taken no part in the struggle. Unhappily I have been unable to escape the separation from the rest of the empire of the greater part of Lombardy. On the other hand it must be agreeable to my heart to see the blessings of peace assured afresh to my beloved people, and these blessings are doubly precious to me, because they will give me the necessary leisure for bestowing henceforth without distraction all my attention and solicitude on the fruitful task that I propose to accomplish—that is to say, to found in a durable manner the internal well-being and the external power of Austria by the happy development of her moral and material forces, and by ameliorations conformable to the spirit of the time in legislation and administration. As in these days of serious trials and sacrifices my people have shown themselves faithful to my person, so now by the confidence with which they respond to me they will aid in accomplishing works of peace, and in attaining the realisation of my benevolent intentions. As Chief of the army, I have already expressed to it, in a special order of the day, my acknowledgments of its bravery. To-day I renew the expression of these sentiments. While I speak to my people I thank those of their children who have fought for God, their Emperor, and their country. I thank them for the heroism of which they have given proof, and I shall always remember with grief those of our brave companions in arms who have not, alas! returned from the combat.

"FRANCIS JOSEPH."

ITALY.—The new Sardinian Ministry is formed. Signor La Marmora is Minister of War and President of the Council; General Dabormida, Minister for Foreign Affairs; Signor Ratazzi, Minister of the Interior; Signor Egtana, Minister of Finance; Marquis Monticelli, Minister of Public Works; and Signor Miglietti, Minister of Justice. The post of Minister for Public Instruction is still vacant. Accounts from various parts of Italy state that the terms on which the two Emperors have made peace have given general dissatisfaction to the Italians. The King of Sardinia is said to have wept on hearing the conditions of peace; the Piedmontese army is equally disappointed, and the resignation of Count Cavour is the expression of the feeling of the whole country.

THE ADRIATIC.—All captured Austrian vessels will, according to the preliminaries of the treaty of peace, be given up. On Saturday the Austrian Lloyd's again began the running of their vessels to Venice. The line to Constantinople will be resumed on the 23d; to Smyrna on the 26th inst., and that to Alexandria on the 11th August. The lines to Corfu, Malta, Caramania, Barcelona, and to the Po are still suspended for the present.

INDIA.—The Bombay Mail of June 23, has arrived. The campaign on the borders of Onde is at an end. Sir Hope Grant has returned to Lucknow. Our regiments have been withdrawn into quarters and the entire frontier of Oude placed under Major Bruce's police. The rebels on the banks of the Sindh river have been totally defeated with the loss of many men by the cavalry under Captain Swiney, and the Jalowa Police, under Lieutenant Catavia. Cholera has broken out at Bombay, and as many as forty cases have been reported daily.

UNITED STATES.—General Cass has despatched to all the United States Ministers in Europe an important State Paper on the question of neutral rights, declaring that no articles will be deemed contraband of war by the United States except the direct and immediate munitions of warfare, such as powder, muskets, cannon, lead, and saltpetre; and that coal and breadstuffs are not contraband of war, and any attempt to construe them otherwise will be viewed as an encroachment upon American commerce. The broad doctrine is also reiterated that a free flag covers the cargo. On the 4th inst. the acrobat Blondin, who had previously walked across the Niagara river below the falls on a tight-rope, repeated the feat with his head in a bag, so as to blindfold him. Dr. Henry Northall, Acting British Vice-Consul at Gloucester, committed suicide on the 3d by hanging. Mrs. Everett, wife of Hon. Edward Everett, died on the night of the 2d inst., after a long illness.

# Parliament.

## HOUSE OF LORDS.

FRIDAY.—*Italian Affairs.*—The Earl of MALMESBURY in assenting to Earl GRANVILLE's request that he would postpone till a future day the motion he had on the paper on the affairs of Italy, said that at the same time he could not forbear from referring to the case of the Duchess of Parma, whose admirable conduct had won universal admiration, and expressed his opinion that it would be a bad example of public morality if she were not restored to her dominions. He protested against the statements of Count Cavour in regard to Parma, which he was ready to meet and to refute categorically, and show that they were destitute of foundation.—The Marquis of NORMANBY declared his willingness to postpone his motion, adding as testimony to the good conduct of the Duchess of Parma, and reprobating the policy of appropriation so systematically professed by Count Cavour.—The Marquis of CLANRICARDE vindicated Count Cavour, and said that he had shown during the whole course of his policy the utmost energy, honesty, and consistency.—Lord BROUGHAM called attention to the deplorable position of Europe, whose fate was allowed to depend upon the will of two despots, who made peace without consulting their allies, and without even the intervention of responsible Ministers.—The Earl of DERBY thought that Sardinia, which had occupied the first position, and to whom France only stood in the relation of an ally had been thrown entirely into the background. They had heard that peace had been concluded between France and Austria. He wished to know whether peace had been agreed to between Austria and Sardinia.—Earl GRANVILLE replied that Sardinia was understood to be a consenting party to the convention, but the Government had no information beyond that already known to the public.—Lord ELLENBOROUGH protested against our past policy of officious interference in the affairs of foreign States, as tending to destroy the influence of this country in the councils of Europe.—The Duke of RICHMOND said, that although he agreed in the policy of non-intervention he did not concur in the praise of Count Cavour, who had been, in his opinion, the cause of the war.—Lord STRATFORD DE REDCLIFFE thought the objection made against our interference by foreign States was more on account of the manner than of the thing itself, and cited the case of the late King of Naples as a precedent in point. He passed a strong censure on Count Cavour, who had excited the revolutionary party in Tuscany.—Lord WODEHOUSE expressed the willingness of the Government to discuss these matters fully when sufficient information had been obtained. He promised that the despatch moved for by Lord Normanby should be laid on the table. In regard to the papers moved for by Lord Malmesbury, he could not promise to lay them before the House, but the answer to them should be communicated to their lordships.—The *Clerk of the Council Bill* was read a second time.

MONDAY.—*Prussia and the War.*—The Earl of MALMESBURY asked whether the despatch of Lord J. Russell, date June 22d, and addressed to the Government of Prussia, which had appeared in the newspapers, showing that Prussia had no reason for going to war, and that the Italian fortresses were not in reality bulwarks to Germany, was authentic.—Lord WODEHOUSE said that the despatch, as it had appeared in the newspapers was authentic in substance. He explained to the House that the despatch was merely an exposition of the policy pursued by the late Government.—Lord BROUGHAM trusted that, as we had had nothing to do with the peace just concluded, we should not mix ourselves up with anything that might occur.—The Duke of NEWCASTLE said that the despatch of Lord J. Russell was suggestive, while that of Lord Malmesbury was of a threatening character.—Lord GRANVILLE agreed that the despatch of Lord Malmesbury was of a much less friendly character than that of Lord J. Russell. *Law Reform.*—Lord CRANWORTH laid on the table five Bills prepared by the Commissioners for Consolidating the Statute Law, and suggested that the Commission should be put under the superintendence of two or three gentlemen of eminence, with a staff of clerks who should have their energies to the completion of the work. In case of such suggestion being adopted, he thought the whole matter might be brought to a satisfactory conclusion in two years.—The Lord CHANCELLOR did not think that the object would be facilitated by continuing the Commission. He concurred in the suggestion of Lord Cranworth, and considered that such a staff of professional men might, besides consolidating the statute law of the land, be made extremely useful in their legal capacity to both Houses of Parliament in assisting members in framing Bills. He took the present occasion to state that the Government contemplated at the beginning of next session to introduce measures on bankruptcy, on the transfer of real property, on taking evidence in the Court of Chancery, to consolidate and simplify the orders of the Lord Chancellors, and to establish fixed courts, so that courts of common law might be able to decide any equitable question which might incidentally arise, without handing suitors from courts of common law to courts of equity.—Lord BROUGHAM said the difficulties of the question were too great to be decided by a mixed assembly, and thought it would be better that the question should be solely committed to a body of learned men, who might not only consolidate, but prepare a digest of it.—Lord ST. LEONARDS thought the labour which it was proposed to accomplish was enormous. The best course to bring the matter to a successful conclusion would, in his opinion, be to refer it to a select committee.—Lord WENSLEYDALE said that, although the labours of the Commission had been most valuable, he did not think them adequate to accomplish the object in view.—After a few remarks from Lords CHELMSFORD, CRANWORTH, and BROUGHAM the subject dropped.

TUESDAY.—*The Kinsale Riots.*—The Earl of ERROL read a letter from Lord Massareene, colonel of the Antrim Rifles, declaring that the accounts which had appeared in the newspapers relative to the disgraceful proceedings of that corps when quartered at Kinsale were greatly exaggerated. *Telegraphic to the Colonies.*—Lord STANLEY OF ALDERLEY presented a petition from bankers, merchants, and others, in favour of direct telegraphic communication between Great Britain and our colonies abroad, and showing the importance in case of war of having a direct communication with India in our own hands.—The Earl of ELLENBOROUGH concurred in the prayer of the petition. It was intolerable that this country should be dependent upon foreigners for the means of telegraphic communication.—Earl GRANVILLE admitted the importance of the subject, and said that it should receive due consideration. *The Principalities.*—In reply to Lord STRATFORD DE REDCLIFFE, Lord WODEHOUSE said that her Majesty's Government, after consulting the great Powers, had agreed to recognise Prince Couza as Hospodar of Moldavia and Wallachia, but only on the distinct understanding that it was an exceptional case, and not to be drawn into a precedent.

THURSDAY.—The LORD CHANCELLOR moved the second reading of the *Divorce Court Bill*. After adverting to the inconvenience which had been found to arise from the deficiency of judicial power in the new Court, he explained the remedy proposed in the present Bill, which would render the services

of all the puisne judges available for the business of the Divorce Court, and enable the Court to sit with closed doors in cases of great indecency. It also proposed to require the Attorney-General to watch petitions for divorce in cases where collusion may be suspected.—Lord BROUGHAM supported the Bill.—Lord CHELMSFORD opposed it on the ground that the judges had already quite sufficient to occupy their time; but after some discussion, the second reading was carried without a division. The *Public Health Bill* was read a second time.—In answer to Lord CARNARVON, the Duke of SOMERSET said the present Board of Admiralty were deeply convinced of the importance of making some arrangements in regard to *Malta Harbour*, both with the view of improving and deepening the harbour itself, and of strengthening its defences.

FRIDAY.—*Italian Affairs.*—The Marquis of NORMANBY asked if her Majesty's Government had received any information in reference to a statement in the recent speech of the Emperor of France to the effect that he had advised the Sovereigns of Italy to grant their subjects salutary reforms.—Earl GRANVILLE said he could not give any detailed information on the subject. The *Admiralty Court Bill, Jury Trial (Scotland) Act Amendment Bill,* and *North West Territories (British America) Bill* were read a second time. *Court of Probate Bill.*—Earl GRANVILLE moved the second reading of this Bill. [Left sitting.]

## HOUSE OF COMMONS.

FRIDAY.—*The French Fleet.*—In reply to a question by Lord WILLIAM GRAHAM, Lord JOHN RUSSELL said the Government had received no authentic information of any extraordinary preparations at Brest or Cherbourg, and they had, therefore, not thought it necessary to demand any explanation of the French Government on the subject. *The Treaty of Peace.*—In answer to Mr. HORSMAN, Lord JOHN said no communication had been made to her Majesty's Government as to the terms of the peace between France and Austria; that he had directed Lord Cowley to ask for an explanation of the exact terms of the treaty and of the mode in which it was to be carried into effect, and the answer was deferred until the arrival of the Emperor at Paris, who was expected on Monday.—Lord ELCHO entered into an explanation of the reasons which induced him not to press the resolution of which he had given notice, vindicating the policy of the late Government with reference to their foreign policy, more especially as regarded the war in Italy. He expressed ironical sympathy for Lord Palmerston and Lord John Russell, whose feelings at finding the freedom of Italy more remote than ever, must, he said, be truly deplorable, and who must both feel themselves "most horribly sold."—Mr. S. FITZGERALD said that had the discussion been proceeded with it would have been most inconvenient to her Majesty's present advisers, for it would have shown that they had got into power upon a misrepresentation of the policy of the late Government. Indeed, Lord J. Russell had since admitted that, so far from having a new and striking policy, he had, in fact, no policy at all, and was obliged to walk in the path chalked out for him by his predecessor.—Lord J. RUSSELL complimented Lord Elcho upon his discretion in retreating from the motion of which he had given notice; and, referring to the late war between France and Austria, said that he remained of the same opinion which he had enunciated before his constituents on a recent occasion, that neither of the belligerent Powers were entitled to the assistance of England. To this he would add that in his opinion the presence of the Emperor of the French in Italy would not be likely to consolidate the liberties of that country. In the present state of affairs, the influence of England should be employed to confirm and improve the general peace. Our policy was not to abandon a neutral position; that, he believed, had been the universal opinion of the people of this country. If we were called upon to consider a treaty of peace, we were bound not to participate in any treaty not conformable with our notions of the honour, the dignity, and the freedom of this country. The House then went into Committee of Supply, when the remaining *Army Estimates* were voted.—In the course of the discussion which ensued, Mr. S HERBERT explained the steps that had been taken to ensure a large supply of the Armstrong gun, and stated that two factories were in full work, and that it would be perfectly impossible by any further grant of public money to expedite the process of manufacturing those formidable weapons. The Committee then proceeded to consider the *Civil Servic Estimates*, when Mr. WILLIAMS moved that the Chairman report progress. On a division, the motion was negatived by 61 to 19. The House then proceeded with these estimates. On a vote for the induration of the stone of the *New Houses of Parliament*, Mr. FITZROY, in answer to a remark from Lord FERMOY, explained the measures which had been taken in the choice of the stone, and in preserving it where defective. He also stated that the clock tower was to be completed at once, as the idea of building a wing in Palace Yard had been abandoned, and no further buildings of any kind would be allowed without the sanction of Parliament. After a desultory discussion on the frescoes and ventilation of the Houses, various votes on harbours of refuge and other subjects were taken, after which the House resumed. On the order for the second reading of the *Municipal Corporations Bill*, Sir G. LEWIS explained the effect of the Bill, which he did not oppose.—Mr. S. ESTCOURT moved the adjournment of the debate.—Mr. HADFIELD supported the Bill.—The debate was ultimately adjourned. The *Newspapers &c., Bill* passed through Committee.—Sir G. LEWIS obtained leave to bring in a Bill to continue the powers of the Commissioners under an Act 19th and 20th Victoria, concerning the *University of Cambridge and Eton College.*—Mr. I. BUTT moved that the Select Committee on *Packet and Telegraphic Contracts* do consist of 21 members, and that Sir E. Grogan and Lord J. Browne be added to the committee. He complained that Ireland was not sufficiently represented in the Committee, as nominated by the Government.—The CHANCELLOR of the EXCHEQUER regretted that he could not accede to the motion. The object of the Committee was to examine into the policy of all these packet contracts, not into the Galway contract in particular.—Lord J. BROWNE, Colonel DUNNE, Lord DUNCAN, and Mr. WHITESIDE spoke upon the motion, which was negatived on a division by 134 to 47.—Mr. J. D. FITZGERALD obtained leave to bring in a Bill to amend the *Irish Bankruptcy and Insolvency Act* (1857).—Mr. DILLWYN moved that the Select Committee on the *Endowed Schools Bill* do consist of 17 members.—The motion, after some observations by Mr. HENNESSEY, Lord NAAS, and Mr. MAGUIRE, was agreed to.

MONDAY.—*The Stade Dues.*—In answer to Sir M. PETO, Lord J. RUSSELL said the question of the Stade Dues had been referred to the law officers of the Crown, who had recommended that the treaty be renewed for a limited period. It was therefore intended that the treaty should be renewed for six months. *The Budget.*—The House then went into a Committee of Ways and Means, when the CHANCELLOR of the EXCHEQUER made his financial statement. He presumed, he said, that it would be for the convenience of the Committee to follow the usual practice, and to make known the result of the finances of the past year. The total revenue of the year had been estimated at 63,900,000*l.*; it had produced 65,477,000*l.* The total actual expenditure had been 64,663,000*l.*, against a revenue of 65,477,000*l.*, leaving a surplus of 800,000*l.* The result of the duty upon draughts and cheques could not be correctly ascertained. Its amount had been estimated at 300,000*l.*; but he thought it would not exceed 200,000*l.* There was an exemption of cheques drawn by the proprietor and paid to him over the counter, and this exemption he should propose to remove. The equalisation of the spirit duties, which was a measure of fiscal reform independent of pecuniary results, had been estimated to yield an additional revenue of 500,000*l.*; but the produce in 1858-59, as compared with 1857-58, showed an increase of only 85,000*l.* There was a prospect, however, of the duty being considerably more productive. The estimated revenue of the current year was 64,340,000*l.*, and the estimated expenditure 69,207,000*l.*, so that there would be a gross deficiency in the current year of 4,867,000*l.* This being the time when it became the Committee to make adequate and effective provision for the wants of the year, it was likewise a time when its attention should be rigidly confined to the wants of the year, the charges being of an exceptional character, especially those for the army and navy. The Committee, therefore, were not to busy themselves with comprehensive plans of finance upon the present occasion; next year it would be necessary to enter upon larger views of our financial system, for next year the income tax would lapse, as well as certain war duties upon tea and sugar, and on the other hand, the Long Annuities would fall in. Her Majesty's Government, therefore, would not enter upon considerations of prospective finance; they confined themselves to temporary and almost provisional finance. He now asked the Committee to consider what modes of supply could be devised to meet the deficiency on the Estimates. This great question divided itself into two branches—whether we should attempt to raise the necessary funds by borrowing or by taxes? The sum required was between 4,000,000*l.* and 5,000,000*l.* This was a large sum to demand from taxpayers. On the other hand, it was a sum that had never driven the British Parliament to the expedient of augmenting the national debt, which nothing but dire necessity should induce it to do. It appeared to him that a loan ought not to be resorted to; that there never was a period when the people of England were more satisfied of the justice and necessity of the demands on the public purse, or more able or willing to meet those demands. There was another reason against resorting to a loan—namely, that the Secretary of State for India would soon again be a borrower in the market, on account of the exigencies of India. His observations applied not only to the creation of permanent debt, but to the issue of Exchequer Bills, the effect of which was not to throw off the burden upon posterity, but upon the year 1860, already charged to the very utmost. Then, if we were driven by considerations of justice and policy to the alternative of looking to taxes for the means of meeting the expenditure of the next year, should the taxation be direct or indirect? The articles for indirect taxation were malt, spirits, tea, and sugar. In his opinion, it was not desirable to propose an augmentation of the duty upon malt, and it would be unwise and premature to raise the question as to the general increase of the spirit duties; so that neither malt nor spirits held out the hope of a resource. With respect to tea and sugar, reminding the Committee that they were not dealing with prospective finance, but finance for the moment, he insisted upon the impolicy, in the interests of trade as well as for other reasons, amounting, he considered, to demonstration, of increasing the duties of Customs or Excise. This being so, they arrived at a point that might be easily anticipated—what they should do with the income tax. That tax had been originally introduced for two objects; first, to make reforms in our fiscal system; secondly, to meet sudden public exigencies; and when it was for the dignity, honour, and safety of the country that efforts should be made to augment the national defences, the income tax was, above all others, a regular and legitimate resource. The gross deficiency to be met, as he had stated, was 4,867,000*l.* In the first place, the Government were of opinion that the system of nearly six months' credit allowed to maltsters—whereby to that extent the Government found capital for the maltster, which was an exceptional privilege and bad in principle—might be modified; and they proposed to take away six weeks of the credit and to allow a discount of 4 per cent. on the payment. The effect of this would be to bring into the Exchequer before the 1st of April next a sum of 780,000*l.*, which would otherwise not be paid until the next financial year. This would reduce the deficiency of 4,867,000*l.* to a little over 4,000,000*l.*, and this it was proposed to raise by an augmentation of the income tax. The present rate was 5*d.* in the pound. An additional 4*d.* in the pound would give something over 4,000,000*l.* It would be necessary to re-introduce the distinction between incomes under 150*l.* and above that amount. He proposed that the additional 4*d.* in the pound on the mass of the income tax payers should stop at incomes of 150*l.*; and he proposed that the augmented tax should be leviable upon the first half yearly payment after the resolution should have been adopted by the House. The effect would be that in the autumn or winter quarter the tax upon all persons with incomes above 150*l.* a year would be 6½*d.*, or at the rate annually of 1*s.* 1*d.*, and 4*d.* upon incomes under 150*l.* This addition to the tax would produce 4,340,000*l.*, and this sum added to 780,000*l.* would give 5,120,000*l.*; deducting the deficiency of 4,867,000*l.*, there would remain a surplus of 253,000*l.* During the current year a sum of about 400,000*l.* would become due on account of the last payment of Long Annuities; but the state of the cash balances would render any provision to meet this demand unnecessary. He concluded by moving a formal vote of seven millions, and laid upon the table two resolutions relating to the malt duties and the income tax, to be taken into consideration on Thursday.—Mr. MALINS protested against the demand of the entire year's increase in the income tax in October next, and reminded Mr Gladstone of his repeated declaration in favour of the extinction of the income tax.—Mr. ALCOCK and Mr. GLYNN expressed their entire approval of the budget.—Mr MACARTNEY objected to the way in which the malt tax was dealt with.—Mr. CLAY admitted the necessities of the case, but demanded an adjustment of the grosser inequalities of the income tax.—Sir J. TROLLOPE trusted that the entire increase of the income tax would not be demanded in a single year.—Mr. HORSMAN objected to the present system of expenditure as too much for peace and too little for war.—Mr. ROEBUCK protested against the injustice of the income tax as applied to the earnings of professional men, who might at any time be disabled and deprived of all resource. After some further discussion the vote was agreed to, and the House resumed. On the order for going into *Committee of Supply*, a conversation arose upon an objection raised by Mr. AYRTON to fixing the second reading of the London Corporation Bill on Friday morning.—Mr. A. SMITH made some observations upon the management of the property under the Commissioners of *Woods and Forests.*—The House then went into Committee of Supply upon the *Civil Service Estimates* and *Civil Contingencies*, and various votes were agreed to, after much discussion, when the Chairman was ordered to report progress. Certain Bills were forwarded a stage.

TUESDAY.—At a morning sitting, Mr. LOWE moved the third reading of the *Public Health Bill.* When the Central Board of Health was abolished, the compulsory powers possessed by that Board, which could not be given to the local Boards, were vested in the Privy Council by an Act which had been continued from year to year, and would expire in a few days. The Bill proposed to make this Act perpetual, with certain modifications, not conferring upon the Privy Council any general compulsory powers. He explained at some length the scheme and main provisions of the measure. After a long debate the House divided upon an amendment moved by Mr AYRTON that the order for the third reading be discharged, which was negatived by 101 to 95, and the Bill was read a third time. On the order for the second reading of the *Municipal Corporations Bill*, Mr. S. ESTCOURT objected to proceeding with the Bill, which repealed certain statutes, without a previous inquiry into the whole subject before a Select Committee, and he moved an amendment to that effect. The Bill was opposed by Mr. SPOONER, Mr. NEWDEGATE, and Mr. HENLEY, and supported by Mr. M. SMITH, Mr. BAXTER, Alderman SALOMONS, and Mr. HENNESSEY. On a division, the amendment was negatived by 130 to 44, and the Bill was read a second time. *Indian Army.*—At the evening sitting Mr. BUXTON called attention to that portion of the report of the Commissioners on the Organisation of the Indian Army, recommending that the amount of force to be maintained in future shall be 400,000 men, one-fifth of the number being Europeans. It was of vital consequence that we should reduce our expenditure in India; but if such an enormous force was kept up this could not be done, and in the meantime objects of improvement were delayed, and the maintenance of so large a European force as 80,000 men to keep in check 320,000 native troops would seriously interfere with our home defences. He asked whether Lord Stanley concurred in opinion with the Commissioners as to the amount of force which should be maintained in India.—Lord STANLEY said that it was impossible for any man to lay down distinctly and precisely what was the amount of the force that would be required in India. The question did not admit of a positive answer. He noticed the discordant opinions upon this point entertained by various witnesses examined by the Commissioners, observing that Sir John Lawrence thought there should be a large preponderance of European force.—Sir E. PERRY considered that instead of augmenting our army in India, it should be diminished by governing India in co-operation with the natives and engaging their sympathies. He advocated the introduction of the irregular system into our military establishment in India, the effect of which would be materially to reduce the expenditure.—Colonel SYKES was of opinion that 50,000 men would be quite sufficient European force for India.—Mr. SMOLLETT said, unless some practical measures of amelioration were adopted, the resumption of lands stopped, and an end was put to proselytism, there would never be financial prosperity in India.—After some remarks by Mr. KINNAIRD, Mr. HADFIELD, and Mr. VANSITTART, Mr. BRIGHT observed that this debate involved a question of so much importance that even Reform or home finances could not match it, and he warned Sir C. Wood to lose no time in asking the opinion of the House of Commons upon the subject.—Sir C. WOOD said he was anxious to bring the subject of Indian finance before the House as soon as correct information had been received, and to deal frankly with the House, keeping nothing back. With regard to the matter immediately under discussion, he agreed with Lord Stanley that it was quite impossible at present to say what amount of force should be maintained in India. *Winter Session of Parliament.*—Mr. C. FORSTER moved an address to her Majesty representing the inconvenience of protracting the session of Parliament during the summer months, and praying her Majesty to provide a remedy for such inconvenience by assembling Parliament for the despatch of business before Christmas. He dwelt upon the evils resulting from a summer sitting, and reminded the House that the custom in former years was to meet in the autumn and prorogue in May.—The motion was seconded by Mr. W. EWART.—Mr. BENTINCK thought the mover and seconder had mistaken the real evil to be remedied, which was that of long speeches. The House could not be converted from politicians to men of business. The whole system of the House was one of procrastination and delay.—Mr. A SMITH suggested that the business of the session should commence in January of each year.—Mr LIDDELL thought the proposed change would make a serious inroad into the habits of English life.—After some remarks by Colonel FRENCH, Lord C. HAMILTON, and Mr. CLAY, Lord J. RUSSELL said that there was much more business to be done now than in former times, and recommended that the motion should not be pressed.—Lord PALMERSTON could not see that Mr. Forster had shown any public grounds for the change he proposed, which would necessitate other changes and cause many inconveniences, including the physical annoyances of a winter sitting. He thought nothing would be gained by the change in regard to the despatch of public business. In cases where Parliament had met before Christmas it had sat just as late in summer as when it met in January or February. On a division the motion was negatived by 121 to 48.—Mr. BAINES moved for a select committee to inquire into the nature and extent of the *Queen's Printers' Patent* for England and Wales, so far as relates to the right of printing the Holy Scriptures, and to report their opinion as to the propriety of any future grant of that patent.—Sir G. LEWIS was ready to assent to the motion for an inquiry, but he did not accede to the doctrine that a change of the present system would be attended with any practical benefit. The presumption was always against monopoly and restraint, but the monopoly in this case was entirely confined to the authorised version of the Holy Scriptures, without notes, and the principle acted upon in this country was that there should be some authentication, which was secured in Scotland by the Bible Board. Although he was no advocate of a monopoly, he did not believe that the proposed change would render the editions of the Bible more accurate or less expensive.—After some observations by Mr. BLACK, Mr. CROSSLEY, Mr DUNCOMBE, and Mr. HADFIELD, the motion was agreed to. *Irish Ministers.*—Mr SCULLY moved an address for a return of all Ministers of the Crown appointed since the Act of Union, and of all persons appointed to the offices of Lord-Lieutenant of Ireland, Chief Secretary for Ireland, and Lord High Chancellor of Ireland. His object in moving for this return was to ascertain how many Irishmen and how many Roman Catholics had filled those offices.—Lord C. HAMILTON opposed the motion, which was supported by Mr M'CANN.—Sir G LEWIS said that the information which the return would give was already in the library of the House, and the motion was negatived.—Mr. M'MAHON moved for leave to bring in a Bill to amend certain laws and statutes relating to the admission of *Barristers and Solicitors to practise in Ireland.*—Mr. WHITESIDE opposed the motion, considering the Bill uncalled for and unnecessary.—After a short discussion, in which Mr. BRADY, Mr. MALINS, and Mr. DEASY took part, upon a division, the motion was carried by 179 to 128.—Sir G. LEWIS obtained leave to bring in a Bill to extend the powers of the *Conservators of the River Thames*, with a view to its purification.—Mr. WHITESIDE obtained leave to bring in a Bill to amend the *Medical Acts. Dover Mail Contract.*—Mr. E. BOUVERIE brought under consideration the petition of Sir W. Russell, and moved an instruction to the Select Committee on Packet and Telegraphic Contracts not to proceed to inquire into the mail packet contract for the conveyance of mails between Dover and Calais, and between Dover and Ostend, until the petition of Sir W. Russell, complaining of an undue election and return for the town and port of Dover, shall have been disposed of.—Sir S. NORTHCOTE said it was the wish of his party that this question should be fully and fairly discussed, and that the truth should be brought out.—Mr COWPER supported the motion, which was opposed by Mr WHITESIDE and Mr. HENLEY.—The CHANCELLOR of the EXCHEQUER moved as an amendment that the petition be referred to the select committee on packet contracts. After some further discussion, in which Sir F. BARING, Mr. DISRAELI, and Lord PALMERSTON took part, the amendment was withdrawn, and the original motion was negatived, on a division, by 223 to 1. The orders of the day were then disposed of.

WEDNESDAY.—Mr BLACK moved that the *Edinburgh, &c., Annuity Tax Abolition Bill* be read a second time, and urged the oppressive nature of the tax, not only from its inherent injustice, which made it a grievance, but when compared with Church rates in England and Ministers' money in Ireland.—Mr BLACKBURN objected to the Bill that it disendowed the Established Church of Scotland, and desired therefore to know the intention of the Government regarding the measure.—Sir G LEWIS said he assented to the principle embodied in the Bill; but in voting for the second reading he assented simply to the abolition of the tax in its present form, and he

expect that it might be in the power of Government next session to propose some plan that would provide a substantial substitute for the tax; and he undertook next session, if they remained in office, to bring forward a measure founded on that principle.—Lord ELCHO considered the principle of the Bill so obnoxious and so dangerous—sweeping away the foundation of the Established Church—that although anxious for a compromise, he felt bound to vote against the second reading. He therefore moved to defer it for three months.—This amendment was seconded by Mr W. MILLER.—The second reading of the Bill was supported by Sir T. E. COLEBROOKE, Mr. CAIRD, and Mr. BAXTER, and opposed by Mr C. BRUCE and Mr NEWDEGATE.—The LORD ADVOCATE said that he had no doubt that an adequate substitute would be found for this tax, but he hoped that Mr Black would not persist in going into committee, as it would be hopeless to attempt to pass the Bill this session.—After some further discussion Mr BLACK consented to proceed no further with the Bill after the second reading, and wait until next session for the Government measure. On a division, the amendment was negatived by 162 to 108, and the Bill was read a second time.—Mr J. LOCKE in moving the second reading of the *Weights and Measures Bill*, said that it was almost precisely similar to that introduced in the last Parliament. After much debate, the Bill was read a second time, with the understanding that the first clause, providing that corn should be uniformly sold by measure, and the imperial measure only, would be withdrawn in the committee.—Mr. M. MILNES moved the second reading of the *Diplomatic Pension Bill*, the object of which was to exempt the recipients of such pensions from the operation of the Act, 6 & 7 Anne, which excluded persons in the receipt of pensions under the Crown from a seat in that House.—Mr WILSON, on the part of the Government, assented to the Bill, and several members spoke in its favour. The Bill was then read a second time.—Mr COWPER withdrew the *Metropolis Carriage Wares Bill*, in order to introduce a measure of a more comprehensive character. The *Church Rate Commutation Bill*, the *Adulteration of Food Prevention Bill*, and the *Public Improvements Bill* were also withdrawn. The *Imprisonment for Small Debts Bill* was read a second time.—**Mr. WHITESIDE, in moving the second reading of the *Criminal Procedure Bill*, defended that part of the measure which did away with the forfeiture of goods and the attaint of blood in case of treason. He adverted to another Bill—the *Public Justice Offences Bill*—and justified the abolition of the punishment of death in cases where there was no premeditated design to take away life.**—The ATTORNEY GENERAL said it would be his duty and that of the Solicitor-General, with the sanction of the Government, to bring the statute law of the country, and especially the criminal law, into a proper condition, and the result of their labours would be laid before Parliament at the beginning of the next year. He indicated the principles which, he said, would guide them in dealing with the criminal law.—After a few words from Mr. JAMES, Mr WHITESIDE withdrew these and his other Bills of law reform. The *Judgments (Ireland) Bill* was read a second time.—Mr. CLIVE obtained leave to bring in a Bill to confirm certain provisional orders under the *Local Government Act*.

THURSDAY.—*The Budget*.—On the question that the House resolve itself into a Committee of Ways and Means, Mr. DISRAELI made some observations on the present financial condition of the country. Having reviewed the steps taken by the late Government, which, he said, would have left a surplus of a million and a half had it not been for the extraordinary expenditure for defensive purposes, he defended the Administration of which he had been a member from the attacks on their financial policy. Passing then to the means by which it was intended to meet the deficit of five millions, he expressed his satisfaction that it was proposed to raise the necessary ways and means by direct taxation rather than by a loan. He was prepared on the whole to support the proposition of the Chancellor of the Exchequer, although he confessed he would like to see it modified in practice. In his opinion it was quite unnecessary that the whole of the additional income tax should be levied within six months from the present time. Its collection in the manner contemplated would add to the severity of the pressure, be productive of positive acts of injustice, and be in some instances absolutely impracticable. Under these circumstances he should move an amendment, the object of which would be to extend the charge over the whole year. He was aware that the expenditure of the year had been heavy, but who could say that it was unnecessary? He hoped that the extraordinary nature of that outlay would not prevent the House of Commons from voting the civil service estimates which related to justice, education, and public health, the three great sources of national wealth and national vigour. To curtail the expenditure in these respects would be to make war upon civilisation and to stop the car of progress. Attention to our foreign policy was the true secret of retrenchment. He approved of the peace concluded between France and Austria, because it had been settled without disturbing the political equilibrium, which England had always declared to be one of its chief objects. As that arrangement was, in his opinion, eminently for the well-being of Europe, he sincerely hoped that we, who professed neutrality, would not interfere in any of the congresses which were said to be in contemplation. It was urged against the Emperor of the French that he had not realised the war programme with which he had started; but what conqueror had ever realised his programme? In the history of the world no original design of conquest had ever been accomplished. It was our duty to cherish and maintain a peace favourable to the traditional policy of England. In order to do this we must invite the Emperor of the French to diminish his armaments; and if he did so, the Chancellor of the Exchequer need have no apprehensions on the score of his next year's budget, and the country might at last behold the extinction of the income tax.—The CHANCELLOR of the EXCHEQUER said that there would be neither injustice nor difficulty in levying the whole of the additional income tax in the course of the next six months. With regard to the public expenditure, it would be vain to check it, unless Parliament returned to the economical spirit by which it had been animated previously to the Russian war. He denied that Mr Disraeli was justified in saying that no war programme had ever been realised, but he agreed with him that we should strive to make peace permanent in Europe, although the Government would reserve to themselves the right of determining in what manner they should assist in securing that end.—Mr. BRIGHT ridiculed the war panic which had taken possession of the country, and deprecating a continued adherence to the "old, bloody, ruthless traditions of the Foreign Office;" expressed a hope that the tariffs of England and France might be so relaxed that the two countries might be drawn towards each other by the strongest relations of mutual respect and advantage, and that the strife unceasingly maintained between England and France through 1800 years of professed Christianity might at last be compensated by something approaching to Christian practice.—Lord J. RUSSELL exonerated the Emperor of the French from entertaining any designs hostile to this country, and said that it had ever been the wish of that great Sovereign to diminish protective duties. He had been a true and faithful ally to us, and there was no pretence for saying that his sentiments towards this country were inconsistent with the permanence of the alliance which now existed.—Lord PALMERSTON stated his conviction that if the late Government had employed the means at their command they might have prevented the rupture which took place between France and Austria. Mr. Disraeli had recommended the House not to interfere, by congress or otherwise, in the Italian question; but the policy which her Majesty's Government would adopt in that respect must depend altogether upon circumstances. The interference of England had in many instances contributed to the welfare of Europe, and Belgium, Greece, Spain, and Portugal were cases in point. If the good offices of England could be employed to make peace more permanent, and secure for Italy the blessings conferred upon other European States, they should not be wanting. After remarks from Mr S. FITZGERALD, Colonel SYKES, Sir H. VERNEY, and Mr WHITESIDE, the House went into Committee of Ways and Means, when the CHANCELLOR of the EXCHEQUER proposed his first resolution, imposing an additional income tax of 4*d*. in the pound.—Sir H. WILLOUGHBY moved that the tax be reduced from 4*d*. to 3*d*. in the pound. After a short discussion the amendment was negatived without a division.—Sir H. WILLOUGHBY then moved another amendment to the effect that the dividends on the Long Annuities, payable in October next, be chargeable with one farthing in the pound only. This amendment was also negatived **without a division, and the first resolution was agreed to.—Mr. DISRAELI then proposed an amendment, the effect of which was to distribute the tax over 12 months instead of six.—The CHANCELLOR of the EXCHEQUER resisted the proposition, and** declared with great emphasis that engagements might possibly have to be met of which the committee had no conception at that moment.—Mr. DISRAELI said that the Chancellor of the Exchequer ought to have fully revealed the true financial position of the country, and withdrew his amendment. The resolution was then agreed to, as was also that relating to the malt credits. The report of supply was brought up, and agreed to. The *Consolidated Fund (Appropriation) Act*, and the *Criminal Justice, Middlesex (Assistant Judge) Bill* were read a third time and passed. On the motion for the second reading of the *Ecclesiastical Commission Bill*, Mr. FREELAND opposed the motion, and moved the adjournment of the debate.—Sir G. C. LEWIS explained that the object of the Bill was simply to diminish the cost of the conveyance. On a division, the motion for adjournment was negatived by 75 to 62. The Bill was then read a second time. On the motion of Sir W. SOMERVILLE, the order for resuming the adjourned debate on the *Roman Catholic Relief Bill* was discharged on the ground that there was no chance of its passing this session.—Sir M. PETO moved for a select committee to inquire into the *Present State of the Thames*, and to suggest such remedies as may be deemed expedient for its improvement.—Mr. P. BLACKBURN moved the adjournment of the House.—Lord PALMERSTON and other members said that at this period of the session a committee would be of little use. The motion for the adjournment was ultimately carried without a division.

FRIDAY.—*Foreign Policy*.—Lord ELCHO gave notice that on Monday week he will move a resolution that it would be inconsistent with the dignity of this country to take part in any congress or conference to settle the terms of peace between the Emperors of France and Austria.—Lord J. RUSSELL said that on Thursday or Friday next he should be in a position to make a statement with regard to our foreign relations.—Mr. GRIFFITH wished to know whether there is a provision in the treaty of Villafranca that the late dynasties of Tuscany, Modena, and Parma are to be restored, if necessary, by military force; and if so, whether her Majesty's Government were prepared to take part in any Congress having that object.

[Left sitting.]

## City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 94⅞ to ¾ for Money, and 94¾ for Account; Bank Stock, 223; Three per Cents. Reduced, 95⅛ to ⅜; New Three per Cents., 95 to 95⅜; India Stock, 220½; Indian Four per Cent. Debentures, 1858, 95; ditto 1859, 94⅜; Scrip of New Indian Loan, 94¾; India Bonds, 1*s*. to 6*s*. dis.; Exchequer Bills, 27*s*. to 30*s*. pm.—FOREIGN: Brazilian Four and a Half per Cents., 1858, 94¼; Belgian Four and a Half per Cents., 97; Dutch Two and a Half per Cents., 65¼; Ditto Four per Cent. Certificates, 100¼; Portuguese Three per Cents., 1856, 1857, 1859, 44; Russian Four and a Half per Cents., 99⅜; Turkish Six per Cents., 1854, for Acct., 81 to 79½; Ditto 1858, for Acct., 70 to 69¼.

## Gazette of the Week.

TUESDAY — BANKRUPTS — J. L. CASTLE, Moreton-in-the-Marsh, Gloucestershire, Linendraper — A. HARRIS, Railway Place, Shoreditch, Tobacconist — W. NEWTH, Cradley Heath, Staffordshire, Miller (and not Maker, as in the "Gazette" of 12th inst.) — R. PROCTOR, Liverpool, Corn Merchant — K. SMITH, New Cross, Stonemason — T. THOMPSON, Pocklington, Yorkshire, Cabinet Maker — W. WIGGINTON, Bourne End, Bucks, Coal Merchant.

BANKRUPTCIES ANNULLED — W. D. SMITH, High Street, Shoreditch, Ironmonger.

SCOTCH SEQUESTRATIONS — J. DUNCAN, Rosemarkie, Innkeeper — C. T. GRAY, Inverness, Hotel Keeper — H. HAMILTON, Hamilton, lately Commission Merchant in London.

FRIDAY — BANKRUPTS — L. BURTON, Melton Mowbray, Upholsterer — W. CARR, Liverpool, Coal Merchant — A. HEATH, Sheffield, Provision Dealer — H. L. JONES, Chester, Grocer — J. MARSDEN and T. B. INGHAM, St Helen's, Lancashire, Glass Manufacturers — G. PEARCE, Farnham, Surrey, Builder — R. T. RICHARDSON, Kingston-upon-Hull, Grocer — W. O. TUCKER, Lea Bridge Road, Essex, Builder — R. WESTCOTT, Whitley Crescent, Reading, Butcher — J. T. WRIGHT, Brighton, Upholsterer.

SCOTCH SEQUESTRATIONS — J. GUNN, Portobello, Commission Agent — R. RUSSELL, Stonehouse, Lanarkshire, Contractor and Mineral Borer.

## Metropolis and its Vicinity.

THE EARL OF DERBY ON THE TREATY OF PEACE.—On Saturday a dinner was given by the Conservative party to their two Parliamentary leaders, the Earl of Derby and the Right Hon. B. Disraeli, in the hall of the Merchant Taylors' Company, in Threadneedle Street. It was attended by an imposing array of about 300 guests, all more or less well known for their adhesion to the Conservative cause, the Earl of March presiding as chairman and the post of vice-chairman being occupied by the Marquis of Bath. In returning thanks for the toast of the evening the Earl of Derby spoke at great length, and in the course of his speech made the following remarks on the war in Italy and its results:—

"It is impossible for me, speaking at this critical period of our history, not to advert in a few words to the circumstances in which we found ourselves at the moment when the late Government left office. And if there were any other consideration which would induce me to recommend to you a careful abstinence from vexatious opposition, it would be found in the fact that at no time in my memory has this country been placed in a position of greater difficulty, greater anxiety, or greater uncertainty with respect to the future, than at the present hour. We have the satisfaction of knowing that in the minds of English statesmen of all parties, and in the minds of foreigners, the production of the papers lately laid before Parliament has proved that we maintained in practice as we had professed, the strictest and most impartial neutrality. If we tendered in vain our exhortations and our entreaties, it was not for want of earnestness or of impartiality that they failed in preventing the two parties, both previously determined on war, from taking that last and most fatal step. That war has for the moment terminated, and every friend of humanity must rejoice in the cessation of the effusion of those torrents of human blood which have been poured forth so promptly and so recklessly at Magenta, at Solferino, and other places in Italy. It is too early to speak to you of the exact conditions of this truce or peace. But I confess to you that, from the information we at present possess, I look to the state of affairs arising out of the peace as more critical and dangerous than anything which existed before. In my opinion, as I have avowed on former occasions, that war was commenced upon insufficient grounds and on false pretexts; for of all those purposes which were put forward to justify the war, there is not one which has been supported or attained by the struggle which has taken place; there are several which are placed in positions of greater jeopardy than they stood in before the war. I, who honour constitutional governments—I, who, in common with the true friends of liberty, looked with the most earnest admiration upon the example of the kingdom of Sardinia struggling into a state of constitutional freedom, avoiding the excesses of despotism on the one hand, and of unlimited license on the other, saw with pain that its Government were not content with the enjoyment of its own liberties and its own constitution—were not satisfied with making that constitution by its effects upon their happiness and domestic comfort an example which the rest of Italy might copy—I saw them, I say with regret, depart from that constitutional course, endeavouring to excite animosity, dark intrigues, and machinations among other States, and for that purpose maintaining armies ruinous to their own finances, and which have proved destructive to their own comfort. I foresaw that in inviting the co-operation of a powerful neighbour against the fancied apprehension of invasion on the part of Austria, they were in effect bringing down on themselves, as well as upon the rest of Italy, the most serious dangers and the most inevitable calamities. And what, I ask you, has been the result of this effusion of the blood of 100,000 men—for not less than that number have been put *hors de combat* in the course of this campaign? What was the plea? The presence of the foreigner in Italy, the mal-government of the Papal States, the discontent and dissatisfaction of the inhabitants, and the necessity of liberating them from a foreign yoke, and leaving them free to choose their own form of Government. At the expiration of this struggle what are the terms upon which, as far as we know, this peace has been made, and what are the advantages which have been gained to the freedom of Italy by all this carnage? The Milanese, the possession of which was recognised by the Emperor Napoleon as the just patrimony of Austria, as long as she confined herself within her own limits, and from which there was no pretence for driving her, Austria has renounced. Has Milan the choice of a Government? No! But all is settled. France accepts from Austria the gift of that very territory which it was contended Austria had no right to, and France contemptuously flings it over into the hands of her supporter Sardinia. I am not saying that the Italian nations had no cause to complain of the Governments under which they were placed; but if the freedom of Italy was her anxiety what would have been the course of Sardinia? That country has annexed Lombardy with the consent of her powerful supporter—with what satisfaction to the inhabitants of Lombardy and even of Piedmont remains yet to be seen. She has sought to annex Modena, Parma, and Tuscany; but she has had a veto put upon the ambitious projects which she entertained, and the result of all her efforts and machinations has been this—that Tuscany, Modena, and I hope Parma, are by the authority of the foreigner, and perhaps of Piedmont itself, to be restored to their former position. What has been done for the improvement of the Government of the Papal States? Nothing! But we are told there is to be an Italian Confederation of all the States under their former rulers, including Venetia under Austria. That Confederation, including Piedmont itself, is to be subject to the presidency—the honorary presidency—of the Sovereign Pontiff of the Roman States. These are the results to the promised liberty of Italy from the carnage which has taken place. Do not understand me to be pronouncing any opinion with respect to the probable effect of this truce. But one result I think is inevitable, which is that those friends of liberty, whether of liberty in excess or in moderation, but more especially those friends of extreme liberty, whose hopes and expectations have been excited by the interference of France and Sardinia, will be deeply disappointed at the failure of their cherished anticipations. Far better would it have been to hold out no hopes at all than by foreign intervention to encourage and excite those hopes and then dash the cup to the ground from the lips of a sensitive people, with all the possible consequences of that disappointment. I rejoice that the war, under any circumstances, has been stopped where it has been. I give the Emperor of the French the highest credit for the various motives of humanity and policy which dictated the course he has taken in thus early putting an end to the horrors of war, because I believe that a very little more and the conflagration would have extended over the whole of Europe, and it is impossible to say at what time the termination of this war would then have taken place. But I say this position of affairs gives room for serious thought and anxious consideration to England. The passions of men throughout Europe have been excited. Great armaments have been brought together. Above all, in France that strong military feeling which used to be predominant in that country, but which for a time appeared to have been lulled to sleep, and had given way to feelings of peace—this military ardour has been again called forth, and the sudden cessation of the war has not permitted the passions which have been so kindled to be satisfied. France has now not only a powerful army, but she is continuing to increase in efficiency a most powerful and most threatening fleet, which is by no means necessary for purposes of self defence. France may safely rely upon her army, but her powerful fleets must be to the other nations of the world an object, not of self-defence, but of aggression. I believe sincerely that the Emperor of the French is desirous of maintaining friendly relations with this country, and I earnestly hope they may be maintained. But I say those friendly relations will be imperilled if, in order to guard against the possibility

of an alteration of feeling on his own part or on that of his country, we are obliged to make the almost superhuman efforts which we are making and must continue to make for the purpose of keeping our navy in that state of warlike preparation which is essential to the very existence of this country. I say we desire to remain at peace, and that desire, I am sure, is shared in by the present Government; but the position of France at this moment with her powerful army, with a large and increasing navy, and the military spirit awakened in the people, whatever may be the personal objects and wishes of the Emperor, must endanger the friendly relations which should exist between us, and may lead to a war which must be fatal to the happiness and interests of Europe. I look with anxioty but with confidence to my countrymen that they will not suffer this or any other Government to slacken in those efforts which are imperatively necessary to place this country on a footing of perfect security. However much I may trust in the good feeling, the good wishes, and sound policy of the Emperor of the French, I echo the noble sentiment uttered the other night by my illustrious and venerable friend Lord Lyndhurst, that, whatever confidence I may have in others, I will not consent to be dependent for the safety, honour, and interests of this country on the good-will or forbearance of France, or any other country in the world. Gentlemen, earnestly desirous as I am for the preservation of peace, I am satisfied that you go along with me in saying that it is the first duty of this country to be thoroughly prepared for self-defence; that no false economy, no niggardly parsimony, must deprive her of the best and most earnest efforts to strengthen and improve her national defences. I am certain of this, that whatever demands may be made, whatever sacrifices may be asked for, by whomsoever, or by whatsoever Government these sacrifices may be called for, or those demands may be made, they will be cheerfully and cordially assented to, at all events, by those whose boast it is to be the great Conservative party of this country."

CONCESSIONS TO THE ROMAN CATHOLICS.—A deputation convened by the South West London Protestant Institute waited upon Lord Palmerston on Monday to remonstrate against the concessions now demanded on behalf of the Roman Catholics. Mr. Kinnaird, M.P., after introducing the deputation, stated that the memorialists viewed with alarm the extreme danger that would result to the peace and well-being of the British empire from granting the further concessions now demanded on behalf of the Roman Catholics. The concessions sought for were—1st. The admission of Roman chaplains into gaols and workhouses on the same footing as the Protestant chaplains and ministers of the Established Church. 2d. The proposal to admit Roman Catholic barristers into the office of the Lord Chancellor of Ireland. The memorialists brought further under his lordship's notice a concession already granted to the members of the Church of Rome, whereby, owing to a partial administration of the law, all Romanists were especially exempt from the operation of the Act entitled "The Charitable Trusts Act." Mr. Kinnaird, M.P., Mr. J. C. Colquhoun, Sir C. Burrell, M.P., Mr. Newdegate, M.P., Mr. Langton, M.P., and other gentlemen having addressed the Premier in support of the memorial, Lord Palmerston in reply said—

"He presumed the deputation met as a political body, and he would not therefore enter into the religious aspect of the question. He had no hesitation in saying that Roman Catholic ascendancy was inimical to civil and religious liberty, but he did not think it fatal, as appeared from the cases of Belgium and Piedmont; still he did not desire to see the experiment tried in this country, and against such a state of things there were several Acts of Parliament. But the practical question for them to consider was how, when a population consisted of a portion of Roman Catholics, they were to do what was equitable and just, so that men of every creed might have an opportunity of enjoying their religious convictions. He thought Roman Catholic priests should be set apart for Roman Catholics in gaols, and be under the control of the governor. To meet the case of the workhouses an Act of Parliament would be necessary. The Lord Chancellor of Ireland had but two livings at his disposal in Dublin. He hoped, however, the matter would be referred to a select committee and all the details necessary would then be brought out. He had, as advised, given his support to the Bill because it appeared to him that the office was mainly if not altogether for the exercise of judicial functions. But if the case proved to be as it was represented by the deputation, he should be disposed to reconsider the subject. All such details would be fit matter for inquiry, and he thanked the deputation for bringing the matter thus to his notice. As to the Charitable Trusts Act, the delay in not subjecting the Roman Catholic charities to the commissioners' board was caused by the Government not having had time."

BANQUET TO MR. CHARLES KEAN.—On Wednesday evening a grand banquet was given in St. James's Hall to Mr. Charles Kean, in commemoration of his retiring from the management of the Princess's Theatre. It originated with a number of his contemporaries at Eton, comprising many who are now distinguished for rank and wealth, or eminent as statesmen, authors, or soldiers. The Duke of Newcastle, an Etonian, took the chair, and among the company were Viscount Exmouth, Lord John Manners, M.P., the Hon. Colonel Lindsay, M.P., Right Hon. W. E. Gladstone, M.P., Right Hon. Spencer Walpole, M.P., General Sir J. Burgoyne, Bart., Sir Minto Farquhar, Bart., M.P., Mr. Selwyn, M.P., Sir F. H. Doyle, Bart., Mr. Serjeant Kinglake, M.P., Mr. Vansittart, M.P., Mr. Powys, M.P., Sir Erskine Perry, M.P., Sir J. Johnstone, Bart., Mr. Thackeray, Mr. Beresford-Hope, and about 400 other gentlemen, while there were nearly 700 ladies in the galleries. The chairman proposed the health of Mr. Kean in very complimentary language, tracing his career from Eton upwards, and adverting in high terms of praise to the Shakespeare revivals for which he has made the Princess's Theatre celebrated under his management. Mr. Kean acknowledged the compliment in a speech of great length, and the meeting was subsequently addressed by Mr. Gladstone, Mr. Walpole, and other gentlemen.

WRECK OF THE PARAMATTA.—By the arrival of the steamer Magdalena at Falmouth, from the West Indies, the Royal Mail Steam Company have received news of the wreck of their new steamer Paramatta, of 3032 tons, and 800-horse power, while on the voyage from Southampton to the West Indies, with the mail of June 17. She was stranded on the Annegada Reef near St. Thomas's, and subsequently sunk in deep water, but the crew, passengers, and mails were saved. The Paramatta, which was commanded by Capt. E. Baynton, was completed only a few months ago by the Thames Iron Shipbuilding Company, and great expectations were entertained of her capabilities, as in a trial trip on the 7th of June she made 14 knots an hour. She cost about 160,000*l*., and unless she can be raised the loss will fall entirely upon the company, who insure their own vessels.

THE THUNDERSTORMS.—During the past week the metropolis and suburbs have been again visited by a succession of thunderstorms, accompanied by storms of hail which have done serious damage to the corn fields and fruit trees, and have destroyed an enormous quantity of glass in churches, greenhouses, and buildings. Several persons were struck with lightning, and a woman was killed by it while crossing Blackfriars Bridge. The storms were felt with great severity at Windsor, Southgate, and in several places in Surrey, Kent, and Essex; and they appear to have inflicted great damage over a very wide-spread area. Throughout Lancashire and Yorkshire the storms seem to have been general; and from the lightning, rain, and hail, great damage was done both to property and to the crops, attended with some loss of life. The storm also visited Jersey, where the Hospital was severely damaged by the lightning.

FIRE IN CHEAPSIDE.—On Monday night, about 10 o'clock, a fire took place in the premises formerly known as the Anchor Insurance Offices, Cheapside, but now tenanted by Messrs. Fisher & Roberts, and called the Anchor Dining Rooms. While one of the proprietors was looking out of window at the lightning, his attention was suddenly called to a sheet of flame playing round one of the upper floors, and forthwith discovered that the house was on fire. At that moment five women were in one of the front rooms, and eight other persons were in the upper part of the premises, as well as several others in the lower floors. The persons in the upper floors managed to descend to the first floor, when sheets of flame and smoke met them, which prevented their egress, and obliged them to retrace their steps to the rooms they had left. They then tried to reach the roof, but were prevented by the heated smoke. Fortunately, they were enabled to reach one of the front windows just at the moment when the Royal Exchange escape arrived, and succeeded in bringing down in safety the 13 men and women. The fire by that time had obtained complete possession of the building, which was several floors high. While the firemen were doing all they could to stop the flames, one of them, named Taylor, fell from the stairs, and was severely injured. The conductor of the Royal Society's escape was badly cut in rescuing the inmates from the front windows. The fire was extinguished before it communicated to the adjoining premises, but the loss sustained was considerable.

SUICIDE OF A LIBERATED SLAVE.—At the recent Sessions of the Central Criminal Court, an African seaman called John Bardoe was tried and acquitted on the charge of cutting and wounding a policeman under very singular circumstances. The officer had attempted to capture him on the roof of a house where he had taken refuge, in order as it appeared to escape being placed on board a Genoese ship, the captain of which had bought him on the African coast and treated him as a slave during the voyage. The unfortunate man, who was unable to speak a word of English, evidently thought that the captain wanted him to be arrested in order that he might again sell him as a slave; and on the night of his acquittal there was great difficulty in inducing him to leave Newgate, from the fear that he was going to be executed. He was ultimately removed to the Asiatic Home, where in the dead of night he attacked and seriously injured three of the inmates. He was fortunately secured before any lives were lost and removed to the House of Detention, where though closely watched he contrived to commit suicide by strangling himself on Friday night. The jury at the inquest returned a verdict to the effect that deceased destroyed himself, but that the state of his mind was unknown.

THE PUBLIC HEALTH.—The Registrar-General's weekly return states that 1400 deaths were registered in London in the week that ended Saturday, July 17, exhibiting a rapid increase of mortality under an increasing and unusually high temperature. In the corresponding weeks of the 10 years 1849-58 the average number was 1000, which, if raised in proportion to the increase of population, will become 1100. The present return is therefore 300 above the average. During the week the births of 891 boys and 876 girls, in all 1767 children, were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1434.

## Provincial.

DEVONPORT.—A serious disturbance took place at Keyham Dockyard on the 11th inst., on the occasion of the punishment of William Stephenson, a seaman belonging to one of the gun-boats in Hamoaze who had been adjudged by court-martial on the previous day to receive 50 lashes and be imprisoned two years for mutinous conduct. The flogging was ordered to take place on board H.M.S. Cæsar, Captain Mason, lying in one of the basins of the dockyard at Keyham, and whilst this part of the sentence was carried out a number of the workmen in the yard, and the crew of the Turkish man-of-war which is under repair, assembled, and [illegible] hisses, and the use of language of the most [illegible] character, gave free expression to the feelings of [illegible] probation with which they regarded the infliction of corporal punishment. The lieutenant of marines on duty was thereupon ordered to go ashore and disperse the spectators, but he was speedily knocked down when the sentry threatened to charge bayonet, and mobbed and thrown to the ground. The captain of the Cæsar then went ashore, and with the assistance of some of his officers and of a body of police who had hastened to the scene, the disturbance, which had begun to assume a serious aspect, was quelled, and order once more restored. Two of the ringleaders in the affair, John Bewlay, a shipwright, belonging to the establishment, and a painter named Risseter, were taken into custody, but were afterwards released, Risseter being dismissed from the yard, whilst Bewlay and the foreman of the company to which he was attached have been suspended until the decision of the authorities is made known. The circumstance has occasioned a great deal of excitement among the workmen in the dockyard, and is a topic of very general conversation in the town. It is said to be 53 years since such a punishment was given on board a ship in the dockyard.

JARROW.—On Tuesday morning a man called Matthew, gatekeeper at the iron ship building yard of Messrs. Palmer, of South Shields, murdered his wife by cutting her throat while sleeping in bed in their house in this village, and afterwards endeavoured to commit suicide by the same means. The wife died from loss of blood soon after a surgeon who was immediately sent for had sown up the wound; but the husband is likely to recover. It is said that the crime was committed from motives of jealousy, for which there is no foundation. The prisoner, who expresses no regret for the murder of his wife, and seems indifferent to his fate, is said to have been once in a very respectable station in life.

NEWCASTLE-ON-TYNE.—The Austrian Government has sent an order for all the Austrian vessels which have been detained in the Tyne and other northern ports during the recent hostilities with France to proceed on their voyages. At the outbreak of the late war the sale of vessels belonging to that country to English owners was considered a legal transfer, but the French Government would not recognise the sale of Austrian vessels to our shipowners, and they have therefore been lying in our north-east ports, at a great expense to the owners, since the declaration of war.

## Law.

HOUSE OF LORDS.—*Livingston (or Fenton) v Livingston* was an appeal from a decision of the Court of Session in Scotland, holding the validity of a marriage with a deceased wife's sister and legitimacy of a son of the marriage. Lord Brougham, Lord Cranworth, Lord Wensleydale, and Lord Chelmsford unanimously and decidedly of opinion that the marriage of respondent's father, who was domiciled in England, with deceased wife's sister, was invalid, null, and void according to the law of Scotland, and that the respondent, son of the marriage, was illegitimate, and not entitled to succeed to the estates in Scotland, and that the appellant, as next heir, was entitled to take the entailed estates as heir of entail. Their lordships reversed the decision of the Court of Session, with appeals, with costs, and remitted the cases back to the Court of Session to declare accordingly.

WESTERN CIRCUIT: WINCHESTER.—*The Murder at the Camp.—Henry Benjamin Havens*, a soldier, aged 21, was indicted before Mr. Baron Bramwell for the wilful murder of Mary M'Gowan, at Aldershott, on the 6th March, by cutting her throat with a razor. The particulars of this case were fully reported at the time in our Provincial News, and it will be remembered that after the murder had been committed the prisoner expressed deep regret, and stated that he had intended to murder another woman who had been the cause of his being in the hospital, and not deceased, who had never done him any harm. The defence was that the prisoner was labouring under some delusion, and was not the master of his own actions. After two hours' deliberation the jury came into court, and expressed an opinion that the prisoner might have been labouring under some sense of injury as to provoke him to commit the act. Baron Bramwell briefly explained the law and facts to the jury in that view of the case. The jury then consulted for a short time, and returned a verdict of Guilty. The learned Judge then put on the black cap, and proceeded to pass sentence of death, when the jury had returned the way they could not return, and holding out no hope of mercy.—*The Burning of the Eastern Monarch.—Charles [illegible]*, steward of the troop-ship Eastern Monarch, was indicted for manslaughter of the five persons whose lives were lost on board that ship when she was destroyed by fire on the morning of June 3. The case against the prisoner was that he had charge of the magazine and gun-room, and that about 8 o'clock on the evening of the 2d of June he had gone into the gun-room, lighted a lucifer-match, and thrown it on the floor, on which there was a variety of stores. It was therefore inferred that something had taken fire and caused the explosion from 8 o'clock until 2, and thus caused the explosion. Mr. Bramwell said, upon these facts he could hardly direct the jury that they would convict the prisoner. There was an interval of six hours between the time the prisoner was in the gun room and the fire breaking out; no fire was seen, and no burning had been smelt. He did not like interfering with the province of the jury, but it was impossible to suppose that this burning was going on for six hours. Mr. Collier said that after his lordship's observations he completely agreed with his own opinion, he should not try the case, particularly as there was another indictment against the prisoner for a misdemeanour. The judge said he should regret that a man should be convicted of so serious a charge upon such evidence as had been offered. He supposed the learned counsel was quite warranted in withdrawing from the case. The jury returned a verdict of *Not Guilty*. The prisoner was then indicted for that he, being a seaman on board a British ship, unlawfully did an act tending to the loss and destruction of the ship, by using a lighted candle in the gun room. The judge said he should direct the jury that if they thought the act of the prisoner might have led to the serious danger of the ship, although any person might have prevented the danger, that was not sufficient to bring the case within the statute. Mr. Coleridge then addressed the jury for the prisoner, urging that this charge of striking a match [illegible] months ago was a most hard case on the prisoner.

when it followed a most miserable attempt to convict the prisoner of manslaughter, thereby creating a great prejudice against the prisoner. Mr Collier, representing the Attorney-General, replied. Mr Baron Pramwell then summed up, and the jury after some time *Acquitted* the prisoner, expressing their opinion that though he had been guilty of a breach of duty, still that his act did not tend to the serious damage of the ship.

NORTHERN CIRCUIT: YORK.—*The Hull Murder.—John Riley* was indicted for the wilful murder of Alice Riley, his wife, at Hull, on the 3d inst. It appeared from the evidence of the witnesses called that prisoner had deceased had been married some time and had several children, and lived the early part of their married life at Grimsby. While living there, upwards of a year ago, they had a violent quarrel, in consequence of which his wife left him, and went to Hull where she endeavoured to maintain herself as a sempstress and by a profligate course of life. After she had resided there for some time the prisoner heard of her and followed her to Hull, where he began to live with her again, and sent for his children. While living in Hull the prisoner did nothing to gain a livelihood, and was supported by his wife, and seemed not to be entirely ignorant of the manner in which she obtained her living. In May last the prisoner had another serious quarrel, which ended in an investigation before the magistrates, and in his being sent to prison. He got out of prison early in June, and had not been living with his wife many weeks before the woman got drunk, and according to her usual habit lay down on the bed to sleep off the effects. The prisoner told a little boy to go out and play while he had a sleep too and having fastened the door cut his wife's throat with a table knife, and then attempted to hang himself with the cord of her crinoline petticoat. A neighbour hearing the noise gave an alarm, and he was cut down insensible, but he subsequently recovered and admitted that he had killed his wife, adding that she had previously tried to cut his throat. The jury after an absence of an hour found the prisoner *Guilty*. Mr Justice Hill, putting on the black cap, in the most impressive manner passed on the prisoner sentence of *Death*, and implored him in the brief period left to him, but to his eternal to seek that mercy from the Almighty which he could not hope for in this world. *A Danish Burglar.—Jans Peter Nicholai Ernst*, a noted burglar, of Danish extraction, pleaded guilty to three extensive burglaries in different parts of Yorkshire. The prisoner was about 38 years of age, of sallow complexion, middle height, wore gold ear rings, and had many scars about his body, which was covered with blue gunpowder marks of ships, watches, mermaids, hearts, serpents, seahorses, trees, naval crowns, &c. The charges against him were, 1st, that he had committed a burglary in the house of Mr. J. Crossley, at Manor Heath, near Halifax, on the 18th March, when his object was to secure a large amount of valuable plate, which, however, he fortunately missed, merely obtaining a number of Crown pieces and articles of no great value. 2d, that he had committed another burglary only three days afterwards, in the dwelling-house of Mr Thomas Shires, and stole a large variety of property; and 3d, that he had committed another burglary, nine days after the last one, in the house of the Rev. W. Williamson, of Hardingly Parsonage, near Leeds, where he obtained a large booty, consisting of silver plate, &c., to the value of about 40*l*. Mr Justice Hill, in passing sentence, cited three distinct convictions for similar offences during the last three years, in adjudicating upon one of which charges he acted as judge at the Gloucester assizes. The other two convictions were from the Worcester assizes. He therefore sentenced the prisoner to penal servitude for 10 years.

## Obituary.

THE QUEEN OF PORTUGAL died at Lisbon, on Saturday of sore throat. Her Majesty was born in July, 1837, and was only married last year to the King of Portugal.

THE DUKE OF ABRANTES, son of the famous Junot, and chief of the staff of one of the divisions of the army of Italy, has died of the wounds he received at the battle of Solferino. His thigh had to be amputated, and he did not long survive the operation.

GENERAL EARL CATHCART, G.C.B., died on the 16th inst., at his residence at St. Leonard's-on-Sea. He was brother of General Cathcart who was killed at Inkermann, and like his father and many of his ancestors, was brought up to the military profession. He entered the army in 1799, and for the first 16 years of his career saw much active service. He served in the Helder expedition in 1799; in Naples and Sicily in the campaigns of 1805-6; at the Walcheren expedition in 1809, taking part in the siege of Flushing. In 1812, having joined the army in the Peninsula, he was present at the battles of Barossa, Salamanca, and Vittoria; and took part in the campaigns of 1815 in the Netherlands and France. He was present at Waterloo as one of the Royal Staff Corps, acting as one of the assistant-quarter-master-generals attached to the British forces. In 1837 he was appointed Commander of the Forces in Scotland and Governor of Edinburgh Castle; and in 1846 he was made Governor and Commander in Chief of Canada, Nova Scotia, New Brunswick, &c. On his return home from North America he was appointed to the command of the Northern and Midland District, where he served the customary period. For his services in the Peninsula he received the gold medal and two clasps, and for his services at Waterloo was made a Knight of the Order of St. Wilhelm of Holland, and of St. Wladimir of Russia. In 1838 he was nominated a Knight Commander of the Bath, and was made a Grand Cross of that order only a few weeks since. By his death the Colonelcy of the 1st Dragoon Guards, to which he was appointed in 1851, becomes vacant. He became a Lieut.-General in 1841, and General in 1854. The deceased, Charles Murray, Earl and Viscount Cathcart, and Baron Greenock in the peerage of the United Kingdom, and Baron Cathcart in Scotland, was eldest son of the first Earl, by the daughter of Mr Andrew Elliot, uncle of the first Earl of Minto. He was born in 1783, and was consequently in his 76th year. On the death of his father, General Earl Cathcart, in 1843, he succeeded to the family honours. He married in France in 1818, and in Portsea in 1819, Henrietta, second daughter of Mr. Thomas Mather, by whom, who survives him, he leaves two sons and three daughters. He is succeeded in the title and estates by his eldest son, Lord Greenock, formerly in the 23d Foot, and now Lieut.-Colonel of the North York Militia, who was born in 1828, and married in 1850 the eldest daughter of Sir Samuel Crompton.

MR HENRY GRATTAN, late M.P. for the county of Meath, and only surviving son of the great Henry Grattan, died rather suddenly on Saturday last at his residence in the county of Wicklow, from disease of the heart. Mr. Grattan was a devoted friend of Liberalism in the widest acceptation of the term, and was among the faithful few who adhered to Mr. O'Connell throughout his stormy career of Irish agitation. Mr. Grattan leaves no male issue, his children consisting of two daughters, both recently married, and who, it is presumed, will inherit his large estates.

REAR-ADMIRAL H. DUNDAS TROTTER died on the 14th inst., at the residence of his brother, Devonshire Place House, Marylebone Road, from a paralytic attack which had seized him while on business at the Admiralty in the morning of that day. He entered the service in 1818, and served in the Navy actively until he obtained his flag rank. From September, 1840, to the close of 1842, he was employed in the Niger expedition; and his last employment was as Commodore at the Cape of Good Hope. He was in his 57th year. He became a rear-admiral in 1857.

MR JOHN ADDISON, County Court Judge, died at his residence in Winckley Square, Preston, on the 14th inst. He was appointed Judge in 1847, when county courts were first established. His circuit embraced the thickly populated districts of Preston, Blackburn, Lancaster, Chorley, Garstang, Poulton, and Kirkham. Mr Addison was a magistrate for the county of Lancaster, and also for the borough of Preston. He was recorder for Clitheroe, and had been twice mayor of Preston.

BIRTHS.—On the 18th inst, at 42, Belgrave Square, Lady OCTAVIA SHAW STEWART, of a daughter—16th inst, at Altyre, Lady GORDON CUMMING, of a son—1st inst, at Nice, Sardinia, the wife of Sir ALMERIC MORRIS, Bart., of a son—16th inst, at 15, Green Street, Park Lane, the wife of GEORGE PEPPE, Esq., Secretary to H.M.'s Legation at Hanover, of a daughter.

MARRIAGES.—On the 19th inst, at St Thomas's Church, Orchard Street, Portman Square, the Rev. OWEN LEFEVRE MANSEL, fourth son of Lieut.-Colonel Mansel, C.B., to LOUISA CATHERINE, youngest daughter of the late Lord WILLIAM MONTAGU—19th inst, at Lighthorne, Warwickshire, BOURNE KING, Esq., to LOUISA, eldest daughter of the late Rev. CHARLES and the Lady CHARLOTTE PALMER—19th inst, at St George's, Hanover Square, EDMUND, eldest son of JOSEPH GOLD, Esq., Hale Park, Hants, to EMILY CAMPION, daughter of Lieut.-General LACOSTE, C.B., K.H., Colonel of the Queen's Own Light Dragoons—19th inst, at Twickenham Church, WILLIAM PALMER HALE, Esq., of the Middle Temple, barrister-at-law, eldest son of the Ven. the Archdeacon of London, to MARY, daughter of the late Rear-Admiral DENIS HENRY O'BRIEN, of New House, Hounslow, Middlesex—19th inst, at St Andrew's, [illegible], Esq., of Wroughton House, Berks, to ELLEN LUCY, eldest daughter of the late Sir HENRY HUGH BOVEY LEIGH, Bart., of Stoneleigh, Wilts, to JULIA LUCY, eldest daughter of THOMAS VILLIERS LAKE, Esq., and granddaughter of the second Viscount Exmouth.

DEATHS.—On the 19th inst at Tunbridge Wells, Lord RANDOLPH STEWART GORDON, seventh son of the Marquis of Huntly, aged two months—16th inst, of rapid decline, returning from Italy, at Pau, Pyrenées, BOADICEA, the wife of H. H. HOUGHTON, Esq., of Diggle Park, Northamptonshire, youngest daughter of Major and the late Lady Louisa Forester, of St James's Place—16th inst, HANNAH, wife of EDWARD LYON, Esq., 3 Pt. Oxford Square, and 14, Essex Street, Strand, youngest daughter of the late Sir DAVID WILKIE SMITH, Bart., of Methven, Northumberland, aged 47—16th inst, at his house at Thurnaston, Leicestershire, CHARLES GRANGER, eldest surviving son of the late Sir JOHN RICHARDSON, formerly one of the judges of the Court of Common Pleas, aged 48—17th inst, at Castle Ashby, the residence of her son Mervyn Archdall, Esq., M.P., county Fermanagh, MARTHA, the beloved wife of EDWARD ARCHDALL, Esq., of Riverside, in the same county, daughter of the late and sister of the present Wm. Hargreaves, Esq., of Lady's Close House, Co. Cavan—17th inst, at St Matthew's Parsonage, Gateshead, the residence of her son-in-law, the Rev. Dr Lucie Duffus, HENRIETTA, widow of Lieut.-Colonel Henry Hayes, K.H., Royal Art. Duty—17th inst, Lucretia ANNE, widow of Robert KEATE, Esq., late Serjeant Surgeon to the Queen, aged 96—17th inst at Bath, the Rev. EDWARD GRIFFITH, M.A., Senior Fellow of Merton College, Oxford, aged 81—17th inst, suddenly, at Shirley House, near Southampton, the Rev. HENRY NICHOLSON BROWNE, M.A., of Trinity College, Cambridge, aged 42—18th inst, at her residence, Darnley Road, Hackney, JANE, relict of the late GEORGE LODDIGES, aged 72.

# Markets.

## COVENT GARDEN.—July 22.

Grapes and Pine Apples still realise fair prices. West India Pines have been plentiful and good. Gooseberries, Currants, and Raspberries are getting scarce, and Cherries and Strawberries are nearly over. English Apricots have made their appearance. Greengage Plums obtain 2s. a dozen. Oranges fetch 3s. 6d. and 10s. per 100. Nuts of all descriptions continue to realise fair prices. Cabbages and French Beans are plentiful. Rhubarb, Asparagus, and Seakale are getting over. Peas, Beans, Horn Carrots, and Globe Artichokes may be obtained in quantity. Cauliflowers are cheaper. New Potatoes realise from 6s. to 14s. per cwt. Cucumbers abundant. Cut flowers chiefly consist of Orchids, Gardenias, Kalosanthes, Lily of the Valley, Violets, Mignonette, Heaths, and Roses.

### FRUIT.

| | |
|---|---|
| Pine Apples, per lb., 6s | Plums, per pottle, 2s |
| Grapes, per lb., 3s to 6s | Greengages, do., 2s |
| Strawberries, p. basket, 1s to 2s | Currants, per half-sieve, 1s |
| Raspberries, p. punn., 6d to 1s | Gooseberries, do., 2s |
| Melons, each, 4s to 8s | Cherries, per lb., 6d to 1s 6d |
| Peaches and Nectarines, per doz., 10s to 15s | Apples, per doz., 6s to 10s |
| Figs, per doz., 6s to 8s | Oranges, per 100, 6s to 10s |
| Apricots, do., 4s to 6s | Lemons, per doz., 1s to 1s 6d |

### VEGETABLES

| | |
|---|---|
| Cauliflowers, per doz. 2s to 4s | Cucumbers, p. doz., 2s to 6s |
| Green Peas, p. quart, 1s to 2s | Tomatoes, per doz., 2s to 4s |
| Greens, per dozen bunches, 1s to 1s 6d | Artichokes, per doz., 2s to 3s |
| Cabbages, do., 1s 6d to 2s 6d | Beet, per doz., 1s 6d to 2s |

| Fine old Hay | 85s to 92s | | Fine old Clover | 105s to 112s | |
| Inferior do. | 80 | 84 | Inferior do. | 84 | 100 |
| New Hay | 76 | 84 | Fine new Clover | 80 | 90 |
| Inferior do. | 50 | 63 | Fine 2d cut | — | 100 |
| Straw | 26 | 28 | Inferior do. | 60 | 80 |

BRITISH WOOLS.—LONDON, FRIDAY, July 22.

**Our trade is buoyant and most descriptions of good wool realise full prices.**

COLONIAL WOOL SALES.—These sales commenced last night at an advance over the last series of 1d. to 2d. a lb.

METROPOLITAN CATTLE MARKET.

MONDAY, July 18.

There is a much larger supply of Beasts, and the hot weather operates against the trade. Prices are consequently lower, and it is difficult to effect a clearance. There are a few more Sheep than on Monday last, and trade is slow, but for choicest qualities there is not much alteration. Trade is very dull for Calves at rather lower rates. From Germany and Holland there are 980 Beasts, 4400 Sheep, and 220 Calves; from Scotland, 200 Beasts; from Norfolk and Suffolk, 1400; from Ireland, 180; and 700 from the northern and midland counties.

| | s | d | s | d | | s | d | s | d |
|---|---|---|---|---|---|---|---|---|---|
| Best Scots, Herefords, &c. | 4 | 6 | to 4 | 8 | Best Long-wools | 4 | 6 | — 4 | 8 |

| | | | | | Calves | .. | 3 | 8 — 4 | 10 |
| | | | | | Pigs | .. | 3 | 4 — 4 | 4 |

Beasts, 4150; Sheep & Lambs, 29,850; Calves, 284; Pigs, 450.

THURSDAY, July 21.

We have a large supply of Beasts. Trade is dull for them, and it is difficult to maintain Monday's quotations throughout. The number of Sheep and Lambs is about the same as of late. There is a demand for them at Monday's prices. Calves are rather lower. Our foreign supply consists of 400 Beasts, 2120 Sheep, and 404 Calves. The number of Milch Cows is 123.

| | s | d | s | d | | s | d | s | d |

| | | | | | Calves | .. | 3 | 8 — 4 | 8 |
| | | | | | Pigs | .. | 3 | 4 — 4 | 4 |

Beasts, 4150; Sheep & Lambs, 29,850; Calves, 284; Pigs, 450.

MARK LANE.—MONDAY, July 18.

The supply of Wheat from Essex to this morning's market was moderate, from Kent fair; in consequence of factors holding for last week's prices no progress could be made in the sale, excepting at a decline of 1s. to 2s. per qr. upon the rates of this day se'nnight, which holders generally being unwilling to accept but little clearance was made towards the close. Foreign was neglected, and the business confined to a few retail sales at about former prices. Barley sells slowly at the rates of Monday last. Beans are scarce, and bring late quotations. For Peas there is no demand. Oats are firm, prices unaltered. There is no alteration in the top price of town-made Flour, but Norfolk is 1s. per sack cheaper.

FRIDAY, July 22.

The fine weather was interrupted on Monday evening by a very heavy thunderstorm, which appears to have been general, and continued daily until this morning. The crops which were previously standing are reported to have been laid and to have sustained damage. The reports we receive from the country generally are less promising than heretofore. The Wheat trade throughout the country has during the present week displayed little firmness, without leading to much improvement in the demand or enhancement of prices. Business in all kinds of spring corn has been dull, and each description has in some markets been quoted slightly cheaper. Flour has been difficult of disposal, with a downward tendency in value. In several places it is quoted 1s. per sack lower, which has been the case with country marks here. Arrivals of grain and seed from vessels off the coast from Southern Europe continue moderate, as do also the sales. The accounts of the French crops are less favourable, and prices there have slightly advanced for Wheat and Flour. From Belgium the complaints are still greater, and Wheat has advanced in price from 2s. to 4s. per qr. The arrivals of English grain this week are small, of foreign Wheat and Oats fair, and large of Barley. This morning's market was badly attended, although it included two or three distant buyers, who cleared the English Wheat at prices which on Monday were unobtainable. Barley sells in retail at about Monday's quotations. There is no alteration in the value of Beans and Peas. For Oats there was rather more inquiry at full prices. In Flour there is rather more doing.

ARRIVALS FROM JULY 18 TO JULY 22.

| Foreign | 10116 ,, | 6630 ,, | 16320 ,, | 1700 ,, — brls. |

LIVERPOOL, Tuesday, July 19.—Our arrivals during the past week have been to a fair extent, and with a continuance of most brilliant weather the trade has ruled extremely dull, and quotations are nominally unchanged. With only a small attendance at our market this morning Wheat met a fair consumptive demand at fully the rates of Tuesday last. Flour was quiet, without change in value. Oats and Oatmeal dull and rather lower. Barley, Beans, and Peas unchanged. Indian Corn was in only limited request, at 6s. 6d. for Galatz, 6s. 3d. for Ibrail, and 8s. 2d. for white per 100 lbs.

A large Assortment of Achromatic Microscopes.

Just published, 2d ed., an Illustrated Catalogue, with the names of 1500 Microscopic objects, free for 6 stamps.

SHAW'S TIFFANY is universally acknowledged to be the best, neatest, and cheapest material for shading Conservatories, and other Hothouses. Effectually securing Plants from the scorching rays of the sun without obscuring the light. Also, for protecting the Bloom of Wall Trees from spring frosts, and Fruit from birds and wasps. Sold in pieces.

No. 1.—20 yards long, by 38 inches wide, 5*s.* per piece.

No. 3.—Double strength, 18 yards long, by 39 inches wide, 7*s.* 6*d.* per piece.

No. 4.—Treble strength, 18 yards long, by 39 inches wide, 9*s.* per piece.

A liberal allowance to the Trade when ten or more Pieces are taken.—JOHN SHAW & Co., Princess Street, Manchester.

"FRIGI DOMO."—Patronised by her Majesty, the Queen, the Duke of Northumberland for Syon House, His Grace the Duke of Devonshire for Chiswick Gardens, Professor Lindley for the Horticultural Society, Sir Joseph Paxton for the Crystal Palace, Royal Zoological Society, late Mr. Lawrence of Ealing Park, and —Collier, Esq., of Dartford.

PROTECTION FROM THE SCORCHING RAYS OF THE SUN.—"FRIGI DOMO," a Canvas made of patent prepared Hair and Wool, a perfect non conductor of Heat and Cold, keeping wherever it is applied, a fixed temperature. It is adapted for all horticultural and floricultural purposes, for preserving Fruits and Flowers from the scorching rays of the sun from wind, from attacks of insects, and from morning frosts. It can be had in any required lengths. Two yards wide, 1s 6d per yard run; four, 3s. per yard. Also, an improved make for Shading Purposes. Three yards wide, 2s 6d per yard run.

ELISHA THOMAS ARCHER, whole and sole manufacturer, Trinity Lane, Cannon Street, City, and of all Nurserymen and Seedsmen throughout the kingdom. "It is much cheaper than mats as a covering."

DRESSING CASES, DRESSING BAGS, and highly finished elegancies for presentation in great variety. Ivory-handled Table Cutlery; every requisite for the Toilet and Work Tables.—MECHI & BAZIN, 112, Regent Street, 4, Leadenhall Street; and Crystal Palace, Sydenham.

THE BEST SHOW OF IRON BEDSTEADS IN THE KINGDOM IS WILLIAM S. BURTON'S.—He has FOUR LARGE ROOMS devoted to the exclusive show of Iron and Brass Bedsteads and Children's Cots, with appropriate Bedding and Bed Hangings. Portable Folding Bedsteads from 11s.; Patent Iron Bedsteads, fitted with dovetail joints and patent sacking from 14s. 6d.; and Cots, from 15s. 6d. each. handsome Ornamental Iron and Brass Bedsteads, in great variety, from 2*l.* 13s. 6*d.* to 20*l.*

THE PERFECT SUBSTITUTE FOR SILVER.—The REAL NICKEL SILVER, introduced more than 20 years ago by WILLIAM S. BURTON, when PLATED by the patent process of Messrs. Elkington & Co., is beyond all comparison the very best article next to sterling silver that can be employed as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver. A small useful plate chest, containing a set, guaranteed of first quality for finish and durability, as follows:—

| | Fiddle or Old Silver Pattern. | Thread or Brunswick Pattern. | King's Pattern. | Military Pattern. |
|---|---|---|---|---|

| Total .. .. | 11 14 6 | 14 11 3 | 17 14 9 | 21 4 0 |

Any article to be had singly at the same prices. An oak chest to contain the above, and a relative number of knives, &c., 2*l.* 15*s.* Tea and coffee sets, cruet and liqueur frames, waiters, candlesticks, &c., at proportionate prices. All kinds of re-plating done by the patent process.

CUTLERY, WARRANTED.—The most varied assortment of TABLE CUTLERY in the world, all warranted, is on SALE at WILLIAM S. BURTON'S, at prices that are remunerative only because of the largeness of the sales. 3½-inch Ivory-handled Table Knives, with high shoulders, 12s. 6d. per doz. Desserts to match, 10s. 6d.; if to balance, 6*l.* per doz. extra. Carvers, 4s. 3d. per pair; larger sizes, from 20s. to 27s. 6d. per doz. extra fine Ivory, 33s.; if with silver ferrules, 40s. to 59s.; white bone Table Knives, 6s. 9d. per doz.; Desserts, 5s. 0d.; Carvers, 2s. 8d. per pair; black-horn Table Knives, 7s. 4d. per doz.; Desserts, 6s.; Carvers, 2s. 6d.; black wood handled Table Knives and Forks, 6s. per doz.; Table Steels, from 1s. each. The largest stock in existence of Plated Dessert Knives and Forks, in cases and otherwise, and of the new plated Fish Carvers.

WILLIAM S. BURTON'S GENERAL FURNISHING IRONMONGERY CATALOGUE may be had gratis, and free by post. It contains upwards of 400 illustrations of his illimited Stock of Electro and Sheffield Plate, Nickel Silver and Britannia Metal goods, Dish Covers and Hot-water Dishes, Stoves, Fenders, Marble Chimney-pieces, Kitchen Ranges, Lamps, Gaseliers, Tea Urns and Kettles, Tea Trays, Clocks, Table Cutlery, Baths and Toilet Ware, Turnery, Iron and Brass Bedsteads, Bedding, Bed Hangings, &c., with Lists of Prices and Plans of the 16 large Show Rooms at 39, Oxford Street; 1, 1A, 2, and 3, Newman Street; and 4, 5, and 6, Perry's Place, London.—Established 1820.

TOURISTS AND TRAVELLERS, VISITORS TO THE SEASIDE, and others exposed to the scorching rays of the sun, and heated particles of dust, will find ROWLAND'S KALYDOR a most refreshing preparation for the complexion and skin, dispelling the cloud of languor and relaxation, allaying all heat and irritability, and immediately affording the pleasing sensation attending restored elasticity and healthful state of the skin. Freckles, tan, spots, pimples, flushes, and discoloration are eradicated by the application. Price 4s. 6d. and 8s. 6d. per bottle. The heat of the summer is inclines a dryness of the hair, and a tendency to its falling, which may be completely obviated by the use of ROWLAND'S MACASSAR OIL, a delightfully fragrant and transparent preparation for the hair, and as an invigorator and beautifier beyond all precedent. Price 3s. 6d.; 7s.; family bottles (equal to four small), 10s 6d.; and double that size, 21s. ROWLAND'S ODONTO, or PEARL DENTIFRICE, bestows on the teeth a pearl-like whiteness, frees them from tartar, and imparts to the gums a healthy firmness, and to the breath a grateful purity and fragrance. Price 2s. 9d. per bottle.—Sold by A. ROWLAND & SONS, 20, Hatton Garden, London; and by Chemists and Perfumers.—Beware of Spurious Imitations.

HOLLOWAY'S OINTMENT AND PILLS.—For the cure of burns, scalds, wounds, and ulcers this justly celebrated Ointment stands unrivalled. Its balsamic virtues, immediately on application, lull the pain and soothe, protect the exposed nerves from the air, and gives to the vessels the vigour necessary to heal the sore, and confer on the blood a purity which permits it only to lay down healthy deposits of that destroyed. HOLLOWAY'S Pills, simultaneously, must assist the Ointment's purifying and soothing power. Together, these medicines act like a charm. Those ladies embarking for unwholesome climates, where pestilential airs are constantly producing fever, should provide themselves with these remedies, which will assuredly save them nights of watching and days of pain.

"To the thoroughness and integrity, the absolute rectitude inculcated in thought, word, and deed, and to the tender charity extended to the erring and repentant, we are inclined to attribute the hold these works take on readers of all classes and all ages. The pure transparent sincerity tells even on those who are apt to find any work whose aim and object are religious, heavy and uninteresting. *The republication of these works in an easily accessible form is a benefit of which we cannot over-estimate the solid advantages.*"—*Globe.*

# News of the Week.

THE EMPEROR OF THE FRENCH has given orders that the French army and navy shall be reduced to a peace footing with the least possible delay. This important measure was preceded by the publication of an official note in the *Moniteur*, protesting against the attempt which has been made, it says,

in England to attribute to France the causes of the burdens imposed upon the English people for national defences. The *Moniteur* declares that the English people have been deceived for the purpose of promoting these defences, and that the French armaments have been exaggerated in order to justify the considerable increase of the English budget for the army and navy. It concludes by asking whether it is to France and to her extraordinary armaments that the heavy burdens which weigh on the English people are to be attributed, or whether the enormous expenses and taxes which are the consequences of those burdens must not be attributed to other reasons. In commenting upon this article, the Ministerial organ, the *Patrie*, says that France has done everything "to free England from the nightmare of invasion in order to restore her to calmness and repose;" and if she does not succeed, England can only lay the blame on herself for the fears which agitate her, and which, if prolonged, will become "an affront to the sincerity, feelings, and actions of the French people." A telegraphic despatch from Italy announces that LEOPOLD II., Grand Duke of Tuscany, has abdicated in favour of his son, the Archduke FERDINAND. The young Prince has promised to grant a constitution, but the municipalities of Tuscany have pronounced against the dynasty, and have decided by 809 votes to 15 in favour of annexation to Sardinia. The POPE has issued a circular protesting against any change in the administration of the Papal States, and condemning the conduct of Sardinia as a "flagrant violation of the law of nations and the rights of the Holy See."

In the House of Commons on Thursday Lord JOHN RUSSELL made his promised statement on foreign affairs. After referring with satisfaction to the intended reduction of the French army and navy to a peace footing, he said that a proposition had been made to her MAJESTY'S Government on behalf of the EMPEROR OF THE FRENCH, to the effect that a Congress of the Great Powers should be held to confer on all the questions raised by the actual state of things in Italy, so far as they are connected with "general interests." Her MAJESTY'S Government had not given a precise answer to that communication, because they considered that two things were necessary before they could enter upon the conference—first, that they should first see the Treaty of Zurich; and, secondly, that they should be assured that the Emperor of Austria would be a party to it. The points which would be submitted to the Congress would also be subjects for consideration. The treaty of peace, as far as it was at present understood, was not likely to lead to a settlement of the affairs which had led to the late war; and he could not conceive that a confederation, consisting of the POPE, the EMPEROR OF AUSTRIA, two GRAND DUKES, and the KINGS OF NAPLES and SARDINIA, would be for the benefit of Europe. Her MAJESTY'S Government therefore were of opinion that it would not be wise to come to an absolute decision on the subject of the proposed Congress; but at the same time, if the presence of a British Ambassador at the Congress should assist in averting a century of misery and restore Italy to the family of nations, the whole world would rejoice at the result. On Monday Sir D. L. EVANS moved for the appointment of a Commission, consisting of naval and military officers and civilians, to inquire into our national defences. Mr. SIDNEY HERBERT announced the intention of Government to appoint a Commission, like that suggested, to consider and report on the permanent works necessary for the defence of our arsenals and dockyards. After some discussion Sir D. L. EVANS'S motion was negatived without a division. Sir G. LEWIS obtained leave to bring in a Bill to amend the law relating to Roman Catholic charities. On Tuesday, on the motion for going into committee on Sir J. TRELAWNEY'S Church Rates Abolition Bill, Mr. NEWDEGATE moved as an amendment that a charge of twopence in the pound be levied on all hereditaments in respect of the occupancy of which church-rates have been paid within the last seven years. On a division the amendment was negatived by 191 to 99. The House then went into committee; but no progress was made with the Bill up to the hour of adjournment, and in the evening the House was counted out. On Wednesday the High Sheriffs Expenses Bill was lost on the question of going into committee by a narrow majority of 3, the numbers being 115 to 112. Sir C. NAPIER'S motion for a commission to inquire into the management of Greenwich Hospital was negatived by 142 to 82. Mr. CONINGHAM'S motion for reducing the vote for the National Gallery by the sum of 650*l.*, charged as travelling expenses, was negatived by 171 to 40; and Mr. SPOONER'S motion for reducing the vote by 10,000*l.*, the sum allowed for the purchase of pictures, was negatived by 136 to 64.

In the House of Lords on Tuesday the Public Health Bill and the Sale of Gas Bill were read a third time and passed. On Thursday the Divorce Court Bill passed through committee, and the Diplomatic Pensions Bill was read a second time.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Royal family continue at Osborne. On Friday the Queen, accompanied by Prince Alfred and Prince Leopold, took a cruise in the Fairy. The Prince Consort rode on horseback. The Duchess of Kent took a drive. Admiral Bowles, Commander-in-Chief at Portsmouth, and Major-General the Hon. Sir J. Scarlett arrived on a visit. On Saturday Prince Esterhazy, the Marquis of Ailesbury, and the Right Hon. Sidney Herbert arrived on a visit. On Sunday morning her Majesty, the Prince Consort, Prince Alfred, Princess Alice, Princess Helena, and Princess Louisa attended Divine service at Whippingham Church; the Rev. J. Prothero officiated. On Monday the Prince Consort, accompanied by Prince Alfred and Prince Arthur, embarked in the Royal yacht Victoria and Albert, and visited the breakwater and other works in the harbour of Portland, returning to Osborne in the evening. In the afternoon the Queen drove out, accompanied by Princess Louisa and Prince Leopold. On Tuesday afternoon the Queen and Prince Consort, accompanied by Princess Alice, Princess Helena, Princess Leiningen, and Princess Hohenlohe, embarked in the Fairy and visited the fleet at Spithead. Her Majesty was received with a Royal salute and manned yards from each ship as the Royal yacht steamed slowly past, the Russian frigate Polkan joining in the demonstration. On Wednesday the Queen and Prince Consort, accompanied by Prince Alfred, Princess Helena, and Princess Louisa, drove out and honoured Colonel and Lady Katherine Harcourt with a visit at St. Clare. The Hereditary Grand Duke and Prince Adolphus of Mecklenburg-Strelitz visited the Queen. Yesterday afternoon the Queen held a Privy Council at Osborne.

THE PRINCE OF WALES is still residing at Holyrood Palace, engaged in the diligent prosecution of his studies. His Royal Highness has made an almost daily visit to the University, and Dr. Lyon Playfair and several other professors have had repeated interviews with him. Several of the most eminent teachers in town have been engaged to direct the Prince's studies in particular departments, including Dr. Schmitz in English history, and Dr. Lemmi in Italian. His Royal Highness has visited a considerable number of public places, but the entire absence of display attending his movements has prevented those public demonstrations which would otherwise have attended his progress. On Friday he was present at a review of the Midlothian Yeomanry Cavalry on Portobello Sands. In the afternoon the admiral and chief officers of a Dutch squadron, consisting of five screw steamers of war, which arrived a few days ago in the Frith of Forth, in the course of a training cruise in the North Sea, visited the Prince at Holyrood. On Saturday evening his Royal Highness visited the Queen's Theatre, and though for the most part of the evening he sat within the curtained recess concealed from the great body of the audience, he took a more prominent seat during an interval of the performances, and was welcomed with cordial cheering by the crowded audience. On Sunday he attended Divine service in the High Church, and took his seat in the throne pew set apart for the Lord High Commissioner. On Monday afternoon his Royal Highness visited the recently opened National Gallery; and on Wednesday was present at the annual examination of the Edinburgh Academy.

COURT MOURNING.—Orders have been issued for the Court to go into mourning for three weeks, commencing on Thursday last, the 28th inst., for the late Queen of Portugal.

THE CABINET.—A Cabinet Council was held on Saturday at the official residence of the First Lord of the Treasury in Downing Street. Another Council was held on Wednesday.

THE GRAND DUKE CONSTANTINE is expected to arrive at Spithead on the 4th August in a screw yacht from Cronstadt. The Russian screw frigate Gromoboi, 50 guns, Rear-Admiral Istomin, the screw line-of-battle ship Retvizan, Capt. Baron Taube, and the screw frigate Polkan, 44, have arrived at Spithead to await his arrival. It is also expected that several other Russian men of war will call at Spithead on their way to the Mediterranean from the Baltic.

HIS HIGHNESS MOHAMMED ALI PACHA, accompanied by a numerous suite, has arrived at Hotel.

PARLIAMENTARY MOVEMENTS.—The Dartmouth election committee have reported to the House that the late election for Dartmouth was void by reason of bribery and corruption carried on by the agents of Schenley, and that Mr. Schenley was not duly returned. The Wakefield election committee have reported that Mr. W. H. Leatham was, by his agents, guilty of bribery at the last election for Wakefield; that Mr. W. H. Leatham was not duly elected; that the last election was void; that four cases of bribery were proved, but that it was not proved that such bribery was committed with the consent of Mr. W. H. Leatham; and that there was reason to believe that corrupt practices extensively prevailed at the last election for Wakefield. The Salisbury election committee have reported that the charges of bribery and corruption against Messrs. Sergeant and Barnard have not been proved, but refused to report on the cross petition against Mr. Wentworth has still to be gone into. The Ashburton election committee have reported that Mr. J. H. Astell was duly elected. The Gloucester election committee have reported that Mr. W. Price and Mr. C. J. Monk were not duly elected, that the last election was void; that a large number of persons had been bribed whose names were given, and that corrupt practices extensively prevailed at the last election for Gloucester.

THE NAVY.—Capt. Yelverton, late of the Conqueror, has been appointed Comptroller-General of the Coastguard, in the place of Commodore Eden, appointed Junior Lord of the Admiralty.

THE ARMY IN INDIA.—The authorities at the Horse Guards, having had under consideration for some time past the urgent necessity of allowing a certain number of the soldiers' wives to join their husbands in India, have decided on despatching several thousands of these women to Bengal, Bombay, and Madras. The women selected will be provided with a free passage, and will be sent out from time to time with the Indian reinforcements, the first detachment embarking during the ensuing month. On joining their husbands in India they will be employed in various duties which are now undertaken by the troops, who are thus withdrawn from their usual military duties to the prejudice of the service. In making the selection none but women of industrious habits and good character will be chosen.

## Foreign.

FRANCE.—The *Moniteur* of Thursday contains the following important announcement:—

"The Emperor has decided that the army and navy shall be restored to a peace footing with the least possible delay. Yesterday the Emperor presided at a combined sitting of the Council and the Council of Ministers."

The *Moniteur* of Tuesday published the following official note on the armaments of France and England:—

"An attempt is made in England to attribute to France the cause of the burdens imposed upon the English people for 'national defences.' It is the pretended exaggeration of armaments which is made to serve as a justification for the considerable augmentation of the army and navy estimates of Great Britain. A comparison between our estimates and those of England will show the falsity of this assertion. Since 1853 the English budget has had an increase of 13,480,000*l.* (or 336,000,000f.), and the 200,000,000f. are for the army and navy estimates. The year which is commencing those two budgets will cost more than 650,000,000f., 332,500,000f. for the army and 320,000,000f. for the navy. In France the army budget voted for 1860, only amounts to 339,458,744f., and the navy to 123,503,143f.—altogether a total of about 463 millions, consequently far below the estimates of Great Britain for the same services. For the army budget the amount is even according to the price of commodities. It is chiefly on account of the high price of food that in 1859 the army budget reached 361,917,500f., including the amount originally voted and the supplementary credits provided for. For the navy the estimates amounted to 122,963,883f. In 1858 the Ministry of War expended 376,822,535f., and the Ministry of Marine 137,980,260f. Now, if we refer to 1853, to see how we stood before the preparations for the Crimean war, we find that the army estimates were 322,740,809f., and the navy estimates 89,[illegible]. Finally, if we take a still more retrospective glance at the last years of the last Government, we find that as regards the army we are below the expenses of 1847, which amounted to 373,365,981f. and 128,647,509f. for the navy. Besides, the figures for 1859 and 1860 do not include the expenses of the war in Italy and those of the expedition to Cochin China, for which it is impossible as yet to form a correct estimate. But it is probable that the loan of 500,000,000f. will leave a disposable sum in hand after the settlement of those expenses, and that as soon as the events which gave rise to them shall have been accomplished they will return to their normal figures. We may then be asked whether the enormous burdens imposed upon the English people are to be attributed to France and her extraordinary armaments, or whether those enormous burdens and the taxes consequent thereon, must not be attributed to other causes."

The *Patrie*, the Ministerial organ, makes the following remarks on the note of the *Moniteur*:—

"Such is the situation created by lying reports as to the extension of our armaments, and by imprudencies of which we that we should hardly have expected from experienced men. Is it not high time that it should cease, and that we should at length resume our rights? What alliance, however cemented soever, could resist these continual causes of suspicion and ill-merited distrust? England is now on the look out for the slightest movement on the part of France, interpreting it as a danger for herself. The false alarm which makes her see things two or three fold. On some past occasions there were ridiculous panics before the world might have been laughed at had they not [illegible] deeply-rooted is distrust towards the French, most among the ignorant classes of the population. We know that a goodly number of [illegible] minds in England render us the justice that is due, and deplore this disposition for annoyance. But

enough to deplore it—it must be altered. This is not only a duty, but a patriotic duty, for the continuance of such a state of things cannot fail to affect the frankness of the relations between the two countries. The conduct of England towards France closely resembles that of a man who, having sworn to another eternal friendship, should so distrust his new friend that he watches his every movement during the night, for fear he should have his own throat cut. England has not slept for some time, or, if sleeping, has had the nightmare. We have all done—we are all still doing—everything to restore her to quiet and repose. If we should not succeed, she can only blame herself for the fears that agitate her, and which, further prolonged, might become an outrage on the sincerity of our acts and feelings."

The *Debats* also contains an article on the strong language used by some of the London journals, and also by members of the House of Peers, with respect to the French Government, and states that it is calculated to seriously weaken the good understanding which it is so important to maintain between England and France. It particularly refers to the language employed by the Earl of Derby, and adds that if by any chance a vote of the English Parliament should again place the Tory party in power, the programme of the new Ministry would be found clearly set forth in the hostile sentiments expressed by his lordship. The article then goes on to say:—

"Mistrust, menace, and almost insult towards France are what we find in that manifesto of the Tory party. Mistrust, because the Emperor's Government never ceases both by its words and acts to satisfy Europe as to its intentions; menace, because France scrupulously abstains from any provocation, and has made no armament or military preparations beyond what were required for the war in Italy; and lastly, almost insult, badly dissembled under this strange appeal to superannuated passions. These are bad proceedings with every one, and dangerous as regards France. To the suspicious and hostile neutrality of England and Germany France has only opposed calmness and moderation. The Emperor victorious restores peace to astonished Europe; will Europe, including England, be less moderate and less pacific than the Emperor? Will England, who takes note of a single vessel more or less launched at Brest, and who votes 300,000,000 francs for her navy; will England, who so loudly calls upon the Continent to disarm, will she set the example, and withdraw from her order of the day this programme of menace or of fear, the sad effect of which we have felt it our duty to point out in the point of view of the alliance we should wish to uphold? When a cloud passes overhead pregnant with electricity, why attempt to deliver the thunderbolt? Who knows where it might fall?"

Accounts from Marseilles state that great efforts are making in the arsenal of that port to supply the French line-of-battle ships with rifled cannon. It is stated that the Emperor will make his public entry into Paris on Sunday the 14th August, at the head of a part of the Army of Italy. The troops will halt on the following day, the 15th, for the Fête Napoleon. The Emperor is expected to remain at St. Cloud on the 16th and 17th, when he will proceed with the Empress to St Sauveur, in the Pyrenees. Their Majesties will afterwards go to Plombières. A rumour was current in the beginning of the week that the Emperor would shortly go to London. The Duke of Malakoff has been appointed Grand Chancellor of the Legion of Honour, and the Emperor has granted to the mother of General Auger an annuity of 3000 fr., to be paid out of his Majesty's privy purse.

PORTUGAL.—Letters from Lisbon give the following particulars of the death of the young Queen of Portugal. Her Majesty's illness commenced on Monday the 11th inst. when she accompanied the King to Vendes Novas to inspect the proving of a new rifled cannon. The day was burning hot, and on the sands there was little or no shade. Shortly after returning home her Majesty complained of indisposition, which at first was considered to be the result of a slight sunstroke, but which at last was recognised as diphtheria. The fatal disease ran its course despite the skill of Dr. Gomez and Baron da Silva, who tried every means known to the medical art to save the royal sufferer. On the 16th dangerous symptoms set in, and slight mortification appeared in the throat. At this juncture Dr. Simas, of the Misericordia, who has a high reputation for the treatment of this class of complaints, was called in, but he at once gave up the case as hopeless. Towards evening it became known about the palace, and was reported out of doors, that the Queen could not escape. As a last resource, however, an operation commonly had recourse to in desperate cases was performed on the throat by the eminent surgeon Barbosa; but it was all of no avail, and shortly after 8 p.m. the Queen expired. The confessor of her Majesty, the Rev. Joseph Ilsey, President of the English College, was in attendance, and administered the last rites of the church. The bed was surrounded by the sorrowing King and the royal family, to all of whom the Queen had endeared herself as much as if her relationship with them had been life-long.

BELGIUM.—This country has just lost one of her oldest and most venerated patriots in the person of M. de Potter, who died at Bruges on the 22d inst. He contributed materially by his writings and personal efforts to bring about the revolution of 1830, and as president of the provisional government, he was the first to sign the decree of the 3d October, 1830, which constituted Belgium an independent kingdom. In the following month he resigned his office of President into the hands of the Congress which then assembled for the first time. He immediately retired into private life, and from that time, up to the moment of his death, he continued to remain in comparative obscurity.

PRUSSIA.—The *Prussian Gazette* contains a note from Baron Schleinitz, the Prussian Minister for Foreign Affairs, referring to the assertion made in a circular of Count Rechberg that proposals of mediation less favourable than those offered by France were made by the great neutral powers before the peace of Villafranca, and declaring that the statement is void of foundation as far as it concerns Prussia. Baron Schleinitz asserts most positively, 1, "That on the side of Prussia no conditions of a mediation whatever had been advanced, nor have any such, coming from any other Power, been accepted by her; and, 2, That the project added to the Austrian circular, and since published in the newspapers, was entirely unknown to the Prussian Government." In confirmation of this statement the *Gazette* publishes a despatch bearing date the 24th of June, and addressed to the representatives of Prussia in Germany, explaining the position of Prussia with respect to the great Powers and the Germanic Confederation, mentioning her negotiations with the Court of Vienna, and concluding by saying that "Supported by a display of great military strength, Prussia reckons on being able to propose to the two great Powers the question of peace at a proper moment, endeavouring to maintain to Austria her possessions in Italy." It also publishes two confidential letters dated June 26 and 27, and addressed to the Prussian Ambassadors at London and St. Petersburg, in which the Berlin Cabinet further insists on the necessity of coming to a prompt understanding on a common intervention out of regard to the particular position of Prussia.

AUSTRIA.—The *Austrian Correspondence* publishes an energetic article concerning the circular recently addressed by the Prussian Minister for Foreign Affairs, Baron von Schleinitz, to the Prussian Embassies in Germany, and endeavours to prove by a combination of facts the correctness of the statement contained in the Imperial manifesto. Preparations are making at Schoenbrunn to receive a deputation from the Court of France, to whom the body of the Duke de Reichstadt will be delivered up for removal to France. The iron crown of the old Lombard Kings, which had been removed from Monza to Verona, is to be placed in the collection of Crown jewels of the empire at Vienna.

ITALY.—The representatives of Austria and France will meet at Zurich in the course of next week. Sardinia has named M. des Ambrois as her plenipotentiary at Zurich. Austria however refuses to meet any Sardinian representative, but will leave it open to Sardinia to accede to the Treaty after it shall have been concluded between Austria and France. The Grand Duke of Tuscany has abdicated in favour of his son, who promises a constitution; but the Tuscans object altogether to the dynasty. The municipality of Florence at a meeting on the 20th inst. voted for the annexation of Tuscany to an Italian kingdom under the sceptre of Victor Emmanuel, or in case the annexation, for reasons of high policy, should be impossible, that Tuscany should be governed by a Prince of the House of Savoy. The Tuscan Minister of the Interior has since published an official report, stating that the result of the deliberations on the question of the annexation of Tuscany to Piedmont has been made known from 141 places, including Leghorn and Florence. This result shows 809 affirmative against 15 negative votes, representing the wishes and interests of 1,135,863 inhabitants. The result of the elections of members of a Special Assembly is also favourable to the independence of Tuscany. The King of Sardinia has surrendered the Government of Modena to the members of the Municipality. The populace immediately proclaimed the Municipality by acclamation dictators of the country. A great number of addresses are in course of signature in the Romagna against the return of the clerical Government, and in favour of union with Sardinia. The country has resolved to maintain public order, to repulse any attack of the Swiss troops in the service of the Pope, and to have a regular voting to express the wishes of the country. The Pope has addressed a letter to the Cardinal Vicar of Rome protesting against the proclamation addressed by the Marquis Massimo d'Azeglio to the people of the Romagna, as Commissioner of the King of Sardinia. The Pope says "the envoy of a foreign Power sent to the revolted provinces of the Holy See, forgetful of the authority which God has established on earth, and of Catholic truth, has dared to proclaim that God has made man free in his opinions, whether political or religious." The Papal Government has also issued the following circular to its representatives at foreign Courts:—

"Palace of the Vatican, July 12.

"Amid all the apprehensions and anxieties occasioned by the present deplorable war, the Holy See had reason to think that it would be unmolested, after the many assurances it had received—assurances with which even the King of Piedmont had associated himself, for or the advice of the Emperor of the French, his ally, he refused the dictatorship which was offered him in the revolted provinces of the Pontifical States. But it is painful to state things have turned out very differently, and facts occur every day under the eyes of the Holy See and its Government, which show more and more how inexcusable is the conduct of the Sardinian Cabinet towards the Holy See—conduct which clearly proves that it is intended to strip the Holy See of a part of its temporal dominions. Since the revolt of Bologna, which his Holiness in his allocution of June 30 has already taken occasion to deplore, that city has become the rendezvous of a multitude of Piedmontese officers, coming from Tuscany and Modena for the purpose of preparing quarters for the Piedmontese troops. From these foreign States thousands of muskets have been brought, wherewith to arm insurgents and volunteers; cannons, also, have been imported to aggravate the troubles in the revolted provinces, and to encourage the audacity of the disturbers of order. Another fact, which renders the refusal of the dictatorship completely illusory, and adds to a flagrant violation of neutrality and active co-operation in the manifest violance of the States of the Church, is the nomination of the Marquis d'Azeglio as an extraordinary Commissioner in Romagna to direct the movement of the Legations during the war; this step, under the specious pretext of preventing the national movement from leading to any disorder, is a manifest usurpation of power which affects the rights of the territorial sovereign of these States. Events have moved on so rapidly that the Piedmontese troops have already entered the Papal States occupying Terra Urbano and Castelfranco, as well as Pieve, Citta Bersaglieri and a part of Nerola. The Papal Legate of the Romagna, on receiving an energetic resistance to the Papal troops, have been sent to restore legitimate power in the rebellious provinces. Finally, and to complete the usurpation of the legitimate sovereignty of the Pope, two officers of engineers, one of whom is a Piedmontese, have been sent to Ferrara to raise and destroy that fortress. Such shameful proceedings, in the perpetration of which a flagrant violation of the law of nations is manifested in every part, can neither but fill the soul of the Holy Father with bitterness and sorrow in this a lively and just indignation, which is rendered more poignant still by the surprise with which he sees such enormities proceed from the Government of a Catholic King who had accepted the services of his august ally to retard the catastrophe offered to him. All the measures taken with the view of preventing or exterminating the series of evils having been from the Holy Father, and forgetful of the notes immediately sent him for the protection of the States and for the preservation of its integrity, of the temporal dominion of the Holy See, is essentially connected with the true and long-pondered cause of the Supreme Pontiff's protests against the usurpations committed in spite of the exceptions of necessity, and desires that his protest may be communicated to the European Powers. Confident in the justice which distinguished these Powers, he feels assured that they will support him; they will not permit the success of a manifest violation of the law of nations and the rights of the Holy Father. He trusts that they will not hesitate to employ in favour of these rights and of that cause, for the interests and protection [illegible] Powers, such means as are [illegible] Finally to Prince Carini, sends the present note to your Excellency, hoping you will transmit it to the Court to which you are accredited, and takes this opportunity, &c.,

"G. CARDINAL ANTONELLI."

THE ADRIATIC.—The harbour of Lussin has been evacuated and the French fleet has set sail.

HUNGARY.—A letter from Florence states that MM. Kossuth, Klapka, and Teleki, who had constituted themselves in that city as a Hungarian committee, have separated, renouncing all projects of political action. M. Kossuth has retired into Switzerland.

MALTA.—Admiral Fanshawe left Malta on the 18th inst. for Naples with five ships of the line and one frigate. Vice-Admiral Mundy has left with three ships and one frigate for Alexandria.

TURKEY.—Advices from Constantinople to the 13th inst. state that the Sultan has given up his projected journey to Egypt, and will merely go to the Dardanelles. Private letters state that Bulgarian women have been carried off by the Turks, and that Bulgarian families are in consternation. The settlement of the question respecting the double election of Prince Couza has been deferred until the arrival of M. de Thouvenel.

SERVIA.—A conspiracy against Prince Milosch and his son Michael has been discovered at Belgrade. The former was to have been assassinated on the 11th inst., at Topschider, and the latter at Schabaz. The conspirators are ex-Ministers and senators, six of whom with Wucsitsch, the former leader of the Liberal party, have been arrested and thrown into prison. The English and Austrian Consuls have protested against this act of tyranny.

RUSSIA AND CHINA.—The *Gazette* of St. Petersburg publishes a treaty concluded between Russia and China, and ratified by the two Emperors. The treaty contains 12 articles, and is signed at Tien-tsin. China grants to Russia leave to send ambassadors to Pekin, promises protection to Christian missionaries, and authorises a monthly mail service between Kiachta and Pekin.

CASHMERE.—It is stated on the authority of a private letter from India, that the Maharajah of Cashmere is forwarding, as a present to her Majesty, a costly shawl tent, containing a bedstead of solid gold. The value of the offering is said to exceed 150,000*l*.

UNITED STATES.—Blondin, the acrobat, has again walked across the Niagara River on his tight rope, wheeling a barrow before him, having first passed over backwards. He was about to make another passage, carrying a man on his back. It is stated, apparently on good grounds, that Mr. Sickles and his wife have resumed matrimonial relations.

VENEZUELA.—A fearful negro insurrection took place at Puerto Cabello on the 15th of June, when a regular war of race and colour commenced. The outrages began at Guaiguasa, where Judge Miguel Maro was assassinated by the negroes. At Puerto Cabello fortunately the negroes were routed after severe street fighting, and retired to the country. All trade was at a standstill and communication with the interior was cut off, but the Government hoped soon to put an end to the insurrection.

# Parliament.

## HOUSE OF LORDS.

FRIDAY.—The *Court of Probate Bill* was read a second time.—The Duke of NEWCASTLE, in moving the second reading of the *Speaker of the Legislative Council (Canada) Bill*, said that the object of the Bill was to permit the Council to elect its own Speaker, instead of that functionary being appointed, as he now is, by the Crown. After a short conversation, the Bill was read a second time.—In reply to the Marquis of CLANRICARDE, the Duke of SOMERSET said that tenders had been sent to the Treasury for conveying the *Mails to America* by way of Panama, and were under consideration, but no contract had been entered into. The *Public Health Bill* passed through committee.

MONDAY.—*National Defences*.—Lord LYNDHURST repelled the charges which had been made against him by Mr. Bright, backed by a noble Lord, in reference to the remarks he had made on the national defences. As to the charge of age, and of being an old peer, he pleaded guilty, and at the same time he duly acknowledged the power of the sarcasm, so pointed, so keen, so bitter, and so applicable to the taste and habits of the hon. member who had made so extraordinary a discovery. As to the charge of making remarks calculated to wound the susceptibility of a neighbouring nation, nothing was further from his intention which was only to arouse this country to the necessity of putting its defences in an efficient state. It might be the policy of some private individuals, when one cheek was smitten, to turn the other cheek to the smiter, but

such was not his feeling, nor ought it to be that of a great nation. He concluded by asking whether the Government were aware that the French fleet was arming with rifled cannon, and if it were true that only 100 rifled cannons could be supplied this year, and 200 the next, to her Majesty's fleet?—The Duke of SOMERSET said that he had heard that the French fleet was about to be provided with rifled cannon, and admitted that the rifled cannon for the armament of our fleet would not be ready for some time. He did not think it expedient at the present time to enter into a discussion of what was doing in our arsenals and dockyards.—Lord BROUGHAM, in calling the attention of the House to the state of *National Education*, gave a sketch of the progress made during the last 40 years. He showed the vast increase in the number of day and Sunday schools and of the numbers who attended them since 1818, and described a plan of secular education which he had formerly advocated. The difficulties of the question were much increased by religious differences; but he would prefer education even under the Pope of Rome to no education at all. He referred in high terms of praise to the efforts made to promote education by training skilled masters and pupil teachers, and urged the necessity of providing well-educated school mistresses, as the well-being of so large a class of the female population depended upon them. He concluded by proposing that the Committee of Privy Council should inspect the middle-class schools throughout the country.—The Bishop of LINCOLN thought the plan of inspecting middle-class schools would be productive of much advantage.—Lord GRANVILLE was very unwilling, considering the enormous amount of work already imposed on the Committee of the Privy Council, to place upon them the additional labour of inspecting middle-class schools. Several Bills were advanced a stage.

TUESDAY.—The *Sale of Gas Bill*, after a short discussion, was read a third time and passed. The *Chief Superintendent (China) Bill* passed through committee. The *Speaker of the Legislative Council (Canada) Bill*, the *North-Western Territories (British America) Bill*, and the *Public Health Bill* were read a third time and passed.—The Bishop of LONDON, in presenting petitions from different parts of the country, and one in particular from the London Diocesan Church Building Society, upon the *Spiritual Destitution of the Metropolis* and of the large manufacturing towns, called attention to the importance of appointing a separate department in the Ecclesiastical Commission for church building purposes. He complained of the inadequacy of the accommodation provided by the Commission in places where large funds were placed in their hands, and suggested that unnecessary difficulties were thrown in the way of obtaining sites for churches by the law of mortmain. A select committee of their Lordships' House had recommended that the Ecclesiastical Commission should be obliged to attend first to the local claims of those places in which they had property, if actual spiritual destitution existed there, and as this course had not been adopted the recommendation of the committee had proved fruitless.—The Earl of CHICHESTER made some remarks on the difficulty of conveying sites for the erection of churches, and defended the Ecclesiastical Commissioners.—Lord EBURY spoke in favour of giving the first attention to local claims.—The Bishop of OXFORD also hoped that any Bill which was passed would provide for the extension of local claims, and urged the Government to bring in a Bill this session on the subject.—After a few words from Lord REDESDALE, Lord GRANVILLE said that the Government could not pledge themselves to introduce a Bill on the subject at the present late period of the session.

THURSDAY.—*Divorce Court Bill.*—On the motion of the LORD CHANCELLOR the House went into committee on this Bill, when, after a short debate, it was decided that a clause should be added extending the operation of the Bill to Ireland, and to all persons domiciled in India, or in any of the colonies or dependencies of the Crown. A discussion took place upon the clause empowering the Court to sit with closed doors in cases of indecency, which ended in a division, the numbers being 26 in favour of the clause, and 9 against it. The clause was therefore carried. After a few remarks from the law lords, the clause giving the Court power to invoke the assistance of the Attorney-General in cases where there was reason to suspect collusion was adopted, and the Bill passed through committee. The *Diplomatic Pensions Bill*, the *Consolidated Fund* (7,000,000*l.*) *Bill*, the *Cambridge University Bill*, and the *Criminal Justices, Middlesex (Assistant Judge), Bill* were read a second time. The *Chief Superintendent (China) Bill* was read a third time and passed.

FRIDAY.—*Church Rates.*—In answer to the Marquis of SALISBURY, the Duke of NEWCASTLE said that he could not say positively whether the Government intended to proceed with the Church Rates Bill this session, but so far as his own opinion went, he thought it was not advisable to do so. *Revision of the Liturgy.*—Lord EBURY presented a petition from certain clergy of the Established Church, praying the House to address the Queen for a royal commission to revise the liturgy. [Left sitting.]

## HOUSE OF COMMONS.

FRIDAY.—*The Treaty of Villafranca.*—In answer to Mr. GRIFFITH, Lord J. RUSSELL said he had understood from the Emperor of the French that there is no provision or understanding in the Treaty of Villafranca that the late dynasties of Tuscany, Modena, and Parma are to be restored if necessary by military force.—Lord HOTHAM asked for information respecting a paragraph in the report of the Trustees of the *National Portrait Gallery*, accepting the great picture of the House of Commons at the opening of the first Reformed Parliament in January, 1833, as painted by Sir George Hayter.—Mr. LAING said that the only explanation he could give was, that the vote was found in the estimates left to the present Government by their predecessors.—Mr. DISRAELI said the late Government had been recommended to purchase the picture. The sum of 500*l.* was asked for it, but he had directed that the opinion of competent persons should be taken, and the result was that it was purchased for 200*l.*—Lord ELCHO said he was one of the persons consulted, and that thinking the Reform Bill a great landmark in the history of the country, he had recommended the picture to be purchased.—Mr. MELLOR called the attention of the House to the recent appointment of *Justices of the peace for Great Yarmouth*; and inquired if Ministers intended to introduce any measure for regulating the appointment of justices of the peace for boroughs in England and Wales.—Sir H. STRACEY having defended the late appointments at Yarmouth, Sir G. Grey said it was not the intention of the Government to introduce any measure on the subject. *Harbours of Refuge.*—In answer to Mr. PEASE, Lord PALMERSTON said that he admitted the great importance of harbours of refuge, but as the estimated expense would amount to no less than 4,000,000*l.* the Government did not intend to bring in any Bill on the subject in the present session. *National Gallery.*—Mr. CONINGHAM moved a resolution that the system of management which now exists at the National Gallery is highly unsatisfactory, and detrimental to the public service. He denounced the management of the National Gallery, and declared that under the auspices of Sir C. Eastlake the public money had been squandered in the purchase of worthless pictures, while good works of art were rejected. The motion not being seconded fell to the ground.—Mr. HENNESSEY called attention to the failure of *Mixed Education in Ireland*, giving details of facts from which he deduced the conclusion that the failure was as apparent in the colleges as in the national schools, contending that the system of education in the national schools tended to denationalise the children.—Mr. WHITESIDE pointed out the causes which had disappointed the intentions of those who had designed the national system of education in Ireland, and which, he believed, would continue to frustrate the object, the system of the National Board not being acceptable to the people. A united system of education could never be had, but we might have a national system acceptable to all classes.—After some remarks from Mr. BUXTON and Mr. LONGFIELD, Mr. ADDERLEY advocated the propriety of establishing a uniform system of education throughout the United Kingdom.—Mr. MONSELL remarked upon the extraordinary fact that the Queen's colleges in Ireland had cost 252,000*l.*, and that only 252 students had graduated in them. Each graduate had consequently cost the country 1000*l.*—Mr. LEFROY and Lord NAAS spoke in favour of enlarging the sphere of the national system.—Mr. CARDWELL denied that the Queen's colleges had failed to answer the object contemplated, as the number of students was on the increase, and the reports of the visitors were of a most hopeful character. He also argued that the national system of education had been eminently successful, but declined to give any opinion upon the vexed question of mixed education until he had returned to Ireland, and personally inquired into the subject. The House then went into Committee of Supply on the *Civil Service Estimates* and civil contingencies, and, after a long discussion on the existing educational system, which lasted until past midnight, the principal *Education Vote* (586,920*l.*) was agreed to. The Report of the Committee of *Ways and Means* was brought up and agreed to, and a Bill was ordered to be brought in founded upon the resolutions. The *Boundaries (Ireland) Bill* was read a second time. The *Westminster New Bridge Bill* passed through committee. The *Poor Law Boards (Payment of Debts) Bill* was referred to a select committee.

MONDAY.—*Discipline of the Navy.*—At the morning sitting Mr. LIDDELL put a question relative to certain disturbances said to have taken place on board her Majesty's ships Liffey, Cæsar, and Hero.—Lord C. PAGET replied that the accounts had been much exaggerated. The refusal of leave of absence was said to have been the cause of the disturbance. He then entered at some length into the subject of corporal punishment, which could not altogether be put down, but which he hoped would die a natural death.—Lord LOVAINE hoped that corporal punishment would not be abolished without a distinct declaration.—Lord C. PAGET said that he did not mean that corporal punishment would be abolished.—Sir J. TRELAWNEY said that much of the heart-burning in the army arose from this cause.—Sir C. NAPIER said that the punishment could not be dispensed with altogether, but it ought not to be inflicted at the arbitrary will of the captain. The House then went into committee of supply on the *Miscellaneous Estimates*. A lengthened discussion on the subject of *Irish Education* was raised by Mr. MAGUIRE, who contended that the pay to the teachers was too small, and that the national schools were altered from the original constitution, and operated unfairly towards the Roman Catholics.—Mr. LABOUCHERE and Mr. CARDWELL defended the present system. At the evening sitting Mr. ADDERLEY called attention to the *Military Defences of the Colonies*, and to the sources from whence those defences were supplied. The mother-country at present supplied not only the men, but the money for this purpose. Only one-tenth of the cost at present fell upon the colonies. The taxes paid by Great Britain were 50 times greater than those of the colonies in proportion to the population. Some alterations were imperatively called for, that the colonies might learn to defend themselves without always depending on us. There was a further reason for change. The colonial troops were well adapted for service in their own country, while the European troops were uselessly sacrificed owing to the effects of the climate. He did not believe that any risk would be incurred of a declaration of independence by the colonies if they were left to their own defence.—Lord C. CHURCHILL thought that some regulated scale should be adopted under which a certain amount should be furnished to the colonies.—Sir DE LACY EVANS moved a resolution to the effect that, taking into consideration the relations existing between some of the great military Powers of the Continent, it is advisable that a commission be appointed, consisting of civilians and military and naval officers, to inquire into and collect information concerning the present condition of our national defences; to ascertain what improvements may be made therein in order to insure the utmost efficiency combined with economy; and to report thereon to her Majesty's Government.—Mr. D. SEYMOUR called attention to the undefended state of the coast between Weymouth and Southampton.—Mr. S. HERBERT, in reply to Mr. Adderley, admitted that nothing could be more irregular than the manner in which troops for defence were now furnished to the colonies. A distinction ought to be preserved between the troops furnished to the colonies for purposes of defence and those furnished for purposes of police. He stated to the House the figures of the several amounts paid by England to various dependencies, comparing them with the sums contributed by those dependencies themselves. Instructions had been sent out to the colonial authorities for the purpose of obtaining the fullest information with a view to future arrangements; but he was not sanguine of an early settlement of the question, or that any uniform scale would be adopted. With regard to the defence of the country, the attention of the Government had been carefully given to the subject. It was impossible to fortify every point. Their first consideration necessarily was the fortification of our great ports and national arsenals, and for the satisfaction and confidence of the public it was the intention of Government to appoint a commission with the view of maturing such plans as should put our arsenals in a state respecting which no one could feel alarm.—Mr Justice HALIBURTON said that the colonies had already defended themselves, and would do so again. At the same time there was a reciprocal obligation between them and the mother country, of loyalty on the one side and defence on the other. The Canadian militia at the time of the rebellion drove out the Yankees and the French rebels. But it was the very knowledge that England was ready to protect them in case of need which enabled them to do this. If England withdrew her fleets he demanded on behalf of the colonies that they should receive their independence. With regard to the colonial militia, so far as England was concerned it was not managed, it was mismanaged. The colonies had shown during the Crimean war the utmost loyalty, and deserved due consideration in return.—Mr. HORSMAN was glad to hear that a commission was to be appointed to inquire into the state of our national defences. He hoped, however, that as little as possible of the official element would be introduced into it.—Mr. C. FORTESCUE declared that every effort would be made to adjust the balance of expenditure between the colonies and the mother country, which in some respects pressed too heavily upon the latter.—After some remarks from Lord ELCHO and Lord H. VANE, Lord PALMERSTON appealed to Sir D. L. Evans to be satisfied with the course proposed by the Secretary-at-War. As regarded the colonies, it was impossible to lay down any arbitrary rule in reference to the number of troops to be sent out. This must depend upon the circumstances of the time, and upon our relations with foreign States.—Mr. AYRTON urged the formation of a military reserve as of the utmost importance to our national defences.—Sir C. NAPIER moved an address praying for a commission of inquiry into the state of Greenwich Hospital. The motion fell to the ground, there being already that of Sir D. L. Evans before the House. The latter motion was negatived without a division, after which the House went into *Committee of Supply*. The debate on the vote on *Irish Education* was resumed, and the vote agreed to. Other Irish votes on the civil service were taken. A motion for the reduction of the vote for the *College of Belfast* was negatived by 115 to 35.—Mr. WALPOLE moved the vote for the *British Museum*, and stated that the amount was rather less than that of last year. He entered into some [illegible] as to the additions made to the Museum, and the number of visitors. A discussion followed, in which it was urged that the collection should be redistributed; that the Museum should be opened to a late hour on Saturdays; that the assistant officers should be better paid; and that better accommodation should be provided for the contents of the Museum.—Mr. WALPOLE, in reply, said that no committee of that House could deal satisfactorily with all these subjects. It would probably be necessary to enlarge the Museum as far as the adjoining street, but all these matters must be done by the executive.—The CHANCELLOR of the EXCHEQUER said that proper accommodation for the collections could only be provided by their separation, and it would be the duty of the Government in due time to bring that question before the country. In the present state of the public finances he must abstain from all present movement. The vote was then agreed to.—The CHAIRMAN then reported progress, and the House resumed. The *Vexatious Indictment Bill* was read a second time.—After some discussion, Mr. S. HERBERT obtained leave to bring in a Bill for the amendment and consolidation of the laws relating to *Military Savings Banks*.—Sir G. C. LEWIS obtained leave to bring in a Bill to amend the laws relating to *Roman Catholic Charities*.

TUESDAY.—At the morning sitting, after a considerable time had been occupied with private business, Sir J. TRELAWNEY moved that the House resolve itself into a committee upon the *Church Rates Abolition Bill*.—Mr. NEWDEGATE moved, as an amendment, that the House resolve itself into committee to consider the propriety of establishing, in lieu of church rates thenceforth to be abolished, a charge on all hereditaments in respect of the occupancy of which church-rates have been paid within the last seven years, to be levied with the county rate at an uniform rate of poundage, the occupier being in all cases entitled to deduct from his rent the amount of the charge levied upon his occupation, to be paid to the Governors of Queen Anne's Bounty, who shall be empowered to administer the same for the purposes of church-rates. He did not propose, he said, to alter one word of the Bill; he accepted the decision of the House that church-rates shall be abolished, and he proposed this charge, at the rate of 2*d.* in the pound, as a substitute that would satisfy conscientious scruples, and obviate the objections made to church-rates. Where church-rates had been abolished the abolition should be sanctioned: this limit should not be exceeded, and the whole burden cast upon the voluntary system, which was already deficient to a considerable extent.—Mr. DODSON opposed the resolution on the ground that it would substitute a fixed burden for a rate voluntarily made.—Lord HENLEY considered the remedy suggested to be worse than the disease.—Sir J. TRELAWNY urged various objections to the amendment.—Sir M. FARQUHAR said that though opposed to the abolition of church-rates without a substitute, he could not support the amendment. On a division the amendment was negatived by 191 to 99, and the House went into committee upon the Bill, but little progress was made in the clauses when the Chairman left the chair. The *Universities (Scotland) Bill* was read a third time and passed. In the evening the House was counted out at 10 minutes past 6.

WEDNESDAY.—The *Salmon Fishery Bill* was withdrawn for the present session. The House then went into committee upon the *Railway Companies Arbitration Bill* and the *Improvement for Small Debts Bill*, the clauses of which were agreed to without alteration after much discussion. On the order for going into committee upon the *High Sheriffs' Expenses Bill*, Mr. WISE suggested various objections to the Bill, and moved that the Bill be committed that day three months.—After a desultory discussion in which Sir J. SHELLEY, Mr. DENISON, Mr. HENLEY, Mr. PARKER, Sir G. LEWIS, Lord HOTHAM and other members took part, the House divided, when the amendment was carried by 115 to 112; so the Bill was lost. The House then went into Committee upon the *Municipal Corporations Bill*, the clauses of which were agreed to. The second reading of the *London Corporation Bill* was postponed to Monday. On the order for going into Committee of Supply Sir C. NAPIER renewed his motion for an address to her Majesty to appoint a Commission to inquire into the management of *Greenwich Hospital*.—Mr. WHITBREAD opposed the motion. If during the autumn, after the Government had had an opportunity of thoroughly investigating it, they found themselves unable to deal with the subject, then would be the time to move for a Royal Commission. After a short discussion, the House divided, when Sir C. Napier's motion was negatived by 142 to 82. The House then went into a Committee of Supply upon the remaining *Civil Service Estimates* and *Civil Contingencies*, one item of which, the vote of 15,985*l.* for the *National Gallery*, provoked a long and animated discussion, embracing the whole management of the Gallery and the merits of Sir C. Eastlake and of the pictures purchased for the Gallery.—Mr. CONINGHAM moved to reduce the vote of 650*l.*, charged as travelling expenses. On a division the motion was negatived by 171 to 40.—Mr. SPOONER then moved to reduce the vote by 10,000*l.* for purchasing pictures. On a division the motion was negatived by 136 to 64. The *Local Government Act Tax Bill* was read a second time. The *Local Government Supplemental Bill* passed through committee. The *Military Savings Banks Bill* was read a second time.—Mr. MONSELL brought up the report upon the *Wakefield election petition*, declaring that Mr. W. H. Leatham was not duly elected, and that the election for the borough was a void election.—Mr. LEFROY brought up the report from the committee on the *Dartmouth election petition*, declaring that Mr. Schenley was not duly elected.

THURSDAY.—At the morning sitting, the House went into a Committee of Supply upon the remaining *Civil Service Estimates* and *Civil Contingencies*, which were under discussion during the sitting.—Mr. S. HERBERT stated in answer to a question by Sir H. VERNEY respecting *Rifled Cannon*, that instructions had been sent to the Government establishments to have the smooth cannon rifled, and that in a short time 15 or 20 guns per week would be subjected to that process.—*Foreign Affairs.*—Lord J. RUSSELL made his promised statement respecting the present condition of foreign affairs. He could have wished, he said, to postpone this statement until some definite settlement had been arrived at, but in the present position of affairs he did not think it right to withhold it from Parliament. He was glad to be able to announce that the Emperor of the French was about to withdraw his forces by sea and land upon a peace footing. After referring to the sudden and unexpected termination of hostilities between Italy, and to the motives avowed by the Sovereigns of France and Austria for the Treaty of Villafranca, he observed that although the reasons assigned by both had a certain weight, he believed that there was a reason not assigned in any public paper which had considerable weight with the two Emperors, namely, the numbers that had fallen upon the field of battle, and it was no disparagement to either to suppose that they were influenced by such a terrible spectacle. The Treaty of Villafranca consisted of two parts. By one part peace was made between the Emperor of the French and the Emperor of Austria, and by the other Lombardy was ceded to the former, to be delivered over to the King of Sardinia. With regard to this matter, it was a question who had taken no part in the war, or the other Powers of Europe to interfere. But the other part of the treaty was of a different nature. It proposed an organisation for the Confederation of Italy. Now it had been proposed by France that Great Britain should enter into a Congress at Zurich to settle upon general questions, not the details of the treaty. But Her Majesty's Government, he said, had not thought it necessary to give any precise answer to the proposition of the French Government; but they had signified to our Ambassador at Paris that, if there was to be any Conference or Congress

two things were requisite—first, that the Treaty of Zurich should be seen; secondly, that the Emperor of Austria must be a party to any discussion on the state of Italy. The first question raised would relate to a Confederation. Though he thought that such a Confederation would be wise, he doubted whether the time had yet come when it was practicable, and whether a Confederation with the Pope as chief, and the Emperor of Austria as one of its members, would be desirable. How could such a Confederation lay down rules of conduct, or be expected to assent to religious toleration and liberty of conscience? Therefore, although an Italian Confederation might in time be practicable, the Peace of Villafranca hardly fulfilled the conditions required for forming such a federal union. There arose another question, as to the mode in which the treaty was to be carried into effect, and it would be necessary to have a complete understanding upon that point before her Majesty's Government should send any representative to a Congress or Conference. According to the treaty, the Sovereigns of Tuscany and Modena were to return to their States. But the Grand Duke of Tuscany was in the position of a sovereign who had violated, by abdication, the fundamental law of his State. Although he had no official assurance upon the subject, he was convinced that the Emperor of the French had no intention to employ French troops for the restoration of the Grand Duke, and he believed that the Emperor of Austria had as little intention to lend his troops for such a purpose. This threw at once a great difficulty in the way of carrying the treaty into effect, and it was necessary, before going into conference, that there should be a clear understanding upon this subject. Another question was, perhaps, the most difficult of all—namely, the temporal government of the Pope. Bologna had been kept in obedience for 10 years by an Austrian garrison, and as soon as the Austrian troops left the Cardinal Legate immediately followed them. The Emperor of the French and the Emperor of Austria had recommended to the Pope indispensable reforms; but the Pope declined to adopt the policy they advised. These were some of the difficulties attending this question. As to the King of Naples, he was happy to say that he had made a beginning in putting a stop to the tyrannical system which prevailed under the late King; and, he believed, from the decided views of his Minister, the Duke of Satriano, that it would cease altogether. As far as he could learn, the Emperor of the French was most anxious that Italy should enjoy the privilege of self-government, and he was convinced that an independent State in Italy would be for the welfare of Europe, and afford a security for future peace. He was confident that it would not be wise for her Majesty's Ministers, still less for the House, to come to a peremptory decision upon the subject of entering into a Conference, and that it did not become us to say suddenly that we would withdraw from the assembly of the different Powers of Europe if it afforded a chance of confirming peace and maintaining the independence of States.—Mr. DISRAELI expressed his hope that Ministers would not send an Ambassador to the Conference, and asked if it was true that England had proposed to Austria terms which were less favourable than those which she could herself obtain from France.—Lord PALMERSTON said that England had not made propositions to Austria of any kind whatever; all that her Majesty's Government had done was to be the agent in communicating to the Austrian Ambassador at this Court a memorandum given to Lord John Russell by the French Ambassador; but upon which the noble lord said he would give no advice and express no opinion. If England entered the Conference, she would not do so with any embarrassing engagements, but nothing had as yet been determined with reference to the subject.—Mr. BOWYER and Mr. MAGUIRE defended the government of the Pope; Mr. WHITESIDE reviewed the foreign policy of Lord Palmerston in 1848; Mr. DRUMMOND defended the conduct of Sardinia; and the CHANCELLOR of the EXCHEQUER replied to Mr. Whiteside. After some further discussion the subject dropped. The *Highways Bill* was withdrawn, and several Bills were advanced a stage.

FRIDAY.—*Income Tax*.—The House at the morning sitting went into committee of Ways and Means, when Mr PHOTT said that as the Income Tax was not to be permanent, he should not propose the amendment of which he had given notice, for reducing the assessment on trades and professions from fourpence to twopence in the pound.—Sir W WILLOUGHBY's amendment for reducing the assessment on long annuities was negatived by 72 to 57. The clauses of the Bill were then agreed to. The resolution reducing the limit for the payment of malt duties was also agreed to. On the motion of the CHANCELLOR of the EXCHEQUER, a clause was added to the bill remitting the Income Tax on deferred annuities purchased from the Government. The House then went into *Committee of Supply*.

[Left sitting.]

## City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: In consequence of the announcement in the *Moniteur* that the French army and navy are to be reduced to a peace footing with the least possible delay, the English funds opened on Thursday at a rise of a half per cent., but it was only partially maintained. Consols closed at 94⅝ to 95 for Money and Account; Bank Stock, 221 to 223; Reduced and New Three per Cents., 95 to 95⅛; Five per Cents., 111; Indian Four per Cent. Debentures, 1858, 94½; ditto 1859, 93⅛; Scrip of last Indian Loan, 94⅛; India Bonds, 3*s*. dis.; Exchequer Bills, 28*s*. to 31*s*. prem.—FOREIGN: Brazilian Four and a Half per Cents., 1858, 94⅝; Mexican Three per Cents., 18⅛ to 18⅜; Portuguese Three per Cents., 1853, 44⅝ to 44½; Spanish Three per Cents., 44; Turkish Six per Cents., 1854, 81½ to 80⅞; Ditto for Acct., 81½ to 81; Ditto for 1858, 70⅜ to 70⅝; Ditto for Acct., 71½ to 71⅛; Ditto Guaranteed Four per Cents., 104½; Venezuela New One per Cents., 14⅞.

## Gazette of the Week.

TUESDAY.—BANKRUPTS—H. BEARLEY, Kingston-upon-Hull, Draper and Tailor, Manufacturer—J. BURRELL, Worcester, Draper—J. LEES, Hackney Road, Boot and Shoe Manufacturer—W. FOOT, Victoria Terrace, New Cross, Deptford, Builder—B. W. GLADWELL, Poultry, City, Manufacturer, Importer of and Wholesale Dealer in Stereoscopes, Stereoscopic Slides, and Photographs—R. HARMAN, Lichfield, Yorkshire, Corn Dealer and Coal Merchant—R. HAYWOOD, High Street, Homerton, Grocer and Cheesemonger—J. HILLS and D. W. JENKINS, Tipton, Staffordshire, Coal Merchants—J. [illegible], Twickenham, Middlesex, Surgeon and Apothecary—F. MOSS, Mansfield, Nottinghamshire, Millsner—G. PARSLOW, Old Street, St. Luke's, Timber Merchant—V. SAMSON, Brick Lane, Spitalfields, Baker's Terrace, East India Road, L[illegible]house, and Norwich, Wholesale Boot and Shoe Manufacturer—R. SMITH, Sw[illegible], Northampton, Iron and Brass Founder, Engineer, and Ag[illegible] Implement Maker—J. J. H. TAYLOR, Almondbury, Yorkshire, Manufacturer.

SCOTCH SEQUESTRATIONS—J. and J. MILLAR, Dundee, Hat Manufacturers—J. SPEED, Patrick, Builder—C. K. STEVENWRIGHT, Edinburgh.

FRIDAY—BANKRUPTS—C. J. GOODWIN, Hulme, Manchester, Tavern Keeper—J. HARRIS, Highweek, Devonshire, Coal Merchant—H. HOPPS and G. TILLEY, Saint George's Wharf, Cambridge Street, Old Saint Pancras Road, Bricklayers—W. LANCASTER, Bury, Lancashire, Coal Merchant—J. M[illegible], West Ferry Road, Poplar, Ostler—P. O'REILLY, Longford, Merchant—J. M. PEARSON, Cawthorne, Yorkshire, Builder—W. [illegible], Lansdown Arms, Islington, Licensed Victualler—J. PARTEN, Commercial Road East, Middlesex, Draper—J. WARD, jun., Pimlico, Glass Dealer—J. WOOLCOTT, Oxford Street, Dealer in Cigars—W. L. WOOD, Puckeridge, Hertfordshire, Grocer.

BANKRUPTCY ANNULLED—M. TODD and W. W. TODD, Newry, Ireland, Merchants.

SCOTCH SEQUESTRATIONS—J. HARVEY, Edinburgh, General Agent H. OLLENDORFF, Great King Street, Edinburgh.

## Metropolis and its Vicinity.

THE NATIONAL GALLERY.—The trustees of the National Gallery having been desirous that the pictures bequeathed by the late Mr. Jacob Bell should be exhibited to the public without delay, 14 of those pictures have, with the concurrence of the executors, been placed temporarily in the staircase at Marlborough House, viz:—"The Bather," by Etty; "The Sleeping Bloodhound," "Dignity and Impudence," "Alexander and Diogenes," "Shoeing," and "Highland Dogs," by Sir Edwin Landseer; "Bloodhound and Pups," and "The Pillaging of a Jew's House," by Charles Landseer; "River Scene," and "Evening in the Meadows," by F. R. Lee and T. S. Cooper; James II., by E. M. Ward; "Bibliomania," by W. Douglas; "The Foundling," by G. B. O'Neill; and a replica of "Uncle Toby and the Widow," by Leslie. Some other pictures included in the bequest are at present in the hands of publishers, or with the artists. The contents of Marlborough House, comprising all the English pictures of the National Gallery, are to be transferred for a time to South Kensington, as soon as the scientific authorities who have been consulted are satisfied that the walls of the new buildings are sufficiently dry. Upon the removal of the Royal Academy the English pictures will be restored to Trafalgar Square, and constitute, with the pictures of foreign schools, one undivided collection.

MONUMENT TO LORD LYONS.—It is intended to raise by public subscription a memorial in honour of Vice-Admiral Lord Lyons, to be erected in St. Paul's Cathedral, or elsewhere, as may be determined upon. Among the committee are—Vice-Admiral Sir A. Clifford and the Hon. Sir M. Stopford, Rear-Admirals Sir C. Fremantle, F. T. Michell, C. Talbot, Sir T. Pasley, Lord George Paulet, Hon. Sir H. Keppel, Lord C. Paget, and Dacres, General Sir George Brown, Lord Rokeby, &c.

STATUE OF GENERAL SIR CHARLES NAPIER.—Mr. Adams, the sculptor of the colossal statue of General Sir Charles J. Napier, in Trafalgar Square, has just completed the model of another statue which is intended to be placed in St. Paul's Cathedral. The general is represented in repose, leaning on his sword, with a rolled up scroll in his right hand, which rests upon his side, so that the figure is totally different from its predecessor in the square, though the likeness is from the same source—a mask taken from the face after death. It stands 8 feet high, on a plinth 6 inches.

THE LOSS OF HER MAJESTY'S SHIP HERON.—The Athens, Cape mail packet, which has arrived at Devonport, brings intelligence that Mr. Blair, mate of Her Majesty's late sloop Heron, and 39 men, of whom 25 are Europeans, have been picked up by the barque Eleanor of Cardiff, and are believed to be now on board Her Majesty's ship Vesuvius at Ascension, awaiting their passage to England. From the statement of Mr. Blair it appears that, in consequence of the imprudence of Lieut. Collingwood in persisting in washing decks while carrying a press of sail in squally weather, the ship was caught in a tornado on the 9th of May and almost immediately went down. Commander Truscott, with the boatswain, gunner, and about 15 men got away in the whale boat, but have not since been heard of. Lieut. Chapman and 14 other men were absent from the ship in charge of a prize, and are all safe at Ascension.

COOLIE AND CHINESE IMMIGRATION TO THE WEST INDIES.—A deputation from the British and Foreign Anti-Slavery Society had an interview with the Duke of Newcastle at the Colonial Office on Saturday to present a memorial, adopted at a meeting on the 13th inst., praying for a committee of inquiry into the system of Coolie and Chinese immigration. Lord Brougham, who introduced the deputation, stated that he thought there would be no time for the committee asked for in the memorial, and that a royal commission would be preferable. Several other members addressed his Grace, stating that there was practically no limitation to the number of immigrants introduced, that African immigration was thrown open to our colonies while the Government strenuously opposed it on the part of the Emperor of the French, that the mortality in the immigration from China varied from 17 to 60 per cent., that a very large mortality took place before they left their own country, and that there was an enormous disparity of the sexes, especially among the Chinese. The Duke of Newcastle in reply said that he thought the deputation had been misled in some of their statements, that the mortality upon an average did not exceed 5 or 6 per cent. on board the ships, and not so much in the [illegible], and that it would be impossible to have a committee at this season. They had already an immense amount of information, which was annually laid before Parliament, but if further inquiry were necessary he thought it would be far better that it should take place by a commission. But what he thought would answer still better was that some of the gentlemen present should assist him in drawing up questions to be sent out, and he would undertake that they should be answered by persons of authority in the colonies, and they could also be sent to other persons to whom it might be thought proper to send them. It was then agreed that Lord Brougham should communicate with his grace before the session was over with respect to drawing up the questions, and that he should give the names of some 14 or 15 gentlemen now in this country who are prepared to tender important evidence which they may be unable to give at a future time.

SERIOUS ACCIDENT TO LORD MANNERS.—On Friday afternoon a serious accident occurred to Lord Manners, uncle of the Duke of Rutland. A valuable horse which had been sent by Lord Vane for his lordship to try was brought to the door of his residence in Upper Brook Street, and seemed very quiet, but the moment Lord Manners was mounted it dashed at a furious pace up the street, and became perfectly unmanageable. Notwithstanding many efforts to check his career, he made with increased speed for the foot entrance-gate of the park, and dashed in. The iron bars across the entrance being very low, caught the head of Lord Manners, who was hurled to the ground with terrible force. He was conveyed in an insensible condition to his residence, but as the injuries are less serious than was expected, it is hoped that he will recover. The horse was shortly afterwards caught and killed.

THE SOUTHERN MAIN DRAINAGE.—At the meeting of the Metropolitan Board of Works on Friday the tenders for contracts for the southern high level sewer, which will extend from Clapham to Deptford, and consist of two 10-feet barrel sewers running parallel to each other for some distance near the outlet, were opened. The total length to be traversed will be about eight miles. The following tenders were sent in:—Dethick, 223,000*l*.; Lavers, 229,000*l*.; Moxon, 217,800*l*.; Downes, 228,760*l*.; Lucas, 217,000*l*.; W. H. Rowe, 218,600*l*.; J. N. Helling & Co., 216,750*l*.; G. Myers, 212,700*l*. The Board accepted the tender of Messrs. Helling & Co., subject to the usual inquiries.

STATE OF THE SERPENTINE.—On Tuesday a deputation waited upon the Right Hon. H. Fitzroy at the Office of Works, on the subject of the continued unwholesome and dangerous condition of the Serpentine in Hyde Park. The deputation consisted of Mr. James Heywood (late M.P. for North Lancashire), Dr. Copland, Dr. Spurgin, Dr. Tilt, Dr. Pettigrew, and Mr. John Lilwall. Mr. Heywood having introduced the deputation, Mr. Lilwall, as hon. Secretary to the committee for promoting the proposed improvements, said that the first thing to be done was to shut out the filth that flowed into the lake from the Kensal Green Cemetery and the Bayswater sewer; to fill up the deep holes; to reduce the bed of the river to a graduated depth of from 2 to, at the utmost, 6 feet; and lastly, to provide an increased supply of water sufficient to bring the cascade at the eastern end into constant play. He suggested that the plan which had been adopted for improving the lake in St. James's Park was of a most simple kind, and as it had answered its purpose so admirably, he thought that the same method might be adopted with advantage for putting the Serpentine in order. The other members of the deputation having pointed out other objections, especially in reference to the injurious effect of the water upon the public health, Mr. Fitzroy said that his original idea was to carry out the plan of levelling the bottom, but he feared it was too great an undertaking. In two or three years the Metropolitan Board of Works would meet one of the evils through their main drainage system. Though he agreed with a great deal that had been said, he could not promise to carry out all the suggestions which had been offered. He would, however, do what he could to mitigate the evils complained of, and would promise that something should be done to purify the water.

CLOSING OF VAUXHALL.—Vauxhall Gardens, which from the reign of Charles II. to the present time have been celebrated for their walks and variegated lamps, their musical and other performances, their suppers, and fireworks, were opened as a place of public recreation for the very last time on Monday evening, when Mr. George Stevens, who has been connected with the property for 35 years, and under whose direction a series of farewell performances was given last week, took a benefit which may be presumed to have been highly remunerative, since the attendance of visitors was enormous. Workmen have since begun to level the tall trees and wooden edifices, and in the course of a few months the entire site will be covered with new lines of streets and terraces.

FIRE IN THE LONDON DOCKS.—On Tuesday morning shortly after 9 o'clock a fire occurred in one of the divisions of the brandy vault at the London Docks, which was extinguished in about two hours by the prompt use of the dock engines and the powerful floats of the fire brigade. About 50 casks of brandy or other

spirits were destroyed, and a number of casks received injury. During the progress of the fire, about 20 of the brigade and 30 or 40 dock hands, while endeavouring to reach the fire in the cellars, were struck down by the heated vapour and rendered insensible, and it was not without some difficulty that they were drawn out with ropes. About 20 medical men were speedily in attendance, and by the prompt measures which they adopted all the sufferers were restored. One man however who fell off the dock float lost his life, for though he was rescued in a few minutes, he was poisoned by the pestilential water into which he fell. The origin of the fire is unknown.

THE PUBLIC HEALTH.—The Registrar-General's weekly return states that the returns for the week that ended Saturday, July 23, show a further and rather formidable increase of the deaths in London. The weekly number was below a thousand in June, till near the end of the month; it then rose above a thousand; in the first week of July it was 1226, in the following week it was 1400, and last week it rose to 1605, being 435 above the average calculated in proportion to the increase of population. During the week the birth of 855 boys and 748 girls, in all 1603 children, were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1491.

## Provincial.

CHELTENHAM.—The sale of the late Lord Northwick's collection of ancient and modern pictures, miniatures, enamels, and other choice works of art, commenced on Tuesday at Thirlestane House, and was numerously attended by the nobility, gentry, and the admirers of the fine arts throughout the kingdom. The sale will be continued daily up to the 30th of August, thus occupying rather more than a month. The magnitude and importance of the sale may be imagined from the fact that the catalogue alone is published at 5*s*., and contains a list of not less than 1881 pictures, the enumeration of which occupies 169 pages. The amount realised by the first day's sale was 3750*l*., that by the second 4400*l*., and that by the third 3300*l*.

ETON.—The proposal made by Eton College to the Cambridge University Commissioners more than two years since, that the sons of all British subjects otherwise duly qualified be admissible as candidates for Eton Scholarships, has within these few days received the sanction of the Commissioners, and has now become a part of the Statutes of Eton College.

CHIPPENHAM.—The thunderstorms which visited the metropolis and adjacent counties last week were equally destructive in this district of Wiltshire, and in various parts of Gloucestershire and Somerset. In this neighbourhood the storm was accompanied by hailstones nearly as large as walnuts and by a perfect tornado. At Hardenhuish Park large limbs of trees were blown down, and at the mansion 300 panes of glass were broken by the hailstones. At Temple Cloud the hailstones were equally large and were mingled with ice.

LIVERPOOL.—The large corn-mill situate on the banks of the Leeds and Liverpool canal at the north end of this town was totally destroyed by fire on Tuesday afternoon. The building, which is seven stories high, is the property of a joint-stock company formed under the Limited Liability Act. The fire burnt with such violence that in two hours the premises were completely gutted. A plentiful supply of water was at hand and several engines were on the spot, which were worked in the most energetic manner, but all efforts to save the building were vain. Several accidents occurred during the fire. Three men leaped from one of the upper stories to escape being burnt, and were killed by falling on the canal bank. About six others were taken to the hospital seriously injured, and several more are missing, and it is feared that they have perished in the flames. Fortunately the books of the company are secured, and the building is insured in several offices. It is somewhat singular that several fires have taken place on the same spot within the last few years, the site having been previously occupied by a cotton-mill, which was destroyed in a similar manner in 1853. On the same day another fire broke out in a timber-yard on the opposite side of the street, where damage was done to the amount of 400*l*.

WAKEFIELD.—During the thunder-storm of last week the low-lying portion of this town was seriously damaged by the accumulation of water. All the lower apartments of the houses were flooded to the extent of five or six feet, and the inhabitants had to take refuge in the upper stories. When the evening service was concluded in St. Mary's Chantry, the clergyman and congregation were kept prisoners in the chapel for some hours, and on a partial subsidence of the water, had to be conveyed away in cabs. Fifteen yards of a wall, 8 feet high, which formed the northern boundary to the Unitarian chapel, were swept away by the flood, which broke open the schoolroom doors, choking up and destroying the interior. At Chevet Park, the residence of Sir Lionel Pilkington, all the windows and a great deal of the valuable furniture were utterly destroyed, causing damage to the house and crops to the amount of 600*l*. Mr. Ibbotson, one of Sir Lionel's tenants, had 30 acres of wheat ruined, and estimates his loss at 800*l*. Mr. Richardson, of Woodthorpe, sustained damage to the extent of 300*l*.; and at Walton, 1000*l*. will barely cover the loss sustained by Mr. C. Coldwell. Mr. Ellis, of the same place, also had his crops damaged to the extent of 300*l*. or 400*l*.

WELLS.—The Earl of Leicester, following in the foot steps of his father Mr. Coke, has for the last two years been engaged in a work of some interest and importance,—viz., the reclamation from the sea of 700 acres of the vast tract of low marshy lands near the little port of Wells, Norfolk. For this purpose a great embankment, involving an outlay of about 12,000*l*., has been carried from the Hookham side of Wells in a straight line towards the sea, which has been, it is hoped, effectually shut out by this means from the land sought to be reclaimed. The bank forms a marine road of considerable width, more than a mile long, and upwards of 20 feet in height, and it is stated that the cubic content of the work exceeds anything of the kind attempted in England, although there are some longer embankments of a similar character. With the view of assimilating the bank to an ordinary beach, the slope next the sea for the first 15 feet of the height is five to one, while for the remainder of the elevation attained, it is only four to one. It is not expected that ordinary tides will rise higher than the point at which the five to one slope terminates; but as the tides sometimes attain an extraordinary height at Wells, flowing over the quay, and almost drowning the inhabitants, the bank has been carried up about 7 feet more. The embankment has already had the effect of increasing the scour, and consequently deepening the channel in the harbour, and it is expected that ships of a greater burden will now be enabled to get up. Further works of a similar character in the direction of Stiffkey and Blakeney, between which places and Wells about 3000 acres await reclamation, are talked of.

## Ireland.

THE IRISH CHANCELLORSHIP.—An influential county meeting convened by the High Sheriff was held in Enniskillen on Thursday week, at which it was unanimously resolved to petition Parliament against Sir W. Somerville's bill for admitting Roman Catholics to the office of Lord Chancellor of Ireland.

THE DUBLIN POLICE FORCE.—Mr. Cardwell, it appears, is about to introduce a bill for improving this body. The bill will reduce the number of police magistrates, and increase their pay from 600*l*. to 900*l*. per annum.

THE PHŒNIX CLUB PROSECUTIONS.—At the Tralee Assizes on the 21st inst. two of the Phœnix clubmen, Florence and J. D. Sullivan, who had been in gaol since last assizes, were brought up for trial, when their counsel withdrew their plea of Not Guilty, and pleaded Guilty. The Attorney-General under these circumstances said he would deal leniently by them, and would permit them to stand out on their own bail. Mr. Justice Keogh having expressed his approval of the course taken by the Crown, the prisoners were ordered to enter into recognizances to appear for judgment when called upon, and were subsequently discharged. At the Cork assizes on Wednesday the three clubmen for trial followed the example of the Tralee conspirators, and pleaded guilty. They were thereupon ordered to enter into bail in the sum of 200*l*. each to appear when called upon, and were then ordered to be discharged. The Belfast papers announce the arrest of a noted leader, "General" James Hackett, in the Riband or Phœnix Club conspiracy, who is to be put upon his trial at the ensuing assizes for Antrim.

THE KINSALE RIOT.—Two investigations are in progress in connection with the late militia riot at Kinsale. That before Colonel Grant, the military judge in the case, is the more important. Two days' sittings have already taken place. There were present the Colonel of the Antrim Rifles, Lord Massereene, Captains Rice, Munroe, and De Vere, and Lieutenants O'Donnel and Ryan, with legal gentlemen engaged for the parties. The evidence goes to show that the townspeople were the aggressors and that there was no intention among the Antrims to make any demonstration on the 12th of July. The sub-sheriff of the county, Mr. Townshead, Mr. Cramer, a magistrate, and Dr. Furlong gave evidence in favour of the militiamen.

## Law.

OXFORD CIRCUIT: STAFFORD.—*The Westbromwich Murder.*—*William Worsey*, 24, innkeeper, was charged with the wilful murder of his wife, Sarah Ann Worsey, on the 11th of June, at Westbromwich. When the jury were about to be sworn one of them objected, on the ground that he thought it wrong to hang any one, and that he should be afraid to find the prisoner guilty. Mr. Justice Byles said it was not necessary to pronounce any decision on the validity of the juryman's objection. He had no doubt the objection was a conscientious one, and though he regretted that such a notion should exist, the juryman might be excused. He therefore left the box. The trial then proceeded. It will be remembered that the prisoner killed his wife with a carving knife, which went right through her neck from ear to ear, and caused her death in a few minutes. The prisoner himself stated that when his wife was standing at a distance of three or four yards, he threw the knife at her; and the only question was, whether the case amounted to murder or manslaughter only. Mr. Justice Byles in summing up observed that it was quite true, as had been said, that the prisoner's life was in the hands of the jury; but they must also recollect that the lives of many women were likewise in their hands. In that county there were many men gigantic in strength, and violent in temper, and the protection of their wives was the law of the land, which surrounded them like the air they breathed, and under that law they dwelt secure. The law of the land was "Whoso sheddeth man's blood, by man shall his blood be shed," and long experience had led him to the conviction that that law was essential to be maintained. His lordship then told the jury that if the prisoner stabbed his wife with the knife, or even if he threw it at her, intending to kill her or to do her grievous bodily harm, he was guilty of murder, but if he merely threw it at her carelessly, not intending it to reach her flesh, he would be guilty of manslaughter only. The jury retired to consider their verdict, and on their return into Court the foreman said that, according to the exposition of the law given by the learned judge, they found the prisoner *Guilty*; but they were strongly convinced that he did not intend that it should end fatally, and they therefore strongly recommended him to mercy, trusting that his lordship and the Sheriff would strengthen that recommendation on the ground of what they considered strong extenuating circumstances, and that he did not intend to take away life. Mr. Justice Byles said he would take care that the recommendation of the jury should be forwarded to the proper quarter. His lordship then assumed the black cap, and addressing the prisoner, said that after an attentive consideration of his case, the jury had shown by their recommendation to mercy that they had endeavoured to take a merciful view of it, but thought that they could not discharge their duty to their country without finding a verdict of Wilful Murder. They had accompanied their verdict with a recommendation to the mercy of the Crown, but whether that mercy would be extended to the prisoner he knew not, and he could give the prisoner no reason whatever to hope or expect it. He must therefore prepare himself to undergo the last sentence of the Law; and the best advice he could give the prisoner was to attend to the religious advice which he would receive, that only could he hope to meet his impending fate with a spirit of resignation. His lordship then pronounced sentence of death in the usual form. *The Tipton Murder and Outrage.*—*Thomas Watkins*, 21, puddler, *Edward Acton*, 30, *Edward Fereday*, 19, forgeman, and *Joseph Allen*, 21, were charged with the wilful murder of a woman, who was alleged to be unknown, on the 29th of May, by throwing her in the canal at Tipton. It was shown by the evidence that the deceased had died of drowning, but there was no evidence to show that she had been put into the water by the prisoners, or either of them. Mr. Justice Byles said he had carefully read the depositions, and he was of opinion that there was no evidence to sustain the charge of murder. A verdict of *Acquittal* was then taken. The prisoners Acton and Allen were then put on their trial for a rape committed on the deceased. The evidence showed that this case, which was noticed at the time in our Provincial news, was one of the most shocking and disgusting outrages which had ever been committed even in this county notorious for crimes of a cruel and brutal character. It is impossible to detail the facts of the case as they were proved in evidence, but it will be sufficient to state that the jury found Watkins, Acton, Fereday, and Allen *Guilty*, and acquitted the two other prisoners. It may be added that they took a more favourable view of Acton's case. His lordship in passing sentence said the prisoners had been convicted on invincible evidence of one of the most brutal and barbarous outrages of which he had ever heard. God only knew whether the prisoners had had anything to do with the drowning of deceased. The sentence upon Watkins, Allen, and Fereday was that they be kept in penal servitude for the terms of their natural lives; and upon Acton, of whom his lordship said he also took a more favourable view, the sentence was that he be kept in penal servitude for three

NORTHERN CIRCUIT: DURHAM.—*The Jarrow Murder.*—*Shafto Wilkew*, aged 35, was indicted for the wilful murder of his wife, Susannah Wilkew, at Jarrow, on the 12th inst. This case was noticed last week in our Provincial news. It is necessary to repeat the details. The main facts are that the prisoner, from motives of jealousy, cut his wife's throat while she was asleep in bed, and afterwards endeavoured to conceal the suicide, were proved by his brother-in-law and daughter. The latter fainted as soon as she had given her evidence. For the defence an attempt was made to set up a plea of temporary insanity. Baron Watson in summing up directed the jury that there was no evidence to support the defence urged on behalf of the prisoner, that he did not at the time know the nature of the act that he was committing. The jury, after an absence of half an hour, returned a verdict of *Guilty*. His lordship having put on the black cap, in an impressive manner passed sentence of death, holding out no hope of mercy. The prisoner bowed respectfully to his lordship, and walked firmly from the dock. *The Attempted Murder at Southwick.*—*George Bonney*, 30, was indicted for feloniously shooting at Margaret Hodgson with intent to murder her, at Southwick, on the 21st February. The prosecutrix (an exceedingly prepossessing and good-looking girl) had been courted for about 10 months by the prisoner, when they had a quarrel, and she told him she would have no more to do with him. The prisoner got exceedingly excited and protested that no other man should keep company with her. He went that day to a photographist and got his likeness taken, and on the following day called on the prosecutrix and showed her the picture. While she was examining it, the prisoner fired a pistol at her head from which 25 shots were subsequently extracted by the surgeon. The prisoner on being taken into custody said that he should die happy if he had shot her dead. While giving evidence the prosecutrix fainted on seeing the prisoner, and she appeared unwilling to press the case against him, stating that he was subject to fits, and that she had seen him in them. The prosecutrix was obliged to be carried out of court after the cross examination, and the prisoner then fell into strong convulsions in the dock. It was urged for him that he was labouring under a fit of jealousy; that he had not intended to injure the prosecutrix or he would have loaded the pistol with a bullet; and that the fits to which he was subject had affected his mind so as scarcely to leave him a responsible agent. The jury found him Guilty of shooting with intent to murder. Mr Baron Watson ordered sentence of *Death* to be recorded against him.

MIDLAND CIRCUIT: LINCOLN.—*The Stickney Murder.*—*Carey*, labourer, aged 24, and *William Pocket*, aged 20, described as a farmer or boatman, were indicted for the wilful murder of William Stevenson, at Stickney, on the 17th March. The case was a very shocking case, the details of which were given at the time in our Provincial news. The deceased was a cottager, 64 years of age, who was murdered while returning from Boston market and thrown into a ditch near his home, with his skull literally smashed to pieces. The object of the murder was to rob him of a few pounds which he was supposed to have in his possession. The prisoner Pocket made a confession to the effect that Carey was the actual murderer, and that he himself was an unwilling accessory. Carey addressed the Court in a speech of some length, in which he admitted that he was guilty of the robbery but not of the murder, and gave a minute detail of circumstances entirely at variance with the confession of Pocket. Mr. Justice Williams, in summing up, said that both prisoners had admitted their presence on the spot, and that they were the acts which resulted in the death of the deceased. The jury returned a verdict of *Guilty* against both prisoners, and the learned judge in a solemn manner passed sentence of death upon each prisoner, holding out no hope of mercy.

## Theatres.

ROYAL ITALIAN OPERA.—Herr Meyerbeer's new opera "Le Pardon de Ploermel," was produced at this theatre on Tuesday evening under the name of "Dinorah" with triumphant success. At the termination of the second act Herr Meyerbeer was enthusiastically called for, and came forward, led by Signor Costa, amid the overwhelming cheers of an audience which filled every corner of the theatre.

# Sporting.

## GOODWOOD RACES.

TUESDAY.—The *Corinthian Stakes.* Lord Clifden's Star of the East beat Clydesdale, Wrestler, and 10 others.—*Sweeps.* Mr. J. Day's Fravola beat Infanta, Enfield, and 3 others.—*The Lavant Stakes.* Mr. J. Merry's Thormanby beat Apollo and Roesia.—*The Steward's Cup.* Mr. Gratwicke's Maid of Kent beat Montebello, Penalty, and 31 others. Won by a head, while a head only separated the second from the third and the third from the fourth. Twilight was fifth, close up; Theodora and Grand Secret, the two favourites, were signally defeated.—*The Gratwicke Stakes.* Mr. W. S. S. Crawfurd's Mayonaise beat Schism, Mr. Manton's filly, and 3 others.—*The Hurst Stakes.* Mr. W. S. S. Crawfurd's Winton beat Lord Glasgow's Tom Bowline, Lord Ailesbury's colt, Apollo, and Mr. J. Merry's colt.—*Fifty Pounds.* Mr. T. Dawson's Gaylass beat Harry Stanley and Hallifordi.—*Sweeps.* Lord Glasgow's Toxophilite beat Goahead and Guard.

WEDNESDAY.—The *Goodrans Stakes.* Mr. W. Day's Opera Dancer beat Syringe, Skittles, and 4 others.—*The Goodwood Derby.* Mr. W. Day's The Promised Land beat Chapelier.—*Sweeps.* Lord Zetland's Qui Vive beat Mr. J. Merry's filly.—*Goodwood Stakes.* Mr. Ten Broeck's American horse Starke beat Lifeboat, Blue Jacket, and 14 others. Won after a fine race by half a length; Lifeboat second; Blue Jacket six lengths from the second; Heiress fourth, beaten off. Count Isonomy fifth, and Gospel sixth, close up with Heiress. Heeding the next two, all passing up, were Miss Call and Gemma. The rest did not pass the post.—*Match.* Colonel Vyse's Madrigal beat Mr. A.—*Handicap Plate.* Mr. F. Robinson's Antonio beat Queen Charlotte, Spectacle, and 15 others.—*Handicap Plate.* Lord Clifden's Palladium beat The Dane, Tragedy, and 5 others.—*The Drawing-room Stakes.* Sir H. Des Voeux's Comforter beat Sir Hercules, Cymricus, and 2 others.

THURSDAY.—*The Racing Stakes.* Mr. J. Merry's Lord of the Manor beat Rechab.—*The Findon Stakes.* Captain Little's Nutbourne beat Thunderbolt, Thormanby, and 8 others.—*The Molecomb Stakes.* Lord Portsmouth's Buccaneer beat Brother to Rainbow and King of Diamonds.—*The 2 Year Old Year of the Seventh Bentinck Memorial Stakes.* Mr. Morland's Longrange beat East Langton, Star of the East, and 3 others.—*First Year of the Ninth Bentinck Memorial Stakes.* Mr. A. Nichol's The Wizard beat Trovatore and Emily.—*The Goodwood Cup.* Mr. W. Day's The Promised Land beat Newcastle, the American mare Princess, Toxophilite, and 8 others. Won easily by six lengths; four lengths separating the second from the third. The others came in at wide intervals.—*Sweeps.* Mr. J. Merry's Trovatore beat Lord Glasgow's colt.—*Second Year of the Eighth Bentinck Memorial Stakes.* Lord Strathmore's May Morning beat Cock-a-hoop, Precursor, and 4 others.—*Sweeps.* Mr. H. Saville's Queen Charlotte walked over.—*The Sussex Stakes.* Mr. J. Merry's Merryman walked over.

FRIDAY.—(By Electric Telegraph).—*Nassau Stakes.* Cantine beat Orlando and Heroine of Lucknow.—*Match.* Theodora walked over.—*Duke of Richmond's Plate.* Jet beat The Dane, Lottery, and 14 others.—*Nursery Stakes.* Umpire beat Calcavella f. Be Quick, and 19 others.—*Chesterfield Cup.* Zuyder Zee beat Sunbeam, Heiress, and 20 others.—*March Stakes.* Lady George beat Speaker and Mrs. Stowe.—*Queen's Plate.* Newcastle walked over.—*Bentinck Memorial.* Starkie beat Compromise, Prioress, and 12 others.

# Railways.

LONDON, BRIGHTON, AND SOUTH COAST.—At the half-yearly meeting on Tuesday the directors' report was unanimously adopted, and a dividend of 2½ per cent declared for the half-year, leaving a balance of 4917*l.* The chairman stated that with respect to the differences between themselves and the South-Western it had been agreed to refer the matter to the Railway Companies Association, and accept their mediation. There had been an increase in the traffic over their whole system of lines, with the exception of Epsom, on which line they had lost 4000*l.*, which they attributed to the traffic being divided between themselves and the South-Western.

# Obituary.

THE EARL OF HARBOROUGH, and Baron Sherard, of Leitrim, Ireland, died at his seat, Stapleford Park, near Melton Mowbray, on Thursday morning. He was only son of the fifth earl, was born in 1797 and succeeded to the title and estates in 1807. He married in 1843, the daughter of Captain Temple, by whom he has no issue, and the title becomes extinct.

THE HON. AND VERY REV. HENRY DAVID ERSKINE, DEAN OF RIPON, died on the 27th inst. at Ripon in his 73rd year, after a long illness. He was the son of the 1st Lord Erskine, and married in 1813 the daughter of the 1st Earl of Portarlington. He was appointed Dean of Ripon in 1847, and for some years has been conspicuous as an advocate of popular education, and as an earnest promoter of Mechanics' Institutes.

THE HON. AND VEN. WILLIAM O'GRADY, Archdeacon of Kilmacduagh, died on the 17th inst. at Portfergus, County Clare, in his 53rd year. He was a younger son of the late Baron O'Grady, afterwards Viscount Guillamore, and had been for many years minister of the parish of Kilcrest, and Rural Dean of the diocese of Kilfenora. He seldom left his parish, and since his appointment had expended all his time and the greater portion of his income on the education and spiritual welfare of his parishioners.

MR. RICHARD TATTERSALL, for many years proprietor of "The Corner," so well known to sporting men of all classes, died on the 22d inst. at Dover in his 75th year. Mr. Tattersall was held in high esteem by the large body of persons with whom his business brought him in contact.

BIRTHS.—On the 24th inst. at 21, Lowndes Square, the Marchioness of WINCHESTER, of a daughter.—26th inst. at 52, Chester Square, the wife of Sir FREDERICK WILLIAM HEYGATE, Bart., M.P., of a son.—25th inst. at 29, Chesham Street, the wife of W. R. OPENSHAW GORE, Esq., M.P., of a daughter.—13th inst. at Biarritz, the wife of M. WYCHE, Esq., jun., M.P., of a daughter.—19th inst. at 15, Eaton Place, Mrs. PENDER PRYDERCH HARVEY, of a daughter.—22d inst. at Nettlewold Hall, Nottinghamshire, the wife of Lieutenant-Colonel FITZHERBERT, of a daughter.—23d inst. at 11, Gloucester Crescent, Hyde Park, the wife of Colonel WILBRAHAM, C.B., of a daughter.—19th inst. in College Street, Winchester, the wife of the Rev. GEORGE RIDDING, Tutor of Exeter College, Oxford, of a daughter, stillborn.

MARRIAGES.—On the 27th inst. at St. George's, Hanover Square, REGINALD [illegible] DRUMMOND, Esq., eldest son of Sir John Ogilvy, Bart., M.P., to OLIVIA, only daughter of Lord and Lady KINNAIRD.—25th inst. at St. George's Hanover Square, Captain LOVETT, 21 Regiment of Life Guards, to Miss MORLER, niece of the Earl of Verulam.—12th inst. at the parish church, Brighton, Captain SYDNEY DARLING, 9th Regiment, second surviving son of the late General Sir Ralph Darling, G.C.H., to REBECCA WILHELMINA, second daughter of the late AUSTIN COOPER, Esq., of Kilmore House, Ingatestone.—20th inst. at St John's, Hackney, the Rev. SIDNEY HENRY LEAR, M.A., Fellow of All Souls College, Oxford, second son of the late Dean of Salisbury, to HENRIETTA LOUISA, youngest daughter of JAMES WILLIAM FLEMER, Esq., of Ingleborough, in Yorkshire.—23d inst. at Tadworth, Dr. FRANCIS HAWKINS, M.D., of Bentinck Street, London, to SARAH JANE, only daughter of the late GERVASE HAYWOOD, Esq., formerly of Lea Hall, Derbyshire.—16th inst. at Queenstown Church, JOHN FRASER CAMPBELL, Esq., Lieutenant of H.M. ship Vengeance, Knight of the Legion of Honour, and Imperial Order of Medjidie, second son of George Washington Lambert Campbell, Esq., J.P., of Craigie Castle, to CATHERINE FRANCIS, second daughter of the late ROBERT HOLMES, Esq., J.P., of Beechmount, both in the county of Cork.—23d inst. at St George's, Bloomsbury, JOHN EVANS, Esq., of Nash Mills, Herts, to FRANCES, daughter of JOSEPH PHILLIPS, Esq., of the Island of Malta.

DEATHS.—On the 21st inst. at The Hangingshaw, Selkirk, after a long and painful illness, the Hon. Mrs JOHNSTONE of Alva.—20th inst. at 13, St Andrew's Square, Bath, ELIZABETH, relict of Colonel WILLIAM SWINTON, and daughter of the late Sir Robert Barr, K.C.B.—At Lucknow, in Central India, Lieutenant-Colonel EDMUND CONWAY LEAN, C.B., Commanding H.M.'s 97th Regiment.—4th May, at his residence, Woodside House, Ootacamund, Madras Presidency, General LEWIS WENTWORTH WATSON, aged 67.—14th inst. at 27, George's Square, the wife of Vice-Admiral LEAN, aged 69.—19th inst. Colonel ANDREW BROWN, late of the 79th Highlanders and [illegible] at his residence, Greenhill, near [illegible], Major-General [illegible], C.B., formerly of the 6th Madras Cavalry.—[illegible] inst. at Jersey, ELLEN LOUISA, youngest daughter of Major-General CONINGHAM, after a long illness, aged 6.—22d inst. at 15, Norfolk Crescent, deeply lamented by all who knew her, the beloved wife of the Rev. J. D. WINGFIELD DIGBY, Vicar of [illegible], Warwickshire, aged 37.—18th inst. at 21, Dorchester Street, Manchester Square, MARY ANN, wife of Major A. HAWKINS, and eldest daughter of the late William Berrisford, Esq., of Manor Park, Streetham, Surrey, aged 72.—22d inst. 11, Eaton Square, EMILY, daughter of Charles J. MONK, Esq., M.P., aged 3 months.—23d inst. at Hawton Hall, Staffordshire, Thomas NEVILLE, Esq., aged 58.—13th inst. at Spanish Town, Jamaica, ROBERT RAPLEY GARDINER, Esq., late [illegible] for the county of Middlesex, and chief engineer of roads and bridges in the said islands, aged 41.—20th inst. at Winchester, MARY LOUISA, wife of the Rev. GEORGE EDWARD, Tutor of Exeter College, Oxford, and second daughter of the Rev. Dr. MOBERLY, Winchester College.

# Markets.

## COVENT GARDEN.—July 26.

**Grapes and Pine Apples have not altered in price since our last report.** West India Pines have been plentiful and good. Gueldersons, Cornish, and Englefields are getting scarcer, and Clarkes and Shrowshams are nearly over. English Queens have made their appearance. Greengage Plums come in a dozen. Oranges sold at 6*l.* and 10*s.* per hundred. Nuts of all descriptions still continue to realise fair prices. Cabbages and French Beans are plentifully supplied. Rhubarb, Asparagus, and Seakale are getting over. Peas, Beans, Horn Carrots, and Globe Artichokes may be obtained in quantity. Cucumbers are cheaper. New Potatoes realise from 6*s.* to 14*s.* per pan. Cauliflowers are abundant. Cut flowers nearly consist of Orchids, Geraniums, Kalosanthes, Lily of the Valley, Violets, Mignonette, Heaths, and Roses.

FRUIT.

| | |

COLONIAL WOOL SALES.—These sales are progressing favourably at an advance over the [illegible] rates.

METROPOLITAN CATTLE MARKET.

MONDAY, July 25.

**The number of Beasts is about the same as on Monday last, and the prices of that day are with difficulty obtained. There are a few more Sheep and Lambs, but the demand is good, and prices have rather an upward tendency. Trade is dull for Calves. From Germany and Holland there are 1,50 Beasts, 5250 Sheep, and 240 Calves [illegible] from Norfolk and Suffolk, [illegible] Sheep and Lambs; and 130 [illegible] counties.**

| | | | | | | |
|---|---|---|---|---|---|---|
| | s. | d. | s. | d. | | |

| | | | | | Calves | 4 8 — 5 0 |
| | | | | | Pigs | 3 4 — 4 0 |

Beasts, 4140; Sheep & Lambs, 25,000; Calves, 197; Pigs, 440.

THURSDAY, July 28.

**We have a short supply of Beasts, and of very indifferent quality; consequently the demand [illegible] to-day, and at a slight reduction. The supplies of Sheep and Lambs are rather smaller than of late. They sell [illegible] at Monday's quotations. Trade is very dull for Calves. From Germany and Holland there are 50 head; from Norfolk and Suffolk, 250 Beasts, from the Midland and Northern counties, 400 Beasts; and from Scotland, 200 head of Cattle.**

| | | | | | Calves | 5 8 — 6 4 |
| | | | | | Pigs | 3 3 — 4 0 |

Beasts, 3841; Sheep & Lambs, 17,000; Calves, 545; Pigs, 270.

MARK LANE.—MONDAY, July 25.

The supply of English Wheat to this morning's market was moderate, and [illegible] for several days [illegible] to be paid [illegible] advanced. The sales effected however were [illegible] quotations of 1s per qr. upon the rates of this day se'nnight. There was a fair attendance, nevertheless, of foreign Wheat, and [illegible] prices continue to be pretty well maintained. The [illegible] barley trade with a fair inquiry at last week's rates. Beans and Peas are unaltered in value. The Oat trade is very inactive, and the sales made were at last week's prices. In Flour there is less doing than on Friday, but Norfolk must be quoted [illegible] that is just such dearer than on Monday last.

FRIDAY, July 29.

**Since Saturday, when we had rain, the weather has been fine, with a high temperature and very sparing, to-day showery. The accounts received from the country are less favourable than they were, and it becomes evident that the crops in many districts have suffered from blight and the excessive heat as well as the storms. The new Wheat may consequently be expected to vary greatly both in quantity and quality, and much will be thin and light and [illegible] The knowledge of the above has [illegible] the Wheat trade, and prices have generally advanced 1s per qr. for English Wheat since this week. Foreign has also realised rather more attention, without leading to actual business, buyers being still [illegible] the few [illegible] which [illegible] Foreign and Russian qualities. Spring Corn has been [illegible] and [illegible] Beans, Peas, and Barley were [illegible] Southern Europe [illegible] sisting during the week of 24 cargoes Wheat, 2 Maize, 4 Barley, 4 Rye, 3 Millet, and 5 Linseed. The reports of the French markets continue to report higher prices for Wheat and Flour, also several markets for Oats. Flour was [illegible] yesterday 27s [illegible] English grain [illegible] Wheat and Oats large and of [illegible] this morning was better attended than of late [illegible] Wheat on sale was [illegible] Foreign continued [illegible] were made at fully 1s. per qr. over the rates lately obtained. Barley, Beans, and Peas are unaltered in value. The Oat trade is very dull and to effect sales it is necessary to submit to a decline. In Flour there is rather more doing.**

ARRIVALS FROM JULY [illegible] TO JULY 29.

| | Wheat | Barley | Oats | Flour |
|---|---|---|---|---|
| English | 2210 qrs. | [illegible] | 1840 qrs. | [illegible] sacks |
| Irish | — ,, | — ,, | — ,, | — ,, |
| Foreign | 18040 ,, | 2170 ,, | 41080 ,, | 500 ,, — brls. |

LIVERPOOL, Tuesday, July 26.—We had a good attendance of millers and dealers at our Corn Exchange this morning, and Wheat met [illegible] at [illegible] about 1d. per cental on the rates of Friday. Flour had a fair sale at 1s per sack more money. Indian Corn attracted a fair inquiry, and previous quotations were freely obtained. Oats and Oatmeal [illegible] Egyptian Beans, Peas, and Barley were [illegible] unaltered in value and little doing in. The weather to-day is exceedingly fine, and the market closed without life.

JOHN CATTELL is in want of a competent, clever person, to act as FOREMAN in the Flower Garden Department of his Establishment, to succeed one who has been with him 28 years. He must well understand the Propagation and Cultivation of Conifers, American Plants, Roses, Herbaceous Plants, Soft and Hard-wooded Greenhouse Plants, and be thoroughly acquainted with plants generally. Good address, strictly honest, sober, steady, and respectable. To prevent disappointment it is particularly requested no one will apply whose character is not in accordance with the above, and will bear the strictest investigation. A really good, clever, persevering Man will find this worth his notice. Wages liberal.—Address JOHN CATTELL, Nurseries, Westerham, Kent, giving full particulars as to testimonials, salary expected, age, &c.

TO GARDENERS AND OTHERS.

WANTED, A MAN with a Small Capital, without incumbrance, to take charge of a NURSERY and PLANTATION, and have a share in the business, or otherwise. A Cottage on the ground.—H. L., 38, Blackheath Hill, S.E.

WANTED IMMEDIATELY, A GARDENER, to undertake the entire Management of a Small Garden, Hothouse, and Greenhouse. A cottage found.—Apply by letter first to C. D., Post Office, Romford, E.

WANTED, a good plain WORKING GARDENER, to take the care of a large walled Kitchen Garden and a Flower Garden (with occasional assistance), and also 40 acres of Meadow Land. His wife to undertake the Dairy.—P. T., Unsted Wood, near Godalming.

WANTED, AS GARDENER, a practical Man, without incumbrance, who perfectly understands Kitchen and Flower Garden Work, and is well skilled in the management of Fruit Trees. A good character required. Wages (to be agreed upon) paid weekly. A small cottage rent free.—Apply to A. HORNCASTLE, Grays, Essex.

WANTED, AS UNDER GARDENER, at a gentleman's residence 12 miles from London, a Young Man of about 18, direct from the country preferred. Wages, 12s. a week for the first year. Good character indispensable. Besides garden work, will be required to Milk two Cows.—Apply by letter only, with name and address of last master, &c., to G. F., Messrs. ALGAR & STREET, Clement's Lane, London, E.C.

WANTED, in a Clergyman's family, about 10 miles from town, a steady, active, single MAN, who can Mow a Lawn, take charge of a Kitchen Garden, and make himself generally useful in the house.—State full particulars to Rev. X. Y. Z., Post Office, Harrow, N.W.

WANTED, a young MAN to look after a Kitchen Garden, House, Pigs, and Poultry, and assist in a light business.—A. C., Post Office, Chertsey.

WANTED, A WORKING BAILIFF, on a Farm of 50 acres, within 10 miles of London.—Apply by letter, A. F. M., care of Mr. W. Smither, 28, Gracechurch Street, London, E.C.

WANTED, AS HEAD SHOPMAN, a person having a thorough knowledge of the SEED TRADE in every department; must write a good hand, and be able to produce the most satisfactory references as to character and abilities. *References will not be inquired into till after further correspondence.—Apply, with full particulars, O. A., Gardeners' Chronicle Office, W.C.*

WANTED, in a country Parish, a SUNDAY-SCHOOL MASTER, who is competent to play the Organ and teach a Village Choir. A good Gardener will find full employment during the week.—For further particulars apply to the Rev. JOHN BELL, Brington Rectory, near Kimbolton.

## WANT PLACES.—Letters to be Post Paid.

GARDENER (HEAD.)—J. SMITH, age 35, married; thoroughly understands his profession. Will be disengaged August 6, and would be glad to meet with any gentleman in want of a confidential Man.—Downshire House, Roehampton, Surrey, S.W.

ALLEN, Manufacturers of Officers' Barrack Furniture and Military Outfitters (see separate Catalogue), 18 & 22, Strand, W.C.

FOR THE TOILETTE.—OLDRIDGE'S BALM OF COLUMBIA, which has for more than 30 years been celebrated for its peculiar properties in restoring, cleansing, and beautifying the hair, promoting its growth, as well as preventing it falling off or turning grey.—C. & A. OLDRIDGE, 13, Wellington Street, North, seven doors from the Strand, W.C. Sold wholesale and retail in bottles at 3*s.* 6*d.*, 6*s.*, and 11*s.*; and by all Chemists and Perfumers. Its use for whiskers and moustaches is invaluable.

TOURISTS AND TRAVELLERS, VISITORS TO THE SEASIDE, and others exposed to the scorching rays of the sun, and heated particles of dust, will find ROWLAND'S KALYDOR a most refreshing preparation for the complexion and skin, dispelling the cloud of languor and relaxation, allaying all heat and irritability, and immediately affording the pleasing sensation attending restored elasticity and healthful state of the skin. Freckles, tan, spots, pimples, flushes and discoloration are eradicated by the application. Price 4*s.* 6*d.* and 8*s.* 6*d.* per bottle. The heat of the summer also induces a dryness of the hair, and a tendency to its falling off, which may be completely obviated by the use of ROWLAND'S MACASSAR OIL, a delightfully fragrant and transparent preparation for the hair, and as an invigorator and beautifier beyond all precedent. Price 3*s.* 6*d.*; 7*s.*; family bottles (equal to four small), 10*s.* 6*d.*; and double that size, 21*s.* ROWLAND'S ODONTO, or PEARL DENTIFRICE, bestows on the teeth a pearl-like whiteness, frees them from tartar, and imparts to the gums a healthy firmness, and to the breath a grateful purity and fragrance. Price 2*s.* 9*d.* per bottle.—Sold by A. ROWLAND & SONS, 20, Hatton Garden, London, E.C.; and by Chemists and Perfumers.—Beware of Spurious Imitations.

HEALTH WITHOUT PHYSIC.—Nervousness effectually cured by a novel and most successful mode of treatment, discovered in America. The most convincing proof of the efficacy of this wonderful remedy, with other details, will be sent to any address on receipt of one stamp.—Address Mr. HILL, 27, Alfred Place, Store Street, London, W.C.

HOLLOWAY'S PILLS AND OINTMENT.—FRUIT, HEAT: these are two causes of the many derangements of the digestive organs now so prevalent everywhere. Unless profuse perspiration relieve the liver and stomach, their functions become disordered and disease is the consequence. Such disasters can be readily and permanently prevented by HOLLOWAY'S preparations, which in the worst cases of indigestion have the valuable property of cleansing the stomach, rectifying the liver, and removing the flatulency, offensive breath, and sallow complexion, always characteristic of a dyspeptic habit or disease in lungs, liver, or stomach. In either case the food, remaining undigested, ferments; yielding nourishment but forms foul gases, which speedily render the blood impure and thereby weaken and body out of order.

That deficit must be reduced by a considerable decrease of expenditure, and he hoped would be reduced by some increase of revenue. He did not believe that any considerable reduction could be made in the civil expenditure. The great item of saving must be in that of the army. On this subject he entered into a variety of details, insisting on the necessity of always maintaining a large European force. With regard to the revenue, orders had been given to the authorities at Madras, Bombay, and the North-west provinces to raise the salt duty, from which he anticipated an increase of 500,000*l*., and to impose a tax on stamps, licenses, and, if possible, on successions. He further hoped that the receipts from the railways would in future years greatly diminish our expenses on that head. Still we must continue to expect a large deficit, and must contemplate the possibility of a loan guaranteed by the Imperial exchequer. It was the intention of the Government to send out some competent person to India to examine and control the entire system of expenditure and revenue, not as finding fault with the officials in India, but with the view of amending the entire system. He repeated his expectation that under proper management, and when the present pressure was removed, the income might again balance the expenditure. In corroboration of this hope, he showed that there had been an increase and development of revenue in spite of the recent troubles. He concluded by moving a resolution empowering the Government to raise in this country a loan of five millions for the Indian service.—Mr. CRAWFORD declared his conviction that the state of India was on the whole satisfactory, and his confidence in the development of the resources of the country. —Lord STANLEY also expressed his opinion that the difficulties of India were only temporary, and that they must be met by a reduction of expenditure. At the same time he believed that before long Imperial assistance would be a matter of necessity to India.—Mr. BRIGHT said that the entire net revenues of India were absorbed by its military expenses—a state of things which sooner or later must bring any country to ruin. In his opinion the civil service was notoriously overpaid, while our army was much too large, and involved us in endless difficulty. While it existed in its present amount, the Government found it impossible to turn its attention to necessary reforms. He urged the policy of a small army, a conciliatory administration, and measures of improvement. He recommended that there should be a Governor for every 20,000,000 of the population, with large independent powers, responsible only to the home authorities, and thereby decentralising the Government in India.—After some remarks by Mr. T. G. BARING, Mr. H. D. SEYMOUR, Mr. VANSITTART, Mr. GREGSON, Mr. KINNAIRD, Mr. CONINGHAM, and Mr. HANKEY, the resolution was agreed to, and ordered to be reported. The report of the committee of supply was brought up and agreed to. The *Vexatious Indictments Bill* and the *Universities Incorporation Act Amendment Bill* were read a third time and passed. The *Coinage Bill*, the *Stamp Duties Bill*, and the *Government of India Act Amendment Bill* were read a second time.—On the order for the second reading of the *Settled Estates Act* (1856) *Amendment Bill*, Mr. WHITESIDE explained the object of the Bill, which had reference to the case of Sir T. M. Wilson, and the apprehended enclosure of Hampstead Heath.—After some remarks by the ATTORNEY-GENERAL, the debate, on the motion of Sir M. PETO, was adjourned.—Mr. PALK moved the issue of a new *Writ for Dartmouth*, in the room of Mr. Schenley, whose election had been declared void.—Sir J. SHELLEY moved that the writ do not issue until the House had had an opportunity of seeing and considering the evidence taken by the committee.—This amendment was seconded by Mr. ROEBUCK, who remarked upon the disclosures recently made before election committees.—Sir G. GREY opposed the amendment on the ground that the committee had not reported that extensive bribery had existed at Dartmouth.—Mr. LEFROY, the chairman of the committee, stated the nature of the case presented to them.—After a short discussion, in which Mr. BOUVERIE, Lord FERMOY, and Mr. WHITESIDE took part, the amendment was withdrawn, and the motion was agreed to.

TUESDAY.—At the morning sitting the *Income Tax Bill* was read a third time and passed. The House then went into committee upon the *Police (Counties and Boroughs) Law Amendment Bill*, the clauses of which underwent much discussion. On the order for going into committee upon the *Roman Catholic Charities Bill*, Sir G. LEWIS said that the Bill had been framed upon a principle that had received the approbation of a large portion of the Catholic body in England; but, from communications which had reached him, he was not disposed to press the Bill this session. He proposed, therefore, to withdraw it, and to introduce a Continuance Bill, prolonging the exemption of Roman Catholic charities from the operation of the general law for another year.—Mr. S. ESTCOURT and Mr. BOWYER expressed their approval of this course.—Mr. HUTT, as the representative of a large body of Roman Catholics, protested against these continuance Bills, which led to nothing.—Mr. BEAUMONT said that he also represented a large body of Roman Catholics who anxiously desired to have these charities brought under the law of England.—Mr. NEWDEGATE said that the Roman Catholics wished for the Bill because it would protect them from Cardinal Wiseman, whose object appeared to be to organise them into a body distinct from the rest of the community.—Mr HUTT said he would give the proposed Continuance Bill all the opposition in his power.—Colonel FRENCH called attention to the decision of the committee on the late *Norwich Election*. The committee had unseated Lord Bury on the ground of bribery at the election in April. Subsequently Lord Bury had accepted office, and had been again elected. He therefore wished to know whether Lord Bury was not entitled to sit under the second election, to which the petition did not apply?—Sir G. GREY could not see any necessity for the interference of Colonel French, when Lord Bury himself disclaimed any intention of taking his seat under the second election.—Colonel FRENCH replied that he only moved in the matter to ascertain the privileges of the House.—The SPEAKER referred the gallant member to the Act of Parliament, which was perfectly clear and precise. *Cruelties on the High Seas*.—Mr. M. MILNES moved that an address be presented to her Majesty, praying her to enter into negotiations with the Government of the United States for the purpose of preventing the assaults and cruelties committed on merchant seamen engaged in traffic between this country and the United States, and of bringing to justice the perpetrators of such offences, many of whom escape with impunity in consequence of the defects of the present system of international jurisdiction.—Mr. J. EWART seconded the motion.—Sir G. LEWIS explained the international law on the subject, and entered into details of the existing extraditional treaties between England and the United States. Under these treaties offenders were constantly enabled to escape with impunity. It commonly involved too much trouble to send the culprit back to America. Suggestions had been offered that both English and American courts should be empowered to take under their cognisance cases of this kind immediately on the arrival of the ship at the ports of either country. He thought that the difficulty might be removed by a convention.—Mr HENLEY said that concurrent jurisdiction might be given in the cases of American, but not of Russian or French vessels.—The ATTORNEY-GENERAL said that the attention of the Government had been called to the matter. The only way of settling the difficulty was by having recourse to the ordinary courts. He would never consent to give criminal jurisdiction in this country to a foreign consul. The motion was then agreed to. *Foreshores*.—Mr. A. SMITH moved for a select committee to inquire into the rights as claimed by the Crown and other bodies connected with the foreshores, tidal rivers, estuaries, and bed of the sea round the coasts of the United Kingdom, with a view to defining the said rights, and secure and protect those of the public and individuals. The hon. member was developing his motion, when the House was counted out.

WEDNESDAY.—The *Law of Property and Trustees' Relief Amendment Bill* passed through committee, after a long and desultory legal discussion. The House then went into Committee of Supply on the *Civil Contingencies*.—Mr. SPOONER moved the rejection of the vote of 2000*l*. for the *National Portrait Gallery*, contending that many of the pictures were worthless, and that the gallery, if it existed at all, ought to be a part of the National Gallery. After an animated debate the vote on a division was affirmed by 141 to 55.—Mr SPOONER again moved the rejection of a vote of 2000*l*. for the purchase of Sir G. Hayter's *Picture of the First Reformed House of Commons*.—The CHANCELLOR of the EXCHEQUER said that the purchase was made under the authority of Mr Disraeli, on the recommendation of many members of the late House of Commons.—Mr. SPOONER said he did not care who authorised the purchase.—Mr AYRTON suggested that the purchase was made by the right hon. gentleman for the purpose of keeping reform before the eyes of his party. On a division the votes were equal, 82 for and 82 against it. The chairman, Mr. Massey, gave his casting vote in favour of the vote, which therefore passed in the affirmative.—On the vote for 9988*l*. for buildings at Kensington Gore, erected for the temporary accommodation of the *Turner and Vernon Galleries*, Mr. AYRTON protested against the secret influence and intrigues which, contrary to the wish of the House of Commons and of the public, were brought to bear for the purpose of gradually establishing our collection at Kensington. An animated discussion followed, in which it was contended that the pictures might have been placed for a time in a private house, or in the rooms now occupied by the Royal Academy, or a temporary building at Burlington House.—Lord PALMERSTON declared that there was no intention whatever of permanently establishing our collection at Kensington.—Lord J. MANNERS denied that any influence had been used in the matter. He had been very much puzzled to find a site, and had adopted Kensington because he could find no other.—The CHANCELLOR of the EXCHEQUER defended the vote, arguing that no other site equally favourable could have been found, and declaring that the buildings, though for a temporary purpose, would be themselves permanent. On a division the vote was affirmed by 116 to 73. A vote of 5000*l*. for *Compensation to Mr. Barber* led to another division, when the vote was carried by 124 to 24.—The CHANCELLOR of the EXCHEQUER obtained leave to bring in a Bill to amend the *Superannuation Act*.

THURSDAY.—*New Foreign Office*.—At the morning sitting the House went into committee on the remaining estimates.—On the vote of 20,000*l*. towards defraying the expenses of preparing the ground by concrete for the foundation of the new Foreign Office, the CHANCELLOR of the EXCHEQUER stated that a responsible builder was ready to undertake the construction upon Mr Scott's plan for 237,000*l*.; but there were contingencies which would augment the charge to 310,000*l*., and, the cost of the site being 120,000*l*., the total sum would be 430,000*l*. A long discussion ensued, embracing a great variety of topics connected with the proposed building, including the question whether it should comprise a residence for the Foreign Minister and reception rooms, and the question of the architect, involving that of the style of architecture—whether Italian or Gothic.—Lord ELCHO defended Mr Scott's Gothic design, and Mr. TITE spoke in favour of Italian for public offices. Mr. BLACKBURN, Mr BRUCE, Sir E. COLEBROOKE, Mr CROSS, Mr. C BUXTON, Mr. STIRLING, and Sir J. PAXTON, spoke in favour of Mr. Scott's plan; Sir J. SHELLEY and Mr. CONINGHAM opposed it.—Lord PALMERSTON said nothing would be done towards fixing upon a plan until Parliament met again. He retained the opinion he had expressed, that the Gothic style was utterly unsuitable to a public official building, and he avowed the declaration he had made to a deputation, that, as far as his opinion had weight, he should do all he could to prevent that style being adopted; that it was admirably suited to a monastery or a College of Jesuits, but not externally or internally, to the purpose for which the present building was intended.—Lord J. MANNERS vindicated the course he had taken in this matter, and expressed his hope that the House would insist on Mr Scott's original design being carried out. *Roman Catholic Sailors*.—In reply to Mr. HENNESSEY, Lord C. PAGET said that the present Board of Admiralty intended to give every possible facility for Divine worship, not only to Roman Catholic sailors, but to all others who might dissent from the Church of England. *Bodmin Election*.—Mr. ROEBUCK brought before the House a matter which he said affected its privileges. He had reason to believe that Dr. Michell, one of the members for Bodmin, whose return was petitioned against on the ground of bribery, corruption, and treating, had entered into a corrupt compromise, the terms of which were that Dr. Michell should, at the end of the present session, apply for the Chiltern Hundreds and resign his seat, and that, in consideration of his so doing, the petition against him should be withdrawn. He called upon the House, if it had any regard for its own honour, to resist and expose such corrupt practices, and he therefore moved a resolution that any Minister of the Crown who might grant the Chiltern Hundreds under such circumstances would be guilty of a grave dereliction of duty.—After some discussion in which Lord PALMERSTON, Mr. DISRAELI, the CHANCELLOR of the EXCHEQUER, Mr. BRIGHT, Sir G. GREY, and Sir H. CAIRNS took part, the debate was adjourned, and Dr Michell was ordered to appear in his place on Friday. The House then went into *Committee of Supply*, and resumed the discussion of the remaining estimates. In moving the vote of 10,000*l*. for the expense of *a new Copper Coinage*, the CHANCELLOR of the EXCHEQUER said that the coins would be composed of a compound metal, a species of bronze, and would be substituted for the large and inconvenient copper coins now in use. On the vote for 2200*l*. to defray the expenses of the late *Mission to the Ionian Islands*, Mr. GLADSTONE said he should be quite prepared to take his stand on the reports he had sent home whenever the public interests would allow them to be published. The *Militia Laws Amendment Bill* was read a second time. On the order for going into committee on the *Stamp Duties Bill*, Mr. SELWYN moved a resolution authorising the committee to introduce a clause extending the probate duty in the case of property above 1,000,000*l*. At the suggestion of Mr. LAING, the clause was deferred. The *Dublin Police Bill* and the *Probate and Letters of Administration (Ireland) Bill* passed through committee. On the consideration of the *Police (Counties and Boroughs) Law Amendment Bill*, as amended, several new clauses were added, and the Bill agreed to. Various other Bills passed through committee. On the order for the second reading of the *Divorce Court Bill*, received from the Lords, the ATTORNEY-GENERAL said that its object was to render all the judges in Westminster Hall eligible to sit in the full Court, and to facilitate the action and enlarge the powers of the Court in certain cases.—Mr. HENNESSEY objected to the Bill that it extended the action of a most dangerous law. He moved to defer the second reading for three months. The amendment was seconded by Colonel DUNNE. In the discussion which followed Mr. CARDWELL, on the part of the Government, consented to the exemption of Ireland from the operation of the Bill. On a division the amendment was negatived by 118 to 15, and the Bill was read a second time. The *Endowed Schools Bill* was withdrawn by Mr. DILLWYN after some remarks by Mr. HOPE and Mr. LOWE, who explained the changes which the Bill had undergone in the select committee. On the order for going into committee upon the *Medical Acts Amendment Bill*, Mr. COWPER moved to defer the committee for three months. The amendment was negatived after a public warm discussion, and the Bill passed through committee. The remaining business on the order for the second reading of the *Settled Estates Act* (1856) *Amendment Bill* was then resumed, and the House divided upon a motion by Mr LYNE to defer the second reading for three months, which was carried by 68 to 58, so the Bill was lost.

FRIDAY.—*Election Committee*.—Lord GROSVENOR, member for Longford, was brought up in the custody of the Serjeant at Arms, having been ordered into custody for neglecting to attend the Hull election committee. The cause of his absence having been explained he was ordered to be discharged on payment of the fees. *The Serpentine*.—On bringing up the report of Supply, Sir J. PAXTON objected to the vote of 17,000*l*. for the Serpentine, and thought that time should have been given to consider the report.—Sir J. SHELLEY and Mr. WALTER concurred, but the vote was ultimately agreed to. *The Bodmin Election*.—Dr MICHELL, in obedience to the order of the House, attended and said that not being an affluent man he was unable to meet the expense of defending his seat, and had therefore determined to retire. There was no sort of corrupt compromise, although he certainly had compromised by resigning on the ground that the petition should be withdrawn. He did not know that he was fighting against the rule of the House.

[Left speaking.]

## City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 95 to ¼ for Money, and 95¼ for the 7th September; Bank Stock, 222½; Reduced and New Three per Cents., 95½ to ⅝; India Stock, 221½; Four per Cent. Debentures, 1858, 94½; Exchequer Bills, 27*s*. prem.—FOREIGN: Austrian Five per Cents., 1859, 77, ex div.; Buenos Ayres Deferred Bonds, 18½; Dutch Four per Cent. Certificates, 100¼; Mexican Three per Cents., for account, 19; Russian Five per Cents., 113; Ditto Four and a Half per Cents., 98⅞ to 99½; Turkish Six per Cents., 1854, for account, 82½ to 82; Ditto, 1858, for account, 72¼ to 72; Venezuela New Two and a Half per Cents., 29 to 29¼.

## Metropolis and its Vicinity.

BIBLE EDUCATION FOR INDIA.—A deputation comprising upwards of 70 noblemen and gentlemen waited on Lord Palmerston and Sir Charles Wood at Cambridge House on Saturday. The Archbishop of Canterbury introduced the deputation, and explained the strong feeling which existed throughout the country on this subject, and read the following statement as conveying the object of the deputation:—

"To request a removal of the authoritative exclusion of the Word of God from the system of education in the Government schools in India, so that those who may be so disposed be interdicted from the hearing or the reading of the Bible in school hours, provided always that such safeguards be adopted against undue interference with the religions of the natives as may appear just and proper to the chief local authorities in the several governments of India."

Lord Shaftesbury stated that the numerous deputation now present represented all the denominations of religion, and that many more would have attended had not so many persons been out of town at this season. A written statement, explanatory of the views of the deputation, was then read:—

Sir C Wood explained that he and her Majesty's Government felt as anxious as the deputation that the natives of India should embrace the Christian religion. They desired this on the ground that every additional convert to Christianity was an additional strength to the British Government of India; that, notwithstanding the high authority of Sir J. Lawrence, there were others of high authority who took a different view of the subject; that many, even zealous for the promotion of missions, thought that a Bible class in Government schools might create a prejudice against Christianity, and so impede instead of promoting its progress; that it was a question which could not be definitively settled without communication with the authorities abroad as well as at home.—Lord Palmerston expressed his conviction that not only her Majesty's Government, but all Christian men, must unite in desiring the advancement of Christianity in India even as a matter of policy; that the deputation must not, therefore, regard the hesitation of Government as arising from any disregard of the importance of the question, but only on account of the difficulties with which it was surrounded in the apprehension of many Indian authorities.—Sir C Wood afterwards explained the nature of the interdict as far as his despatch of 1854 was concerned—namely, that it did not forbid the formation of a voluntary Bible class in any Government schools by the Government teachers, either before or after the school hours, nor did it forbid the reading of the Bible itself in school

hours as an historical book, without teaching the doctrines of the Christian religion. The latter point had been so explained in 1848 by Mr. Cameron, the head of the Educational Department in Calcutta.

STRIKE IN THE BUILDING TRADE.—The workmen in the building trade, who have long been agitating for a reduction of the hours of labour to nine daily, instead of ten, as at present, have now directed the men employed by Messrs. Trollope & Sons to strike for a curtailment of one hour in the day's work at the present rate of wages. In consequence of this proceeding a meeting of the master builders was held on Monday at the Freemasons' Tavern, at which it was unanimously resolved to close all the establishments on Monday next, the 6th of August; to employ in future no man who is not prepared to sign a document declaring that he will not become a member of the Trades Unions; to appoint a committee to arrange with the willing men; and to prepare a plan for a new and sound Benefit Society with the view of continuing to meritorious workmen the advantages of the legitimate objects from which the existing Trades Unions have been diverted. A meeting of workmen in favour of the strike was held on Wednesday evening at Hyde Park, and was attended by a body of operatives variously estimated at from 5000 to 20,000. Mr. Farey, a carpenter, presided as chairman; and another carpenter, named Cremer, moved a resolution pledging the meeting to support the nine hours movement. Several speakers addressed the meeting in strong terms against the resolutions agreed to by the master builders, and the motion was carried amidst great acclamation. The proceedings ended by burning the *Times* newspaper on a miniature gibbet. Up to this time about 220 of the largest builders in the metropolis have given in their adhesion to the principles adopted by the employers at their recent meeting. These 220 are stated to comprise all the builders in London who employ upwards of 50 men, and it is calculated that the total number of men in their employ is about 40,000, all of whom will be thrown out of employment on Monday, if the strike continues.

STRIKE OF THE GAS STOKERS.—During the last fortnight some of the gas companies of the metropolis have had great difficulty in providing a sufficient supply of gas, owing to the stokers and other men employed having struck for an advance of wages and less work. For some months past there has been a discontented feeling among the men, and last week they made an open demonstration at the Chartered Company's Works, in Horseferry Lane, demanding 37*s.* a week instead of 30*s.*, and 10 hours' labour instead of 12. The directors not being prepared to resist the demand, consented to advance the wages. A few days afterwards a similar strike was made at the Imperial Company's Works at Kings' Cross, but the directors having had an intimation of their design, had telegraphed to Yorkshire and other places for workmen, and refused to comply; whereupon about 150 men left their works. The men employed in the Vauxhall Works next struck, bnt their demands were met by the directors with a firm refusal. Finding themselves foiled in their attempt, the men, amounting to nearly 100, proceeded to the City Gas Works, in Whitefriars, for the purpose of inducing the men there to turn out, but they refused to do so. The police having quietly dispersed the men, they afterwards proceeded to the Phœnix Works, Bankside, and the works of the London Company, but the directors were prepared to resist the intimidation. The directors of the London Company have since issued a notice stating that as the works are to some extent impeded by the strike, the directors trust that the public boards and private consumers will support them by economising for the present the use of gas as much as practicable, in order to avoid the possibility of greater inconvenience.

ANNIVERSARY OF THE ABOLITION OF SLAVERY.—On Monday, being the 25th anniversary of the emancipation of the negro population in the British colonies, a public meeting was held at the Music Hall, Store Street, in celebration of the event. The chair was occupied by Lord Brougham, who delivered a long address on the subject. Mr. Hinckes, governor of Barbadoes, moved a resolution to the effect that the retrospect of emancipation was satisfactory to the meeting. This was seconded by Mr. G. Thompson, and carried unanimously. The Hon. Amasis Walker, of Massachusetts, moved the second resolution, deploring that slavery was still maintained by various civilised nations, and that the slave trade was still prosecuted in contravention of treaties and in defiance of all attempts to suppress it; but rejoicing that in the United States and elsewhere there were various societies engaged in promoting the extinction of those iniquities, and wishing them "God speed." The resolution having been unanimously adopted, a vote of thanks was given to Lord Brougham for his exertions in the cause of emancipation and his conduct in the chair.

STATE OF THE THAMES.—At the last meeting of the Metropolitan Board of Works, a report was presented from Professor Miller, stating that the liming process was going on very satisfactorily, and that the Thames was less offensive than in the former week.

ROBINS'S AUCTION ROOMS.—These well-known rooms under the Piazza in Covent Garden, which are said to be the oldest auction rooms in London, and have been occupied by the Messrs. Robins and their predecessors for upwards of half a century, are about to be pulled down to make room for a spacious hotel, which is immediately to be erected on the site.

THE NORTH SEA TELEGRAPH.—The cable of the Submarine Company from Weybourne to Heligoland and Denmark has been placed in telegraphic connection with Cromer, in Norfolk, and Westerhever, on the Danish coast, and messages have been exchanged with complete success.

THE LOSS OF THE ALMA.—Letters from the Red Sea state that all hope of saving the Alma is at an end. She has opened out from top to bottom on the port side, and is gradually becoming a total wreck. One thousand packages in all have been recovered, but the bales of silk which still remain in the hull have become quite putrid, and the stench arising therefrom is intolerable. One of two native divers have already perished in the attempt to save more of the cargo. Captain Henry and his officers, with 60 of the crew of the Alma and 10 marines from the Cyclops, still occupy the reef.

THE PUBLIC HEALTH.—The weekly report of the Registrar-General states that the returns of London for last week indicate some improvement in the state of the public health. The deaths in the week ending Saturday, July 30, were 1419. In the corresponding weeks of the 10 years 1849-58 the average number was 1148; which, if raised in proportion to the increase of population, will become 1262. The return of last week is therefore 157 below the average. During the week the births of 881 boys and 922 girls, in all 1803 children, were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1485.

## Provincial.

BATH.—On Tuesday the mayor of this city was engaged for several hours investigating a charge against a gentleman holding a high position in the army, involving the offence of sending anonymous letters of the most filthy and obscene character to a lady well known in fashionable circles and much esteemed in Bath. The accused, who had been apprehended under a warrant issued by the mayor the same morning, was Colonel John Alexander Forbes, of Lonach Lodge, Beacon Hill, and the charge against him was that he did on the 23d June "unlawfully and wickedly utter and publish an obscene and indecent letter, with intent to debauch and corrupt Adelaide Lucy Fenton, and with intent to incite her to commit a breach of the peace." The case was established by a comparison of the handwriting of the letter with others of a similarly gross character which had been addressed to a young man called Watting who had advertised for a situation as a teacher, and who very properly sent the letters to the superintendent of police. At the close of the inquiry the mayor determined to send the case to the assizes, and the defendant was admitted to bail, himself and one surety in 400*l.* each.

BIRMINGHAM.—On Thursday evening the 28th ult. a disastrous explosion occurred at the manufactory of Messrs. Ludlow, Brothers, percussion cap makers to the Board of Ordnance in Legge Street. It is supposed that an old woman named Booth, who has been similarly employed by the firm for the last 30 years, was engaged in the hazardous operation of mixing fulminating powder used in the manufacture. She had a room for herself at the top of the main building where the explosion took place. The poor woman must have been instantly blown and torn to fragments, as no portion of her remains larger than a person's hand have been picked up. A man engaged in another part of the building was killed by the roof falling in, and another had both his legs broken. A woman was badly burnt about the hands and face; and several other persons employed in the manufactory were injured. The premises were completely gutted, and thrown open to the sky. The explosion was heard at a distance of two miles.

CHELTENHAM.—The sale of Lord Northwick's pictures has proceeded this week with increasing animation. The fourth day's sale (consisting chiefly of modern pictures of the English school), produced upwards of 7000*l.*, the highest prices being realised by Mr. T. Webster's "Breakfast, or the Dunce punished," which sold for 1005*l.*, and by Mr. Mulready's "Convalescent from Waterloo," which sold for 1180 guineas. The fifth day's sale produced 7500*l.*, the highest price being realised by Murillo's celebrated picture of "Jacob placing the Rods before the Sheep of Laban," which fetched 1410 guineas. The sixth day's sale produced upwards of 6250*l.*, two of the principal works, Giulio Romano's "Birth of Jupiter," and Girolamo da Treviso's "Virgin and child throned," being bought for the National Gallery at a cost of 920*l.* and 450 guineas respectively. The total proceeds of the six day's sale were 32,250*l.* The seventh and eighth day's sale, on Thursday and Friday, were devoted to the antique gems from the Poniatowski collection, miniatures, marbles, bronzes, Raffaelle ware, camei, and intaglei, from the Gilmore and other collections; and on Tuesday next the sale of the pictures will be resumed, and continued throughout the week.

DARLINGTON.—Several persons in this town have had a narrow escape of being poisoned through eating cheese which appears to have become poisonous, not in consequence of the introduction of any extraneous substance, but from the spontaneous conversion of the acetic acid it contained into caseic. The magistrates before whom the facts were stated thought that, as no suspicion attached to any parties, no useful purpose would be served by an analysis. They declined, therefore, to make any order, except that the shopkeeper should be cautioned against selling any more cheese of the same description.

LIVERPOOL.—On Monday last Andrew Adam Davis, second mate of the American ship Helen Foster, was charged before the Birkenhead magistrates with an outrage upon two Austrian seamen, who, in order to escape the prisoner's violence, had leaped into the river, and narrowly escaped drowning, one of them having contrived, though almost dead from exhaustion, to reach the shore at a place three miles from the scene of the outrage. Fortunately for the prisoner, he thus escaped an indictment for murder, and was fined 40*s.* and costs for the assault.

SHEFFIELD.—About 10 o'clock on Monday night James Linley, saw-grinder, was shot while sitting at the Crown Inn, Scotland Street. The ball entered his left temple, and lodged behind the eye, but it is not expected to prove fatal. Linley has previously been shot at, and attempts have been made to blow up his house for refusing to join the Saw-grinders Union; but the present outrage is supposed to have been committed from motives of jealousy by a man called Brown, and to be wholly unconnected with the Union.

SOUTH SHIELDS.—On Monday evening a frightful accident occurred at the laying of the foundation stone of a new Primitive Methodist Chapel near the Jarrow Docks in this town. It is proposed to use the ground floor as a school, and the work had advanced so far that the beams and planks were laid for the second floor. At the time the ceremony was about to take place about 150 persons, mostly pitmen, had got upon this floor, using it as a platform, but as Alderman Wallis was proceeding to lay the stone the central beam of the floor where the people were standing snapped, and the whole living mass, with the materials, were thrown together on the ground. It was some minutes before the crowd could be cleared away, or before people could recover their senses to pull out the injured people from the fallen materials. Those that were hurt were then attended by medical gentlemen who were present. About a dozen people in all were hurt, but it is not expected that any case will terminate fatally.

STAMFORD.—Great sensation has been caused at Rushden by a family of gipsies, eight in number, being taken suddenly ill. A surgeon was sent for, who found that they were suffering from the effects of arsenic, which appears to have been mixed with a quantity of flour that had been given them, and for several hours the whole party were in great danger. There appears to be considerable mystery connected with the affair.

## Ireland.

CONFERENCE OF THE ROMAN CATHOLIC BISHOPS.—All the prelates of the Roman Catholic Church in Ireland, with the solitary exception of Bishop Blake of Dromore, assembled on Monday in the chapel of St. Kevin, Dublin, and have since sat daily by adjournment, "for the purpose of taking into consideration several questions of great importance to the Irish Catholics." The proceedings are conducted with closed doors, and all that has transpired is that the chair was taken by the Papal Legate, as being superior in rank to the Primate.

THE BELFAST PHŒNIX CONSPIRATORS.—At the Antrim Assizes on Monday, after some discussion, the conspirators were discharged on their own recognizances on condition of their taking the oath of allegiance when called upon, Judge Christian concurring in the course adopted by the Crown. The traversers all pleaded Guilty.

DEPARTURE OF IRISH NUNS FOR AUSTRALIA.—Eight ladies of the Westport branch of the Order of Mercy left Baggot Street Convent recently for Liverpool, where, on their arrival, they remained in St. Mary's Convent of Mercy until the 6th, when they sailed in the Saldanha for Sydney, there to found a convent, schools, &c. in connection with their order.

SHOCKING MURDER IN THE COUNTY LIMERICK.—On Thursday the 28th ult. a respectable farmer named William Crowe, of Cooga, county Limerick, was brutally murdered while going to a funeral. The unfortunate man was first shot through the body, and his brains were afterwards beaten out with stones. He was a tenant of Lord Derby's, and voted for the Conservative candidate at the last election. It was stated at the inquest that the unfortunate man was denounced from the altar on two successive Sundays previous to his murder in the following terms.—"That Crowe will yet go like the froth of the river; his children will get disease, and his cattle distemper, for voting for Protestant Dickson." Though the murder took place on the high road, 400 yards from a police barrack, about 2 o'clock in the afternoon, all the people profess the greatest ignorance of the matter, and the murderers have not been apprehended. The Irish Government have offered a reward of 100*l.* for their discovery.

## Railways.

COLLISION AT THE FENCHURCH STREET STATION.—On Monday afternoon a serious accident occurred at the Fenchurch Street terminus, by which several persons were injured. An engine had backed a Tilbury train into the station, and was proceeding outwards just as the North Woolwich up train was coming in. Before the engines of either train could be stopped a collision took place, the single engine dashing into two of the carriages of the North Woolwich train, and severely injuring the passengers. The engine and train were both knocked off the line. The injured persons were speedily removed to the platform. Two

were taken to the London Hospital—one, a sailor, much contused and stunned; and the other, a middle-aged woman, with her leg fractured badly and other injuries. The rest of the sufferers were taken to their own homes, or to St. Thomas's Hospital. It is understood that they are all doing well and that none of the injuries are likely to prove fatal.

THE BRIGHTON AND SOUTH-WESTERN DISPUTE.—The Brighton and South-Western directors have come to terms. The Brighton company is to enjoy as before one third of the Portsmouth on payment of one-third of the rent, 18,000*l.* a year. An equivalent commutation is to be given to the Brighton company for the passage over the Havant and Hilsea part of the line, but the right over it is to remain as it has been, solely in the Brighton company. The Epsom and Leatherhead line is to be common property to both the South-Western and Brighton companies. The Brighton company is to be allowed to make a line from Pulborough to Arundel, and the agents of both parties are to stop all hostile surveys. Under this arrangement the running of through trains by the direct Portsmouth route will be resumed on Monday next, and the low-priced excursion trains by both routes will be abandoned on the same day.

LONDON AND SOUTH-WESTERN.—At the half yearly meeting on Thursday, the report of the directors was adopted, and a dividend declared at the rate of 4½ per cent. per annum, an amendment to reduce it to 4 per cent. not having been seconded.

## Law.

OXFORD CIRCUIT: HEREFORD.—*The Ledbury Murder.*—*John Isaac Jones*, solicitor's clerk, was tried on Tuesday for the wilful murder of Harriett Baker, at Ledbury, before Mr. Justice Byles. The evidence was purely circumstantial, and though many of the details pointed with peculiar suspicion to the prisoner, there was necessarily an absence of any direct proof. The trial lasted nearly three days. Mr Justice Byles, in summing up on Thursday morning, called the attention of the jury to the leading facts, and in commenting on them noticed the points very strongly that told in the prisoner's favour, and the tendency of the summing up was to show that in his lordship's opinion the prisoner was not the man who committed the murder. The jury then retired, and after consulting for three hours they returned a verdict of *Not Guilty*. Slight applause followed the announcement. The prisoner, who all the day had hung down his head on his hands on the rail of the dock, was brought up, assisted by the keepers, when the Court reassembled, seemingly in a state of great trepidation. Immediately on the slight applause referred to, he gave a convulsive start and fainted. Medical assistance was at hand, and water having been thrown upon his face, he began to recover in part, but fought for a time desperately with the keepers, saying in a low voice, "I am innocent, I am innocent." On recovery he beckoned the governor of the gaol to him and asked what was the verdict, at the same time thanking him for all his kindness. He then called for his solicitor, who was not however at hand, and refused to leave the Court till he had seen him. Subsequently, however, he was prevailed upon to go below. Afterwards, to protect him if any violence should be offered, he was conveyed back to the gaol. STAFFORD.—*The Attempted Wife Murder at Ludlow.*—*Francis Hopwood*, 21, engine driver, was charged with cutting and wounding his wife, Mary Hopwood, with intent to murder her; also with intent to do her grievous bodily harm, on the 10th of April, at Ludlow. The prisoner and his wife had separated on account of their frequent quarrels, and the wife having refused to live with him again, he attempted to cut her throat and afterwards threw himself into the river with the intention of committing suicide. The jury found him *Guilty* of unlawfully wounding. Mr Justice Willes said, the jury had taken a very lenient view of the case, and that if the prisoner had been found guilty of the felony he would have been transported for life. The prisoner had been twice before convicted of violent assaults upon women, and he should therefore give him the utmost punishment which the law allowed—viz., two years' imprisonment, with hard labour. *Stabbing.*—*Frederick Foreday*, 22, was charged with stabbing and wounding James Bullock on the 24th of April, 1859, at Upper Penn, with intent to murder him, and also with intent to do him some grievous bodily harm. This was an extraordinary case, not merely from the severity of the wound inflicted on the prosecutor, but from the fact which it disclosed, that the prosecutor, who was a policeman at Wolverhampton, had trained and used a bull-mastiff for the purpose of knocking down and catching thieves and others whom he desired to arrest. The prisoner stabbed the policeman in the back near the spine, and inflicted a wound nearly 3 inches deep, which penetrated the kidneys. The policeman then set his dog at the prisoner, who ran away, but the dog stopped him, and when the policeman went up to take him into custody, the prisoner again stabbed him in the region of the heart, but the knife fortunately struck a bone and did little injury. Mr. Justice Willes, in summing up, condemned in strong terms the illegal practice of using a dog as had been done in this case, and said that in no country where there was a spark of humanity or independence could such a practice be tolerated. The jury found the prisoner *Guilty* of wounding with intent to do grievous bodily harm. Mr. Justice Willes said the offence was a most serious one, and it was necessary to make an example of the prisoner, as a warning to others, and for the protection of the lives and limbs of her Majesty's subjects. The sentence was that the prisoner be kept in penal servitude for six years.

## Obituary.

THE EARL OF MINTO, G.C.B., died on Sunday afternoon at his residence in Eaton Square, after a protracted and lingering illness. His lordship, Gilbert Elliott Murray Kynynmond, Earl of Minto, Viscount Melgund and Baron of Minto, county Roxburgh, in the peerage of the United Kingdom, and a Baronet of Nova Scotia, was eldest son of the first earl, by the eldest daughter of Sir George Amyand, Bart., and was born in 1782. He married, in 1806, the eldest daughter of Patrick Brydone, Esq., by whom (who died in 1853) he leaves surviving issue Lady Dunfermline, Viscount Melgund, Lady John Russell, the Hon. Henry George Elliott, Captain the Hon. Charles Elliott, Lady Elizabeth Romilly, the Hon George Elliott, Lady Charlotte Portal, and the Hon. Gilbert Elliott, in the Rifle Brigade. He succeeded to the earldom on the death of his father in 1814. He was educated at the University of Edinburgh with the Marquis of Lansdowne, Lord John Russell, Lord Palmerston, Lord Glenelg, and other eminent members of the Whig party. Previous to his accession to the earldom he sat in the House of Commons for Ashburton. On the completion of the Grey Administration he was made a privy councillor, and in 1832 was appointed minister plenipotentiary to the Court of Berlin, where he continued until the autumn of 1834. In 1835 he accepted office in Lord Melbourne's second Administration, as First Lord of the Admiralty, in the room of Lord [illegible], resigned [illegible] the usual Royal [illegible] the Queen, on the Majesty in 1841. On Lord John Russell succeeding to the Premiership in 1846, he entered the Cabinet as Lord Privy Seal. In the following year he went on a special mission to Switzerland, the Courts of Florence, Turin, Rome, and Naples. While on his mission the revolution of February, 1848, broke out in Paris, and the object of his mission to Naples was not effected, owing to the convulsions which followed the revolution in France. He returned from Paris in May, 1848, to resume his duties in the Cabinet, and as Lord Privy Seal remained until the resignation of Lord John Russell in 1852, since which period he has not [illegible] in political matters, beyond giving support to his political friends by his votes in the House of Lords. His lordship is succeeded in his titles and estates by his eldest son, Viscount Melgund, born 1782, and married in 1844 to the only daughter and heiress of the late General Sir Thomas Hislop, G.C.B. The present earl graduated at Trinity College, Cambridge, and has been M.P. for Hythe, Greenock, and Clackmannan.

THE HON. PATRICK PLUNKET, Judge of the Irish Court of Bankruptcy, died on the 31st ult. at Kingstown, in his 64th year. He was the fifth son of Lord Plunket, who was raised to the bench in 1824. For some years he was private prosecutor on the Leinster circuit. He survived his colleague, Mr Moore, but a few weeks, and wanted but a year of service to entitle him to his full retiring pension.

THE HON. ROBERT WINDSOR CLIVE, M.P. for South Shropshire, died on Thursday at his residence in John Street, Berkeley Square, after a long illness. He was eldest son of the late Hon. Robert Clive and the nephew of Viscount Clive, born in 1815. He married in [illegible] Lady [illegible] daughter of the Earl of [illegible], by whom he leaves a youthful family.

THE REV. JOSEPH SHAW, B.D., senior Fellow of Christ's College, Cambridge, died at that College on Tuesday morning in his 75th year. Mr. Shaw proceeded to his B.A. degree in 1807, and was third senior optime. He was directly elected fellow, and within a short period tutor of the college. In 1849, on the election of Dr. Graham to the see of Chester, he was elected to succeed the right rev. prelate in the mastership, but resigned the office before his term of grace had expired, and retired to his former position, having reached that age when, in his estimation, the more brilliant position did not compensate the loss of the quiet and leisure he had hitherto enjoyed. The valuable living of Kegworth was offered him by the society, but declined, and he has finally expired within the walls of the college where he has resided nearly 55 years.

BIRTHS.—On the 1st inst., at 37, Eccleston Square, Viscountess INGESTRE, of a daughter.—31st ult., at Clifton, Staffordshire, the Hon. Mrs BRIAN FLEMING, of a daughter.—27th ult. at St James's Palace, the Hon. Mrs SPENCER PONSONBY, of a daughter.—21st ult., at Ellerton, Shropshire, the wife of the Rev. SIR C. E. COVENT GARDEN.—Aug. 6.

Grapes and Pine Apples have not altered in price since our last report. West India Pines have been plentiful and good. Gooseberries, Currants, and Raspberries are getting scarce, and Cherries and Strawberries may be said to be over. English Apricots are more abundant. Greengage Plums obtain 2s. a dozen. Oranges fetch 3s. 6d. and 16s. per hundred. Nuts of all descriptions and vegetables to cook are fair prices. Filberts may be had for 4s. per lb. Cucumbers and Tomatos are plentifully supplied. Mushroom is getting over. Peas, Beans, Herb Carrots, and Green Artichokes must be classed in quantity. Cauliflowers are plentiful. New Potatoes realize from 6s. to 10s. per cwt. Cucumbers abundant. Cut flowers chiefly consist of Orchids, Gardenias, Balsam, the Lily of the Valley, Violets, Mignonette, Heaths, and Roses.

FRUIT.

| | |
|---|---|
| Pine Apples, per lb., 4s to 6s | Figs, per punnet, 3s to 4s |

| Straw | 26 | 30 | Inferior do. | 80 | 84 |

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 1.

We have a large supply of Beasts but the average quality is very middling. Trade is dull but prices are not lower. There are a few more Sheep and Lambs, they are, however, readily disposed of at fully late rates. Calves are not so plentiful as they have been, and realize rather higher prices. From Germany and Holland there are 1240 Beasts, 5950 Sheep, and 170 Calves; from Spain, 120 Beasts; from Scotland, 45; from Norfolk and Suffolk, 200; from Ireland, 250, and 800 Sheep and Lambs; and 2000 Beasts from the northern and midland counties.

| | s. | d. | s. | d. | | s. | d. | s. | d. |
|---|---|---|---|---|---|---|---|---|---|

| | | | | | Calves | .. | .. | 4 0 | — 4 10 |
| | | | | | Pigs | .. | .. | 3 8 | — 4 6 |

Beasts, 4610, Sheep & Lambs, 23,[illegible]: Calves, 220, Pigs, 280.

TUESDAY, Aug. 4.

We are but scantily supplied with good Beasts, they are consequently readily disposed of at fully late rates. The number of Sheep and Lambs is about an average, trade is cheerful at Monday's quotations. Calves are a dull sale, but prices are not lower. Our returns comprise 2,[illegible] Beasts, 1,[illegible] Sheep, and 301 Calves. The imports of Meat into London is [illegible].

| | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Best Scots, Herefords, &c | 4 | 8 | to 4 | 10 | Best Long-woods | 4 | 6 — 4 | 10 |

Beasts, [illegible]; Sheep & Lambs, 12,850; Calves, 560; Pigs, [illegible].

MARK LANE.—MONDAY, Aug. 1.

The supply of Wheat from Essex and Kent to this morning's market was small, including a few samples of new, the quality of which was very [illegible]. Buyers had an advance, but on the sales effected last Monday's prices could not be exceeded. Foreign met a retail inquiry at Friday's prices, or 1s. per qr. above those obtained on this day sennight. Barley is a slow sale at about the currency of the last week. Beans and Peas are without [illegible]. Flour trade is slow, and prices must be quoted [illegible] per sack lower. The top price of town-made Flour is [illegible] per sack.

| | | | | Per sack | 30—37 |

FRIDAY, Aug. 5.

The weather, which at the close of last week was showery, has been during the present week fine for the harvest until yesterday morning, when some heavy showers fell, but not sufficient to do any damage. The accounts of the Wheat crop are confirmatory of our last week's report, and agree more or less with those of Italy (Naples has opened her ports), France, and several parts of Germany, all of which represent the new Wheat as having suffered from premature ripening, the result probably of excessive heat. Cutting is general south of the Humber, and a large portion has been carried. The Wheat trade has been inactive throughout the kingdom, and on the sales effected the turn in prices has been in favour of buyers.

Barley and Oats are also declining in value. Prices of Beans and Peas are unaltered. Flour, notwithstanding the reduction of 3s. per sack on Monday, has met a very slow sale. The arrivals of grain laden vessels off the coast for orders from Southern Europe are moderate this week. The sales include Odessa Ghirka Wheat at 41s. 6d. nett, Polish Odessa at 42s. 6d., Taganrog Ghirka at 42s., all per 492 lbs.; Ibrail Maize at 27s. to 27s. 7½d, Odessa at 27s. per 480 lbs., and 26s. to 28s. 6d. per 492 lbs.; Odessa Rye at 25s. 4½d, Ibrail at 25s. 10½d., both per 480 lbs. The arrivals of English grain and foreign Wheat and Barley this week have been moderate, good of Oats. The English Wheat undisposed of last market day remains unsold, Monday's prices being unobtainable. Fine descriptions of foreign were neglected, but there was some inquiry for St. Petersburg and cheap qualities at a reduction of 1s. per qr., which we believe was not accepted. Spring Corn of all descriptions is a slow sale at about Monday's prices.

ARRIVALS FROM AUG. 1 TO AUG. 5.

| | Wheat. | Barley. | Oats. | Flour. |
|---|---|---|---|---|
| English .. | 1140 qrs. | 100 qrs. | 1180 qrs. | 1930 sks. |
| Irish .... | — ,, | — ,, | 510 ,, | — ,, |
| Foreign .. | 10470 ,, | 2280 ,, | 29590 ,, | 360 ,, — brls. |

LIVERPOOL, Tuesday, Aug. 2.—We had a good attendance of both town and country millers and dealers at our Corn Exchange this morning. The demand for Wheat was confined, however, to the supplying of immediate requirements, and quotations must be noted generally 1d. per cental lower than this day week. Flour had a better inquiry, and more money was obtained for low-priced qualities than was possible some days ago. Indian Corn was dull of sale, without change in value. Oats and Oatmeal both difficult to move. Beans rather easier. Peas and Barley little dealt in.

FRIDAY, Aug. 5.—Corn market fairly attended. Moderate business in Wheat at slight decline from Tuesday's rates. Flour unaltered at Tuesday's prices. Indian Corn moderate. Inquiry for Oats, Oatmeal, and Barley unaltered.

Any article to be had singly at the same prices. A smaller chest to contain the above, and a relative number of knives, &c., 7*l*. 15*s*. Tea and coffee sets, cruet and liqueur frames, waiters, candlesticks, &c., at proportionate prices. Also a list of re-plating done by the patent process.

CUTLERY, WARRANTED.—The most recherché assortment of TABLE CUTLERY in the world, all warranted, is on SALE at WILLIAM S. BURTON'S, at prices that are remunerative only because of the largeness of the sales. Superior Ivory-handled Table Knives, with high shoulders, 12*s*. 6*d*. per dozen. Desserts to match, 10*s*. 0*d*.; if to balance, 6*l*. per doz. extra. Carvers, 4*s*. 3*d*. per pair; larger sizes, from 20*s*. to 27*s*. 6*d*. per pair. Extra fine Ivory, 33*s*.; if with silver ferrules, 40*s*. to 50*s*.; white bone Table Knives, 6*s*. 0*d*. per doz; Desserts, 5*s*. 0*d*.; Carvers, 2*s*. 3*d*. per pair; black-horn Table Knives, 7*s*. 4*d*. per doz; Desserts, 6*s*.; Carvers, 2*s*. 6*d*.; black wood-handled Table Knives and Forks, 6*s*. per doz; Table Steels, from 1*s*. each. The largest stock in existence of Plated Dessert Knives and Forks, in case and otherwise, and of the new plated Fish Carvers

WILLIAM S. BURTON'S GENERAL FURNISHING IRONMONGERY CATALOGUE may be had gratis, and free by post. It contains upwards of 400 Illustrations of his illimited Stock of Electro and Sheffield Plate, Nickel Silver and Britannia Metal goods, Dish Covers and Hot-water Dishes, Stoves, Fenders, Marble Chimney-pieces, Kitchen Ranges, Lamps, Gasoliers, Tea Urns and Kettles, Tea Trays, Clocks, Table Cutlery, Baths and Toilet Ware, Turnery, Iron and Brass Bedsteads, Bedding, Bed Hangings, &c., with List of Prices and Plans of the 16 large Show Rooms at 39, Oxford Street: 1, 1A, 2, and 3, Newman Street; and 4, 5, and 6, Perry's Place, London.—Established 1820

HEALTH WITHOUT PHYSIC.—Nervousness effectually cured by a novel and most successful mode of treatment, discovered in America. The most convincing proofs of the efficacy of this wonderful remedy, with other details, will be sent to any address on receipt of one stamp.—Address Mr. HILL, 27, Alfred Place, Store Street, London, W.C.

TOURISTS AND TRAVELLERS, VISITORS TO THE SEASIDE, and others exposed to the scorching rays of the sun, and heated particles of dust, will find ROWLAND'S KALYDOR a most refreshing preparation for the complexion and skin, dispelling the cloud of languor and relaxation, allaying all heat and irritability, and immediately affording the pleasing sensation attending restored elasticity and healthful state of the skin. Freckles, tan, spots, pimples, sunburn and discoloration are eradicated by the application. Price 4*s*. 6*d*. and 8*s*. 6*d*. per bottle. The heat of the summer often induces a dryness of the hair, and a tendency to its falling off, which may be completely obviated by the use of ROWLAND'S MACASSAR OIL, a delightfully fragrant and transparent preparation for the hair, and as an invigorator and beautifier beyond all precedent. Price 3*s*. 6*d*.; 7*s*.; family bottles (equal to four small), 10*s* 6*d*.; and double that size, 21*s*. ROWLAND'S ODONTO, or PEARL DENTIFRICE, bestows on the teeth a pearl-like whiteness, frees them from tartar, and imparts to the gums a healthy firmness, and to the breath a grateful purity and fragrance. Price 2*s*. 9*d*. per bottle.—Sold by A. Rowland & Sons, 20, Hatton Garden, London, E.C.; and by Chemists and Perfumers.—Beware of Spurious Imitations.

# The Gardeners' Chronicle Newspaper.

*SATURDAY, AUGUST 6, 1859.*

THE HEART OF THE ANDES. By Frederick E. Church (Painter of the Great Fall, Niagara), is being EXHIBITED daily by Messrs. DAY & SON, Lithographers to the Queen, at the German Gallery, 168, New Bond Street, W. Admission One Shilling.

RAFFAELLE DRAWINGS belonging to the University of Oxford, with PHOTOGRAPHS OF RAFFAELLE CARTOONS and other Drawings, will be exhibited at the South Kensington Museum during the month of August.

QUEEN'S COLLEGE, BIRMINGHAM.
Incorporated by Royal Charter

The WINTER SESSION of the Faculties of ARTS, MEDICINE, ENGINEERING, and AGRICULTURE, will commence on MONDAY, October 3. The system of study pursued at the College constitutes a complete Course of Education (with Collegiate discipline) in Arts, Science, Medicine, Law, and Theology, without residence elsewhere, and the Courses of the different faculties are recognised in the Universities of London and Durham, with which the College is in connection; by the different Medical Examining Boards, and by those of Her Majesty's Army, Navy, and Indian Services.

The College is empowered by Royal Charter to confer a Diploma in Engineering.

Agricultural Students are prepared by a special course of study for the Examination of the Royal Highland Agricultural Society.

Students in the Junior department of Medicine are prepared for the Matriculation Examinations of the University of London, College of Surgeons, Apothecaries' Hall, &c. Those who reside in the College may receive Indentures of Apprenticeship without premium.

For further information and Prospectuses, application may be made to the Dean of the Faculty; or to Dr. Bond, Hon. Sec. to the Medical Faculty, Queen's College.

BANK OF DEPOSIT,
Established A. D. 1844; 3, Pall Mall East, London.
Capital Stock 100,000*l.*

PARTIES desirous of INVESTING MONEY are requested to examine the Plan of The Bank of Deposit, by which a high rate of Interest may be obtained with ample security. Deposits made by Special Agreement may be withdrawn without notice. The Interest is payable in January and July. Peter Morrison, Managing Director.
Forms for opening Accounts sent free on application.

NORWICH UNION LIFE INSURANCE SOCIETY.—Instituted 1808.
Invested Capital exceeding 2,000,000*l.* sterling.

This Society is one of the very few purely Mutual Insurance Offices, the whole of the profits being divided among the Policy holders, and possesses large reserves applicable to future Bonuses. The rates are considerably below those usually charged. Thus at the age of 40 the sum of 33*l.* 19*s.* 2*d.*, which, at the ordinary premium, will insure 1000*l.*, with the Norwich Union WILL INSURE ONE THOUSAND AND NINETY-FIVE POUNDS FOUR SHILLINGS, giving an immediate bonus in addition to subsequent accumulations.

Annuities and special risks undertaken on favourable terms.

For forms of proposal and prospectuses apply at the Society's Offices, 6, Crescent, New Bridge Street, Blackfriars, E.C., and Surrey Street, Norwich.

NEXT OF KIN, HEIRS, &c., WANTED.—The public are respectfully apprised that this truly important BOOK, mentioned by the press, is creating a sensation, and where hundreds of names, descriptions, and late residences of persons wanted to claim property and money in all parts of the Kingdom, the Colonies, India, and America ARE DISTINCTLY GIVEN, can be had sent by post from the publishers for 12 penny stamps.—Direct Fisher & Son, Kingsland, London, N.E., Established 1847.

Notice.—The largest stock of the *Times, Gazette, Chronicle, Post, Herald,* Colonial, Indian, and American Newspapers in the world, kept to search for old neglected claims.

WHAT WILL THIS COST TO PRINT? is a thought often occurring to literary minds, public characters, and persons of benevolent intentions. An immediate answer to the inquiry may be obtained on application to Richard Barrett, 13, Mark Lane, London. R. B. is enabled to execute every description of Printing on very advantageous terms, his office being furnished with a large and choice assortment of Types, Steam Printing Machines, Hydraulic and other Presses, and every modern improvement in the Printing Art. A Specimen Book of Types, and information for Authors, sent on application, by
Richard Barrett, 13, Mark Lane, London, E.C.

ADVERTISEMENTS for THE ROYAL AGRICULTURAL JOURNAL, intended for insertion in No. XLIII., must be forwarded to the Printer without delay, accompanied with an Order for their Payment and Insertion, as no attention will be paid to them otherwise.
William Clowes & Sons, Printers, Duke Street, Stamford Street, Blackfriars, S.

HAWKER ON SHOOTING.
Eleventh Edition, in One Volume, square crown 8vo, with several Plates and Woodcuts, price 18*s.* half-bound,
INSTRUCTIONS TO YOUNG SPORTSMEN, in all that relates to GUNS AND SHOOTING. By the late Lieut.-Col. P. Hawker. Revised and corrected by his Son.

"Colonel Hawker expounds the whole *rationale* of shooting with clearness, fulness, and vivacity."—*Edinburgh Review.*

"Colonel Hawker's work is replete with that species of information which every man who desires to know what he is about in the field deems essential to success, and without which he must share the fate of all novices. . . The knowledge of this thorough master of his art is combined with a facility and clearness of expression and description which leave nothing to be desired."—*Bell's Life in London.*

London: Longman, Green, Longman & Roberts

NEW EDITION OF YOUATT ON THE HORSE.
Just published in One Vol. 8vo, price 10*s.* 6*d.* cloth,
THE HORSE. By William Youatt. With a Treatise on Draught. With numerous Woodcut Illustrations, chiefly from Designs by W. Harvey. New Edition, revised and enlarged by E. N. Gabriel, M.R.C.S., C.V.S.; Secretary to Royal College of Veterinary Surgeons.

Youatt's work, admitted to be the best and most complete practical treatise on the Horse, was originally produced under the superintendence of the Society for the Diffusion of Useful Knowledge, and subsequently published by Messrs. Longman & Co. by assignment of C. Knight. The third edition, now ready, has been carefully and thoroughly revised by Mr. Gabriel, and brought up to a level with the present state of the veterinary art. Amongst numerous other additions an account is given of Mr. Rarey's method of horse-breaking, also a new set of illustrations of the age of the horse as indicated by his teeth. Purchasers should order "Messrs. Longman & Co.'s Edition of 'Youatt on the Horse,'" which, besides the above-mentioned improvements just made, includes also the Author's latest corrections, &c., added to the second edition.

YOUATT ON THE DOG. 8vo, Woodcuts, 6*s.*, may also be had.
London: Longman, Green, Longman, & Roberts

NEW WORK ON THE DOG BY STONEHENGE.

## News of the Week.

In the House of Lords on Monday, the Divorce Court Bill as amended in committee was considered, when the clause bringing India and the Colonies within its operation was omitted, and the clause empowering the court to sit with closed doors in certain cases was carried on a division by 24 to 11. The Bill was then read a third time and passed. On Tuesday Lord Brougham called attention to the strike in the building trade, and impressed upon the House the necessity of putting some check to these combinations of workmen. On Thursday Earl Granville referred to the same subject, and expressed his opinion that the present strike was perfectly unjustifiable.

In the House of Commons on Friday the

Income Tax Bill passed through committee, with the addition of a new clause moved by the CHANCELLOR of the EXCHEQUER, remitting the duty on annuities purchased from the Government. Mr. HORSMAN'S motion for defraying the expense of the national defences projected or already in progress by a fund specially provided for that purpose, and independent of the annual votes of Parliament, led to a long and interesting debate, in which Mr. S. HERBERT, Sir F. SMITH, Sir C. NAPIER, Mr. COBDEN, Sir J. PAKINGTON, Lord C. PAGET, Lord PALMERSTON, and other members took part. Lord PALMERSTON expressed his hope that Mr. HORSMAN would withdraw his motion, as the opinions which it had elicited from all parts of the House were quite sufficient to answer his object in proposing it. Mr. HORSMAN however insisted upon dividing, when his motion was rejected by 167 to 70. On Monday in Committee of Supply the vote for the expenses of the Statute Law Consolidation Commission was negatived on a division by 91 to 80. At the evening sitting the House went into committee on the Indian Loan, when Sir C. WOOD made a long statement on the financial condition of India, and concluded by moving a formal resolution that power be given to HER MAJESTY'S Government to raise in this country a sum not exceeding 5,000,000*l.* for the service of India. After considerable discussion the motion was agreed to. On Tuesday the Income Tax Bill was read a third time and passed, and the Police (Counties and Boroughs) Law Amendment Bill passed through committee. Sir G. LEWIS withdrew the Roman Catholic Charities Bill for the present session, and announced his intention to introduce a Continuance Bill for another year. Mr. MILNES'S motion for an address to the Crown praying that negotiations may be entered into with the United States for the purpose of preventing the assaults and cruelties committed on board merchant ships trading between England and America was agreed to. Mr. A. SMITH'S motion for a select committee to inquire into the rights claimed by the Crown and other bodies connected with the foreshores and coasts of the United Kingdom was cut short by the counting out of the House. On Wednesday the Law of Property and Trustees Relief Amendment Bill passed through committee. The House then went into Committee of Supply, when Mr. SPOONER moved the rejection of the vote of 2000*l.* for the National Portrait Gallery. On a division the vote was agreed to by 141 to 35. Mr. SPOONER then moved the rejection of the vote of 2000*l.* for the purchase of Sir G. HAYTER'S historical picture of the First Meeting of the Reformed Parliament. On a division there were for the vote 82, and against it 82. The numbers being equal, the chairman, Mr. MASSEY, gave his casting vote in favour of the vote. The vote of 9988*l.* for the cost of constructing fire-proof rooms adjoining the Sheepshanks' Gallery at South Kensington, to receive the Vernon, Turner, and other pictures belonging to the National Gallery, was warmly opposed by several members, but was carried on a division by 116 to 73. The vote of 5000*l.* as compensation to Mr. Barber in consideration of his sufferings and distressed circumstances, was opposed by Mr. C. CLIFFORD, but was carried on a division by 124 to 24. On Thursday, after a long discussion on the vote for the new Foreign Office, a sum was voted on account, without any decision as to the style of the new buildings being arrived at. The vote of 17,000*l.* for the improvement of the Serpentine gave rise to a long debate, chiefly in reference to the inadequacy of the proposed measures, but the vote was carried on a division by 97 to 12. A vote of 50,000*l.* for a new coinage of mixed metal in lieu of the present copper coinage was agreed to. The Police (Counties and Boroughs) Law Amendment Bill, as amended, was considered, and agreed to with some new clauses. The second reading of the Divorce Court Bill was moved by the ATTORNEY-GENERAL, and opposed by Mr. HENNESSEY. On a division, the second reading was carried by 118 to 13. The Medical Acts Amendment Bill passed through committee after considerable opposition, and a division, in which the first clause was carried by 97 to 19. The second reading of the Settled Estates Act Amendment Bill, the object of which was to enable Sir T. M. Wilson to build on his estate at Hampstead, was negatived on a division by 68 to 36; the Bill was therefore lost.

The *Moniteur* of Wednesday announced that the army of observation on the Rhine had been dissolved with the exception of the divisions at Chalons and Helfant; and the *Patrie* of the same day announced that the squadron at Brest had been placed out of commission. From India we learn that the disaffection among the late Company's European troops had increased to such an extent that the Bengal regiments at Berhampore broke into open mutiny, entrenched themselves in the barracks, and elected officers; and that the Madras Fusiliers followed the example of the Bengal troops. The GOVERNOR-GENERAL immediately issued a General Order, giving a free discharge to all soldiers of the late Company who might demand it. The latest news states that every recruit in the Barrackpore depôt has availed himself of the concession, and that the 5th Europeans at Berhampore have returned to their duty with the exception of about 40, who are to be tried by court martial.

## Home News.

THE COURT.—The Queen, Prince Consort, and the Royal family continue at Osborne. On Thursday week her Majesty, accompanied by Princess Alice and Princess Hohenlohe, drove to Carisbrook Castle, and visited the Roman remains lately discovered in that neighbourhood. The Prince Consort rode on horseback, and met her Majesty, accompanied by Prince Alfred. On Friday the Queen held a Privy Council, at which an Order in Council was issued extending the time limited for the payment of reduced bounties to able and ordinary seamen. The Prince Carini, Sicilian Minister, and the Prince d'Ottajano, on a special mission from the King of Naples, had audiences of her Majesty. Lord Napier and Sir John Bowring were presented and had audiences of the Queen. Lord John Russell, Earl Granville, and the Right Hon. T. Headlam, Judge Advocate-General, had audiences of her Majesty. The Duke of Somerset remained at Osborne on a visit. Her Majesty and Princess Hohenlohe drove out. The Prince Consort rode on horseback, and visited the Hereditary Grand Duke of Mecklenburg-Strelitz, at Cowes. Rear-Admiral Sir Charles Fremantle arrived on a visit. In the evening Madlle. Humler had the honour of performing on the violin before her Majesty and the Royal party. On Saturday Prince Alfred and Prince Arthur, accompanied by Prince Adolphus of Mecklenburg, went in the Fairy to Portsmouth and witnessed the launch of the Bacchante frigate. The Count de Paris and the Duke de Chartres visited her Majesty. In the evening the Queen, accompanied by the Prince Consort and the Royal family, steamed through the fleet at Spithead, and was received with the usual salutes from the entire fleet. The Duke of Newcastle arrived on a visit. On Sunday morning the Queen and the Prince Consort, Prince Alfred, Princess Alice, Princess Helena, Princess Louisa, Princess Hohenlohe, and Princess Leiningen attended Divine service at Whippingham Church. In the afternoon Lord Palmerston arrived on a visit to her Majesty. On Monday morning the Queen walked out early, accompanied by Princess Hohenlohe. The Duke of Newcastle and Lord Palmerston left Osborne for London. In the afternoon the Queen and Prince Consort drove out, accompanied by Princess Helena and Princess Louisa. On Tuesday her Majesty and Prince Consort, accompanied by Prince Alfred, Princess Alice, and Princess Helena, rode out on horseback. On Wednesday the Queen and Prince Consort, accompanied by Prince Alfred, Prince Arthur, Princess Alice, and Princess Helena, took a cruise in the Fairy. The Princess of Hohenlohe Schillingsfurst and the Earl and Countess of Clarendon arrived on a visit.

THE PRINCE OF WALES took a trip on Loch Lomond on Monday. His Royal Highness embarked in the steamer Prince of Wales at Inversnaid, and sailed down the loch, accompanied by Dr. Lyon Playfair and Colonel Bruce. His Royal Highness took luncheon in the steamer, and returned by rail from Balloch Pier to Edinburgh.

THE DUCHESS OF KENT has derived so much benefit from the air of the Isle of Wight that her Royal Highness has taken Norris Castle as a residence, and with her own household, will take possession on the 15th or 17th of this month.

THE GRAND DUCHESS MARIE OF RUSSIA, accompanied by the Princess Marie and Princess Eugenie, Prince Serge and Prince Georges of Russia, landed at Dover on Sunday afternoon from Ostend. Her Imperial Highness remained the night at Birmingham's Ship Hotel, and proceeded on Monday by special train, by way of Reigate and Reading, to Torquay, where the Duchess intends to reside for some time.

THE CABINET.—A Cabinet Council was held on Saturday at the official residence of the First Lord of the Treasury, in Downing Street. Another Council was held on Wednesday.

NEW PEERAGE.—The Queen has conferred the dignity of a Baron of the United Kingdom on the Right Hon. Henry Labouchere, M.P. for Taunton.

THE INDIAN COUNCIL.—The Right Hon. James Wilson has consented to go to India as a Member of Council, and also as Chancellor of the Indian Exchequer. Mr. Wilson's position towards the Governor-General and his Council in the latter capacity will be similar to that which the Chancellor of the Exchequer bears at home to the Government and the Cabinet. Sir Erskine Perry has been appointed a member of the Council of India, and Sir Henry Bartle Edward Frere, K.C.B. has been appointed a member of the Council of the Governor-General.

RESIGNATION OF THE BISHOP OF EXETER.—It is stated by the journal which is the organ of the extreme Tractarian party that the Bishop of Exeter is about to resign and that he will be succeeded by the Right Rev. Dr. Eden, Bishop of Moray and Ross, who was for many years rector of Leigh, Essex.

PARLIAMENTARY MOVEMENTS. — The Ministerial Whitebait dinner will take place next Wednesday, the 10th inst., at the Trafalgar, Greenwich, and it is anticipated that the business of the session will be brought to a close on the following Saturday, the 13th. The Cheltenham election committee have reported that Colonel Berkeley was duly elected. The Norwich committee have reported that Lord Bury and Mr. Schneider were not duly elected, and that they were, by their agents, guilty of bribery at the last election. The Bury committee have reported that the Right Hon. Frederick Peel was duly elected. The Aylesbury committee have reported that Mr. Wentworth was not duly elected, and that by his agent he was guilty of bribery at the last election, but it was not proved that such bribery was committed with his knowledge. The committee also reported that they had altered the poll for Aylesbury by striking off the name of a voter who had no right to appear on the list. The Maidstone committee have reported that Mr. Lee and Mr. Buxton were duly elected; that one elector was bribed on his own confession by a sum of 10*l.*; and that two other electors were paid 25*s.* each after voting for travelling expenses; but that none of these transactions were done with the knowledge or consent of the sitting members or their agents. The North Leicestershire committee have reported that Lord John Manners and Mr. Hartopp were duly elected. The Limerick committee have reported that Major Gavin was duly elected, and that the riotous proceedings at the last election were not proved to have taken place with his sanction or that of his agents. The Huddersfield committee have adopted a resolution to the effect that it has not been proved that the sitting member has been guilty of bribery, treating, and undue influence, either by himself or his agents; the scrutiny is still in progress. Four candidates are mentioned as likely to come forward for Gloucester in the room of Mr. Price and Mr. Monk, unseated on petition, viz.:—Viscount Monk, Mr. Bernal Osborne, and Mr. Charles Berkeley, son of Sir Maurice Berkeley, in the Liberal interest; and Mr. C. Schreiber, the late candidate for Cheltenham, in the Conservative interest. There are two candidates in the field for Dartmouth in the room of Mr. Schenley unseated on petition,—Mr. Dunn, the late candidate for Totness, in the Conservative interest; and Mr. Stuart Donaldson, who has filled several responsible offices in the Government of New South Wales, in the Liberal interest. The Hon. James Stuart Wortley, late Recorder of London, is a candidate in the Conservative interest for Wakefield, vacant by the unseating of Mr. W. H. Leatham; and Mr. J. W. Childers, late High Sheriff of Yorkshire, is a candidate in the Liberal interest. There is a vacancy for Taunton caused by the elevation of Mr. Labouchere to the peerage; two candidates are in the field,—Mr. George Cavendish Bentinck in the Conservative interest, and Mr. Alexander C. Barclay in the Liberal interest. There are two vacancies at Devonport caused by the appointment of Mr. Wilson and Sir E. Perry as members of the Council for India; Admiral Elliot, Admiral the Hon. Michael Seymour, and Sir Arthur Buller are candidates for the vacant seats, all in the Liberal interest. There is a vacancy for South Shropshire caused by the death of the Hon. R. W. Clive.

MANNING THE NAVY.—The *Gazette* of Friday contained an Order in Council extending the time for payment of the reduced bounties of 8*l.* to able seamen, and of 4*l.* to ordinary seamen, from the 31st day of July to the 30th September next, inclusive.

## Foreign.

FRANCE.—The Zurich Conferences will begin on Monday, and the Ambassadors of France, Austria, and Sardinia, are now on their way to that city. The *Moniteur* of Wednesday contained the following order in reference to the disarmament:—

"In consequence of the Emperor's decision of the 17th June, the army of observation on the Rhine has been dissolved. nevertheless the divisions of infantry and cavalry which are assembled at the camp of Chalons, and those which compose the camp at Elfant, will remain established, the first under the orders of General Schramm, and the other under General Maissiat. Nothing will be changed at present as regards the other divisions in activity which formed part of the army of observation."

The *Patrie* of Wednesday evening contained the

following paragraph relating to the disarmament of the fleet :—

"It is asserted that the ships of the division under Admiral Fourrichon, the armament of which has just been completed at Brest, are to be placed on a *pied de commission*. It is further reported that the same order applies to four frigates, and to the vessels of the squadron commanded by Admiral Bouet-Villaumez. The squadron of the Adriatic has entered the port of Toulon."

The Duke de Grammont, Ambassador of France at Rome, has arrived at Paris to confer with the Emperor on the affairs of Italy. It is said that the Emperor has intimated to the Ambassadors of Parma, Modena, and Tuscany that he will not interfere in promoting their restoration by force of arms, and that he advised the Tuscan Ambassador to recall the hereditary Prince to Florence, his restoration to be accompanied by the granting of a constitution. Prince Napoleon has left for Cherbourg with two aid-de-camp. A Persian Ambassador has arrived in Paris to continue the work of Feruck Khan, and will reside alternately at London and Paris. The *Constitutionnel* makes the following remarks on the disarmament :—

"France disarms.' Her regiments and her fleets are in a short time to be brought within the restricted strength of a peace establishment. We do not yet know what effect will be produced abroad by this important measure, which is due to the generous initiative of the Emperor. In France it ought not to surprise any one, for it is there well known that the Imperial word is not an empty one, that his Majesty holds to what he promises, and accomplishes what he announces, and in our eyes the programme of Bordeaux has retained all its value, 'L'Empire c'est toujours la paix.' After a campaign of two months, which history will set down as one of the most glorious on record, after having placed himself at the head of his marshals, as he has placed himself at the head of the statesmen of Europe, the Emperor may with pride tell France to lay aside her arms and resume the work of peace. She has too well proved her strength for any one not to henceforth respect her repose."

The *Débats* expresses itself in these terms :—

"The declaration made by the Government will no doubt produce more effect on the English press than the recent note in which the military and naval budgets of the two nations were compared. It is to be hoped that the new note, so expressive in its brevity, will reassure our neighbours and induce them to follow our example."

The *Gazette de France* says :—

"What is a peace footing for the French army and navy? Such is the question which naturally suggests itself on reading the official note. The peace footing is an organisation capable of receiving 600,000 men, the effective force of which several journals gave a table before the war in Italy, showing that, without extraordinary levies, France could have in a month 560,000 soldiers under arms. As for our navy, the vessels already launched will probably not be laid up and disrusted, the works suspended, and the cannon thrown into the sea. The French navy will remain what it was and must be, ever ready for the defence of the country, and constantly profiting by all the improvements that experience and science may suggest. The terrors of our neighbours must not have the result of arresting the development of our fleet, which has been in constant progress ever since the Restoration, and has put us in possession of the finest naval force in the world. It is well known that we have always thought that France ought to extend her colonial possessions and utilise her naval forces in the protection of the national establishments abroad. Keeping these projects in view, we think there is not, properly speaking, any such thing as a peace footing for the French navy—that is to say, any possible reduction in the naval strength. If England sees any cause of alarm in this state of our forces, she is free to increase her own; but it is impossible to admit that, in order to allay the fears of our ally, we ought to abandon projects which are the base of our commercial development in the world, the first condition of the security and prosperity of our colonies."

Spain.—The *Madrid Gazette* of the 24th contains the official announcement that the Queen has entered on the fifth month of her pregnancy. In consequence a grand review of the troops of the garrison and festivities at court had been ordered. The Infante Don Sebastian had arrived at La Granja, after an exile of 25 years, and had been received in the most cordial manner by the Queen and Royal family. A provisional concession has been made to Mr. Perry for a submarine cable from Cadiz to the Canaries, and thence to the Brazils and the West Indies. A company is about to be formed to lay down the three cables within a year.

Belgium.—A grand fête took place at Ostend on Sunday, at the laying of the first stone of the new port, which will render Ostend accessible to ships of the largest tonnage. His Majesty, the Duke of Brabant, and the Count of Flanders were present at the ceremony.

Denmark and Sweden.—The King of Denmark embarked at Copenhagen in his steam yacht the Falk on the 25th ult., and arrived at Stockholm unexpectedly on the evening of the 27th. His Majesty went on by water directly to the Castle of Ulrichsdahl, where he was most cordially received by King Charles XV., the new King of Sweden. The Grand Duke Constantine of Russia arrived at Copenhagen on Monday, and took up his residence at the hotel of the Russian Legation.

Switzerland.—The Federal Assembly has adopted a law against the enrolment of Swiss in foreign service, under penalty of imprisonment for one to three months, and one to five years' loss of civil rights. All persons endeavouring to enrol troops will be punished by imprisonment of two months' to three years' duration, a fine not exceeding 1000fr., and five to 10 years' loss of civil rights,

Prussia.—Another despatch from Lord John Russell to Lord Bloomfield, the British Minister at the Court of Berlin, was issued on Saturday with the Parliamentary Papers. After recapitulating at some length the correspondence which had previously taken place between the neutral Powers, it states that Count Bernstorff, the Prussian Minister in London, had intimated "that Prussia could not propose to Austria any alienation of territory, but only reforms and changes in modes of administration," and that Lord John, on being pressed for an immediate answer, said that, "pending the decision of the Cabinet, he could only express his own opinion that the time had not arrived for making any proposition to the belligerents." It then proceeds as follows :—

"The efforts made by a Power so enlightened as Prussia to restore peace to the Continent of Europe will always be duly appreciated by her Majesty. Her Majesty's Government are at once ready to declare that they would hail with joy the moment when any equitable proposal for an armistice or negotiation might be accepted. But her Majesty's Government think themselves bound in fairness to go further, and meet the friendly proposition of Prussia with equal candour. It is their opinion that in the present posture of affairs in Italy, no termination of this war can be expected without some cession of territory on the part of Austria. The Emperor of the French has not contented himself with repelling the Austrian invasion of the territory of his ally, he has declared it to be his purpose to liberate Italy from the Alps to the Adriatic. This proclamation has been received with transport wherever, in Northern and Central Italy, Austrian troops do not exercise a power of compression. Milan, and the whole of Lombardy, Parma, Modena, and Tuscany have eagerly proclaimed their adhesion to the war to which they were thus invited. Yet, neither have we reason to suppose that the Emperor of Austria is at present prepared to yield his hereditary possessions to any other Sovereign. Such is the difficulty of the present European crisis. The [illegible] of America may be there to acknowledge any defeat as irreparable, or to record by treaty the success of any popular insurrection against her dominion. Yet, after the events which have occurred since the declaration of war, it is not to be expected that any treaty, procured by the whole force of Germany, which should restore Austrian supremacy in Italy, would have in it the elements of permanence and security. The Prince Regent of Prussia looks with becoming anxiety to the maintenance of the balance of Power in Europe. Let us examine this matter. The balance of power in Europe means, in effect, the independence of its several states. The preponderance of any one Power threatens and destroys this independence. But the Emperor Napoleon, by his Milan proclamation, has declared, as Baron Schleinitz has justly noted, that in this war he seeks neither conquest nor territorial aggrandisement. It might perhaps be premature to discuss whether the King of Sardinia should reign over Lombardy, Parma, Modena, and Tuscany, or whether several independent States in Northern Italy should be maintained or created. Be their divisions and boundaries arranged as they may, it is the firm persuasion of her Majesty's Government that an Italy in which the people should be 'free citizens of a great country' would strengthen and confirm the balance of power. The independence of states is never so secure as when the sovereign authority is supported by the attachment of the people. A sovereign maintained wholly by the force of arms over a disaffected people is a perpetual object of attack to her ambitious neighbours; and a balance of power founded on such discordant elements gives only an unstable equilibrium. If Italy could be ruled over by sovereigns possessed of the affections of their people, that country, with its 25,000,000 of inhabitants, its natural wealth, and its ancient civilisation, would, in the opinion of her Majesty's Government, be a valuable member of the European family. I must not omit to state that any settlement of Italy would, in the eyes of her Majesty's Government, be incomplete which did not effect a permanent reform in the administration of the States of the Church. Every one knows that Rome and the Legations have been much worse governed by the Pope's Ministers than Lombardy by Austrian Archdukes, and that would be a partial and unsatisfactory arrangement which struck down the rule of the latter, and left the former in all its deformity. Our views upon this subject have not been withheld from the Government of the Emperor of the French. Such being the opinions of her Majesty's Government on the present state of affairs, they are averse to any interposition which might either prove fruitless in the first instance, or which might lead to a partial and insecure settlement. Her Majesty used her utmost efforts, consistent with peace, to maintain the faith of treaties. At the last moment Austria, by an act of supreme imprudence, began the war and invaded Piedmont. From that time everything has been changed. Austria overstepped the frontier laid down in the treaties of 1815. It could no longer be expected that those treaties would be regarded as binding by France and Sardinia. Italy has been roused to war, and is taking her part in the struggle. In these circumstances her Majesty's Government are bound to take a larger view of the whole field of contest. They will be glad to consult Prussia on every occasion where either Power is of opinion that a step towards peace can be made with good effect. It gives them pleasure to find that the Cabinet of Berlin does not partake of the violent excitement which has lately arisen in some parts of Germany, and that in directing the efforts of the German Confederation, she is animated by an enlightened care for the best interests of European civilisation."

Russia.—The Journal of St. Petersburg denies that the neutral Powers proposed to Austria terms of mediation less favourable than those proposed by France. It says :—

"We are authorised to state that the bases of mediation had not been agreed upon by the neutral Powers, nor even discussed, and that the preliminaries of peace between the belligerents were already signed before the principle of mediation which formed the object of negotiations between the neutral Powers was definitely agreed upon."

A grand naval review was held at Cronstadt on the 23d ult. by the Emperor Alexander. The fleet, which was drawn up in two lines, consisted of 21 ships of the line and frigates, chiefly steamers, and a number of gunboats. The screw frigate Grand Admiral, recently constructed in America for the Emperor, excited particular attention. Only four years since the Russian navy possessed but one screw frigate, the Polkan, which remained stationary at Cronstadt. It is said that the Czar is about to undertake a journey to Odessa, where he will be joined by the Prince Couza.

Austria.—The Emperor received on Tuesday the Marquis de Banneville, Envoy of the Emperor of the French, who delivered an autograph letter from the Emperor Napoleon, strongly urging the Emperor Francis Joseph to assist him in imposing a reforming policy on the Sovereigns of Italy. Prince Richard Metternich left Vienna on Wednesday for Paris, with the answer of the Emperor of Austria to this letter.

Frankfort.—The Count de Chambord has arrived in this city from the Hague, where he resided during the war between Austria and France, and it is intended to hold a conference of Legitimists at Wiesbaden during the present month. Several well-known Legitimists have already arrived at Frankfort and the neighbouring towns.

Italy.—Accounts from Florence state that the majority will not hear of the return of the Grand Duke or his son; and that the people of Modena and Parma are preparing to resist any attempt that may be made to restore the Sovereigns who abandoned them during the late war. The *Bologna Gazette* publishes a declaration which is in course of signature in the Romagna, to the effect that those provinces have shaken off the Papal yoke never to return under it again, and that it is their wish to be annexed to Sardinia. This document is addressed to the Emperor of the French and the King of Sardinia. The Sardinian Commissioners at Bologna have surrendered their authority to the Minister President of the Government, who has convoked the National Assembly. The Marquis d'Azeglio has issued a proclamation announcing his recall, recommending the people to remain tranquil, and promising, in the name of King Victor Emmanuel, to employ every means possible to obtain the concurrence of the European Governments for accomplishing their just and reasonable wishes. The Provisional Government of Bologna has succeeded in negotiating a loan of 10 millions of francs with a considerable firm at Leghorn. Garibaldi has sent a circular to all the free States of Italy, in which he declares his army to be ready at any moment to continue the Italian war of independence. A letter from Florence states that Mr. Stockton, the American Minister at Rome, has obtained for Mr. E. W. Perkins from the Papal Government the sum of 3425 Roman scudi, as compensation for his losses at Perugia. Letters from Naples of the 27th ult. state that an English squadron, composed of 12 ships, arrived there on that day. On the 24th the young King was duly put in possession of all his titles to the throne, by the solemn functions of consecration and anointing, after which he visited the cathedral church of St. Januarius, the patron saint of Naples, and venerated his relics. It is said that the canonisation of the King's mother is progressing at Rome, and that she has already attained the grade of "Blessed," and will soon get the remaining steps necessary to the assumption of the title of "Saint." In consequence of the crops of corn having failed throughout the Kingdom of the Two Sicilies, the Government has permitted the importation of wheat, oats, barley, and Indian corn free of duty.

Turkey.—Advices from Constantinople of the 25th ult. state that the Sultan embarked on that day in the steam frigate Saïti for his excursion in the Archipelago. After a stay at Salonica his Highness was to return to Constantinople. In consequence of the conclusion of peace between France and Austria the calling in of the Redifs has been suspended. A Turkish Legation or Consulate-General is shortly to be established at Rome. The number of victims in the recent earthquake at Erzeroum has been officially stated at 1054—375 killed, 616 injured, and 63 missing. In addition, 2000 houses, 6 mosques, 17 khans, 5 establishments of baths, and 3 public buildings were thrown down; and 1450 houses or other buildings were more or less injured. If the earthquake had not taken place on a religious holiday, when the bazaars and shops were closed, the number of victims would no doubt have been greater.

Egypt.—Admiral Mundy's squadron anchored outside the harbour of Alexandria on the 26th ult. A French consul on the coast facing the town of Aden is said to have been massacred. No details are given.

India.—Telegraphic despatches in anticipation of the Bombay and Calcutta mails of the 5th ult. have been received. The disaffection among the late Company's European troops has been on the increase. At Berhampore they broke into open mutiny, intrenched themselves in the barracks, and elected officers. The Madras Fusiliers subsequently followed the example of the Bengal troops. A general order was thereupon published, to the effect that every non-commissioned officer and soldier in the three Presidencies who enlisted for the East India Company's forces should, if he desired it, be allowed to take his discharge under the provisions of the Act 10th and 11th Victoria, cap. 38. Every recruit in the Barrackpore depôt has taken his discharge under this general order. The 5th Europeans at Berhampore, with the exception of about 40, have returned to their duty. The recusants will be tried by court-martial. The rebels in Nepaul have again shown themselves on the Oude and Goruckpore frontiers, driven down by starvation; 70 of them were killed by detachments under Major Vaughan and Capt. Cleveland. Up to the 4th June 1351 forts have been demolished in Oude, and 70 were under demolition; 658 cannon and 1,333,837 arms of all sorts have been collected. The Lucknow Begum and Mumroo Khan have made overtures of surrender. Similar missives have been received in Central India from Feroze Shah and the Bala Rao. Nana Sahib is still in Nepaul, where a political party prevents his being given up to the English. The New Five and a Half per Cent Loan was at 6 to 6¼ discount.

China.—The English and French Ambassadors left Hong Kong on the 2d June for Shanghai. Admiral Hope had previously gone north, the general rendezvous being at Shanghai, before proceeding to the Peiho. The gunboat expedition sent to Heang-shan were received in a friendly manner by the authorities, and returned after warning them against a repetition of the recent annoyances.

Cochin China.—Intelligence received by way of Manilla tells of loss sustained by the allied forces, and great sickness prevailing. The natives fight bravely, and it is said that the French admiral has applied for strong reinforcements, and meanwhile is content to hold his position.

AUSTRALIA.—Advices from Melbourne to the 1st of June state that serious disturbances had taken place there in consequence of the Chinese miners having refused to pay the residence tax of 4*l.* per annum. A great number of them had been apprehended, and much excitement prevailed. The Bank of Victoria is about to establish a branch in London, and has sent the manager home for the purpose.

UNITED STATES.—Washington advices of the 21st ult. state that the news of the European peace had produced much gratification in the Government, official, and diplomatic circles. Mr. Buchanan and the Administration had freely expressed their regret that Mr. Cobden declined to enter the Ministry, thinking that his remaining there would have had a good influence upon the relations between the two countries. The ship Atlantic, which cleared at Bedford on the 29th for the Indian Ocean, was seized on the 21st by the United States Government on suspicion of going on a voyage for slaves to the coast of Africa.

MEXICO.—We have late news from Mexico. General Marquesa had robbed the conducta from Guanajua to San Blas of 600,000 dols. A conspiracy had been discovered to place Marquesa in power, while he had declared in favour of Santa Anna. Miramon had made a complete change in his Cabinet on account of a change in his policy, namely, giving liberty to the press, an amnesty for political offences, and a partial confiscation of the Church property. The Church party had declared for Marquesa.

BRAZILS AND BUENOS AYRES.—The Avon has arrived, with news from Rio to the 9th ult. War has been declared between Urquiza and Buenos Ayres, but hostilities have not yet commenced. A project of the Brazilian Government for the conversion of bank-notes into gold passed the Chamber of Deputies, in a single debate, by a majority of 11 votes, Government having made the measure a Cabinet question.

# Parliament.

## HOUSE OF LORDS.

FRIDAY.—*Revision of the Liturgy.*—Lord EBURY presented a petition from certain clergy of the Established Church, praying the House to address the Queen for a royal commission to revise the liturgy.—The Archbishop of CANTERBURY said that if Lord Ebury would bring forward the question in a formal way next session, the bishops would be quite ready to consider it.—The Bishop of LONDON did not think that the course taken by the petitioners was the right way to shorten the services. The question arose, how was the Liturgy to be abbreviated. Was it by shortening the services, or altering the doctrines? The latter course would end by splitting the Church of England into two parties instead of embracing, as it now does, persons holding a variety of sentiments. The Bench of Bishops considered that they had the power to authorise any clergyman to use the Litany as a separate service as well as the Communion Service. In cathedrals these services had always been separated, and he did not see why the same course should not be adopted in churches if it met the approbation of the parishioners. All the good which the petitioners wished to obtain might be procured by different means, while their proposed mode of procedure would only lead to evil.—After a few words from Lords POWYS and DUNGANNON in opposition to the proposed revision, Lord BROUGHAM said that matters of this kind were better left in the hands of the bishops, who had the power already to do what was necessary.—The Duke of NEWCASTLE hoped that if Lord Ebury brought forward this subject next session he would state what it was he proposed to do. The petition was then ordered to lie on the table. Several Bills were advanced a stage.

MONDAY.—The *Royal Assent* was given by commission to several public and private Bills. The *Reform Bill.*—Lord TEYNHAM inquired whether in the forthcoming measure of Parliamentary Reform the Government proposed to abolish property or pecuniary qualification as entitling persons to be registered as electors?—Earl GRANVILLE declined to afford any premature information respecting a measure now under consideration. The *Divorce Court Bill*, as amended in committee, having been brought up, the LORD CHANCELLOR moved the omission of the words extending the operation of the Bill to the colonies and dependencies of the Crown, stating that he had found on inquiry that it was impossible to bring India and some of the colonies within its operation.—After some remarks from Lord KINGSDOWN, approving of the proposed omission, the motion was agreed to.—Lord REDESDALE moved an amendment to limit the power of the Court to sit with closed doors to suits of nullity of marriage. After some discussion the clause was carried on a division by a majority of 24 to 11, and the Bill read a third time and passed. The second reading of the *Municipal Corporations Bill* was postponed after a few words from Lord DERBY, who said the object of the Bill was to repeal the prohibition which prevented mayors and members of corporations from taking the emblems of the municipal authority to Dissenting places of worship, and it was one of a series of measures the object of which appeared to be to reduce the Church of England to an entire and absolute level with all the Dissenting sects in the country.—Lord STANLEY of ALDERLEY, in calling attention to the admission of *British Salt into China*, stated that the supply of salt to a population of 300,000,000 had been hitherto a monopoly in the hands of the Chinese Government. It would be only fair in asking permission to import salt into China to make some compensation equal to the revenue that would be thereby lost to the Chinese Government. He concluded by asking what steps had been taken by the Government for the purpose of bringing the question for admitting British salt into China before the Court of Pekin.—The Earl of ELGIN said he felt some difficulty in answering the question, because the correspondence which he had entered into with the Government on commercial and other matters had not yet been made public. If, however, he had abstained from pressing on the notice of the Chinese Government certain commercial reforms it was out of a consideration for the interests of the Imperial Government, whose influence so materially affected the fluctuations of trade. The monopoly of salt was a very ancient one in China, and would on that account be difficult to overthrow, and, in addition to that, it was a very productive source of revenue. With respect to the appointment of a Russian Ambassador at Pekin, he thought it would be as well for this country not to press at first with too great stringency on the Chinese Government our right secured by treaty of permanent residence. Should, however, other nations insist on that right he presumed we should not fail to do the same.—Lord WODEHOUSE stated the instructions which had been given to Mr. Bruce, and explained the steps which had been taken by Russia.

TUESDAY.—*The Builders' Strike.*—Lord BROUGHAM asked whether the attention of Government had been called to the strike in the building trade. As a friend to the working classes, and as one who had invariably supported their interests, he deplored an attempt on their part to extort 10 hours' wages for 9 hours' work, and expressed a wish that some system similar to the *Conseils des Prud'hommes* should be established in this country.—Earl GRANVILLE said that the attention of Government had been drawn to the subject, but this was a case in which speaking and writing were better than any action on the part of the Government. The present complaint of the working men, upon their own showing, was as unjustifiable as it was short-sighted, and would only end in decreasing their wages. If, as they asserted, the master builders were making too large a profit, the ordinary laws of economy would introduce competition, and so remedy the evil. In regard to the establishment of a *Conseil des Prud'hommes*, he thought such a tribunal would be useless in the present case, which regarded the future, while the *Conseils des Prud'hommes* were principally employed to settle disputes on past contracts between master and man. The whole question, however, depended upon the experience of the working classes more than upon any courts of arbitration.—After a few words from Lords DONOUGHMORE and BROUGHAM, the LORD CHANCELLOR said where parties who were all free agents entered into a strike they were innocent in law. The late Mr. Daniel O'Connell once expressed to him a strong opinion as to the ruinous consequences of these strikes, and said that they had destroyed the development of manufactures in Ireland. The orders of the day were then disposed of.

THURSDAY.—*The Builders' Strike.*—Earl GRANVILLE referred to the debate on Tuesday evening in reference to the builders' strike, which he was afraid had given rise to some misconception. He never intended to justify the combination of workmen to influence the operations of trade, nor to vindicate compulsion on their part towards any of their fellow-workmen. But what he had said was that every individual workman ought to be left perfectly free to take what course he chose in vindication of his own rights. With regard to this particular strike, he deprecated it in the highest terms, and considered it most unjustifiable.—The Earl of ELLENBOROUGH thought the present strike for working 9 hours and requiring 10 hours' pay was equivalent to annihilating at one blow one-tenth of the manufacturing power of the kingdom.—On the order for the second reading of the *Militia Ballot Suspension Bill*, the Earl of ELLENBOROUGH called attention to the state of our militia force, which he considered most unsatisfactory. He did not believe there was a single regiment which had more than half its proper complement of men.—The Duke of CAMBRIDGE and the Earl of RIPON severally acknowledged the fact that the militia regiments generally were about 40 per cent. less than their proper strength. They assured the House, however, that the authorities were doing all in their power to place the militia upon a proper footing. Several other Bills were advanced a stage.

FRIDAY.—*Church Rates.*—The Duke of MARLBOROUGH laid on the table the evidence taken by the Select Committee on Church-rates. The committee did not find themselves in a position to give a satisfactory report, and therefore presented the evidence which they had received. *Endowed Schools.*—In answer to Lord CRANWORTH the LORD CHANCELLOR said there was not time in the present session to legislate on the trusteeships of Endowed Schools, but he hoped that a Bill on the subject would be introduced shortly after the meeting of Parliament. [Left sitting.]

## HOUSE OF COMMONS.

FRIDAY.—After the *Income Tax Bill* had passed through committee the House went into *Committee of Supply* on the remaining Civil Service Estimates, the discussion of which occupied the rest of the morning sitting. *The Papal Government.*—In the evening, on the motion that the House at its rising do adjourn to Monday, Mr. SCULLY asked whether the Sovereign of the Roman States had finally accepted or declined the position of President over the Confederate States of Italy; and whether, in the event of the Pope accepting that office, it was intended, on the part of her Majesty's Government, to adopt effectual steps for establishing direct diplomatic relations with the Court of Rome.—Mr. BENTINCK asked whether there was any intention on the part of her Majesty's Government to reduce our *Naval Armaments*, observing that the announcement of the intention of the Emperor of the French to disarm was no reason for reducing our armaments, but that it was the duty of the Government to continue to put our defences, military and naval, on an efficient footing.—Mr. LINDSAY, Lord LOVAINE, and Lord ASHLEY deprecated any reduction of our navy.—Lord PALMERSTON, in reply to Mr. Scully, said he was not competent to give an answer as to the intention of the Pope, as the Confederation had not been formed, and the English Government had no relations with Rome that would lead the Pope to communicate to them any information upon the subject. With regard to our diplomatic relations with the Confederation we should have such relations with it as we now have with the Germanic Diet. With regard to the Court of Rome, we had no diplomatic relations, as the law would not allow the Pope to be represented by an ecclesiastic, and though both Prussia and Russia likewise refused to receive ecclesiastics as ambassadors, the Pope raised difficulties with regard to England which he did not raise with regard to Russia and Prussia. In answer to Mr. Bentinck's question, he might content himself with saying that the question must depend upon a great variety of circumstances, and it would be premature for the Government to give any information as to what they would do in consequence of an event that had not yet happened. He had no hesitation, however, in saying that it would be impossible for the Government to enter into any agreement for the reduction of our establishments, naval or military, dependent upon the measures of another Government whose interests and position are different from our own; and the House must remember that other Powers besides France had navies, so that our naval and military arrangements depended not upon a single Power. *Church Rates.*—Sir G. LEWIS, in reply to Lord J. MANNERS, said that as far as the Government was concerned, the Bill for the abolition of church-rates must take its chance. *National Defences.*—On the motion for going into Committee of Supply, Mr. HORSMAN moved that the expense of completing the necessary works of national defence projected or already in progress should be met by a fund specially provided for that purpose, and independent of the annual votes of Parliament. If these works were to be done at all, they ought to be done at once, and, as the Government had plans which had been well considered and towards which the House had voted considerable sums, his object was, instead of voting the money by driblets, that it should be raised at once, and the works completed without delay. He urged the necessity of carrying our defensive preparations to the highest point of completeness, believing at some future time in the possibility of a war with France, because he saw that the Emperor of France believed in this possibility from the preparations he had made, all indicative of a gigantic enterprise, at some day or other, against a great naval Power. He could not forget that the sentiments of the Emperor, written when he was an author, and not an actor, in the great scenes of European diplomacy, had lately been reprinted and circulated under his auspices, and there was no reason to suppose that he did not intend, should the opportunity ever occur, to avenge the deepest humiliation and the most stupendous disaster that ever descended upon his country. He hoped that no feeling of false delicacy would prevent the House and the country from looking the national danger in the face, and taking adequate and timely steps to avert it.—Mr. S. HERBERT said that the Government [illegible] could have, no offensive designs, and that, if we [illegible] the question of our defences, it was to show the [illegible] we ought to take to put this country in a state of [illegible] He agreed in the necessity of putting our great [illegible] the depositaries of reproductive power for our [illegible] navy, in a proper state of defence, and in the [illegible] dition of some of those arsenals. The Commissioners [illegible] appointed had this object in view, and until they had [illegible] the Government would ask Parliament for a vote, [illegible] give their most anxious consideration to the subject.—Mr. SMITH said the country must depend mainly on the [illegible] warned the Government not to create more fortifications [illegible] they had the means of finding men to defend.—Sir J. [illegible] hoped that every available man would be employed [illegible] national defences. The country was not safe, and it was [illegible] more necessary that we should be prepared. He was [illegible] that the French Emperor intended to attack this country [illegible] the first opportunity.—Mr. COBDEN ridiculed the idea [illegible] French invasion, and condemned in strong terms, as [illegible] ful to our policy, what he termed the preparations for war [illegible] France while the mouths of our Ministers were filled with [illegible] pressions of confidence and even adulation towards [illegible] sovereign, and he called upon the House to give expression [illegible] an opinion condemnatory of such a state of things. He [illegible] that there was any ground for supposing that the Emperor [illegible] the French or the French people had any design to [illegible] upon this country. He admitted that circumstances gave [illegible] legitimate right to have a larger marine than France [illegible] third, but France, he said, had never pretended to the [illegible] naval strength as ours, and we had now 760 vessels [illegible] while France had only 408. He thought an amicable [illegible] tion would adjust this matter. If, after such explanation [illegible] the French Government persisted in maintaining [illegible] naval rivalry, he would cheerfully vote increased estimates. [illegible] Sir J. PAKINGTON said that Mr. Cobden's comparison [illegible] naval strength of England with that of France was erroneous [illegible] reason of his having included in the number of English [illegible] gunboats, of extremely small size, to the number of [illegible] Cobden had spoken of a panic; but did he mean [illegible] ought to trust to amicable professions without taking [illegible] measures of defence and making up past arrears? He hoped [illegible] that Mr. Herbert had not said how far he concurred [illegible] spirit of Mr. Horsman's proposal, or whether we were [illegible] year after year, spending driblets of money for the repair [illegible] of our harbours and arsenals. He warned the House [illegible] that a large addition to the expenditure for the navy [illegible] necessary next year.—Lord C. PAGET corrected the error [illegible] which Mr. Cobden's statement might have made [illegible] relative state of the English and French navies. The latter [illegible] said, had 20 line-of-battle ships in commission and in [illegible] equal to ships in commission, making a total of [illegible] 26 line-of-battle ships in commission, and 9 corvettes [illegible] that our proportion was not that to which, in [illegible] opinion, we were entitled. But there was another [illegible] was increasing her navy—namely, Russia, which had [illegible] line-of-battle ships, 6 screw frigates, and 6 paddle frigates. [illegible] Mr. BENTINCK and Mr. NEWDEGATE spoke in favour [illegible] motion, and Lord H. VANE recommended that it should be [illegible] pressed.—Lord PALMERSTON said he concluded that Mr. [illegible] man had accomplished the object he had in view [illegible] upon the House the great necessity of completing [illegible] tions for the defence of our naval arsenals and dockyards [illegible] that these defensive measures indicated no desire [illegible] of this country to go to war, or to give umbrage to [illegible] but were founded upon the common-sense principle [illegible] nation desirous of peace should be able to defend itself [illegible] any sudden attack. He hoped, therefore, that he would be [illegible] satisfied with this very useful result—and not press him [illegible] to a division, which it might be inconvenient to affirm [illegible] abstract without indicating how the fund was to be provided. [illegible] A division was, however, called for by Mr. HORSMAN, [illegible] resulted in the motion being negatived by 167 to [illegible] Report of the Committee of Supply was brought up and [illegible] to. The remaining orders and motions were then gone [illegible] without discussion, and the House adjourned to Monday.

MONDAY.—*The New Foreign Office.*—At the morning [illegible] Lord J. MANNERS recapitulated the proceedings taken [illegible] the late and preceding Governments regarding [illegible] the new Foreign and Indian offices, with especial [illegible] a statement that Lord Palmerston had directed Mr. [illegible] prepare a new design in the Italian style, and [illegible] hope that during the recess nothing would be [illegible] prejudice of a design which he thought admirable [illegible] for its purpose. *Bribery at Elections.*—Lord R. [illegible] whether it was the intention of the Government [illegible] commissions to inquire into the election proceedings [illegible] those constituencies in which committees have [illegible] that extensive bribery prevails?—Sir G LEWIS said [illegible] the Government, as a Government, had no [illegible] special function in relation to the matter. The House [illegible] went into *Committee of Supply*, and resumed the [illegible] of the Civil Service Estimates and Civil Contingencies. [illegible] The vote for the *Statute Law Commission* was negatived [illegible] 80. The *Military Savings' Bank Bill* and other Bills were [illegible] third time and passed. *Telegraph Contracts.*—In [illegible] sitting, Lord ASHLEY asked whether it was the intention [illegible] Government to suspend further proceedings with the [illegible] submarine telegraph contracts until the report of the [illegible] committee now sitting upon the Packet and Post [illegible] Service was laid upon the table of the House.—The Chancellor [illegible] of the EXCHEQUER said that no further contracts would be [illegible] made before the report was issued, except in very urgent [illegible] cases.—The House went into committee on the Civil [illegible] when Sir C WOOD brought forward the financial statement [illegible] India. He believed that in a few years India might [illegible] to the state of financial prosperity which she enjoyed [illegible] the mutiny. He reviewed the difficulties which [illegible] since that time, which it required the greatest care and [illegible] sideration to grapple with. He should not enter into [illegible] already given by his predecessor, but should dwell [illegible] the general considerations. The expenditure was [illegible] and the income 34,800,000*l.*, leaving a deficit of 14,[illegible] made a deficit in the two years of 23,227,000*l.* Taking [illegible] April as the starting point, just before the mutiny [illegible] the debt to have been 59,462,000*l.*, for which the [illegible] 2,525,000*l.* The military expenditure in that [illegible] 12,561,000*l.* That year there was a serious deficit [illegible] revenue. The expenditure for 1857-8 was 40,226,000*l.* [illegible] income 31,706,000*l.*, leaving a deficit of 8,520,000*l.* [illegible] that deficit was provided for by various loans, borrowed [illegible] in India and partly in England, the total being [illegible] which 11,561,000*l.* had been borrowed in England [illegible] in April last amounted to 81,550,000*l.*, for which the [illegible] was 3,564,000*l.* The military charges for that year [illegible] 25,849,000*l.* In the years 1859-60 the expenditure for [illegible] charges for public works and compensation to sufferers by [illegible] mutiny, would be 46,131,500*l.* Against this there [illegible] revenue of 35,856,000*l.*, leaving a deficit of 10 [illegible] and a quarter. But beyond this he must ask for [illegible] of two millions on account of railroads and irrigation. [illegible] tion. Thus would make the entire deficit 12 millions [illegible] a quarter. To provide for this seven millions [illegible] borrowed, five millions in England and two [illegible] should require 5,700,000*l.* to balance his account. [illegible] margin was needful, and he should therefore ask [illegible] two millions of which remained on account of [illegible] sanctioned. He should have to raise five millions [illegible] loan. In the course of next year there would be [illegible] compensation; but taking into account the increase [illegible] of interest, he estimated the charge for 1859-60 [illegible] and the income at 36,000,000*l.*, leaving a deficit [illegible]

## News of the Week.

In the House of Lords on Friday, in answer to Lord CLANCARTY, Earl GRANVILLE said that the Government were willing to consider any improvements which might be suggested in the system of national education in Ireland, but he declined to give any promise to introduce a Bill on the subject. On Monday the Marquis of NORMANBY asked for information respecting the project of pacification which had been transmitted by Her MAJESTY's Government to Austria previous to the peace of Villafranca. Lord WODEHOUSE said that the only project of pacification which the English Government had transmitted to Austria was a French despatch containing propositions for peace, but on which they had offered no opinion of their own. On Tuesday the Militia Laws' Amendment Bill was read a second time after a short discussion, in which Lord STRATFORD DE REDCLIFFE complained of the suspension of the ballot, and Lord KINGSDOWN thought that the defences of the country would never be in a proper position until Parliament resorted to something like a conscription. On Thursday the India Loan Bill passed through committee, and the Reserve Volunteer Force of Seamen Bill was read a third time and passed.

In the House of Commons on Friday the House went into committee on the Reserve Volunteer Force of Seamen Bill, the object of which is to enroll a naval militia of 30,000 men as a reserve for the Navy, and agreed to all its clauses. In committee of Ways and Means, a resolution moved by the CHANCELLOR of the EXCHEQUER for imposing an additional probate duty on estates of the value of 1,000,000*l*., and upwards, was agreed to. Mr. ROEBUCK's resolution declaring that the withdrawal of the Bodmin election petition was a corrupt compromise was negatived, on a division, by 214 to 30. On Saturday, in answer to some remarks by Sir H. WILLOUGHBY on the state of the funded and unfunded debt, the CHANCELLOR of the EXCHEQUER said that the powers of conversion and reconversion given by Parliament to the Finance Minister were too large, and that in the next session he would propose a measure for bringing the subject under the direct control of the House of Commons. On Monday Lord ELCHO brought forward his motion for an address to the Crown, declaring that it would not be consistent with the honour or dignity of the country to take part in any conference on the affairs of Italy. Mr. KINGLAKE moved as an amendment the previous question. Mr. GLADSTONE, Lord J. RUSSELL, and Lord PALMERSTON opposed the motion on the ground that there was at present no intention of going into conference at all, but that it would be unwise and unconstitutional to fetter the Government should circumstances hereafter arise to render their co-operation advisable. Mr. DISRAELI said that he did not approve of the form of the motion, and recommended that it be withdrawn. Lord ELCHO said he was satisfied with the result of the discussion, and withdrew the motion. On Tuesday the Consolidated Fund (Appropriation) Bill, the Stamp Duties Bill, the Customs Bill, and the East India Loan Bill, were read a third time and passed. Mr. MACKINNON obtained leave to bring in a Bill to establish equitable councils of conciliation to adjust differences between masters and operatives. On Wednesday Mr. BRIGHT obtained a select committee to inquire into the circumstances connected with the withdrawal of the petition against the return of Mr. OVEREND at the election for Pontefract. The Sale of Gas Bill passed through committee, and the European Troops India Bill was read a third time and passed. On Thursday, on the order of the day for going into committee on the Charitable Trusts Act Continuance Bill, Mr. NEWDEGATE moved that the Bill be committed that day three months. After some discussion the amendment was rejected on a division by 70 to 47. The Bill then passed through committee, and was read a third time and passed. The House then went into committee on the Divorce Court Bill, when a strong opposition was offered to the clauses added by the House of Lords, empowering the Court to hear certain cases with closed doors, authorising the ATTORNEY-GENERAL to examine the parties in cases of suspected collusion, and extending the operation of the Bill to Ireland. After a long discussion all these clauses were withdrawn, and the Bill was passed through its remaining stages with some amendments respecting the property of divorced persons. The Sale of Gas Bill was read a third time and passed. On the order of the day for considering the Attorneys and Solicitors Bill, as amended, the House was counted out.

The Zurich Conference was formally opened on Monday, and it is understood that one of the first resolutions adopted by the Plenipotentiaries was to prolong the armistice indefinitely. Meanwhile the news from Italy is of a serious character. Tuscany has refused to submit to the restoration of the old dynasty, Modena has voted annexation to Piedmont, and Parma has proclaimed the Red Republic. The latest news states that the Piedmontese have been driven from Parma, that all the owners of property and friends of order were flying from the city, and that the French troops have suspended their departure from Italy.

## Home News.

THE COURT. — The Queen and Prince Consort, accompanied by Prince Alfred and the Princesses, left Osborne yesterday evening and embarked in the Royal yacht Victoria and Albert, on a cruise of a few days to the Channel Islands. On Thursday week the Queen and Prince Consort, accompanied by Prince Alfred, Prince Arthur, Princess Alice, Princess Helena, and Princess Louisa, took a cruise in the Fairy. On Friday the Queen drove out, accompanied by Princess Hohenlohe. The Earl and Countess of Clarendon left Osborne. Toussoun Pasha, son of the Pasha of Egypt, accompanied by Sir Moses Montefiore, was presented to her Majesty. On Saturday, being Prince Alfred's birthday, the band of the Royal Marines played during the day. In the afternoon the Queen and Prince Consort, accompanied by Prince Alfred, Prince Arthur, Princess Alice, Princess Helena, Princess Louisa, Princess Leiningen, and Princess Hohenlohe, embarked in the Fairy, and were present at the regatta of the Royal Yacht Squadron in Cowes Roads. Earl Granville and Sir G. C. Lewis arrived on a visit. In the evening the Queen had a dinner party. On Sunday morning the Queen and Prince Consort, Prince Alfred, Princess Alice, Princess Helena, Princess Louisa, the Duchess of Kent, and Princess Hohenlohe attended Divine service at Osborne; the Rev. J. Prothero officiated. Colonel Claremont, C.B., arrived on a visit. On Monday morning Prince Alfred left Osborne for Holyrood Palace on a visit to the Prince of Wales. Earl Granville and Sir G. C. Lewis left for London. In the afternoon the Queen, accompanied by Princess Louisa and Princess Hohenlohe, drove out. The Prince Consort rode on horseback, and visited the Grand Duke Constantine at Ryde. The Duchess of Kent took a drive. On Tuesday the Grand Duke Constantine visited her Majesty. In the afternoon the Queen drove out with the Princess Alice, Princess Helena, and Princess Hohenlohe. In the evening the Grand Duke Constantine and Prince and Princess Leiningen dined with her Majesty. Yesterday afternoon the Queen held a Privy Council at Osborne.

THE PRINCE OF WALES AND PRINCE ALFRED.—On Sunday last the Prince of Wales attended Divine service in the High Church of Edinburgh; the Rev. Dr. Arnot officiated. On Monday morning his Royal Highness visited the Edinburgh Botanical Gardens, and, having inspected the hot-houses and palm-houses, assisted at the transplanting of a larch which his Royal Highness afterwards planted in the hilly part of the gardens. On Tuesday morning Prince Alfred arrived by the ordinary London express, and proceeded to Holyrood. The Prince of Wales received Prince Alfred at the station, and their Royal Highnesses afterwards proceeded to Roslin and Melrose by rail, and returned to Holyrood in the evening. On Wednesday morning the Prince of Wales and Prince Alfred went to the University and attended a lecture by Professor Lyon Playfair on the chemical phenomena connected with the processes of calico printing and dyeing. In the evening their Royal Highnesses visited the Queen's Theatre. On Thursday Prince Alfred left Edinburgh for London, on his return to Osborne.

THE GRAND DUKE CONSTANTINE arrived at Spithead on Saturday from Cronstadt in the Russian screw frigate Swetland, carrying 60 (8-inch) guns. His Imperial Highness landed at Ryde, and took up his residence at the Pier Hotel. On Monday the Prince Consort visited the Grand Duke, and on Tuesday his Imperial Highness visited the Queen at Osborne, and dined with her Majesty in the evening.

THE GRAND DUCHESS MARIE OF RUSSIA, accompanied by her daughter, the Princess Marie, and her sons, the Princes Nicolas and Eugène, arrived at Chesham House, the residence of the Russian Legation, on Monday evening from Torquay. On Tuesday morning her Imperial Highness visited Westminster Abbey, Stafford House, the residence of the Duke of Sutherland, and Bridgewater House, the residence of the Earl of Ellesmere. In the evening the Grand Duchess, with the Princess Marie, honoured the Earl and Countess Granville with her company at dinner. On Wednesday morning the Grand Duchess, with her family, attended Divine service in the church of the Russian Legation, and in the afternoon visited the Crystal Palace, attended by Sir Joseph Paxton, M.P. who had been specially invited to attend upon her Imperial Highness. On Thursday the Grand Duchess left London for Osborne on a visit to the Queen. Her Imperial Highness will remain in the Isle of Wight for two days, and is expected to return to-day to Chesham House. On Monday next the Grand Duchess will again visit the Crystal Palace to witness the display of the fountains and cascades.

THE CABINET.—A Cabinet Council was held on Saturday at the official residence of the First Lord of the Treasury in Downing Street. Another Council was held on Wednesday.

THE PEERAGE.—Mr. Labouchere's title will be Baron Taunton, of Taunton, which place he represented in the House of Commons for more than 30 years.

MINISTERIAL ARRANGEMENTS.—Mr. James Wilson has finally accepted the office of Special Commissioner to India. The Vice-Presidency of the Board of Trade, vacated by this appointment, has been offered to Mr. Moye O'Ferrall, but it is understood that he has declined the offer.

THE ARMY.—The colonelcy of the 1st Dragoon Guards, vacated by the death of the Earl of Cathcart, has been conferred on Lieut.-Gen. Sir T. W. Brotherton, K.C.B. The colonelcy of the 15th Light Dragoons, vacant by the promotion of Sir T. W. Brotherton, has been conferred on Major-General E. W. Bouverie.

PARLIAMENTARY MOVEMENTS.—The prorogation of Parliament will take place by Royal Commission to-day. The election for Devonport in the room of Sir Erskine Perry terminated on Tuesday in the return of Admiral Sir Michael Seymour, the Liberal candidate, by a majority of 49 over Mr. Ferrand, the numbers being 1096 to 1047. Mr. Ferrand has determined to contest with Sir Arthur Buller the seat vacated by Mr. Wilson. It is probable that the nomination will take place on Tuesday, and the election on Wednesday next. The Taunton election has terminated in the return of Mr. G. C. Bentinck, the Conservative candidate, by a majority of 45 over Mr. Alexander Barclay, the numbers being 381 to 336. The Dartmouth election took place on Monday, when Mr. Dunn the Conservative candidate was elected without opposition, Mr. Donaldson having declined to go to the poll on the ground that the seat could only be secured by venal means. There is a vacancy at Bodmin caused by Dr. Michell's acceptance of the stewardship of the Manor of Northstead. There are two candidates in the field, Mr. Wyld, in the Radical interest, and Mr. Murchison, who offers himself as a Liberal-Conservative. The Preston Election Committee have reported that Mr. Charles Pascoe Grenfell was duly elected, that persons were bribed at the last election, but it was not proved that the bribery took place with his sanction or that of his agents. The Huddersfield Committee have reported that Mr. E. A. Leatham was duly elected, that several persons were bribed at the last election, but there was no evidence that such acts of bribery took place with the knowledge of Mr. Leatham. The Beverley Committee have reported that Mr. Ralph Walters was not duly elected, that he was by his agents guilty of bribery, and that Major Edwards was duly elected. The committee recommend that two persons who had been guilty of bribery should be prosecuted, and that no writ for Beverley should be issued until the evidence is before the House. The Hull Committee have reported that Mr. Joseph Hoare was not duly elected, that upwards of 300 electors were bribed by being employed and paid as messengers and canvassers at the late election, but it was not proved that such acts of bribery were committed with the knowledge or consent of Mr. Hoare. The committee also reported that Mr. W. H. Moss, election auditor for Hull, appeared as agent for the petitioners, a course of proceeding which they considered open to grave objection.

THE DOVER POSTAL CONTRACT.—The Select Com-

AUSTRALIA.—Advices from Melbourne to the 1st of June state that serious disturbances had taken place there in consequence of the Chinese miners having refused to pay the residence tax of 4*l.* per annum. A great number of them had been apprehended, and much excitement prevailed. The Bank of Victoria is about to establish a branch in London, and has sent the manager home for the purpose.

UNITED STATES.—Washington advices of the 21st ult. state that the news of the European peace had produced much gratification in the Government, official, and diplomatic circles. Mr. Buchanan and the Administration had freely expressed their regret that Mr. Cobden declined to enter the Ministry, thinking that his remaining there would have had a good influence upon the relations between the two countries. The ship Atlantic, which cleared at Bedford on the 29th for the Indian Ocean, was seized on the 21st by the United States Government on suspicion of going on a voyage for slaves to the coast of Africa.

MEXICO.—We have late news from Mexico. General Marquesa had robbed the conducta from Guanajua to San Blas of 600,000 dols. A conspiracy had been discovered to place Marquesa in power, while he had declared in favour of Santa Anna. Miramon had made a complete change in his Cabinet on account of a change in his policy, namely, giving liberty to the press, an amnesty for political offences, and a partial confiscation of the Church property. The Church party had declared for Marquesa.

BRAZILS AND BUENOS AYRES.—The Avon has arrived, with news from Rio to the 9th ult. War has been declared between Urquiza and Buenos Ayres, but hostilities have not yet commenced. A project of the Brazilian Government for the conversion of bank-notes into gold passed the Chamber of Deputies, in a single debate, by a majority of 11 votes, Government having made the measure a Cabinet question.

# Parliament.

## HOUSE OF LORDS.

FRIDAY.—*Revision of the Liturgy.*—Lord EBURY presented a petition from certain clergy of the Established Church, praying the House to address the Queen for a royal commission to revise the liturgy.—The Archbishop of CANTERBURY said that if Lord Ebury would bring forward the question in a formal way next session, the bishops would be quite ready to consider it.—The Bishop of LONDON did not think that the course taken by the petitioners was the right way to shorten the services. The question arose, how was the Liturgy to be abbreviated. Was it by shortening the services, or altering the doctrines? The latter course would end by splitting the Church of England into two parties instead of embracing, as it now does, persons holding a variety of sentiments. The Bench of Bishops considered that they had the power to authorise any clergyman to use the Litany at a separate service as well as the Communion Service. In cathedrals these services had always been separated, and he did not see why the same course should not be adopted in churches if it met the approbation of the parishioners. All the good which the petitioners wished to obtain might be procured by different means, while their proposed mode of procedure would only lead to evil.—After a few words from Lords POWYS and DUNGANNON in opposition to the proposed revision, Lord BROUGHAM said that matters of this kind were better left in the hands of the bishops, who had the power already to do what was necessary.—The Duke of NEWCASTLE hoped that if Lord Ebury brought forward this subject next session he would state what it was he proposed to do. The petition was then ordered to lie on the table. Several Bills were advanced a stage.

MONDAY.—The *Royal Assent* was given by commission to several public and private Bills. The *Reform Bill*.—Lord TEYNHAM inquired whether in the forthcoming measure of Parliamentary Reform the Government proposed to abolish property or pecuniary qualification as entitling persons to be registered as electors?—Earl GRANVILLE declined to afford any premature information respecting a measure now under consideration. The *Divorce Court Bill*, as amended in committee, having been brought up, the LORD CHANCELLOR moved the omission of the words extending the operation of the Bill to the colonies and dependencies of the Crown, stating that he had found on inquiry that it was impossible to bring India and some of the colonies within its operation.—After some remarks from Lord KINGSDOWN, approving of the proposed omission, the motion was agreed to.—Lord REDESDALE moved an amendment to limit the power of the Court to sit with closed doors to suits of nullity of marriage. After some discussion the clause was carried on a division by a majority of 24 to 11, and the Bill read a third time and passed. The second reading of the *Municipal Corporations Bill* was postponed after a few words from Lord DERBY, who said the object of the Bill was to repeal the prohibition which prevented mayors and members of corporations from taking the emblems of the muncipal authority to Dissenting places of worship, and it was one of a series of measures the object of which appeared to be to reduce the Church of England to an entire and absolute level with all the Dissenting sects in the country.—Lord STANLEY of ALDERLEY, in calling attention to the admission of *British Salt into China*, stated that the supply of salt to a population of 300,000,000 had been hitherto a monopoly in the hands of the Chinese Government. It would be only fair in asking permission to import salt into China to make some compensation equal to the revenue that would be thereby lost to the Chinese Government. He concluded by asking what steps had been taken by the Government for the purpose of bringing the question for admitting British salt into China before the Court of Pekin.—The Earl of ELGIN said he felt some difficulty in answering the question, because the correspondence which he had entered into with the Government on commercial and other matters had not yet been made public. If, however, he had abstained from pressing on the notice of the Chinese Government certain commercial reforms it was out of a consideration for the interests of the Imperial Government, whose influence so materially affected the fluctuations of trade. The monopoly of salt was a very ancient one in China, and would on that account be difficult to overthrow, and, in addition to that, it was a very productive source of revenue. With respect to the appointment of a Russian Ambassador at Pekin, he thought it would be as well for this country not to press at first with too great stringency on the Chinese Government our right secured by treaty of permanent residence. Should, however, other nations insist on that right he presumed we should not fail to do the same.—Lord WODEHOUSE stated the instructions which had been given to Mr. Bruce, and explained the steps which had been taken by Russia.

TUESDAY.—*The Builders' Strike.*—Lord BROUGHAM asked whether the attention of Government had been called to the strike in the building trade. As a friend to the working classes, and as one who had invariably supported their interests, he deplored an attempt on their part to extort 10 hours' wages for 9 hours' work, and expressed a wish that some system similar to the *Conseils des Prud'hommes* should be established in this country.—Earl GRANVILLE said that the attention of Government had been drawn to the subject, but this was a case in which speaking and writing were better than any action on the part of the Government. The present complaint of the working men, upon their own showing, was as unjustifiable as it was short-sighted, and would only end in decreasing their wages. If, as they asserted, the master builders were making too large a profit, the ordinary laws of economy would introduce competition, and so remedy the evil. In regard to the establishment of a *Conseil des Prud'hommes*, he thought such a tribunal would be useless in the present case, which regarded the future, while the *Conseils des Prud'hommes* were principally employed to settle disputes on past contracts between master and man. The whole question, however, depended upon the experience of the working classes more than upon any courts of arbitration.—After a few words from Lords DONOUGHMORE and BROUGHAM, the LORD CHANCELLOR said where parties who were all free agents entered into a strike they were innocent in law. The late Mr. Daniel O'Connell once expressed to him a strong opinion as to the ruinous consequences of these strikes, and said that they had destroyed the development of manufactures in Ireland. The orders of the day were then disposed of.

THURSDAY.—*The Builders' Strike.*—Earl GRANVILLE referred to the debate on Tuesday evening in reference to the builders' strike, which he was afraid had given rise to some misconception. He never intended to justify the combination of workmen to influence the operations of trade, nor to vindicate compulsion on their part towards any of their fellow-workmen. But what he had said was that every individual workman ought to be left perfectly free to take what course he chose in vindication of his own rights. With regard to this particular strike, he deprecated it in the highest terms, and considered it most unjustifiable.—The Earl of ELLENBOROUGH thought the present strike for working 9 hours and requiring 10 hours' pay was equivalent to annihilating at one blow one-tenth of the manufacturing power of the kingdom.—On the order for the second reading of the *Militia Ballot Suspension Bill*, the Earl of ELLENBOROUGH called attention to the state of our militia force, which he considered most unsatisfactory. He did not believe there was a single regiment which had more than half its proper complement of men.—The Duke of CAMBRIDGE and the Earl of RIPON severally acknowledged the fact that the militia regiments generally were about 40 per cent. less than their proper strength. They assured the House, however, that the authorities were doing all in their power to place the militia upon a proper footing. Several other Bills were advanced a stage.

FRIDAY.—*Church Rates.*—The Duke of MARLBOROUGH laid on the table the evidence taken by the Select Committee on Church-rates. The committee did not find themselves in a position to give a satisfactory report, and therefore presented the evidence which they had received. *Endowed Schools.*—In answer to Lord CRANWORTH the LORD CHANCELLOR said there was not time in the present session to legislate on the trusteeships of Endowed Schools, but he hoped that a Bill on the subject would be introduced shortly after the meeting of Parliament. [Left sitting.]

## HOUSE OF COMMONS.

FRIDAY.—After the *Income Tax Bill* had passed through committee the House went into *Committee of Supply* on the remaining Civil Service Estimates, the discussion of which occupied the rest of the morning sitting. *The Papal Government.*—In the evening, on the motion that the House at its rising do adjourn to Monday, Mr. SCULLY asked whether the Sovereign of the Roman States had finally accepted or declined the position of President over the Confederate States of Italy; and whether, in the event of the Pope accepting that office, it was intended, on the part of her Majesty's Government, to adopt effectual steps for establishing direct diplomatic relations with the Court of Rome.—Mr. BENTINCK asked whether there was any intention on the part of her Majesty's Government to reduce our *Naval Armaments*, observing that the announcement of the intention of the Emperor of the French to disarm was no reason for reducing our armaments, but that it was the duty of the Government to continue to put our defences, military and naval, on an efficient footing.—Mr. LINDSAY, Lord LOVAINE, and Lord ASHLEY deprecated any reduction of our navy.—Lord PALMERSTON, in reply to Mr. Scully, said he was not competent to give an answer as to the intention of the Pope, as the Confederation had not been formed, and the English Government had no relations with Rome that would lead the Pope to communicate to them any information upon the subject. With regard to our diplomatic relations with the Confederation we should have such relations with it as we now have with the Germanic Diet. With regard to the Court of Rome, we had no diplomatic relations, as the law would not allow the Pope to be represented by an ecclesiastic, and though both Prussia and Russia likewise refused to receive ecclesiastics as ambassadors, the Pope raised difficulties with regard to England which he did not raise with regard to Russia and Prussia. In answer to Mr. Bentinck's question, he might content himself with saying that the question must depend upon a great variety of circumstances, and it would be premature for the Government to give any information as to what they would do in consequence of an event that had not yet happened. He had no hesitation, however, in saying that it would be impossible for the Government to enter into any agreement for the reduction of our establishments, naval or military, dependent upon the measures of another Government whose interests and position are different from our own; and the House must remember that other Powers besides France had navies, so that our naval and military arrangements depended not upon a single Power. *Church Rates.*—Sir G. LEWIS, in reply to Lord J. MANNERS, said that as far as the Government was concerned, the Bill for the abolition of church-rates must take its chance. *National Defences.*—On the motion for going into Committee of Supply, Mr. HORSMAN moved that the expense of completing the necessary works of national defence projected or already in progress should be met by a fund specially provided for that purpose, and independent of the annual votes of Parliament. If these works were to be done at all, they ought to be done at once, and, as the Government had plans which had been well considered and towards which the House had voted considerable sums, his object was, instead of voting the money by driblets, that it should be raised at once, and the works completed without delay. He urged the necessity of carrying our defensive preparations to the highest point of completeness, believing at some future time in the possibility of a war with France, because he saw that the Emperor of France believed in this possibility from the preparations he had made, all indicative of a gigantic enterprise, at some day or other, against a great naval Power. He could not forget that the sentiments of the Emperor, written when he was an author, and not an actor, in the great scenes of European diplomacy, had lately been reprinted and circulated under his auspices, and there was no reason to suppose that he did not intend, should the opportunity ever occur, to avenge the deepest humiliation and the most stupendous disaster that ever descended upon his country. He hoped that no feeling of false delicacy would prevent the House and the country from looking the national danger in the face, and taking adequate and timely steps to avert it.—Mr. S. HERBERT said that the Government could have, no offensive designs, and that, if he [illegible] the question of our defences, it was to show the [illegible] we ought to take to put this country in a state of [illegible] He agreed in the necessity of putting our [illegible] the depositaries of reproductive power for our [illegible] navy, in a proper state of defence, and in the [illegible] dition of some of those arsenals. The Commissioners [illegible] appointed had this object in view, and until they [illegible] the Government would ask Parliament for a vote, [illegible] give their most anxious consideration to the suggestions. SMITH said the country must depend mainly on the [illegible] warned the Government not to create more fortifications [illegible] they had the means of finding men to defend.—Sir [illegible] hoped that every available man would be employed [illegible] national defences. The country was not safe and it was [illegible] more necessary that we should be prepared. He was convinced [illegible] that the French Emperor intended to attack this country [illegible] the first opportunity.—Mr. COBDEN ridiculed the idea of [illegible] French invasion, and condemned in strong terms as injurious [illegible] ful to our policy, what he termed the preparations for war in [illegible] France while the mouths of our Ministers were filled with [illegible] pressions of confidence and even admiration towards the [illegible] sovereign, and he called upon the House to give expression [illegible] an opinion condemnatory of such a state of things. He [illegible] that there was any ground for supposing that the Emperor [illegible] the French or the French people had any design upon [illegible] upon this country. He admitted that circumstances gave [illegible] legitimate right to have a larger marine than France [illegible] third, but France, he said, had never pretended to the same [illegible] naval strength as ours, and we had now 760 vessels [illegible] while France had only 408. He thought an amicable explanation would adjust this matter. If, after such explanation [illegible] the French Government persisted in maintaining [illegible] naval rivalry, he would cheerfully vote increased estimates. Sir J. PAKINGTON said that Mr. Cobden's comparison of the [illegible] naval strength of England with that of France was erroneous by [illegible] reason of his having included in the number of English vessels [illegible] gunboats, of extremely small size, to the number of which Mr. Cobden had spoken of a panic; but did he mean that we ought to trust to amicable professions without taking [illegible] measures of defence and making up past arrears? He thought that Mr. Herbert had not said how far he concurred in the spirit of Mr. Horsman's proposal, or whether we were to go on year after year, spending driblets of money for the improvement of our harbours and arsenals. He warned the House that a large addition to the expenditure for the navy would be necessary next year.—Lord C. PAGET corrected the misstatement which Mr. Cobden's statement might have made as to the relative state of the English and French navies. The latter, he said, had 20 line-of-battle ships in commission and in reserve equal to ships in commission, making a total of [illegible] 26 line-of-battle ships in commission, and 9 [illegible] that our proportion was not that to which, in Mr. [illegible] opinion, we were entitled. But there was another [illegible] was increasing her navy—namely, Russia, which had [illegible] line-of-battle ships, 6 screw frigates, and 9 paddle frigates. Mr. BENTINCK and Mr. NEWDEGATE spoke in favour of the motion, and Lord H. VANE recommended that it should be pressed.—Lord PALMERSTON said he concluded that the gentleman had accomplished the object he had in view in bringing upon the House the great necessity of completing the [illegible] tions for the defence of our naval arsenals and dockyards, and that these defensive measures indicated no desire on the part of this country to go to war, or to give umbrage to any power, but were founded upon the common-sense principle that a nation desirous of peace should be able to defend itself against any sudden attack. He hoped, therefore, that he would be satisfied with this very useful result—and not press his motion to a division, which it might be inconvenient to affirm in the abstract without indicating how the fund was to be provided. A division was, however, called for by Mr. HORSMAN, which resulted in the motion being negatived by [illegible]. The Report of the Committee of Supply was brought up and agreed to. The remaining orders and motions were then gone through without discussion, and the House adjourned to Monday.

MONDAY.—*The New Foreign Office.*—At the morning sitting Lord J. MANNERS recapitulated the proceedings taken by the late and preceding Governments regarding the designs for the new Foreign and Indian offices, with especial reference to a statement that Lord Palmerston had directed Mr. Scott to prepare a new design in the Italian style, and expressed a hope that during the recess nothing would be done to the prejudice of a design which he thought admirably suited for its purpose. *Bribery at Elections.*—Lord R. CECIL asked whether it was the intention of the Government to issue commissions to inquire into the election proceedings in those constituencies in which committees have reported that extensive bribery prevails?—Sir G. LEWIS replied that the Government, as a Government, had no power or special function in relation to the matter. The House then went into *Committee of Supply*, and resumed the consideration of the Civil Service Estimates and Civil Contingencies. The vote for the *Statute Law Commission* was negatived by 80. The *Military Savings' Bank Bill* and other Bills were read a third time and passed. *Telegraph Contracts.*—In the morning sitting, Lord ASHLEY asked whether it was the intention of the Government to suspend further proceedings with respect to submarine telegraph contracts until the report of the select committee now sitting upon the Packet and Telegraph Service was laid upon the table of the House.—The Chancellor of the EXCHEQUER said that no further contracts would be made before the report was issued, except in very exceptional cases.—The House went into committee on the Income Tax when Sir C. WOOD brought forward the financial statement for India. He believed that in a few years India might look back to the state of financial prosperity which she enjoyed before the mutiny. He reviewed the difficulties which had arisen since that time, which it required the greatest care and consideration to grapple with. He should not enter into the subject already given by his predecessor, but should dwell chiefly on the general considerations. The expenditure was 44,700,000*l.*, and the income 33,800,000*l.*, leaving a deficit of 14,700,000*l.*, which made a deficit in the two years of 23,227,000*l.* Taking the month of April as the starting point, just before the mutiny, the debt to have been 59,462,000*l.*, for which the charge was 2,525,000*l.* The military expenditure in that year was 12,561,000*l.* That year there was a serious deficit of the revenue. The expenditure for 1857-8 was 40,220,000*l.*, the income 31,706,000*l.*, leaving a deficit of 8,520,000*l.*, which that deficit was provided for by various loans, borrowed partly in India and partly in England, the total being 20,747,000*l.*, which 11,561,000*l.* had been borrowed in England. The debt in April last amounted to 81,580,000*l.*, for which the charge was 3,564,000*l.* The military charges for that year were 25,840,000*l.* In the years 1859-60 the expenditure on account of charges for public works and compensation to sufferers by the mutiny, would be 46,131,500*l.* Against this there was a revenue of 35,856,000*l.*, leaving a deficit of 10 millions and a quarter. But beyond this he must ask for a loan of two millions on account of railroads now in course of construction. This would make the entire deficit 12 millions and a quarter. To provide for this seven millions had been borrowed, five millions in England and two in India, which should require 5,700,000*l.* to balance his account. He thought a margin was needful, and he should therefore ask sanction for two millions of which remained on account of the loan sanctioned. He should have to raise five millions by loan. In the course of next year there would be no charge for compensation; but taking into account the increase of debt and of interest, he estimated the charge for 1860-1 at 6,000,000*l.*, and the income at 36,000,000*l.*, leaving a deficit of [illegible]

## News of the Week.

In the House of Lords on Friday, in answer to Lord CLANCARTY, Earl GRANVILLE said that the Government were willing to consider any improvements which might be suggested in the system of national education in Ireland, but he declined to give any promise to introduce a Bill on the subject. On Monday the Marquis of NORMANBY asked for information respecting the project of pacification which had been transmitted by Her MAJESTY's Government to Austria previous to the peace of Villafranca. Lord WODEHOUSE said that the only project of pacification which the English Government had transmitted to Austria was a French despatch containing propositions for peace, but on which they had offered no opinion of their own. On Tuesday the Militia Laws' Amendment Bill was read a second time after a short discussion, in which Lord STRATFORD DE REDCLIFFE complained of the suspension of the ballot, and Lord KINGSDOWN thought that the defences of the country would never be in a proper position until Parliament resorted to something like a conscription. On Thursday the India Loan Bill passed through committee, and the Reserve Volunteer Force of Seamen Bill was read a third time and passed.

In the House of Commons on Friday the House went into committee on the Reserve Volunteer Force of Seamen Bill, the object of which is to enroll a naval militia of 30,000 men as a reserve for the Navy, and agreed to all its clauses. In committee of Ways and Means, a resolution moved by the CHANCELLOR of the EXCHEQUER for imposing an additional probate duty on estates of the value of 1,000,000*l*., and upwards, was agreed to. Mr. ROEBUCK's resolution declaring that the withdrawal of the Bodmin election petition was a corrupt compromise was negatived, on a division, by 214 to 30. On Saturday, in answer to some remarks by Sir H. WILLOUGHBY on the state of the funded and unfunded debt, the CHANCELLOR of the EXCHEQUER said that the powers of conversion and reconversion given by Parliament to the Finance Minister were too large, and that in the next session he would propose a measure for bringing the subject under the direct control of the House of Commons. On Monday Lord ELCHO brought forward his motion for an address to the Crown, declaring that it would not be consistent with the honour or dignity of the country to take part in any conference on the affairs of Italy. Mr. KINGLAKE moved as an amendment the previous question. Mr. GLADSTONE, Lord J. RUSSELL, and Lord PALMERSTON opposed the motion on the ground that there was at present no intention of going into conference at all, but that it would be unwise and unconstitutional to fetter the Government should circumstances hereafter arise to render their co-operation advisable. Mr. DISRAELI said that he did not approve of the form of the motion, and recommended that it be withdrawn. Lord ELCHO said he was satisfied with the result of the discussion, and withdrew the motion. On Tuesday the Consolidated Fund (Appropriation) Bill, the Stamp Duties Bill, the Customs Bill, and the East India Loan Bill, were read a third time and passed. Mr. MACKINNON obtained leave to bring in a Bill to establish equitable councils of conciliation to adjust differences between masters and operatives. On Wednesday Mr. BRIGHT obtained a select committee to inquire into the circumstances connected with the withdrawal of the petition against the return of Mr. OVEREND at the election for Pontefract. The Sale of Gas Bill passed through committee, and the European Troops India Bill was read a third time and passed. On Thursday, on the order of the day for going into committee on the Charitable Trusts Act Continuance Bill, Mr. NEWDEGATE moved that the Bill be committed that day three months. After some discussion the amendment was rejected on a division by 70 to 47. The Bill then passed through committee, and was read a third time and passed. The House then went into committee on the Divorce Court Bill, when a strong opposition was offered to the clauses added by the House of Lords, empowering the Court to hear certain cases with closed doors, authorising the ATTORNEY-GENERAL to examine the parties in cases of suspected collusion, and extending the operation of the Bill to Ireland. After a long discussion all these clauses were withdrawn, and the Bill was passed through its remaining stages with some amendments respecting the property of divorced persons. The Sale of Gas Bill was read a third time and passed. On the order of the day for considering the Attorneys and Solicitors Bill, as amended, the House was counted out.

The Zurich Conference was formally opened on Monday, and it is understood that one of the first resolutions adopted by the Plenipotentiaries was to prolong the armistice indefinitely. Meanwhile the news from Italy is of a serious character. Tuscany has refused to submit to the restoration of the old dynasty, Modena has voted annexation to Piedmont, and Parma has proclaimed the Red Republic. The latest news states that the Piedmontese have been driven from Parma, that all the owners of property and friends of order were flying from the city, and that the French troops have suspended their departure from Italy.

## Home News.

THE COURT. — The Queen and Prince Consort, accompanied by Prince Alfred and the Princesses, left Osborne yesterday evening and embarked in the Royal yacht Victoria and Albert, on a cruise of a few days to the Channel Islands. On Thursday week the Queen and Prince Consort, accompanied by Prince Alfred, Prince Arthur, Princess Alice, Princess Helena, and Princess Louisa, took a cruise in the Fairy. On Friday the Queen drove out, accompanied by Princess Hohenlohe. The Earl and Countess of Clarendon left Osborne: Toussoun Pasha, son of the Pasha of Egypt, accompanied by Sir Moses Montefiore, was presented to her Majesty. On Saturday, being Prince Alfred's birthday, the band of the Royal Marines played during the day. In the afternoon the Queen and Prince Consort, accompanied by Prince Alfred, Prince Arthur, Princess Alice, Princess Helena, Princess Louisa, Princess Leiningen, and Princess Hohenlohe, embarked in the Fairy, and were present at the regatta of the Royal Yacht Squadron in Cowes Roads. Earl Granville and Sir G. C. Lewis arrived on a visit. In the evening the Queen had a dinner party. On Sunday morning the Queen and Prince Consort, Prince Alfred, Princess Alice, Princess Helena, Princess Louisa, the Duchess of Kent, and Princess Hohenlohe attended Divine service at Osborne; the Rev. J. Prothero officiated. Colonel Claremont, C.B., arrived on a visit. On Monday morning Prince Alfred left Osborne for Holyrood Palace on a visit to the Prince of Wales. Earl Granville and Sir G. C. Lewis left for London. In the afternoon the Queen, accompanied by Princess Louisa and Princess Hohenlohe, drove out. The Prince Consort rode on horseback, and visited the Grand Duke Constantine at Ryde. The Duchess of Kent took a drive. On Tuesday the Grand Duke Constantine visited her Majesty. In the afternoon the Queen drove out with the Princess Alice, Princess Helena, and Princess Hohenlohe. In the evening the Grand Duke Constantine and Prince and Princess Leiningen dined with her Majesty. Yesterday afternoon the Queen held a Privy Council at Osborne.

THE PRINCE OF WALES AND PRINCE ALFRED.—On Sunday last the Prince of Wales attended Divine service in the High Church of Edinburgh; the Rev. Dr. Arnot officiated. On Monday morning his Royal Highness visited the Edinburgh Botanical Gardens, and, having inspected the hot-houses and palm-houses, assisted at the transplanting of a larch which his Royal Highness afterwards planted in the hilly part of the gardens. On Tuesday morning Prince Alfred arrived by the ordinary London express, and proceeded to Holyrood. The Prince of Wales received Prince Alfred at the station, and their Royal Highnesses afterwards proceeded to Roslin and Melrose by rail, and returned to Holyrood in the evening. On Wednesday morning the Prince of Wales and Prince Alfred went to the University and attended a lecture by Professor Lyon Playfair on the chemical phenomena connected with the processes of calico printing and dyeing. In the evening their Royal Highnesses visited the Queen's Theatre. On Thursday Prince Alfred left Edinburgh for London, on his return to Osborne.

THE GRAND DUKE CONSTANTINE arrived at Spithead on Saturday from Cronstadt in the Russian screw frigate Swetland, carrying 60 (8-inch) guns. His Imperial Highness landed at Ryde, and took up his residence at the Pier Hotel. On Monday the Prince Consort visited the Grand Duke, and on Tuesday his Imperial Highness visited the Queen at Osborne, and dined with her Majesty in the evening.

THE GRAND DUCHESS MARIE OF RUSSIA, accompanied by her daughter, the Princess Marie, and her sons, the Princes Nicolas and Eugène, arrived at Chesham House, the residence of the Russian Legation, on Monday evening from Torquay. On Tuesday morning her Imperial Highness visited Westminster Abbey, Stafford House, the residence of the Duke of Sutherland, and Bridgewater House, the residence of the Earl of Ellesmere. In the evening the Grand Duchess, with the Princess Marie, honoured the Earl and Countess Granville with her company at dinner. On Wednesday morning the Grand Duchess, with her family, attended Divine service in the church of the Russian Legation, and in the afternoon visited the Crystal Palace, attended by Sir Joseph Paxton, M.P. who had been specially invited to attend upon her Imperial Highness. On Thursday the Grand Duchess left London for Osborne on a visit to the Queen. Her Imperial Highness will remain in the Isle of Wight for two days, and is expected to return to-day to Chesham House. On Monday next the Grand Duchess will again visit the Crystal Palace to witness the display of the fountains and cascades.

THE CABINET.—A Cabinet Council was held on Saturday at the official residence of the First Lord of the Treasury in Downing Street. Another Council was held on Wednesday.

THE PEERAGE.—Mr. Labouchere's title will be Baron Taunton, of Taunton, which place he represented in the House of Commons for more than 30 years.

MINISTERIAL ARRANGEMENTS.—Mr. James Wilson has finally accepted the office of Special Commissioner to India. The Vice-Presidency of the Board of Trade, vacated by this appointment, has been offered to Mr. More O'Ferrall, but it is understood that he has declined the offer.

THE ARMY.—The colonelcy of the 1st Dragoon Guards, vacated by the death of the Earl of Cathcart, has been conferred on Lieut.-Gen. Sir T. W. Brotherton, K.C.B. The colonelcy of the 15th Light Dragoons, vacant by the promotion of Sir T. W. Brotherton, has been conferred on Major-General E. W. Bouverie.

PARLIAMENTARY MOVEMENTS.—The prorogation of Parliament will take place by Royal Commission to-day. The election for Devonport in the room of Sir Erskine Perry terminated on Tuesday in the return of Admiral Sir Michael Seymour, the Liberal candidate, by a majority of 49 over Mr. Ferrandi, the numbers being 1096 to 1047. Mr. Ferrand has determined to contest with Sir Arthur Buller the seat vacated by Mr. Wilson. It is probable that the nomination will take place on Tuesday, and the election on Wednesday next. The Taunton election has terminated in the return of Mr. G. C. Bentinck, the Conservative candidate, by a majority of 45 over Mr. Alexander Barclay, the numbers being 381 to 336. The Dartmouth election took place on Monday, when Mr. Dunn the Conservative candidate was elected without opposition, Mr Donaldson having declined to go to the poll on the ground that the seat could only be secured by venal means. There is a vacancy at Bodmin caused by Dr. Michell's acceptance of the stewardship of the Manor of Northstead. There are two candidates in the field, Mr. Wyld, in the Radical interest, and Mr. Murchison, who offers himself as a Liberal-Conservative. The Preston Election Committee have reported that Mr. Charles Pascoe Grenfell was duly elected, that persons were bribed at the last election, but it was not proved that the bribery took place with his sanction or that of his agents. The Huddersfield Committee have reported that Mr. E. A. Leatham was duly elected, that several persons were bribed at the last election, but there was no evidence that such acts of bribery took place with the knowledge of Mr. Leatham. The Beverley Committee have reported that Mr. Ralph Walters was not duly elected, that he was by his agents guilty of bribery, and that Major Edwards was duly elected. The committee recommend that two persons who had been guilty of bribery should be prosecuted, and that no writ for Beverley should be issued until the evidence is before the House. The Hull Committee have reported that Mr. Joseph Hoare was not duly elected, that upwards of 300 electors were bribed by being employed and paid as messengers and canvassers at the late election, but it was not proved that such acts of bribery were committed with the knowledge or consent of Mr. Hoare. The committee also reported that Mr. W. H. Moss, election auditor for Hull, appeared as agent for the petitioners, a course of proceeding which they considered open to grave objection.

THE DOVER POSTAL CONTRACT.—The Select Com-

n a conference by which a more permanent arrangement might be made for the security of Italy.—Mr. WHITESIDE said that no congress could do more for Italy than had been done already, and therefore he fully approved of the principle of the resolution —Lord J. RUSSELL said that nothing could be more ill-timed than a motion advising the Crown not to do what it had never been asked to do, and what it had no intention of doing. He fully admitted that it was doubtful whether it would be prudent for this country to take part in a congress, and that if France and Austria at Zurich settled the whole question, it would not be for the honour or the dignity of this country to add its signature to such a settlement. At the same time affairs might take a very different turn, and render our intervention useful and even necessary for the protection of Italy from the double danger of foreign intervention and domestic revolution, by forming a confederation on a sound and durable basis. Was England to register a vow which should preclude her from taking part in such a work? This was a question which, like others, ought to be left to the discretion and responsibility of the Ministers of the Crown. Adverting to the proposals made by France to Austria through the British Government, he explained the circumstances under which, without sanctioning them, the Ministry became the medium of communication, distinctly declaring that it offered no advice in the matter. He rejoiced that peace had been concluded, and claimed for Italy the right of founding its own government upon the basis of a popular movement, while he declared it to be the duty of this country to abstain from a policy of isolation which might in the end endanger its own independence.—Mr. DISRAELI said that the Chancellor of the Exchequer had evaded the practical question under consideration. He had frankly placed his Italian policy before the House; and if these large and decided views were shared by his colleagues, and indicated the predominant opinion of the Cabinet, then the policy under which the Government proposed to enter the conference was to put an end to the settlement of 45 years ago, and he pointed out some of the consequences of this policy. With reference to the communication from the French Ambassador, Lord J. Russell's explanation, he said, had been ample except upon the most material point, whether he had generally approved of the proposal, and whether that approbation was communicated to the Emperor of the French. He objected to the motion that it called upon the House to give an opinion upon the question on what was practically the last night of the session, and he trusted that Lord Elcho would not press it to a division. — Lord PALMERSTON commented upon the remarks made by Mr. Disraeli in the last Parliament upon the conduct of the Austrian and the Sardinian Governments respectively, when he characterised that of the latter as ambiguous, and eulogised the spirit of dignified conciliation manifested by Austria. He denied that any approbation had been expressed of the paper received from the French Ambassador, and said that the Government were not proposing to go into conference at all, but if they did it would not be to upset the arrangements of 1815. He was of opinion that Austria would be stronger if she had no Italian possessions; but it was one thing to hold this opinion and another to enter into measures to change arrangements founded upon treaties that were the basis of a great European settlement. The present motion, precluding the Crown from acting under circumstances which had not yet arisen, was neither politic nor constitutional. He should have preferred to meet it with a direct negative, but would support the indulgent mode of disposing of it by the amendment of the previous question.—Lord ELCHO said he was satisfied with the result of the discussion, and would therefore withdraw his motion and accept the amendment. The amendment of the previous question was then agreed to. The *Appropriation Bill* and the *East India Loan Bill* passed through committee. The *Reserve Volunteer Force of Seamen Bill* was read a third time and passed, after a protest by Mr. AYRTON against its penal clauses. Other Bills were advanced a stage.

TUESDAY.—The *East India Loan Bill*, which was considered as amended, gave rise to some discussion.—Mr. AYRTON suggested an Imperial guarantee.—Mr. CRAWFORD and Sir E. COLEBROOKE opposed it.—Sir C Wood said that the question would very probably come before Parliament hereafter, when it ought to be fairly considered. Mr. Wilson had not yet accepted the office of superintendent of Indian finance, but he hoped that he would be induced to do so.—Mr. MACKINNON asked for leave to introduce a Bill for the establishment of *Councils of Conciliation* to settle disputes between masters and operatives. Much ill-will prevailed between the two classes, often aggravated by the fact that the employers as magistrates held the administration of the law in their own hands. He proposed councils, which he believed would do much to allay this ill feeling.—Mr. KINNAIRD seconded the motion, which was agreed to. *Enlistment in the Army.*—Mr. J. LOCKE was proceeding to call attention to the case of a private soldier who had enlisted at a very early age, and died under the rigour of military discipline, when the House was counted out.

WEDNESDAY. — *Pontefract Election Petition.* — Mr. BRIGHT moved for a select committee to inquire into the allegations of a petition presented by Mr Childers, the late candidate for Pontefract, in reference to the conduct of Mr. Overend, the sitting member. The allegation was that a petition had been presented against the return of Mr. Overend; that, to save the expense of a scrutiny, it was agreed by both parties that the matter should be referred to a member of the late Government; that the petition was withdrawn upon that understanding, and that Mr Overend subsequently refused to submit to the reference.—Mr. OVEREND entered at some length into the circumstances of the case, stating that he had left London believing that the petition was to be proceeded with—that while on circuit he received telegrams from his agent, stating that offers were made to withdraw the petition under certain conditions of reference, from which he inferred that the seat was not to be questioned, and that the proceeding was a "dignified withdrawal" of the petition. He agreed to the reference, not believing that it embraced any question of the seat. Finding, however, that the seat was in question, he repudiated the agreement, as involving a breach of the privileges of the House. The referee upon this declined to act. Subsequently he agreed to leave the whole question to the referee; but the agent of Mr. Childers refused to go on, and declared his intention to bring the matter before Parliament. He asserted that his own conduct had been straightforward throughout, and was perfectly willing to submit it to the investigation of a committee.—Mr. BRIGHT said that he had understood Mr. Overend not to have consented to submit to the reference until after the agent of Mr. Childers had declined to proceed.—Mr. OVEREND declared this statement to be untrue —Mr. DISRAELI declared that Mr. Overend had cleared up all doubts as to his own conduct in the transaction. He regretted that the matter had been brought before the House at all; but as it had been, it was better that inquiry should proceed. The committee could do nothing even if the allegations were proved, inasmuch as Mr. Childers was no longer in a position to present a petition against the return. After some further discussion, the motion was agreed to, and the committee appointed, with orders to proceed forthwith with the inquiry. The *Sale of Gas Bill* passed through committee. On the consideration of the *European Troops (India) Bill* as amended, Sir C. Wood stated that the object of the Bill was to increase the number of European troops which could by law be maintained in India as a local force from 24,000 to 30,000.—General PEEL complained of the haste with which this Bill had been hurried through the House. He objected to an increase of the Indian local force at a time when we could not get sufficient troops for our home service, and thought they could employ German troops in India. He believed that the increase of the Indian force meant increase of the patronage of the Indian Council.—Sir D. L. EVANS repudiated the proposal for employing German auxiliaries in India. He considered that the disaffected troops in that country had just cause for complaint, as the expectations held out to them by the Prime Minister had not been realised.—Mr. S. HERBERT observed that the Bill did not really increase the number of troops. It simply legalised an increase already made.—After a desultory conversation, in which Colonel DUNNE, Mr. AYRTON, and other members took part, the Bill was read a third time, and passed. *Wakefield Election.*—On the motion of Mr. HODGSON, an address was agreed to for a committee to inquire into the alleged corrupt practices at the borough of Wakefield.—The *Fireworks Act Amendment Bill* was withdrawn.

THURSDAY.—*The Builders' Strike.*—In answer to a question by Mr. E. JAMES, Sir G. LEWIS stated that an interview had taken place between himself and the master builders, relative to the workmen's strike. The object of the masters was to secure the arbitration of the Government. His answer had been, that both the Government and the House of Commons had no knowledge of the subject, and therefore could not undertake any such office.—In reply to Mr. GRIFFITH, the CHANCELLOR of the EXCHEQUER said that he could not take upon himself to refuse the *Chiltern Hundreds* to any member solely because a petition was pending against his election. If there were grounds of objection it was for the House to interfere.—Sir J. PAXTON asked the First Commissioner of Works whether he intended to proceed with the works, as proposed by Mr. Hawksley, for partially cleansing the water in *the Serpentine?*—Mr. FITZROY said that he intended to proceed with the plan, believing that it would not partially, but entirely cleanse the water of the Serpentine.—A lengthened discussion ensued, in which Mr. STEPHENSON declared that the state of the Serpentine had been greatly exaggerated, but approved of the plan as the most economical yet proposed.—Sir J. PAXTON, on the contrary, staked his reputation that the plan would turn out a failure.—On the order of the day for going into committee on the *Charitable Trusts Act Continuance Bill*, Mr. NEWDEGATE opposed the Bill, on the part of the Roman Catholics in the North of England who were desirous of being placed under the operation of the general law of the land, and were apprehensive lest the entire number of Roman Catholic charities should pass into the hands of Cardinal Wiseman. On this ground he moved as an amendment that the Bill be committed that day three months. — Mr. SPOONER seconded the amendment.—Mr. HENNESSY supported the motion.—Mr. BOWYER said that Mr. Newdegate had calumniated an illustrious person who had nothing to do with the Bill.—After some observations by Mr. SCULLY and Mr. KINNAIRD, Sir G. C. LEWIS said that the Bill was merely a continuance Bill, and promised that the Government would introduce a permanent measure next session. On a division, the amendment was negatived by 70 to 47, and the Bill having passed through committee was read a third time, and passed.—The House then went into committee on the *Divorce Court Bill*, the clauses of which underwent material amendments by the omission of the 4th clause, which extended the jurisdiction of the Court to Ireland: the 5th clause, which authorised the Court to hold its sittings in cases involving considerations of public decency with closed doors; and the 7th clause, providing that petitions for the dissolution of marriage be referred to the Attorney-General, with a view to prevent collusion. On the motion of the ATTORNEY-GENERAL, a clause was added, providing that, on any petition presented by a wife, praying that her marriage may be dissolved by reason of her husband's adultery, coupled with cruelty or desertion, the husband and wife shall be competent and compellable to give evidence relating to such cruelty or desertion. A clause was likewise added empowering the court to make orders with reference to the application of property under ante-nuptial or post-nuptial settlements. The Bill was read a third time and passed.—The *Sale of Gas Bill* was read a third time and passed.—On the order for considering the *Attorney and Solicitors Bill*, as amended, Mr KNIGHT was commenting on the Bill, when the House was counted out.

FRIDAY.—*Gloucester Election.* — Mr. E. JAMES moved an address for the appointment of three barristers as Commissioners to inquire into the corrupt practices which the recent Election Committee reported as having prevailed extensively at the last election. — Mr. TITE seconded the motion. On a division the motion was carried by 59 to 21. *Pontefract Election.*—Mr. WALPOLE brought up the report from the committee, and asked that it might be printed. Several members asked for a statement, but the right hon. gentleman made none. *The Slave Trade.*—Mr. CAMPBELL moved a resolution expressing the respect of the House for the honourable manner in which the King of Portugal and the Emperor of the French have acted in restraining the slave trade.—Mr. BUXTON seconded the motion.

[Left sitting.]

## Metropolis and its Vicinity.

THE GREAT EASTERN IN MOTION.—The completion of this magnificent vessel was formally celebrated on Monday by a banquet on board the ship, which was honoured by the presence of many of the members of both Houses of Parliament and some of the most distinguished engineers and scientific men in the kingdom. The company numbered about 400, including the Marquis of Westminster, the Earl of Shrewsbury, Lord Churston, the Earl of Ellesmere, Lord Stanley, M.P., Lord Redesdale, the Marquis of Stafford, M.P., Viscount Canterbury, the Earl of Desart, Lord Dynevor, Lord Alfred Churchill, M.P.; Viscount Curzon, M.P.; Viscount Newport, M.P.; Viscount Raynham, M.P.; Lord Adolphus Vane Tempest, M.P.; Sir Joseph Paxton, M.P.; Mr. Bright, M.P.; the Hon. Colonel Cecil Forester, M.P.; Mr. Ayrton, M.P.; the Hon. H. F. Berkeley, M.P.; Right Hon. H. S. Waddington, M.P.; Mr. Jackson, M.P.; Admiral Sir C. Napier, M.P.; Colonel Sykes, M.P.; Right Hon. W. Cowper, M.P.; Mr. Ingram, M.P.; Mr. Brady, M.P.; Sir J. V. Shelley, M.P.; General Buckley, M.P.; Sir De Lacy Evans, M.P.; Mr. Locke, M.P.; Mr. Magniac, M.P.; Mr. Hennessy, M.P.; the Attorney-General, the Lord-Advocate of Scotland, Mr. R. Stephenson, M.P.; Hon. Ashley Ponsonby, M.P.; Hon. Ralph Dutton, M.P.; Colonel North, M.P.; S. M. Peto, M.P.; Sir Michael Shaw Stewart, M.P.; Alderman Cubitt, M.P.; Mr. Mackinnon, M.P.; Alderman Copeland, M.P.; Alderman Sir James Duke, M.P.; Right Hon. J. R. Mowbray, M.P.; Mr. Williams, M.P.; Mr. Bass, M.P.; Mr. Beale, M.P.; Hon. A. Kinnaird, M.P.; Mr. Briscoe, M.P.; Mr. Gilpin, M.P.; Mr. Coningham, M.P.; Mr. Kennard, M.P.; Mr. Thomson Hankey, M.P.; Mr. Warre, M.P.; Mr. Locke, M.P.; Mr. Packe, M.P.; Alderman Salomons, M.P.; Mr. Stirling, M.P.; Mr. Peacocke, M.P.; Mr. Whatman, M.P.; the Lord Mayor, Chevalier Hebeler, Mr. Magniac, Mr. Penn, Mr. Whitworth, Mr. Bazalgette, Sir John Rennie, Mr. Brereton, Messrs. Boulton & Watt, Mr. M'Connell, &c. The great feature of the day was the trial of both screw and paddle engines for the first time, the former constructed by Boulton & Watt, the latter by Mr. Scott Russell. The paddle engines consist of four oscillating cylinders, of 74 inches diameter and 14 feet stroke; each pair of cylinders, with its crank, condenser, and air pump, forming in itself a complete and separate engine, capable of easy disconnection from the other three, so that the whole is a combination of four engines. The paddle engines work up to an indicated power of 3000 horses when working 11 strokes per minute, but all the parts are so constructed that they will work smoothly at 16 strokes a minute, giving an indicated power of 5000 horses. Their weight, including donkey engines, pumps, funnels, &c., is 210 tons, and they are capable of containing 156 tons of water. The screw engines consist also four cylinders of 84 inches diameter and 4 feet stroke, capable of being worked together or separately. When working 45 strokes a minute they give an indicated power of 4400 horses, but at 55 strokes a minute the power will reach to 6500 horses. Thus the united efforts of both screw and paddle engines will drive the immense vessel through the water with a power of no less than 12,000 horses, at the rate of 22 or 23 miles an hour. The screw engine boilers weigh 362 tons and will hold 270 tons of water. The probable consumption of coal when both engines are at full work will average 250 tons per day. The cellular compartments at the bottom of the ship will be used for pumping water into instead of ballast, and the webs subdividing these are made perfectly watertight, any one or any number can be filled at pleasure. The first movement of the paddle engines was made at half-past 1, when the great masses slowly rose and fell as noiselessly as the engines of a Greenwich boat, exerting in their great revolutions what seemed an almost irresistible power. There was no noise, no friction, nor the slightest sign of heating, and the tremendous frame of ironwork sprang at once into life and motion with as much ease as if every rod and crank had been worked for the last 10 years. The steam in the boilers was about 21llbs., but, as a matter of course, the engines were turned but slowly, never exceeding 16 revolutions per minute. Even with this slow motion the slight immersion of the paddle-floats the effect of their enormous power was at once visible upon the ship. The great mooring chains astern were tightened to the utmost, and it seemed as if even Trotman's anchors would yield under the strain. Fortunately, however, they held fast, and then the screw engines were got into motion, working the ship astern, so as to counteract the effect of the paddles. These latter engines worked with the same marvellous ease and freedom; there was no noise, no sign of hot bearings, and the result was considered by all the engineers on board to be satisfactory in the very highest degree, and far beyond

what could have been expected. When the engines had been tested to the utmost to which they could be tried with a vessel at her moorings, all the visitors adjourned to the saloons, where a magnificent cold collation had been prepared. Mr. Campbell, managing Director of the Company, presided. After the usual loyal and patriotic toasts had been duly honoured and responded to, that of the navy by Sir Charles Napier, and of the army by General Bulkeley, Lord Stanley proposed the toast of the day and spoke as follows:—

"I am afraid, gentlemen, that to a very large number of those whom I attempt to address, I shall, of necessity, be altogether inaudible; but I now rise to take upon myself a task which, imposed as it is upon me by those who have a right to claim my humble services, I do not feel myself at liberty to decline, and which I undertake upon the present occasion with more than common pleasure. Gentlemen, I think we who meet here to day will all agree that we ought not to part without expressing that which I know we all of us think and feel with regard to the magnificent vessel which we have been permitted this day to inspect, and the great undertaking which that vessel has been constructed to carry out; and of the energy and perseverance of those by whom that undertaking has been carried to its present point of success. You have all heard or read what the Great Eastern has been built to do, and what are the peculiar qualifications which she possesses for doing that work. You are aware that she is calculated, according to the reckoning of her projectors, to make the passage from England to Calcutta in 32 days. We know that she is intended to carry her coals both for the outward and the homeward voyage, so as to save that enormous time and expense which at present arise, of necessity, for establishing coal depôts in distant parts of the world. You know that she is calculated to carry a population of not much less than 10,000, including her crew,—a population so large that I almost wonder the company have not applied to the House of Commons to have the Great Eastern included in the new Reform Bill, in the list of Parliamentary boroughs for the new schedule. You are aware of the circumstances under which this great enterprise has been undertaken. You know that if that enterprise shall succeed—and we all know that nothing has been left undone to insure its success that can be effected by inventive genius, by mechanical skill, and by steady perseverance through unexampled difficulties—you know, I say, that if this experiment succeeds—and far be it from me, speaking in this room, to anticipate any other result—it will constitute one of the most remarkable experiments of the time in which we live. It will achieve great results for commerce and for civilisation. It will have reduced by one half the distance in point of time which now divides continents and nations, which nature has separated by intervening oceans, but which science and trade are, as it were, tending, in despite of nature, to unite. You know that if this grand experiment succeeds, it will be a greater step, a greater progress in the art of ship-building than has ever been accomplished in one generation, from the day when man first began to traverse the sea. You know that if the experiment succeeds it will render the passage over the stormy ocean to remote countries as easy and as free from discomfort to the landsman, and even to the landswoman, as the ordinary railway train is at present. You know also that the experiment, if it succeeds, will stimulate and develope trade to an almost incalculable extent; that it will enable this country, if unhappily the occasion should again arise, to pour into our great empire of the east reinforcements and aid with a rapidity equal to that of the overland line, and by a route which England has always claimed as her own peculiar highway, and over which no foreign potentate can exercise control. I should say also that the success of this undertaking will—I do not say tend to solve that great political problem of our time which is known as the eastern question—but at least that it will render the solution of that problem a question of far less practical importance to England than it is at present. Because it is well recognised and understood by any English statesman that the principal interest—I do not say the sole interest, but by far the principal interest—which England has in Egypt and the countries immediately adjoining Egypt, arises from the necessity of possessing, at all times and under all circumstances, an uninterrupted and rapid communication with the British possessions in India. That communication it is now proposed to supply with greater independence and with equal rapidity by a new line, and, so far, it is hardly too much to say that you will have for all practical purposes superseded the overland route. I need say no more with respect to this undertaking, but I may be permitted before I sit down and before I give you the toast which I intend to propose, for an instant to advert to the name of a gentleman who is at the head of this undertaking. We are well aware that the enterprise which has now so nearly reached its completion was not attended throughout with unbroken prosperity and success. There was a time of difficulty, a time of despondency—a time when success seemed doubtful and failure more than probable—and at that time Mr. Campbell and his colleagues came forward. They brought their commercial knowledge to bear, their knowledge of the requirements of Indian and of English commerce, and they undertook to insure the commercial success of the work, provided mechanical success was assured; and they induced the capitalists of the country to place faith in their exertions, and the result is that which you now see around you to-day. I beg to propose, and I think we should give it with all honours, 'Prosperity to the Great Eastern.'"

Mr. Campbell acknowledged the toast, and pointed out that if the great ship had been completed two years ago, hundreds of lives and literally millions of treasure would have been spared in the late mutiny in India. He said, speaking of the Great Eastern acting as a kind of railway between this country and India, that it appeared to be a kind of law that great discoveries were made just at the critical moment when the machinery of the world could not run smoothly without them. When they considered that the trade of the East represented the wants of nearly half the human race, and was even then of the annual value of 50,000,000*l.* sterling, it was not an exaggeration to say that, with the expansion which must take place through railways, colonisation, and the entire break up of all kinds of checks to commerce, the great ship had been discovered just when she became a necessity. Mr. Jackson, M.P., proposed "the Healths of Mr. Brunel and Mr. Scott Russell, the engineer and builder of the ship." Mr. Scott Russell responded on the part of both, regretting the absence of Mr. Brunel, explaining his own share in the construction of the great ship, and bearing high testimony to the share of his colleague as the originator of the great idea. He announced that the ship would go down the river on the 21st or 23d inst., and would make her trial trip early in September, but he wished it to be understood that she never was intended for short voyages; and though she would be tested on a short voyage, she was not to be finally tried by such a trip. What the great ship must be tried by was that for which she was originally intended, viz., a voyage to Australia or India in 33 or 36 days. It was most important to bear this in mind, because if our distant colonies could find themselves brought by the ship within 33 or 36 days of the mother country, they would not remain long satisfied without having a fleet of such ships, and without making such commercial arrangements as would admit of their being established to make regular voyages.

The Builders' Strike.—On Saturday afternoon the operatives at most of the large building establishments in and immediately around the metropolis ceased work, and collected their tools previous to quitting their employment. The men carried out their proceedings in a cool, orderly, systematic, and evidently prearranged manner. There was no exhibition of feeling evinced on either side, but the simultaneous packing up of tools, and the few expressions which dropped from the men, plainly enough indicated their intention to hold out. On Monday morning therefore all the great building firms closed their doors. In the course of the morning a report was published by the Central Committee, stating that 40,000 men had struck. The consequence of course has been that building operations in London have been almost entirely suspended. Throughout Pimlico and the lower parts of Westminster, where many of the large builders have yards, the scene presented was a very strange one. Hundreds of labouring men strolled about in groups, discussing their grievances, and for the most part smoking short pipes. In the Belgrave Road there was a large assemblage of working men during the whole of the morning, Mr. Trollope's yard being the great centre of attraction. On the gateway there was posted a notice that joiners, bricklayers, and other workmen were wanted, and some few entered the yard, but the regular hands resisted the invitation. There were no signs of excitement, and in all the places at which they assembled they conducted themselves in the most orderly manner. On Monday afternoon a deputation of master builders headed by Mr. Tite, M.P., and Alderman Cubitt, M.P., waited on Sir G. Lewis, Secretary of State for the Home Department, to place before him the circumstances attending the strike, and to ask his opinion upon the course that ought to be pursued in the peculiar position in which the masters were placed. Mr. Tite, M.P., in introducing the deputation, briefly narrated the principal features by which the strike was characterised. He referred to the unjust demands which he conceived had been made upon the masters, dwelt upon the great inconvenience the strike would produce by public and other works being delayed in completion, and concluded by stating that the number of artisans out of employment amounted to between 98,000 and 100,000. Mr. T. Piper and other members of the deputation then addressed the right hon. gentleman, and recapitulated the employers' case, as placed by the masters before the public. Sir G. Lewis in reply said:—

"The real solution of the question must of course be ultimately determined by the demand and supply. If the workpeople, looking at all the circumstances can substantiate a claim either for this increase or for an increase of wages, they will, no doubt, after a certain amount of suffering and loss inflicted upon themselves and yourselves, make good their demand. If, on the other hand, it turns out that they are wrong in their estimate of what the present state of the market entitles them to, they will have to give way. It is impossible for the Government to fix the price of labour; as well might they attempt to fix the price of bread or meat. It must depend upon the state of the labour market. If buildings are to cost more, there will be fewer wanted, and therefore fewer built, and therefore fewer men employed, and those men will have to work longer in order to get the same wages. He deeply regretted that the strike should have taken place, but he did not see how the Government could interfere with the arrangements between masters and men, or men and masters. Strikes were at all times most unadvisable and undesirable; but while the law was maintained the Government, of course, could not interfere."

On Tuesday a general meeting of the Masters' Association was held at the Freemasons' Tavern, when the principal metropolitan builders attended. The proceedings were conducted with closed doors, and nothing has transpired beyond the fact that little progress has yet been made towards a settlement of the dispute. Nearly all the important building operations throughout London are suspended. The Westminster Palace Hotel, in Victoria Street, where a vast number of men have been at work for several weeks past under the direction of Mr. Myers, presents the appearance of a desolation. At the Government works of Deptford and Woolwich, where between 3000 and 4000 men were employed, there is a total cessation of labour on the part of the regular operatives, and the Royal Engineers are now employed in finishing the Armstrong gun factory. The Middle Temple Library is stopped, as are also the new church in Baldwin's Gardens, the Patriotic Asylum at Wandsworth, the works of the new Houses of Parliament, the Grenadier Guards' barracks in Rochester Row, the Duke of Buccleugh's house in Whitehall, the Training College at Stockwell, &c.

The Strike in the Gas Factories.—This strike has ended in the total discomfiture of the men. The directors brought up supplies of men from the country, and the men who struck found themselves compelled to give in, and to sign a promise that for the future they would not take part in any such movement.

Metropolitan Turnpike Gates and Toll Bars.—The report of the Commissioners appointed to inquire into the best means of affording relief to the inhabitants of the metropolitan districts within six miles of Charing Cross by the abolition of turnpike-gates and toll-bars, has just been issued by special order of the House of Commons. The inquiry divides itself into two branches, one relating to the repairs of the roads, the other to the payment of the debts. Six distinct modes were suggested by the witnesses examined by which the turnpike roads might be maintained if the tolls were abolished. These are discussed by the Commissioners in detail. The Commissioners decline to recommend the imposition of county rates, an additional house tax, or the appropriation of the present dues on stage and hackney carriages. They think that if the 8*d.* coal duty be continued, part of the proceeds thereof may be conveniently applied to the purpose, but they refrain from the expression of any decided opinion on the point. Waiving this question, and assuming that toll-gates are to be got rid of, the Commissioners recommend that every parish which does not prefer taking upon itself the repair of the roads within its limits, shall pay 2*d.* in the pound on the amount of its assessment to a common fund, and that such further sum as may be required for the repair of the roads not taken by the parishes be raised by a rate-in-aid, to be levied in all parishes within the district of the Metropolitan Board of Works. This sum would probably be about 27,000*l.* The assessment of the whole district in 1858 was 12,031,151*l.*, so that a rate-in-aid of little more than one halfpenny in the pound would be sufficient. The parishes which do not manage their own roads would be called upon to pay the rate of 2*d.*, and also the rate-in-aid making 2½*d.* altogether. To other parishes it would be about one halfpenny. All the roads not undertaken by the parishes, as well on the south as on the north of the Thames, would be placed under the superintendence of the Metropolitan Roads' Commissioners. The debts of the indebted trusts should, it is suggested, be paid off by a general metropolitan rate of 2*d.* in the pound, or the sum might be advanced, as in New South Wales, by the Exchequer Loan Commissioners, a term of years being allowed for its repayment.

Mr. Spurgeon's New Tabernacle.—All the difficulties attendant on the purchase of a piece of freehold land for the erection of this Tabernacle have at length been overcome, and the site, which is near the Elephant and Castle, presents daily an altered appearance, so busily engaged are the workmen in getting it ready for laying the first stone. A foundation of concrete has already been laid at a cost of 580*l.*, and the ceremony of laying the foundation stone is fixed for Tuesday next, the 16th inst., when Sir S. M. Peto, Bart., M.P. will officiate. At the close of the ceremony, a tea meeting will be held in the Repository near the Elephant and Castle, after which a public meeting will be held in the same place, admission being by tickets at 2*s.* 6*d.* each, and at 5*s.* for reserved seats. The work will cost at least 21,000*l.* by the time it is completed. The funds in hand at present do not exceed 7000*l.*, but the building committee are encouraged in their undertaking by some liberal promises, which they confidently believe will be realised as the work progresses. The new building is to seat about 5000 persons, besides having a vestry, schoolrooms, lecture room, &c. Mr. Spurgeon has for some time been engaged in various parts of the country endeavouring to raise contributions towards the funds, and it is understood that his labours have been successful. The Baptist community by this time next year will therefore be able to assemble for devotion in the largest Dissenting place of worship in the kingdom.

Sale of the Star and Garter, Richmond.—Messrs. Gadsden, Winterflood, and Ellis sold by public auction at the Auction Mart, a few days since, the well-known Star and Garter Hotel on Richmond Hill. The property is copyhold, subject to a quit rent of 6*l.* per annum, and to customary fines on death or alienation, the fine to be paid by the purchaser being 975*l.* It is now let on lease for an unexpired term of 21 years, at a rent of 1500*l.* per annum. The property sold for 21,000*l.*

The Public Health.—The Registrar-General's weekly return exhibits a further reduction in the high mortality of the third week of July, the deaths in London in the week ending Saturday, August 6, having declined to 1337. In the corresponding weeks of the 10 years 1849-58 the average number was 1188, which, if raised in proportion to the increase of population, will become 1306. The present return is therefore only 31 above the average. During the week the births of 860 boys and 858 girls—in all 1718 children—were registered in London. In the 10 corresponding weeks of the years 1849-58 the average number was 1590.

## Provincial.

Aldershott.—Withinthis month the troops at Aldershott have begun to "camp out" in realearnest, the Duke of Cambridge having determined to accustom both men and officers to this most disagreeable phase of a soldier's life. For this purpose each foot brigade, accompanied by a proportionate force of cavalry and artillery, takes its turn to march out to Woolmer, and after remaining there a day or two returns to Aldershott by a different route, halting after each day's march, and camping on whatever ground is best adapted for the purpose. In accordance with this arrangement the second brigade, under Major-General the Hon. A. Spencer, consisting of the 4th Battalion of 60th Rifles, the 9th Regiment, the 2d Battalion of the 11th, a squadron of the 5th Dragoon Guards, and the A troop of Horse Artillery, left camp on the 4th inst. The men paraded at 2 A.M., and commenced their march for Woolmer Forest early

All were in full marching order, and equipped exactly as if going on actual service against an enemy. The force camped at Woolmer in the afternoon of the 4th, and remained there till daybreak of the 6th, when another march was made in the direction of Aldershott, and the men camped on the night of the 6th between Pystock Ridges and Fleet Pond. Here it stayed till the morning of the 8th, when another move was made to Sandhurst, in the woods around which the third halt was called till Tuesday, when the brigade was again early under arms, and returned to its former quarters at Aldershott. On these marches everything is strictly according to the military rules of service before the enemy. The same outpost duty and almost the same vigilance on the part of the pickets is exercised, and the men live not only on rations, but have to kill their own meat and make and bake their own bread. The camp now boasts its "influential organ" in the shape of a weekly paper entitled the *Aldershott Military Gazette*. It is of course almost exclusively devoted to camp affairs, giving the general news of the cantonments, rumours of approaching changes, &c. From it we learn that the number of persons in camp on the 1st inst. was 24,192—viz., 939 officers, 19,863 rank and file; wives of officers and soldiers, 1467; children of ditto, 1923. The number of horses was at the same date 4361.

BIRKENHEAD.—A strike took place amongst the Birkenhead cabmen last week, and not a single cab could be obtained in the township. The cause of this movement was the compulsory adoption of a 6*d*. fare in the new scale of rates issued by the local commissioners.

CHELTENHAM.—The seventh day's sale of Lord Northwick's collection, including the antique gems from the Poniatowski collection, and the miniatures, realised 1785*l*. The eighth day's sale, including miniatures, antique gems, bronzes, and works of art, realised 1665*l*. The sale of pictures by the old masters was resumed on Tuesday, when the proceeds of the ninth day's sale amounted to upwards of 3600*l*. The amount of the 11th day's sale exceeded 5450*l*.

DURHAM.—On Thursday morning, John Shaftoe Wilthew, who was convicted at the recent assizes of the murder of his wife, suffered the extreme penalty of the law in front of the county gaol in this city, in the presence of more than 5000 people. He admitted the justice of his sentence, but said his wife was a woman of most irritable temper, and that he had lived unhappily with her for years.

DURSLEY.—A murder of a most deliberate character was perpetrated at Dursley, Gloucestershire, on Sunday last. A man named Rutter, a blacksmith of the town, and his wife, were out drinking at a public-house, where they remained nearly the whole day. They were in different rooms, the female being drunk. While there, she was heard to say she "would do for him before morning," it being understood that she referred to her husband. The deceased left the public-house before his wife, and proceeding home, went to bed. His wife soon followed, and found her husband in bed fast asleep. She then procured his razor, and deliberately cut his throat from ear to ear. She subsequently wiped the razor, and placed it under his pillow. An inquest was held on Monday, when the jury returned a verdict of Wilful Murder, and the prisoner was committed for trial at the assizes.

FAVERSHAM.—On Tuesday evening an explosion took place at Messrs. Hall's gunpowder mills, about two miles from this town. Much excitement prevailed, and numbers proceeded in haste to the mills, but fortunately all the hands had left work at the time, and the damage was consequently confined to the building.

GLOUCESTER.—A meeting was held in this city a few days since under the presidency of Earl Ducie for the purpose of devising some substitute for "mops" or statute fairs. It was resolved to establish a general system of registration by opening a register-office for agricultural servants in every parish, to be connected with central offices in Gloucester, and such other towns as may be deemed most convenient. By way of compensating the labourers it was agreed that a general holiday should be given once a year, on some day to be fixed, in lieu of the "mop" holiday.

HULL.—A few days since a man named George Taylor, landlord of the Lord Durham public-house, Cross Street, in this town, had occasion to tap a puncheon of rum. For this purpose he had used a gimlet, but the hole made by the instrument not being large enough he had the folly to heat the kitchen poker to enlarge it. The spirit immediately exploded, burning him dreadfully and setting fire to the house. The housekeeper was in one of the back rooms, and had just time to escape unhurt; but two of Taylor's children were so alarmingly burnt that they died in a few hours. There were two other children in the place, one of whom was burnt to death in the house, and the other so much burnt that she died soon afterwards.

LEDBURY.—After the acquittal of Jones for the Ledbury murder he remained for a long time in the gaol in the state of excitement in which he was removed from the court, and required medical aid for some time before the officers of the prison could convince him that he had been acquitted. On his removal from the Shire Hall in the prison van, a large number of persons followed the vehicle to its destination, or lined the streets through which it had to pass; but, after the faint shout on the delivery of the verdict by the jury, there was no expression of popular feeling. Jones was aided by his brothers in Staffordshire in procuring the legal assistance which he had on his trial. By the same aid it is understood that he will at once proceed either to the United States or to Australia.

LEEDS.—On Saturday afternoon about 5 o'clock a respectable old man, called Richard Broughton, of Rose Cottage Yard, Roundhay, near this town, 67 years of age, was attacked in a field called Ox Pasture between Roundhay and Harehills, by two men, who fractured his skull with a bludgeon, and robbed him of a silver watch. Soon after the assault, the poor man was found in a state of insensibility and covered with blood, but he afterwards rallied and walked home, where he recovered so far as to be able to explain what had occurred. Surgical attendance was procured, but he died on the following morning. For the present his murderers have escaped, but 50*l*. reward is offered for their apprehension; and the chief constable of Leeds is taking steps which are expected to lead to their apprehension. So daring an outrage, committed in open daylight on a public and much-frequented footpath, and so near a large town, has rarely been perpetrated.

LINCOLN.—Carey and Pickett, the two men convicted at the last Assizes for the murder of Mr. William Stevenson, of Sibsey, in this county, were executed on Friday morning at Lincoln Castle. About 25,000 persons were present, but there were fewer women in the crowd than usual. Pickett struggled violently for about two minutes, but Carey appeared to be dead at once. Both prisoners made confessions which differed materially from the confessions previously made. Pickett, it may be remembered, stated that when they left the inn they had no intention of taking the old man's life, and to this statement he adhered in his confession, though he admitted that he struck the blow which caused death, and threw the body into the sewer. Carey in his confession admitted that he was "the worst" and "persuaded Pickett into it," attributing his evil courses to "drink."

LUTON.—On Tuesday last a shocking murder was committed in broad daylight on a public footpath near the ruins of Summeries Castle, about one mile from this town. The victim was the wife of a man called George Castle, who had been working in a malting at Ware. In consequence of a quarrel on the previous day she left her husband and went for protection to her parents, who reside at Luton. The husband followed, and, being denied access to his wife, would seem to have decided on revenge. On the following morning, having provided himself with a knife, he got into the house while his mother-in-law was from home, and persuaded his wife to return with him to Ware, for which place they left; but in about two hours afterwards her dead body was found by the roadside with the throat fearfully cut, the ground bearing marks of a desperate struggle having taken place. The police at once instituted an active pursuit, in which they were greatly assisted by several gentlemen and inhabitants of the town and neighbourhood. After a long search the prisoner was traced through several woods to Welwyn, where he gave himself into custody a few minutes before the arrival of the Luton police. The murdered woman was only 21 years of age, and had been married only six months.

WINCHESTER.—John Benjamin Haynes, who was respited last week for the Aldershott murder, has had his sentence commuted to penal servitude for life. The report of the medical inspector as to his state of mind, and the absence of motive or premeditation, led the Secretary of State to consider him a fit subject for the royal prerogative of mercy.

YORK.—On Saturday, at noon, John Riley, aged 36, was executed at the drop behind the Castle, for the wilful murder of his wife, Alice Riley, at Hull, on the 3d of July. He was dead about two minutes after the drop fell. There were from 6000 to 7000 spectators present, who upon the whole, behaved in a becoming manner.

## Ireland.

IRISH LEGAL APPOINTMENTS. — The judgeship vacant by the death of the Hon. Patrick Plunkett has been conferred upon Mr. David Lynch, Q.C. The new judge is a Roman Catholic, but has never taken a prominent part in politics. The chairmanship of the county of Louth, vacant by the promotion of Mr. Lynch, has been conferred upon Mr. Leahy, Q.C.

THE MEETING OF THE ROMAN CATHOLIC BISHOPS.—The proceedings of the Conference were brought to a close on Friday afternoon, being the fourth day devoted to the business in hand. The result of the bishops' deliberations has not yet been published, but it is announced that all the resolutions were adopted unanimously.

DR. CULLEN ON THE PEACE IN ITALY.—Archbishop Cullen has addressed a circular manifesto to the Roman Catholic clergy of the diocess of Dublin, in which he makes the following remarks on the peace and its effects as regards the Pope:—

"Peace is not as yet definitively concluded, and Italy is still convulsed. Attempts of the most wicked character are made by revolutionary and secret societies, as well as by wily and infidel statesmen, to rob the Pope of his temporal authority, which is so necessary for the free exercise of his spiritual powers. Were the Pope subject to any other Sovereign he would be obliged to yield in the management of the affairs of religion to the wishes of that Sovereign, or undergo continual persecutions, as we learn from the history of the first seven centuries of the Church, when innumerable pontiffs were either martyred by Pagan Emperors, or exiled and afflicted even by the Christian rulers of the East and West. Exhort your people therefore to pray that peace may be permanently restored; that the enemies of religion may be converted or covered with shame; and that our good and holy Pope may be not only triumphant in his present struggles, but that he may acquire all that power and influence which will enable him to spread the blessings of Catholicity over the world."

EXPLOSION OF GUNPOWDER AT BALLINCOLIG.—About half-past 10 o'clock on Saturday morning an explosion of gunpowder took place at the Ballincolig powder-mills. The refining house in which it occurred was razed to the foundations as if a mine had exploded under it, and five men who were at work in it were blown to pieces. An inquest has been held on the bodies, and a verdict returned to the effect that the cause of death was accidental, and that no blame was attributable to any person connected with the mills.

THE MURDER AT THE CURRAGH.—Three privates belonging to the 14th Regiment were tried last week and acquitted of the charge of murdering one of the unfortunate females that frequent the outskirts of the camp.

## Scotland.

THE BRITISH ASSOCIATION.—The opening meeting of the Association at Aberdeen has been definitively fixed. An intimation has been made to the secretaries on behalf of the Prince Consort that Wednesday, the 14th of September, will suit the convenience of his Royal Highness to attend and deliver the address from the chair. Everything promises that the meeting will be a great one.

SCOTCH PROPRIETORS.—A Parliamentary return has been issued on the motion of Mr. Kinnaird, M.P., from which it appears that the total number of proprietors having property of the value of 5*l*. and under 10*l*., in the valuation roll of the Scotch counties, so far as returns have been made, is 7024, and the total number of occupants of less than 50*l*. and more than 10*l*. 26,356. The total proprietary of the burghs is 6326, and the total occupancy of the same 56,350, thus making a grand total of 13,380 proprietors, and 82,706 occupants. The counties of Ayr, Caithness, Dumbarton, Edinburgh, Lanark, Linlithgow, and Perth refuse to furnish returns, and have thus been guilty of a contempt of an order of the House of Commons.

## Railways.

CHARING CROSS AND SOUTH-EASTERN.—An Act has been passed for extending the South-Eastern to Hungerford Market, and to a junction with the South-Western to Waterloo station, by which traffic may pass from the latter line to and from the London Bridge station, with access to the Hungerford Market terminus if the South-Western company desire it. A proposition had been made by the promoters of the Bill to give the trustees of St. Thomas's Hospital the sum of 20,000*l*. to enable them to build a new wing in the place of the one which the line will render unfit for hospital purposes; but the trustees of the hospital declined the proposition and required the company to purchase the entire hospital. The House of Lords Committee in passing the Bill expressed their opinion that it would have been better if the London Bridge Railway companies had entered into some arrangements for the purchase of the hospital, but as such had not been the case, the question of compensation must be settled by the parties as the law provided.

A TRAIN IN A BOG.—A singular accident occurred to a train on the Whitby branch of the North-Eastern on Saturday last, about two miles from Pickering, at a place called Fen Bogs. The line at this place is carried across an extensive swamp on piles, and as the mail-train from Whitby was passing the place the engine ran off the line, and plunged overhead into the mud, pulling the train after it. The train was a very heavy one, having many first-class passengers, and the scene which ensued may be more readily imagined than described. The engine-driver and stoker were both buried in the bog with the engine, but were extricated by the passengers. They were both injured, but not seriously. The passengers were thrown about in a strange manner, but beyond several cuts and bruises no further injury was inflicted. The accident is ascribed to the heat of the sun having caused the wooden framework on which the rails are laid to warp and raise up the line, so as to break its continuity.

## Law.

WESTERN CIRCUIT: DORCHESTER.—*Poaching Affray.*—*Tomebridge*, gamekeeper of Lord Portman, was convicted of shooting at Edward Matthews, with intent to do him grievous bodily harm. Baron Bramwell in passing sentence commented severely on the conduct of the prisoner in firing at the unfortunate man, simply because he and a companion who was with him had been convicted of poaching, and had been taking a few rabbits. His Lordship said that he had no love for poachers, but there was no need to shoot them. The law had made ample provision for their detection and punishment, and it was most essential that those men should know that, however outrageous as they might be, the law would protect them. He had consulted Mr. Justice Crompton on the subject, and they had come to the conclusion that he ought to pass a severe sentence, and that was that the prisoner undergo penal servitude for four years. EXETER: *Arson.*—*John Bolt*, 14, and *William Hellings*, 19, were convicted of setting fire to a stack of hay. Mr. Baron Bramwell said this was a very bad offence, and the prisoners were very bad boys and he would endeavour to make them better. He should give them such a punishment as they would never forget, for if they were going again to set a rick on fire they might remember how their backs tingled. He should sentence them to be imprisoned for one month, to be kept to hard labour and to be twice well whipped, once at the beginning of the term and once at the end of the term, and at the expiration of the month Bolt was to be sent to a reformatory for two years, and Hellings for five years; and he made this distinction because Hellings was a younger boy and had no parents or friends to take care of him. The idea of the whipping made young Hellings cry most terribly. A turnkey interfered to stop the

but the judge said he might cry now, but he would soon have something more to cry for.—*Daniel Bowers* was convicted of setting fire to a stack of barley, and sentenced to eight years' penal servitude. Bodmin: *Stephen Bell*, a surgeon practising at Weston-super-Mare, was charged with the murder of Captain Caddy, a retired naval officer. On the 2nd June last, prisoner arrived at Falmouth and had a quarrel with his mother and sisters about money, when one of the latter fetched Captain Caddy, who was 72 years of age. The old gentleman remonstrated with the prisoner, and begged him to leave the house. The prisoner became greatly excited, and a suggestion was then made that the police should be sent for to remove him. Upon this, the prisoner reached down a large Indian spear which was hanging in the passage. It was very long, and he broke the handle across his knee; and then said, "I'll do for the first that comes to me." The sisters rushed into the garden. The captain came to the door, when the prisoner stabbed him with the spear and he died in about an hour. The prisoner threw down the spear, and said to one of his sisters, "It is your fault that I have come to this." He afterwards said he did not deny doing it; but that Captain Caddy had sprung upon him, and he had taken the spear to use in his defence. The jury found the prisoner *Guilty* of Manslaughter. Mr. Justice Compton told the prisoner he had had a very merciful jury: but he should sentence him to penal servitude for life.

Home Circuit: Chelmsford.—*Arson.—Charles Joyce*, a boy 10 years of age, was charged with feloniously setting fire to a stack of wheat. The prisoner had been in the service of a farmer named Willis, at Hutton, near Romford, for two years, and had misbehaved himself upon several occasions. The fire took place on the 7th May, and a day or two before the prisoner flogged the prisoner for some great misconduct, and took him home to his father, who flogged him a second time, and he became very excited and angry. The prisoner went to Romford market on the day mentioned, and very soon after he was gone a wheat rick was found to be in flames. The prisoner ran away, and was taken into custody concealed in a ditch, and on being questioned admitted that he had set fire to the rick with a lucifer match. The jury returned a verdict of *Guilty*. Mr. Justice Crowder sentenced him to be confined for one month in the county gaol, and at the expiration of that period to be sent to a reformatory for five years.—*Charles Wright*, 13, described as an errand-boy, pleaded guilty to three indictments charging him with feloniously setting fire to a barn and other buildings at Lexden. The prisoner was in the service of the Rev. Mr. Papillon, residing at Lexden, and two of the offences alleged against him were setting fire to his master's farm buildings on the 28th and 29th of April. The third indictment was a charge of setting fire to some premises belonging to a miller named Vince, and it appeared that when the prisoner had reason to believe that he was suspected he took one of his master's horses and rode away a considerable distance into the county of Suffolk, and there turned the horse loose, and came back to Halstead, where he was taken into custody. The learned judge sentenced him to one month's imprisonment, and to be afterwards kept in a reformatory school for five years. Hertford: *Arson.—Ellen Grace*, 16, a good-looking girl, pleaded guilty to a charge of setting fire to a barn and other property. The prisoner had been in the service of a person at Ware, and on the day of the fire had a dispute with her mistress, and was heard to make use of threats towards her. In the course of the same evening a shed in which there were a number of valuable cattle was in flames; but the fire, fortunately, was extinguished without doing any serious mischief. The prisoner charged a boy who was employed upon the premises with being the guilty party, and she told such a plausible story that he was very nearly being committed for trial; but, fortunately, it was discovered that she was the real culprit. The prisoner now said that it was her temper that drove her to do it, but she was very sorry for it, and hoped the magistrate would forgive her. Mr. Justice Blackburn sentenced her to be kept in penal servitude for four years. Maidstone: *Arson.—Jonas Mitchell*, 20, a private soldier, pleaded Guilty to two indictments charging him with the offence of arson. Mr. Justice Blackburn, in passing sentence, said, that without any motive of revenge against the owner of the property—indeed, without even knowing who he was, the prisoner had deliberately set fire to some stacks of corn and caused considerable mischief, and all this without the slightest prospect of benefit or advantage. He was quite at a loss to account for such conduct, but, without regard to the peculiar circumstances of the case, the offence of arson was one of such a dreadful character that for the protection of the public it was necessary that a severe sentence should be passed upon every person who was convicted of it, and he therefore felt it to be his duty to order him to be kept in penal servitude for 10 years.—*James Wanklyn*, 21, another private soldier, pleaded Guilty to a similar charge. The learned judge said, that in this case the only object the prisoner appeared to have had in view in the commission of the offence was to escape from continuing in the position of a soldier. He would find that he had made a great mistake, and for years to come he would bitterly repent the act he had committed. He then sentenced the prisoner to 15 years' penal servitude. Croydon: *Arson.—Charlotte Hodges*, 40, and *Mary Helen Hodges*, 18, mother and daughter, were charged with setting fire to a dwelling-house in the occupation of William Hodges, with intent to injure the landlord of the house, and to defraud the Phœnix Fire Office. This case occupied the Court for several hours, but the facts lay in a very narrow compass. It appeared that the husband of the elder prisoner occupied a beer-shop called the Crystal Palace, close to the Town Hall in Croydon, and he was in difficulties, and in arrears with his landlord and the brewer. About two months before the fire happened there had been another fire in the house, but it was extinguished without much mischief being done, and a small claim was made upon the insurance company, which was paid. On the 8th July another fire occurred which proved on examination to have been wilful, large quantities of inflammable materials having been placed in situations to feed the flames. The most painful part of the case was that, supposing the fire to have been wilful, the house was in such a position that if the guilty intention had been carried out the consequences, in the destruction of human life, might have been most disastrous, as all the adjacent buildings were very old, and contained a large number of inmates. The evidence proved satisfactorily that the fire was evidently a planned one, and that no one but the prisoners could have been the perpetrators of it. The jury returned a verdict of *Guilty* against both prisoners, but recommended them to mercy, on the ground that they might have acted under the influence of others. Mr. Justice Blackburn, in passing sentence, said that they had been convicted of a most serious offence, and though the jury had recommended them to mercy on the ground that they had probably acted under the influence of another party, still there could be no doubt that it was by their hand that an act was committed which might have led to the most serious mischief. He therefore felt compelled to pass upon them a very severe sentence, which was that they be kept in penal servitude for 15 years.

Norfolk Circuit: Cambridge.—*Arson.—George Hunt* and *Charles Rampling* were indicted for feloniously setting fire to a stack of barley, the property of Mr. Kent, of Ditton, near Cambridge. On the afternoon of the 28th of April the prisoners were seen to go to windward of a stack of barley in a field by the side of the road from Cambridge to Newmarket, and a few minutes after they had left it some labourers observed that the stack was on fire; they therefore went after the prisoners, and took them into custody. When charged with the offence they excused themselves by saying that one of them had lighted his pipe, and was handing the lucifer to his mate, when it fell, and must have set the stack on fire. The stack, which was worth £60, was entirely destroyed. The jury, not believing this statement, found both prisoners Guilty, and they were each sentenced to 14 years' penal servitude.

Oxford Circuit: Monmouth.—*The Newport Murder.—Matthew Francis*, 26, tailor and lawyer, was tried and convicted on Saturday of the wilful murder of his wife, Sarah Francis, on the 14th of March, 1858, at Newport, by cutting her throat, under circumstances which were related at the time in our Provincial News. Mr. Justice Willes passed sentence of *Death*, holding out no hope of mercy.

## Obituary.

Sir George Staunton, Bart., died on the 10th inst., at his town residence, 17, Devonshire Street, Portland Place, in his 79th year. He was born at Milford House, near Salisbury, in 1781, and succeeded his father, the first baronet, in 1810. He was educated at Trinity College, Cambridge, and on leaving college was appointed chief supercargo for the East India Company, and was President of the Select Committee at Canton, and Commissioner of the Embassy to Pekin in 1816. In 1818 he was elected M.P. for St. Michael's and in 1820 he was returned for Heytesbury, both of which boroughs were abolished by the Reform Bill. In 1832 he was elected for South Hampshire, which he unsuccessfully contested in 1837 and 1847. In 1818 he was returned for Portsmouth, and sat for that borough until 1852, since which time he has not had a seat in Parliament. He was the author of a translation of the Penal Code of China, and has written several works which are held to be authorities on the subject of our relations with that country. As he has died without issue the title becomes extinct.

The Dowager Lady Hoskyn, Exeter, died on the 3rd inst., at Caldwell, Appleby, the seat of her son-in-law, Colonel Mure, after a few hours' illness. Her ladyship, who was second daughter of Sir John Ray, Bart., married in 1825 Sir David Hunter Blair, Bart., who died in 1857.

Mr. Baron Pennefather, who not very long since retired from the Court of Exchequer, of which he had been an ornament for upwards of 20 years, died suddenly on Sunday morning at his residence near Clonmel. He left Dublin in perfect health on the previous day in company with his medical attendant, and bore the journey to Clonmel remarkably well, but expired on the following morning at half past 7 o'clock. He had attained a patriarchal age and could have wanted but few years of fourscore and ten. He was called to the bar in 1795.

Lieut.-Colonel Edward Cornwall Legh, C.B., Colonel commandant of the 97th Regiment, died on the 3d June at Baroda, in Central India, from an attack of apoplexy. His entire military life since he entered the army, without purchase, as a cadet from the Royal Military College of Sandhurst, in 1826, had been spent in that gallant corps. He served with it on the stations of the Ionian Isles, Malta, the West Indies, and North America. He led it into action in some of the bloodiest actions of the Crimea, and especially in the attack of the ladder party on the Great Redan on the 8th Sept., 1855, when, of 15 officers and 300 rank and file who went with him into action, 201 of the men were killed and wounded, and of the officers he and one other alone escaped unhurt. Having been promoted Lieut.-Colonel for his distinguished services in the field, he had the good fortune eventually to obtain the command of the regiment in which he had won his advancement. In this post he was sent to India on the outbreak of the mutiny of 1857, and joined the Jaunpore field force under General Franks. He commanded the 97th in the action and capture of the Fort Mursutpore on the 26th January, 1858, and in the actions of Chanda and Amerapore on the 19th February, 1858, as well as at the battle of Sultanpore and the action of Pirie Bussarun on the 4th March, 1858, on which day he joined the 4th Division of Lord Clyde's army, took part in the last siege and final capture of Lucknow, and led his men to the assault of the Kaiserbagh. These services were repeatedly acknowledged in public despatches and by the honours conferred on Colonel Legh by the Crown, when suddenly, on the 3d June, having scarcely completed his 36th year, and being still in the active duties of his post, he broke down under the oppressive influence of the climate and expired in a few hours.

Mr. Bayle St. John, author of "Purple Tints of Paris," "Memoirs of the Dukes of St. Simon," "Montaigne the Essayist," and other works, died on the 1st inst. in his 36th year, after a long illness from pulmonary disease.

Mr. Daniel Owen Madden, author of "Chiefs of Parties," died suddenly in Dublin on Saturday last.

## Miscellaneous.

The Cholera.—"The cholera," says the *Medical Times*, "is again in the metropolis, and it has arrived by the old route from Hamburgh. One case proved fatal last week on board one of the Hamburgh steamers on her passage; another was sent to the Dreadnought and died there, also from a Hamburgh vessel; and a third died in a Hamburgh vessel on the Thames. Dr. M'William, who is doing duty temporarily for Sir William Pym, the superintendent-general of quarantine, has done all that he is empowered to do by having vessels from Hamburgh boarded at Gravesend, and suspicious cases of disease removed to the Dreadnought, or elsewhere; and similar instructions have been sent to our eastern and north-eastern ports." The Dundee papers state that on Saturday and Sunday four deaths occurred in Dundee attributed to cholera. No fatal case was reported on Monday, and it is hoped that the disease will not spread further. In Hamburgh, from the 25th to the 31st July, there were 424 cases, of which 332 were fatal. Letters from Osnabruck state that a choleraic epidemic has attacked 56 persons in that city, 28 of whom had died.

BIRTHS.—On Saturday, the 6th inst, at Viscount Boyne's, in Belgrave Square, the Lady Katharine Hamilton Russell, of a daughter—31st ult, at Cranford, the Lady Louisa Ponsonby, of a son—30th ult, the Hon. Mrs. Augustus Byron, of a daughter—1st inst, at Blythswood House, Renfrewshire, the Hon. Mrs. Bowlby, of a son—2d inst at Evington Place, Kent, the wife of Sir Courtenay Honywood, Bart., of a daughter—4th inst, at the Château de Chiceray, near Vendôme, the wife of the Right Hon William Massey, M.P., of a daughter—7th inst, at 27, Rutland Gate, the wife of W. P. Adam, Esq., M.P., of a son—9th inst, at Heath House, near Wakefield, the wife of E. A. Leatham, Esq., M.P., of a son—30th ult, at Paris, the wife of F. W. M. Bond, Esq., M.P., of a daughter—5th inst, at Denbies, Dorking, the wife of George Cubitt, Esq., of a son.

MARRIAGES.—On the 9th inst, at St. Paul's, Knightsbridge, the Hon. Beasts, 4920; Sheep & Lambs, 31,150; Calves, 332; Pigs, 400.

THURSDAY, Aug. 11.

Our trade is cheerful for good Beasts, which are by no means plentiful. Monday's prices are fully maintained for them. There is a good demand for Sheep, but prices are not higher. Trade is excessively heavy for Lambs. Calves meet with a dull sale. From Germany and Holland there are 260 Beasts, 1670 Sheep, and 450 Calves; from Ireland 60 Beasts; from the northern and midland, 300 Beasts; and 120 Milch Cows from the home counties.

Beasts, 980; Sheep & Lambs, 12,320; Calves, 660; Pigs, 120.

MARK LANE.—MONDAY, Aug. 8.

This morning's market was fairly attended. The supply of Wheat from Essex and Kent was moderate; about half or rather more consisted of the new crop, the quality of which was fair, but variable, and sold—the white at 42s. to 48s. per qr., Talavera 46s. to 51s., red 40s. to 44s.; for old our quotations are unaltered. Foreign was rather more inquired after, but without leading to much business; in the sales effected, however, the extreme prices of Friday were insisted on. For grinding Barley there is a fair inquiry at late rates. Beans and Peas are unaltered in value. The Oat trade is quiet, and Russian's are 6d. per qr. cheaper. Flour is without alteration. There was some quantity of new white Mustard Seed at market; picked samples brought 14s. per bushel.

FRIDAY, Aug. 12.

Since Friday last the weather in the south of England has been unsettled, with heavy showers; but in the north it was fine since Monday. Harvest operations do not appear to have been greatly interrupted, and the fall in the temperature will have prevented much damage to the corn by vegetating. In all the principal markets of the kingdom, Bristol excepted, the Wheat trade has been dull with a downward tendency of prices, in which all descriptions of spring corn have sympathised. Flour of fine quality maintained its previous value, but inferior has been very unsaleable. Here on Wednesday both English and foreign Wheat met a somewhat improved inquiry. The English was sold at prices barely obtainable on Monday, and for low priced foreign, Russian and French qualities, fully 1s. per qr. advance was obtained. The arrivals off the coast from Southern Europe this week are trifling. The sales include Polish Odessa Wheat at 41s. 3d. to 41s. 9d., Galatz at 38s., both per 480 lbs.; Odessa Ghirka at 41s. 1½d., Marianopoli at 45s. 3d., Taganrog Ghirka at 43s., all per 492 lbs.; Salonica Maize at 27s. per 480 lbs.; Ibrail Barley at 22s. 6d. duty paid, Danube at 20s. c. f. and i., and at 23s. all per 400 lbs. Excepting foreign Oats, of which the supply is large, the arrivals of all grain English and foreign this week have been small. The English Wheat fresh up being held firmly at Monday's prices could not be dispesed of, and the same may be said of foreign. Barley sells slowly at Monday's prices. Oats meet with but little inquiry, and late rates are barely supported. Flour is slow at Monday's prices.

ARRIVALS FROM AUG. 8 TO AUG. 12.

| | Wheat. | Barley. | Oats. | Flour. |
|---|---|---|---|---|
| English .. | 1590 qrs. | 20 qrs. | 950 qrs. | 1040 sks. |
| Irish .... | — ,, | — ,, | 220 ,, | — ,, |
| Foreign .. | 9010 ,, | 1590 ,, | 35560 ,, | 860 ,, / — brls |

LIVERPOOL, Tuesday, Aug. 9.—We had a fair attendance of millers and dealers at our Corn Exchange this morning. The demand for both Wheat and Flour was, however, on quite a retail scale, and holders were forced to relinquish the advance obtained yesterday. Indian Corn attracted but little attention, and prices were the turn in buyers' favour. Oats and Oatmeal were difficult of sale, and new qualities irregular in value. Egyptian Beans improved 6d. per qr. Peas and Barley unchanged. The reaction from the improvement of yesterday may be attributed to the fine weather and the quiet tone of Mark Lane.

FRIDAY, Aug. 12.—Grain market better. Wheat 1d. to 2d. dearer, and better demand. Flour firm at extreme rates. Oats and Oatmeal steady. Beans and Indian Corn dull. Heavy rains this morning; weather now clearing up.

*SATURDAY, AUGUST 20, 1859.*

MURRAY'S HANDBOOKS OF ENGLAND, FROM DOVER TO THE LAND'S END.

The following are now Ready.

I. HANDBOOK FOR KENT AND SUSSEX. Map. 10s.

II. HANDBOOK FOR SURREY, HANTS, AND ISLE OF WIGHT. Map. 7s. 6d.

III. MODERN LONDON. Map. 5s.

IV. HANDBOOK FOR WILTS, DORSET, AND SOMERSET. Map. 7s. 6d.

V. HANDBOOK FOR DEVON AND CORNWALL. Maps. 7s. 6d.

The object of MURRAY'S HANDBOOKS is to give matter-of-fact descriptions of what ought to be seen at each place, and is calculated to interest an intelligent English traveller, without bewildering him with an account of all that may be seen;—to avoid chronological details, and instead of dividing the account of a town from beginning to end, to select such local anecdotes as are connected with remarkable events which have happened there, or with distinguished men who have lived there,—to adopt as simple and condensed a style as possible, avoiding florid descriptions and exaggerated superlatives;—and to use the descriptions of others, where good and correct, rather than obtrude extracts from the Editor's own journals.

JOHN MURRAY, Albemarle Street, W.

JAMES ANDREWS, F.H.S., ARTIST TO THE "FLORIST, FRUITIST, AND GARDEN MISCELLANY," 7, West Street, Walworth Road, S., begs to thank Nurserymen, Florists, Seedsmen, &c., for the patronage so liberally bestowed on him the last six years, and to state that he still continues to give Drawings in Water Colours of Flowers, Fruits, and Vegetables, in his usual style of fidelity to Nature.

J. A. will furnish a Coloured Drawing and Ten Coloured Copies, same size as "Florist," for 2l. 10s. All writing extra.

A reference expected from unknown correspondents.

GLENNY'S GARDENERS' EVERY-DAY BOOK.—Price 5s.; free by post, 5s. 6d. Containing plain instructions for the cultivation of all classes of Flowers, Fruits, and Vegetables, and for the practical management of every department of Horticulture and Floriculture.

HOULSTON & WRIGHT, 65, Paternoster Row, E.C.

HOLCUS SACCHARATUS (Pampas).

"A VISIT AND A PLANT." A few copies only are left. Post free, 7d.

JOHN WILLDING CLARKE, Whittlesea, Cambs.

# News of the Week.

THE first Session of the new Parliament was brought to a close on Saturday by prorogation. The QUEEN'S SPEECH, which was read by commission, referred briefly to the circumstances which had interrupted the usual course of business during the session, and expressed a hope that the important matters thus left incomplete will be taken into earnest consideration at an early period of next session. It referred with satisfaction to the close of the war in Italy, and stated that various overtures have been made to ascertain whether HER MAJESTY will send a Plenipotentiary to a Congress of the great Powers, but that the information necessary to enable her to decide the question has not yet been received. At the same time it announced that HER MAJESTY would "rejoice to find herself able to contribute to the establishment of arrangements calculated to place the general peace on a satisfactory and lasting foundation." The Speech announced the departure of the British Ambassador for Pekin with the view to open direct communication with the Court of China, and congratulated Parliament on the complete restoration of tranquillity of India. It expressed confidence in the continued maintenance of friendly relations with all foreign Powers and States, and concluded by expressing satisfaction at the formation of a naval and permanent system of national defence must at all times be an object of paramount importance."

In the House of Commons on Saturday, before the House was summoned to the Lords for the Prorogation, Lord J. RUSSELL stated that he had received no official information to induce him to alter the opinion he had already expressed that there is no intention on the part either of Austria or of France to attempt to restore the late dynasties of Parma, Modena, and Tuscany by the employment of military force. In answer to Lord ELCHO, Lord PALMERSTON said it was the intention of Government to give every encouragement to the formation of volunteer rifle and artillery corps. Mr. TITE obtained leave to bring in a Bill to amend the Act for the better local management of the metropolis; and Mr. HUTCHINSON obtained leave to bring in a Bill to amend the law regarding Roman Catholic Charitable Trusts.

The EMPEROR OF THE FRENCH has signalised the triumphant entry of the Army of Italy into Paris by granting "a full and entire amnesty to all persons sentenced for political crimes or offences, or those who have been the object of any measures taken for public security;" by rescinding all the "warnings which have been given to the newspapers in France and the colonies;" and by directing the Minister of the Interior, in concert with the Ministers for Foreign Affairs and Algeria and the Colonies, to take the necessary measures to ensure the immediate execution of the amnesty. This act of grace was preceded by a remarkable speech delivered by the EMPEROR on Sunday evening at a banquet given by him to the chiefs of his Italian army. In this address HIS MAJESTY, after expressing his regret at the separation of a force "so well organised and so formidable," thanked the generals for their confidence, and said that it was flattering to him "who had never commanded an army" to meet with such obedience from those who had great experience in war. If success, he said, had crowned their efforts, he was happy to attribute the greater part of it to those able and devoted generals who had rendered his command easy, because, animated with the sacred fire, they had unceasingly given an example of duty and of contempt for death. He entreated them not to forget what they had done together, but to let the recollection of obstacles surmounted, of dangers avoided, of imperfections discovered, recur often to their memory, because "to every warrior past experience is science." HIS MAJESTY concluded by announcing that he was about to distribute a medal to all who took part in the campaign of Italy, and while hoping that it would sometimes recall him to their thought, he trusted that they would say while reading the glorious words engraved on it, "If France has done so much for a friendly people, what would she not do for her own independence."—A despatch from Rome announces the dismissal of Cardinal ANTONELLI from the office of President of the Council, and the appointment of Cardinal DI PIETRI as his successor. The new Tuscan Assembly has unanimously resolved that the dynasty of Lorraine can never be recalled or accepted to reign in Tuscany, and that it is the firm will of the people to form a part of the kingdom of Italy under the constitutional sceptre of the King of SARDINIA. Meanwhile the young GRAND DUKE has arrived in Paris, where, at the EMPEROR'S suggestion, he will remain to see what may transpire; while the French Government is said to have addressed a despatch to the Cabinets of the Great Powers, declaring that the EMPEROR will not assist the Princes of Italy to return to their dominions by force, nor permit Austria or any other Power to afford them military aid for such a purpose.

# Home News.

THE QUEEN'S CRUISE TO THE CHANNEL ISLANDS.—On Friday evening the Queen and Prince Consort embarked in the Victoria and Albert, accompanied by Prince Alfred, Prince Arthur, Princess Alice, and Princess Helena, and attended by Sir G. Cornewall Lewis as Secretary of State. The Royal squadron, consisting of the Victoria and Albert, Fairy, Osborne, Fire Queen, Dasher, and Emerald frigate, weighed

West Channel, bringing up in Yarmouth Roads for the night. At daylight on Saturday morning the squadron proceeded to sea through the Needles passage, and at about 9 A.M. anchored at St. Heliers, Jersey, under a salute from Elizabeth Castle. The bailiff and a deputation from "the States" immediately boarded the Royal yacht, and at 11 the Queen, Prince Consort, and the Royal family landed in boats at the Victoria pier, where they were received by "the States," the military authorities, and a vast concourse of people. After receiving an address presented by the bailiff, the Queen drove through the principal streets and visited the New Victoria College, where she was received by the Principal, Dr. Henderson, the Bishop of Winchester (who happened to be visiting this distant part of his diocess), and the principal inhabitants. In the afternoon her Majesty again landed at St. Aubyn's Bay, and drove across the island by St. Peter's Valley and St. Mary's to the breakwater at St. Catherine's where her Majesty re-embarked and returned to the Royal yacht, which was anchored off Mont Orgueil. The squadron remained at anchor all on Saturday night, and on Sunday morning proceeded to St. Pierre, Guernsey. Her Majesty landed and remained on shore about three hours, visiting the house of the Lieut.-Governor, General Slade, and the fort. Her Majesty was received with the greatest enthusiasm in both the islands. In the evening the squadron proceeded to Alderney, where it anchored for the night, leaving again at an early hour on Monday morning for Osborne, where her Majesty and the Royal family landed at 10 A.M.

THE COURT.—On Thursday week the Grand Duchess Marie and the Princess Marie of Leuchtenberg dined with her Majesty. On Friday afternoon the Queen held a Privy Council at Osborne, at which Parliament was ordered to be prorogued to Thursday, the 27th October, and the Royal Speech for closing the session of Parliament was submitted and approved. General Loven had an audience and presented a letter from the King of Sweden. Count Platen had an audience of her Majesty. Mr. Charles Lennox Wyke was presented on being appointed to a special mission to Nicaragua. Lord John Russell, Viscount Palmerston, the Lord Chancellor, and Earl Granville had audiences of her Majesty. Prince Alfred arrived from Edinburgh. On Monday afternoon the Queen drove out with Prince Leopold and Princess Louisa. The Prince Consort rode on horseback. Earl St. Germans, Lord Steward of the Household, arrived and presented addresses to the Queen, and remained on a visit to her Majesty. Sir G. C. Lewis returned to London. On Tuesday the Queen, accompanied by Prince Alfred, Prince Arthur, and Princess Hohenlohe, drove to Ryde. On Wednesday morning, being the birthday of the Duchess of Kent, the band of the Rifle Brigade played a selection of music on the terrace. In the afternoon her Majesty and the Prince Consort gave their annual dinner and fête to the seamen and marines of the Royal yachts, the detachment of infantry, the Trinity House and Coastguard men stationed at East Cowes, and the labourers and workmen employed at Osborne with their wives. The numbers entertained amounted to nearly 600, for whom dinner was prepared in tents erected on the lawn. After dinner rustic games and races were performed in the presence of the Queen, Prince Consort, and Royal family, the Duchess of Kent, Princess Gauromma of Coorg, and a select company. In the evening the Queen had a musical performance.

THE PRINCE OF WALES went to Glasgow on Monday and inspected some of the factories connected with the production of cotton fabrics. The Prince, accompanied by Colonel Bruce, Dr. Lyon Playfair, and other gentlemen, visited the spinning and weaving factory of Messrs. Scott & Co., at Bridgetown, and spent an hour in inspecting the processes of spinning and weaving, evincing great interest in all that was shown to him. His Royal Highness afterwards went to the extensive works of Messrs. Crum & Co., at Thornliebank, where the chemical processes by which various colours are produced, and the new method of fixing colours by means of albumen and steam were explained to him. The Prince subsequently visited the Royal Exchange and was received with much respect and cordiality by about 3000 gentlemen.

THE GRAND DUKE CONSTANTINE, accompanied by Colonel Greig and suite, paid a private visit to Portsmouth dockyard on Wednesday. His Imperial Highness landed at the Victoria Pier, Portsmouth, from the Ryde packet, and was received by Flag Captain Farquhar, of her Majesty's ship Victory. The Imperial party immediately proceeded in Admiral Bowles's carriages, which were in waiting, to the Admiralty House in the dockyard, from which, accompanied by Admirals Bowles and Grey, Captain Farquhar, and Flag Lieuts. Robinson and Swinburne, the Grand Duke proceeded round the yard, making a minute inspection of the ropery, smiths' shops, steam factory, steam basin, shipping, and the principal points of interest. His Imperial Highness afterwards returned to Ryde by the ordinary packet. The Russian screw frigate Polkane, 44, left Spithead on Saturday evening for the Baltic, calling at Havre. The liner Retvizan, 90, screw, and the 50-gun screw frigate Gromoboi, bearing the flag of Rear-Admiral Istomin, also left Spithead the same evening for the Baltic. The Russian frigate Svetlana remains at the Motherbank in attendance on the Grand Duke Constantine.

Saturday at the official residence of the First Lord of the Treasury in Downing Street. Another Council was held on Wednesday.

MINISTERIAL APPOINTMENT.—The Vice-Presidency of the Board of Trade, vacated by the appointment of Mr. Wilson as Special Commissioner to India, has been conferred on the Right Hon. W. Cowper.

THE PEERAGE.—The *Gazette* of Tuesday contains the official announcement that the Queen has directed letters patent to be passed under the Great Seal, granting the dignity of a Baron of the United Kingdom to the Right Hon. Henry Labouchere, and to the heirs male of his body lawfully begotten, by the title of Baron Taunton, of Taunton, in the county of Somerset.

PARLIAMENTARY MOVEMENTS.—The election for Devonport in the room of Mr. Wilson took place on Wednesday, when Sir Arthur Buller was returned by a majority of 75 over Mr. Ferrand, the numbers being 1189 to 1114. The election for Bodmin, vacant by Dr. Michell's acceptance of the stewardship of the Manor of Northstead, took place on Saturday, when Mr. Wyld was elected without opposition. Mr. Tremayne, High Sheriff of the county, who had come forward in the Conservative interest, and Mr. Murchison, who had offered himself as a Liberal-Conservative, declined to contest the seat on this occasion. There is a vacancy at Liskeard, caused by the appointment of Mr. R. W. Grey to the Commissionership of Customs. Mr. Bernal Osborne is the Liberal candidate for the vacant seat. The election for Hertford took place yesterday, when the Right Hon. W. Cowper was elected by a large majority over Mr. R. Dimsdale, the Conservative candidate. A new writ has been issued for Berwick in the room of Mr. R. A. Earle, who has accepted the Stewardship of the Chiltern Hundreds. There are two candidates in the field, Mr. Richard Hodgson in the Conservative interest, and Mr. Marjoribanks in the Whig interest. There are two candidates for Hull, vacant by the unseating of Mr. Hoare,—Mr. Harvey Lewis in the Liberal interest, and Mr. J. Somes in the Conservative interest. The Pontefract committee have presented their report recommending that Mr. Childers, the petitioner, should if possible be restored to the position in which he stood before the agreement between himself and Mr. Overend relative to the withdrawal of the petition.

THE DEANERY OF RIPON.—Lord Palmerston has conferred the Deanery of Ripon, vacant by the death of the Hon. and Rev. Dr. Erskine, upon the Rev. Thomas Garnier, B.C.L., rector of Trinity Church, Marylebone, and formerly for many years Chaplain to the House of Commons. He is an ardent supporter of the Evangelical party in the Church. The Rectory of Trinity, which becomes vacant by Mr. Garnier's elevation, and is worth 1030*l.* a year, has been conferred by Lord Palmerston upon the Rev. William Cadman, Rector of St. George the Martyr, Southwark, one of the leaders of the Evangelical party, and a most active parochial clergyman.

BOARD OF CUSTOMS.—The Hon. Spring Rice has resigned the office of deputy-chairman of the Board of Customs, on account of ill-health, and has been succeeded by Mr. F. Goulburn, the senior member of the Board. The seat vacant by the promotion of Mr. Goulburn has been conferred on Mr. Ralph William Grey, M.P. for Liskeard.

THE EAST INDIAN ARMY.—The War Department having decided on adopting the proclamation of the Governor-General of India in respect to the East India troops now in England, and giving them an opportunity of either transferring their services to her Majesty or claiming their discharge, Lieut.-Col. Hay, second in command at the East India depôt, Warley, arrived at Chatham on Thursday for the purpose of communicating the intentions of the Government to the East India Sappers and Miners attached to that establishment. The proclamation having been read to them, only 26 out of the 150 men present claimed their discharge, including 3 sergeants, 14 corporals, and 9 Sappers. They were immediately deprived of their arms, and sent to Warley, for the purpose of having their discharge papers made out.

## Foreign.

FRANCE.—The triumphal entry of the troops of the Italian campaign into Paris took place on Sunday in the greatest possible order. The Emperor and his suite marched at their head along the Boulevards from the Bastile to the Place Vendôme amid the acclamations of the crowd, which was immense. The defiling of the troops terminated at 2.30 P.M. The Empress and the Prince Imperial were stationed on the Place Vendôme; and one of the chief incidents of the day occurred when the Prince, who had been vigorously saluting the troops with his miniature sword, was carried by his nurse to the Emperor, who took him in his arms and kissed him, and then placed him before him on the saddle amidst the vociferous cheers of the troops and people. The soldiers bearing the four Austrian flags which had been taken from the enemy were received with ovations. The flags of all those regiments which were torn by balls or by grapeshot excited the population to enthusiastic cheers. In the evening a grand banquet, to which 300 persons were invited, was given by the Emperor to the principal chiefs of the army. At the close of the banquet the Emperor spoke as follows:—

"Gentlemen,—The joy I experience at finding myself again with most of the chiefs of the army of Italy would be complete able. As Sovereign and as Commander-in-Chief, I thank you again for your confidence. It was flattering to me, who had never commanded an army, to find so much obedience on the part of men who had great experience in warfare. If success had crowned our efforts, I am happy to attribute the greater part of it to those skilful and devoted Generals who rendered my command easy, because animated with the sacred fire, they have incessantly given the example of duty and of disregard of death. A portion of our soldiers are about to return to their homes; you yourselves are about to resume the occupations of peace. Nevertheless, do not forget what we have done together. Let the remembrance of obstacles overcome, of dangers eluded, of imperfections discovered be ever present to your mind, for to the warrior past experience is science. In commemoration of the Italian campaign I shall distribute a medal to all who took part in it, and I wish that to-day you may be the first to wear it. May it recall me sometimes to your memory, and while reading the glorious names engraved thereon let each exclaim, 'If France has done so much for a people who is her friend, what would she not do for her own independence?' I propose the health of the army."

The Emperor's *fête* took place on Monday with unusual magnificence, owing to the preceding ceremonies attendant upon the triumphal entry of the Army of Italy. The *Moniteur* has this week published the following important decrees:—

"1. A full and entire amnesty is granted to all persons sentenced for political crimes and offences or those who have been the objects of any measures taken for public security. 2. All the warnings which have been given to the newspapers of France and the Colonies are to be considered as not issued. 3 The Minister of the Interior, in concert with his colleagues the Ministers for Foreign Affairs and Algeria and the Colonies is ordered to take the necessary measures to ensure the immediate execution of the full and entire amnesty granted by the Emperor."

Their Imperial Majesties left St. Cloud on Wednesday for St. Sauveur, where they will remain till the 5th of September, when they will proceed to Biarritz. It is reported in Paris that the Empress is in an interesting condition. Generals Renault, Forey, Thiry, the Prince de la Moskowa, Admiral Tréhouart, Comte de Labedoyère, Baron Paul de Richemont, and Baron de Vincent have been created Senators. The young Grand Duke of Tuscany arrived on Tuesday at Paris. The Emperor gave him a very kind and gracious reception, and invited him to remain for some time at Paris in order to await what events may transpire.

SPAIN.—Accounts from Madrid state that the cholera has broken out in Spain, but up to the 16th inst. was confined to the province of Murcia.

HAMBURG.—On the 11th inst. the citizens of Hamburg, representing all the parishes, voted for the modification of the constitution as proposed by the Senate, which was adopted by a majority of 578 against 153.

BELGIUM.—The public baptism of the Count of Hainault took place on the 9th inst. in the church of St. Gudule, at Brussels, in the presence of the King and Royal family, the Archbishop of Malines officiating. The young Prince received the names of Leopold Ferdinand.

SWEDEN.—The funeral of the late King Oscar I. took place on the 8th inst., the body having laid in state for three days. The coffin was closed on the previous day, and locked by King Charles XV. and the Dukes of East Gothland and Dalecarlia. The ceremony of interment was witnessed by the Queen, the Duchess of East Gothland, and the Princess Eugénie, and by a vast assemblage of the higher ranks. It is computed that the lying-in-state was witnessed by 32,000 persons.

PRUSSIA.—The King of Prussia has rallied from his late attack, and the congestion of blood to the head has been relieved; but there is no expectation that his life can be prolonged. It is understood indeed that the next attack must prove fatal. All the Princes and Ministers have been recalled, and no attempt is made to conceal from the public the near approach of his Majesty's death.

AUSTRIA.—A Ministerial crisis has occurred at Vienna. A special commission, appointed by the Emperor for working out the new Constitution, sits daily. Baron Bach has tendered his resignation because the reforms he proposed were rejected by the Emperor; and it is reported that the new Constitution will be founded on aristocratical and clerical power.

SWITZERLAND.—Accounts from Zurich state that on the 15th the diplomatic corps, the members of the Federal Council, the Government of the Cantons, and the municipality of the town were present at the *Te Deum* in honour of the fête Napoleon. The French Ambassador, M. de Bourqueney, afterwards gave a grand banquet in honour of the day. On the 16th the plenipotentiaries witnessed the opening of the railway to Waldshut. M. de Bourqueney and Count Colloredo afterwards had a conference, and on the following day M. de Bourqueney had a conference with the Sardinian plenipotentiary. It is asserted that the Austrian plenipotentiaries decline to confer direct with the Piedmontese plenipotentiary, who protests against Lombardy being charged with any portion of the Austrian debt. All the plenipotentiaries have accepted the invitation of the Federal Council to visit Berne.

ITALY.—The *Giornale di Roma*, of the 11th, contains the following official announcement of the dismissal of Cardinal Antonelli:—

"The Holy Father, desirous of exonerating the Very Eminent and Very Rev. Cardinal Giacomo Antonelli from the Presidentship of the Council of State, has deprived of force the law of the 10th September, 1850, and his Holiness has deigned to name President of the Council the Very Eminent and Very Rev. Cardinal Camillo di Pietri."

Despatches from Florence of the 16th inst. state that the proposition of Signor Ginori declaring that the dynasty of Lorraine could be neither received nor accepted to reign in Tuscany was agreed to [illegible]

Manzi, Counts Della Gherardesca, Franchesi, Piccolomini, Borghese, and M. Adami then proposed the following resolution, which met with unanimous support:—

"That the assembly declares it to be the firm will of Tuscany to form a strong part of the kingdom of Italy under the constitutional sceptre of King Victor Emmanuel."

The statues of the Emperor Napoleon and King Victor Emmanuel have been placed in the hall of the Deliberative Assembly. General Garibaldi has retired from the Sardinian army and has arrived at Leghorn, having accepted the chief command of all the forces of Central Italy. Letters from Modena of the 16th inst. state that after a solemn service had been performed at the cathedral, at which all the bodies of the State were present, Chevalier Farini opened the National Assembly in the grand hall of the palace amid enthusiastic cheers, and concluded by depositing the powers given him as Dictator in the hands of the deputies. He then urged them to express truly and with that calmness which is the result of right, their wishes for the definitive settlement of the constitution of the country, and in addressing himself to Europe said that they were ready to give to the civilised world all the guarantees of order and peace, on the condition that liberty was assured to them, and that Italy shall belong to the Italians. On the following day Chevalier Farini quitted Modena for Parma and Piacenza to accept the dictatorship offered to him by the municipality. On Sunday afternoon the municipality of Milan inaugurated the statue of Napoleon I. by Canova, in the Palais Brera, in the presence of Marshal Vaillant, the Sardinian authorities, and a large concourse of the people. Music was performed and guns were fired during the ceremony. On Monday a solemn *fête* was celebrated at Milan in honour of the Emperor Napoleon. In the morning a *Te Deum* was performed in the cathedral in the presence of the King, Marshal Vaillant, and other officers, the magistrates, and the national guard. A grand spectacle afterwards took place in the arena, the expenses of which were defrayed by the municipality, and the receipts destined for the wounded. A *déjeûner* was also given by the King to Marshal Vaillant and 100 superior officers of the French army at the Royal palace. His Majesty proposed the health of the Emperor Napoleon, Prince Carignan that of the Empress and the Imperial Prince, General della Marmora that of the French army, and Marshal Vaillant that of the King of Sardinia, concluding his speech with these words:—

"To the Chief of this fine and powerful army, the standards of which were united on the Black Sea and on the plains of the Po with the French eagle, and which on every occasion showed itself as a noble rival of our army! To the heroic King, who holds the ancient and noble sword of the house of Savoy, who made it shine with great lustre in the sun of Palestro and Solferino!"

The King returned to Turin on Wednesday evening, and was welcomed with loud cheers by a large crowd which assembled at the railway station. General Ulloa has sent in his resignation, which has been accepted. Advices from Naples to the 14th inst. state that the remaining Swiss soldiers having refused to comply with the new regulations, the Government has ordered the Foreign Legion to be disbanded.

Ionian Islands.—Sir Henry Storks, the Lord High Commissioner, has issued the following characteristic notification:—

"The Lord High Commissioner has received during the last three months several anonymous letters. His Excellency hopes that it is unnecessary for him to declare his abhorrence of a practice at once unmanly and cowardly. His Excellency requests that this system of moral assassination may cease, and desires it to be distinctly understood that for the future every anonymous communication will be returned to the post office whence it came, with instructions to the postmaster to place it in a conspicuous part of the office, in order that the writer may reclaim it, if he thinks proper to do so. If any person has any charges to bring against individuals, or any complaints to make for the Lord High Commissioner's consideration, they must be preferred openly and substantiated in person. His Excellency would remind the writers of anonymous letters that they are not living under the Venetian Republic, and that the 'lion's mouth' is not a national institution."

Turkey.—Advices from Constantinople to the 10th inst. state that since the Sultan's return he has given M. de Thouvenel, the French Ambassador, a most gracious reception. Sir Henry Bulwer has given an explanation respecting the British squadron having been at Alexandria—namely, that it was there in honour of the contemplated visit of the Sultan. Disturbances have taken place in Candia, and some gendarmes have been strangled and put to death. The Czar has presented the Sultan with the decoration of the Order of St. Andrew in diamonds, valued at 1,000,000 piastres, in acknowledgment of the reception recently given to Grand Duke Constantine.

India.—A telegraphic despatch was received yesterday in anticipation of the Calcutta mail of the 16th ult. About 5000 of the local European force in Bengal and the provinces have their discharge; only one man of the 5th Europeans at Berhampore remains under arrest. New duties on stamps, receipts, and bank notes have been proposed in Council. The King of Oude has been released. The New Five and a Half per Cent. Loan was from 5¼ to 5½ discount.

United States.—Mr. Buchanan has addressed a letter to the papers, stating his determination not to allow himself to be put in nomination for re-election to the Presidency. Mr. Richard Rush, who was American Minister to the English Court from the latter part of 1817 to the summer of 1825, died on the 1st inst. at Philadelphia, having nearly completed his 79th year. He had been honoured with a grand banquet at New York. It is stated that John Mitchell (the Irish exile) was about to discontinue publishing his pro-slavery journal, and pay a visit to Europe.—Virginia Stewart, the woman shot by Mr. Robert C. Macdonald on the steps of the Brandreth Hotel, New York, has died, and the jury at the inquest returned a verdict that she came to her death "by a pistol-shot wound at the hands of R. C. Macdonald on the 23d July."

Canada.—A case of abduction by the Roman Catholic priests, in which a young lady was inveigled from her parents into a convent, where she was kept concealed, has caused great excitement throughout Canada. The young lady was the daughter of the Hon. Leander Starr, and was educated in France, where an attempt was first made to pervert her from the Protestant faith, in which she had been carefully trained. About two months ago she was missed one morning, and in her bedroom was found a note stating that she had felt it her duty to God to leave her parents in such religious peace in conventual life. Her father at once commenced a search. The Roman Catholic bishop of Montreal gave him leave to search the convents, but the search was unavailing. In two or three days another letter came from Miss Starr stating that she was happily placed in a convent where she could forget the world. The bereaved father prosecuted the search for his lost child for six weeks in all parts of the colony, and was at last successful. The daughter was discovered in a convent in Toledo into which her father gained entrance by a stratagem—much wasted away by sickness and ardently wishing to return to her parents. Proceedings at law are to be taken against four individuals—one being the Rev. Professor of the Seminary of Montreal, who, in a letter to the press, explains his part in the transaction, glorying in what he did, and stating his willingness to repeat the experiment.

West Indies.—The reports received by the Trent state that the Paramatta was still on the reef on the 19th July, but hopes were entertained that she would eventually be got off. A proposition, assented to by the Governor of Jamaica, to introduce a portion of the black population from the Southern States of America, at present resident in Canada, has not been favourably received by the planting body.

Mexico.—Accounts from the city of Mexico to the 19th July state that Miramon had issued a manifesto in which he promises to protect the clergy in their power and wealth, favours the plan of a dictatorial government, and declares it to be the established policy of Mexico to guard against the encroachments of the United States.

# Parliament.

## HOUSE OF LORDS.

Saturday.—The *Prorogation*.—The *Royal Assent* having been given by commission to the Income-Tax Bill, the Consolidated Fund (Appropriation) bill, the Stamp Duties Bill, and a number of other public and private bills, the House of Commons was summoned to the bar, when the Lord Chancellor then read the *Queen's Speech*, as follows:—

"My Lords and Gentlemen,

"We are commanded by her Majesty to release you from further attendance in Parliament, and at the same time to convey to you her Majesty's warm acknowledgment for the zeal and assiduity with which you have applied yourselves to the performance of your duties during the session, if Parliament now about to close.

"Various circumstances which occurred after the termination of the last session of Parliament prevented the completion of important matters which her Majesty pointed out to the attention of her Parliament in the beginning of the present year: but her Majesty trusts that those matters will be taken into your earliest consideration, at an early period of the next session.

"The war which has broken out in Northern Italy having been brought to a close by the Peace of Villafranca, various overtures have been made to her Majesty with a view to ascertain whether, if conferences should be held by the great Powers of Europe for the purpose of settling arrangements connected with the present state and future condition of Italy, a plenipotentiary would be sent by her Majesty to assist at such conferences, but her Majesty has not yet received the information necessary to enable her Majesty to decide whether she may think fit to take part in any such negotiations.

"Her Majesty would rejoice to find herself able to contribute to the establishment of arrangements calculated to place the general peace on a satisfactory and lasting foundation.

"Her Majesty, in accordance with the stipulations of the Treaty of Tientsing, has instructed her Plenipotentiary in China to repair to the Imperial Court at Pekin, and her Majesty trusts that such direct communication with the Imperial Government will have a beneficial effect upon the relations between the two countries.

"Her Majesty commands us to inform you that she looks forward with confidence to the continued maintenance of those friendly relations which so happily subsist between her Majesty and all foreign Powers and States.

"Her Majesty is glad to be able to congratulate you on the complete restoration of tranquillity in her Indian territories. It will be her earnest endeavour to promote their internal improvement, and to obliterate the traces of those conflicts which her Majesty witnessed with such deep concern.

"The financial arrangements of that portion of her Majesty's empire will continue to engage her Majesty's earnest attention.

"Her Majesty has had much satisfaction in giving her assent to the Bills which you presented to her for the formation of a naval and military reserve force. A complete and permanent system of national defence must at all times be an object of paramount importance.

"Gentlemen of the House of Commons,

"Her Majesty commands us to convey to you her cordial thanks for the readiness and zeal with which you have provided the necessary supplies for the service of the year.

"My Lords and Gentlemen,

"Her Majesty commands us to express to you her heartfelt gratification at witnessing the general well-being and contentment which prevail throughout her dominions. The happiness of her Majesty's people is the object dearest to her heart.

"In returning to your respective counties you will have [illegible]

[illegible] great ends and her Majesty fervently prays that the Great Head of All things may attend your exertions for the welfare of those realms for the maintenance of which Her Majesty's subjects."

The Commission for proroguing Parliament was next read, after which the Lord Chancellor declared Parliament to be prorogued until the 31st October.

## HOUSE OF COMMONS.

Friday.—*The Slave Trade*.—Mr. Cardwell moved a resolution expressing the respect of the House for the humane manner in which the King of Portugal and the Emperor of the French have acted in connection with the slave trade.—Mr. Layard seconded the motion.—After a few remarks from Mr. Cave, Sir G. Grey congratulated the House on being the last day of the session, and the House being of the same opinion should not proceed. The motion was withdrawn.—Mr. Bagge was elected a director of the Chelsea Waterworks Company, in the room of Mr. S. E. S. Freeling, resigned. Mr. Charles Cave Jones was appointed by the board of guardians, when the House was counted out.

Saturday.—*Pontefract Election*.—Mr. Wortley called attention to the report of the Pontefract Election Committee, and especially to Mr. Childers (the petitioner against his return) and resigning his seat on the ground that the borough was [illegible].—Mr. Gilpin presented a petition from the borough of Sudbury, praying the House should enforce and make the law more stringent for the prevention of bribery at elections.—Mr. Bouverie moved the second reading of the Divorce Bill.—Sir G. Grey said he did not think the House had any jurisdiction in the matter. The only person who could oppose the bill was Mr. Cresswell, who could either refer the matter to an arbitrator and abide by the award, or accept the Chancellor's proposal and leave the question in dispute to be decided by the Ecclesiastical Courts.—Mr. Malins moved the second reading of the Divorce and Matrimonial Causes Bill.—Sir J. Pakington suggested that the proper course would be to take the opinion of the Judges on the matter.—Mr. Cresswell said he was most desirous that Mr. Cresswell should be placed in the same position by which he was before the petition was withdrawn. And by that course he would be willing to settle the question.—Sir J. Pakington and Sir G. Grey [illegible] that the bill should be withdrawn, and that Mr. Cresswell should be left to his remedy in the Ecclesiastical Courts.—Mr. Malins and Mr. J. Evans expressed their opinion that the House had no power to withdraw the order for the second reading of the bill.—Lord J. Russell [illegible] Mr. Cresswell's proposition, which was then withdrawn.—Mr. Malins moved the second reading of the bill.—Mr. Wortley and Mr. J. Evans opposed the motion.—Mr. Cresswell [illegible] the House had no power to withdraw the order for the second reading of the petition.—Lord J. Russell [illegible] Mr. Cresswell's proposition, which was withdrawn.—Mr. Malins moved the second reading of the bill.—Mr. Wortley and Mr. J. Evans opposed the motion

## Metropolis and its Vicinity.

NEW FOREIGN OFFICE.—On Wednesday a deputation of architects waited on Lord Palmerston by appointment to protest against the adoption of the Gothic style for the Foreign Office. The gentlemen present were Messrs. Banks, Barry, Bell, Broderick (Leeds), Clifton, Cockerell, R.A., Donaldson, Falkener, C. Fowler, jun., H. B. Garling, P'Anson, Kerr, Lamb, Low, Mee, J. W. Papworth, Scoles, Smirke, A.R.A., Thomson, and Watson, with communications of assent to the proposed step from Messrs. Ashpitel, Bellamy, Coles, Davies, Hesketh, Owen Jones, Penrose, Walters (Manchester), and many others. The deputation was introduced by Mr. Tite, M.P., who addressed his lordship at some length, and was followed by Mr. Smirke, Professor Donaldson, Mr. Coningham, M.P., Mr. Lamb, Mr. Kerr, and Mr. Watson. Lord Palmerston in reply said—

"He was glad to receive the assurance that trained men of science and judgment approved the course which he had felt it his duty to pursue. He could excuse the mania in some quarters for building Gothic habitations in the country, by recollecting that those might be prompted by the vicinity of the Elizabethan manor-house, which itself was the successor of the Gothic castle. But in regard to those building Gothic habitations in town, he felt that there were people who had notions which were totally out of date. A public office was, in fact, the habitation of the chief and his staff during the day, and he knew of no style so suitable to an English habitation as the horizontal, or classic, or Italian, or whatever name its branches might have gained. A public building ought to be handsome externally, while convenient in the interior; and the style which he preferred undeniably gave buildings which combined those qualities. He believed that in the erection of a handsome building the style that he preferred allowed a reasonable economy to be observed internally; the contrary, with regard to Gothic, had been practically taught him at Westminster and elsewhere. He felt that he had only to repeat the statement made on a previous occasion, viz., that he had so strong an objection to the Gothic style for the present purpose that he should think it his duty, in office or otherwise, to protest against the erection of a building different from that which he saw gave him such grounds for selection; he could say, in short, that his mind was determined not to have Gothic, but Italian."

ST. PAUL'S CATHEDRAL.—The Bishop of London has appointed the Rev. Thomas Ainger, Vicar of Hampstead, to the Prebendal Stall in St. Paul's Cathedral, vacant by the death of the Rev. A. M. Campbell, incumbent of Paddington.

MR. SPURGEON'S NEW TABERNACLE.—The foundation stone of this long talked of building was laid on Tuesday in the presence of about 3000 spectators. The spot selected for the site of "the Tabernacle" is at the corner of the Newington Road, facing the Elephant and Castle, and at right angles with the large building which has recently been erected as a horse repository. The ground was formerly occupied by the almshouses belonging to the Fishmongers Company. The building is to be in the Grecian style, the portico and main entrance abutting on the Newington Road. The ground plan is to form a large quadrangle, the floor of the chapel being considerably raised, and access gained to it by a broad and massive flight of steps leading up to a portico supported on large Corinthian columns of Bute stone. The total width of the building will be 86 feet, the length 195 feet, and the height to the roof 85 feet, exclusive of the lanterns for light and ventilation. The floor will be raised 14 feet above the level of the ground, and the whole of this extensive basement will be entirely occupied by school and lecture rooms, the chief school being 81 feet by 78, and about 15 high. In addition to this there will be a lecture room, 81 feet by 56, and capable of accommodating 800 persons, with four separate class rooms, each 14 feet long by 26 feet wide. The chapel, which is over these schools, will be 146 feet long by 81 wide, and with two deep tiers of galleries on either side. In this respect the interior will rather resemble that of the Surrey Music-hall, but on a larger scale, as each row of galleries in Mr. Spurgeon's building will accommodate six rows of sitters. The ground-floor space of the Surrey Hall is only 8625 feet, whereas the proposed Tabernacle on the ground floor will be no less than [illegible] feet, or one-third larger than the structure in accommodate 5800 persons with comfort. The fronts of the galleries will be of ornamental cast-iron, with enriched cast-iron columns supporting the galleries and rising from the upper tier to the roof, which they will carry on a series of small arches. Though no great efforts have been made in the way of ornamentation, the proportions of the interior are good, and the effect of the whole when finished will be handsome and striking. The facilities for entering and leaving the building are most ample, there being no less than 16 doors to the chapel. Each gallery has its separate door and staircase, and all the staircases are of solid stone. The cost of the building is to be 21,500*l*., but fittings and other matters will probably swell this amount to 25,000*l*. before the edifice is opened for Divine service, which can hardly be earlier than the spring of 1861. Of course, like all other buildings, it is affected by the present strike, and no progress can be made till masters and workmen have settled their dispute one way or the other. The ceremony of Tuesday differed in no respect from other ceremonies of the same kind, except in the display of banners bearing scriptural sentences. Stretched between the poles which supported the foundation stone was a strip of pink calico, on which laurel leaves were loosely sewn in the form of the words, "Christ is the corner stone." Immediately beneath this were two or three boughs of evergreens covering another strip of white calico, with the inscription, "You are truly welcome." Another huge blue banner bore the inscription in letters of silver, "Spurgeon must have room to preach, and thousands to hear;" and by its side, in the same style of decoration, was one bearing the words, "Accept, O Lord, the free-will offerings of our hands;" and between these two was the word, "Aid," in large letters of silver upon blue ground. Other banners were inscribed, "Let us build," and "Behold, I lay in Zion a stone, a tried stone, a sure foundation stone," &c. Most of the visitors were in their places by 2 o'clock, at which time Sir S. M. Peto, accompanied by Mr. Spurgeon, Mr. John Spurgeon and other ministers connected with the Baptist persuasion, ascended to the platform. The Old Hundredth Psalm having been sung and a prayer said by Mr. Spurgeon, a very long document, called a Statement of the Deacons, was read. This statement gave a sketch of the pastors and antecedents of the Baptist persuasion in Southwark from the year 1652, entering at considerable length into an account of the lives of the chief pastors down to the ministry of Mr. Spurgeon. At the conclusion of this statement Sir S. M. Peto proceeded to lay the stone, underneath which Mr. Spurgeon placed a bottle, containing a copy of the Bible, of the Baptist's Catechism, of Dr. Ripon's Hymn Book, and the programme of the day's proceedings, in the cavity prepared for it. When these formalities had been gone through the stone was slowly lowered into its place, and Sir S. M. Peto addressed the spectators at great length, expressing his satisfaction that the building would be "something of a cathedral to his denomination," and that "though strictly denominational it would be in no respect sectarian." Mr. Spurgeon and Mr. Dowson then delivered brief addresses explanatory of the doctrines of the Baptists and of the objects they were met to carry out, after which a hymn was sung and the avenues leading to the platform were thrown open for all to see the stone, on which it was earnestly hoped the friends of the cause would place an offering as they passed by. This appeal was most liberally responded to, the amount collected showing beyond a doubt that there was no lukewarmness on the part of the supporters of the proposed edifice. A friend at Bristol, through Mr. E. T. Inskip, placed on the stone a cheque for the munificent sum of 3000*l*. Mr. Inskip, while placing this contribution on the stone, stated that if 40 gentlemen could be found to give 50*l*. each, or 20 to give 100*l*., his friend would undertake to double the total amount. On the spot several gentlemen immediately accepted this challenge amid much cheering. Mr. Spurgeon himself laid down 100*l*., Mr. Passmore 50*l*., Mr. Morgan 50*l*., and Mr. James Low 147*l*. In addition to these there were many sums of 5*l*., 10*l*., 20*l*., and 25*l*., the total amount given being between 4000*l*. and 5000*l*. In the evening a large number of Mr. Spurgeon's congregation assembled in the galleries over the late horse repository at a tea meeting. Later in the evening a public meeting was held in the same place under the presidency of the Lord Mayor, when the objects and usefulness of the Tabernacle were pointed out by various speakers, and a liberal collection towards the expenses of the building was made at the close of the proceedings.

THE BUILDERS' STRIKE.—Up to the present moment there appears to be no immediate prospect of bringing the existing differences between the employers and their workmen to a satisfactory settlement, though several of the smaller masters have opened their shops unconditionally, both as regards signing the document and making a declaration. In the meantime both the Central Association of Master Builders and the United Conference of the Building Trades have entered upon a paper war, and it is to be feared that certain expressions have been used upon both sides which will tend to infuse into future discussions an amount of irritation by the absence of which the struggle hitherto has been singularly characterised. On Tuesday afternoon the Central Association held a meeting at the Freemasons' Tavern, over which Mr. G. Plucknett presided. The result of the proceedings, which lasted three hours and a half, and were conducted with closed doors, was an unanimous determination to adhere to the original reso- lope's works be resumed, the members of the Central Association decline to open their establishments. It was stated that there had not been at any time any wavering from this determination, and that the resolve to adhere to the declaration is as strong as when it was first proposed. In the evening a delegate meeting from the various trades of the metropolis was held at Shaftesbury Hall, Aldersgate Street, for the purpose of taking into consideration the best means to be adopted in consequence of the peculiar position in which the men were placed "by their employers locking them out." Among the delegates present were those representing the Ship-makers of the Port of London, the Block-coopers, Smiths, Tailors' Labour Agency, Silver Spoonmakers' Society, Tin Plate Workers, French Polishers, Cabinet-makers, Cork-cutters, Second Society of City Shoemakers, Bootmakers, West-end Ladies' Shoemakers, Pattern-Boilermakers, London Society of Compositors, Executive Council of the Amalgamated Engineers, Bookbinders, Umbrella and Parasol Weavers, Boot and Shoemakers, Masons' Society, Joiners and Carpenters, Plasterers, and other branches of the building trades and labourers. After some discussion the Chairman said that as at present advised the men would not return to work at Messrs. Trollope's unless the nine hours were conceded. They were on strike for that movement and they must have it. Mr. W. [illegible] (Secretary to the Amalgamated Engineers) then moved a resolution declaring the opinion of the meeting that the trades of the United Kingdom are in duty bound to support the Building Trades in the present struggle. Upon this Mr. Edwards, from the Tailors' Labour Agency, moved an amendment, recommending that the claim on the part of the men for nine hours' labour, instead of 10, be laid aside, in the hope that it may hereafter be amicably and satisfactorily adjusted, and that a deputation be appointed to wait on the Committee of Master Builders and respectfully urge upon them the immediate withdrawal of the offensive document. This amendment was received with hisses, and, not meeting with a seconder, the original resolution was carried unanimously. The meeting then adjourned for a week.

THE GREAT EASTERN.—It is announced that the Great Eastern is to leave the Thames for the New-land, the 3d of September, and will proceed thence to Portland, Dorsetshire, from which place she will make a trial trip on the 8th, to a distance, probably, of 600 miles. The trip will probably be extended to two days, and a limited number of first-class passengers will be taken by special arrangement. It is also announced that the ship will leave Portland, Dorsetshire, for Portland, United States, on or about the 15th of September, and that first-class passengers will be taken at fares ranging from 18*l*. to 35*l*. Mr. Charles Capper, the manager of the Victoria Docks, has made a proposal on behalf of Mr. Lever, M.P., to charter the Great Eastern for a voyage out and home—that is, from some safe port in Great Britain to some safe port in North America for the sum of 20,000*l*., the ship to be provided with accommodation for 3000 passengers, and to steam 14 knots an hour upon the trial trip. The directors, however, have declined the offer.

THE NEW STREET INTO COVENT GARDEN.—On Tuesday the new street in continuation of Bedford Street, Strand, was opened into Tavistock Street, Covent Garden. In the centre of the street, at Southampton Street, a bar is erected, showing the boundary of the Duke of Bedford's estate.

FOUNDERING OF THE BLENHEIM INDIAMAN.—On Saturday the news reached Lloyd's of the loss of the ship Blenheim, Captain Headley, in the Bay of Bengal, with the loss of her commander, second officer, and 20 of her crew. The Blenheim was one of the fine fleet of Indiamen owned by Messrs. Duncan Dunbar & Sons, of Limehouse, and was about 700 tons register. She was on her return voyage, and left Akyab on the 1st June for Calcutta. On the 16th she encountered a fearful gale, and as it became apparent she must founder the captain and crew took to the boats. They had scarcely done so when the ship went down. One boat succeeded in sighting land, and one boat reached the island of Rawree; the other was swamped in the surf which swept the beach, and the captain, first mate, boatswain, cook, and nine men perished.

THE HYDE PARK CORNER INDICATOR.—At the meeting of the Board of Works of St. George's Hanover Square, an application was received from M. Guerin asking permission to remove the indicator from the site it now occupies near Apsley House to the spot occupied by the obelisk at Hyde Park Corner, in order to allay the angry feelings of the Duke of Wellington. M. Guerin and Mr. Ponsonby were called in, and informed that as the Board had not received an answer from the Home Office on the subject, they could not decide on the application, but that it would be brought before the vestry.
